14. From my brother[13] Severus, to love my kin, and to love truth, and to love justice; and through him I learned to know Thrasea, Helvidius, Cato, Dion, Brutus;[14] **and from him I received the idea of a polity in which there is the same law for all, a polity administered with regard to equal rights and equal freedom of speech, and the idea of a kingly government which respects most of all the freedom of the governed;**

https://archive.org/details/septimiusseverus0000birl_k3n2/page/48/mode/2up?view=theater

A pressing concern for the emperor was what he should do about his widowed daughter Lucilla. She was a high-spirited and headstrong young woman, not lacking in physical charms. **Some young senators of noble birth may have considered themselves eligible to be the second husband of a princess and stepfather to an emperor's child. But Marcus took no particular note of a man's origin, whether in appointing men to high office or in choosing husbands for his daughters. One was married to a man from proconsular Asia, Claudius Severus. As for Lucilla's two youngest sisters, one was to marry Burrus, from the family of the rising Numidian general Antistius Adventus, the other, Sura Mamertinus, possibly a kinsman of Septimius. It would be absurd to suggest that Septimius himself had any hopes – even in his dreams – of gaining the hand of Lucilla.** But the choice of her husband is something that he must have watched with considerable interest. In the event almost everyone must have been surprised, not least Lucilla herself and her mother. **The emperor married his daughter to a Syrian of equestrian background, Claudius Pompeianus.** Indirectly this match was to affect the fortunes of Septimius. Pompeianus soon became the principal military adviser of his father-in-law, and was able to advance the career of a protégé, Helvius Pertinax.3

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Cassius_Dio/Introduction*.html

Cassius Dio Cocceianus [*c.* A.D. 150-235] was a near relative, probably a grandson, of the famous orator, Dio Chrysostom, after whom he took the names Dio and Cocceianus, and like him was a native of Bithynia. His father was Cassius Apronianus, a Roman senator, who served as governor of Cilicia and of Dalmatia.[1]
...

It is not surprising, therefore, to find that the speeches, which in Dio occupy a disproportionate amount of space (averaging one long speech or debate to the book), seem even farther removed from the realm of actual history than those of the ancient historians generally. The most famous of all these speeches, that of Maecenas to Augustus regarding the establishment of the monarchy, is in reality a political pamphlet setting forth Dio's own views of government, and parts of it are an anachronism in the mouth of Maecenas.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Cassius_Dio/52*.html

5 **For these are the evils found in every democracy,—the more powerful men, namely, in reaching out after the primacy and hiring the weaker, turn everything upside down,**—but they have been most frequent in our country, and there is no other way to put a stop to them than the way I propose. 6 And the evidence is, that we have now for a long time been engaged in wars and civil strife. **The cause is the multitude of our population and the magnitude of the business of our government; for the population embraces men of every kind, in respect both to race and to endowment, and both their tempers and their desires are manifold;** and the business of the state has become so vast that it can be administered only with the greatest difficulty.
...

7 For of course my purpose in doing this will be, not to hear myself talk, but that you may learn by a strict demonstration that it is both possible and easy, for a man of sense at least, to rule well and without danger.

19 1 "I maintain, therefore, that you ought first and foremost to choose and select with discrimination the entire senatorial body, inasmuch as some who have not been fit have, on account of our dissensions, become senators. Such of them as possess any excellence you ought to retain, but the rest you should erase from the roll. 2 Do not, however, get rid of any good man because of his poverty, but even give him the money he requires. **In the place of those who have been dropped introduce the noblest, the best, and the richest men obtainable, selecting them not only from Italy but also from the allies and the subject nations.** 3 In this way you will have many assistants for yourself and will have in safe keeping the leading men from all the provinces; **thus the provinces, having no leaders of established repute, will not begin rebellions, and their prominent men will regard you with affection because they have been made sharers in your empire.**

4 "**Take these same measures in the case of the knights also, by enrolling in the equestrian order such men as hold second place in their several districts as regards birth, excellence and wealth.** Register as many new members in both classes as you please, without being over particular on the score of their number. For the more men of repute you have as your associates, the easier you will find it, for your own part, to administer everything in time of need and, 5 **so far as your subjects are concerned, the more easily will you persuade them that you are not treating them as slaves or as in any way inferior to us,** but that you are sharing with them, not only all the other advantages which we ourselves enjoy, but also the chief magistracy as well, and thus make them as devoted to that office as if it were their own. 6 **And so far am I from retracting this last statement as rashly made, that I declare that the citizens ought every one actually to be given a share in the government, in order that, being on an equality with us in this respect also, they may be our faithful allies, living as it were in a single city, namely our own, and considering that this is in very truth a city, whereas their own homes are but the countryside and villages.**
...

41 1 Maecenas thus brought his speech to an end. And Caesar heartily commended both him and Agrippa for the wealth of their ideas and of their arguments and also for their frankness in expressing them; but he preferred to adopt the advice of Maecenas. **He did not, however, immediately put into effect all his suggestions, fearing to meet with failure at some point if he purposed to change the ways of all mankind at a stroke;** 2 **but he introduced some reforms at the moment and some at a later time, leaving still others for those to effect who should subsequently hold the principate, in the belief that as time passed a better opportunity would be found to put these last into operation.** And Agrippa, also, although he had advised against these policies, co-operated with Caesar most zealously in respect to all of them, just as if he had himself proposed them.

https://www.livius.org/sources/content/herodian-s-roman-history/herodian-4.10/

[4.10.1] [216] Not long after this, Caracalla, desirous of gaining the title *Parthicus* **and of being able to report to the Romans that he had conquered all the Eastern barbarians,** even though there was peace everywhere, devised the following plan. He wrote a letter to the king of

Parthia (his name was Artabanus [IV]) and sent to him an embassy laden with gifts of expensive materials and fine workmanship.

[4.10.2] He wrote to the king that he wished to marry his daughter; that it was not fitting that he, emperor and son of an emperor, be the son-in-law of a lowly private citizen. His wish was to marry a princess, the daughter of a great king. **He pointed out that the Roman and the Parthian empires were the largest in the world; if they were united by marriage, one empire without a rival would result when they were no longer divided by a river.**

[4.10.3] The rest of the barbarian nations now not subject to their authority could easily be reduced, as they were governed by tribes and confederacies. Furthermore, the Roman infantry were invincible in close-quarter combat with spears, and the Parthians had a large force of highly skilled horse-archers.

[4.10.4] **The two forces, he said, complemented each other; by waging war together, they could easily unite the entire inhabited world under a single crown. Since the Parthians produced spices and excellent textiles and the Romans metals and manufactured articles, these products would no longer be scarce and smuggled by merchants; rather, when there was one world under one supreme authority, both peoples would enjoy these goods and share them in common.**

[4.10.5] At first the Parthian king did not approve of the proposals in Caracalla's letters, saying that it was not proper for a barbarian to marry a Roman. **What accord could there be when they did not understand each other's language and differed so radically in diet and dress?** Surely, the king said, there are many distinguished Romans, one of whose daughters he could marry, just as for him there were the Arsacids; it was not fitting that either race be bastardized.

http://don-colacho.blogspot.com/2010/11/2321.html

Without the spread of oriental cults and without the Germanic invasions, Hellenistic civilization would have initiated, with Rome as its starting-point, the Americanization of the world.

In the Late-Classical, we find the event taking place inside Hellenistic-Roman Stoicism, that is, the long death-struggle of the Apollinian soul. **In the interval from Socrates—who was the spiritual father of the Stoa and in whom the first signs of inward impoverishment and city-intellectualism became visible—to Epictetus and Marcus Aurelius, every existence-ideal of the old Classical underwent transvaluation. In the case of India, the transvaluation of Brahman life was complete by the time of King Asoka (250 B.C.), as we can see by comparing the parts of the Vedanta put into writing before and after Buddha.** And ourselves? Even now the ethical socialism of the Faustian soul, its fundamental ethic, as we have seen, is being worked upon by the process of transvaluation as that soul is walled up in the stone of the great cities. ***Rousseau is the ancestor of this socialism; he stands, like Socrates and Buddha, as the representative spokesman of a great Civilisation.***
...

Each Culture, further, has *its own mode of spiritual extinction*, which is that which follows of necessity from its life as a whole. And hence **Buddhism, Stoicism and Socialism are morphologically equivalent as end-phenomena.**

https://en.wikipedia.org/wiki/Decline_of_Buddhism_in_the_Indian_subcontinent

Moreover, Brahmins had clear ideas about society, law and statecraft (and studied texts such as the Arthashastra and the Manusmriti) and could be more pragmatic than the Buddhists, whose religion was based on monastic renunciation and did not recognize that there was a special warrior class that was divinely ordained to use violence justly.[39] As Johannes Bronkhorst notes, Buddhists could give "very little" practical advice in response to that of the Brahmins and Buddhist texts often speak ill of kings and royalty.[40]
...

Padmanabh Jaini also notes that Buddhist laypersons are relatively neglected in the Buddhist literature, which produced only one text on lay life and not until the 11th century, while Jains produced around fifty texts on the life and conduct of a Jaina layperson.[43]
...

Elements which medieval Hinduism adopted during this time included vegetarianism, a critique of animal sacrifices, a strong tradition of monasticism (founded by figures such as Shankara) and the adoption of the Buddha as an avatar of Vishnu.[58] **On the other end of the spectrum, Buddhism slowly became more and more "Brahmanized", initially beginning with the adoption of Sanskrit as a means to defend their interests in royal courts.**[59] According to Bronkhorst, this move to the Sanskrit cultural world also brought with it numerous Brahmanical norms which now were adopted by the Sanskrit Buddhist culture (one example is the idea present in some Buddhist texts that the Buddha was a Brahmin who knew the Vedas).[60] **Bronkhorst notes that with time, even the caste system eventually became widely accepted for "all practical purposes" by Indian Buddhists** (this survives among the Newar Buddhists of Nepal).[61]
...

For example, some later texts such as the Mahāparinirvāṇa Sūtra and the Sarvadurgatipariśodhana Tantra begin to speak of the importance of protecting Buddhist teachings and that killing is allowed if necessary for this reason. Later Buddhist literature also begins to see kings as bodhisattvas and their actions as being in line with the dharma (Buddhist kings like Devapala and Jayavarman VII also claimed this).[63]

> Zoroastrianism was eclipsed, but it would be an exaggeration to say that it went underground. There was, of course, no persecution, no opposition to it, no official disapproval of it by the Greeks, who were too intelligent and civilized to be susceptible to the fanaticism and pious delirium excited by "universal" religions. **What happened was that the better part of the population spontaneously recognized the superiority of Greek civilization and adopted it,** including its incomparable language, its elegant culture, and the Aryan attitude toward religion. It must not be forgotten that the dominant part of the population of the Persian Empire was composed of Persians, Medes, and other Aryans, the racial kin of the victors and therefore sharing their basic racial instincts.3 **I can imagine that many a cultivated Persian had only to become acquainted with Greek literature and philosophy to free himself from the hariolations of a "revealed" religion and to enjoy kicking the Salvation-peddlers from his door.**

https://archive.org/details/FoundationsOfNineteenthCenturygrundlagenDesNeunzehntenJahrhunderts/page/n225/mode/2up?view=theater

And yet there is a peculiar soullessness in this whole period. Here the sway of understanding is supreme, the heart is dumb; the passionless mechanism affects even the soul, which does right not from love but from reason: Marcus Aurelius' "Monologues" are the mirror of this attitude of mind, and the inevitable reaction appears in the sexual aberrations of his wife Faustina.

https://www.pagebypagebooks.com/Gilbert_K_Chesterton/Orthodoxy/The_Flag_of_the_World_p7.html

Marcus Aurelius is the most intolerable of human types. He is an unselfish egoist. An unselfish egoist is a man who has pride without the excuse of passion.

https://chalcedon.edu/resources/books/the-one-and-the-many-studies-in-the-philosophy-of-order-and-ultimacy

The alternative as he saw it was either oneness or anarchy: “But art thou discontented with thy share in the whole? Recall the alternative: *Either Providence or Atoms!* and the abundant proofs there are that the Universe is as it were a state.”344 The alternative was either a universal state, a whole which absorbed all and moved through a repetitious cycle of growth and decay, or universal anarchy and particularity. It was for him a choice between law and no law. In this picture, the individual was nothing in the whole. “Thou has subsisted as part of the Whole. Thou vanish into that which begat thee, or rather thou shalt be taken again into its Seminal Reason by a process of change.” Therefore, “**Cease not to think of the Universe as one living Being, possessed of a**

single Substance and a single Soul; and Now all things trace back to its single sentience; and how it does all things by a single impulse."345

https://books.google.fi/books?id=bsXawgEACAAJ&lpg=PA64&hl=fi&pg=PA88#v=onepage&q&f=false

Marcus really does see life as a kind of dead procession of meaningless occurrences:

> The vain solemnity of a procession; dramas played out on the stage; troops of sheep or goats; fights with spears; a little bone thrown to dogs; a chunk of bread thrown into a fish-pond; the exhausting labor and heavy burdens under which ants must bear up; crazed mice running for shelter; puppets pulled by strings … (VII.3)27

Nothing stands out above anything else, **and everything looks equally devoid of value.**

Nor is this a momentary lapse, or a sign of personal depression. It is of the essence of Stoic cosmopolitanism that things should be seen this way, denuded of their ordinary human significances, since these significances are erroneous. **Marcus does not come by his strange vision of the world naturally, or as the result of a lonely, stress-filled life. It is through Stoic exercises that he strips the humanity from human things, rewriting his inner discourse to bring it into consistency with the doctrine that externals are indifferent.** Consider the following extraordinary passage:

> How important it is to represent to oneself, when it comes to fancy dishes and other such foods, "This is the corpse of a fish, this other thing the corpse of a bird or a pig." Similarly, "This Falernian wine is just some grape juice," and "This purple vestment is some sheep's hair moistened in the blood of some shellfish." When it comes to sexual intercourse, we must say, "This is the rubbing together of membranes, accompanied by the spasmodic ejaculation of a sticky liquid." **How important are these representations, which reach the thing itself and penetrate right through it, so that one can see what it is in reality.** (VI.13)28
>
> https://en.wikisource.org/wiki/The_Thoughts_of_the_Emperor_Marcus_Aurelius_Antoninus/Book_VI
>
> 13. When we have meat before us and such eatables, we receive the impression that this is the dead body of a fish, and this the dead body of a bird or of a pig; and again, that this Falernian is only a little grape-juice, and this purple robe some sheep's wool dyed with the blood of a shell-fish: **[*sensuroitu*]** such then are these impressions, and they reach the things themselves and penetrate them, and so we see what kind of things they are. Just in the same way ought we to act all through life, and where there are things which appear most worthy of our approbation, we ought to lay them bare and look at their worthlessness and strip them of all the words by which they are exalted. **For outward show is a wonderful perverter of the reason, and when thou art most sure that thou art employed about things worth thy pains, it is then that it cheats thee most. Consider then what Crates says of Xenocrates himself.**
>
> 14. Most of the things which the multitude admire are referred to objects of the most general kind, **those which are held together by cohesion or natural organization, such as stones, wood, fig-trees, vines, olives.** But those which are admired by men, who are a little more reasonable, are referred to the things which are held together by a living principle, as flocks, herds. Those which are admired by men who are still more instructed are the things which are held together by a rational soul, not however a universal soul, but rational so far as it is a soul skilled in some art, or expert in some other way, or simply rational so far as it possesses a number of slaves. **But he who values a rational soul, a soul universal and fitted for political life, regards nothing else except this;** and above all things he keeps his soul in a condition and in an activity conformable to reason and social life, and he co-operates to this end with those who are of the same kind as himself.

https://books.google.fi/books?id=vq1wWM4MseoC&lpg=PP1&hl=fi&pg=PA199#v=onepage&q&f=false

Cynicism was famous for neglecting, indeed despising, the other two branches of philosophy, logic and physics, and for concentrating on practical ethics.33 Whereas the Stoics could claim that their concern for logic fit with Socrates' concern with definition34 and his general emphasis on knowledge as the key to morality, the Cynics claimed to be the true heirs to his insistence on human conduct as the proper concern of philosophers.35 **Epictetus' insistence on keeping interest in logic within the bounds of usefulness is an adaptation of the Stoic attitude in the direction of Cynicism. Indeed Seneca, who likes to argue that problems like the fear of death cannot be cured by syllogisms (*Ep.* 82.19-24), expressly indicates the Cynic credentials of his anti-intellectualism in *De Beneficiis*** (7.1.2–5, 7.8.2), when he embodies it in a discourse attributed to Demetrius the Cynic. Seneca says that once one has said what affects *mores* (conduct) there is not point in examining questions that do not contribute to healing the *animus* (mind) but only exercise one's *ingenium* (intellect). **Then he quotes Demetrius giving examples of useless knowledge from natural**

history and human biology and proclaiming that nature only hides those truths that have their own discovery as their only advantage.

> http://attalus.org/translate/valerius5b.html#c4
>
> [4e.5] I do not want to detract from the honour of the Argives, or to cloud the glory of Mount Aetna, but I wish to hold the light of knowledge to illuminate a lesser known piety: which makes me renew the memory of an act of Scythian piety. For when Darius invaded their territories with a mighty army, they retreated before him to the remotest wildernesses of all Asia. Thereupon, being asked by his ambassadors, when they would make an end of fleeing, or when they would begin to fight; they replied that they had neither agricultural land, nor any cities which were worth fighting for, **but when they came to the monuments of their ancestors, then he would know how the Scythians were accustomed to fight. By this pious answer, that fierce and barbarous nation redeemed themselves from the charge of savagery. Therefore Nature is the first and best mistress of piety, which does not need the help of speech, nor the use of letters, but through her own silent and proper power infuses love into the breasts of children. What is then the profit of learning?** That their manners should be more polite, but not more honourable. For true virtue is rather born than acquired.

> https://archive.org/details/in.ernet.dli.2015.231118/page/n341/mode/2up?view=theater
>
> The *Natural History* is a lasting monument to Roman ignorance. Pliny gathers superstitions, portents, love charms, and magic cures as assiduously as anything else, and apparently believes in most of them. …
>
> When we reflect that this book, and Seneca's *Quaestiones,* were the chief legacy of Roman natural science to the Middle Ages, and compare them with the corresponding works and temper of Aristotle and Theophrastus four hundred years earlier, we begin to feel the slow tragedy of a dying culture. **The Romans had conquered the Greek world, but they had already lost the most precious part of its heritage.**

https://books.google.fi/books?id=5X-46TqjDv0C&lpg=PP1&hl=fi&pg=PA26#v=onepage&q&f=false

It is not obvious why someone philosophically attracted to the immanent materialism of Stoicism would be equally drawn to the otherworldly metaphysics of Neoplatonism just because the latter was rising in popularity. Rather than look for an external reason such as competition from another school it might be worth considering a cause internal to Stoicism. One such possible cause may be found in Epictetus.

Epictetus is named by a number of second-century authors as the pre-eminent Stoic of the day. Aulus Gellius hails him as the greatest of the Stoics (*NA* 1.2.6), Fronto called him a sage (in his *Epistulae* 2.52), while Celsus reports that he was more famous than Plato (Origen, *Contra Celsum* 6.2). His texts are reported to have circulated widely.

> https://en.wikisource.org/wiki/Ante-Nicene_Fathers/Volume_IV/Origen/Origen_Against_Celsus/Book_VI/Chapter_II
>
> For, if I may venture to say so, **few have been benefited (if they have indeed been benefited at all) by the beautiful and polished style of Plato, and those who have written like him;**[2] while, on the contrary, many have received advantage from those who wrote and taught in a simple and practical manner, and with a view to the wants of the multitude. **It is easy, indeed, to observe that Plato is found only in the hands of those who profess to be literary men;**[3] **[φιλολόγων] while Epictetus is admired by persons of ordinary capacity,** who have a desire to be benefited, and who perceive the improvement which may be derived from his writings.

…

There is indeed evidence that Epictetus used canonical Stoic texts such as treatises by Chrysippus in his own classroom, **but this evidence is more often than not embedded within a passage warning his students not to take the study of these texts too seriously:**

> Is this, then, the great and admirable thing, to understand or interpret Chrysippus? Who says that it is? But what, then, is the admirable thing? "To understand the will of Nature." **Well, then, do you understand it on your own account? In that case, what need have you for anyone else?** … But, by Zeus, I do not understand the will of Nature. Who, then, interprets that? They say Chrysippus. I go and inquire what this interpreter of Nature says. **Then I fail to understand what he means and seek somebody who can interpret him. … For it is not on his own account that we have need of Chrysippus [or his interpreters], but to enable us to follow Nature. …** (*Diss.* 1.17.13-18)

…

Mastery of subtle and complex philosophical arguments is not the ultimate goal of philosophy: “If you could analyse syllogisms like Chrysippus, what is to prevent you from being wretched, sorrowful, envious and, in a word, being distracted and miserable? Not a single thing” (*Diss.* 2.23.44). **For Epictetus, then, the task of the philosopher or quite different from that of the philologist.**
…

For Epictetus, it is not the voluminous author Chrysippus who stands as his philosophical role model; rather it is Socrates, who expresses his philosophy in deeds rather than words. And, like Socrates, Epictetus himself chose not to write, reserving his philosophy for his way of life.

Stoic students who successfully grasped Epictetus’ philosophy would focus all of their attention on the transformation of their way of life in an arduous attempt to approach the life of the sage. **Like Epictetus, they would aspire to be like Diogenes the Cynic and, above all, like Socrates. But what they would not do is engage in philological studies of school texts or write commentaries on them.** It is this ambivalent attitude towards textual studies and the production of commentaries, quite unlike the Platonists and Aristotelians of the same period, that may be one of the reasons why Stoicism declined so quickly and why so many early Stoic texts have been lost. **For it only requires a generation or two of students to pay little or no attention to the preservation of school texts to make it literally impossible for the subsequent generations of potential Stoics to study Stoicism at all.**

This ambivalent attitude towards texts clearly did not mark the entire Stoic tradition. **Early Stoics such as Chrysippus wrote copiously and may even have produced commentaries on earlier Stoic texts, if his *On the Republic* was in fact a commentary on *Zeno’s Republic*.** Cleanthes wrote a commentary on Heraclitus (DL 7.174), who was an important source for Stoic physics, and, later on, Athenodorus the Stoic wrote a commentary on or polemical response to Aristotle’s *Categories* (Porphyry, *in Cat.* 86,22-4). Perhaps more significantly, the Byzantine encyclopedia known as the *Suda* includes an entry on an Aristocles the Stoic who wrote a commentary on Chrysippus’ *How We Name and Conceive Each Thing*. Thus not all Stoics appear to have had ideological objections to the commentary form as such. And later Stoics roughly contemporary with Epictetus, such as Hierocles and Cleomedes, did not appear to share Epictetus’ focus on practical philosophy at the expense of more academic discussion of philosophical topics. **But Epictetus’ somewhat unfavourable attitude towards texts combined with his subsequent popularity may have been the decisive influence on Stoics in the late second and early third centuries.** Any aspiring Stoic in this period would have read Epictetus, the most famous Stoic of the day, and would have learned not to pay excessive attention to the interpretation of school texts at the expense of practical philosophical exercises. **They certainly would not have spent time writing lengthy commentaries on earlier Stoic texts, despite the fact that Alexander of Aphrodisias reports that at that time the commentary was becoming the standard form of philosophical writing** (*in Top.* 27,13-16). **Epictetus’ success in the second century – or, to be more precise, the success of Arrian’s literary account of Epictetus’ lectures – may well have contributed to the tragic loss of so many early Stoic texts and the then inevitable decline of Stoicism.** Ironically, we have to thank opponents such as Plutarch and Galen for recording material from the Chrysippean corpus that would otherwise be totally lost. Even more ironically, it looks as if we should at least in part blame Epictetus (but equally, Arrian) for the decline in the fortunes of Stoicism and the loss of so many Stoic texts.

https://en.wikisource.org/wiki/1911_Encyclopædia_Britannica/Stoics

In the soul Seneca recognizes an effluence of the divine spirit, a god in the human frame; in virtue of this he maintains the essential dignity and internal freedom of man in every human being. **Yet, in striking contrast to this orthodox tenet is his vivid conception of the weakness and misery of men, the hopelessness of the struggle with evil, whether in society or in the individual.** Thus he describes the body (which, after Epicurus, he calls the flesh) as a mere husk or fetter or prison of the soul; with its departure begins the soul's true life. **Sometimes, too, he writes as if he accepted an irrational as well as a rational part of the soul.** In ethics, if there is no novelty of doctrine, there is a surprising change in the mode of its application. **The ideal sage has receded; philosophy comes as a physician, not to the whole but to the sick.** We learn that there are various classes of patients in “progress” (προκοπή), *i.e.* on their way to virtue, making painful efforts towards it.
…

With Seneca this resignation took the form of a constant meditation upon death. Timid by nature, aware of his impending doom, and at times justly dissatisfied with himself, he tries all means of reconciling himself to the idea of suicide. The act had always been accounted allowable in the school, if circumstances should call for it: indeed, the first three teachers had found such circumstances in the infirmity of old age. **But their attitude towards the “way out” (ἐξαγωγή) of incurable discomforts is quite unlike the anxious sentimentalism with which Seneca dwells upon death.**

From Seneca we turn, not without satisfaction, to men of sterner mould, such as Musonius Rufus, who certainly deserves a place beside his more illustrious disciple, Epictetus. As a teacher he commanded universal respect, and wherever we catch a glimpse of his activity he appears to advantage. His philosophy, however, is yet more concentrated upon practice than Seneca's, **and in ethics he is almost at the position of Aristo.**
…

The beautiful character which rose superior to weakness, poverty and slave's estate is also presented to us in the *Discourses* of his disciple Arrian as a model of religious resignation, of forbearance and love towards our brethren, that is, towards all men, since God is our common father. With him even the "physical basis" of ethics takes the form of a religious dogma—the providence of God and the perfection of the world. We learn that he regards the δαίμων or "guardian angel" as the divine part in each man; sometimes it is more nearly conscience, at other times reason. His ethics, too, have a religious character. **He begins with human weakness and man's need of God: whoso would become good must first be convinced that he is evil. Submission is enforced by an argument which almost amounts to a retractation of the difference between things natural and things contrary to nature, as understood by Zeno. Would you be cut off from the universe? he asks. Go to, grow healthy and rich. But if not, if you are a part of it, then become resigned to your lot. Towards this goal of approximation to Cynicism the later Stoics had all along been tending. Withdrawal from the active duty of the world must lead to passive endurance, and, ere long, complete indifference. Musonius had recommended marriage and condemned unsparingly the exposure of infants. Epictetus, however, would have the sage hold aloof from domestic cares, another Cynic trait.** So, too, in his great maxim "bear and *forbear*," the last is a command to refrain from the external advantages which nature offers.

Epictetus is marked out amongst Stoics by his renunciation of the world. He is followed by a Stoic emperor, M. Aurelius Antoninus, who, though in the world, was not of it. **The *Meditations* give no systematic exposition of belief, but there are many indications of the religious spirit we have already observed, together with an almost Platonic psychology. Following Epictetus, he speaks of man as a corpse bearing about a soul; at another time he has a threefold division—(1) body, (2) soul, the seat of impulse (πνευματίον), and (3) νοῦς or intelligence, the proper *ego*.** In all he writes there is a vein of sadness: the flux of all things, the vanity of life, are thoughts which perpetually recur, along with resignation to the will of God and forbearance towards others, and the religious longing to be rid of the burden and to depart to God. These peculiarities in M. Antoninus may perhaps be explained in harmony with the older Stoic teaching; but, when taken in connexion with the rise of Neoplatonism and the revival of superstition, they are certainly significant.

https://books.google.fi/books?id=5X-46TqjDv0C&lpg=PP1&hl=fi&pg=PA25#v=onepage&q&f=false

Simplicius also wrote a commentary on the Stoic Epictetus' *Handbook*. **This commentary is unique in so far as it is the only commentary on a Stoic text to survive from antiquity.** However, the commentary itself is more concerned with developing Neoplatonic ethical themes than explicating Epictetus on his own terms.
…

Simplicius also reports a range of Stoic doctrines in his various commentaries on works by Aristotle. However, **in his commentary on Aristotle's *Categories* he remarks that most Stoic writings are unavailable in his time** (*in Cat.* 334,1-3). It seems likely, then, that his knowledge of Stoicism beyond Epictetus derived from second-hand reports, such as the Aristotelian commentaries of the third-century Neoplatonist Porphyry, which Simplicius says contained much about Stoicism (*in Cat.* 2,5-9).

https://www.academia.edu/7531536/Plotinus_and_the_Platonic_Response_to_Stoicism

By around 200 C.E, we hear very little about active Stoic philosophers. Galen, a Platonist, and Alexander of Aphrodisias, a Peripatetic, were deeply engaged with Stoic theory but hardly at all with any contemporary Stoics. **By the middle of the 3rd century, the dominance of the Platonic school meant that only there would there be found critical scrutiny of Stoicism.** It is to Plotinus that we owe the most extensive and penetrating account of where Stoicism went wrong, at least from a Platonic perspective. His arguments more or less set the tone for all of the later so-called Neoplatonists. Although within two generations or so after Plotinus, some sort of *rapprochement*
with Stoicism was beginning, particularly in the gradual incorporation of Epictetus' *Handbook* into the Platonic curriculum, Plotinus' reasons for rejecting Stoicism remain the standard ones.
…

The discussion of the Stoic view of happiness (*eudaimonia*) begins with the question: "Those [.e., Stoics] who say that happiness is found in the rational life (*logikēi zōēi*), not merely in life, even if the life includes sense-perception, may well be right. **But it is appropriate to ask them why they locate happiness only in rational living.**" (I 4. 2, 31-4). Plotinus' point in posing this question is the following dilemma. Either the Stoics

will identify happiness with rational living because rationality is necessary for attaining “primary natural needs” (*ta prōta kata phusin*) or not. If they do, then even irrational creatures who are, despite their lack of reason, adept at acquiring their primary natural needs, will be happy. **But if the Stoics deny that animals are happy, which they certainly will want to do, then they will have to explain the function or role of reason in the happy life.**
…

The imperviousness to bodily misfortune cannot but bring to mind the Stoic teaching. Epictetus certainly includes these among the things that are not “up to us” and so should be of no concern (cf. *Discourses* I 28, 14, 26). **Plotinus shares the conclusion, but believes the Stoics do not have the resources to explain why this is so. Crudely put, the Stoic can hardly disassociate himself from the bodily since that is all he is. Why, though, can he not insist that it is possible to disassociate himself from everything other than the leading part of his soul, the *hēgemonikon*?** The answer to this question is that since, for the Stoics, the soul is corporeal, disassociation from the rest of the body, were that possible, would be disassociation from another part, that is, a part other than itself (cf. *Enn.* IV 7. 2.1-14).
…

The point comes out rather more clearly in Plotinus’ sustained attacked against the Stoic doctrine of “total mixture” (*krasis di’ holōn*)27 **Plotinus took this doctrine to be in direct opposition to the Platonic doctrine that the body is an instrument of the soul, which is the self** (IV 7. 1, 24-5), **and therefore unmixed with it or at least differentiated from it in kind** (I 1. 1, 3;II 3. 15, 24-8; VI 7. 4, 9-10; cf. Plato, *Alcibiades* I, 129E-130A). But Plotinus also wants to maintain that in fact the body is in a way contained within the soul, as soul is in intellect and intellect in the One (III 9. 3, 1-4; V 5. 9, 29-33; cf. Plato, *Tim*. 36E). This means that the soul is present throughout the body as subject of the body’s instrumental activity.
…

So, Plotinus’ claim is that if the leading part of the soul is disassociated from the rest of the parts of the human being, then in order to do this the materialist must get the phenomenology all wrong regarding sense-perception and thinking. **Accordingly, Stoic “absence of feeling” (*apatheia*) as an ethical goal is something they are not really entitled to embrace.** This is why their interpretation of the anodyne “living in agreement with nature” as “living rationally” must fall prey to the dilemma that this rationality is either instrumental or, if it is non-instrumental, and so free from bodily concern, cannot be sustained within a Stoic materialist context.

Conclusion

By the last quarter of the 3rd century CE, Stoicism had been a spent force for quite some time. There are no known Stoic philosophers from this period. Plotinus’ criticisms are not addressed to any contemporary opponents. They are anchored in the systematic Platonic metaphysical framework Plotinus constructed. On the basis of this framework, Plotinus was in a position to target a variety of historical anti-Platonic positions. The central weakness in Stoicism, according to Plotinus, is its uncompromising materialism and the consequent crippled account of causality. **The Stoics were, for him, basically right on a number of important issues, including their insistence on the infallibility of knowledge and on the sufficiency of virtue for happiness. Plotinus’ fundamental complaint, though, is that the Stoics do not have the correct principles with which to justify these claims.** They could achieve consistency were they to eschew infallibilism and embrace some relativistic moral code. But this would only be compounding error. Plotinus’ successors seem to treat Stoicism as one of those “ancient” schools whose deviations from the truth were adequately exposed by Plotinus, whom Proclus called “the great exegete of the Platonic revelation”. **Nevertheless, perhaps already by the time of Iamblichus, and certainly by the time of Simplicius, the moral rectitude of Epictetus led Platonists actually to give his *Handbook* an honored place in an introduction to the study of Platonism.** Simplicius, often quoting from Porphyry, is an important source for our knowledge of Stoicism and, indeed, for much additional material in antiquity now lost. **We should not suppose that Simplicius was unmindful of the absence of a sound metaphysical grounding for Epictetus’ ethical claims. At the beginning of his commentary** (194 Hadot), **he evinces surprise that such a morally uplifting work can be written without the foundational belief in the immortality of the soul.**
…

> 12. Plotinus’ successors continued to develop this argument long after the threat of Stoic materialism had waned. See, e.g., Proclus, *Elements of Theology*, props. 15-17. **Aristotle’s unqualified agreement with Plato on the immateriality of the intellect was frequently remarked on and at least one of the reasons for the widely held view that Aristotle’s philosophy was in harmony with Plato’s.**

…

> 25. At V 9.1, 10-16, Plotinus criticizes Stoics (and Epicureans) for emphasizing virtuous *actions* (*praxeis*) and choices of goods in the sensible world. Cf. *SVF* 3.23, 64, 118 and Sextus Empiricus, *M*. 11.133. This may not seem like an altogether fair criticism of the Stoics, who seem, above all, to emphasize the state of one’s will and not one’s circumstances, achievements, or actions. **Plotinus’ point, however, is that their materialism (“they are unable to see what is above”) prevents them from directing their interior lives to something higher, despite their indifference to the goods of an embodied life.** See Gurtler (1988: 228-35).

https://archive.org/details/cicerostusculand00ciceuoft/page/42/mode/2up?view=theater

Shall we give, therefore, any credit to Panætius, when he dissents from his master, Plato, whom he everywhere calls divine, the wisest, the holiest of men, the Homer of philosophers, and whom he opposes in nothing except this single opinion of the soul's immortality: for he maintains what nobody denies, that everything which has been generated will perish, and that even souls are generated, which he thinks appears from their resemblance to those of the men who begot them; for that likeness is as apparent in the turn of their minds as in their bodies.

https://books.google.fi/books?id=bsXawgEACAAJ&lpg=PA64&hl=fi&pg=PA272#v=onepage&q&f=false

> 20. For the Stoics, life was an "external good" just like money, power, and so on. **This was always odd: for the idea that life is not necessary for human dignity could be sustained, perhaps, by a Platonist believer in the immortal soul, but the Stoics held that the soul is bodily and dies with the person.**

https://books.google.fi/books?id=mTdUtsbybqkC&lpg=PP1&hl=fi&pg=PA108#v=onepage&q&f=false

Addressing what he took to be the Stoics' position on happiness and virtue directly, Parker argued in each case that **either Stoicism collapsed back into Epicureanism or else it had no power against his own 'hypothesis' or 'supposition,' namely, the Christian argument for the existence of a future state after death involving punishments and rewards.** Parker understood happiness in largely hedonistic terms, and this, as Terence Irwin notes, 'leads him to misunderstand the Stoic and the Aristotelian and Platonic position.'44

> Either then humane Nature is nothing but Body, or compounded of Body and Soul; it it be nothing but Body, then upon the Stoical Principles it is capable of no Happiness at all, seeing they pass nothing in their Account of Good and Evil but onely the Vertues of the Mind, and therefore it they are nothing but Body, all the qualities of their Mind are nothing. But if beside that we have a Soul, either it perishes with the Body or it survives it; if it perishes then it is no more than the sense of the Body it self, and it plainly casts us back upon the Epicurean Principle, that there is no Happiness but present Pleasure and Interest; if it survive, then that entitles it to an Happiness beside that of this Life, and so we are advanced to our own Hypothesis.45

With respect to virtue, Parker noted that 'the whole Sect place it in one Catholick Principle of living according to Nature':

> But then the difficulty is to **discover what they mean by Nature, and there every Man is a Sect to himself,** and we have as many different Accounts of it, as there are ruling Schoolmasters of the Porch. But what Interpretation soever we follow, **unless founded upon our Supposition, we are still forced back to the School of *Epicurus*, for his Principle too was to live according to Nature,** which was to enjoy the utmost Pleasure of this present Life; and if there be no other State, it is certain there can be no other way of living according to Nature.46

Stoic constancy, Parker claimed, 'would amount to no more than this, that every wise Man ought to consult how to live here with as much ease and pleasure as he can; for if there be no other State, he cannot be wisely constant in the pursuit of any better Design.'47

https://en.wikisource.org/wiki/David_Strauss:_the_Confessor_and_the_Writer#VI.

There is one passage in the confession-book where the incurable optimism referred to above bursts forth with the full joyousness of holiday spirits (pp. 166-67). "If the universe is a thing which had better not have existed," says Strauss, "**then surely the speculation of the philosopher, as forming part of this universe, is a speculation which had better not have speculated.** The pessimist philosopher fails to perceive that he, above all, declares his own thought, which declares the world to be bad, as bad also; but if the thought which declares the world to be bad is a bad thought, then it follows naturally that the world is good. As a rule, optimism may take things too easily. Schopenhauer's references to the colossal part which sorrow and evil play in the world are quite in their right place as a counterpoise; **but every true philosophy is necessarily optimistic, as otherwise she hews down the branch on which she herself is sitting.**"

https://www.gutenberg.org/files/17147/17147-h/17147-h.htm#page353

According to Plutarch (*De Iside et Osiride*, and *Tr. de Animae Procreatione ex Timaeo*) Plato recognized in matter a certain maleficent soul or force, rebellious against God: it was an actual blemish, an obstacle to God's plans. The Stoics also believed that matter was the source of defects, as Justus Lipsius showed in the first book of the Physiology of the Stoics.

https://books.google.fi/books?id=vq1wWM4MseoC&lpg=PP1&hl=fi&pg=PA217#v=onepage&q&f=false

Moreover, that the human body was not held in high esteem by the Stoics as well might be implied from the diatribes of Epictetus, who speaks of it as a *sōmation* (diminutive of "body"), *pēlos* (mud), and a *nekros*

(corpse).76 In contrast, however to Eduard Zeller, who interpreted these expressions in the light of Platonic influence,77 Adolf Bonhöffer rightly pointed out that such terms of contempt result from the Stoic definition of the body as a thing neither good nor bad (*adiaphoron*).78

https://archive.org/details/in.ernet.dli.2015.231118/page/n493/mode/2up?view=theater

Marcus thinks his premises compel him to puritanism. "Pleasure is neither good nor useful."[55] He renounces the flesh and all its works, and talks at times like some Anthony in the Thebaid:

> **Observe how ephemeral and worthless human things are, and what was yesterday a little mucus, tomorrow will be a mummy or ashes.** ... The whole space of man's life is but little, and yet with what troubles it is filled ... and with what a wretched body it must be passed! ... Turn it inside out, and see what kind of thing it is.[56]

…

Soul and body alike return to their original elements.

> For as the mutation and dissolution of bodies make room for other bodies doomed to die, **so the souls that are removed into the air, after life's existence, are transmuted and diffused ... into the seminal intelligence of the universe, and make room for new souls.**[64] ... Thou hast existed as a part; thou shalt disappear in that which produced thee. ... This, too, nature wills. ... Pass, then, through this little space of time conformably to nature, and end thy journeys in content, just as an olive falls when it is ripe, blessing the nature that produced it, and thanking the tree on which it grew.[65]

https://books.google.fi/books?id=dlMr4UhqQlQC&lpg=PP1&hl=fi&pg=PA161#v=onepage&q&f=false

In fact, Marcus' scorn for material things sometimes created a conflict with his pantheism. Since the World Soul was not only the author of material things, but actually embedded in them as a higher form of matter, contempt for them, while necessary to Stoic ethical teaching as the psychological underpinning for the exhortation to bear misfortune patiently, could become problematic to Stoic metaphysics. **One biographer of Marcus sarcastically called Stoicism a system in which "the sum of despised particulars becomes somehow Divine."**

> ***"Democracy is a pathetic belief in the collective wisdom of individual ignorance."***—H.L. Mencken

…

Like his fellow Stoics, Marcus possessed an optimistic view of both nature and human nature, which he portrayed as complementary. **He wrote, "Nothing that is according to nature is evil." Lacking Aristotle's emphasis on the importance of habit, much less a Judeo-Christian conception of original sin, the emperor believed that reformation of character was a simple matter of the individual choosing to turn back to the good.** Unlike the Platonists, whose hypothesis of reincarnation presented the likelihood that souls already possessed divergent experiences at birth, **Marcus and his fellow Stoics' belief in identical souls emanating from the same World Soul left them without resource to explain why a few individuals chose to live virtuously ("according to nature") but most did not. (The Stoics, while optimistic about the individual in theory, were almost uniformly pessimistic about people in practice.)**

https://books.google.fi/books?id=as_OTst8jvoC&lpg=PP1&hl=fi&pg=PA83#v=onepage&q&f=false

Although Marcus's *Meditations* are considered a classic of later Stoic thought, Marcus never calls himself a Stoic and often expouses ideas that are distinctly non-Stoic in character.116

> 116. See Asmis, "Stoicism of Marcus Aurelius" 2228-2229. **Eduard Zeller pronounced Marcus a Platonizing Stoic** (*Die Philosophie de Griechen* 257-261), a characterization of the *Meditations* followed by Rist, "Are You a Stoic?"

However, although Marcus's Stoicism is deeply idiosyncratic the *Meditations* are very much rooted in familiar Stoic ideas: that we ought to live according to nature, that there is an essential unity of the *genos* of humankind, that the human animal is a rational animal, **and that the kinship of gods and humans is based in the universality of the divine *pneuma*.**

…

Certainly, Marcus's understanding of the nature of the empire is lofty [see esp. *MA* 1.14], **but Marcus is entirely Platonic in his disdain for the world of becoming.**

…

For Marcus, universalizing cosmopolitanism is life according to nature. The idea of a universal polis, regulated by a *nomos* that is itself a reflection of divine reason, can be read in both metaphysical

and political terms. However, **Marcus always circles back to the very Platonic distinction between the world of pure being and the dross of the sublunar world in which we are compelled to live.**

There is, indeed, a strong dualism to Marcus's thought that sets him outside of the long tradition of Stoic materialism. **A human being, in the words of Epictetus that Marcus repeats more than once, is "but a soul bearing about a corpse."**
…

Marcus's cosmopolitanism is very much implicated in his dualism; the material world in which actual human relationships take place is a fleeting and impermanent place. One's true affinity is not to others as individuals, but to the share of the divine spark in the other which corresponds to our own. **As Marcus makes plain, the *pneuma* makes us kin, not blood or seed.**

https://books.google.fi/books?id=MYUHDgAAQBAJ&lpg=PP1&hl=fi&pg=PA12#v=onepage&q&f=false

The first merely notes something that is also true of Epicureanism (and indeed of scepticism): at the end of the Hellenistic period proper around 100 BCE these were all thriving philosophies; they remained so during the period of investigation, but from around 200 CE onwards they fairly quickly died away. The second consideration then notes that at the end of the Hellenistic period and the beginning of the imperial period – that is, during the first century BCE – the two other philosophies of dogmatic Platonism and Aristotelianism gradually gained prominence in two forms that are more or less radically different from the forms in which they were present in the Hellenistic period itself. **The third consideration then notes that in this process of articulating new forms of Platonism and Aristotelianism, the newcomers interacted fairly extensively either with one another or with *just one* of the 'old' Hellenistic philosophies: Stoicism.** Scepticism lay wholly beyond their horizon, indeed, they themselves partly constituted a reaction against that. And as for Epicureanism, it 'seems to have been largely excluded from this eclectic exchange', as noted by Frede (1999b, 786), presumably because the differences here were too substantial for interaction to make much sense. **Not so with Stoicism, with which both Platonists and Aristotelians interacted much more comprehensively.**

https://books.google.fi/books?id=eZSPCwAAQBAJ&lpg=PP1&hl=fi&pg=PA40#v=onepage&q&f=false

Investigation of the influence of Stoicism on Christian writers of the second and early third centuries immediately plunges the scholar into the maelstrom of the interaction in second-century philosophy between Stoicism and Platonism, which eventually led to the victory the latter. This battle had huge repercussions among Christian writers of those two centuries once they began to articulate their Christian beliefs more explicitly in philosophical terminology than their New Testament colleagues had done. **Here too we may see the Christians as being part of the philosophical discussion rather than standing outside it – and even more banefully, as partners in the Platonic takeover of the philosophical scene from the Stoics.**28 This development, which was to have a huge influence on almost all later Christian thinking as a form of Platonism, was prefigured in the first half of the first century by the Jewish Platonist, Philo of Alexandria, whose relationship with Stoicism is another topic that calls for investigation.29 **It is my own contention that the second-century Platonic takeover of Christianity drastically changed the understanding of the earliest, first-century Christian writings that make up the New Testament.** They – or at least those we have been looking at here – were far more Stoic than Platonic.

https://ccel.org/g/gibbon/decline/volume1/chap16.htm#prog

The zeal and rapid progress of the Christians awakened the Polytheists from their supine indifference in the cause of those deities whom custom and education had taught them to revere. The mutual provocations of a religious war, which had already continued above two hundred years, exasperated the animosity of the contending parties. The Pagans were incensed at the rashness of a recent and obscure sect, which presumed to accuse their countrymen of error, and to devote their ancestors to eternal misery. The habits of justifying the popular mythology against the invectives of an implacable enemy, produced in their minds some sentiments of faith and reverence for a system which they had been accustomed to consider with the most careless levity.
…

Both parties seemed to acknowledge the truth of those miracles which were claimed by their adversaries; and while they were contented with ascribing them to the arts of magic, and to the power of daemons, they mutually concurred in restoring and establishing the reign of superstition.
(139) **Philosophy, her most dangerous enemy, was now converted into her most useful ally. The groves of the Academy, the gardens of Epicurus, and even the portico of the Stoics, were almost deserted, as so many different schools of scepticism or impiety;** (140) **and many among the Romans were desirous that the writings of Cicero should be condemned and suppressed by the authority of the senate.** (141) The prevailing sect of the new Platonicians judged it prudent to

connect themselves with the priests, whom perhaps they despised, against the Christians, whom they had reason to fear.

> 140. Julian ([tom. i.] p. 301, edit. Spanheim) expresses a pious joy that the providence of the gods had extinguished the impious sects, and for the most part destroyed the books of the Pyrrhonians and Epicureans, which had been very numerous, since Epicurus himself composed no less than 300 volumes. See Diogenes Laertius, l. x. c.26.
>
> 141. *Cumque alios audiam mussitare indignanter, et dicere opportere statui per Senatum, abolleantur ut haec scripta, quibus Christiana Religio comprobetur, et vetustatis opprimatur auctoritas*. Arnobius *adversus Gentes*, 1. iii. p. 103, 104, [p. 98, 99, ed. Ant. 1604].

https://archive.org/details/in.ernet.dli.2015.231118/page/n661/mode/2up?view=theater

Moreover, Celsus was out of step with his time; **he asked men to behave like gentlemen skeptics when they were withdrawing from a society that enslaved so many of them into a mystic world that made every man a god.**
…

Reluctantly, and only late in life, he put his doctrines into writing. He never revised his first draft, **and despite Porphyry's editing, the *Enneads* remain among the most disorderly and difficult works in the history of philosophy.**[III]

Plotinus was an idealist who graciously recognized the existence of matter. But matter by itself, he argued, is only the formless possibility of form. Every form that matter takes is given it by its inward energy or soul *(psyche).*
…

Everything, from atoms to planets, has an activating soul, which is itself a part of the World-Soul; every *Atman* is *Brahman.* The individual soul is eternal only as vitality or energy, not as a distinct character.[49] Immortality is not the survival of personality; it is the absorption of the soul in deathless things.[50]
…

Through Philo, John, Plotinus, and Augustine, Plato conquered Aristotle, and entered into the profoundest theology of the Church.

https://books.google.fi/books?id=NG2MDwAAQBAJ&lpg=PP1&hl=fi&pg=PA161#v=onepage&q&f=false

Against the rising tide of materialism Smith borrows heavily from Plotinus.9 **However, in his treatise "On the Immortality of the Soul" (*Ennead* IV. 7) Plotinus addresses Epicureans only very briefly.**10 **Most often Plotinus seeks to refute the views of Stoics.** Smith, in contrast, sees an ally in the Stoics and is therefore concerned primarily with Epicurean materialism.

https://archive.org/details/plotinusethicalt01plotuoft/page/12/mode/2up?view=theater

14. In style Plotinus is concise, dense with thought, terse, more lavish of ideas than of words, most often expressing himself with a fervid inspiration. **He followed his own path rather than that of tradition, but in his writings both the Stoic and Peripatetic doctrines are sunk; Aristotle's Metaphysics, especially, is condensed in them, all but entire.**

> https://www.marxists.org/archive/marx/works/1845/german-ideology/ch03a.htm
>
> Incidentally, if our good man wanted to make the history of ancient philosophy into a history of antiquity, **then as a matter of course he ought to have merged the Stoics, Epicureans and Sceptics in the Neo-Platonists, whose philosophy is nothing but a fantastic combination of the Stoic, Epicurean and Sceptical doctrine with the content of the philosophy of Plato and Aristotle.** Instead of that, he merges these doctrines directly in Christianity.

https://books.google.fi/books?id=NG2MDwAAQBAJ&lpg=PP1&hl=fi&pg=PA3#v=onepage&q&f=false

Porphyry does not specifically identify which Aristotelian or Stoic doctrines had the greatest impact on his master's thinking. **However, it is easy to see from Plotinus' writings that the Aristotelian technical terminology of substance and accident, of formal, efficient, and final causality, and of potentiality and actuality is everywhere employed in addition to or in place of the non-technical vocabulary of Plato,** although with respect to the use of Aristotelian *doctrine* as such Plotinus adopts a more circumspect approach, in which – for instance – Plato's and Aristotle's views concerning the relation between the One and Intellect or between the categories of the intelligible and sensible worlds are contrasted rather than assimilated.

Among the concealed Stoic doctrines to which Porphyry refers, that of the universal *Logos*, which Plotinus identifies with nature or the lower phase of the world-soul, is perhaps the most significant.

https://books.google.fi/books?id=eZSPCwAAQBAJ&lpg=PP1&hl=fi&pg=PA121#v=onepage&q&f=false

Late Roman figures like Plotinus and Porphyry, seeking to explicate what was obscure in Plato through textual exegesis, introduced elements of not only Stoic but Aristotelian, skeptical and even Epicurean thought. **Porphyry and Plotinus did not consider themselves "Neoplatonists" but Platonists proper, as would Renaissance figures who believed their claims that they explained without altering, and who saw no reason to doubt that Plato had indeed shared such Stoic positions as providence, and the Stoic idea of the universe as a contiguous, unified, rational, living divinity, a model of universally distributed thinking ensoulment** which strongly informs Neoplatonic attempts to describe the layers of reality of Soul and Mind which lie between the sensible world and the supreme One.

https://books.google.fi/books?id=dlMr4UhqQlQC&lpg=PP1&hl=fi&pg=PA241#v=onepage&q&f=false

Thus, Plotinus rejected Stoic materialism and pantheism completely; **while the Stoic World Soul was a material entity at one with the universe, Plotinus not only insulated his own version of it from so direct and sordid a connection with the material world, setting up Reason as an intermediary, but also guarded the purity of the ultimate source of existence, the One, behind yet another intellectual barrier, Mind.**

Despite Plotinus' insistence that matter was not evil, it is difficult not to see a visceral disgust for it behind his manic erection of a cumbersome series of abstractions – Mind, the World Soul, and Reason – **intellectual chastity belts clearly designed to protect the One's virginal innocence. Never has there been conceived (no pun intended) a being with so many offspring yet so little direct involvement in the messy process of procreation as Plotinus' One.**

http://www.augnet.org/en/works-of-augustine/writings-of-augustine/2113-dialogues/

After his celebrated moral conversion in the garden at Milan in September of the year 386, Augustine needed some unhurried time to think about what had spiritually happened within him. A few days later Augustine, being ill, took advantage of the autumn holidays and, resigning his teaching position in Milan to go to nearby Cassiciacum, to the country estate of his friend, Verecundus.
…

These early dialogues have an unique aspect among the works of Augustine because they were written soon after he came to Christian belief but before his baptism. As well, they were subsequent to his encounter with Neo-Platonism but before his studies of the Bible. Augustine himself later remarked on how little Scripture he had quoted in them.

https://books.google.fi/books?id=riCbDwAAQBAJ&lpg=PP1&hl=fi&pg=PA51#v=onepage&q&f=false

The splintering of the New Academy, I think, was triggered not so much in opposition to the Old version as it was in opposition to the Stoics.71 Nor indeed, should it be thought of as a splintering, since it was right to refute and discuss the new inquiry introduced by Zeno. For it has been reasonably speculated that the position about not perceiving, although it wasn't triggered by any conflicts, was nevertheless also in the minds of the Old Academics. This is also easy to prove on the authority of Socrates himself and Plato and the rest of the old philosophers, who believed they could be defended from error to the extent that they did not give assent rashly – although they did not introduce their own disputation on this point into their own schools, nor did they ever *straightforwardly* inquire into whether or not truth can be perceived.72 **But Zeno had brought forward something undeveloped and new and was arguing that nothing could be perceived unless it was true in such a way that it could be distinguished from the false by its dissimilar marks, and that it doesn't belong to a wise man to come up with an opinion.**73 And when Arcesilaus74 heard this, he said that nothing of this kind could be discovered by man, nor should the life of a wise man be entrusted to this shipwreck of an opinion. Hence he also concluded that assent should be given to nothing.75

15. "**But when the matter stood in such a way that the Old Academy seemed more augmented than attacked, there stepped forth a disciple of Philo, Antiochus, who (as it seemed to some) was more desirous of glory than truth.**76 [Antiochus] brought the position of both academies into enmity with each other, for he said that the New Academics were trying to introduce something unusual and far, far removed from the opinion of the Old. On this topic he appealed to a trust in the old naturalists77 and the other great philosophers, and he even attacked the Academics themselves, who argued that they were following the 'truth-like' even though they acknowledged that they were ignorant of the truth itself. And he amassed many arguments, which I think should be passed over right now. Nevertheless, **nothing did he defend more than that the wise man can perceive [truth].**78

https://books.google.fi/books?id=riCbDwAAQBAJ&lpg=PP1&hl=fi&pg=PA106#v=onepage&q&f=false

17.37. “Why, then, did such great men decide to engage in such endless and obstinate controversies, all in order to make it seem that a knowledge of the truth could not befall anyone? **Listen a little more carefully now, not to what I know, but to what I suspect.** In fact, I saved this part for the end to explain (if I can) what seems to me is the nature of the Academics’ whole intention.148

“Plato, the wisest and most educated man of his time,149 spoke in such a way that whatever he said became important, and no matter how he said them, the things he uttered lost none of their importance. After the death of Socrates his master (whom he loved above all), he is said to have also learned many things from the Pythagoreans.150 **Pythagoras,**151 **who had not been satisfied with Greek philosophy (which at the time was virtually nonexistent or at least very obscure), came to believe that the soul was immortal after being roused by the disputations of a certain Pherecydes of Syros;**152 and, journeying far and wide, he also went on to listen to many wise men.153 And thus Plato added to the charm and subtlety of Socrates, which Socrates wielded in moral matters, an expertise in natural and divine things, which Plato had carefully received from those whom I have mentioned.154 And by joining them under dialectic, the foundress and judge, as it were, of those parts (dialectic is either wisdom itself or that without which wisdom can in no way be),155 Plato is said to have compiled the complete discipline of philosophy. Now is not the time discuss this. For what I want, it suffices that Plato sensed that there are two worlds: one intelligible (in which the truth itself dwells) and the other sensible (which we obviously sense through sight and touch).156 And Plato sensed that the former is true while the latter is ‘truth-like’ and made in its image. Thus, truth about the former is polished and brightened, as it were, in the soul that knows itself, while only opinion and not knowledge about the latter can be produced in the souls of the foolish. However, **whatever has been done in this world by means of the virtues that Plato called political**157 **(which are similar to the other true virtues that are known only to the few who are wise) can be labeled nothing else but ‘truth-like.’**

38. “It seems to me that these teachings and others of this kind were preserved by Plato’s successors as much as they could and guarded as mysteries.158 For either these teachings are not easily perceived except by those who, having cleansed themselves from all vices, have in some way appropriated a different way of living that is more than human; or whoever knows these things and wants to teach them to just anyone is sinning grievously.159 **And so I suspect that Zeno, who was the head of the Stoics, was held suspect for having already heard and believed certain things by the time he came to the school bequeathed by Plato and being then maintained by Polemon.**160 **Nor did Zeno seem to them to be the kind of man to whom they should readily reveal and entrust those virtually sacrosanct Platonic precepts before he had first *un*learned the things that he had accepted from others and had brought into this school.**161

“Polemon then dies; he is succeeded by Arcesilaus – a classmate of Zeno, in fact, but one who was under the instruction of Polemon.162 **Consequently, when Zeno began to delight in a certain position of his own about the world and especially about the soul (for which true philosophy is ever vigilant), a position which states that the soul is mortal,**163 **that there is nothing beyond this sensible world, and that in this world nothing is done except by matter**164 **(in fact, he even thought that God Himself is [made of] fire);**165 **since this wicked stuff was slowly spreading high and wide, Arcesilaus – very prudently and advantageously, it seem to me – thoroughly hid the position of the Academy and buried it as if it were gold to be found someday by future generations.**166 **Hence, since the multitude is rather prone to rushing into false opinions and since, by virtue of corporeal habit, it is extremely easy yet harmful to believe that all reality is corporeal,**167 **this most astute and most humane man resolved to *un*teach those poorly taught people whom he was putting up with rather than to teach those whom he did not think were teachable.** From these [considerations] were born all those things that are attributed to the New Academy, because the Old Academics had had no need of them.168

39. “But if Zeno had snapped out of it at some point and noticed that nothing can be grasped unless it is the sort of thing that he himself was defining, and that such a thing can’t be found in bodies (to which he relegated all reality) then this kind of disputation, which very much flared up inevitably, would have been completely extinguished long ago. **But Zeno, deceived by an appearance of consistency – as it seemed to the Academics and as it seems to me as well**169 **– was stubborn, and this pernicious faith of his in bodies lived on in whatever way it could down to the time of Chrysippus, who (for he was especially capable of doing this) gave it enormous power in spreading itself more widely.**170 **And yet on the other side Carneades, who was more astute and vigilant than all the others mentioned above,**171 **opposed this Stoic opinion in such a way that I marvel that it actually survived at all afterwards.** In fact, lest it appear that he wanted to speak out against everything for the sake of ostentation, Carneades first cast aside the effrontery of making virtually false accusations, as he saw that Arcesilaus had to no small extent been defamed by this [tactic]. **But he was particularly determined to smash and overthrow the Stoics themselves and Chrysippus too.**

18.40. “Then, since he was overwhelmed from every direction [with the objection that] if assent is given to nothing, the wise man will do nothing.172 Carneades – O wondrous man and yet not wondrous! for he flowed forth from the very fountains of Plato – wisely took note of the kinds of actions [his objectors] approved of. And seeing that these were similar to some truths or other, that which he would pursue in this world in order to act he named the ‘truth-like.’ For he both skillfully knew and prudently concealed to what these things were similar, and he also called them ‘probable.’ (For whoever beholds an examplum adroitly approves of its image.) Indeed, **how does the wise man give approval or how does he follow what is similar to the true when he**

doesn't know what the truth itself is? Therefore, they *did* know, and they approved of the falsehoods in which they noticed a commendable imitation of true things.174 **But because it was neither proper nor easy to show this to the uninitiated,**175 **so to speak, they left to posterity – and to whomever they could in their own age – a certain sign of their position. They rightly prohibited those dialecticians, however, from raising questions about nomenclature by insulting and mocking them.** On account of this, it is said that Carneades was also the head of the Third Academy and its author.

41. "**This conflict then continued down to our very own Tully. By now it was obviously injured yet poised to inflate Latin literature with its last breath.** (For it seems to me that nothing is more inflated than saying so many things so copiously and elaborately while not believing them!) **Nevertheless, it was by these winds, it seems to me, that that Platonic straw man Antiochus**176 **was sufficiently scattered and dispersed: for the Epicureans' herds built their sunny stables in the souls of hedonistic multitudes.**177 As a matter of fact, Antiochus was a disciple of Philo,178 and Philo, as far as I can tell, was a most circumspect man who had begun to open, so to speak, the gates to his retreating enemies and to call the Academy and its laws back to the authority of Plato. (That said, Metrodorus had also tried to do this before. It is said that he was the first to have admitted that the Academics did not believe the doctrine that nothing can be grasped but took up arms of this kind against the Stoics out of necessity.)179 **And so Antiochus, as I was starting to say, once he had listened to Philo the Academic and Mnesarchus the Stoic, crept into the Old Academy, which was void of defenders and vulnerable to every enemy, so to speak. In the guise of a helper and fellow townsman, he brought with him from the ashes of the Stoics some evil or other that defiled Plato's inner sanctums.**180 **But Philo, having wrested Antiochus's arms away from him for a second time as well, resisted him till the day he died; and our man Tully, who for as long as he lived couldn't stand to have anything he loved undermined or contaminated, crushed whatever remained of him. Indeed, not long after those days, when all the stubbornness and pertinacity was dead, when the clouds of error had been dispersed, the illustrious countenance of Plato, which is the purest and most lucid in all philosophy, shone forth [once again]. And it did so especially in Plotinus, the Platonic philosopher who has been judged to be so similar to him that they seemed to have lived at the same time. There is, however, so much time between them that one should think that in Plotinus Plato lives again.**181

19.42. "**And so, we hardly ever see any philosophers now except Cynics or Peripatetics**182 **or Platonists. Indeed, we see Cynics because a certain liberty and license of life delights them. But regarding the education and the teaching and the mores that look after the soul, there is nevertheless, in my opinion, a single discipline of philosophy that is utterly true which** – because there has been no dearth of extremely astute and alert men who have taught in their disputations that Aristotle and Plato harmonize with each other in such a way that to the ignorant and inattentive they seem to be in conflict183 – **has in fact been refined over many centuries and by many arguments. For this philosophy is not the philosophy of this world that our Sacred [Scriptures] most rightly detest but of the other intelligible world**184 to which that most subtle Reason would never call back souls blinded by the multiform darkness of error and smeared by the deepest filth from the body had not the Supreme God, out of a certain clemency for the multitude,185 humbled and lowered the authority of Divine Understanding all the way into the human body itself,186 so that having been roused up by not only His precepts but His deeds,187 **souls could return to their very selves and even gazes upon their homeland without the bickering of disputations.**188

Let us, once more, review Socialism (independently of the economic movement of the same name) as the Faustian example of Civilization-ethics. **Its friends regard it as the form of the future, its enemies as a sign of downfall, and both are equally right.** We are all Socialists, wittingly or unwittingly, willingly or unwillingly. Even resistance to it wears its form.

Similarly, and equally necessarily, all Classical men of the Late period were Stoics unawares. The whole Roman people, as a body, has a Stoic soul. **The genuine Roman, the very man who fought Stoicism hardest, was a Stoic of a stricter sort than ever a Greek was.** The Latin language of the last centuries before Christ was the mightiest of Stoic creations.

http://biblehub.com/daniel/2-40.htm

39 **After you there will arise another kingdom inferior to you, then another third kingdom of bronze, which will rule over all the earth.** 40 **Then there will be a fourth kingdom as strong as iron; inasmuch as iron crushes and shatters all things, so, like iron that breaks in pieces, it will crush and break all these in pieces.** 41 **In that you saw the feet and toes, partly of potter's clay and partly of iron, it will be a divided kingdom; but it will have in it the toughness of iron, inasmuch as you saw the iron mixed with common clay.** 42 **As the toes of the feet were partly of iron and partly of pottery, so some of the kingdom will be strong and part of it will be brittle.** 43 **And in that you saw the iron mixed with common clay, they will combine with one another in the seed of men; but they will not adhere to one another, even as iron does not combine with pottery.**

https://chalcedon.edu/resources/books/the-one-and-the-many-studies-in-the-philosophy-of-order-and-ultimacy

Greece began its history as families and clans which became city-states; its religion moved from the religious centrality of the family to the centrality of the city-state. Fustel de Coulanges, in *The Ancient City*, saw the same pattern in Roman origins, and certainly there is much to suggest it. **There is, however, a strong body of evidence to affirm the contrary, the priority of the City of Rome to the Roman family and the creation of a strong family as an act of state. It is today a mark of intellectual respectability to treat ancient records as non-historical, but even an elementary respect for the Roman records points to rather startling conclusions. Two boys, abandoned twins, set out to found a city.** Romulus ploughed a furrow as the first wall around the planned city, with the trench or furrow as the moat, and the overturned earth as the wall. By this act, he created his sacred city. His brother, Remus, expressed his contempt for the wall and moat by leaping across them into the City, whereupon Romulus killed him at once, declaring, "So perish all who ever cross my walls!"

>
> For Augustine, Romulus' fratricide discloses the limits of pagan virtue and politics and reveals that the civic republican view of an early virtuous republic is nostalgic if not impossible. **Machiavelli agrees with Augustine about the character of Rome, yet embraces the ambitious and acquisitive politics Augustine rebuffs.** Machiavelli not only excuses Romulus' fratricide in "ordering" Rome, but makes it the archetypal act that must be repeated through "reordering" to sustain the state against the perennial problem of corruption.

Rome thus began, *first,* with two boys abandoned by their family, and, *second*, with the murder of a brother as its first sacrifice. The priority of the City to the family is emphatically set forth. But this is not all. *Third*, the first citizens were not members of a common family or clan but neighboring shepherds, outlaws, and stateless people. The City made them Romans, not ties of family or of blood. *Fourth*, Roman family life and Rome's first alliance began by an assault on the family, when the womenless men joined in the rape of the Sabine women, with an ensuing war against their fathers ending in peace and a very close alliance, when the Sabine women, who had been carried off by the Romans, interceded with their fathers to restore peace. A Sabine king, Titus Tatius, then shared the throne with Romulus. **These stories, very much at odds with the origins of other peoples, embarrassing to many later Romans, and clearly hostile to the idea of the priority of the family, have the ring of truth. The family indeed was powerful in Rome, but it was the creature of the City; the City was not an outgrowth of the family. Priority did not belong to the family or to race, although the later aristocracy tried to maintain such a thesis, but to the City, for Rome began as a city and then *created* the Roman people and the Roman family.** Only the rigidity of evolutionary presuppositions has obscured this obvious fact from scholars. The family was the creature of the City, as was marriage, for the only legally recognized marriages in Rome were the marriages of citizens. The right to contract a legal union was like the right to vote, eligibility for magistracy, and the right to serve in a legion a right of citizens only. The same was true of the right to possess, acquire, and bequeath property, and originally most land was periodically re-allotted by the City.

[3] **There is no question that the Brutus who won such glory through the expulsion of Superbus would have inflicted the gravest injury on the State had he wrested the sovereignty from any of the former kings, through desire of a liberty for which the people were not ripe.** [4] What would have been the result if that horde of shepherds and immigrants, fugitives from their own cities, who had secured liberty, or at all events impunity, in the shelter of an inviolable sanctuary[2] [5]—**if, I say, they had been freed from the restraining power of kings and, agitated by tribunician storms, had begun to foment quarrels with the patricians in a City where they were aliens before sufficient time had elapsed for either family ties or a growing love for the very soil to effect a union of** [6] **hearts?** The infant State would have been torn to pieces by internal dissension. As it was, however, the moderate and tranquilizing authority of the kings had so fostered it that it was at last able to bring forth the fair fruits of liberty, in the maturity of its [7] strength.

3 The rest could not endure to look upon the sight, but it is said that the father neither turned his gaze away, nor allowed any pity to soften the stern wrath that sat upon his countenance, but watched the dreadful punishment of his sons until the lictors threw them on the ground and cut off their heads with the axe. Then he rose and went away, after committing the other culprits to the judgement of his colleague.[7] **He had done a**

deed which it is difficult for one either to praise or blame sufficiently. 4 For either the loftiness of his virtue made his spirit incapable of suffering, or else the magnitude of his suffering made it insensible to pain. **In neither case was his act a trivial one, or natural to a man, but either god-like or brutish.** However, it is right that our verdict should accord with the reputation of the man, rather than that his virtue should be discredited through weakness in the judge. **For the Romans think that the work of Romulus in building the city was not so great as that of Brutus in founding and establishing its form of government.**

https://slate.com/news-and-politics/2000/07/unpatriotic.html

In Homer's *Iliad*, the great warrior Achilles, denied a slave girl as a prize, goes off to sulk in a tent while the rest of the Greeks suffer military disaster at the hands of the Trojans. **Virgil's *Aeneid* evokes the Homeric epics in many ways, but the Trojan warrior Aeneas is a dutiful soldier who sacrifices his love life (with Dido) in order to carry out his historic mission of founding Rome.** He is allowed to exact revenge on his enemy—but only after his civic mission has been fulfilled.
…

Another famous story, retold by Livy, described how a consul with the appropriate name of Manlius Torquatus ordered his son Titus Manlius not to attack the enemy. When an enemy soldier dissed him, the young man killed him and returned to camp to brag about his personal victory. In today's Hollywood, the father, played by Mel Gibson, would pat his son on the back: "Like father, like son!" According to Livy, however, Manlius Torquatus said: **"Titus Manlius, you have respected neither consular *imperium* nor your father's *maiestas*, you have left your position to fight the enemy in defiance of my order, and, as far as was in your power, have subverted [military discipline], on which the fortune of Rome has rested up to this day. … I believe that you yourself, if you have a drop of my blood in you, would agree that the military discipline, which you undermined by your error, must be restored by your punishment."**

> https://www.gutenberg.org/cache/epub/10827/pg10827-images.html
>
> **In all their wars with other nations, the most momentous battle ever fought by the Romans, was that which they fought with the Latins when Torquatus and Decius were consuls.** For it may well be believed that as by the loss of that battle the Latins became subject to the Romans, so the Romans had they not prevailed must have become subject to the Latins. And Titus Livius is of this opinion, since he represents the armies as exactly equal in every respect, in discipline and in valour, in numbers and in obstinacy, the only difference he draws being, that of the two armies the Romans had the more capable commanders. We find, however, two circumstances occurring in the conduct of this battle, the like of which never happened before, and seldom since, namely, that to give steadiness to the minds of their soldiers, and render them obedient to the word of command and resolute to fight, one of the consuls put himself, and the other his son, to death.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Dionysius_of_Halicarnassus/20*.html

2 (2) The Athenians gained repute because they punished as harmful to the state the indolent and idle who followed no useful pursuits, and the Lacedaemonians because they permitted their oldest men to beat with their canes such of the citizens as were disorderly in any public place whatever; **but for what took place in the homes they took no thought or precaution, holding that each man's house-door marked the boundary within which he was free to live as he pleased.** 3 (3) **But the Romans, throwing open every house and extending the authority of the censors even to the bed-chamber, made that office the overseer and guardian of everything that took place in the homes;** for they believed that neither a master should be cruel in the punishments meted out to his slaves, nor a father unduly harsh or lenient in the training of his children, nor a husband unjust in his partnership with his lawfully-wedded wife, nor children disobedient toward their aged parents, nor should own brothers strive for more than their equal share, and they thought there should be no banquets and revels lasting all night long, no wantonness and corrupting of youthful comrades, no neglect of the ancestral honours of sacrifices and funerals, nor any other of the things that are done contrary to propriety and the advantage of the state.

https://archive.org/details/in.ernet.dli.2015.201720/page/n213/mode/2up?view=theater

The political development of the Celtic nation also presents very remarkable phenomena. The constitution of the state was based in this case, as everywhere, on the clan-canton, with its prince, its council of the elders, and its community of freemen capable of bearing arms; but the peculiarity in this case was that it never got beyond this cantonal constitution. **Among the Greeks and Romans the canton was very early superseded by the ringwall as the basis of political unity; where two cantons met within the same walls, they amalgamated into one commonwealth;** where a body of burgesses assigned to a portion of their fellow burgesses a new ringwall, there regularly arose in this way a new state connected with the mother-community only by the ties of piety or at most of clientship. **Among the Celts on the other hand the "burgess-body" continued at all times to be the clan; prince and council presided over the canton and not over any town,** and the general diet of the canton formed the authority of last resort in the state. **The town had, as in the East, merely mercantile and strategic, not political importance; for which reason the Gallic townships, even when walled**

and very considerable such as Vienna and Genava, were in the view of the Greeks and Romans merely villages.

https://archive.org/details/in.ernet.dli.2015.85694/page/n173/mode/2up?view=theater

When Pausanias visited Attica, he found in the little villages ancient traditions which had been perpetuated with the worship; **and these traditions informed him that every little burgh had had its king before the time when Cecrops reigned at Athens.** Was not this a memorial of a distant age, when the great patriarchal families, like the Celtic clans, had each its hereditary chief, who was at the same time priest and judge? **Some hundred little societies then lived isolated in the country, recognizing no political or religious bond among them,** having each its territory, often at war, and living so completely separated that marriage between them was not always permitted.2
...

In the course of time these many little states were reduced to twelve confederations. This change, by which the people passed from the patriarchal family state to a society somewhat more extensive, was attributed by tradition to the efforts of Cecrops: we are merely to understand by this, that it was not accomplished until the time at which they place this personage—that is to say, towards the sixteenth century before our era. We see, moreover, that this Cecrops reigned over only one of these twelve associations, that which afterwards became Athens; **the other eleven were completely independent; each had its tutelary deity, its altar, its sacred fire, and its chief.**1
...

Then appeared Theseus, the heir of the Cecropidae. **All the traditions agree in declaring that he united the twelve groups into one city. He succeeded, indeed, in bringing all Attica to adopt the worship of Athene Polias, so that thenceforth the whole country celebrated the sacrifice of the Panathenaea in common.** Before him, every burgh had its sacred fire and its prytany. He wished to make the prytany of Athens the religious centre of all Attica.3 **From that time Athenian unity was established. In religion every canton preserved its ancient worship, but adopted one that was common to all.** Politically, each preserved its chiefs, its judges, its right of assembling; but above all these local governments, there was the central government of the city.1

> https://www.garynorth.com/freebooks/docs/html/gnbd/appendix_e.htm
>
> The textbooks downplay the religious side of the Greeks by discussing the myths of Olympus as if they were fairy tales that no influential Greek ever believed. This was in fact the case; **there is little evidence that anyone in authority took seriously the Olympian myths except as political rituals. The Olympian gods were political creations: gods that the families of a city-state might formally worship.** Without formal worship and collectively celebrated rites, there could be no civil law in Classical civilization.[(11)]

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/secondary/BURLAT/11*.html#ref59

It must never be forgotten that Constantine's revolution was perhaps the most audacious act ever committed by an autocrat in disregard and defiance of the vast majority of his subjects. For at least four-fifths of the population of the Empire were still outside the Christian Church.60

> 60. **Estimates, based on highly conjectural data, of the number of Christians vary from one-twentieth to one-sixth of the total population.** See V. Schultze, *Der Untergang des gr.-röm. Heidentums*, I p22 *sqq.*

https://www.ccel.org/ccel/gibbon/decline/files/volume1/chap28.htm#oppr

The violent and repeated strokes of the orthodox princes were broken by the soft and yielding substance against which they were directed; and the ready obedience of the Pagans protected them from the pains and penalties of the Theodosian Code. (57) **Instead of asserting that the authority of the gods was superior to that of the emperor, they desisted, with a plaintive murmur, from the use of those sacred rites which their sovereign had condemned.**
...

Theodosius might undoubtedly have proposed to his Pagan subjects the alternative of baptism or of death; and the eloquent Libanius has praised the moderation of a prince who never enacted, by any positive law, that all his subjects should immediately embrace and practise the religion of their sovereign. (61)

https://books.google.fi/books?id=qCvlvqCXF8UC&lpg=PP1&hl=fi&pg=PA53#v=onepage&q&f=false

With the imperial decrees of 391/92 A.D. prohibiting all pagan cults and with the forceful destruction of the sanctuaries, the mysteries simply and suddenly disappeared. There is not much to be said for either the Masons' or modern witches' that they are perpetuating ancient mysteries through continuous tradition.120 Mysteries could not go underground because they lacked any lasting organization. **They were not self-sufficient sects; they were intimately bound to the social system of antiquity that was to pass away.**

11 **Then He said: "A certain man had two sons.** 12 **And the younger of them said to his father, 'Father, give me the portion of goods** [*ousias*] **that falls to me.' So he divided to them his livelihood.** [*bion*] 13 **And not many days after, the younger son gathered all together, journeyed to a far country, and there wasted his possessions** [*ousian*] **with prodigal living.**

> https://en.wikipedia.org/wiki/Ousia
>
> The term οὐσία is an Ancient Greek noun, formed on the feminine present participle of the verb εἰμί, *eimi*, meaning "to be, I am", so similar grammatically to the English noun "being". **There was no equivalent grammatical formation in Latin, and it was translated as *essentia* or *substantia*.** Cicero coined *essentia*[3] and the philosopher Seneca and rhetorician Quintilian used it as equivalent for οὐσία, while Apuleius rendered οὐσία both as *essentia* or *substantia*. In order to designate οὐσία, early Christian theologian Tertullian favored the use of *substantia* over *essentia*, while Augustine of Hippo and Boethius took the opposite stance, preferring the use of *essentia* as designation for οὐσία.[4][5]
> ...
>
> **The word *ousia* is used in the New Testament only in relation to the *substance* in the sense of *goods*,** twice in the parable of the Prodigal Son where the son asked his father to divide to him his inheritance, and then wasted it on riotous living.[13][14]

http://laurabetzig.org/pdf/RomanMonogamy.pdf

Primogeniture and patriliny – ceding estates to first-born sons – were the rule in the first six civilizations, in later states, and in medieval and early modern Europe (e.g., Betzig 1992a, Duby 1980, Stone 1977) All – or most – of a family's wealth was funneled into a single vessel. Just one son – the eldest – would take a legitimate wife and sire legitimate heirs. As a result the lineage – and its land – would last from generation to generation. **Why, then, was primogeniture absent in imperial Rome? I think the evidence suggests rich Romans did what they could to practice it, and Roman emperors, from Augustus on, did what they could to prevent it** (see too, e.g., Crook 1967, 104, 132, Brunt 1971, 562-566, Champlin 1991, 183).

They were anticipated by centuries of precedents. **As early as the fifth century BC, the Twelve Tables mandated that intestate Romans leave their estates equally to all legitimate sons – and daughters.** Romans could disinherit sons by will *as long as* each was specifically named. But failure to disinherit in the proper manner made wills void, as a result, rules of intestacy held, and every legitimate son and daughter would get an equal share (Crook 1986, 59-65). In AD 26, the *lex Junia Vellaea* extended that rule to grandsons (p. 64). **And entail was strictly illegal – no one could make unborn generations heirs** (Crook 1967, 122). After the second century AD, trusts set up to get around laws like these were declared invalid (in Hopkins 1983, 76 in 57). John Crook asks: "What is at the back of all this? Well, it looks as if sweeping away all the male heirs (perhaps all but one, to achieve primogeniture by the backdoor and defeat partibility and splitting-up) was not thought very nice" (1986, 65).
...

People have looked in vain for primogeniture in Rome. There isn't any evidence of it. But there is abundant evidence of *celibacy.* What nobody seems to have seen is that they amount to the same thing. To keep the majority from taking legitimate wives and making legitimate heirs is to disinherit them, eventually. Celibate sons' lines die out. Only married sons' lines last. The patrimony gets passed on, intact, to the married minority.

https://ccel.org/g/gibbon/decline/volume1/chap6.htm#LEG

III. When Augustus resolved to establish a permanent military force for the defence of his government against foreign and domestic enemies, he instituted a peculiar treasury for the pay of the soldiers, the rewards of the veterans, and the extraordinary expenses of war. The ample revenue of the excise, though peculiarly appropriated to those uses, was found inadequate. To supply the deficiency, **the**

emperor suggested a new tax of five per cent. on all legacies and inheritances. But the nobles of Rome were more tenacious of property than of freedom. Their indignant murmurs were received by Augustus with his usual temper. He candidly referred the whole business to the senate, and exhorted them to provide for the public service by some other expedient of a less odious nature. They were divided and perplexed. He insinuated to them that their obstinacy would oblige him to *propose* a general land-tax and capitation. They acquiesced in silence. (102)
…

Such a tax, plentiful as it must prove in every wealthy community, was most happily suited to the situation of the Romans, who could frame their arbitrary wills, according to the dictates of reason or caprice, without any restraint from the modern fetters of entails and settlements. From various causes the partiality of paternal affection often lost its influence over the stern patriots of the commonwealth and the dissolute nobles of the empire; and if the father bequeathed to his son the fourth part of his estate, he removed all ground of legal complaint. (106) But a rich childless old man was a domestic tyrant, and his power increased with his years and infirmities. A servile crowd, in which he frequently reckoned praetors and consuls, courted his smiles, pampered his avarice, applauded his follies, served his passions, and waited with impatience for his death.

https://www.ccel.org/g/gibbon/decline/volume2/chap44.htm#inheritance

The *principle* of hereditary succession is universal; but the *order* has been variously established by convenience or caprice, by the spirit of national institutions, or by some partial example which was originally decided by fraud or violence. **The jurisprudence of the Romans appear to have deviated from the inequality of nature much less than the Jewish,** (143) **the Athenian,** (144) **or the English institutions.** (145) On the death of a citizen, all his descendants, unless they were already freed from his paternal power, were called to the inheritance of his possessions. **The insolent prerogative of primogeniture was unknown; the two sexes were placed on a just level; all the sons and daughters were entitled to an equal portion of the patrimonial estate;** and if any of the sons had been intercepted by a premature death, his person was represented, and his share was divided, by his surviving children.

> 143. **Among the patriarchs, the first-born enjoyed a mystic and spiritual primogeniture,** (Genesis, xxv. 31.) **In the land of Canaan, he was entitled to a double portion of inheritance,** (Deuteronomy, xxi. 17, with Le Clerc's judicious Commentary.)
>
> 144. At Athens, the sons were equal; but the poor daughters were endowed at the discretion of their brothers.
>
> 145. **In England, the eldest son also inherits *all* the land;** a law, says the orthodox Judge Blackstone, (Commentaries on the Laws of England, vol. ii. p. 215,) unjust only in the opinion of younger brothers. It may be of some political use in sharpening their industry.

…

But the power of the testator expired with the acceptance of the testament: each Roman of mature age and discretion acquired the absolute dominion of his inheritance, **and the simplicity of the civil law was never clouded by the long and intricate entails which confine the happiness and freedom of unborn generations.**

https://archive.org/details/inquiryintonatur01smit_0/page/466/mode/2up?view=theater

When land, like moveables, is considered as the means only of subsistence and enjoyment, the natural law of succession divides it, like them, among all the children of the family; of all of whom the subsistence and enjoyment may be supposed equally dear to the father. This natural law of succession accordingly took place among the Romans, who made no more distinction between elder and younger, between male and female, in the inheritance of lands, than we do in the distribution of moveables. But when land was considered as the means, not of subsistence merely, but of power and protection, it was thought better that it should descend undivided to one. In those disorderly times, every great landlord was a sort of petty prince. His tenants were his subjects. He was their judge, and in some respects their legislator in peace, and their leader in war. He made war according to his own discretion, frequently against his neighbours, and sometimes against his sovereign. The security of a landed estate, therefore, the protection which its owner could afford to those who dwelt on it, depended upon its greatness. To divide it was to ruin it, and to expose every part of it to be oppressed and swallowed up by the incursions of its neighbours. **The law of primogeniture, therefore, came to take place, not immediately, indeed, but in process of time, in the succession of landed estates, for the same reason that it has generally taken place in that of monarchies, though not always at their first institution. That the power, and consequently the security of the monarchy, may not be weakened by division, it must descend entire to one of the children.** To which of them so important a preference shall be given, must be determined by some general rule, founded not upon the doubtful distinctions of personal merit, but upon some plain and evident difference which can admit of no dispute. Among the children of the same family, there can be no indisputable difference but that of sex, and that of age. The male sex is universally preferred to the female;

and when all other things are equal, the elder every where takes place of the younger. Hence the origin of the right of primogeniture, and of what is called lineal succession.

Laws frequently continue in force long after the circumstances, which first gave occasion to them, and which could alone render them reasonable, are no more. In the present state of Europe, the proprietor of a single acre of land is as perfectly secure of his possession as the proprietor of a hundred thousand. The right of primogeniture, however, still continues to be respected, and as of all institutions it is the fittest to support the pride of family distinctions, it is still likely to endure for many centuries. In every other respect, nothing can be more contrary to the real interest of a numerous family, than a right which, in order to enrich one, beggars all the rest of the children.

Entails are the natural consequences of the law of primogeniture. They were introduced to preserve a certain lineal succession, of which the law of primogeniture first gave the idea, and to hinder any part of the original estate from being carried out of the proposed line either by gift, or devise, or alienation; either by the folly, or by the misfortune of any of its successive owners. **They were altogether unknown to the Romans. Neither their substitutions nor fideicommisses bear any resemblance to entails, though some French lawyers have thought proper to dress the modern institution in the language and form of those antient ones.**

When great landed estates were a sort of principalities, entails might not be unreasonable. Like what are called the fundamental laws of some monarchies, they might frequently hinder the security of thousands from being endangered by the caprice or extravagance of one man. **But in the present state of Europe, when small as well as great estates derive their security from the laws of their country, nothing can be more compleatly absurd. They are founded upon the most absurd of all suppositions, the supposition that every successive generation of men have not an equal right to the earth, and to all that it possesses;** but that the property of the present generation should be retrained and regulated according to the fancy of those who died perhaps five hundred years ago. Entails, however, are still respected through the greater part of Europe, in those countries particularly in which noble birth is a necessary qualification for the enjoyment either of civil or military honours. Entails are thought necessary for maintaining this exclusive privilege of the nobility to the great offices and honours of their country; and that order having usurped one unjust advantage over the rest of their fellow citizens, lest their poverty should render it ridiculous, it is thought reasonable that they should have another. The common law of England, indeed, is said to abhor perpetuities, and they are accordingly more restricted there than in any other European monarchy; though even England is not altogether without them. **In Scotland more than one-fifth, perhaps more than one-third part of the whole lands of the country, are at present under strict entail.**

https://founders.archives.gov/documents/Jefferson/03-06-02-0446 **[28 October 1813]**

at the first session of our legislature after the Declaration of Independance, we passed a law abolishing entails. and this was followed by one abolishing the privilege of Primogeniture, and dividing the lands of intestates equally among all their children, or other representatives. these laws, drawn by myself, laid the axe to the root of Pseudo-aristocracy. and had another which I prepared been adopted by the legislature, our work would have been compleat. it was a Bill8 for the more general diffusion of learning. this proposed to divide every county into wards of 5. or 6. miles square, like your townships; to establish in each ward a free school for reading, writing and common arithmetic; to provide for the annual selection of the best subjects from these schools who might recieve at the public expence a higher degree of education at a district school; and from these district schools to select a certain number of the most promising subjects to be compleated at an University, where all the useful sciences should be taught. **worth and genius would thus have been sought out from every condition of life, and compleatly prepared by education for defeating the competition of wealth & birth for public trusts.**
…

the law for religious freedom, which made a part of this system, having put down the aristocracy of the clergy, and restored to the citizen the freedom of the mind, and those of entails and descents nurturing an equality of condition among them, this on Education would have raised the mass of the people to the high ground of moral respectability necessary to their own safety, & to orderly government; and would have compleated the great object of qualifying them to select the veritable aristoi, for the trusts of government, to the exclusion of the Pseudalists: and the same Theognis who has furnished the epigraphs of your two letters assures us that ‘Ουδεμιαν πω, Κυρν’, αγαθοι πολιν ωλεςαν ανδρες.’

https://en.wikipedia.org/wiki/Fee_tail#Purpose

The fee tail allowed a patriarch to perpetuate his blood-line, family-name, honour and armorials[1] in the persons of a series of powerful and wealthy male descendants. By keeping his estate intact in the hands of one heir alone, in an ideally indefinite and pre-ordained chain of succession, his own wealth, power and family honour would not be dissipated amongst several male lines, **as became the case for example in Napoleonic**

France by operation of the Napoleonic Code which gave each child the legal right to inherit an equal share of the patrimony, where a formerly great landowning family could be reduced in a few generations to a series of small-holders or peasant farmers.

https://www.marxists.org/reference/archive/de-tocqueville/democracy-america/ch03.htm

When the equal partition of property is established by law, the intimate connection is destroyed between family feeling and the preservation of the paternal estate; the property ceases to represent the family; for as it must inevitably be divided after one or two generations, it has evidently a constant tendency to diminish, and must in the end be completely dispersed. The sons of the great landed proprietor, if they are few in number, or if fortune befriends them, may indeed entertain the hope of being as wealthy as their father, but not that of possessing the same property as he did; the riches must necessarily be composed of elements different from his.
…

The English laws concerning the transmission of property were abolished in almost all the States at the time of the Revolution. The law of entail was so modified as not to interrupt the free circulation of property.[05d] The first generation having passed away, estates began to be parcelled out, and the change became more and more rapid with the progress of time. **At this moment, after a lapse of a little more than sixty years, the aspect of society is totally altered;** the families of the great landed proprietors are almost all commingled with the general mass. In the State of New York, which formerly contained many of these, there are but two who still keep their heads above the stream, and they must shortly disappear. **The sons of these opulent citizens are become merchants, lawyers, or physicians. Most of them have lapsed into obscurity. The last trace of hereditary ranks and distinctions is destroyed – the law of partition has reduced all to one level.**

https://en.wikipedia.org/wiki/Richard_Walther_Darr%C3%A9#Nazi_Party_member

Darré campaigned for big landowners to part with some of their land to create new farms**, and promoted the controversial Hereditary Farm Law (Reichserbhofgesetz), which forcibly converted most of the country's small farms (from 7.5 to 125 hectares – 19 to 309 acres),[22] into hereditary estates that were to be passed from father to son under the ancient laws of entailment.** While the law protected small farmers from foreclosure and the ordeal of repossession, it also tied them and their descendants to their hereditary farm forever, not allowing it to be alienated nor mortgaged.

https://orthosphere.wordpress.com/2024/05/17/does-god-inflate-grades/

The political scientist C. Northcote Parkinson once said that the road from aristocracy to democracy begins with sympathy for younger brothers. To endure as exclusive elect, an aristocracy must enforce rigid primogeniture, priority in birth-order being the indispensable requirement for election. But fraternal affection and a healthy fear of assassination caused high-born big brothers to cut their little brothers some slack, and the trek to democracy was begun.
…

Before long there is no appreciable difference between the lower orders of the aristocracy and the upper orders of the bourgeoisie. **And so on, and so forth, until you extend the franchise to hobos and madmen and women.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Cassius_Dio/56*.html

2 **And when the knights were very urgent, during the games, in seeking the repeal of the law regarding the unmarried and the childless,** [Augustus] assembled in one part of the Forum the unmarried men of their number, and in another those who were married, including those who also had children. Then, perceiving that the latter were much fewer in number than the former, he was filled with grief and addressed them somewhat as follows:
…

5 1 **Yet, if one were to name over all the worst crimes, the others are as naught in comparison with this one you are now committing,** whether you consider them crime for crime or even set all of them together over against this single crime of yours. 2 For you are committing murder in not begetting in the first place those who ought to be your descendants; you are committing sacrilege in putting an end to the names and honours of your ancestors; and you are guilty of impiety in that you are abolishing your families, which were instituted by the gods, and destroying the greatest of offerings to them,—human life,—thus overthrowing their rites and their temples.
…

4 "Bethink you, therefore, what wrath would justly seize the great Romulus, the founder of our race, if he could reflect on the circumstances of his own birth and then upon your conduct in refusing to beget children even by lawful marriages! 5 **How wrathful would the Romans who were his followers be, if they could**

realize that after they themselves had even seized foreign girls, you are not satisfied even with those of your own race, and after they had got children even by enemy wives, you will not beget them even of women who are citizens!
...

6 Yet you have not striven for any of the recompenses nor feared any of the penalties, but have shown contempt for all these measures and have trodden them all underfoot, as if you were not living in a civilized community. **You talk, forsooth, about this 'free' and 'untrammelled' life that you have adopted, without wives and without children;** but you are not a whit better than brigands or the most savage of beasts. 7 1 For surely it is not your delight in a solitary existence that leads you to live without wives, nor is there one of you who either eats alone or sleeps alone; **no, what you want is to have full liberty for wantonness and licentiousness.** 2 Yet I allowed you to pay your court to girls still of tender years and not yet ripe for marriage, in order that, classed as prospective bridegrooms, you might live as family men should; **and I permitted those not in the senatorial order to wed freedwomen,** so that, if anyone through love or intimacy of any sort should be disposed to such a course, he might go about it lawfully.
...

How can the State be preserved, if we neither marry nor have children? 5 For surely you are not expecting men to spring up from the ground to succeed to your goods and to the public interests, as the myths describe! **And yet it is neither right nor creditable that our race should cease, and the name of Romans be blotted out with us, and the city be given over to foreigners—Greeks or even barbarians.** 6 **Do we not free our slaves chiefly for the express purpose of making out of them as many citizens as possible? And do we not give our allies a share in the government in order that our numbers may increase? And do you, then, who are Romans from the beginning and claim as your ancestors the famous Marcii, the Fabii, the Quintii, the Valerii, and the Julii, do you desire that your families and names alike shall perish with you?**
...

3 Later the *Lex Papia Poppaea* was framed by Marcus Papius Mutilus and by Quintus Poppaeus Secundus, who were consuls at the time for a part of the year. **Now it chanced that both of them were not only childless but were not even married,** and from this very circumstance the need of the law was apparent.

https://ccel.org/g/gibbon/decline/volume2/chap44.htm#people

The Romans had aspired to be equal; they were levelled by the equality of servitude; and the dictates of Augustus were patiently ratified by the formal consent of the tribes or centuries. **Once, and once only, he experienced a sincere and strenuous opposition. His subjects had resigned all political liberty; they defended the freedom of domestic life.** A law which enforced the obligation, and strengthened the bonds of marriage, was clamorously rejected; Propertius, in the arms of Delia, applauded the victory of licentious love; and the project of reform was suspended till a new and more tractable generation had arisen in the world. (30)

https://books.google.fi/books?id=mQspAwAAQBAJ&lpg=PP1&hl=fi&pg=PA35#v=onepage&q&f=false

In many ancient cultures, a person had only one name, with perhaps a patronymic, such as Jesus son of Joseph, which conveys little information about ancestry. **In contrast, a Roman or a Chinese had, besides a given name (*praenomen* or *ming*), a family name (*nomen* or *xing*) and, often for aristocrats, a surname (*cognomen* or *shih*) that kept track of clan branches.** Married women were known by the family name of their parents, so that all women from the house of Julii were called Julia, as were women from the house of Chen called Chenshih.
...

Conformity may encourage mediocrity, but regulated competition and wide distribution of honors created a large body of disciplined aristocrats of high uniform quality, even if less than brilliant. In its consistency and inexhaustibility lay the strength of the Republic.40
...

Chinese aristocrats did not organize their power in a corporate institution. Nevertheless, numerous rituals and behavioral norms succeeded in maintaining harmony and hierarchical deference among them for a long time. **Shortly after the Zhou king fled to Luoyang in 771 BCE, his military power dropped below that of a secondary lord, but morally he was still the unique symbol of authority. No hardcore Huaxia lord who exercised kingly power arrogated the title until the 330s BCE.** Such was the force of *li*.41

The Romans and Chinese both cherished moral influence through exemplary personality, usually reserved for those in power. **The Roman Senate had little *potestas* or official power. Instead, it commanded deference through its *auctoritas* or suasive authority based on excellence and prestige.**42 Cicero deemed the common people imitators, arguing that history shows “the state has taken its character from that of its foremost men. Whatever changes have taken place in the conduct of its leaders have been reproduced in the lives of the people.”43 **A similar view occurred in China, where rulers claimed authority through not *quan*, or official power, but *de*, or effective virtue or moral force.**44 *De* appeared often in the *Documents*, a collection of edicts and announcements of ancient kings, for example, “From *de* derives good policies that take care of the people.”45

Amid similar reverence for moral authority, however, a contrast stood out. **The Romans' respect for senatorial *auctoritas* did not diminish their respect for the law. The Confucian orthodoxy deemed the rule by personal *de* sufficient and denigrated the law as nothing but punishment, a coercive instrument.**46
...

Nevertheless, magistracies were not hereditary. Everyone had to win elections for them. The Roman Republic made a clear legal distinction between the state and the family, which the Chinese under Confucianism had difficulty achieving.

With its roots in feudalistic China, Confucianism confined politics to asymmetric personal relations, all-pervading *guanxi*. In contrast, social relations were fundamental to the Western classical city-states. **Whereas a Chinese was devoted to the ruler as a son was devoted to his father, a Roman citizen pledged allegiance to SPQR,** the *Senatus Populusque Romanus* (Senate and the Roman people). Whereas feudalistic Chinese aristocrats were absorbed by family relations, the Romans were also concerned about the politics of living in the *polis* (city-state) and handling public affairs. **The Chinese *gong*, now understood as the public, originally meant a lord or pertaining to the seigniorial house.**47 **A new dimension shone forth in the name of Rome's *res publica*, the public realm common to the people beyond their family lives in *res privata*, the private realm.** Rome had a vibrant public space, embodied in the forum of the popular assemblies and the Senate of aristocrats. There individuals participated in social relationship and developed the idea of a commonwealth. **The law and other institutions, impersonal and impartial, represented this public space and introduced the notion of the state distinct from the family.** This extra dimension in human life was absent in feudalistic China.

These ingrained traditions and their enduring influences will show up repeatedly in the following discussions. Although Chinese Legalist reformers introduced the public dimension, its growth would be stunted under Confucianism. The public spirit of the Roman Republic mostly collapsed in the Empire, **but the institution of law remained firm.**
...

Compared to the rebellions of Chinese *guoren* discussed later, the secessions of Roman plebs showed more solidarity, respect for the law, ability at reasonable negotiation, and organizational innovations that accrued social and political gains. **Compromises between the plebs and the patricians were not merely private bargains struck between two kin groups, which were local if not ephemeral.** Upheld in the strong public spirit characteristic of the Republic, they persisted, accumulated, and were gradually institutionalized. New forms of institutions are central to successful revolutions. Because of them, the Conflict of the Orders earned the epiphet of "a bloodless revolution."53
...

Contemporaneous Chinese clans feuding for political power swore collective oaths, but the oaths died with the clans, leaving only covenant tables to excite archeologists.55

https://archive.org/details/cu31924026480370/page/n421/mode/2up?view=theater

Thus, out of the injustice of these men, there was suddenly produced a great revolution, which changed the entire condition of the government, **or they added two tables of very tyrannical laws, and though matrimonial alliances had always been permitted, even with foreigners, they forbade, by the most abominable and inhuman [inhumanissima] edict, that any marriages should take place between the nobles and the commons—an order which was afterward abrogated by the decree of Canuleius.**

> https://archive.org/details/feudalgermany0000jame/page/168/mode/2up?view=theater
>
> Social differences were jealously guarded by social prescription. **The death penalty was imposed on any man who married above his rank; the marriage of a man below his station was severely condemned; bastardy was not tolerated; intermarriage between Saxons and other Germans was frowned upon; and strangers were hated.**1 So tenaciously did the Saxons cling to their ancient customary law that clear traces of these social survivals persisted in Saxony down through the Middle Ages.2

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Patricians

But not only can it be shown that patricians and plebeians coexisted as distinct orders in the Roman state at an earlier date than the evolution of citizenship by the clients. **It has further been established on strong archaeological and linguistic evidence that the long struggle between patricians and plebeians in early Rome was the result of a racial difference between them. There is reason to believe that the patricians were a Sabine race which conquered a Ligurian people of whom the plebeians were the survivors** (see ROME: *History*). Apart from the definite evidence, the theory of a racial distinction gains probability from the fact that it explains the survival of the distinction between the *patricii*, men with a family and genealogy, and the rest of the citizens, for some time after the latter had acquired the legal status of patres and were organized in gentes of their own; **for on this theory privilege would belong not to all who could trace free descent but only to those who could trace descent to an ancestor of the conquering race.** The family organization of the conquering race was probably higher than that of the conquered, and was only gradually attained by the latter.

> https://archive.org/details/greeks-romans-germans/page/333/mode/2up?view=theater

> The regrettable degeneration of the Roman people – the ebbing of their Nordic essence – while being hounded, cornered, and driven back on all sides in an unprecedented racial maelstrom, began very early. **The article argued that "the first step toward this chaos of peoples, as Chamberlain called it, was taken with the law of 443 before the Common Era, which authorized marriages between patricians and plebeians" – and which could conveniently be compared to "the law of 1823 that sanctioned unions between Germans and Jews."**52

…

The traditions of early Rome indeed represent the patricians as receiving the Claudii by a collective act into their body; **but the first authenticated instance of the admission of new members to the patriciate is that of the *lex Cassia*, which authorized Caesar as dictator to create fresh patricians.** The same procedure was followed by Augustus. Later on, the right of creating patricians came to be regarded as inherent in the principate, and was exercised by Claudius and Vespasian without any legal enactment, apparently in their capacity as censor (Tac. *Ann.* xi. 25; *Vita M. Antonini*, i.). Patrician rank seems to have been regarded as a necessary attribute of the princeps; **and in two cases we are told that it was conferred upon a plebeian princeps by the senate** (*Vita Juliani*, 3; *Macrini*, 7). **A comparison of this procedure with the original conception of the patriciate as revealed by the derivation of the word, is significant of the history of the conception of nobility at Rome, and illustrative of the tenacity with which the Romans clung to the name and form of an institution which had long lost its significance.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Sallust/Bellum_Jugurthinum/3*.html#ref123

15 **For my part, I believe that all men have one and the same nature, but that the bravest is the best born; [Quamquam ego naturam unam et communem omnium existumo, sed fortissumum quemque generosissumum.]** 16 and if the fathers of Albinus and Bestia could now be asked whether they would prefer to have me or those men for their descendants, what do you suppose they would reply, if not that they desired to have the best possible children?
…

31 "My words are not well chosen; I care little for that. Merit shows well enough in itself. **It is they who have need of art, to gloss over their shameful acts with specious words.** 32 **Nor have I studied Grecian letters. I did not greatly care to become acquainted with them, since they had not taught their teachers virtue.** 33 But I have learned by far the most important lesson for my country's good – to strike down the foe, to keep watch and ward, to fear nothing save ill repute, to endure heat and cold alike, to sleep on the ground, to bear privation and fatigue at the same time. 34 It is with these lessons that I shall encourage my soldiers; I shall not treat them stingily and myself lavishly, nor win my own glory at the price of their toil. 35 **Such leadership is helpful, such leadership is democratic;** [127] **[Hoc est utile, hoc civile imperium.] for to live in luxury oneself but control one's army by punishments is to be a master of slaves, not a commander. [dominum, non imperatorem]** 36 **It was by conduct like this that your forefathers made themselves and their country famous;** 37 but the nobles, relying upon such ancestors though themselves of very different character, despise us who emulate the men of old, and claim from you all honours, **not from desert, but as a debt. [non ex merito, sed quasi debitos]**

38 "But those most arrogant of men are greatly in error. **Their ancestors have left them all that they could – riches, portrait busts, their own illustrious memory; virtue they have not left them, nor could they have done so; that alone is neither bestowed nor received as a gift.** 39 They say that I am common and of rude manners, because I cannot give an elegant dinner and because I pay no actor or cook higher wages than I do my overseer. This I gladly admit, fellow citizens; 40 **for I learned from my father and other righteous men that elegance is proper to women but toil to men, that all the virtuous ought to have more fame than riches, and that arms and not furniture confer honour.**

https://books.google.fi/books?id=fj8oQ4lzteIC&lpg=PP1&hl=fi&pg=PA52#v=onepage&q&f=false

As a distinction, the patriciate mattered less than to be expected. It may be of some relevance that in the *Annales* the historian nowhere specifies any individual senator as a patrician. Before his time the word had become synonymous with aristocratic birth.21

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Tacitus/Annals/11B*.html#ref37

25 1 The emperor's speech was followed by a resolution of the Fathers, **and the Aedui[37] became the first to acquire senatorial rights in the capital:** a concession to a long-standing treaty and to their position as the only Gallic community enjoying the title of brothers to the Roman people.

Much at the same time, the Caesar adopted into the body of patricians all senators of exceptionally long standing or of distinguished parentage: for by now few families remained of the Greater and Lesser Houses, as they were styled by Romulus and Lucius Brutus;[38] and even those selected to fill the void, under the Cassian and Saenian laws, by the dictator Caesar and the emperor Augustus were exhausted.

https://en.wikipedia.org/wiki/Patrician_(ancient_Rome)#Fading_of_distinction

The last patrician families of the Republic went extinct in the Imperial period, and the latest known members of the "original" patrician houses are Servius Cornelius Dolabella Metilianus Pompeius Marcellus or possibly the Cornelii Scipiones Salvidieni Orfiti.[19]

https://archive.org/details/dli.ernet.506079/page/351/mode/2up?view=theater

The Roman Commonwealth in the days of the Republic was composed of three orders, each with definite rank, duties and privileges. They were to remain: **the Romans did not believe in equality.**1 **But passage from below to the equestrian order and from the equestrian order to the Senate was to be made incomparably more easy.** The justification for advancement lay in service—above all, military service. In this way a soldier's family might rise through equestrian to senatorial rank in two or three generations, according to the social system of the Principate; and senators were eligible to purple. **The passage of time extended the process and abbreviated the stages, so that the sons of knights, knights themselves and finally Thracian and Illyrian brigands became emperors of Rome.**

https://www.newadvent.org/fathers/360213031.htm

For there is this difference between the kings of the nations and the emperors of the republic, that the kings of the nations are lords of slaves, but the emperors of the republic lords of freemen.

Indeed, **though it was often challenged, the anti-ethnic character of Romanness is something of touchstone for Roman authors from almost every period of Latin literature.** Indeed, the rejection of blood as a criterion of identity was a central feature of Rome's foundation legend. Livy's Romulus instructs his eligible Roman bachelors **to remind prospective in-laws of neighboring tribes that "men should not be reluctant to mix their blood and lineages with men" (*ne graverentur homines cum hominibus sanguinem ac genus miscere*)** [1.9]; a dictum whose very borrowed vocabulary (*genus/genos*) evokes Rome's openness.143

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0054%3Abook%3D12%3Acard%3D791

The Author of mankind and all that is, smiling benignant, answered thus her plea: "Jove's sister true, and Saturn's second child, what seas of anger vex thy heart divine! But come, relinquish thy rash, fruitless rage: I give thee this desire, and yield to thee free submission. **The Ausonian tribes shall keep the speech and customs of their sires; the name remains as now; the Teucrian race, abiding in the land, shall but infuse the mixture of its blood. I will bestow a league of worship, and to Latins give one language only.** From the mingled breed a people shall come forth whom thou shalt see surpass all mortal men and even outvie the faithfulness of gods; for none that live shall render to thy name an equal praise."

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0026%3Abook%3D1%3Achapter%3D9

Acting on the advice of the senate, Romulus sent envoys amongst the surrounding nations to ask for alliance and the right of intermarriage on behalf of his new community. [3] **It was represented that cities, like everything else, sprung from the humblest beginnings, and those who were helped on by their own courage and the favour of heaven won for themselves great power and great renown.** [4] As to the origin of Rome, it was well known that whilst it had received divine assistance, courage and self-reliance were not wanting. There should, therefore, be no reluctance for men to mingle their blood with their fellow-men. [5] Nowhere did the envoys meet with a favourable reception. Whilst their proposals were treated with contumely, there was at the same time a general feeling of alarm at the power so rapidly growing in their midst. **Usually they were dismissed with the question, 'whether they had opened an asylum for women, for nothing short of that would secure for them inter-marriage on equal terms.'**

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Dionysius_of_Halicarnassus/3A*.html

Another argument—and do not take this as said by way of censure or reproach of you Romans, but only from necessity—is the fact that **the Alban race has to this day continued the same that it was under the founders of the city, and one cannot point to any race of mankind, except the Greeks and Latins, to whom we have granted citizenship; whereas you have corrupted the purity of your body politic by admitting Tyrrhenians, Sabines, and some others who were homeless, vagabonds and barbarians,** and that in great numbers too, so that the true-born element among you that went out from our midst is become small, or rather a tiny fraction, in comparison with those who have been brought in and are of alien race. 5 **And if we should yield the command to you, the base-born will rule over the true-born, barbarians over Greeks, and immigrants over the native-born.** For you cannot even say this much for yourself, that you have not permitted this immigrant mob to gain any control of public affairs but that you native-born citizens are yourselves the rulers and councillors of the commonwealth. **Why, even for your kings you choose outsiders, and the greatest part of your senate consists of these newcomers; and to none of these conditions can you assert that you submit willingly.** For what man of superior rank willingly allows himself to be ruled by an inferior? It would be great folly and baseness, therefore, on our part to accept willingly those evils which you must own you submit to through necessity.
...

4 **For we are so far from being ashamed of having made the privileges of our city free to all who desired them that we even take the greatest pride in this course;** moreover, we are not the originators of this admirable practice, but took the example from the city of Athens, which enjoys the greatest reputation among the Greeks, due in no small measure, if indeed not chiefly, to this very policy. 5 **And this principle, which has been to us the source of many advantages, affords us no ground either for complaint or regret, as if we had committed some error.** Our chief magistracies and membership in the senate are held and the other honours among us are enjoyed, not by men possessed of great fortunes, nor by those who can show a long line of ancestors all natives of the country, but by such as are worthy of these honours; **for we look upon the nobility of men as consisting in nothing else than in virtue.** The rest of the populace are the body of the commonwealth, contributing strength and power to the decisions of the best men.

https://books.google.fi/books?id=rfPWAQAAQBAJ&lpg=PP1&hl=fi&pg=PA154#v=onepage&q&f=false

6 We must be careful to make a distinction, unlike some who have incorrectly supposed that a single formula (*carmen*) is used both to call the gods out of a city and to devote the city itself to destruction. I have found both formulas in the fifth Book of the *Secret World* (*Res Reconditae*) of Sammonicus Serenus, who stated that he had come across them in an extremely ancient book by one Furius. 7 **The formula to call the gods out of a city encircled by a siege is as follows:** 'Whether god of goddess, under whose protection are the people and the state of Carthage, and to you especially who have been charged with the protection of this city and people, **I pray and do reverence and ask a favour of you all,** that you abandon the people and state of Carthage, forsake their places, temples, shrines, and city, 8 and depart from these; and that you bring fear, terror and bewilderment upon that people and state; **and that, once you have abandoned them, you come to Rome, to me and to mine; and that you take me and the Roman people and my soldiers under your charge that we may know and understand this. If you shall so have done, I vow to you that I shall construct temples and celebrate games.**' 9 With these words victims should be sacrificed, and the authority of the entrails examined to see if they predict these events for the future.

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0019%3Atext%3DScaur.%3Asection%3D42

[42] **All the monuments of the ancients and all histories have handed down to us the tradition that the nation of the Phoenicians is the most treacherous of all nations.** The Poeni, who are descended from them, have proved by many rebellions of the Carthaginians, and very many broken and violated treaties, that they have in no respect degenerated from them. **The Sardinians, who are sprung from the Poeni, with an admixture of African blood, were not led into Sardinia as colonists and established there, but are rather a tribe who were draughted off, and put there to get rid of them.**

[43] Wherefore, as there was never anything honest in the nation when united, how must we suppose that its roguery has been sharpened by so many mixtures of different races? And here Cnaeus Domitius Sincerus, a most accomplished man, my ancient and intimate friend, will pardon me **** all who had the freedom of the city conferred on them by the same Cnaeus Pompeius; all of whom we now cite as favourable witnesses; **and other virtuous men from Sardinia will pardon me; for I believe there are some such men there.** [44] **Nor indeed, when I speak of the vices of the nation, do I except no one. But I am forced to speak generally of the entire race; in which, perhaps, some individuals by their own civilized habits and natural humanity [suis moribus et humanitate] have got the better of the vices of their family and nation.**

https://www.holocausthistoricalsociety.org.uk/contents/naziseasternempire/himmlersspeechatposen.html

It is one of those things that's easy to say: "The Jewish people will be extirpated", says every Party comrade, "that's quite clear, it's in our programme: elimination of the Jews, extirpation; that's

> what we're doing." **And then they all come along, these 80 million good Germans, and every one of them has his decent Jew.** Of course, it's quite clear that the others are pigs, but this one is one first-class Jew.

That the greater part of the nation is destitute of faith, destitute of any community and connection with our name, the facts themselves plainly show. **For what province is there besides Sardinia which has not one city in it on friendly terms with the Roman people, not one free city?**

[45a] Africa itself is the parent of Sardinia, which has waged many most bitter wars against our ancestors, and not only in its kingdoms which were loyal to their native monarchs, but even in our very province, it kept itself from all alliance with us at the time of the Punic wars as the case of Utica proves. **The further Spain ennobled by the de[ath of the Scipios, and by the funeral pile of the Saguntine loyalty, has the city of Gades joined to us by reciprocal good offices, by common dangers, and by treaty.** I ask now whether any city of Sardinia can be mentioned which is joined to us by treaty? Not one.

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Balbus

1. LUCIUS CORNELIUS BALBUS (called *Major* to distinguish him from his nephew) was born early in the last century B.C. **He is generally considered to have been of Phoenician origin.** For his services against Sertorius in Spain, the Roman citizenship was conferred upon him and his family by Pompey. Becoming friendly with all parties, **he had much to do with the formation of the First Triumvirate, and was one of the chief financiers in Rome. He was careful to ingratiate himself with Caesar, whom he accompanied when propraetor to Spain (61), and to Gaul (58) as chief engineer (*praefectus fabrum*).** His position as a naturalized foreigner, his influence and his wealth naturally made Balbus many enemies, who in 56 put up a native of Gades to prosecute him for illegally assuming the rights of a Roman citizen, a charge directed against the triumvirs equally with himself. Cicero, Pompey and Crassus all spoke on his behalf, and he was acquitted.

And I wish that those men in all quarters of the world who are the defenders of this empire, could all enter this city as citizens, and, on the other hand, that all the enemies of the republic could be got rid or out of it. Nor, indeed, did that great poet of our country intend that exhortation which he put into the mouth of Hannibal to be peculiarly his language, but rather the common address of all generals:

> “The man who slays a foe, whate'er his race,
> Come whence he will, I call my countryman.”

And from what country an ally comes, all men consider and always have considered unimportant. Therefore, they have at all times adopted brave men as citizens from all quarters, and have often preferred the valour of men who may have been meanly born to the inactivity of the nobility.

>
> But in speaking of race, it is not intended in the sense in which it is the fashion among anti-Semites in Europe and America to use it today: Darwinistically, materially. Race purity is a grotesque word in view of the fact that for centuries all stocks and species have been mixed, **and that warlike – that is, healthy – generations with a future before them have from time immemorial always welcomed a stranger into the family if he had “race,” to whatever race it was he belonged. Those who talk too much about race no longer have it in them. <u>What is needed is not a pure race, but a *strong* one</u>, which has a nation within it.**
>
> https://docsouth.unc.edu/nc/bartram/bartram.html
>
> THE national character of the Muscogulges, when considered in a political view, exhibits a portraiture of a great or illustrious heroes. A proud, haughty and arrogant race of men; they are however, brave and valiant in war, ambitious of conquest, restless and perpetually exercising their arms, **yet magnanimous and merciful to a vanquished enemy, when he submits and seeks their friendship and protection: <u>always uniting the vanquished tribes in confederacy with them; when they immediately enjoy, unexceptionably, every right of free citizens, and are from that moment united in one common band of brotherhood:</u>** they were never known to exterminate a tribe, except the Yamasees, who would never submit on any terms, but fought it out to the last, only about forty or fifty of them escaping at the last decisive battle, who threw themselves under the protection of the Spaniards at St. Augustine.
>
> https://www.dailymail.co.uk/news/article-2396760/How-Comanche-Indians-butchered-babies-roasted-enemies-alive.html

Interestingly the Comanche, though hostile to all competing tribes and people they came across, had no sense of race. They supplemented their numbers with young American or Mexican captives, who could become full-fledged members of the tribe if they had warrior potential and could survive initiation rites.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Strabo/3B*.html#ref56

15 **Along with the happy lot of their country, the qualities of both gentleness and civility have come to the Turdetanians;** and to the Celtic peoples, too, on account of their being neighbours to the Turdetanians, as Polybius has said, or else on account of their kinship; but less so the Celtic peoples, because for the most part they live in mere villages. **The Turdetanians, however, and particularly those that live about the Baetis, have completely changed over to the Roman mode of life, not even remembering their own language any more. And most of them have become Latins,[61] and they have received Romans as colonists, so that they are not far from being all Romans.**

https://cmuntz.hosted.uark.edu/texts/claudius-lyon-speech.html

5. Certainly it was a new thing when my great-uncle Augustus and my uncle Tiberius decided to admit into this Senate house the flower of the coloniae and **the cities [municipiorum]** from all over the empire--**all of them good and wealthy men of course.** But, you may say, is not an Italian senator more useful than a provincial one? When I start explaining this aspect of my censorship I will reveal what I think about that. But certainly I think that provincials should not be rejected, as long as they will be a credit to the Senate.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Tacitus/Annals/11B*.html#ref27

23 1 In the consulate of Aulus Vitellius[21] and Lucius Vipsanius, the question of completing the numbers of the senate was under consideration, and the leading citizens of Gallia Comata,[22] as it is termed, who had long before obtained federate rights and Roman citizenship,[23] were claiming the privilege of holding magistracies in the capital. Comments on the subject were numerous and diverse; and in the imperial council the debate was conducted with animation on both sides:—**"Italy," it was asserted, "was not yet so moribund that she was unable to supply a deliberative body to her own capital.** The time had been when a Roman-born senate was enough for nations[24] whose blood was akin to their own; and they were not ashamed of the old republic. Why, even to-day men quoted the patterns of virtue and of glory which, under the old system, the Roman character had given to the world! **Was it too little that Venetians and Insubrians[25] had taken the curia by storm, unless they brought in an army of aliens to give it the look of a taken town? What honours would be left to the relics of their nobility or the poor senator who came from Latium? All would be submerged by those opulent persons whose grandfathers and great-grandfathers, in command of hostile tribes, had smitten our armies by steel and the strong hand, and had besieged the deified Julius at Alesia.[26]** But those were recent events! What if there should arise the memory of the men who essayed to pluck down the spoils, sanctified to Heaven, from the Capitol and citadel of Rome?[27] Leave them by all means to enjoy the title of citizens: but the insignia of the Fathers, the glories of the magistracies,—these they must not vulgarize!"

24 1 Unconvinced by these and similar arguments, the emperor not only stated his objections there and then, but, after convening the senate, addressed it as follows:[28]—

"**In my own ancestors, the eldest of whom, Clausus,[29] a Sabine by extraction, was made simultaneously a citizen and the head of a patrician house, I find encouragement to employ the same policy in my administration, by transferring hither all true excellence, let it be found where it will.** For I am not unaware that the Julii came to us from Alba, the Coruncanii from Camerium,[30] the Porcii from Tusculum; that—not to scrutinize antiquity—members were drafted into the senate from Etruria, from Lucania, from the whole of Italy;[31] and that finally Italy itself was extended to the Alps,[32] in order that not individuals merely but countries and nationalities should form one body under the name of Romans. **The day of stable peace at home and victory abroad came when the districts beyond the Po were admitted to citizenship, and, availing ourselves of the fact that our legions were settled throughout the globe, we added to them the stoutest of the provincials, and succoured a weary empire. Is it regretted that the Balbi crossed over from Spain and families equally distinguished from Narbonese Gaul? Their descendants remain; nor do they yield to ourselves in love for this native land of theirs. What else proved fatal to Lacedaemon and Athens, in spite of their power in arms, but their policy of holding the conquered aloof as alien-born? But the sagacity of our own founder Romulus was such that several times he fought and naturalized a people in the course of the same day!** Strangers have been kings over us: the conferment of magistracies on the sons of freedmen is not the novelty which it is commonly and mistakenly thought, but a frequent practice of the old commonwealth.—'But we fought with the Senones.'—Then, presumably, the Volscians and Aequians[33] never drew up a line of battle against us.—'We were taken by the Gauls.'—But we also gave hostages to the Tuscans[34] and underwent the yoke of the Samnites.[35]—And yet, if you survey the whole of our wars, not one was finished within a shorter period[36] than that against the Gauls: thenceforward there has been a continuous and loyal peace. **Now that customs, culture, and the ties of marriage have blended them with ourselves, let them bring among us their gold and their riches instead of retaining them beyond the pale! All, Conscript Fathers, that is now believed supremely old has been new: plebeian magistrates followed the patrician; Latin, the plebeian; magistrates**

from the other races of Italy, the Latin. Our innovation, too, will be parcel of the past, and what to-day we defend by precedents will rank among precedents."

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Tacitus/Histories/4C*.html#ref34

73 1 Presently Cerialis called an assembly of the Treviri and Lingones and addressed them thus: "I have never practised oratory and the Roman people has ever asserted its merits by arms: but since words have the greatest weight with you and you do not reckon good and evil according to their own nature, but estimate them by the talk of seditious men, I have decided to say a few things which now that the war is over are more useful for you to hear than for me to say. **Roman commanders and generals entered your land and the lands of the other Gauls from no desire for gain but because they were invited by your forefathers, who were wearied to death by internal quarrels, while the Germans whom they had invited to help them had enslaved them all, allies and enemies alike.** How many battles we have fought against the Cimbri and Teutoni, with what hardships on the part of our armies and with what result we have conducted our wars against the Germans, is perfectly well known. **We have occupied the banks of the Rhine not to protect Italy but to prevent a second Ariovistus from gaining the throne of Gaul.**[35] Do you believe that you are dearer to Civilis and his Batavians or to the peoples across the Rhine than your grandfathers and fathers were to their ancestors? The Germans always have the same reasons for crossing into the Gallic provinces—lust, avarice, and their longing to change their homes, that they may leave behind their swamps and deserts, and become masters of this most fertile soil and of you yourselves: **freedom, however, and specious names are their pretexts; but no man has ever been ambitious to enslave another or to win dominion for himself without using those very same words.**

74 1 "There were always kings and wars throughout Gaul until you submitted to our laws. Although often provoked by you, **the only use we have made of our rights as victors has been to impose on you the necessary costs of maintaining peace;** for you cannot secure tranquillity among nations without armies, nor maintain armies without pay, nor provide pay without taxes: **everything else we have in common. You often command our legions; you rule these and other provinces; we claim no privileges, you suffer no exclusion. [cetera in communi sita sunt. ipsi plerumque legionibus nostris praesidetis, ipsi has aliasque provincias regitis; nihil separatum clausumve.]** You enjoy the advantage of the good emperors equally with us, although you dwell far from the capital: the cruel emperors assail those nearest them. You endure barren years, excessive rains, and all other natural evils; in like manner endure the extravagance or greed of your rulers. There will be vices so long as there are men, but these vices are not perpetual and they are compensated for by the coming of better times: unless perchance you hope that you will enjoy a milder rule if Tutor and Classicus reign over you, or that the taxes required to provide armies to keep out the Germans and Britons will be less than now. **For, if the Romans are driven out—which Heaven forbid—what will follow except universal war among all peoples? [quid aliud quam bella omnium inter se gentium existent?]** The good fortune and order of eight hundred years have built up this mighty fabric which cannot be destroyed without overwhelming its destroyers: moreover, you are in the greatest danger, for you possess gold and wealth, which are the chief causes of war. **Therefore love and cherish peace and the city wherein we, conquerors and conquered alike, enjoy an equal right: [proinde pacem et urbem, quam victi victoresque eodem iure obtinemus, amate colite]** be warned by the lessons of fortune both good and bad not to prefer defiance and ruin to obedience and security."

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Tacitus/Histories/2B*.html#ref39

There was nothing that angered the province and the army so much as the assertion of Mucianus that Vitellius had decided to transfer the legions of Germany to Syria, where they could enjoy a profitable and easy service, while in exchange he would assign to the troops in Syria the wintry climate and the laborious duties of Germany. **For the provincials were accustomed to live with the soldiers, and enjoyed association with them; in fact, many civilians were bound to the soldiers by ties of friendship and of marriage, [necessitudinibus et propinquitatibus]** and the soldiers from their long service had come to love their old familiar camps as their very hearths and homes.

https://archive.org/details/in.ernet.dli.2015.231118/page/n453/mode/2up?view=theater

[Trajan] was the first in a long line of generals whose provincial birth and training seemed to give them the will-to-life that had gone from the native Roman stock. That Rome made no protest against this enthronement of a provincial was in itself an event and omen in Roman history.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Ammian/25*.html#ref94

8 But what grieved the very heart of every **patriotic citizen [bonorum]** was this, that fearful of a rival to his power and bearing in mind that it was in Gaul and Illyricum that many men had taken the first steps to loftier power, in his haste to outstrip the report of his coming, under pretext of avoiding perjury he committed an act unworthy of an emperor, **betraying Nisibis, which ever since the time of King Mithridates' reign had resisted with all its might the occupation of the Orient by the Persians.**[96]

https://penelope.uchicago.edu/Thayer/E/Gazetteer/Places/Europe/Italy/_Texts/HODIHI/2d_edition/1/2*.html#ref7

The great city of Nisibis, which had with scarcely any interruption belonged to the Roman Empire since the time of Trajan and which had been the great *entrepôt* of the commerce of East and West, was to be surrendered to Sapor: and the cities of Singara and Castra Maurorum with fifteen fortresses were to share the same fate.
...

Here was a city erected upon the highlands of Mesopotamia; whose river, after a devious course, flowed into the Euphrates. From its walls Tigris could perhaps be descried gleaming upon the eastern horizon. It was doubtless essentially Asiatic in its character: **its citizens spoke the Aramaic tongue of Hazael and Benhadad;** those who were most closely connected with Europe and had the most successfully assimilated the Western civilisation, might at the utmost be familiar with the Greek language which had been learned by the subjects of Seleucus and Antiochus. **Yet these Orientals clung with passionate devotion to the name of Romans, and asked for nothing better far from their rulers than to be allowed to fight for their connexion with the far-off City by the Tiber.** In the course of this history we shall often come across cruel cases of oppression by Roman governors; we shall often have to trace the desolating presence of the Roman tax-gatherer; we shall sometimes hear the suggestion that even subjection to the barbarian is better than the exhausting tyranny of Roman prefects. **But this is not the abiding, the universal conviction of the subjects of the Empire. Their own old feelings of nationality have long ago been laid aside, and to them the Empire, or as they call it 'the Commonwealth of Rome,' is home;** loved, notwithstanding all its faults, and not to be abandoned without passionate lamentation.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Claudian/Introduction*.html#ref4

We have, for what it is worth, the word of Suidas and the lines of Sidonius Apollinaris,[8] which clearly refer to Claudian and which give Canopus as the place of his birth. (Canopus is almost certainly to be taken as synonymous with Egypt.) But besides these two statements we have only to look at his interest in things Egyptian, *e.g.* his poems on the Nile, the Phoenix, etc., at such passages as his account of the rites at Memphis,[9] at such phrases as "nostro cognite Nilo,"[10] to see that the poet is an Egyptian himself. It is probable that, whether or not he spent all his early life in Egypt, Claudian did not visit Rome until 394. We know from his own statement[11] that **his first essays in literature were all of them written in Greek and that it was not until the year 395 that he started to write Latin.**
...

It is not easy to arrive at any just estimate of Claudian as a writer, partly because of an inevitable tendency to confuse relative with absolute standards, and partly (and it is saying much the same thing in other words) because it is so hard to separate Claudian the poet from Claudian the manipulator of the Latin language. If we compare his latinity with that of his contemporaries (with the possible exception of Rutilius) or with that of such a poet as Sidonius Apollinaris, who came not much more than half a century after him, **it is hard to withhold our admiration from a writer who could, at least as far as his language is concerned, challenge comparison with poets such as Valerius Flaccus, Silius Italicus, and Statius—poets who flourished about three centuries before him.[24] I doubt whether, subject matter set aside, Claudian might not deceive the very elect into thinking him a contemporary of Statius, with whose *Silvae* his own shorter poems have much in common.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Claudian/Probino_et_Olybrio*.html#136

Grant it; **so may Scythian Araxes be our vassal and Rhine's either bank; so may the Mede be o'erthrown and the towers that Semiramis built yield to our standards, while amazed Ganges flows between Roman cities.**"

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Claudian/In_Rufinum/1*.html#368

The goddess made answer: "Thou shalt rage no further, mad that thou art. Now shall thy creature receive his due, the destined avenger hangs over him, and he who now wearies land and the very sky shall die, though no handful of dust shall cover his corpse. Soon shall come Honorius, promised of old to this fortunate age, brave as his father Theodosius, brilliant as his brother Arcadius; he shall subdue the Medes and overthrow the Indians with his spear. Kings shall pass under his yoke, frozen Phasis shall bear his horses' hooves, and Araxes submit perforce to be bridged by him. **Then too shalt thou be bound with heavy chains of iron and cast out from the light of day and imprisoned in the nethermost pit, thy snaky locks overcome and shorn from thy head. Then the world shall be owned by all in common, no field marked off from another by any dividing boundary, [tum tellus communis erit, tum limite nullo discernetur ager] no furrow cleft with bended ploughshare; for the husbandman shall rejoice in corn that springs untended.** Oak groves shall drip with honey, streams of wine well up of every side, lakes of oil abound. No price shall be asked for fleeces dyed scarlet, but of themselves shall the flocks grow red to the astonishment of the shepherd, and in every sea the green seaweed will laugh with flashing jewels."

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Claudian/De_Consulatu_Stilichonis/2*.html#refA

Beneath thy rule the rich tremble not for the safety of ancestral lands or houses; no informer stalks the world set on making no matter whom his victim. Virtue suffers no eclipse by poverty. **Thou exaltest men of all countries, asking what are their merits not their place of birth, what their character not whence their origin. [lectos ex omnibus oris evehis et meritum, non quae cunabula, quaeris, et qualis non unde satus.] A generous prince takes note of our life; rewards allure into the ways of virtue. Hence it comes that the arts of old flourish once more; the path to fortune is open to genius, while poesy again raises her despised head.** Rich and poor strive with equal zeal towards their ends, for both see that, as poverty cannot depress merit, so riches cannot elevate incapacity.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Claudian/De_Consulatu_Stilichonis/3*.html#130

'Tis she alone who has received the conquered into her bosom and like a mother, not an empress, protected the human race with a common name, summoning those whom she has defeated to share her citizenship and drawing together distant races with bonds of affection. To her rule of peace we owe it that the world is our home, **that we can live where we please, [quod sedem mutare licet]** and that to visit Thule and explore its once dread wilds is but a sport; thanks to her all and sundry may drink the waters of the Rhone and quaff Orontes' stream, **thanks to her we are all one people. [quod cuncti gens una sumus]**

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Rutilius_Claudius_Namatianus

The author is a native of S. Gaul (Toulouse or perhaps Poitiers), and belonged, like Sidonius, to one of the great governing families of the Gaulish provinces. His father, whom he calls Lachanius, had held high offices in Italy and at the imperial court, had been governor of Tuscia (Etruria and Umbria), then imperial treasurer (*comes sacrarum largitionum*), imperial recorder (*quaestor*), and governor of the capital itself (*praefectus urbi*). Rutilius boasts his career to have been no less distinguished than his father's, and particularly indicates that he had been secretary of state (*magister officiorum*) and governor of the capital (i. 157, 427, 467, 561).
...

Only once or twice does Rutilius speak directly of Christianity, and then only to attack the monks, whom the temporal authorities had hardly as yet recognized, and whom, indeed, only a short time before, a Christian emperor had forced by thousands into the ranks of his army. Judaism Rutilius could assail without wounding either pagans or Christians, but he intimates, not obscurely, that he hates it chiefly as the evil root whence the rank plant of Christianity had sprung.

We read in Gibbon that "Honorius excluded all persons who were adverse to the catholic church from holding any office in the state," that he "obstinately rejected the service of all those who dissented from his religion," and that "the law was applied in the utmost latitude and rigorously executed." **Far different is the picture of political life impressed upon us by Rutilius.** His voice is assuredly not that of a partisan of a discredited and overborne faction. We see by the aid of his poem a senate at Rome composed of past office-holders, the majority of whom were certainly pagan still. We discern a Christian section whose Christianity was political rather than religious, who were Romans first and Christians afterwards, **whom a new breeze in politics might easily have wafted back to the old religion.** Between these two sections the broad old Roman toleration reigns.
...

The poet shows as deep a consciousness as any modern historian that the grandest achievement of Rome was the spread of law.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Rutilius_Namatianus/Introduction*.html

Educated on the lines of the ancient learning, Rutilius, as his poem indicates, was a man of literary knowledge and taste, an adherent of paganism, **and influenced by Stoic philosophy.**
...

His tender Stoic melancholy, coloured rather than seared by the memory of Rome's recent capture by the Goths, does not prevent him from cherishing an optimistic confidence in her recovery, even as in long-past history she had recovered after the Allia and Cannae. And so in his encomium upon the imperial city, sincere enough in feeling and yet in phrasing more rhetorical than poetic, **Rutilius has uttered the swan-song of Rome.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Rutilius_Namatianus/text*.html

How greatly and how often can I count those blest who have deserved birth in that happy soil! Those high born scions of Roman nobility crown their honourable birth with the lustre of the Capital! On no other land could the seeds of virtues have been more worthily let fall by heaven's assignment. Happy they too who, winning meeds next to the first, have enjoyed Latin homes![3] **The Senate-house, though fenced with awe, yet stands open to foreign merit, nor deems those strangers who are fittingly**

its own. [religiosa patet peregrinae curia laudi, nec putat externos quos decet esse suos] They share the power of their colleagues in the senatorial order, and possess part of the sacred Genius[4] which they revere, even as from ethereal pole to pole of the celestial vault we believe there abideth the council of the Deity Supreme.
…

As far as living nature hath stretched towards the poles, so far hath earth opened a path for thy valour. **For nations far apart thou hast made a single fatherland; under thy dominion captivity hath meant profit even for those who knew not justice:[10] and by offering to the vanquished a share in thine own justice, [profuit iniustis te dominante capi. dumque offers victis proprii consortia iuris] thou hast made a city of what was erstwhile a world.**

"**As authors of our race we acknowledge Venus and Mars—mother of the sons of Aeneas, father of the scions of Romulus: clemency in victory tempers armed strength: both names[11] befit thy character: hence thy noble pleasure in war and in mercy: it vanquishes the dreaded foe and cherishes the vanquished. [quos timuit superat, quos superavit amat]** The god who found the olive-tree is worshipped, the deity too who discovered wine, and the youth who first drove the ploughshare in the soil;[12] the healing art through the skill of the god Paeon[13] won altars: Hercules by his renown was made divine: **thou, too, who hast embraced the world in triumphs fraught with law, dost make all things live under a common covenant. Thee, O goddess, thee every nook of the Roman dominion celebrates, beneath a peaceful yoke holding necks unenslaved. [tu quoque, legiferis mundum complexa triumphis, foedere communi vivere cuncta facis. te, dea, te celebrat Romanus ubique recessus pacificoque gerit libera colla iugo.]** The stars, which watch all things in their unceasing motion, never looked upon a fairer empire. What like unto thy power did it fall to Assyrian arms to link in one? The Persians only subdued neighbours of their own. The mighty Parthian kings and Macedonian monarchs[14] imposed laws on each other through varying changes. **It was not that at thy birth thou hadst more souls and hands: but more prudence and more judgement were thine. By wars for justifiable cause and by peace imposed without arrogance thy renowned glory reached highest wealth. [nec tibi nascenti plures animaeque manusque, sed plus consilii iudiciique fuit. iustis bellorum causis nec pace superba nobilis ad summas gloria venit opes.]**

The army heard with shame the reproofs of their great commander, and laying aside their careless and self-indulgent ways, **'returned,' says the historian, 'to the habits of their ancestors.'**65 **These ancestors were of course supposed to be the men of Rome. It shows what magic yet lay in that mighty name, that this Armenian Eunuch, addressing his motley host of Huns, Heruli, Isaurians, Warni, could win them back from dissipation and self-indulgence by this single argument, 'They are unworthy of your Roman forefathers.'**

https://books.google.fi/books?id=mQspAwAAQBAJ&lpg=PP1&hl=fi&pg=PA7#v=onepage&q&f=false

Our stories on either side begin with massive migrations of pastoralists and raids on the relatively prosperous agriculturalists. In response, the plains states put aside their mutual grievances and closed rank, as a Chinese remarked: "Brothers wrangle at home but unite against external threats."20 **The Zhou states formed a federacy under a hegemon "to resist the Yi." Rome and other Latin cities ceased squabbling and cooperated to defend against Volsci and Aequi intrusions.**21 Eventually the agriculturists prevailed, their states strengthened by the experience of fighting and the incorporation of the vanquished. The names of many pastoral peoples disappeared from later historical records. Their fates varied. Some were massacred, others subjugated; still others expelled or moved away. Most adopted a sedentary life and after several generations became indistinguishable from neighboring farmers.

Fighting aside, intermarriage, colonization, political integration, and cultural assimilation all contributed to the formation of a unitary people. As the major group in each region, the Romans and the Huaxia were chauvinistic, aggressive, discriminative, and jealous of their own advantages. **However, their prejudices were closer to the racism of America after the civil rights movements of the 1960s than to that before the Civil War of the 1860s. Comparing their attitudes with those of contemporaneous Greeks reveals their relative openness to other ethnicities,** which enabled them to adapt and absorb others, thus amplifying their own strength.

>
> [3:5] The Master said: "The tribes of the East and North (Koreans and Mongolians), though having kings, are not equal to our people, even when lacking kings."
>
> > [*Comment*] **Either Confucius is an outright ethnic chauvinist, or he is pointing to a real difference in the relative level of cultural development at that time between the central Chinese kingdoms and the peoples of the outlying regions.**

When Rome began to urbanize, there were some 700 Greek city-states already scattered along the Mediterranean and Black Sea coasts like frogs around a pond, as Plato remarked. Except for a few giants such as Athens and Corinth, most were rather small, with an average population of several thousand. Citizenship in a Greek city-state carried enormous political, social, and economic privileges. Who were qualified for it? **Aristotle explained, "In practice it is usual to define a citizen as one born of citizen parents on both sides, and not on the father's or mother's side only; but sometimes this requirement is carried still farther, to the length of two, three, or more stages of ancestry."**22 **Not even distant descendants of marriage to an outsider were safe from expulsion.** Double endogamy closed the citizen body upon itself. Its enforcement was so rigorous in democratic Athens that one modern scholar observes, "One gets a distinct sense of siege, of barricades being manned, of determined resistance to constant pressures from outside."23

In contrast, intermarriage among peoples with little penalty was common in Italy and China. Rome gradually extended citizenship together with its privileges to the peoples it conquered. **Imperial China did not institute formal citizenship but routinely extended uniform duties and privileges to all inhabitants. Furthermore, the Chinese tabooed marriage between persons with the same family name. This precluded intermarriage among most ruling houses, whose members were relatives within the Zhou clan and shared a family name.** The necessity of out-marriage compelled many aristocrats to seek unions with locals and commoners, sometimes non-Huaxia in origin.24

Criteria of access to authoritative positions are crucial to any power structure. **Amid Greek exclusiveness, Alexander was a singularity. The Greco-Roman biographer Plutarch wrote, "Alexander did not do as Aristotle advised – play the part of a leader to the Greeks and of a master to the barbarians, care for the former as friends and kinsmen, and treat the latter as beasts or plants, … he behaved alike to all."**25 **As soon as he died, his successors reverted to the Greek tradition and expelled from powerful positions all Persians and other natives of the conquered lands.** Across the vast Hellenistic world, Greeks and Macedonians became "the new master race," to use the term of modern historians; they formed a closed circle to which very few natives gained access, and then only slowly and painfully.26

> http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Diodorus_Siculus/18A*.html#ref20
>
> 3 But that he might not appear to be arbitrarily detracting anything from the glory of Alexander, he laid these matters before the common assembly of the Macedonians for consideration. 4 The following were the largest and most remarkable items of the memoranda. **It was proposed to build a thousand warships, larger than triremes, in Phoenicia, Syria, Cilicia, and Cyprus for the campaign against the Carthaginians and the others who live along the coast of Libya and Iberia and the adjoining coastal region as far as Sicily;[21] to make a road along the coast of Libya as far as the Pillars of Heracles** and, as needed by so great an expedition, to construct ports and shipyards at suitable places; to erect six most costly temples, each at an expense of fifteen hundred talents; **and, finally, to establish cities and to transplant populations from Asia to Europe and in the opposite direction from Europe to Asia, in order to bring the largest continents to common unity and to friendly kinship by means of intermarriages and family ties.** 5 The temples mentioned above were to be built at Delos, Delphi, and Dodona, and in Macedonia a temple to Zeus at Dium, to Artemis Tauropolus at Amphipolis, and to Athena at Cyrnus.[22] Likewise at Ilium in honour of this goddess there was to be built a temple that could never be surpassed by any other.[23] A tomb for his father Philip was to be constructed to match the greatest of the pyramids of Egypt, buildings which some persons count among the seven greatest works of man.[24] 6 **When these memoranda had been read, the Macedonians, although they applauded the name of Alexander, nevertheless saw that the projects were extravagant and impracticable and decided to carry out none of those that have been mentioned.**

…

Putting ability and moral quality above kinship and ethnicity as a criteria of governmental appointment was a Chinese ideal since the First Emperor abolished the feudalistic aristocracy. Top ministers came from all across the country, and a surrendered Xiongnu made co-regent to a boy emperor.27

…

The Romans and Huaxia did discriminate, but based mainly on behavior, not birth; ethics, not ethnicity; politics, not race.28 They make good cases for the thesis that credits relative openness and toleration with an empire's ability to expand and endure.29

…

The Etruscans excelled in engineering and led native Italians in city building. They adapted the Greek alphabets and passed them on to the Latins, together with their own numeral system that we now call "Roman." Many city-states flourished in Latium. Besides language and culture, the Latins shared reciprocal private rights: the rights of citizens from one community to reside, own land, conduct commerce, sign legal contracts, marry partners, and even acquire citizenship in another.69 **These Latin customs were similar to the Etruscan but contrary to the Greek. For the Greeks, ownership of real estate within a city-state was limited to citizens of that state – unless the foreigners were imperial Athenians backed by their powerful navy.**70

https://books.google.fi/books?id=ZqroV-TkIhgC&lpg=PP1&hl=fi&pg=PR59#v=onepage&q&f=false

To go forth and conquer, a republic must increase the number of citizens and arm them in order to achieve numerical majority on the battlefield. Rome conquered the Mediterranean world because it **"could already put in arms two hundred eighty thousand men, [whereas] Sparta and Athens never passed beyond twenty thousand each"** (*D* 2.3). The Romans generated this manpower in two ways. After defeating in war,

they often made them into partners (*socii*) who could keep their own laws but had to supply troops to the Romans (*D* 2.4.1, 23.2). **Further, they encouraged foreigners to take residence in their city and liberally admitted them to citizenship** (*D* 2.3) **– contrary to the classical maxim of limiting the citizenship to men of good breeding and honorable occupation for the sake of concord, friendship, and virtue.**

Plato (*Rep*. 415c-417b, 422a-423d; *Leg*. 742a-b) **had argued that the virtue that a city attains from limiting its size and inhibiting foreign commerce would always suffice to vanquish large and open cities in war.** This claim may have seemed plausible at the time, for aristocratic and isolationist Sparta had just defeated the populous and innovative city of Athens in the Peloponnesian War (432-404 B.C.). **But it was shown to be wrong when Rome acquired its empire on account of superior numbers drawn from plebeians and *socii* as well as its inventiveness in warfare.** Hence, Machiavelli was right when he argued that the foreign aspect of the human condition makes the classical conception of a small and virtuous republic nonviable.

>
> **The restraint of the people is also to be commended, who by freely offering themselves to the labours and dangers of war, prevented their commanders from enlisting the capite censi, whose extreme poverty aroused suspicion, and made it impossible to trust them to bear public arms.** [3.1] **This custom, confirmed by long use, was first broken by C. Marius, who enlisted soldiers from the capite censi. He was a noble citizen, but he was conscious of his own low birth, and so not favourable to antiquity.** He was not unmindful, that if military pride should persist to despise those of humble birth, he himself might be deemed by a malicious judge of virtues to be a commander risen from the capite censi. **Therefore he thought it best to obliterate that proud method of choice among the Roman armies,** lest the contagion of that stigma should spread itself to obscure his own glory.

https://hts.org.za/index.php/hts/article/view/1220/2314

It must however be remembered that the *habitus* of barbarism was borrowed from the Greeks. Gruen (2011) states:

> Roman traditions claimed no purity of lineage. **Distinctiveness of blood or heritage never took hold as part of Roman self-conception. Indeed, the Romans lacked a term for non-Roman. They had to borrow the Greek notion of 'barbarian,'** a particular irony since it signified in origin non-Greek speakers – a category into which the Romans themselves fell. (p. 345)
>

>
> **Isocrates comes into our picture primarily as the untiring advocate of a Panhellenic crusade against the Persian 'barbarians.'** 'Concord among Greeks and war against barbarians' is the stock theme of his political pamphlets; and although he tells us that this was a common topic of contemporary oratory,13 **we know of no speaker or writer who reiterated it so persistently as he.** Whether under joint Athenian and Spartan leadership, as he proposed in the *Panegyricus* in 380 B.C., or with Philip of Macedon at their head, as he advocated thirty-four years later, the Greeks must unite in military action against their hereditary foes, their *natural* enemies. **Homer owes much of his fame to his glorification of the men who fought against the barbarians – a striking distortion of Homer's real attitude to the Trojans.**

https://archive.org/details/graecoromaninst02reicgoog/page/n19/mode/2up?view=theater

Marcus Antistius Labeo, Capito, Gaius, Papinianus, Paulus, or Ulpian, are still walking amongst us, ready to help us in any practical difficulty, and capable of assisting us whenever we fail to make up the feud between theory and practice. **The works of the Greek scientists and thinkers, although indicative of an incomparably greater power of mind than the works of the Roman jurists, are now-a-days obsolete.** We rarely or never use them as text-books, or as current reference-books of science. The works of the Roman jurists, on the other hand, still continue to be the text-books of students of law all over Europe and America. In what then does this specific excellence consist?

It is of course extremely difficult to reduce the characterization of a complex system of Law to a few words. **But such is the pre-eminent excellence of Roman Private Law that it is more or less easily contrasted with the system, of Private Law of other nations. Roman or Civil Law is the only system of Private Law that has not been unduly influenced by the irrelevant factors of Religion, Politics, and Ethics.**
...

The Romans never suffered their legal institutions to be interlarded with extraneous matter. From the earliest times down to the age of the Emperors, the Romans had a political institution that might have lent itself very easily to an undue interference with institutions of Private Law, after the manner of feudalism. I mean the Roman *clientela*, Roman clients stood to their *patroni* in a relation not unlike that of a feudal tenant to his lord. They held estates from them, they were obliged to do homage and to discharge some of the duties implied in "feudal incidents." All this surely might have easily been used as a means to unduly influence the development of the Roman Law of real property. **It might have been used to create those semi-complete forms of property with which English law abounds, and which go to make the English law of real property a most intricate law. But nothing of the kind happened. The Roman concept of real property, or rather of property in general, was nowise influenced by the grants of land so frequent amongst patrons and clients, and the legal construction of these grants, namely the *precaria*, exercised no influence whatever on the features of *dominium* or *possessio*.**

Or take another great political institution of the Romans: I mean the two classes of patricians and plebeians. Nothing is more patent than the constant struggle of the plebeians with the patricians, and the marked difference in their political standing. Did this well-known difference exercise any influence on the private law of the Romans? **Do we ever hear of an *actio* or private right being denied to a Roman because he is a plebeian? There is no trace either in the XII. Tables, or in any later legislation of any thoroughgoing or even important difference between the plebeians and patricians as to "civil" rights (taking the word "civil" in its Roman sense) after the middle of the fifth century B.C. A plebeian could acquire real property, contract obligations, marry and will his property according to the same principles of Private Law as a patrician.**
...

Now according to what we notice in our own law, we should expect, that no modern civilian will devote his time to the intricate questions of Roman slave-law, Roman *patronatus*, Roman *libertini*, &c., &c., **just as no English practical jurist will devote his time to a laborious study of old English serf- and villein-law. Roman Law, however, is so independent of institutions peculiarly Roman, that while slavery has long ceased to be of any practical interest to the jurists of modern Europe – except as a pretext to grab large territories in Africa – Roman slave-law continues to exercise a most intense interest,** and recent books like Prof. Leist's books on "Roman Patronatus" are eagerly welcomed on all hands as contributions to practical law.

In fact, as we shall see in our next lecture, **Roman slave-law has a value entirely independent of the historical and as it were accidental institution of Roman slavery.** American slavery is a thoroughly historical institution, and the works of Cobb, Hurd, Wilson and others on American slave-law are totally ignored by the present lawyers of Louisiana, Alabama or Mississippi. Not so Roman treatises on slave-law.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Dionysius_of_Halicarnassus/4A*.html#ref48

3 This king also took no small care to enlarge the body of citizens, hitting upon a method that had been overlooked by all the kings before him. **For they, by receiving foreigners and bestowing upon them equal rights of citizenship without rejecting any, whatever their birth or condition, had indeed rendered the city populous; 4 but Tullius permitted even manumitted slaves to enjoy these same rights, unless they chose to return to their own countries.** For he ordered these also to report the value of their property at the same time as all the other free men, and he distributed them among the four city

tribes, in which the body of freedmen, however numerous, continued to be ranked even to my day; and he permitted them to share in all the privileges which were open to the rest of the plebeians.

23 1 The patricians being displeased and indignant at this, **he called an assembly of the people and told them that he wondered at those who were displeased at his course, first, for thinking that free men differed from slaves by their very nature rather than by their condition,** and, second, for not determining by men's habits and character, rather than by the accidents of their fortune, those who were worthy of honours, particularly when they saw how unstable a thing good fortune is and how subject to sudden change, and how difficult it is for anyone, even of the most fortunate, to say how long it will remain with him. 2 **He asked them also to consider how many states, both barbarian and Greek, had passed from slavery to freedom and how many from freedom to slavery. He called it great folly on their part if, after they had granted liberty to such of their slaves as deserved it, they envied them the rights of citizens;** and he advised them, if they thought them bad men, not to make them free, and if good men, not to ignore them because they were foreigners. 3 **He declared that they were doing an absurd and stupid thing, if, while permitting all strangers to share the rights of citizenship without distinguishing their condition or inquiring closely whether any of them had been manumitted or not, they regarded such as had been slaves among themselves as unworthy of this favour.** And he said that, though they thought themselves wiser than other people, they did not even see what lay at their very feet and was to be observed every day and what was clear to the most ordinary men, namely, that not only the masters would take great care not to manumit any of their slaves rashly, for fear of granting the greatest of human blessings indiscriminately, but the slaves too would be more zealous to observe their masters faithfully when they knew that if they were thought worthy of liberty they should presently become citizens of a great and flourishing state and receive both these blessings from their masters. 4 He concluded by speaking of the advantage that would result from this policy, **reminding those who understood such matters, and informing the ignorant, that to a state which aimed at supremacy and thought itself worthy of great things nothing was so essential as a large population, in order that it might be equal to carrying on all its wars with its own armed forces and might not exhaust itself as well as its wealth in hiring mercenary troops; and for this reason, he said, the former kings had granted citizenship to all foreigners.** 5 **But if they enacted this law also, great numbers of youths would be reared from those who were manumitted and the state would never lack for armed forces of its own, but would always have sufficient troops, even if it should be forced to make war against all the world.** 6 And besides this advantage to the public, the richest men would privately receive many benefits if they permitted the freedmen to share in the government, since in the assemblies and in the voting and in their other acts as citizens they would receive their reward in the very situations in which they most needed it, and furthermore would be leaving the children of these freedmen as so many clients to their posterity. 7 **These arguments of Tullius induced the patricians to permit this custom to be introduced into the commonwealth, and to this day it continues to be observed by the Romans as one of their sacred and unalterable usages.**

http://www.ourcivilisation.com/smartboard/shop/tacitusc/annals/chap3.htm#P25

> Romulus governed us as he pleased; then Numa united our people by religious ties and a constitution of divine origin, to which some additions were made by Tullus and Ancus. **But Servius Tullius was our chief legislator, to whose laws even kings were to be subject.**

http://attalus.org/translate/valerius6a.html#c2

[2.3] What? Were the people safe from the assaults of liberty? No, it both assailed them, and found them patiently suffering. Carbo, tribune of the plebs, who was a most turbulent supporter of the recently suppressed Gracchan sedition, and a most absolute firebrand of the growing civil strife, having dragged P. Africanus from the very gate of the city to the rostra, as he returned in triumph from the destruction of Numantia, asked him there for his opinion on the death of Ti. Gracchus, whose sister he had married; so that by the authority of so eminent a person, he might add fuel to the fire already begun. He did not doubt that in regard of his near relative, Scipio would speak somewhat affectionately on behalf of his brother-in-law who had been put to death; **but he answered that Gracchus was rightly slain. Upon which saying, when the whole assembly, aroused by the tribunician fury, began to make a great clamour. "Hold your peace," said he, "you, to whom Italy is but a stepmother." And when they began to make yet more noise, he said, "You shall never make me afraid of you – the freedmen, [solutos] whom I brought here in chains." [alligatos]** Thus were the whole people twice reprimanded by one man with contempt. But – such is the honour they gave to virtue – they soon were mute.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Appian/Civil_Wars/2*.html#ref46

120 1 In this frame of mind they hastened up to the Capitol with their gladiators. There they took counsel and decided to bribe the populace, hoping that if some would begin to praise the deed others would join in from love of liberty and longing for the republic. **They thought that the genuinely Roman people were still as they had learned that they were when the elder Brutus expelled the kings.** They did not perceive that they were counting on two incompatible things, namely, that people could be lovers of liberty and bribe-takers at the same time. The latter class were much easier to find of the two, because the government had been corrupt for a long time. **For the plebeians are now much mixed with**

foreign blood, freedmen have equal rights of citizenship with them, and slaves are dressed in the same fashion as their masters. Except in the case of the senatorial rank the same costume is common to slaves and to free citizens.

https://archive.org/details/dli.ernet.506079/page/353/mode/2up?view=theater

During the Triumviral period an ex-slave became military tribune. Horace is ferociously indignant—'hoc, hoc tribuno militum'.6 **Horace himself was only one generation better.** Here again, no return to Republican prejudices of birth. In the Principate, sons of freedmen soon occupy military posts;7 and, just as under the Republic, they are attested as senators—in the purified Senate of Augustus.8

https://www.attalus.org/old/pliny7.html#32

I am delighted that the visit of my friend Tiro was so agreeable to you,* but I was immensely pleased to read in your letter that you had taken advantage of the fact that your visitor was a proconsul to give a number of your slaves their freedom. **For while I am anxious that our native district should grow richer in all good things, I am specially anxious that the number of its citizens should increase, as that is the soundest distinction of which a town can boast.**

https://archive.org/details/dailylifeinancie035465mbp/page/n89/mode/2up?view=theater

Appian of Alexandria, writing under Antoninus Pius, remarks that even in externals the slave is in no way distinguished from his master, and unless his master donned the *toga praetexta* of the magistrate, the two were dressed alike.36 **Appian supplements this by recording a thing which astonished him even more: after a slave had regained his liberty he lived on terms of absolute equality with the Roman citizen.**

Rome, **alone of all cities of antiquity,** has the honour of having redeemed her outcasts by opening her doors to them.37
…

An epigraphist walking through the ruins of ancient Rome receives the impression that slaves and freedmen predominated in the life of the imperial epoch, for three times out of four they alone are mentioned in the inscriptions which are still to be read on the walls. In an article remarkable for the quantity and accuracy of its statistics, **Tenney Frank points out that since in the majority of cases the form of a slave name betrays its owner's Graeco-oriental origin, it is easily proved that at least 80 per cent of the population of Imperial Rome had been emancipated from more or less ancient servitude.**40

https://books.google.fi/books?id=sOWxzU66-7sC&lpg=PP1&hl=fi&pg=PA4#v=onepage&q&f=false

Already Meyer insisted on the steady improvement of the treatment of slaves and found that Roman manumission represented **a 'generosity … that keeps causing astonishment and admiration.'**15 **Later Carcopino presented an equally sunny picture, declaring that, 'With few exceptions, slavery in Rome was neither eternal nor, while it lasted, intolerable,' since, 'The practical good sense of the Romans, no less than the fundamental humanity instinctive to their peasant hearts, had always kept them from showing cruelty toward the *servi*.'**16 Vogt expanded on this view of Roman slavery, although – for specific ideological reasons – he did not pay much attention to manumission.17 Alföldy, however, offered the most sustained argument for near universal manumission.18

> 17. Vogt (1975). The limited attention paid to manumission might seem surprising given the overall tenor of his work, **but is explicable in terms of Vogt's immediate concern which was to offer a response to Marxist attempts to present the conflict between master and slaves as the driving force behind the transformation of ancient society.** Vogt therefore put particular emphasis on the humanitarian aspects of the master-slave relationship, which he claimed could be both friendly and affectionate; cf. an unpublished paper delivered by Heinz Heinen at a seminar at the University of Edinburgh, 2007. **Viewed from that perspective, manumission was less relevant, since it terminated the owner's *potestas*; indeed it might carry the inconvenient implication that slaves were happy to leave their master's authority.**

https://books.google.fi/books?id=sOWxzU66-7sC&lpg=PP1&hl=fi&pg=PA14#v=onepage&q&f=false

The notion that some people were naturally suited for slavery takes us to Aristotle's much-debated theory of slavery, which argued that some slaves were slaves 'by nature.' The model was practically unworkable and Aristotle himself accepted some of its shortcomings, which other Greek writers also seem to have noted.21

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0058%3Abook%3D1%3Asection%3D1255a

[1255a] [1] It is manifest therefore that there are cases of people of whom some are freemen and the others slaves by nature, and for these slavery is an institution both expedient and just. **But at the same time it is not difficult to see that those who assert the opposite are also right in a manner.** The fact is that the terms 'slavery' and 'slave' are ambiguous; for there is also such a thing as a slave or a man that is in slavery by law, for the law is a sort of agreement under which the things conquered in war are said to belong to their conquerors. **Now this conventional right is arraigned by many jurists just as a statesman is impeached for proposing an unconstitutional measure; they say that it is monstrous if the person powerful enough to use force, and superior in power, is to have the victim of his force as his slave and subject; and even among the learned some hold this view, though others hold the other. But the reason of this dispute and what makes the theories overlap is the fact that in a certain manner virtue when it obtains resources has in fact very great power to use force, and the stronger party always possesses superiority in something that is good,**[1] so that it is thought that force cannot be devoid of goodness, but that the dispute is merely about the justice of the matter (for it is due to the one party holding that the justification of authority is good-will, while the other identifies justice with the mere rule of the stronger); because obviously if these theories be separated apart, [20] the other theories have no force or plausibility at all, implying that the superior in goodness has no claim to rule and be master. But some persons, simply clinging, as they think, to principle of justice (for the law is a principle of justice), assert that the enslavement of prisoners of war is just; yet at the same time they deny the assertion, **for there is the possibility that wars may be unjust in their origin and one would by no means admit that a man that does not deserve slavery can be really a slave—otherwise we shall have the result that persons reputed of the highest nobility are slaves and the descendants of slaves if they happen to be taken prisoners of war and sold. Therefore they do not mean to assert that Greeks themselves if taken prisoners are slaves, but that barbarians are.** Yet when they say this, they are merely seeking for the principles of natural slavery of which we spoke at the outset; for they are compelled to say that there exist certain persons who are essentially slaves everywhere and certain others who are so nowhere. And the same applies also about nobility: **our nobles consider themselves noble not only in their own country but everywhere, but they think that barbarian noblemen are only noble in their own country**—which implies that there are two kinds of nobility and of freedom, one absolute and the other relative, as Helen says in Theodectes[2]:

> "But who would dare to call me menial,
> The scion of a twofold stock divine?"

Certainly, the idea of 'natural slavery' appears to have found little resonance in Rome, where the jurists explicitly rejected it. Florentinus, for example, stated unequivocally that it was 'against nature.'22

22. D. 1.5.4: 'contra naturam;' cf. D. 1.1.4. (Ulpian) and 50.17.32: 'quod ius natural attinet, omnes homines aequales sunt,' 'as far as concerns the natural law all men are equal;' cf. *Inst. Iust.* 1.2.2; 1.3.2.

Many Roman writers, some under the influence of Stoic thought, went even further, stressing not just the common humanity of all people but also the role of chance in deciding one's place in the world. Thus in his *Paradoxa Stoicorum* Cicero implied that slaves were not inferior by nature and that their servitude was determined by external circumstances, while he also referred to the unhappy lot of slaves as 'infima condicio et fortuna.'23 **According to one of Publilius Syrus' proverbs, slavery is honest when brought on by fate – but he was of course a freedman himself.**24 **However, Caesar also noted in passing that all men naturally long for freedom and despise the state of slavery.**25 **Likewise, Seneca Maior declared: 'no one is naturally free or slave. These are titles imposed later on individuals by fortune.'**26

25. *BG* 3.10: **'omnes autem homines natura libertati studere et condicionem servitutis odisse.'**

The idea was most fully developed in the works of the younger Seneca. In the *De Beneficiis* he stressed the fundamental equality of mankind, who, no matter what their place in society might be, all spring from the same source and share the same origin.27 Similar sentiments were voiced by Greek writers in Rome. **Thus Dionysius of Halicarnassus, despite his apparent hostility to freedmen, included a speech attributed to Servius Tullius which took to task those who thought that free men differed from slaves by their very nature rather than by their condition.** According to the Roman king, slaves were created by fortune, which in principle could strike anyone: all people should therefore be judged on their character and merit.28

The rejection of 'natural slavery' does not mean, however, that the Romans did not discriminate between rightful and wrongful enslavement. Indeed this distinction was crucially important to them, as shown by numerous historical instances. For instance in 172 BCE the senate decided that the surrendered Ligurian Statellates had been unjustly enslaved and should be restored to liberty. If that did not happen, **officials should investigate and punish those 'by whose malice they had become slaves.'**29
…

In this context it is worth remembering that the Roman concept of the 'just war' was highly formalistic and largely determined by observance of proper procedure.31 **Consequently the enslavement of defeated peoples was justified less by moral arguments than by formality.**32

Roman jurists justified slavery by reference to the fact that it was a commonly accepted institution among all peoples.33 As such it was founded on *ius gentium*, i.e. 'the law which natural reason has established among all human beings,' and therefore required no specific justification.34
…

Wrongly enslaved people could regain their freedom and even *ingenuitas* through a process of 'vindicatio in libertatem,' which did not leave them with libertine status afterwards.39 In principle it was impossible for freeborn to forfeit their *ingenuitas*.

The Roman justification of slavery was, in short, based on formalism rather than essentialism. External circumstances – fate and bad luck – made people slaves, not nature. Watson therefore rightly observed that: 'To be a slave is a misfortune for the individual, assuredly a grave one, but it is not inevitable, natural, or necessarily permanent.'40

The Islamic languages developed a rich vocabulary of terms for "slave," denoting the whole range of the vast slave population, from the humble toilers in fields, mines, and kitchens to the sultan's slaves who commanded armies, governed provinces, and controlled the central administrations. Used of these last, such words as the Arabic *mamlūk* and Turkish *kul*,52 though technically meaning "slave," carried a connotation not of enslavement but of power and dominance.

The Islamic term for "free,"53 until the eighteenth century, had a primarily legal, and occasionally social, significance, and meant one who, according to the law, was a free man and not a slave. Neither term, "free" or "slave," was used in a political context, **and the familiar Western use of the terms "freedom" and "slavery" as metaphors for citizen's rights and oppressive rule is unknown to the language of classical Islamic political discourse.** There too, there is much discussion of good and bad government, but the issue at stake is not freedom but justice.

http://www.thephora.net/forum/forum/the-academy/political-arena/47500-democratic-tyranny-is-not-an-oxymoron?p=1322465#post1322465

Muslims regarded slavery as a normal condition of all people. "**The sultans had none of Aristotle's belief that some men are born slaves** … They were themselves sons of 'slaves,' for their harems were likewise made up chiefly of daughters of Christians."[62] **Their denial that *some* men are born slaves was due to a belief that *all* men are born slaves – to Allah or to his representative, the sultan or caliph; the latter was himself the slave of Allah.**

https://books.google.fi/books?id=ViqQDwAAQBAJ&lpg=PP1&hl=fi&pg=PA115#v=onepage&q&f=false

The spokesman of the beasts replied, 'He argues that they buy and sell us. The same is done by Persians to Greeks and Greeks to Persians when they conquer one another. So which is the slave and which the master? The Indians treat the Sindians the same way, and the Sindians, the Indians; the Abyssinians, the Nubians; and the Nubians, the Abyssinians. **Which, pray, are the slaves and which the masters?**60 **Are these not, just Majesty, the mere forms of human fortune, with the changing influences of the stars and conjunctions of the constellations?** as God Himself said, These *are but the days whose revolutions I bring about among men*.61 *But none comprehends but the learned*.62

60. **The Ikhwān reject the triumphalist bent of thinkers like Aristotle and al-Fārābī, who entertain the thought that the fortunes of war might tend to enslave those who are fit only to be slaves, or who, at the very least, seem likely to profit from their servitude by acquiring a higher level of culture or religion.** See Aristotle, *Politics* 1.1256b23: 'From one point of view, the art of war is a natural art of acquisition, for the art of acquisition includes hunting, an art which we ought to practise against wild beasts, and against men who, though intended by nature to be governed, will not submit; for war of such kind is naturally just.' Al-Fārābī writes that a prince employs two classes of

persons to form the character of his subjects: '**a group employed by him to form the character of whoever is susceptible of having his character formed willingly, and a group employed by him to form the character of those who are such that their character can be formed only by compulsion.** ... The [province of the] latter is the art of war, the power by which one excels in organizing and leading armies and using the implements of war and warlike people **to conquer nations and cities that do not willingly do what will lead them to happiness.**' Al-Fārābī, *Fī ta ṣīl al-ṣa'āda*, trans. after Muhsin Mahdi in *Alfarabi's Philosophy of Plato and Aristotle* (Ithaca: Cornell University Press, 1962), pp. 36-37.

In general, the economic and social condition of Italy was not primarily dependent on political distinctions; **there were allied districts, such as Umbria and Etruria, in which the class of free farmers had mostly disappeared, while in others, such as the valleys of the Abruzzi, the same class had still maintained a tolerable footing or remained almost unaffected**—just as a similar diversity could be pointed out in the different Roman burgess-districts.
...

In consequence of this treatment of the Italians on the part of the Roman government, the variance, which the wisdom of their ancestors had carefully fostered between the Latin and the other Italian communities, could not fail, if not to disappear, at any rate to undergo abatement (ii. 335). **The fortresses of Rome and the districts kept to their allegiance by these fortresses lived now under the like oppression;** the Latin could remind the Picentine that they were both in like manner "subject to the fasces"; **the overseers and the slaves of former days were now united by a common hatred towards the common despot.**
...

In short, while the Italian allies had formerly stood to the Romans partly in the relation of brothers under tutelage, protected rather than ruled and not destined to perpetual minority, partly in that of slaves tolerably treated and not utterly deprived of the hope of manumission, **they were now all of them subject nearly in equal degree, and with equal hopelessness, to the rods and axes of their Roman masters,** and might at the utmost presume like privileged slaves to transmit the kicks received from their masters onward to the poor provincials.
...

Instead of the expected modifications, there was issued in 659/95 a consular law which most strictly prohibited the non-burgesses from laying claim to the franchise and threatened transgressors with trial and punishment—a law which threw back a large number of most respectable persons who were deeply interested in the question of equalization from the ranks of Romans into those of Italians, **and which in point of indisputable legality and of political folly stands completely on a parallel with that famous act which laid the foundation for the separation of North America from the mother-country; in fact it became, just like that act, the proximate cause of the civil war.** It was only so much the worse, that the authors of this law by no means belonged to the obstinate and incorrigible Optimates; they were no other than the sagacious and universally honoured Quintus Scaevola, destined, like George Grenville, by nature to be a jurist and by fate to be a statesman—**who by his equally honourable and pernicious rectitude inflamed more than any one else first the war between senate and equites, and then that between Romans and Italians**—and the orator Lucius Crassus, the friend and ally of Drusus and altogether one of the most moderate and judicious of the Optimates.

III, 18 **Though we call this war a war against allies, in order to lessen the odium of it, yet, if we are to tell the truth, it was a war against citizens. For since the Roman people**

united in itself the Etruscans, the Latins and the Sabines, and traces the same descent from all alike, it has formed a body made up of various members and is a single people composed of all these elements; 2 **and the allies, therefore, in raising a rebellion within the bounds of Italy, committed as great a crime as citizens who rebel within a city.** 3 **So when the allies very justly demanded the rights of citizenship,** for which Drusus, in his desire for power, had encouraged them to hope as members of a State which they had aggrandized by their exertions, the same brand which had consumed him kindled the allies, 4 after he had fallen through the perfidy of his fellow-citizens, to take up arms and attack the city. 5 **What could be sadder, what more disastrous than this calamity?** All Latium and Picenum, all Etruria and Campania, and finally all Italy rose against their mother and parent city.

https://archive.org/details/in.ernet.dli.2015.231118/page/n145/mode/2up?view=theater

A federal republic was formed, Corfinium was named the capital, and the government was vested in a senate of 500 men chosen from all the Italian tribes except the Etruscans and Umbrians, who refused to join.
…

In three years of war 300,000 men fell, and central Italy was devastated. When Etruria and Umbria were on the verge of going over to the rebels, Rome pacified them by a grant of full Roman citizenship; and in 90 the Roman franchise was offered to all Italian freemen or freedmen who would swear fealty to Rome. These belated concessions weakened the allies; one town after another laid down its arms; and in 89 this ferocious and costly war ended in a sullen peace. The Romans nullified the franchise they had granted by enrolling the new citizens in ten new tribes, which voted only after the existing thirty-five, and therefore usually to no use; besides, only a few of the new citizens could attend the assemblies in Rome. The deceived and desolate communities bided their time. **Forty years later they would open their gates in welcome to a Caesar who offered them citizenship in a democracy that was dead.**

https://archive.org/details/historyrome01dickgoog/page/n262/mode/2up?view=theater

Exactly three hundred years had passed since Rome had last been obliged to submit to the dictation of peace; Rome was now worsted once more, and the peace which she desired could only be got by yielding in part at least to the terms of her antagonists. With the communities, doubtless, which had already risen in arms to subdue and to destroy Rome, the feud had become too bitter for the Romans to prevail on themselves to make the required concessions; and, had they done so, these terms would now perhaps have been rejected by the other side. But, if the original demands were conceded under certain limitations to the communities that had hitherto remained faithful, such a course would on the one hand preserve the semblance of voluntary concession, while on the other hand it would prevent the otherwise inevitable consolidation of the confederacy and thereby pave the way for its subjugation. **Accordingly the gates of Roman citizenship, which had so long remained closed against entreaty, now suddenly opened when the sword knocked at them;** yet even now not fully and wholly, but in a manner reluctant and annoying even for those admitted.

https://archive.org/details/in.ernet.dli.2015.503389/page/n99/mode/2up?view=theater

There is very little to be gained out of the catchwords derived from the way of thinking that prevails at the moment – such as Bolshevism, Communism, class struggle, capitalism, Socialism – each of which is believed by the user to convey the exact meaning of the problem simply because he is unable to see deep down into the facts. **The same thing has occurred in all former Cultures at the equivalent stage, little as we know of the details.**1

But in the case of the Classical Age we do know enough. The climax of the revolutionary movement lies in the period between the Gracchi and Sulla, but the struggle set in a good century earlier with C. Flaminius, whose agrarian law of 232 Polybius rightly describes (II, 21) as the beginning of the demoralization of the masses.

https://archive.org/details/in.ernet.dli.2015.231118/page/n147/mode/2up?view=theater

Sulpicius was killed, betrayed by his servant; Sulla had the head of the tribune affixed to the rostrum that had lately rung with its eloquence; he rewarded the slave with freedom for his services, and death for his treachery. **While his soldiers dominated the Forum he decreed that henceforth no measure should be offered to the Assembly except by permission of the Senate, and that the order of voting should be as in the "Servian constitution," which gave priority and advantage to the upper classes.** He had himself chosen proconsul, allowed Cnaeus Octavius and Cornelius Cinna to be elected consuls (87), and then marched off to encounter Mithridates the Great.

He had hardly left Italy when the struggle of the plebeian *populares* and the patrician and equestrian *optimates* was resumed. The conservative supporters of Octavius fought in the Forum with the radical followers of Cinna, and in one day 10,000 men were killed. Octavius won, and Cinna fled to organize revolt in the neighboring towns. **Marius, after a winter in hiding, sailed back to Italy, proclaimed freedom to slaves, and led a force of 6000 men against Octavius in Rome. The rebels won, slaughtered thousands, adorned the rostra with the heads of slain senators, and paraded the streets with noble heads on their pikes as a model for later revolutions.** Octavius accepted death calmly as he

sat in his robes of office on his tribune's chair. **The carnage continued for five days and nights, the rebel terror for a year. A revolutionary tribunal subpoenaed patricians, condemned them if they had opposed Marius, and seized their property.** A nod from Marius sufficed to send any man to death, usually by execution there and then. **All of Sulla's friends were slain; his property was confiscated; he was deposed from his command and was declared a public enemy.** The dead were refused burial and were left in the streets to be devoured by birds and dogs. The freed slaves plundered, raped, and killed indiscriminately, until Cinna gathered 4000 of them together, surrounded them with Gallic soldiery, and had them butchered to death.[21]

Cinna was now (86) chosen consul for the second time, Marius for the seventh. In the first month of his new term Marius died, aged seventy-one, worn out with hardships and violence. **Valerius Flaccus, elected in his stead, passed a bill canceling seventy-five per cent of all debts,** and then left for the East with an army of 12,000 men to depose Sulla from command. Enjoying undivided power at Rome, Cinna changed the Republic into a dictatorship, nominated all successful candidates for major offices, and had himself elected consul for four successive years.

https://archive.org/details/historyrome01dickgoog/page/n340/mode/2up?view=theater

Along with the reign of terror came the *tyrannis*. Cinna not only stood at the head of the state for four years in succession (667-670/87-84) as consul, but he regularly nominated himself and his colleagues without consulting the people; it seemed as if these democrats set aside the sovereign popular assembly with intentional contempt. **No other chief of the popular party, before or afterwards, possessed so perfectly absolute a power in Italy and in the greater part of the provinces for so long a time almost undisturbed, as Cinna; but no one can be named, whose government was so utterly worthless and aimless. The law proposed by Sulpicius and thereafter by Cinna himself, which promised to the new burgesses and the freedmen equality of suffrage with the old burgesses, was naturally revived; and it was formally confirmed by a decree of the senate as valid in law (670/84).** Censors were nominated (668/86) for the purpose of distributing all the Italians, in accordance with it, into the thirty-five burgess-districts—by a singular conjuncture, in consequence of a want of qualified candidates for the censorship the same Philippus, who when consul in 663/91 had chiefly occasioned the miscarriage of the plan of Drusus for bestowing the franchise on the Italians (p. 221), was now selected as censor to inscribe them in the burgess-rolls. The reactionary institutions established by Sulla in 666/88 were of course overthrown. Some steps were taken to please the proletariate—for instance, **the restrictions on the distribution of grain introduced some years ago (p. 237), were probably now once more removed;** the design of Gaius Gracchus to found a colony at Capua was in reality carried out in the spring of 671/83 on the proposal of the tribune of the people, Marcus Junius Brutus; **Lucius Valerius Flaccus the younger introduced a law as to debt, which reduced every private claim to the fourth part of its nominal amount and cancelled three fourths in favour of the debtors. But these measures, the only positive ones during the whole Cinnan government, were without exception the dictates of the moment; they were based—and this is perhaps the most shocking feature in this whole catastrophe—not on a plan possibly erroneous, but on no political plan at all.** The populace were caressed, and at the same time offended in a very unnecessary way by a meaningless disregard of the constitutional arrangements for election. The capitalist party might have furnished a support, but it was injured in the most sensitive point by the law as to debt. **The true mainstay of the government was—wholly without any cooperation on its part—the new burgesses; their assistance was acquiesced in, but nothing was done to regulate the strange position of the Samnites, who were now nominally Roman citizens, but evidently regarded their country's independence as practically the real object and prize of the struggle and remained in arms to defend it against all and sundry.** Illustrious senators were struck down like mad dogs; but not the smallest step was taken to reorganize the senate in the interest of the government, or even permanently to terrify it; so that the government was by no means sure of its aid.
…

The same union of the mightiest plenitude of power with the most utter impotence and incapacity in those who held it, was apparent in the warfare waged by the revolutionary government against the oligarchy—a warfare on which withal its existence primarily depended. In Italy it ruled with absolute sway. Of the old burgesses a very large portion were on principle favourable to democratic views; and the still greater mass of quiet people, while disapproving the Marian horrors, saw in an oligarchic restoration simply the commencement of a second reign of terror by the opposite party. **The impression of the outrages of 667/87 on the nation at large had been comparatively slight, as they had chiefly affected the mere aristocracy of the capital; and it was moreover somewhat effaced by the three years of tolerably peaceful government that ensued. Lastly the whole mass of the new burgesses—three-fifths perhaps of the Italians—were decidedly, if not favourable to the present government, yet opposed to the oligarchy.**
…

[The democrat and the Samnite] leaders then determined to desist from the relief of Praeneste and to throw themselves with all their united strength on Rome, which was only a good day's march distant. By so doing they were, in a military point of view, ruined; their line of retreat, the Latin road, would by such a

movement fall into Sulla's hands; and even if they got possession of Rome, they would be infallibly crushed there, enclosed within a city by no means fitted for defence, and wedged in between the far superior armies of Metellus and Sulla. **Safety, however, was no longer thought of; revenge alone dictated this march to Rome, the last outbreak of fury in the passionate revolutionists and especially in the despairing Sabellian nation. Pontius of Telesia was in earnest, when he called out to his followers that, in order to get rid of the wolves which had robbed Italy of freedom, the forest in which they harboured must be destroyed. Never was Rome in a more fearful peril than on the 1st November 672, when Pontius, Lamponius, Carrinas, Damasippus advanced along the Latin road towards Rome, and encamped about a mile from the Colline gate. It was threatened with a day like the 20th July 365 U.C. or the 15th June 455 A.D.—the days of the Celts and the Vandals.** The time was gone by when a *coup de main* against Rome was a foolish enterprise, and the assailants could have no want of connections in the capital. The band of volunteers which sallied from the city, mostly youths of quality, was scattered like chaff before the immense superiority of force. The only hope of safety rested on Sulla.

> https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Velleius_Paterculus/2A*.html#ref66
>
> 27 1 While Carbo and Marius were still consuls, **one hundred and nine years ago,** on the Kalends of November, Pontius Telesinus, a Samnite chief, brave in spirit and in action and hating to the core the very name of Rome, having collected about him forty thousand of the bravest and most steadfast youth who still persisted in retaining arms, fought with Sulla, near the Colline gate, a battle so critical as to bring both Sulla and the city into the gravest peril. 2 **Rome had not faced a greater danger when she saw the camp of Hannibal within the third milestone, than on this day when Telesinus went about from rank to rank exclaiming: "The last day is at hand for the Romans," and in a loud voice exhorted his men to overthrow and destroy their city, adding: "These wolves that made such ravages upon Italian liberty will never vanish until we have cut down the forest that harbours them."**
>
> https://en.wikipedia.org/wiki/Pontius_Telesinus
>
> Pontius Telesinus may be an ancestor of Pontius Pilatus (Pilate), a first century Roman governor of Judaea mentioned in Christian texts as presiding over the execution of Jesus.[21]

https://archive.org/details/historyrome01dickgoog/page/n402/mode/2up?view=theater

But the whole country—and not the aristocracy merely—was more indebted to him than posterity was willing to confess. Sulla definitely terminated the Italian revolution, in so far as it was based on the disabilities of individual less privileged districts as compared with others of better rights, and, **by compelling himself and his party to recognize the equality of the rights of all Italians in presence of the law, he became the real and final author of the full political unity of Italy**—a gain, which was not too dearly purchased even by so many troubles and streams of blood. Sulla however did more. **For more than half a century the power of Rome had been declining, and anarchy had been her permanent condition: for the government of the senate with the Gracchan constitution was anarchy, and the government of Cinna and Carbo was a yet far worse illustration of the absence of a master-hand (the sad image of which is most clearly reflected in that equally confused and unnatural league with the Samnites),** the most uncertain, most intolerable, and most mischievous of all conceivable political conditions—in fact the beginning of the end. **We do not go too far when we assert that the long-undermined Roman commonwealth must have necessarily fallen to pieces, had not Sulla by his intervention in Asia and Italy saved its existence.**

https://penelope.uchicago.edu/Thayer/E/Gazetteer/Places/Europe/Italy/_Texts/HODIHI/2d_edition/3/9*.html#ref18

The rest of the legislation of the younger Gracchus died with him, but this, its worse feature, remained. When supreme power passed from the Senate and the Assembly of the People to the Caesars, these latter rulers, though in many respects the champions of the Provincials against Rome, did not dare to withdraw the supplies of cheap corn from the citizens, though they did limit—eventually to 200,000—the number of persons who were entitled thus to purchase it.
...

It is a labyrinth of Imperial legislation, and all leading to what end? To the maintenance in idleness of the worthless population of four great cities, a population which every wise legislator would have sought by every means in his power to divert from the cities, to lead back into the country, to marry to the land, to raise to something of the dignity of manhood by that wrestling with Nature for her blessings, which makes up the daily life of Agriculture. **But no: the old legal fiction of the sovereignty of the Roman people still survived, and therefore the so called citizen of Rome—the descendant in all probability of a Syrian or Cappadocian slave—must be allowed to spend**

his days in lordly idleness, seeing the charioteers drive, and the gladiators die, and then presenting himself at the appointed time at the steps of his 'regio' to receive his *Panis Gradilis* from the bounty of the Emperor**.**
…

Warned by the experience of Rome, will they shrink from reproducing directly, or indirectly, the political heresy of Caius Gracchus, that he who votes in the Forum must be fed by the State? If they do, perhaps the world may see Democracies as long-lived as the Dynasties of Egypt or of China. If they do not, assuredly now as in the days of our Saxon forefathers, it will be found that he who is 'giver of bread' is also lord.71

> https://archive.org/details/parisundercommun00broc/page/14/mode/2up?view=theater
>
> We all know the reactions which followed this revolution,—how the Corsican became First Consul, Dictator, and Emperor, and proved himself as great a tyrant as any of the Bourbons; how, in 1815, the Bourbons were restored and the old traditions of the pre-revolutionary period were re-established; **how, in 1830, the people again revolted, and introduced, with the citizen king, a new and dangerous doctrine, or rather a doctrine which had been held in abeyance since the first revolution, viz., *that it was the duty of the State to provide work for the laboring classes, or, failing in that, to support them without it*. This doctrine, which had proved the destruction of the Roman Empire in the plenitude of its power and glory,** became henceforth the cardinal doctrine of the working and vagrant classes of the French people, and was constantly proclaimed by the ambitious and unprincipled demagogues, who were too numerous for the good of the nation at all times.

https://archive.org/details/B-001-015-424/page/n353/mode/2up?view=theater

This tribunician power had about it an arbitrary character which was necessary at first to make up for the plebeian's lack of rights: **it should, logically, have disappeared as soon as equality of rights had been realized.** Far from that, however, it continued in existence, backed by the Senate, which made clever use of it to check the designs of magistrates who were too independent, and to concentrate finally in its own hands all public authority.19

> 19. "The transformation by which the tribunician power, intended at first as a weapon against the hereditary nobility, was at a later date, when it had passed into the hands of the new 'magisterial' nobility, used by the Senate against the magistrates, and later still served the ends of the budding monarchy against the Senate, is matter for history rather than for public law. This strange institution, the fruit less of practical needs than of political tendencies, without positive function and intended only for negation, could according to circumstances serve the ends of every party in turn, and it did in fact serve for and against all of them in succession. **It was one of the justified ironies of the spirit that rules the world that the tribunician power, in its deepest root a revolutionary power, should in the end have legitimated monarchy.**" *Ibid.*, Vol III, p. 355.

The Senate permitted the tribunes to unite the *plebs* as a separate community within the city, and to arrange for it to pass by vote resolutions of its own, *plebi scita*, resolutions which acquired in the end the status of laws in the true sense.20

These laws were very different both in intent and content from those which had in former days been presented by the magistrates, the Senate consenting; the latter had been limited to the formulation of general principles. The tribunician plebiscites, products for the most part of the needs or passions of the passing hour, came often into conflict with the most fundamental principles of the law.

In this way there was introduced into Roman society the essentially erroneous notion that it is the business of legislative authority to prescribe or forbid anything whatever. Anyone who put forward a proposition of a nature seemingly advantageous for the immediate future was blindly applauded, even though his proposition subverted the entire permanent edifice of order**. It was the tribunate which habituated the people to the idea of a saviour redressing at a stroke the social balance. Marius and Caesar were to be its heirs, and the emperors would find it an easy task to establish themselves on the ruins of the Republic and liberty.**

And who were the men who would try to stay this process? Freemen of the old school. **Brutus's dagger, so dear to the Jacobin heart, was wielded by an aristocratic hand.**
…

When that point had been reached, there were two courses open to the popular leaders. The first was that of Tiberius Gracchus. To him it seemed that the spirit of citizenship, the will to safeguard and defend common interests and sentiments, gets at once lost sight of both at the top and at the bottom when the capitalists have too much to defend and the proletarians not enough. Therefore he sought to re-establish as between citizens a real similitude, together with the solidarity which flows from it: **to put an end to the existence side by side of a plutocracy and a proletariat, and to arrange matters**

so that each single citizen could enjoy effectively an independence and an autonomy such as would bind all together in defence of the system of liberty.

The second course, to which Gaius Gracchus allowed himself to be committed by the failure of his brother, was quite different. To him the monstrous individual strength of the grandees and the utter individual weakness of the ordinary man were accomplished facts on which there was no going back, and he set himself the task of installing a public authority as manager of the people's affairs on their behalf.

The contrast between the policies of the two brothers at once leaps to the eye; the aim of the elder was to restore every citizen to the status of owner, whereas the younger got a law passed which allotted to each citizen his ration of corn at a low price, soon to be given gratis.22 This measure went in the diametrically opposite direction to the policy of Tiberius Gracchus. **Tiberius had sought to multiply the numbers of independent proprietors; Gaius brought into Rome the last of them, lured there by free rations.°**
…

Theodore Roosevelt, considering that the physical independence of the majority of citizens was the essential condition of their attachment to libertarian institutions, **applied himself to fighting a plutocracy which was transforming citizens into salaried dependants.** He came to grief on the same blind egoism of the men of great place as caused the downfall of Tiberius Gracchus.

Franklin Roosevelt accepted the accomplished fact, took up the defence of the unemployed and the economically weak, and constructed, by means of their votes and to their immediate advantage, **such a structure of Power as recalled in striking fashion the work of the first Roman emperors.** The individual right—the shield of each, which had become the bulwark of a few—had to bow down before the social right. **And the free citizen passed a milestone on his way to becoming a protected subject.**

https://penelope.uchicago.edu/Thayer/E/Gazetteer/Places/Europe/Italy/_Texts/HODIHI/2d_edition/1/9*.html#ref7

There was first the Middle Class, as we should now call it, timid, unenterprising, still perhaps wealthy, though groaning under the heavy burdens imposed upon it by the financial necessities of the sinking Empire. From this class, centuries ago, had emerged the citizens who, with eager emulation, had contended with one another for the honour of a seat in the *Curia* or Senate of their native city, and the glory of being addressed as *Decurio*. That state of things had now long passed away.
…

Above these Curial families stood a small privileged class of functionaries, Prefects, Counts, Consulars, and their children, the most highly prized of whose immunities consisted in this, that they could no longer be called upon to discharge 'Curial obligations.' Below them lay the great sensual, swinish mass of Forum-loungers. All that was onerous in public life, fell with ever-increasing weight on the middle class of Decurions. The collection of the revenue, the responsibility for the corn-rations, the care of the prisons, even the heating of the baths, devolved on these men; and whoever else might by jobbery and peculation defraud the public revenue, it seems clear that the Decurion had no chance of plundering, but only the dreary necessity of making good the deficiency caused by the plundering of others.
…

It is easy to see that it reproduces the so-called 'liturgies' (obligations to undertake certain services to the State), which formed so marked a feature in the life of ancient Athens, and it is indeed under this term that the Curial obligations are constantly spoken of by contemporary orators;10 but the means to discharge these liturgies had grown smaller, the command to perform them harsher and more irresistible, **the inducement which had once been the desire to earn the favour of one's fellow citizens, and to be by them raised to the high places of the State, had vanished altogether.**

But as the rich liturgy-performing aristocracy, so also the pampered democracy of the cities of the Empire, carries us back in remembrance to the days of Aristophanes. **The idea of the Roman Empire was in the main urban, as was that of the Athenian Empire, and not only were they both urban, but both were in a certain sense socialistic. To keep the populace of the capital cities of the Empire in good humour was one of the chief cares of a Roman Augustus, and almost of equal importance with the other two, the maintenance of the loyalty of the army and the repulse of the incursions of the barbarians.** At Antioch, as at Rome, at Constantinople, and at Alexandria, the citizens enjoyed a free distribution of corn or rather of bread, at the expense of the State. The precise amount of this daily ration does not seem to be handed down to us, but there can be no doubt that it was sufficient to support life for the receiver and his family, and to obviate the necessity of work. **The bath—that luxury which is almost a necessity under a Syrian sky—was also open, either gratuitously or at an exceedingly small charge, to all classes of the community;** and when the water was not

heated hot enough, Demos in the Theatre howled his disapprobation and even threw stones at the governor who had been so slack in enforcing the ministrations of the richer citizens to his comfort.11 Twice (in 382 and 384) an unfavourable season raised the price of corn. The people in the Theatre cried out for larger loaves, cheaper loaves. **In spite of the opposition of certain members of the Senate, who had some dim previsions of the science now known as Political Economy, a governor was each time found who issued a decree lowering the price of the loaf. Unable to comply with the decree the bakers left the city and fled to the mountains.** Naturally the famine in the city was not lessened by their departure. The law was withdrawn and the bakers returned but led a precarious existence, always liable to be arrested, and flogged through the streets of Antioch if a governor wished to curry favour with the people, and to repel by this easy demonstration the charge of having himself shared in the profits of the unpopular class.12

We have glanced at the condition of the urban population, of which we always hear most; but we must not forget that there was in the rural districts of Syria a large peasant-class, which is comparatively mute in Imperial history. A sermon of St. Chrysostom13 brings before us the patient, toilful lives of these men, **strangers to the language, to the pleasures, and to the vices of the city-populace, but united to them in faith;** and in their temperate and frugal existence illustrating the spirit of Christianity far better than the noisy theological disputants of Antioch. The yoke of the Imperial government pressed heavily on these men, **who could not shout applause in the Hippodrome, or hurl stones and taunts at the Prefect in the Theatre, and who therefore, as representative government was unknown, had no means of influencing the administration of affairs.**

https://www.gutenberg.org/cache/epub/2333/pg2333-images.html#link2H_4_0001

A people, when assembled in a town, is far more formidable to its rulers than when dispersed over a wide extent of country. The most arbitrary of the Cæsars found it necessary to feed and divert the inhabitants of their unwieldy capital at the expense of the provinces.

https://www.gutenberg.org/cache/epub/2613/pg2613-images.html#linknoteref-467

The most arbitrary prince must always stand in some awe of an immense mass of human beings collected in the neighbourhood of his own palace. Apprehensions similar to those which had induced the Caesars to extort from Africa and Egypt the means of pampering the rabble of Rome induced Lewis to aggravate the misery of twenty provinces for the purpose of keeping one huge city in good humour**.** He ordered bread to be distributed in all the parishes of the capital at less than half the market price. The English Jacobites were stupid enough to extol the wisdom and humanity of this arrangement.

https://www.marxists.org/archive/marx/works/1872/housing-question/ch01.htm

In order to create the modern revolutionary class of the proletariat it was absolutely necessary to cut the umbilical cord which still bound the worker of the past to the land. The hand weaver who had his little house, garden and field along with his loom, was a quiet, contented man “in all godliness and respectability” despite all misery and despite all political pressure; he doffed his cap to the rich, to the priests and to the officials of the state; and inwardly was altogether a slave.

...

But the feeling which will probably be uppermost in the minds of those who study the history of the sedition of Antioch will be compassion for the hard fate of the Senators of that city. Burdened with responsibility, bereft of power, ground between the upper and nether mill-stones of the Emperor and the mob, **these unhappy remnants of a once powerful middle class suffered the fate which will probably always be their portion under a system of Imperial Socialism.** There was still in them something left to grind, but when they had been ground out of existence the Empire ceased to be.

https://archive.org/details/in.ernet.dli.2015.43156/page/n321/mode/2up?view=theater

The first of these (1) was the general strike of plebeians; **the plebeians seem to have invented the strike, which now makes its first appearance in history. Twice they actually marched right out of Rome, threatening to make a new city higher up the Tiber, and twice this threat proved conclusive.** The second method of pressure (2) was the threat of a tyranny. Just as in Attica (the little state of which Athens was the capital), Peisistratus raised himself to power on the support of the poorer districts, so there was to be found in most periods of plebeian discontent some ambitious man ready to figure as a leader and wrest power from the senate. **For a long time the Roman patricians were clever enough to beat every such potential tyrant by giving in to a certain extent to the plebeians.** And finally (3) **there were patricians big-minded and far-seeing enough to insist upon the need of reconciliation with the plebeians.**

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0124%3Achapter%3D37

Nor was this disaffected spirit confined to those who were actually concerned in the conspiracy; **for the whole of the common people, from a desire of change, favored the projects of Catiline.** This they seemed to do in accordance with their general character; **for, in every state, they that are poor envy those of a better class, and endeavor to exalt the factious;**[1] **they dislike the established condition of things, and long for something new; they are discontented with their own circumstances, and desire a general alteration; [nam semper in civitate, quibus opes nullae sunt, bonis invident, malos extollunt, vetera odere, nova exoptant, odio suarum rerum mutari omnia student]** they can support themselves amid tumult and sedition, without anxiety, since poverty does not easily suffer loss.[2]

https://archive.org/details/essaysabrahamco00frisgoog/page/n26/mode/2up?view=theater

The great dealers in this world may be divided into the ambitious, the covetous, and the voluptuous; **and that all these men sell themselves to be slaves, though to the vulgar it may seem a Stoical paradox, will appear to the wise so plain and obvious, that they will scarce think it deserves the labour of argumentation.**

Let us first consider the ambitious; and those, both in their progress to greatness, and after the attaining of it. **There is nothing truer than what Sallust says:**3 **“Dominationis in alios servitium suum, mercedem dant:”** They are content to pay so great a price as their own servitude to purchase the domination over others. **The first thing they must resolve to sacrifice is their whole time;** they must never stop, nor ever turn aside whilst they are in the race of glory, no not like Atalanta for golden apples.
…

Pray let us but consider a little what mean, servile things men do for this imaginary food. **We cannot fetch a greater example of it than from the chief men of that nation which boasted most of liberty. To what pitiful baseness did the noblest Romans submit themselves for the obtaining of a prætorship, or the consular dignity?** They put on the habit of suppliants, and ran about, on foot and in dirt, through all the tribes to beg voices; they flattered the poorest artisans, and carried a nomenclator with them, to whisper in their ear every man’s name, lest they should mistake it in their salutations; they shook the hand, and kissed the cheek of every popular tradesman; they stood all day at every market in the public places, to show and ingratiate themselves to the rout; they employed all their friends to solicit for them; they kept open tables in every street; they distributed wine, and bread, and money, even to the vilest of the people. “En Romanos rerum dominos!”5 **Behold the masters of the world beginning from door to door. This particular humble way to greatness is now out of fashion, but yet every ambitious person is still, in some sort, a Roman candidate.** He must feast and bribe, and attend and flatter, and adore many beasts, though not the beast with many heads. Catiline, who was so proud that he could not content himself with a less power than Sylla's, was yet so humble for the attaining of it, **as to make himself the most contemptible of all servants, to be a public bawd, to provide whores, and something worse,** for all the young gentlemen of Rome, whose hot lusts, and courages, and heads, he thought he might make use of.

Indeed, in a free people, where all enjoy equal rights before the law, [In liberis vero populis et in iuris aequabilitate] we must school ourselves to affability and what is called “mental poise”;[101] for if we are irritated when people intrude upon us at unseasonable hours or make unreasonable requests, we shall develop a sour, churlish temper, prejudicial to ourselves and offensive to others.

https://archive.org/details/dli.ernet.506079/page/13/mode/2up?view=theater

The sovran people of a free republic conferred its favours on whom it pleased.3 Popularity with the plebs was therefore essential. It was possessed in abundance both by Caesar and by his bitter enemy, L. Domitius Ahenobarbus. To win a following at elections, to manage bribery, intimidation or rioting, **the friendly offices of lowly agents such as influential freedmen were not despised.** Above all, it was necessary to conciliate the second order in state and society, the Roman knights, converted into a ruinous political force by the tribune C. Gracchus when he set them in control of the law-courts and in opposition to the Senate.

> 3. Cicero, *Pro Sestio* 137. Office was accessible to the 'industria ac virtus' of all citizens. **There was not even a property-qualification. The letter of the law likewise knew no distinction between rich and poor.**

https://www.gutenberg.org/files/55902/55902-h/55902-h.htm#link2H_4_0004 **[October 1829]**

> Caligula was, in theory, nothing more than a magistrate elected by the senate, and subject to the senate. **That irresponsible dignity which, in the most limited monarchies of our time, is ascribed to the person of the sovereign never belonged to the earlier Cæsars. The sentence of death which the great council of the commonwealth passed on Nero was strictly according to the theory of the constitution.** Yet, in fact, the power of the Roman emperors approached nearer to absolute dominion than that of any prince in modern Europe. On the other hand, the King of Denmark, in theory the most despotic of princes, would in practice find it most perilous to indulge in cruelty and licentiousness.

https://books.google.fi/books?id=mQspAwAAQBAJ&lpg=PP1&hl=fi&pg=PA42#v=onepage&q&f=false

The disparate outcomes of democratic movements in the early and late Republic reveal the effect of what political scientists call “the circulation of elites,” whereby the ruling circle enfeebles the masses by creaming off their potential leaders.71 **In the Conflict of the Orders, the plebeians organized the common people and the plebeian meeting functioned as an opposition party. No such popular organization appeared in the struggles of the late Republic, which Sallust identified as the fatal weakness of the democrats.**72 The plebeians had joined the aristocracy. The tribunes, nominally the people’s champions, had become a part of the establishment.
…

The Senate lacked formal coercive power. It exerted its will through the consuls and other magistrates, who had the final say if they chose to balk. However, magistrates usually complied with the Senate’s wishes, as befitting the aristocratic ethos of collective rule.79
…

Formally, the Roman constitution was direct democracy with popular sovereignty in legislation and election.85 In practice, wealthy aristocrats, who filled the Senate and magistracies, enjoyed virtually unchallenged control.86 Legislation gave the people some stake in the government, a way to communicate their desires to the ruling class, and a vent for their grievances. **The annual election of magistrates secured smooth transfer of executive power among aristocrats. It made the people legal arbiters and judges in aristocratic competition, so that they acted as a ballast or brake on rampant escalation of rivalry.** Scholarly evaluations differ in details, partly because of vagueness in the notion of “democracy” itself. Yet they generally agree that the Roman Republic was essentially an aristocracy, although one with a democratic streak.87 One summarizes: **“Rome was in no sense a democracy; but there was apparently a strong ideological tradition in citizens’ rights, backed by the armed force of citizen soldiers, and expressed in popular elections and in legislation by popular assemblies.”**88
…

To paraphrase a famous answer regarding the fall of the Roman Empire, instead of asking why the Republic fell, perhaps one should rather be surprised that it had lasted so long. A political scientist points out that the formal Republican constitution was self-defeating. Ten senior magistrates and ten tribunes each had the power to pilot bills. The magistrates could veto the resolutions of their colleagues and juniors; the tribunes, the resolutions of everyone. **The assemblies had the unlimited power to make into law any bill that came before them.** Checking and balancing each other, they could easily produce a do-nothing government. Yet paralysis rarely occurred, until toward the end. The government worked. How? The political scientist answers, **“It worked, as the British Constitution does today, very differently from what constitutional law propounded, and by the same device: unwritten rules to supplement and/or circumvent its formal provisions.”**89
…

Maintaining the balance, on which the Republic thrived, depended on all sides refraining from claiming their respective full legal prerogative. Self-restraint worked when the open imperial frontier served as an outlet for discontent.
…

Tribunes asked the assemblies to exercise their full legislative power. Aristocrats mobilized their whole arsenal to block popular demands.90

MEN would never be superstitious, if they could govern all their circumstances by set rules, or if they were always favoured by fortune: but being frequently driven into straits where rules are useless, and being often kept fluctuating pitiably between hope and fear by the uncertainty of fortune's greedily coveted favours, they are consequently, for the most part, very prone to credulity.
...

Very numerous examples of a like nature might be cited, clearly showing the fact, that only while under the dominion of fear do men fall a prey to superstition; that all the portents ever invested with the reverence of misguided religion are mere phantoms of dejected and fearful minds; **and lastly, that prophets have most power among the people, and are most formidable to rulers, precisely at those times when the state is in most peril.** I think this is sufficiently plain to all, and will therefore say no more on the subject.

I Should render the Greek into English thus.

> **Nor does a Woman disdain to be the Wife of a bad rich Man. But She prefers a Man of Property before a good Man. For Riches are honoured; and a good Man marries from a bad Family, and a bad Man from a good one. Wealth mingles all races. [πλοῦτος ἔμιξε γένος.]**

https://archive.org/details/descentofmansele1874darw/page/32/mode/2up?view=theater

The Grecian poet, Theognis, who lived 550 B.C., clearly saw how important selection, if carefully applied, would be for the improvement of mankind. **He saw, likewise, that wealth often checks the proper action of sexual selection.** He thus writes:

> "With kine and horses, Kurnus! we proceed
> By reasonable rules, and choose a breed
> For profit and increase, at any price;
> Of a sound stock, without defect or vice.
> But, in the daily matches that we make.
> The price is every thing: for money's sake,
> Men marry: women are in marriage given.
> **The churl or ruffian, that in wealth has thriven**
> **May match his offspring with the proudest race:**
> **Thus every thing is mix'd, noble and base!**
> If then in outward manner, form, and mind.
> You find us a degraded, motley kind,
> Wonder no more, my friend! the cause is plain.
> And to lament the consequence is vain."
>

> Among the men who spend their time there is one Pittalacus, a slave-fellow who is the property of the city. He had plenty of money, and seeing Timarchus spending his time thus he took him and kept him in his own house. **This foul wretch here was not disturbed by the fact that he was going to defile himself with a public slave, [ἄνθρωπον δημόσιον οἰκέτην τῆς πόλεως] but thought of one thing only, of getting him to be paymaster for his own disgusting lusts; to the question of virtue or of shame he never gave a thought.**

https://books.google.fi/books?id=Zymp_kM33ZcC&lpg=PP1&hl=fi&pg=PA59#v=onepage&q&f=false

It is not fortuitous that the modern English word *speculation* has two different meanings. The commerce in goods inevitably gives rise to a commerce in ideas,122 **and subsequent history justified as prescient the stress which Edmund Burke laid on the critical role played by speculators of both kinds in overturning the ancient régime in France.**123 **Nor is it an accident that, just a few decades after coinage became commonplace in Greece, Heraclitus should expound his physics by means of a mercantile metaphor, depiciting "an exchange (*antamoibé*) of all things for fire and fire for all things like the exchange of goods (*chrémata*) for gold and gold for goods."**124 **If Aristotle is to be trusted, the first philosopher may well have been the first man to have conceived of the market as an abstraction.** When reproached for his poverty, Thales is said to have resolved to demonstrate once and for all that philosophy is by no means utterly helpless (*anōpheloús*) in the world of practical affairs. So, for a time, he abandoned his cosmological speculations in order to pursue speculation in a somewhat more vulgar and familiar vein. Having determined in winter that the following year would bring a bumper crop in olives, Thales managed to lease for a pittance all the olive presses in Miletus and on Chios. When a rich harvest came in just as he had predicted, his patience was rewarded, for he employed his corner on the olive-press market to establish a monopoly and to make himself a very rich man.125
…

A century and a half after Thales, the poet Aristophanes would depict the philosopher Socrates as a man suspended in a basket, his head in the clouds, his feet far from the ground. **This absentminded figure was said to be devoting his time to the investigation of "the things aloft" (*tà metéōra*)"**126 It is revealing that the same term recurs in a third-century Ephesian inscription recording a law in which a deceased man's intangible assets – the money he has deposited in a bank, a credit unsecured by a mortgage – are referred to as *metéōron*: "something aloft."127
…

As Aristotle points out, it can hardly be an accident that **the Greek word for coinage (*nomísmata*) is derived from the Greek term for that which exists solely by convention (*nómos*), solely in thought (*nomízein*).**

https://anastrophe.uchicago.edu/cgi-bin/perseus/citequery3.pl?dbname=GreekNov21&getid=1&query=Hdt.%209.122.4

This Artayctes who was crucified was the grandson of that Artembares who instructed the Persians in a design which they took from him and laid before Cyrus; this was its purport: "Seeing that Zeus grants lordship to the Persian people, and to you, Cyrus, among them, let us, after reducing Astyages, depart from the little and rugged land which we possess and occupy one that is better. There are many such lands on our borders, and many further distant. If we take one of these, we will all have more reasons for renown. It is only reasonable that a ruling people should act in this way, for when will we have a better opportunity than now, when we are lords of so many men and of all Asia?" **Cyrus heard them, and found nothing to marvel at in their design; "Go ahead and do this," he said; "but if you do so, be prepared no longer to be rulers but rather subjects. Soft lands breed soft men; wondrous fruits of the earth and valiant warriors grow not from the same soil."** The Persians now realized that Cyrus reasoned better than they, and they departed, **choosing rather to be rulers on a barren mountain side than dwelling in tilled valleys to be slaves to others.**

>
> **φιλέειν γὰρ … τὰ πολέμια.** The relation between 'Physics and Politics' occupied a large space in the minds of Greek thinkers. Hdt.'s own work is saturated with the assumption of a connexion between race and place, between climate and institutions. His interest in the varieties of human kind makes him the father of Anthropology, as his sense of the unity and continuity of human adventure and experience makes him the 'father of history.' Hence his descriptions of the land and river of Egypt as a prelude to his account of the people, their manners and institutions; and so too with Skythia and the Skythians, Libya and the Libyans, the ends of the earth, and the more familiar coasts of the Aigaian. Hdt. has in a remarkable degree the sense of the relativity of human institutions; **it is a part of the sophistical illumination of the age, just begun. It had done something to correct the exaggerated notion of the omnipotence of the *Nomothetes*.** It attains formal expression in the work of his great contemporary Hippokrates of Kos, *de aere aquis et locis* (*Hippocr. opera*, vol. i. ed. Kvehlewein, 1895), and the philosophy of the reaction, with its practical concern for the ideal city-state, does not fail to realise that for the πόλις κατ᾽ εὐχήν a site, a climate, a race κατ᾽ εὐχήν must also be posited. Thucydides (more clearly than Hdt.) mediates the action of physics on politics through the economic conditions (as in his *Archaiologia*): this profounder analysis was not lost in the sequel; Aristotle, for example, not only generalizes (or preserves the generalization) on the relation between τροφή and βίος (*Politics* 1.8=1256 a), but traces in a fashion the merits of the Greek nation to its happy position between the barbarous extremes of cold and heat, of Europe and Asia (*Pol.* 4(7).7=1327 b). It stands to reason that the lesser differences between one Greek folk and another might be in part traceable to differences in the physicogeographical environment; **and as a matter of fact the popular philosophy of Greece early ascribed the superiority of the Attic race to the advantages of its climate,** traced the genesis of political parties to features in the Attic landscape—the shore, the plain, the mountain—or ascribed the development of the democracy (somewhat superficially) to the growing importance of the sea, and sea-power, in the life of the city. Livy (38.17) puts a speech into the mouth of Cn. Manlius (A.U.C. 565) on the Gallograeci, which might be taken as a commentary on this text; **but in general the Roman conqueror believed in race (*fortes creantur fortibus*), and under the cosmopolitan rule of Rome, whether imperial or pontifical, much of the sense of the relativity of human institutions passed out of consciousness, to be rediscovered and reintroduced with the revival of Greek letters and the return to nature.** The idea is now **[1908]** a commonplace of every history of civilisation, or philosophy of history; but an initial place in the bibliography of the subject must always be reserved for Montesquieu's *Esprit des Lois*, 1748 (Livres xiv.-xviii.), as also for Buckle's *Hist. of Civilization in England* (1857), c.ii. **The *regnum hominis*, much as it has advanced in our own day, has not yet succeeded in completely emancipating Man from the physico-geographical conditions of polity;** climate, soil, structure, position, and even physical aspect, are permanent though modifiable factors in the life and character of the race.

Then, suddenly and without warning, the father of history transports us two generations back in time to the court of Cyrus the Great. There, he tells us, an ancestor of this same Artayctes had once approached the Great King with the suggestion that the Persians should take advantage of their newly won empire by migrating from their homeland, confined and harsh as it was, to a territory more favourable to human habitation. “It befits men who are rulers to do this sort of thing,” the man purportedly argued. “What finer time there could be – for we now rule over many men and all Asia?” Herodotus’ Cyrus was not much impressed. The Persians might take up this suggestion, he remarked, but only if they wished to rule no longer and to be ruled by others. “From soft countries,” he explained, “come soft men: it does not happen that the same soil produces an admirable harvest and men good in war.” **If the ancient republics and the monarchies that lived on as their relics viewed technological progress with a jaundiced eye, it was because the ancients sensed that a science pledged “to come to the relief of man’s estate” was a science that promised to make of all countries “soft countries” and that thereby threatened to make all men “soft men.” It can hardly be fortuitous that the last word of Herodotus’ great work is the infinitive *douleúein* – “to be enslaved.”**38

> In Greece, all that the people had to do, it did for itself; it was constantly assembled in the public square. The Greeks lived in a mild climate; they had no natural greed; slaves did their work for them; their great concern was with liberty. Lacking the same advantages, how can you preserve the same rights? Your severer climates add to your needs;[1] for half the year your public squares are uninhabitable; the flatness of your languages unfits them for being heard in the open air; **you sacrifice more for profit than for liberty, and fear slavery less than poverty.**
>
> > [1] **To adopt in cold countries the luxury and effeminacy of the East is to desire to submit to its chains; it is indeed to bow to them far more inevitably in our case than in theirs.**

https://www.gutenberg.org/cache/epub/2333/pg2333-images.html#link2H_4_0001

Five hundred years before the Christian era the citizens of the republics round the Ægean Sea formed perhaps the finest militia that ever existed. As wealth and refinement advanced, the system underwent a gradual alteration. The Ionian States were the first in which commerce and the arts were cultivated, and the first in which the ancient discipline decayed. Within eighty years after the battle of Platæa, mercenary troops were everywhere plying for battles and sieges. In the time of Demosthenes, it was scarcely possible to persuade or compel the Athenians to enlist for foreign service. The laws of Lycurgus prohibited trade and manufactures. The Spartans, therefore, continued to form a national force long after their neighbors had begun to hire soldiers. But their military spirit declined with their singular institutions. In the second century before Christ, Greece contained only one nation of warriors, the savage highlanders of Ætolia, who were some generations behind their countrymen in civilization and intelligence.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Plutarch/Lives/Pelopidas*.html

At any rate, there was a soldier of Antigonus who was venturesome, but had miserable health and an impaired body. When the king asked him the reason for his pallor, the man admitted that it was a secret disease, 2 whereupon the king took compassion on him and ordered his physicians, if there was any help for him, to employ their utmost skill and care. Thus the man was cured; but then the good fellow ceased to court danger and was no longer a furious fighter, so that even Antigonus rebuked him and expressed his wonder at the change. The man, however, made no secret of the reason, but said: **"O King, it is thou who hast made me less daring, by freeing me from those ills which made me set little value on life."** 3 **On these grounds, too, as it would seem, a man of Sybaris said it was no great thing for the Spartans to seek death in the wars in order to escape so many hardships and such a wretched life as theirs.**

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Etruria

Diodorus (v. 40) gives a succinct account in which he says that “**their country was so fertile they derived therefrom not only sufficient for their needs but enough to supply them with luxuries.** Twice a day they partook of elaborate repasts at which the tables were decked with embroidered cloths and vessels of gold and silver. The servants were numerous and noticeable for the richness of their attire. The houses, too, were large and commodious. **In fact, giving themselves up to sensuous enjoyments they had naturally lost the glorious reputation their ancestors had won in war.**” This last remark shows that Diodorus recognized the important difference between the early Etruscans who built up the country and the later ones who merely enjoyed it.

>
> 3 At that time, too, the Volsinians, the most flourishing of the Etruscan peoples, almost perished as a result of their wantonness. **After making license a habit, they indiscriminately freed their**

slaves, invited them to banquets, and honoured them with marriage. 4 The liberated slaves, admitted to a share of power, criminally plotted to usurp complete rule of the state, and, relieved of the yoke of slavery, were consumed with the desire for power. **Once free, they cursed those masters whom they as slaves had devotedly loved, because they remembered that these men had once been their masters**. 5 **The liberated slaves then conspired to commit a crime and claimed the captured city for their class alone. So great were their numbers that they accomplished their rash purpose without real resistance.** They criminally appropriated the property and wives of their masters, and forced the latter to go into distant exile. These wretched and destitute exiles betook themselves to Rome. **Here they displayed their misery and tearfully pleaded their cause.** They were avenged and restored to their former positions through the stern rule of the Romans.

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0166%3Abook%3D38%3Achapter%3D17

And those forefathers of ours had to do with true Gauls, born in their own land; these now are degenerates, of mixed race, and[5] really Gallogrecians, as they are named; just as, in the case of plants and animals, the seeds have less power to maintain their natural quality than the character of the soil and climate in which they live has power to change [10] it. **The Macedonians who hold Alexandria in Egypt, who hold Seleucia and Babylonia and other colonies scattered throughout the world, have degenerated into Syrians, Parthians,** [11] **Egyptians; Massilia,[6] situated among the Gauls, has acquired something of the disposition of its neighbours; what have the Tarentines retained of that stern and dreadful Spartan** [12] **discipline? Whatever grows in its own soil, has greater excellence; transplanted to a soil alien to it, its nature changes and it degenerates towards that in which it is nurtured.** It is Phrygians,[7] therefore, burdened with the weapons of Gauls, whom, even as you slew them in the battle-line of Antiochus, you will slay, victorious over the [13] vanquished. I am afraid that there will be too little of glory rather than too much of war. King Attalus has often repulsed and routed [14] them. **Do not think that it is only beasts which when newly caught first retain that fierceness of their forest life, and then, when long fed by the hands of men, grow tame,** but that in moderating the ferocity of men nature does not do the [15] same. Do you believe that these are the same men that their fathers and their grandfathers [16] were? Exiles on account of the poverty of the land, they left home, travelling through the most inhospitable land of Illyricum, then Paeonia and Thrace, fighting with the fiercest tribes, and seized these lands. Toughened and hardened by so many[8] misfortunes, they were received by a land which could stuff them with its abundance of all [17] things. In a land most rich, under a sky most kindly, among natives mild in disposition, all that fierceness with which they came has grown gentle. **You, by Hercules, being men of Mars, must escape and avoid as soon as possible the pleasantness of Asia:** such power have these foreign delights to destroy the vigour of the soul; such influence does contact with the habits and character of the natives [18] exert.[9]

Panegyric of Maximian Augustus by an Anonymous Orator

1. The date is 21 April, Rome's birthday; the year 289 (Galletier I.8-9). The place is Trier.

…

So where shall I begin? Shall I mention your fatherland's services to the state? **Though who would deny that for many centuries now, from the time when its resources were added to the Roman name, Italy has indeed been the mistress of the nations in duration of glory, but Pannonia**8 **in valor?**3

https://oll.libertyfund.org/title/sidney-discourses-concerning-government#lf0019_label_393

Thus did the armies of the East and West set up emperors at their pleasure; **and tho the Goths, Vandals, Huns, Sueves, Alans, and others had cruel wars among themselves, yet they feared and suffered little or nothing from the Romans. This state of things was so soon observed, that in the beginning of Tiberius his reign they who endeavoured to excite the Gauls to take arms, used no other arguments than such as were drawn from the extreme weakness of the Romans, *Quam inops Italia, plebs urbana imbellis, nihil in exercitibus validum praeter externum.*** 6 **It was evident that after the battles of Philippi and Actium, the strength of the Roman armies consisted of strangers; and even the victories that went under their name were gained by those nations which in the time of their liberty they had subdued.** They had nothing left but riches gather'd out of their vast dominions; and they learnt by their ruin, that an empire acquir'd by virtue could not long be supported by money.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Caesar/Gallic_War/4*.html

The Suebi are by far the largest and the most warlike nation among the Germans. It is said that they have a hundred cantons, from each of which they draw one thousand armed men yearly for the purpose of war outside their borders.
...

They make not much use of corn for food, but chiefly of milk and of cattle, and are much engaged in hunting; and this, owing to the nature of the food, the regular exercise, and the freedom of life—for from boyhood up they are not schooled in a sense of duty or discipline, and do nothing whatever against their wish [nihil omnino contra voluntatem faciunt]—nurses their strength and makes men of immense bodily stature.
...

They suffer no importation of wine whatever, believing that men are thereby rendered soft and womanish for the endurance of hardship.

> https://en.wikisource.org/wiki/Germania_(Church_%26_Brodribb)#XXIII
>
> They satisfy their hunger without elaborate preparation and without delicacies. In quenching their thirst they are not equally moderate. **If you indulge their love of drinking by supplying them with as much as they desire, they will be overcome by their own vices as easily as by the arms of an enemy.**

https://www.gutenberg.org/cache/epub/16765/pg16765-images.html#FNanchor_17_IV

Then, indeed, it came about that Gelimer and those about him, who were nephews and cousins of his and other persons of high birth, experienced a misery which no one could describe, however eloquent he might be, in a way which would equal the facts. **For of all the nations which we know that of the Vandals is the most luxurious, and that of the Moors the most hardy. For the Vandals, since the time when they gained possession of Libya, used to indulge in baths, all of them, every day, and enjoyed a table abounding in all things, the sweetest and best that the earth and sea produce.** And they wore gold very generally, and clothed themselves in the Medic garments, which now they call "seric,"[18] and passed their time, thus dressed, in theatres and hippodromes and in other pleasureable pursuits, and above all else in hunting. And they had dancers and mimes and all other things to hear and see which are of a musical nature or otherwise merit attention among men. **And the most of them dwelt in parks, which were well supplied with water and trees; and they had great numbers of banquets, and all manner of sexual pleasures were in great vogue among them.** But the Moors live in stuffy huts[19] both in winter and in summer and at every other time, never removing from them either because of snow or the heat of the sun or any other discomfort whatever due to nature. And they sleep on the ground, the prosperous among them, if it should so happen, spreading a fleece under themselves. Moreover, it is not customary among them to change their clothing with the seasons, but they wear a thick cloak and a rough shirt at all times. And they have neither bread nor wine nor any other good thing, but they take grain, either wheat or barley, and, without boiling it or grinding it to flour or barley-meal, they eat it in a manner not a whit different from that of animals. **Since the Moors, then, were of a such a sort, the followers of Gelimer, after living with them for a long time and changing their accustomed manner of life to such a miserable existence, when at last even the necessities of life had failed, held out no longer, but death was thought by them most sweet and slavery by no means disgraceful.**

> https://www.projekt-gutenberg.org/dahn/gelimer/chap041.html
>
> **Man möchte meinen, das ganze Volk der Vandalen bestand in seinem Königshaus und wenigen Edelgeschlechtern. Seit Zazo und die Edeln um ihn fielen, seit der König entschwunden, hört jeder Widerstand auf: wie ein Bündel Stäbe, dem man die zusammenhaltende Schnur durchhauen, fallen sie auseinander.** Seit dem Tage von Trikameron lassen sich die Barbaren überall greifen wie die Schafe: ohne Widerstand. Man findet sie nur mehr, ohne Waffen, in den katholischen Basiliken, wo sie, Zuflucht suchend, die Altäre umfassen, die sie so oft verunehrt hatten! – **Die Männer nicht anders als die Weiber und Kinder.**
>
> Wahrlich, wenn ihre Brüder in Italien, in Hispanien, wenn ihre Vettern, die Franken, Alamannen und wie sie sonst heißen, diese Barbaren in Gallien und Germanien, auch schon so fein gebildet wären wie diese lateinisch und griechisch dichtenden Vandalen: dann würde der Imperator Justinianus durch Belisar und Narses den Germanen alsbald das ganze Abendland wieder abnehmen. **Aber, ich fürchte, die Vandalen stehen allein auf solcher Höhe der Bildung.**

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0131%3Abook%3D5%3Acard%3D1105

And more and more each day
Would men more strong in sense, more wise in heart,
Teach them to change their earlier mode and life
By fire and new devices. Kings began
Cities to found and citadels to set,
As strongholds and asylums for themselves,
And flocks and fields to portion for each man
After the beauty, strength, and sense of each – **[pro facie cuiusque et viribus ingenioque]**
For beauty then imported much, and strength
Had its own rights supreme. **Thereafter, wealth**
Discovered was, and gold was brought to light,
Which soon of honour stripped both strong and fair;
For men, however beautiful in form
Or valorous, will follow in the main
The rich man's party.

https://archive.org/details/newscienceofgiam030174mbp/page/n231/mode/2up?view=theater

And as there had thus been only two classes of the Roman people, so there had been only two kinds of assembly: **one the *curiata*, consisting of fathers or nobles or senators, the other the *tributa*, consisting of plebeians or the ignoble.** But now that Fabius had divided the citizens according to their means into the three classes of senators, knights and plebeians, the nobles ceased to be a separate order in the city and were placed in one or another of the three classes according to their wealth. From that time on patricians were distinguished from senators and knights, and plebeians from the base-born; **and plebeians were no longer contrasted with patricians but with knights and senators. A plebeian no longer meant a base-born person but rather a citizen of small patrimony who might well be a noble; and on the other hand a senator no longer meant a patrician but a citizen of ample patrimony who might well be of low birth.**

627 Consequently from that time on *comitia centuriata,* the assembly by hundreds, was the term applied to the assemblies in which the entire Roman people of all three classes came together to enact the consular laws among other public business.

https://books.google.fi/books?id=Zymp_kM33ZcC&lpg=PP1&hl=fi&pg=PA172#v=onepage&q&f=false

Just as no liberal democracy ever accorded complete autonomy to the economy, so no Greek *pólis* ever fully worked out in practice what was implicit in the absolute primacy of accorded to the transcendent common good. The very existence of the commercial *agorá* ruled out the complete subordination of economic to political concerns; and where local circumstances made a particular city a mercantile center, there was no way to preserve completely the integrity of the political community. It was one thing for the peasant occasionally to visit the *agorá* to exchange grain, olive oil, or wine for metal, pots, clothing, or other finished goods; **it was something altogether different for the craftsman and the merchant to depend on the market for their entire livelihood. Where these last two groups were relatively numerous, as in Corinth, they might achieve something approaching respectability;**1 and where they were influential, as in Chios, they might occasionally even determine policy.2

https://books.google.fi/books?id=Zymp_kM33ZcC&lpg=PP1&hl=fi&pg=PA47#v=onepage&q&f=false

The Greeks perceived that merchants and craftsmen would be less willing to defend the civic territory than farmers,36 and they were acutely aware of the difference between what we still instinctively call real estate and what they termed invisible wealth (*aphanḗs ousía*).37 The latter distinction is particularly instructive, for it is the predominance of invisible wealth which sets the modern apart from the ancient political economy.

In the eighteenth century, **Montesquieu and his disciples treated the invention of the bill of exchange as a turning point in world history. “By this means,” Montesquieu argued, “commerce was able to elude violence and to maintain itself everywhere – since the richest merchant had no possessions other than invisible goods which could be conveyed anywhere and left not a trace.” As a consequence, the princes came to fear that “great and arbitrary actions (*les grands coups d’autorité*)” on their part might drive out the men who conducted the trade on which they depended for revenues.** This, in turn, made it necessary for the sovereigns of Europe “to govern themselves with greater wisdom than they themselves could have imagined.” By making it possible for a man to conceal his substance, the techniques of modern banking were a bulwark against arbitrary rule.38

What the proponents of modern republicanism saw as a virtue their ancient counterparts viewed as a vice. The Greeks knew nothing of the bill of exchange, and their system of accounting was primitive in the extreme.39

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0158%3Achapter%3D1

[10] **Now among the slaves and metics[2] at Athens there is the greatest uncontrolled wantonness; you can't hit them there, and a slave will not stand aside for you.** I shall point out

why this is their native practice: if it were customary for a slave (or metic or freedman) to be struck by one who is free, you would often hit an Athenian citizen by mistake on the assumption that he was a slave. For the people there are no better dressed than the slaves and metics, nor are they any more handsome. [11] **If anyone is also startled by the fact that they let the slaves live luxuriously there and some of them sumptuously, it would be clear that even this they do for a reason. For where there is a naval power, it is necessary from financial considerations to be slaves to the slaves in order to take a portion of their earnings, and it is then necessary to let them go free.[3] And where there are rich slaves, it is no longer profitable in such a place for my slave to fear you. In Sparta my slave would fear you; but if your slave fears me, there will be the chance that he will give over his money so as not to have to worry anymore.** [12] For this reason we have set up equality between slaves and free men, and between metics and citizens. The city needs metics in view of the many different trades and the fleet. **Accordingly, then, we have reasonably set up a similar equality also for the metics.**

https://archive.org/details/in.ernet.dli.2015.55010/page/n309/mode/2up?view=theater

The most important industrial undertakings, outside of mining, are owned by metics; the ceramic industry is theirs completely; **and wherever middlemen can squeeze themselves in between producer and consumer they are to be found.** The law harasses them and protects them. It taxes them like citizens, lays "liturgies" upon them, exacts military service from them, and adds a poll tax for good measure; it forbids them to own land or to marry into the family of a citizen; it excludes them from its religious organization, and from direct appeal to its courts. But it welcomes them into its economic life, appreciates their industry and skill, enforces their contracts, gives them religious freedom, and guards their wealth against violent revolution. Some of them flaunt their riches vulgarly, but some of them, too, work quietly in science, literature, and the arts, practice law or medicine, and create schools of rhetoric and philosophy. **In the fourth century they will provide the authors and subject of the comic drama, and in the third they will set the cosmopolitan tone of Hellenistic society**. They itch for citizenship, but they love Athens proudly, and contribute painfully to finance her defense against her enemies. Through them, chiefly, the fleet is maintained, the empire is supported, and the commercial supremacy of Athens is preserved.

https://books.google.fi/books?id=INcgAwAAQBAJ&lpg=PP1&hl=fi&pg=PA349#v=onepage&q&f=false

Plato, Xenophon, and Aristotle all identify empire with the elevation of the art of household management – the production of material goods and the division of labor – over the cultivation of the moral and intellectual virtues solicited by civic deliberation about the common good. Whereas republics foster the common good, **empires allow individuals to maximize their individual security and gain.** Whatever their merits, therefore, empires fall short of the highest human excellence. This is implicit, for example, in **Aristotle's remark that, if economics were the chief end of politics, all cities could be united in a single state,** as happens with multinational trade agreements (*Politics* 1280a35-40).

> https://counter-currents.com/2017/09/between-capital-archaic-socialism/
>
> Michéa understands the liberal element of parties of progress as being fundamentally anti-democratic, echoing here the distinction made by the French thinker, Alain de Benoist, between democracy and liberalism. Liberalism, obsessed with minorities and what another socialist, George Galloway, famously mocked as "liberal hothouse" issues, is not in principle opposed to the centralization of economic power at all, according to Michéa. Quite the contrary. **It is, however, opposed to democracy, that is to say, to any entitlement giving a role in the allocation of power to the majority of the people and of any entitlement to a nation to decide its own destiny. In short, liberalism extends economic sovereignty at the expense of political sovereignty.**

https://books.google.fi/books?id=Zymp_kM33ZcC&lpg=PP1&hl=fi&pg=PA172#v=onepage&q&f=false

For subsistence, the Corinthians were probably more dependent on commerce and the provision of services than any other Greek community. They possessed a fertile territory, but it was quite limited in extent; and because Corinth was located on a narrow neck of land separating the Saronic from the Corinthian gulf, she possessed two separate harbors.

https://archive.org/details/cu31924026480370/page/n399/mode/2up?view=theater

IV. But maritime cities are likewise naturally exposed to corrupt influences, and revolutions of manners. Their civilization is more or less adulterated by new languages and customs, and they import not only foreign merchandise, but foreign fashions, to such a degree that nothing can continue unalloyed in the national institutions. Those who inhabit these maritime towns do not remain in their native place, but are urged afar from their homes by winged hope and speculation. **And even when they do not desert their country in person, still their minds are always expatiating and voyaging round the world.**

Nor, indeed, was there any cause which more deeply undermined Corinth and Carthage, and at last overthrew them both, than this wandering and dispersion [hic error ac dissipatio] of their citizens, whom the passion of commerce and navigation had induced to abandon the cultivation of their lands and their attention to military pursuits. [agrorum et armorum cultum]

The proximity of the sea likewise administers to maritime cities a multitude of pernicious incentives to luxury, which are either acquired by victory or imported by commerce; and the very agreeableness of their position nourishes many expensive and deceitful gratifications of the passions. **And what I have spoken of Corinth may be applied, for aught I know, without incorrectness to the whole of Greece. For the Peloponnesus itself is almost wholly on the sea-coast; nor, besides the Phliasians, are there any whose lands do not touch the sea; and beyond the Peloponnesus, the Ænianes, the Dorians, and the Dolopes are the only inland people. Why should I speak of the Grecian islands, which, girded by the waves, seem all afloat, as it were, together with the institutions and manners of their cities?** And these things, I have before noticed, do not respect ancient Greece only; for which of all those colonies which have been led from Greece into Asia, Thracia, Italy, Sicily, and Africa, with the single exception of Magnesia, is there that is not washed by the sea? Thus it seems as if a sort of Grecian coast had been annexed to territories of the barbarians. **For among the barbarians themselves none were heretofore a maritime people, if we except the Carthaginians and Etruscans; one for the sake of commerce, the other of pillage. And this is one evident reason of the calamities and revolutions of Greece, because she became infected with the vices which belong to maritime cities, which I just now briefly enumerated. But yet, notwithstanding these vices, they have one great advantage, and one which is of universal application, namely, that there is a great facility for new inhabitants flocking to them.** And, again, that the inhabitants are enabled to export and send abroad the produce of their native lands to any nation they please, which offers them a market for their goods.

V. **By what divine wisdom, then, could Romulus embrace all the benefits that could belong to maritime cities, and at the same time avoid the dangers to which they are exposed,** except, as he did, by building his city on the bank of an inexhaustible river, whose equal current discharges itself into the sea by a vast mouth, so that the city could receive all it wanted from the sea, and discharge its superabundant commodities by the same channel?

https://archive.org/details/in.ernet.dli.2015.201719/page/n25/mode/2up?view=theater

From a financial point of view, Carthage held in every respect the first place among the states of antiquity. At the time of the Peloponnesian war this Phoenician city was, according to the testimony of the first of Greek historians, financially superior to all the Greek states, and its revenues were compared to those of the great-king; **Polybius calls it the wealthiest city in the world.**
...

It is absolutely impossible to form an idea of the mass of capital accumulated in **this London of antiquity,** but some notion at least may be gained of the public revenues from the fact, that, in spite of the costly system on which Carthage organised its wars and in spite of the careless and faithless administration of the state property, the contributions of its subjects and the customs-revenue completely covered the expenditure, **so that no direct taxes were levied from the citizens;** and further, that even after the second Punic war, when the power of the state was already broken, the current expenses and the payment to Rome of a yearly instalment of £48,000 could be met, without levying any tax, merely by a somewhat stricter management of the finances, and fourteen years after the peace the state proffered immediate payment of the thirty-six remaining instalments. But it was not merely the sum total of its revenues that evinced the superiority of the financial administration at Carthage. **The economical principles of a later and more advanced epoch are found by us in Carthage alone of all the more considerable states of antiquity. Mention is made of foreign state-loans, and in the monetary system we find along with gold and silver mention of a token-money having no intrinsic value—a species of currency not used elsewhere in antiquity.** In fact, if government had resolved itself into mere mercantile speculation, never would any state have solved the problem more brilliantly than Carthage.

Let us now compare the respective resources of Carthage and Rome. Both were agricultural and mercantile cities, and nothing more; art and science had substantially the same altogether subordinate and altogether practical position in both, except that in this respect Carthage had made greater progress than Rome. **But in Carthage the moneyed interest preponderated over the landed, in Rome at this time the landed still preponderated over the moneyed; and, while the agriculturists of Carthage were universally large landlords and slave-holders, in the Rome of this period the great mass of the burgesses still tilled their fields in person. The majority of the population in Rome held property, and was therefore conservative; the majority in Carthage held no property, and was therefore accessible to the gold of the rich as well as to the cry of the democrats for reform.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Polybius/6*.html#ref2

2 **At Carthage nothing which results in profit is regarded as disgraceful;** at Rome nothing is considered more so than to accept bribes and seek gain from improper channels. 3 **For no less strong than their approval of money-making is their condemnation of unscrupulous gain from forbidden sources.** 4 A proof of this is that at Carthage candidates for office practise open bribery, whereas at Rome death is the penalty for it.

https://books.google.fi/books?id=mQspAwAAQBAJ&lpg=PP1&hl=fi&pg=PA91#v=onepage&q&f=false

Perhaps Carthaginians were happier after Zama. Like the Romans, they could concentrate on their single love. **While Rome triumphed in the eastern Mediterranean, Carthage prospered on commerce and became, in some reckoning, the richest city in the world.**78 Life as a dependent Roman ally was good, except for one thing their money could not buy. Security depended entirely on Roman pleasure. That dependency proved lethal.

https://books.google.fi/books?id=mQspAwAAQBAJ&lpg=PP1&hl=fi&pg=PA5#v=onepage&q&f=false

China is a solid land realm, to which its inhabitants refer as *hainei*, within the seas. “Around the sea” is an apt description for the Roman Empire, whose territories clung to the rim of the Mediterranean. **However, the sea at its heart did not make Rome a maritime empire akin to the nineteenth-century British Empire. It enjoyed naval supremacy shortly after it built a war fleet, but its power rested mainly on its marching legions. In the predominance of infantry, Rome was closer to the Han than the Athenian Empire,** which dominated the eastern Mediterranean with its ramming galleys in the fifth century BCE. The arduous process of conquering Italy had shaped Rome’s character as essentially a land power.

https://books.google.fi/books?id=CK3gBQAAQBAJ&lpg=PP1&hl=fi&pg=PT397#v=onepage&q&f=false

In contrast to modern imperialism where the flag followed commercial penetration, the Han and Roman Empires attended foremost to geopolitics, not commerce.29 **Roman peace and roads benefited trade, but Rome was indifferent to trade itself and never raised it as an issue in its many treaties with Parthia.** Above all, Rome never allowed trade to interfere with its foreign policies. Although on the verge of bankruptcy when Palmyra rebelled in 273, Rome did not hesitate to sack the city that brought it enormous revenues from the 25 percent import duty it imposed. Palmyra’s commercial network collapsed, pulling down with it much eastern trade.30

Like the Romans, the Han government facilitated trade but put it at a distant second to political and military concerns.

https://books.google.fi/books?id=mQspAwAAQBAJ&lpg=PP1&hl=fi&pg=PR22#v=onepage&q&f=false

Across the empire, native aristocrats sat in city councils and collected taxes for the emperor in return for his support of their local power. Uniting landlords of the world was a key to success that the Empire inherited from the Republic. **Cohesion within the ruling class was furthered by the development of closely reasoned civil laws, which resolved disputes among the elites and grew the complex institution behind absolute property rights.**24 Throughout Roman history, militarism and legally backed plutocracy stood clear and unwavering. To keep army and wealthy aristocrats in check and balanced was the emperor’s most onerous and precarious job. **When the two ceased to cooperate, dusk gathered in the Empire.**25
...

The Chinese Empire reconstituted itself after the fall, a feat it would repeat several times in the Dragon’s long history. The Roman Empire did not. Its political strength stemmed partly from alignment with the dominant economic class, **but landed interests are necessarily regional.** A far-flung empire based on the unity of landed wealth was a fluke difficult to repeat. **Yet the Eagle would soar again. Rome’s unlimited will to power survived like an acorn, which was portable. It would sprout again on more fertile grounds, in alignment with a more formidable dominant economic class, the capitalist.** The realistic political thinking and reasonable discourse by which the Romans perfected the republican constitution was adaptable to develop laws and institutions for more complex worlds.

> https://news.stanford.edu/2019/10/23/fall-rome-europes-lucky-break/
>
> The Romans succeeded by exploiting a set of conditions that were hard or even impossible to replicate later on. **Through shrewd manipulation of civic obligations, material rewards and alliances, their leadership managed to mobilize vast numbers of ordinary farmers for military operations at low cost.**
>
> Rome also benefited from modest levels of state formation in the western Mediterranean and the fact that larger kingdoms farther east were busy fighting each other. This allowed them to overpower and swallow other societies one by one. **In later periods, by contrast, Europe was full of competing states that prevented any one of them from subduing all the others.**

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0124%3Achapter%3D11

At first, however, it was ambition, rather than avarice,[1] that influenced the minds of men; a vice which approaches nearer to virtue than the other. For of glory, honor, and power, the worthy

is as desirous as the worthless; but the one pursues them by just methods; the other, being destitute of honorable qualities, works with fraud and deceit. But avarice has merely money for its object, which no wise man has ever immoderately desired. It is a vice which, as if imbued with deadly poison, **enervates whatever is manly in body or mind.**[2] **[corpus animumque virilem effeminat]** It is always unbounded and insatiable, and is abated neither by abundance nor by want.

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0019%3Atext%3DMan.%3Achapter%3D2%3Asection%3D6

The most certain and the largest revenues of the Roman people are at stake; and if they be lost, **you will be at a loss for the luxuries of peace, and the sinews of war.**
…

For the revenues of the other provinces, O Romans, are such that we can scarcely derive enough from them for the protection of the provinces themselves. **But Asia is so rich and so productive, that in the fertility of its soil, and in the variety of its fruits, and in the vastness of its pasture lands, and in the multitude of all those things which are matters of exportation, it is greatly superior to all other countries.**
…

[19] In the next place, that which the same Asia, and that same Mithridates taught us, at the beginning of the Asiatic war that, at all events, we, having learnt by disaster, ought to keep in our recollection. For we know that then, when many had lost large fortunes in Asia, all credit failed at Rome, from payments being hindered. For it is not possible for many men to lose their property and fortunes in one city, without drawing many along with them into the same vortex of disaster. But do you now preserve the republic from this misfortune; **and believe me, (you yourselves see that it is the case,) this credit, and this state of the money-market which exists at Rome and in the forum, is bound up with, and is inseparable from, those fortunes which are invested in Asia.**

https://archive.org/details/in.ernet.dli.2015.503389/page/n103/mode/2up?view=theater

On the contrary, the class of big financiers and speculators, the Roman *equites* (a term which since Mommsen has quite erroneously been translated “knights”), always had a perfectly good understanding with the populace and its organizations, the voting clubs (*sodalicia*) and the armed bands like those of Milo and Clodius.1 **They supplied money for elections, insurrections, and bribes, and C. Gracchus in return handed over to them the provinces for unlimited exploitation under State protection.** There they spread incredible misery by plundering, usury, and the selling of whole towns into slavery. To crown all, they took possession of the law-courts, where they were able to sit in judgment on their own crimes and acquit each other. They, for their part, promised the dictator everything, only to drop him and his well-meant reforms as soon as they had secured their own advantages.
…

Marius – a political simpleton like so many popular leaders – and his backers Saturninus and Cinna, thought no differently from Gracchus; and therefore **Sulla, the dictator of the nationalist side, after the storming of Rome organized a terrible butchery among the financiers, from which as a class they never recovered. After Caesar they completely disappeared from history as a *political* element. Their existence as a political power was intimately bound up with the age of democratic party-anarchy and did not survive it.**

https://archive.org/details/in.ernet.dli.2015.231118/page/n359/mode/2up?view=theater

Italy’s dependence upon imported food was her vital weakness; **the moment she could not force other countries to send her food and soldiers she was doomed. Meanwhile the provinces recovered not only prosperity but economic initiative: Italian merchants, in this first century A.D., almost disappeared from Eastern ports, while Syrian and Greek traders established themselves at Delos and Puteoli and multiplied in Spain and Gaul.**

https://www.gutenberg.org/files/44908/44908-h/44908-h.htm#FA_39

Therefore the inference is that, **toward the middle of the third century, Italy had lost the treasure she had won in war,** which had gradually gravitated to the centre of exchanges. This inference is confirmed by history. The movements of Diocletian seem to demonstrate that after 250 A.D. Rome ceased to be either the political or commercial capital of the world.
…

The sequence of events seems plain. Very soon after the insolvency of the government at Rome, the administration quitted the city and moved toward the boundary between Europe and Asia; **there, after some forty years of vacillation, it settled permanently at the true seat of exchanges,** for Constantinople remained the economic centre of the earth for more than eight centuries.

Similar conclusions may be drawn from the fluctuations of the currency. **At Rome the coin could not be maintained at the standard, because of adverse exchanges, but when the political**

and economic centres had come to coincide, at a point upon the Bosphorus, depreciation ceased, and the aureus fell no further.

This migration of capital, which caused the rise of Constantinople, was the true opening of the Middle Ages, for it occasioned the gradual decline of the rural population, and thus brought about the disintegration of the West. **Victory carried wealth to Rome, and wealth manifested its power in a permanent police; as the attack in war gained upon the defence, and individual resistance became impossible, transportation grew cheap and safe, and human movement was accelerated. Then economic competition began, and intensified as centralization advanced, telling always in favour of the acutest intellect and the cheapest labour.** Soon, exchanges became permanently unfavourable, a steady drain of bullion set in to the East, and, as the outflow depleted the treasure amassed at Rome by plunder, contraction began, and with contraction came that fall of prices which first ruined, then enslaved, and finally exterminated, the native rural population of Italy.

https://www.gutenberg.org/cache/epub/2333/pg2333-images.html#link2H_4_0001

The connection between the State and its defenders was reduced to the most simple and naked traffic. The adventurer brought his horse, his weapons, his strength, and his experience, into the market. Whether the King of Naples or the Duke of Milan, the Pope or the Signory of Florence, struck the bargain, was to him a matter of perfect indifference. **He was for the highest wages and the longest term.** When the campaign for which he had contracted was finished, there was neither law nor punctilio to prevent him from instantly turning his arms against his late masters. **The soldier was altogether disjoined from the citizen and from the subject.**

https://books.google.fi/books?id=ZqroV-TkIhgC&lpg=PP1&hl=fi&pg=PA110#v=onepage&q&f=false

Security and riches seem particularly important in the account Machiavelli offers. And this is consistent with the advice Machiavelli offers elsewhere, **when he counsels a prince to "inspire his citizens to follow their pursuits quietly, in trade and in agriculture and in every other pursuit of men, so that one person does not fear to adorn his possessions lest they be taken away from him, and another to open up a trade for fear of taxes**" (*P* 21). This is a far cry from the classical view that trade and commerce are unworthy of the attention of a gentleman, and that human fulfillment is to be found in participation in the life of the *polis*. The refocusing of political life on the concerns of prosperity, commerce, and trade is distinctly modern, at least as far as theory is concerned. **As Hume notes in one of his earliest essays, "trade was never esteemed an affair of state until the last century; and there scarcely is any ancient writer on politics, who has made mention of it"** (*EMPL* 88).

https://www.ourcivilisation.com/smartboard/shop/bruyere/chap6.htm

7. If the financier's venture should fail, the courtiers will say of him: *'He's a bourgeois, a low fellow, a lout';* **if it should succeed, they'll ask for his daughter's hand.**

https://archive.org/details/bim_early-english-books-1641-1700_deism-examind-and-_earbery-matthias_1697/page/n25/mode/2up?view=theater

But nothing is more fatal to a *Commonwealth* than too much of what you call *Revealed Religion*, which is the Mother of Seditions and Tumults, and a great Enemy to a free Trade. And truly, this (I hope I speak to a Friend) makes me very much wish we would see a *Commonwealth* in *England*, that we might enjoy the liberty of thinking and speaking of Religion as we pleas'd, which now is too much restrain'd. And my Author tells you, *That the Grand Design of his Book was to plead for such a liberty*.
...

I must confess, as for what you say, that Religion is an Enemy to Free Trade, is partly true, because it takes away from Trade, the freedom of lying, and cheating, and defrauding, which some perhaps think essential to it: **But if you Gentlemen desire a *Commonwealth*, that you may barter away our Religion for a Free Trade, I say, pray God bless the *Monarchy* of *England*.**

https://books.google.fi/books?id=ZqroV-TkIhgC&lpg=PP1&hl=fi&pg=PA88#v=onepage&q&f=false

If we are today ill informed concerning the events that took place at Ramillies, Oudenarde, Lille, and Malplaquet in the brief time span of years stretching from 1706 to 1709, it is because we have become accustomed resolutely to avert our gaze from the fundamental realities of political life.
...

And yet Winston Churchill was surely right when he observed that **"battles are the principal milestones in secular history," when he rejected "modern opinion," which "resents this uninspiring truth,"** and

when he criticized “historians” who so “often treat the decisions in the field as incidents in the dramas of politics and diplomacy.” **“Great battles,” he insisted, whether “won or lost, change the entire course of events, create new standards of values, new moods, new atmospheres, in armies and in nations, to which all must conform.”**3
…

Marlborough’s victories were made possible by credit. The United Provinces had learned from the city-states of Renaissance Italy a secret at the heart of modern statecraft – the manner in which a national debt can be a national blessing for a commercial republic intent on the projection of power and able to borrow from its own citizens – and their English allies in the age of William III had capitalized on the discovery made by the compatriots of their Dutch king.6
…

“If I were able to speak to you,” he writes on 9 April 1513 to his friend Francesco Vettori (*O* 1131), “I would be unable to to refrain from filling your head with castles in the air (*castelluci*) because Fortune has brought it about that, since I do not know how to reason about either the silk or the wool trade, either gains or losses, it is necessary that I reason concerning the matters of state (*stato*).” Though he was born in a commune of tradesmen, Machiavelli dedicated his attention primarily to ancient polities governed by warriors and farmers. **He was sensitive to the fact that his beloved Romans had financed their wars by enslaving the conquered and confiscating their land, and he recognized that changes in the *ius gentium* ruled out the implementation of such a policy in Christian Europe.**8 **But he nowhere explained how to pay for modern wars. Repeatedly he denied that money is “the sinews of war”** (*D* 2.10, *AW* 7.178-9).

>
> And yet have I not spoken at all of the condition of captive slaves, than the which nothing was more miserable in the ancient wars. Free born men, noble men, children, women, all whatsoever they were did the conqueror carry away. And who knows whether they were led into perpetual servitude or not? **And truly the same such a miserable kind of slavery, as I have to cause to rejoice that not so much as the resemblance of any such has heretofore been, neither at this time is in Christendom. The Turks indeed do practice it; and there is no other thing that makes that Scythian sovereignty more odious and terrible unto us.**

…

By 1710, however, **when it had become clear to all concerned that Louis XIV’s martial France – modeled, as it was, on imperial Rome – could not withstand the modern Carthage on the other side of the English Channel,** the cause of classical antiquity had worn rather thin. To discerning men, such as Hume, Montesquieu, and Franklin, the obsession with Roman greatness that had preoccupied Machiavelli seemed more and more an anachronism, and astute observers came to believe that one cannot reason concerning matters of state without studying the silk and wool trades, profit, and loss.9

https://archive.org/details/in.ernet.dli.2015.503389/page/n123/mode/2up?view=theater

At this point “Political Economy” came in, a materialistic science – founded about 1770 by Adam Smith in association with Hartley, Priestley, Mandeville, and Bentham – **that had the presumption to regard men as appurtenances of the economic situation**2 **and to “explain” history in the light of prices, markets, and goods.**
…

The whole history of the formative passions and the creative characters of strong personalities and races is ignored – the will, focused on commanding and ruling, on power and booty; the inventive urge, hatred, revenge, pride in personal strength and its successes; and equally, on the other side, jealousy, laziness, the poisonous emotions of the inferior. And there remain nothing but the “laws” of money and prices, which find expression in statistics and graphs.

https://www.marxists.org/archive/plekhanov/1889/champ/pt02.htm

The change in the type of the French bourgeoisie takes place slowly. The burgher during the Regency is not the burgher of the time of Louis XI, but generally speaking, they both conform to the type of the old regime bourgeois. **He has become richer, more educated, more exacting, but he has not ceased to be a roturier, obliged always and everywhere, to give way to the aristocracy. But then comes 1789 and the bourgeois raises his head proudly.** A few years more and he becomes the master.

>
> “You’ve got that eternal idiotic idea that if anarchy came it would come from the poor. Why should it? The poor have been rebels, but they have never been anarchists: they have more interest than anyone else in there being some decent government. **The poor man really has a stake in the country. The rich man hasn’t; he can go away to New Guinea in a yacht. The poor have sometimes objected to being governed badly; the rich have always objected to being governed at all. Aristocrats were always anarchists.**”

https://archive.org/details/humanalltohuman033380mbp/page/n305/mode/2up?view=theater

479. Wealth As the Origin of a Nobility of Race.—**Wealth necessarily creates an aristocracy of race, for it permits the choice of the most beautiful women and the engagement of the best teachers;** it allows a man cleanliness, time for physical exercises, and, above all, immunity from dulling physical labour.
…

In this connection, however, **it must be remembered that wealth produces almost the same effects whether one have three hundred or thirty thousand thalers a year;** there is no further essential progression of the favourable conditions afterwards.

https://archive.org/details/dawnofday029675mbp/page/n215/mode/2up?view=theater

Now, however, that [the Jews] unavoidably inter-marry more and more year after year with the noblest blood of Europe, they will soon have a considerable heritage of good intellectual and physical manners, so that in another hundred years they will have a sufficiently noble aspect not to render themselves, as masters, ridiculous to those whom they will have subdued.

http://attalus.org/translate/valerius2b.html#c9

[9.5] M. Antonius and L. Flaccus removed Duronius from the senate, because he had abrogated a law, whereby the costs of banquets were limited – and they had very good reason for so doing. For how impudently did Duronius on the rostra utter these words! **"There are bridles put into your mouths, most worthy senators, by no means to be endured. You are bound and constrained in the bitter shackles of servitude. For there is a law made, that you ought to be frugal. Let us abrogate therefore that edict, so deformed with the rust of nasty antiquity. For what need is there of liberty, if they that wish to ruin themselves with luxury, may not do so?" [abrogemus igitur istud horridae vetustatis rubigine obsitum imperium: etenim quid opus libertate, si volentibus luxu perire non licet?]**

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D2%3Asection%3D69

On the other hand, **they who consider themselves wealthy, honoured, the favourites of fortune, do not wish even to be put under obligations by our kind services. Why, they actually think that they have conferred a favour by accepting one, however great;** and they even suspect that a claim is thereby set up against them or that something is expected in return. Nay more, **it is bitter as death to them to have accepted a patron or to be called clients.**

[70] Your man of slender means, on the other hand, feels that whatever is done for him is done out of regard for himself and not for his outward circumstances. **Hence[1] he strives to show himself grateful not only to the one who has obliged him in the past but also to those from whom he expects similar favours in the future—and he needs the help of many;** and his own service, if he happens to render any in return, he does not exaggerate, but he actually depreciates it.

https://books.google.fi/books?id=INcgAwAAQBAJ&lpg=PP1&hl=fi&pg=PA390#v=onepage&q&f=false

Machiavelli begins by observing that men are only "good" – by which he means orderly and disciplined, and therefore able to acquire power – through being subjected to some external compulsion (necessity, fear, danger, the hostility of Fortuna [1.3]). Freedom without the stimulus of compulsion degenerates into the disorder and confusion produced by too much ease, comfort, and the relaxation of vigor.

https://books.google.fi/books?id=kotPYEqx7kMC&lpg=PP1&hl=fi&pg=PA179#v=onepage&q&f=false

From the moment when the machine first made its appearance it was clear to all thinking people that the need for human drudgery, and therefore to great extent for human inequality, had disappeared. If the machine were used deliberately for that end, hunger, overwork, dirt, illiteracy, and disease could be eliminated within a few generations.
…

For if leisure and security were enjoyed by all alike, the great mass of human beings who are normally stupefied by poverty would become literate and would learn to think for themselves; and when once they had done this, they would sooner or later realize that the privileged minority had no function, and they would sweep it away. **In the long run, a hierarchical society was only possible on a basis of poverty and ignorance.**
…

> War is a way of shattering to pieces, or pouring into the stratosphere, or sinking in the depths of the sea, materials which might otherwise be used to make the masses too comfortable, and hence, in the long run, too intelligent.

http://robertlstephens.com/essays/shafarevich/001SocialistPhenomenon.html#pagestart_173

> **"If knowledge is encouraged and not nipped in the bud, it will increase, and when it will have increased, it will become impossible to rule the land."** (84: p. 182) "If the eloquent and the intelligent are valued, if vagrant scholars are brought into the service of the state, if a man becomes well known thanks to his learning and personal glory, then ways are open in the land to the unrighteous. If these three kinds of persons are not checked in their path, it will be impossible to engage the people in war." (84: p. 224) **And Shang Yang warns darkly: "The people in the whole country have changed, they have taken to eloquence and find pleasure in study; they have started to engage in various crafts and trade; they have begun to neglect agriculture and war. If this trend continues, the hour of death is near for the land."** (84: p. 152) In olden times, he says, things were not this way: "The gifted were of no use and the ungifted could do no harm. Therefore, **the art of ruling well consists precisely in the ability of removing the clever and the gifted.**" (84: p. 231) Finally, this idea is expressed in its most naked form: "If the people are stupid, they can be easily governed." (84: p. 237)

https://www.gutenberg.org/files/15700/15700-h/15700-h.htm#THOUGHTS **[December, 1791]**

This [French] system has very many partisans in every country in Europe, but particularly in England, where they are already formed into a body, comprehending most of the Dissenters of the three leading denominations. To these are readily aggregated all who are Dissenters in character, temper, and disposition, though not belonging to any of their congregations: that is, all the restless people who resemble them, of all ranks and all parties,—Whigs, and even Tories; **the whole race of half-bred speculators; all the Atheists, Deists, and Socinians; all those who hate the clergy and envy the nobility; a good many among the moneyed people; the East Indians almost to a man, who cannot bear to find that their present importance does not bear a proportion to their wealth.**
…

Formerly, few, except the ambitious great or the desperate and indigent, were to be feared as instruments in revolutions. What has happened in France teaches us, with many other things, that there are more causes than have commonly been taken into our consideration, by which government may be subverted. **The moneyed men, merchants, principal tradesmen, and men of letters (hitherto generally thought the peaceable and even timid part of society) are the chief actors in the French Revolution.** But the fact is, that, as money increases and circulates, and as the circulation of news in politics and letters becomes more and more diffused, the persons who diffuse this money and this intelligence become more and more important. This was not long undiscovered. Views of ambition were in France, for the first time, presented to these classes of men: objects in the state, in the army, in the system of civil offices of every kind. Their eyes were dazzled with this new prospect.

https://cooperative-individualism.org/marx-karl_on-the-question-of-free-trade-1848.htm

But, in general, **the protective system of our day is conservative, while the free trade system is destructive.** It breaks up old nationalities and pushes the antagonism of the proletariat and the bourgeoisie to the extreme point.

https://www.marxists.org/archive/marx/works/1852/18th-brumaire/ch03.htm

Under the Bourbons, big landed property had governed, with its priests and lackeys; under Orleans, high finance, large-scale industry, large-scale trade, **that is, capital, with its retinue of lawyers, professors, and smooth-tongued orators.** The Legitimate Monarchy was merely the political expression of the hereditary rule of the lords of the soil, as the July Monarchy was only the political expression of the usurped rule of the bourgeois parvenus.
…

We speak of two interests of the bourgeoisie, for large landed property, despite its feudal coquetry and pride of race, has been rendered thoroughly bourgeois by the development of modern society. **Thus the Tories in England long imagined that they were enthusiastic about monarchy, the church, and the beauties of the old English Constitution, until the day of danger wrung from them the confession that they are enthusiastic only about ground rent.**

https://archive.org/details/cu31924022322527/page/n305/mode/2up?view=theater

> 'Twas otherwise after the Thirty Years War: the nobles found no nation left, to which to feel their kinship; the great monarchic powers shifted from the stricter seat of Germany towards the Slavic east: degenerate Slavs,

> decadent Germans, form the soil of the eighteenth century's history, **a soil to which the Jew might confidently migrate from a Poland and a Hungary sucked dry, since even prince and noble durst no longer be ashamed of doing business with him; for—Pride itself had just been pledged already, exchanged for vanity and greed.**
>

>
> Drumont answered: “The real nobles of days of yore who defended their native land, and used their elbows to prevent the stranger usurping the place belonging to the sons of France; who disturbed the order of battle, so as to be the first to charge, are no more; one may look in vain for them among their descendants.
> …
>
> “**The descendants of those dapper nobles of old are now for the most part on terms of intimacy with all the Mardochée, and all the Jews in creation.**

http://nietzsche.holtof.com/Nietzsche_various/homers_competition.htm

I cannot help seeing in the prevailing international movements of the present day, and the simultaneous promulgation of universal suffrage, the effects of the fear of war above everything else, **yea I behold behind these movements, those truly international homeless money-hermits, as the really alarmed, who, with their natural lack of the state-instinct, have learnt to abuse politics as a means of the Exchange, and state and society as an apparatus for their enrichment.** Against the deviation of the state-tendency into a money-tendency, to be feared from this side, the only remedy is war and once again war, in the emotions of which this at least becomes obvious, that the state is not founded upon the fear of the war-demon, as a protective institution for egoistic individuals, but in love to fatherland and prince, it produces an ethical impulse, indicative of a much higher destiny. If I therefore designate as a dangerous and characteristic sign of the present political situation the application of revolutionary thought in the service of a selfish state-less money-aristocracy, **if at the same time I conceive of the enormous dissemination of liberal optimism as the result of modern financial affairs fallen into strange hands,** and if I imagine all evils of social conditions together with the necessary decay of the arts to have either germinated from that root or grown together with it, one will have to pardon my occasionally chanting a pæan on war.

https://www.marxists.org/archive/plekhanov/1889/champ/pt04.htm

Peter had laid the foundation of that industry in Russia. **At the beginning, and perfectly in keeping with the character of its origin, this industry was perfectly subordinate and ancillary to the state.** It was feudally bound, like every other social force in Russia, to serve the state. It maintained itself by the serf labour of peasants enlisted for work in the factories and works.
…

During the 28 years since February 19, 1861, Russian industry has so rapidly forged ahead that its relations to the state have altered quite substantially. **At one time perfectly *subordinate to the state*, it now strives to *subordinate the state to itself*,** to place it at its own service. In one of the petitions which they almost annually present to the government, the merchants of the Nizhny Novgorod Fair naively call the finance ministry the organ of the estate of trade and industry. **Businessmen who formerly could not take a step without directions from the government now demand that the Government shall follow *their* directions.** Thus, as regards Russian economic development, absolutism has already said its piece. Far from being needed by our industry, state tutelage was even *harmful* to it. The time is not far off when our “estate of trade and industry,” convinced by experience that timid remonstrations are useless, **will be forced to remind tsarism in a sterner and severer tone that tempora mutantur et nos mutamur in illis.**[1]

https://archive.org/details/sinsfatheraroma00dixogoog/page/207/mode/2up?view=theater **[Published March, 1912]**

A new and far more dangerous order of Scalawags has arisen—the man who boldly preaches the omnipotence of the dollar and weighs every policy of state or society by one standard only, will it pay in dollars and cents? And so you frown on any discussion of the tragic problem the negro's continued pressure on Southern society involves because it disturbs business.
…

The Carpetbagger has come back to the South. **This time he is not a low adventurer seeking coin and public office. He is a philanthropist who carries hundreds of millions of dollars to be distributed to the 'right' men who will teach Southern boys and girls the 'right' ideas.** So far as these 'right' ideas touch the negro, they mean the ultimate complete acceptance of the black man as a social equal.

https://www.gutenberg.org/cache/epub/1232/pg1232-images.html#chap17

> **Nevertheless a prince ought to inspire fear in such a way that, if he does not win love, he avoids hatred; because he can endure very well being feared whilst he is not hated, which will always be as long as he abstains from the property of his citizens and subjects and from their women.** But when it is necessary for him to proceed against the life of someone, he must do it on proper justification and for manifest cause, **but above all things he must keep his hands off the property of others, because men more quickly forget the death of their father than the loss of their patrimony.**

https://en.wikipedia.org/wiki/Mess_of_pottage

> The Hindu nationalist V. D. Savarkar borrowed the phrase, along with quotations from Shakespeare, for his pamphlet
> Hindutva (1923), which celebrated Hindu culture and identity, **asking whether Indians were willing to 'disown their seed, forswear their fathers and sell their birthright for a mess of pottage'.**

https://www.panarchy.org/schumpeter/imperialism.html **[1919]**

Because the sovereign needed soldiers, the modern bourgeois – at least in his slogans – is an even more vehement advocate of an increasing population. **Because the sovereign was in a position to exploit conquests, needed them to be a victorious warlord, the bourgeoisie thirsts for national glory – even in France, worshiping a headless body, as it were.** Because the sovereign found a large gold hoard useful, the bourgeoisie even today cannot be swerved from its bullionist prejudices. Because the autocratic state paid attention to the trader and manufacturer chiefly as the most important sources of taxes and credits, today even the intellectual who has not a shred of property looks on international commerce, not from the viewpoint of the consumer, but from that of the trader and exporter. Because pugnacious sovereigns stood in constant fear of attack by their equally pugnacious neighbours, the modern bourgeois attributes aggressive designs to neighbouring peoples. **All such modes of thought are essentially non-capitalist. Indeed, they vanish most quickly wherever capitalism fully prevails.**

https://mondopolitico.com/library/meinkampf/v1c5.htm

As A YOUNG SCAMP in my wild years, **nothing had so grieved me as having been born at a time which obviously erected its Halls of Fame only to shopkeepers and government officials.** The waves of historic events seemed to have grown so smooth that the future really seemed to belong only to the 'peaceful contest of nations'; in other words, **a cozy mutual swindling match with the exclusion of violent methods of defense.** The various nations began to be more and more like private citizens who cut the ground from under one another's feet, stealing each other's customers and orders, trying in every way to get ahead of one another, and staging this whole act amid a hue and cry as loud as it is harmless. This development seemed not only to endure but was expected in time (as was universally recommended) **to remodel the whole world into one big department store in whose vestibules the busts of the shrewdest profiteers and the most lamblike administrative officials would be garnered for all eternity.** The English could supply the merchants, the Germans the administrative officials, and the Jews no doubt would have to sacrifice themselves to being the owners, since by their own admission they never make any money, but always 'pay,' and, besides, speak the most languages.

Why couldn't I have been born a hundred years earlier? Say at the time of the Wars of Liberation when a man, even without a 'business,' was really worth something?!

> **Neither Mirabeau, Talleyrand, Metternich, nor Wellington understood anything about economics. Undoubtedly they found pretexts in it – but how much worse if, in their place, an economic expert had tried to dictate politics!**

https://archive.org/details/chapoutot-johann-the-law-of-blood-thinking-and-acting-as-ns-2018/page/77/mode/2up?view=theater

On November 28, 1940, from a highly symbolic position on the dais of the Palais-Bourbon, Alfred Rosenberg delivered a speech to the former Chamber of Deputies of the defunct French Republic, in German-occupied Paris. Standing before walls hung with Nazi flags, he drove the last nails into the coffin of the French Revolution, **and affirmed that the war still raging around them, now against England alone, was a "global struggle between gold and blood": against the gold of Judaized British plutocrats, but also against gold as a financial instrument—as a quantitative, democratic, universal equalizer that dissolved all hierarchies, especially those of race and blood.**52

https://www.counter-currents.com/2013/05/eugenics-versus-race/#comment-36537

It seems that the text of William Pierce's article, "Whither America: Elitism or Racism?" isn't online. I should prepare it for republication later this month. Pierce opposed the "elitism" of those who judge people by their socioeconomic status rather than race. Such "elitists" seem to prefer Brazilian-style social stratification (provided that they're in the upper classes) to an organic White society. **These parvenus may think that they're clever—they may pride themselves on the cleverness with which they acquire and use money and power—but they are Nietzsche's "Last Men" rather than Yockey's "men of race." The mere vision of a Judaized, multi-racial cesspool in which one sinks or swims according to the amount of money one can make is disgusting.**

https://archive.org/details/OurCauseByDr.WilliamLutherPierce1976

You may think of that kid as an extreme liberal case, but he is really no different than the average —and I mean the average—businessman in this country. He used to be a segregationist a few years ago, but he became an integrationist when the Blacks started rioting and burning things in the late 1960′s. After all, riots are bad for business.

> In a letter to Marx on the 9th May 1851 Engels speaks of the democratic Red and Communistic mob, and on the 11th December 1851 writes to him: **"What is the rabble good for if it forgets how to fight?"**

https://counter-currents.com/2017/09/between-capital-archaic-socialism/

All prejudices are combated except one: the prejudice of fiscal power. That is to say, nobody should face any barrier other than the barrier of money; and nobody should be excluded from any club, from buying any house, from doing anything he or she wants to do, so long as they have the financial means to do it. If they do not have the financial means to join the club, then their entitlement is withdrawn. Money is everything.

>
> Where will it end? **In the destruction of all other command for the benefit of one alone—that of the state. In each man's absolute freedom from every family and social authority, a freedom the price of which is complete submission to the state. In the complete equality as between themselves of all citizens, paid for by their equal abasement before the power of their absolute master—the state. In the disappearance of every constraint which does not emanate from the state, and in the denial of every pre-eminence which is not approved by the state.** In a word, it ends in the atomization of society, and in the rupture of every private tie linking man and man, whose only bond is now their common bondage to the state. The extremes of individualism and socialism meet: that was their predestined course.

> 'This fellow, scourged by the triumvir's whip until
> That officer was wearied,
> Sets plough to a thousand Falernian acres,
> His mules scour the Appian Way,
> And ignoring Otho's ruling the great man sits,

Right there in the knights' front row!
What's the point of sending out so many sharp-prowed,
So many heavyweight, warships,
Against the pirates and servile hordes, if this,
***This*, ends up a soldiers' tribune?**'

https://en.wikipedia.org/wiki/Trimalchio

Trimalchio is an arrogant former slave who has become quite wealthy by tactics that most would find distasteful. The name "Trimalchio" is formed from the Greek prefix τριϛ and the Semitic מלך (melech) in its occidental form Malchio or Malchus.[1]

https://en.wikisource.org/wiki/Juvenal_and_Persius/The_Satires_of_Juvenal/Satire_1

[The patron] then bids the crier call up the Trojan-blooded nobles—for they too besiege the door as well as we: "The Praetor first," says he, "and after him the Tribune." "But I was here first," says a freedman who stops the way; "why should I be afraid, or hesitate to keep my place? **Though born on the Euphrates—a fact which the little windows in my ears would testify though I myself denied it—yet I am the owner of five shops which bring me in four hundred thousand sesterces.** [25] **What better thing does the Broad Purple**[26] **bestow if a Corvinus**[27] **herds sheep for daily wage in the Laurentian country, while I possess more property than either a Pallas or a Licinus?**"[28] **So let the Tribunes await their turn; let money carry the day; [uincant diuitiae] let the sacred office**[29] **give way to one who came but yesterday with whitened**[30] **feet into our city.** For no deity is held in such reverence amongst us as Wealth; though as yet, O baneful money, thou hast no temple of thine own; not yet have we reared altars to Money in like manner as we worship Peace and Honour, Victory and Virtue, or that Concord[31] that twitters when we salute her nest.

https://archive.org/details/in.ernet.dli.2015.231118/page/n361/mode/2up?view=theater

This banking system had come from Greece and the Greek East, and was mostly in the hands of Greeks and Syrians even in Italy and the West; in Gaul the words for Syrian and banker were synonyms.[49] Interest rates, which had sunk to four per cent under the weight of Augustus' Egyptian spoils, rose to six per cent after his death, and reached their legal maximum of twelve per cent by the age of Constantine.

https://en.wikisource.org/wiki/1911_Encyclopædia_Britannica/Usury

In the course of two or three centuries the small free farmers were utterly destroyed. By the pressure of war and taxes they were all driven into debt, and debt ended practically, if not technically, in slavery. It would be difficult to overestimate the importance of the influence of usury on the social and economic history of the Roman republic. In the provinces the evils of the system reached a much greater height. In 84 B.C. the war tax imposed by Sulla on the province of Asia was at first advanced by Roman capitalists, and rose within fourteen years to six times its original amount. **It is interesting to observe that the old law of debt was not really abolished until the dictatorship of Julius Caesar, who practically adopted the legislation of Solon more than five centuries before; but it was too late then to save the middle class.** About this time the rate of interest on first-class security in the city of Rome was only about 4%, whilst in the provinces from 25 to 50% were rates often exacted. Justinian made the accumulation of arrears (*anatocismus*) illegal, and fixed the rate at 6%, except for mercantile loans, in which the rate received was 8%. On the whole, it was truly said of usury during the republic and early years of the empire: "Sed vetus urbi faenebre malum et sedition um discordiarumque creberrima causa."

https://www.marxists.org/archive/marx/works/1852/18th-brumaire/ch07.htm

But in the course of the nineteenth century the urban usurer replaced the feudal one, the mortgage replaced the feudal obligation, bourgeois capital replaced aristocratic landed property.
…

The army was the "*point d'honneur*" of the small-holding peasants, it was they themselves transformed into heroes, defending their new possessions against the outer world, glorifying their recently won nationhood, plundering and revolutionizing the world. The uniform was their own state costume; war was their poetry; **the small holding, enlarged and rounded off in imagination, was their fatherland, and patriotism the ideal form of the sense of property. But the enemies whom the French peasant now has to defend his property against are not the Cossacks; they are the *huissiers* [bailiffs] and the tax collectors.** The small holding no longer lies in the so-called fatherland but in the registry of mortgages.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/secondary/BURLAT/23*.html#ref46

In this connexion it may be added, though it does not concern the civil law, that the Church happily failed to force upon the State its unpractical policy of prohibiting the lending of money at interest.[49]

https://oll.libertyfund.org/title/tooke-the-whole-duty-of-man-according-to-the-law-of-nature-1673-2003#lf0217_head_056

On the basis of the false ideas that uninformed ecclesiastics had given him on the subject of interest on money loans, a Christian emperor (Basil the Macedonian), not content with reducing interest to an equitable rate, forbade it altogether as an illegal contract, both in its nature and in the light of the rules of the Gospel. Thanks to this vain scruple and this ill-informed piety, he ruined commerce and reduced a multitude of people to wretchedness, with the result that his son and successor, Leon known as the Philosopher—and more of a philosopher in this respect than his father—was forced to constantly raise the defenses and to permit interest, as previously, on a modest scale [see Leon's *Novelle*, LXXXIII].

https://books.google.gr/books?id=qlU37xo9LeUC&lpg=PP1&hl=fi&pg=PA21#v=onepage&q&f=false

Usury was a problem in Byzantium: **although condemned by the Church Fathers, it was an important part of the Byzantine economy.** The number of insolvent debtors was so high that in the late ninth or early tenth century Patriach Euthymios begged Leo VI to free them of their debts.30 Romanos Lakapenos was forced to bow to this demand: the treasury paid all the debts in Constantinople regardless of the social status of insolvent debtors; the vouchers were burned. It was Leo VI's father, Basil I, who has most radically attacked the problem of usury. The collection of interest was prohibited completely – only minors and orphans were allowed to use their money for this purpose.31 Mortgages were also restricted: the mortgage debt was to be repaid partially in produce. In addition, Basil's lawbook, the *Epanagoge*, prohibited the peasant from mortgaging his field. Basil's legislation failed. **His son and heir, Leo, abolished the law because, he wrote, it badly afflicted the economy of the whole country. Leo, however, established the legal ceiling on interest at 5.5 %.**32

https://books.google.fi/books?id=GTDUdVXjNHsC&lpg=PP1&hl=fi&pg=PA13#v=onepage&q&f=false

Roman law, in its recognition of the irrepressible human urge to truck and barter, foreshadowed modern law. Medieval clerics, the main students of the classical Roman texts rediscovered in Bologna in about 1100 A.D., had full access to Roman law regulation of business practices and virtually any other subjects that had ever intrigued Roman jurists.

Roman law sharply distinguished and categorized loan transactions based upon whether a lender's purpose was essentially altruistic or selfish;8 each loan category contained distinct liability rules that have survived in many civil-law systems.9 **Roman tolerance of profitseeking was evident in Roman imperial rulings that authorized lenders to charge their borrowers a reasonable rate of interest.**10 **Yet, on the issue of profitseeking, the Church fathers, despite guidance offered by Christian and pagan emperors,**11 **preferred an outright ban. As if to make this financial policy odder still, the medieval Church engaged in a program of "do as I say, not as I do."** At any historical moment, the Church selectively condemned some usurers, defended certain usurious transactions by means of elaborate casuistry, and itself engaged in lending at interest.12

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D2%3Asection%3D89

[89] To this class of comparisons belongs that famous saying of old Cato's: **when he was asked what was the most profitable feature of an estate, he replied: "Raising cattle [pascere] successfully." What next to that? "Raising cattle with fair success." And next? "Raising cattle with but slight success." And fourth? "Raising crops." ["Arare"]** And when his questioner said, "How about money-lending?" Cato replied: "How about murder?"

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D2%3Asection%3D72

Gaius Gracchus inaugurated largesses of grain on an extensive scale; this had a tendency to exhaust the exchequer. **Marcus Octavius inaugurated a moderate dole; this was both practicable for the state and necessary for the commons; it was, therefore, a blessing both to the citizens and to the state.** [73] The man in an administrative office, however, must[1] make it his first care that everyone shall have what belongs to him and that private citizens suffer no invasion of their property rights by act of the state. It was a ruinous policy that Philippus proposed when in his tribuneship he introduced his agrarian bill. However, when his law was rejected, he took his defeat with good grace and displayed extraordinary moderation. But in his public speeches on the measure he often played the demagogue, and that time viciously, **when he said that "there were not in the state two thousand people who owned any property." [rem] That speech deserves unqualified condemnation, [capitalis] for**

it favoured an equal distribution of property; and what more ruinous policy than that could be conceived? For the chief purpose in the establishment of constitutional state and municipal governments was that individual property rights might be secured. For, although it was by Nature's guidance that men were drawn together into communities, it was in the hope of safeguarding their possessions that they sought the protection of cities. [Hanc enim ob causam maxime, ut sua tenerentur, res publicae civitatesque constitutae sunt. Nam, etsi duce natura congregabantur homines, tamen spe custodiae rerum suarum urbium praesidia quaerebant.]

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D1%3Asection%3D151

Trade, if it is on a small scale, is to be considered vulgar; but if wholesale and on a large scale, importing large quantities from all parts of the world and distributing to many without misrepresentation, it is not to be greatly disparaged. Nay, it even seems to deserve the highest respect, [videtur iure optimo posse laudari] if those who are engaged in it, satiated, or rather, I should say, satisfied with the fortunes they have made, make their way from the port to a country estate, as they have often made it from the sea into port.

---

If we place ourselves back to the time when the plebs had increased and entered the body politic, and compare the law of this epoch with primitive law, grave changes appear at the first glance. **The first and most salient is, that the law has been rendered public, and is known to all. It is no longer that sacred and mysterious chant which men repeated, with pious respect, from age to age;** which priests alone wrote, and which men of the religious families alone could know.
...

Formerly the law was a religious decision; it passed for a revelation made by the gods to the ancestors, to the divine founder, to the sacred kings, to the magistrate-priests. In the new code, on the contrary, the legislator no longer speaks in the name of the gods. The decemvirs of Rome receive their powers from the people. The people also invested Solon with the right to make laws. The legislator, therefore, no longer represents religious tradition, but the popular will. The principle of the law, henceforth, is the interest of men, and its foundation, the consent of the greatest number.

Two consequences flow from this fact. The first is, that the law is no longer presented as an immutable and undisputable formula. As it becomes a human work, it is acknowledged to be subject to change. The Twelve Tables say, **"What the votes of the people have ordained in the last instance is the law."**1 **[quodcumque postremum populus iussisset, id ius ratumque esset]**

Of all the passages of this code that remain to us, there is not one more important than this, or one which better marks the character of the revolution that had then taken place in the law. **The law was no longer a sacred tradition – *mos*; it was simply a text – *lex*; and as the will of men had made it, the same will could change it.**
...

The Twelve Tables, as we have seen above, were written in the midst of social changes; patricians made them, but they were made upon the demand of the plebs, and for their use. This legislation, therefore, is no longer the primitive law of Rome; neither is it pretorian law; it is a transition between the two.

Here, then, are the points in which it does not yet deviate from the antique law: it maintains the power of the father; it allows him to pass judgment upon his son, to condemn him to death, or to sell him. While the father lives, the son never reaches his majority. As to the law of succession, this also follows the ancient rules: **the inheritance passes to the agnates, and in default of agnates, to the *gentiles*. As to the cognates, that is to say, those related through females, the law does not yet recognize them.** They do not inherit from each other; the mother does not succeed to the son, nor the son to the mother.1
...

The following points are those on which this legislation deviates from primitive law: –

It formally admits that the patrimony may be divided among the brothers, since it grants the *actio familiæ erciscundæ*.2

It declares that the father cannot sell his son more than three times, and that after the third sale, the son shall be free.1 **This is the first blow struck by Roman law at the paternal authority.**

Another change still more important was that which gave a man the right to transmit his property by will. Before this period the son was a *self-successor and a necessary*: in default of sons, the nearest agnate inherited; in default of agnates, the property returned to the gens, a trace of the time when the gens, still undivided, was sole proprietor of the domain, which afterwards had been divided. **The Twelve Tables threw aside those old principles; they treated property as belonging, not to the gens, but to the individual; they therefore recognized in man the right of disposing of his property by will.**

Still the will was not entirely unknown in primitive law. Even then a man might choose a legatee outside the gens, but on the condition that his choice should be ratified by the assembly of the curies; **so that nothing less than the entire city could change the order which religion had formerly established.** The new legislation freed the will from this vexatious rule, and gave it a more convenient form – that of a pretended sale. **The man feigned to sell his property to the one whom he had chosen as heir; in reality, he made a will;** in this case he had no need of appearing before the assembly of the people.
…

Ancient rules and formalities had only been applicable and were still applied only to religious families; but new rules and new methods of procedure were prepared which were applicable to the plebeians.
…

Finally, the pretor, continuing to advance in the road which the Twelve Tables had opened, traced out, by the side of the ancient law, an entirely new system, which religion did not dictate, and which approached continually nearer to the law of nature.

https://archive.org/details/romanlawinmoder01shergoog/page/n71/mode/2up?view=theater

What changed Roman law from a local rigid formal law into a world-wide rational formless jurisprudence? The answer is: the growth of foreign trade and commerce, the legal problems of which were solved by the praetor's application of the rules of the law of nations (*Jus gentium*). With the increasing territorial conquests of Rome, foreign commerce developed enormously. Foreigners flocked in great numbers to Rome. Legal transactions arose in large volume. Two centuries after the XII Tables, in the year 242 B.C.,21 a special praetor to dispense justice to foreigners was created—the praetor peregrinus.

> https://en.wikipedia.org/wiki/Sicilia_(Roman_province)#History
>
> Previous Roman conquests in Italy had resulted in direct annexation or asymmetric treaties with Rome as hegemonic power. **These treaties guaranteed substantial internal autonomy to the socii: they were required to contribute troops when requested but not to pay any form of tribute.** [17] Probably because of the island's complex mixture of ethnicities and perhaps also in order to recoup the expenses sustained during the war through a system of fiscal control, which excluded the concession of broad autonomy, **Sicily came to be defined by a different institutional system.** [18]
>
> https://en.wikisource.org/wiki/Against_Verres/Second_pleading/Book_2
>
> For as you ought to have a careful regard for all the allies and provinces, so especially ought you to have a regard for Sicily, O judges, for many, and those the greatest, reasons:—First, because of all foreign nations Sicily was the first who joined herself to the friendship and alliance of the Roman people. **She was the first to be called a province; and the provinces are a great ornament to the empire. She was the first who taught our ancestors how glorious a thing it was to rule over foreign nations.**

…

With the advent of the praetor peregrinus began that equitable praetorian adjunct to the Civil Law23 which was known as the jus gentium **or Roman law for foreigners and subjects not citizens.**

> 23. **The Romans meant by "civil law" the jus civile or law for citizens only, never "private law" as in modern legal phraseology.**

The Roman source of this jus gentium was the law made by the magistrates or jus honorarium. **Practically the whole of the newer equitable law was to be found only in the magisterial law,** and the only way it could be enforced was through the medium of legal procedure—by granting or refusing a right of action or a right of defense.

Roman law now began to develop along parallel lines. There was *the old law* for citizens—the *jus civile*. There was *the new law* for non-citizens (foreigners and subjects)—the *jus gentium*. **The jus civile was composed of statutes and customs having the force of law.** It was largely legislative law. The jus gentium was law made by magistrates, who drew partly on the jus civile and very largely on those rules of law common to all nations, particularly the neighboring Greeks, as the sources of their inspiration. **It was a body of rules which the Roman praetor thought worthy to govern the intercourse of Roman citizens with the members of all, originally independent but now subject, foreign nations.**24 Occasionally, however, the Romans use the term jus gentium in its modern sense of the "law of nations," that is, "international law."

These two systems of law—*jus civile* and *jus gentium*—continued down through the Later Republic into the Empire, **when finally the older jus civile became fused with the jus gentium losing in the refining process all its local narrowness and formal strength.** The combined product became the jurisprudence of a world,—a universal and no longer a local law.
...

This process of secularizing the law, which began in the 4th century B.C. when the actions furnished by statute (*legis actiones*) were divulged,25 was given an enormous impetus in the 3d century26 B.C. by the first plebeian pontifex maximus Tiberius Coruncanius, who was the first to give *public consultations* to persons needing legal advice. By the 1st century B.C. men giving legal advice and answering legal questions were called jurisconsults (*jurisconsulti*, skilled in the law), **and the lawyer had long since ceased to be a priest.** Moreover, the lawyer's practice soon became the stepping stone to the highest offices of the Roman State.

https://archive.org/details/newscienceofgiam030174mbp/page/n69/mode/2up?view=theater

[Publilian Law. Year of the world 3658, of Rome 416.]

104 This law was put into effect in the 416th year of Rome, and contains a most important point of Roman history, for by this law the Roman commonwealth declared its change from an aristocratic to a popular form of government; whence Publilius Philo, who was its author, was called the "people's dictator."
...

But on the basis of the two aforesaid laws, **the plebs finally reached the point where they could make universal laws [binding on the nobles as well as on themselves]. To bring this about required factional movements and revolts at Rome, with the result that it was necessary to make Publilius Philo dictator, an office never created save in times of greatest danger to the commonwealth, such as this was.** For it had fallen into such great disorder as to nourish within itself two supreme legislative powers without any distinction of time, scope or territory, with the result that the commonwealth was on the point of collapse. Wherefore Philo, to cure the ills of the state, ordained that whatever the plebs commanded by plebiscites in the assembly by tribes (*comitia tributa*) "should be binding on all the Quirites" (*omnes quirites teneret*), i.e. should be binding on all the people in the assembly by hundreds (*comitia centuriata*) in which "all the Quirites" (*omnes quirites*) met. **(For the Romans called themselves Quirites only in public assembly, and Quiris in the singular is never found in common Latin speech.)** By this formula Philo meant to signify that laws could not be enacted contrary to the plebiscites. The plebs had already been made in all respects equal to the nobles by laws to which the latter had agreed. **By this most recent move, to which the nobles could offer no opposition without bringing the commonwealth to ruin, the plebs had become superior to the nobles, for without ratification by the senate the plebs could enact general laws for all the people. Thus the Roman commonwealth had now naturally become free and popular.** Philo accordingly proclaimed it such by this law, and hence was called the people's dictator.

113 In conformity with this change in its nature, he gave the commonwealth two ordinances, which are contained in the other two sections of the Publilian Law. **In the first this dictator ordained that authorization by the senate, which had been an authorization by the lords whereby what had first been decided by the people "the fathers had afterwards to ratify" (*deinde patres fierent auctores*)**—so that the election of the consuls and the enacting of the laws, being determined in advance by the people, had been [respectively] public testimonials of merit and public demands of right—**should thenceforth be given by the fathers to the people, who were now sovereign and free, prior to the deliberations of the assembly (*in incertum comitiorum eventum*), as [if they, the fathers, were but] the guardians of the people, who were the real lords and masters of the Roman *imperium*.** The people, if they wished to enact laws, were to do so according to the formula presented to them by the senate. If not, they could make use of their sovereign right and "antiquate" the [proposed] laws; that is, declare they wanted no innovation. Thus everything the senate should henceforth ordain concerning public affairs should be [regarded as] instructions given by it to the people or commissions given to it by the people. Finally there remained the census, for, since the treasury had hitherto been the property of the nobles, they alone had been created censors of it. Since, however, by this law the treasury became the property of the people as a whole, Philo ordered in the third place that the censorship, the only magistracy in which the plebs had as yet no share, should also be extended to them.

https://archive.org/details/newscienceofgiam030174mbp/page/n229/mode/2up?view=theater

620 This development gives truth to the tradition that the census of Servius Tullius was the basis of popular liberty, for in it the matter was prepared and from it the occasions were born, as we set forth hypothetically above in the Notes on the Chronological Table, in the passage on the Publilian law. **It was this ordinance, originating in Rome itself, that established the democratic commonwealth there, and not the Law of the Twelve Tables [supposed to have been] brought there from Athens.** Indeed, what Aristotle calls a democratic commonwealth is rendered in Tuscan by Bernardo

Segni as a commonwealth by census, meaning a free popular commonwealth. This is evident even in Livy, for, ignorant as he was of the Roman form of government in those times, he nevertheless states that **the nobles complained that by that law they had lost more in the city than they had gained abroad by force of arms in that year, though it was a year of many great victories.** And for this reason Publilius, the author of the law, was called the people's dictator.

>
> [14] He made his Dictatorship popular by delivering incriminatory harangues against the senate and also by carrying three measures[1] which were directed against the nobility and were most advantageous to the [15] plebs. One was that the decisions of the plebs should be binding on all the Quirites; the second, that measures which were brought before the Assembly of centuries should be sanctioned by the patricians before being finally put to the [16] vote; the third, that since it had come about that both censors could legally be appointed from the plebs, one should in any case be always chosen from that [17] order. **The patricians considered that the consul and the Dictator had done more to injure the State by their domestic policy than to strengthen its power by their successes in the field.**
>
> > 1. These measures practically annihilated the Assembly of Curies as a political power. The first appears to have been a more stringent reenactment of the Valerian and Horatian Law (see Vol. I. p. 201). The second 'abolished the right of the patrician senate to reject a decree of the community as unconstitutional...in so far that it had to bring forward its constitutional objections, if it had any such, when the list of candidates was exhibited or the project of law brought in; which practically amounted to a regular announcement of its consent beforehand' (Mommsen, I. 297).

> [9] In this year also Q. Publilius Philo was elected as the first plebeian praetor against the opposition of the consul Sulpicius; **the senate, after failing to keep the highest posts in their own hands, showed less interest in retaining the praetorship.**

https://books.google.fi/books?id=bVWcAQAAQBAJ&lpg=PP1&hl=fi&pg=PA1239#v=onepage&q&f=false

Quintus Publilius Philo was consul in 339, 327, 320, and 315 BCE, censor in 332, and the first plebeian praetor in 336. He reputedly served on a commission to organize debt relief in 352 and as dictator in 339 passed three laws: (1) one *censor must always be plebeian; (2) the sanction accorded by patrician senators (**patrum auctoritas*) must now be given before the presentation of legislation to the centuriate assembly (thus limiting patrician obstruction); (3) decisions of the plebeian assembly (*plebiscita*; see PLEBISCITUM) were to be binding on the whole people.
...

In 327-6 he besieged Naples (*Neapolis) and through his contacts with philo-Roman elements secured its surrender: the Greek interests attested by his *cognomen* Philo (see NAMES, PERSONAL, ROMAN) **may have assisted here and he triumphed in 326 as the first historical proconsul** (see PRO CONSULE).

https://archive.org/details/in.ernet.dli.2015.231118/page/n55/mode/2up?view=theater

Law was both *lex* and *ius*—command and justice; it was a relation not only between man and man but between man and the gods. Crime was a disturbance of that relation, of the *pax deorum* or peace of the gods; law and punishment were in theory designed to maintain or restore that relation and peace. **The priests declared what was right and wrong (*fas et nefas*), on what days the courts might open and the assemblies meet. All questions regarding marriage or divorce, celibacy or incest, wills or transfers, or the rights of children, required the priest as now so many of them require the lawyer.** Only the priests knew the formulas without which hardly anything could be legally done. They were in Rome the first *iurisconsulti,* consultants in the law, counselors; they were the first to give *responsa,* or legal opinions. The laws were recorded in their books, and these volumes were so securely guarded from the plebs that suspicion charged the priests with altering the texts, on occasion, to suit ecclesiastical or aristocratic ends.

The Twelve Tables effected a double juristic revolution: the publication and secularization of Roman law. Like other codes of the sixth and fifth centuries—those of Charondas, Zaleucus, Lycurgus, Solon—they represented a change from uncertain unwritten custom to definite written law; they were a result of increasing literacy and democracy. **The *ius civile,* or law of citizens, freed itself in these Tables from the *ius divinum,* or divine law; Rome decided not to be a theocracy.** The priestly monopoly was further deflated when the secretary of Appius Claudius the Blind published (304) a calendar of court days (*dies fasti*—"days of utterance"), and a "formulary" of proper legal procedures, which had till then been known to few but the priests. **Secularization took another step when Coruncanius (280) began the first known public instruction in Roman law; from that time onward the lawyer replaced the priest and dominated the mind and life of Rome.**

https://www.perseus.tufts.edu/hopper/text?doc=Perseus:text:1999.04.0104:entry=ti-coruncanius-bio-1

Notwithstanding his provincial extraction, this novus homo was promoted to all the highest offices at Rome. (*Veli*. 2.128.) In B.C. 280, he was consul with P. Valerius Laevinus, and while his colleague was engaged in the commencement of the war against Pyrrhus, the province of Etruria fell to Coruncanius, who was successful in quelling the remains of disaffection, and entirely defeated the Vulsinienses and Vulcientes.
...

About B.C. 254, Coruncanius was created pontifex maximus, and was the first plebeian who ever filled that office (Liv. *Epit*. xviii.), **although, before that time, his brother jurist, P. Sempronius Sophus, and other plebeians, had been pontifices.** (Liv. 10.9.) In B.C. 246, he was appointed dictator for the purpose of holding the comitia, in order to prevent the necessity of recalling either of the consuls from Sicily; and he must have died shortly afterwards, at a very advanced age (Cic. *de Senect*. 6), for, in Liv. *Epit*. xix., Caecilius Metellus is named as pontifex maximus.

Coruncanius was a remarkable man. He lived on terms of strict friendship with M. Curius and other eminent statesmen of his day. He was a Roman sage (*Sapiens*), a character more practical than that of a Grecian philosopher, but he was sufficiently versed in the learning of the times. **That philosophy which placed the highest good in pleasure he rejected, and, with M. Curius, wished that the enemies of Rome, Pyrrhus and the Samnites, could be taught to believe its precepts.** He was a manly orator; his advice and opinion were respected in war as well as in peace, and he had great influence in the senate as well as in the public assembly. (Cic. *de Orat*. 3.33.)
...

There is a passage relating to Coruncanius in Pomponius (*Dig.* 1. tit. 2. s. 8.35). which has given occasion to much controversy. He says that Coruncanius was the first who publicly professed law, since, before his time, jurists endeavoured to conceal the *jus civile*, and gave their time, not to students, but to those who wanted their advice. The statement as to the early concealment of the law has been supposed to be fabulous (Puchta, *Institutionen*, i. p. 301); but here it is proper to distinguish between the rules applicable to ordinary dealings on the one hand, and the technical regulations of the calendar, of procedure and of religious rites, on the other. Schrader (in Hugo's *Civil. Mag*. v. p. 187) assumes that it was usual for jurists before Coruncanius to admit patrician students--those at least who were destined for the college of pontiffs--to learn law by being present at their consultations with their clients. He further thinks that Coruncanius did not profess to give any systematic or peculiar instruction in the theory of law, and certainly there are passages which prove that such theoretic instruction was not common in the time of Cicero. (Cic. *Brut.* 89, *de Amic*. 1, *de Leg*. 1.4, *de Ofi*. 2.13.) **Schrader therefore comes to the conclusion, that Coruncanius first publicly professed law only in this sense, that he was the first to allow *plebeians* and patricians indiscriminately to learn law by attending his consultations.**

https://archive.org/details/in.ernet.dli.2015.41741/page/n81/mode/2up?view=theater

In the period of these struggles, Rome had become a megalopolis of the late-Classical type. **The rustic instincts were more and more pushed back by the intelligence of the city.**1 **Consequently from about 350 we find side by side with the *lex rogata* of the people the *lex data*, the administrative law, of the prætor.** With this the Twelve Tables idea drops out of the contest and it is the prætor's edict that becomes the football of the party battle.

It did not take long for the praetor to become the centre of both legislation and judicial practice. And presently, corresponding to the political extension of the city's power, the jurisdiction of the prætor and the field of his *jus civile*—the law of the citizens—begin to diminish in significance and the peregrin prætor with his *jus gentium*—the law of the alien—steps into the foreground. And when finally the whole population of the Classical world, save the small part possessing Roman citizenship, was comprised in the field of this alien law, **the *jus peregrinum* of the city of Rome became practically an imperial law. All other cities—and even Alpine tribes and migrant Bedouin clans were *civitates* from the administrative point of view—retained their local laws only as supplements, not alternatives, to the peregrin law of Rome.**

It marked the close of Classical law-making, therefore, when Hadrian (about A.D. 130) introduced the *Edictum perpetuum*, which gave final form to the well-established corpus of the annual pronouncements of the prætors and forbade further modifications thereof. **It was still, as before, the prætor's duty to publish the "law of the year,"** but, even though this law had no greater degree of validity than corresponded to his administrative powers and was not the law of the Empire, he was obliged thenceforth to stick to the established text.2 **It is the very symbol of the petrified "Late" Civilization.**3

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D1%3Asection%3D32

Further than this, **who fails to see that those promises are not binding which are extorted by intimidation or which we make when misled by false pretences? Such obligations are annulled in most cases by the praetor's edict in equity,**[3] in some cases by the laws.

> http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D1%3Asection%3D39
>
> [39] 13. Again, **if under stress of circumstances individuals have made any promise to the enemy, they are bound to keep their word even then.** For instance, in the First Punic War, when Regulus was taken prisoner by the Carthaginians, he was sent to Rome on parole to negotiate an exchange of prisoners; he came and, in the first place, it was he that made the motion in the Senate that the prisoners should not be restored; and in the second place, when his relatives and friends would have kept him back, he chose to return to a death by torture rather than prove false to his promise, though given to an enemy.

https://www.ccel.org/g/gibbon/decline/volume2/chap44.htm#praetors

A principle of discretion more congenial to monarchy was introduced into the republic: the art of respecting the name, and eluding the efficacy, of the laws, was improved by successive praetors; subtleties and fictions were invented to defeat the plainest meaning of the Decemvirs, and where the end was salutary, the means were frequently absurd. The secret or probable wish of the dead was suffered to prevail over the order of succession and the forms of testaments; and the claimant, who was excluded from the character of heir, accepted with equal pleasure from an indulgent praetor the possession of the goods of his late kinsman or benefactor. In the redress of private wrongs, compensations and fines were substituted to the obsolete rigor of the Twelve Tables; time and space were annihilated by fanciful suppositions; and the plea of youth, or fraud, or violence, annulled the obligation, or excused the performance, of an inconvenient contract.

>
> {44.} [195] "**Though all the world exclaim against me, I will say what I think: that single little book of the Twelve Tables, if any one look to the fountains and sources of laws, seems to me, assuredly, to surpass the libraries of all the philosophers, both in weight of authority, and in extent of usefulness.**
> …
>
> [197] You will receive also this pleasure and delight from the study of the law, that you will then most readily comprehend how far our ancestors excelled other nations in wisdom, if you compare our laws with those of their Lycurgus, Dracon, and Solon. **It is indeed incredible how undigested and almost ridiculous is all civil law, except our own; on which subject I am accustomed to say much in my daily conversation, when I am praising the wisdom of our countrymen above that of all other men, and especially of the Greeks.** For these reasons have I declared, Scaevola, that the knowledge of the civil law is indispensable to those who would become accomplished orators.

…

It was reserved for the curiosity and learning of Adrian, to accomplish the design which had been conceived by the genius of Caesar; and the praetorship of Salvius Julian, an eminent lawyer, was immortalized by the composition of the PERPETUAL EDICT. This well-digested code was ratified by the emperor and the senate; **the long divorce of law and equity was at length reconciled; and, instead of the Twelve Tables, the Perpetual Edict was fixed as the invariable standard of civil jurisprudence.** (35)

https://archive.org/details/newscienceofgiam030174mbp/page/n337/mode/2up?view=theater

Why did the old jurisprudence practice such rigors in applying the Law of the Twelve Tables? **Why did the middle jurisprudence, by the edicts of the praetors, begin to exercise a benignity of reason while still respecting that Law? Why did the new jurisprudence, without even a pretense of regard for that Law, adopt the generous profession of natural equity?**

>
> **Has he forgotten how strongly the sect enforced the study of morality and of virtue in the first degrees, and how carefully it isolated both from religion?** When pouring forth its encomium on religion, did not the Sect insinuate, that true Religion widely differed from those mysteries and worship which had degenerated in the hands of the priesthood? **Does he**

> **remember with what art and affected respect it spoke of Christ and his Gospel in the degrees of *Major Illuminee*, of *Scotch Knight*, and of *Epopt*; how the Gospel was insensibly metamorphosed into illuminized reason, its morality into that of Nature;** and from a moral, reasonable, and natural religion, how a religion and a morality of the rights of man, of *Equality* and *Liberty*, were deduced?

https://archive.org/details/newscienceofgiam030174mbp/page/n359/mode/2up?view=theater

The Roman plebs, like the Athenian, passed new laws every day for particular occasions, because it was incapable of universals. Sulla, leader of the nobles, when he had defeated Marius, leader of the plebs, repaired the disorder somewhat with the *quaestiones perpetuae* or permanent courts, but, once he had resigned the dictatorship, particular laws began to multiply again no less than before, as Tacitus relates. And, as political writers point out, there is no readier way to arrive at monarchy than through such a multitude of laws. Hence Augustus, for the purpose of establishing it, enacted a, great number of them, and succeeding emperors used the senate above all to issue *senatusconsulta* in the field of private law. Nevertheless, even in these times of popular liberty, the formulae for actions were so strictly guarded that it took all the eloquence of Crassus (whom Cicero called the Roman Demosthenes) to get an expressed pupillary substitution interpreted as containing an unexpressed vulgar or common substitution; and it took all Cicero's eloquence to prevent Sextus Aebutius from keeping a farm of Aulus Caecina's because of the omission of a "d" from the formula. **Finally things reached such a point, when Constantine had done away entirely with the formulae, that every particular motive of equity prevailed over the laws;** so willing are human minds under human governments to recognize natural equity.
…

1003 The Roman gravity and wisdom is much to be admired in this: that, **in these constitutional changes, the praetors and the jurisconsults put forth every effort to insure that the words of the Law of the Twelve Tables should be shifted from their original and proper meanings as little and as slowly as possible.** Perhaps it was principally for this reason that the Roman Empire grew so great and endured so long; for in its changes of constitution it made every effort to stand firm by its principles, which were the same as those of this world of nations, and all political theorists agree that there is no better policy for making a state endure and grow great. Thus the cause which produced among the Romans the wisest jurisprudence in the world (of which we have spoken above) is the same that made the Roman Empire the greatest in the world. **And it is the cause of the Roman greatness which Polybius, in too general a sense, attributes to the religion of the nobles; Machiavelli, on the contrary, to the magnanimity of the plebs; and Plutarch, envious of Roman virtue and wisdom, to their good fortune; this last in his book *De fortuna romanorum*, to which, in other and more indirect ways [than ours], Tasso gave answer in his noble *Risposta*.**

https://archive.org/details/newscienceofgiam030174mbp/page/n347/mode/2up?view=theater

978 The third was that of civil or modest times, **the times of the natural law of nations, which Ulpian, adding the specific epithet human, calls *Jus naturale gentium humanarum*.** Hence the Latin writers under the emperors call the duty of subjects *officium civile*, and every offense against natural equity in the interpretation of the laws is called *incivile*. It is the last sect of times in Roman jurisprudence, beginning with the time of popular liberty. Hence the praetors, to accommodate the laws to the Roman nature, customs and government, which had now suffered change, had first of all to soften the severity and temper the rigidity of the Law of the Twelve Tables, which had been decreed when it was natural in the heroic times of Rome. **And later the emperors had to remove all the veils in which the praetors had cloaked it and reveal natural equity in all the openness and generosity which was appropriate to the gentleness to which the nations had become accustomed.**

https://archive.org/details/romanlawinmoder01shergoog/page/n71/mode/2up?view=theater

Commerce being small at this time and the world moving but slowly, the XII Tables took cognizance of but few juristic acts and these principally relating to land, the chief property of citizens. **After the XII Tables were enacted their contents were worked out for over 300 years by a process of interpretation.**

https://archive.org/details/romanlawinmoder01shergoog/page/n93/mode/2up?view=theater

Under the Republic the praetorian law as well as the jus civile had grown up and was tinkered for improvement through empirical and administrative methods,—through procedure. But the law of the Empire is characterized by the *belief that law is founded upon ethics.* After the conquest of Greece in 146 B.C. Roman thought began to be influenced by Greek culture and philosophy. The Stoic philosophy in particular appealed to the more intelligent Romans of the Later Republic. Cicero accepted the tenets of this philosophy. And from Cicero to Alexander Severus the ethical principles of Stoic philosophy played a prominent part in Roman education and culture.

https://archive.org/details/treatisescicero00ciceuoft/page/404/mode/2up?view=theater

Marcus.—And you are quite right. For, take my word for it, in no kind of discussion can it be more advantageously displayed how much has been bestowed upon man by nature, and how great a capacity for the noblest enterprises is implanted in the mind of man, for the sake of cultivating and perfecting which we were born and sent into the world, and what beautiful association, what natural fellowship, binds men together by reciprocal charities: and when we have explained these grand and universal principles of morals, then the true fountain of laws and rights can be discovered.

Atticus.—**In your opinion, then, it is not in the edict of the magistrate, as the majority of our modern lawyers pretend, [ut plerique nunc] nor in the Twelve Tables, as the ancients maintained, [ut superiores] but in the sublimest doctrines of philosophy, that we must seek the true source and obligation of jurisprudence.**

Marcus.—For in this discussion of ours, my Atticus, we are not inquiring how we may take proper caution in law, or what we are to answer in each consultation,—that may indeed be an important affair, as in truth it is; and at one time it was supported by many great men, and is at present expounded by one most eminent lawyer [Servius Sulpicius Rufus] with admirable ability and skill. But the whole subject of universal law at jurisprudence must be comprehended in this discussion, in order that this which we call civil law, may be confined in some one small and narrow space of nature.

---

https://en.wikipedia.org/wiki/Natural_law#Stoic_natural_law

As the English historian A.J. Carlyle (1861-1943) notes:

> **There is no change in political theory so startling in its completeness as the change from the theory of Aristotle to the later philosophical view represented by Cicero and Seneca ... We think that this cannot be better exemplified than with regard to the theory of the equality of human nature."**[22]

Charles H. McIlwain likewise observes that "the idea of the equality of men is the most profound contribution of the Stoics to political thought" **and that "its greatest influence is in the changed conception of law that in part resulted from it.**[23]

https://books.google.fi/books?id=Ls9ZDwAAQBAJ&lpg=PP1&hl=fi&pg=PA67#v=onepage&q&f=false

McCoy admits an exception here for late Stoicism, which does value the political virtues, but in a way that elevates them over the speculative. **This led to a kind of proto-humanism according to which, contrary to Aristotle's view, man was really the best thing in the universe.** The one positive contribution of this era came from the Stoic understanding of natural law combined with the substance of Roman civil law, **but the full development of these ideas had to await their recontextualization by a Christian political theology that had also reappropriated Aristotle.** As in the case of Plato, McCoy's views here are very different from those of Strauss, at least with respect to the one Hellenistic movement of thought about which Strauss wrote, Lucretius's Epicureanism.

https://plato.stanford.edu/entries/stoicism/#ChriWrit

The tradition of theories of natural law in ethics seems to stem directly from Stoicism. (Compare Cicero, *de Legibus* I, 18 with later writers like Aquinas in *Summa Theologica* II, 2, q. 94.) Augustine chose to follow the Stoics rather than the Platonists (his usual allies among the philosophers) on a number of points, including on the question of animals' membership in the moral community (*City of God* 1.20) and in his philosophy of language.

https://books.google.fi/books?id=TTYAGD7aKBkC&lpg=PP1&hl=fi&pg=PA37#v=onepage&q&f=false

As applied to social theory, a subject with which Thomas did not concern himself greatly, Aristotelian philosophy worked against and largely undermined the individualist and equalitarian flavor of Stoic thought.

https://books.google.fi/books?id=TTYAGD7aKBkC&lpg=PP1&hl=fi&pg=PA34#v=onepage&q&f=false

The Stoics saw a correspondence between the rationality of the universe and the rationality of the individual: the individual *qua* individual, following the promptings of reason, possessed the capacity to acquire the virtues inherent in the nature of things and to bring them to bear on social life. **The difference between this mode of thought and that of Plato and Aristotle could not be more complete. In Stoic thought, individuals exist in their own right and are equal to one another in fundamental ways.** Society is no longer thought of as prior to the individual and as the source of reason and virtue. Thinkers no longer assumed that they were searching for the institutional system that could develop humans drawn by their nature to truth and goodness. **Before society is the individual, while**

beyond it is the law of nature, the objective standard of justice and morality by which human beings can judge the shortcomings of their society as well as their own behavior. In short, the Stoics spoke of human beings and not of citizens. By proclaiming an individualistic universalism, in which the source of norms lay outside society, they effectively bypassed the tight, hierarchic communalism that had been the main tradition in Greek thought.

The Stoic belief in universal standards of right and wrong accessible to the individual mind could pose dangers for Rome, or for that matter any social system and political regime. To say that a law of nature exists beyond the shortfalls of historical existence could rally people to demand drastic improvements in social life. Despite the potentially revolutionary import of Stoicism, its distinction between the law of nature and the law of society did not create social tension or inspire revolution.
…

Essentially, Stoicism consisted of vague universalistic abstractions that perfectly complemented the power structure of an expansionist society. Stoic universalism, like the rise of universalistic symbols in the great agrarian empires, was a formalistic mask for a power structure, which, unable to overcome its contradictions and deficiencies, resorted to word magic. (The wide use of universalisms in the modern period to mask incompetence, especially in the United States, is analyzed in due course.)

The natural law assumption that there are objective standards of right and wrong that human reason can discern and (presumably) act on became a favorite of various elites besides those of ancient Rome. **In one form or another, the same doctrine is found among feudal and liberal elites. The reason is obvious: the doctrine of natural law and the idea of objectivity in belief and morals shifts the explanation of behavior and the origins and maintenance of right and wrong from social institutions (power groups) and places it on abstract human nature and the abstract individual. With the waning of natural law in the nineteenth century, the same ideological function would be performed by the concept of objectivity and value neutrality in natural and social science.**

> https://creation.com/marxism-law-and-evolution
>
> Marx's ideas about law were expressed mainly in the *Communist Manifesto*, which he published in collaboration with his friend Friedrich Engels in 1848. **In that paper Marx contends that "law, morality, religion, are so many bourgeois prejudices, behind which lurk in ambush just as many bourgeois interests." Then he goes on to criticise the whole tradition of government under the rule of law as nothing more than a mere expression of "bourgeois" aspirations:**
>
> > "Your very ideas are but the outgrowth of the conditions of your bourgeois production and bourgeois property, **just as your jurisprudence is but the will of your class made into a law for all;** a will, whose essential character and direction are determined by the economic conditions of existence of your class. The selfish misconception that induces you to transform into eternal laws of nature and of reason, the social forms springing from your present mode of production and form of property—this misconception you share with every ruling class that has preceded you."[28]

…

Rome continued the Greek ideal of a self-governing community, an ideal opposed both to arbitrary, personal rule and to localism (the feudal tendency to dissolve society into private, particular interests). Second, Rome developed a body of codified law from the practices of its diverse people and its experiences in dealing with them. **Under the Stoic assumption of a right reason pervading the universe, the Romans selected legal norms and practices that seemed fair and sensible, that protected dependents, and that stressed intent rather than empty formalities.**

https://archive.org/details/unknowngodorins00bracgoog/page/n179/mode/2up?view=theater

Except in one direction, which we have mentioned, Stoicism did not leave any profound influence on society. **It is doubtful if the masses knew anything about it.** The leaders themselves were often priggish, inconsistent, only superficially noble, and sometimes full of inflated pride. They were never in touch with common people. **But on the Roman lawyers the Stoical theories and ideals had an abiding influence and power. They colored the whole system of Roman International Law, and through that have reached all modern States, and have affected political progress for eighteen centuries.**

> https://archive.org/details/sectarianismreli01groo/page/16/mode/2up?view=theater
>
> Besides, Taoism possesses, as an heirloom from classical antiquity, a worship of a selection of historical, semi-historical and fabulous national forefathers, which corresponds entirely to the ancient ancestor-worship, the keystone of Confucianism itself. It is true that the Classics are silent

concerning almost all these deified ancestors, **and that on this ground many pedantic disciples of Confucius profess a haughty disdain for them, until such time as they fancy they need their help and assistance, when they worship them and invoke them as any unlearned human being does. However, to condemn as heretical the old heathen religion merely on that ground, could only be done by an ultra-extremism, an extremism rather too strong for the majority of Confucianists. Not so, however, for the highest power in the State.** We shall see from the second article of the Law against Heresy, reproduced in Chapter IV, that this power during the last six or seven centuries has fully authorised its mandarins to persecute all such native heathenism, and let their blows fall upon the worshippers of its gods, in season and out of season.

https://archive.org/details/hindumannerscust1906dubo/page/288/mode/2up?view=theater

Thus it happens that the prime ministers of Asiatic princes are almost always Brahmins. Shut up in their palaces, and plunged in voluptuous idleness, the nominal rulers rarely give a thought to anything beyond the means of increasing their enjoyments, creating fresh amusements, and giving new zest to their passions by ever-varying means. The welfare of their people and the government of their country are very secondary considerations, if not matters of indifference. Women, baths, perfumes, obscene dances, filthy songs, each in turn excite their senses.
…

The Mahomedan rulers generally make a Brahmin their secretary of state, through whose hands all the state correspondence must pass. Brahmins also frequently fill the positions of secretaries and writers to the governors of provinces and districts. Generally speaking, the Mahomedans of India are so ignorant of the first principles of public administration and so utterly unacquainted with the simplest rules of arithmetic, that they are obliged to have recourse to the Brahmins for everything that requires enlightenment and knowledge.
…

The Brahmins have also been clever enough to work their way into favour with the great European Power that now governs India. **They occupy the highest and most lucrative posts in the different administrative boards and Government offices, as well as in the judicial courts of the various districts.** In fact there is no branch of public administration in which they have not made themselves indispensable. Thus it is nearly always Brahmins who hold the posts of sub-collectors of revenue, writers, copyists, translators, treasurers, book-keepers, &c.

https://www.gutenberg.org/files/19322/19322-h/19322-h.htm#INTRODUCTION

The mob, it must be obvious, was very little shaken; even to this day it has not put off its belief in the essential Christian doctrines. But the *intelligentsia*, by 1885, had been pretty well convinced.
…

Such notions, still almost universally prevalent in Christendom a century before, were now confined to the great body of ignorant and credulous men—that is, to ninety-five or ninety-six percent of the race. For a man of the superior minority to subscribe to one of them publicly was already sufficient to set him off as one in imminent need of psychiatrical attention.

https://archive.org/details/in.ernet.dli.2015.231118/page/n47/mode/2up?view=theater

This commission, under the presidency of a resolute reactionary, Appius Claudius, transformed the old customary law of Rome into the famous Twelve Tables, submitted them to the Assembly (which passed them with some changes), and displayed them in the Forum for all who would—and could—to read. **This seemingly trivial event was epochal in Roman history and in the history of mankind; it was the first written form of that legal structure which was to be Rome's most signal achievement and her greatest contribution to civilization.**

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0054%3Abook%3D6%3Acard%3D801

"Let others melt and mould the breathing bronze
To forms more fair,—aye! out of marble bring
Features that live; let them plead causes well;
Or trace with pointed wand the cycled heaven,
And hail the constellations as they rise;
But thou, O Roman, learn with sovereign sway
To rule the nations. Thy great art shall be
To keep the world in lasting peace, to spare

> **humbled foe, and crush to earth the proud.**"

It was a happy accident that while the chaos of barbarian invasion was mutilating the legal heritage in the West, the *Code, Digest,* and *Institutes* of Justinian were collected and formulated in Constantinople, in the comparative security and continuity of the Empire in the East.
...

English law itself, the only legal edifice of comparable scope, took its rules of equity, admiralty, guardianship, and bequests from Roman canon law. **Greek science and philosophy, Judeo-Greek Christianity, Greco-Roman democracy, Roman law—these are our supreme inheritance from the ancient world.**

https://archive.org/details/romanlawinmoder01shergoog/page/n279/mode/2up?view=theater

Napoleon was in blood and instinct a real successor of the Caesars; **only just before he put an end to the Roman Empire of the West**178 **revived by Charlemagne 1000 years earlier,**179 Napoleon remodeled Roman-French jurisprudence **and published the first great code of modern Roman law promulgated since Justinian's 6th century Corpus Juris. By this act the grip of Roman law upon the modern world was forever fastened.**

http://www.cambaceres.org/vie-poli/code-civ/cod-civi.htm

"My true glory is not to have gained forty battles; Waterloo will erase the memory of so many victories; what nothing will erase, what will live eternally, my Civil law..." (Napoleon Bonaparte, Saint-Helen's memorial)

https://archive.org/details/romanlawinmoder01shergoog/page/n47/mode/2up?view=theater

"Rome," says Ihering, "conquered the world three times: first by her armies, second by her religion, third by her law. This third conquest, most pacific of all, is perhaps the most surpassing of all."3 A work of judicial conquest has already been completed, the magnitude of which is most amazing. The modern domains of Roman law extend far beyond the vast empire of the Caesars.
...

All the countries of the world save China, and eventually China will be included, have now come under the rule of the Roman laws framed in the Eternal City and codified by Justinian. **All this reveals the eternal character of Roman law, which, firmly retaining the world it has conquered, changes merely its dress with the passing centuries. "The conquest of the world by the Roman Empire has passed away, but the conquest of the world by Roman law has not passed away and there is no sign that it will pass away so long as mankind endures. It rules to-day a wider empire than the Caesars ever knew, and its empire is ever widening."**6

National decline is not just grist for the philosopher's mill, however, it is also perhaps a condition of understanding as Hegel suggests in the penultimate paragraph of the preface to *The Philosophy of Right*:

> When philosophy paints its grey on grey, then has a shape of life grown old. By philosophy's grey on grey it cannot be rejuvenated but only understood. **The owl of Minerva spreads its wings only at the falling of the dusk.**

Daughter of Jupiter, Minerva in the mythology of the Greeks is the goddess of wisdom. And the nocturnal owl is one of its ancient symbols. **The meaning of the Hegelian trope is that understanding, insight, wisdom arise when the object to be understood has played itself out, when it has actualized and thus exhausted its potentialities, and now faces only decline.**

Cicero listened eagerly to the trials and debates in the Forum, and rapidly learned the arts and tricks of forensic speech. **"To succeed in the law," he said, "a man must renounce all pleasures, avoid all amusements, say farewell to recreation, games, entertainment, almost to intercourse with his friends."**[36]

https://archive.org/details/romanlawinmoder01shergoog/page/n83/mode/2up?view=theater

(§ 53) As to Cicero,28 the best opinion is that, although the greatest advocate ever called to the Roman Bar, **he was not a great lawyer in the sense of being a jurist.**

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0019%3Atext%3DMur.%3Achapter%3D10%3Asection%3D23

[23] **And since you seem to me to embrace that knowledge of the law which you have, as if it were a darling daughter, I will not permit you to lie, under such a mistake as to think that whatever it may be, which you have so thoroughly learnt anything very preeminent.** For your other virtues of continence, of gravity, of justice, of good faith, and all other good qualities, I have always considered you very worthy of the consulship and of all honour; **but as for your having learnt civil law, I will not say you have wasted your pains, but I will say that there is no way made to lead to the consulship by that profession;** for all arts which can conciliate for us the good-will of the Roman people ought to possess both an admirable dignity, and a very delightful utility.

11. [24] The highest dignity is in those men who excel in military glory. For all things which are in the empire and in the constitution of the state, are supposed to be defended and strengthened by them. There is also the greatest usefulness in them, since it is by their wisdom and their danger that we can enjoy both the republic and also our own private possessions. The power of eloquence also is no doubt valuable and full of dignity, and it has often been of influence in the election of a consul to be able by wisdom and oratory to sway the minds of the senate and the people, and those who decide on affair. A consul is required who may be able sometimes to repress the madness of the tribunes, who may be able to bend the excited populace, who may resist corruption. It is not strange, if, on account of this faculty, even men who were not nobly born have often obtained the consulship; especially when this same quality procures a man great gratitude, and the firmest friendship, and the greatest zeal in his behalf; **but! of all this there is nothing, O Sulpicius, in your profession.**
...

[25] **First of all, what dignity can there be in so limited a science? For they are but small matters, conversant chiefly about single letters and punctuation between words. Secondly, if in the time of our ancestors there was any inclination to marvel at that study of yours, now that all your mysteries are revealed, it is wholly despised and disregarded.** At one time few men knew whether a thing might be lawfully done or not; for men ordinarily had no records; those were possessed of great power who were consulted, so that even days for consultation were begged of them beforehand, as from the Chaldean astrologers. A certain notary was found, by name Cnaeus Flavius, who could deceive[1] the most wary, and who set the people records to be learnt by heart each day, and who pilfered their own learning from the profoundest lawyers.
...

And while all this was made a mystery of, they who had the key to the mystery were necessarily sought after by men; but as soon as these things were revealed, and were bandied about and sifted in men's hands, **they were found to be thoroughly destitute of wisdom, but very full of fraud and folly.**
...

[28] **Therefore, as I said before, the dignity of a consul has never been consistent with that science; being one consisting wholly of fictitious and imaginary formulas.**
...

Just as men say, when talking of Greek practitioners, that those men are flute-players who cannot become harp-players, so we see some men, who have not been able to make orators, turn to the study of the law. There is great labour in the practice of oratory. It is an important business, one of great dignity, and of most exceeding influence. **In truth, from you lawyers men seek some degree or advantage; but from those who are orators they seek actual safety. In the next place, your replies and your decisions are constantly overturned by eloquence, and cannot be made firm except by the advocacy of the orator;** in which if I had made any great proficiency myself; I should be more sparing while speaking in its praise; but at present I am saying nothing about myself; but only about those men who either are or have been great in oratory.

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D2%3Asection%3D65

Thus, among the many admirable ideas of our[3] ancestors was the high respect they always accorded to the study and interpretation of the excellent body of our civil law. And down to the present unsettled times **the foremost men of the state have kept this profession exclusively in their own hands; but now the prestige of legal learning has departed along with offices of honour and positions of dignity; [nunc, ut honores, ut omnes dignitatis gradus, sic huius scientiae splendor deletus est]** and this is the more deplorable, because it has come to pass in the lifetime of a man[4] who in knowledge of the law would easily have surpassed all his predecessors, while in honour he is their peer.
...

[66] Closely connected with this profession, furthermore,[1] is **the gift of eloquence; [dicendi] it is at once more popular and more distinguished.** For what is better than eloquence to awaken the admiration of one's hearers or the hopes of the distressed or the gratitude of those whom it has protected? **It was to eloquence, therefore, that our fathers assigned the foremost rank among the civil professions. [toga dignitatis]**

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D1%3Asection%3D76

For arms are of little value in the field unless there is wise counsel at home. So, too, Africanus, though a great man and a soldier of extraordinary ability, did no greater service to the state by destroying Numantia than was done at the same time by Publius Nasica, **though not then clothed with official authority, [privatus]** by removing Tiberius Gracchus. This deed does not, to be sure, belong wholly to the domain of civil affairs; it partakes of the nature of war also, since it was effected by violence; but it was, for all that, **executed as a political measure [gestum consilio urbano]** without the help of an army.

[77] The whole truth, however, is in this verse, against[1] which, I am told, the malicious and envious are wont to rail:

> **"Yield, ye arms, to the toga; to civic praises,[2] ye laurels."[3] [Cedant arma togae, concedat laurea laudi.]**

Not to mention other instances, did not arms yield to the toga, when I was at the helm of state?

https://www.ccel.org/g/gibbon/decline/volume2/chap44.htm#authority

But these interpreters could neither enact nor execute the laws of the republic; and the judges might disregard the authority of the Scaevolas themselves, which was often overthrown by the eloquence or sophistry of an ingenious pleader. (60) **Augustus and Tiberius were the first to adopt, as a useful engine, the science of the civilians;** and their servile labors accommodated the old system to the spirit and views of despotism.

https://en.wikisource.org/wiki/Dialogue_on_Orators#I

You often ask me, Justus Fabius, how it is that while the genius and the fame of so many distinguished orators have shed a lustre on the past, **our age is so forlorn and so destitute of the glory of eloquence that it scarce retains the very name of orator. That title indeed we apply only to the ancients, and the clever speakers of this day we call pleaders, [causidici] advocates, counsellors, [patroni] anything rather than orators.**

https://en.wikisource.org/wiki/Dialogue_on_Orators#XXXVI

In each case the state was torn asunder, but the eloquence of the age was exercised, and, as it seemed, was loaded with great rewards. **For the more powerful a man was as a speaker, the more easily did he obtain office, the more decisively superior was he to his colleagues in office, the more influence did he acquire with the leaders of the state, the more weight in the senate, the more notoriety and fame with the people.** Such men had a host of clients, even among foreign nations; the magistrates, when leaving Rome for the provinces, showed them respect, and courted their favour as soon as they returned. The prætorship and the consulship seemed to offer themselves to them, and even when they were out of office, they were not out of power, for they swayed both people and senate with their counsels and influence. **Indeed, they had quite convinced themselves that without eloquence no one could win or retain a distinguished and eminent position in the state.**

https://en.wikisource.org/wiki/Dialogue_on_Orators#XL

No; the great and famous eloquence of old is the nursling of the licence which fools called freedom; it is the companion of sedition, the stimulant of an unruly people, a stranger to obedience and subjection, a defiant, reckless, presumptuous thing which does not show itself in a well-governed state.
…

So too our own state, while it went astray and wore out its strength in factious strife and discord, **with neither peace in the forum, unity in the senate, order in the courts, respect for merit, or seemly behaviour in the magistrates,** produced beyond all question a more vigorous eloquence, just as an untilled field yields certain herbage in special plenty. **Still the eloquence of the Gracchi was not an equivalent to Rome for having to endure their legislation, and Cicero's fame as an orator was a poor compensation for the death he died.**

https://books.google.fi/books?id=6kVLH5gGZVYC&lpg=PP1&pg=PA256#v=onepage&q&f=false

> As J.P. Sullivan comments, **"Under the Empire political conditions reduced the importance of oratory tremendously";** see his notes on Petronius, *The Satyricon and The Fragments* (Harmondsworth, Middlesex: Penguin Books, 1969), 182.

https://books.google.fi/books?id=o-Y7AAAAIAAJ&lpg=PP1&pg=PA72#v=onepage&q&f=false

And when first-class oratory had come to an end, some of the greatest names in the whole of ancient civilization were still to occur; and they were the names of lawyers.

https://archive.org/details/in.ernet.dli.2015.231118/page/n437/mode/2up?view=theater

Amid the turmoil of the Gracchan and Marian revolution Publius Mucius Scaevola (consul, 133 B.C.) and his son Quintus (consul, 95 B.C.) labored to reduce the laws of Rome to an intelligible system. Cicero, pupil of another Quintus Mucius Scaevola (consul, 117 B.C.), wrote eloquently on the philosophy of law, **and constructed an ideal code designed to preserve the fortune that he had gained and the faith that he had lost.**
...

Not till the Principate had established itself, first by the use of force and then by the force of use, **could the new legislation win acceptance in the minds of men as well as in the courts of power. To the second and third centuries of our era belongs the honor of giving Roman law its final formulation in the West**—an achievement comparable to the formulation of science and philosophy in Greece.

Here, too, Caesar had set the goal; but the actual work did not begin till Hadrian (A.D. 117). **This best educated of the emperors gathered about him a corps of jurists as his Privy Council, and commissioned them to replace the variable annual edicts of the praetors with a Perpetual Edict to be observed by all future judges in Italy.** The Greeks had produced since Solon no masterpiece of jurisprudence, and never a codified system of law; but the Greek cities of Asia and Italy had developed excellent municipal codes. The much-traveled Hadrian knew these cities well and was perhaps inspired by their constitutions to improve and co-ordinate the laws of Rome. Under his successors, the Antonines, the work of codification continued, **and the half-official repute enjoyed by the Stoic philosophy permitted a profound Greek influence upon Roman law.** The Stoics declared that law should accord with morality, and that guilt lay in the intention of the deed, not in the results. Antoninus, a product of the Stoic school, decreed that cases of doubt should be resolved in favor of the accused, and that a man should be held innocent until proved guilty[1]—two supreme principles of civilized law.

https://archive.org/details/in.ernet.dli.2015.231118/page/n691/mode/2up?view=theater

Papinian, Paulus, and Ulpian, the culminating trio of Roman law, all rose to power under Septimius Severus; **all, as prefects of the Praetorian Guard, were the prime ministers of the realm;** and all justified absolute monarchy on the ground that the people had delegated their sovereignty to the emperor.

---

https://archive.org/details/orientalreligio00cumogoog/page/n36/mode/2up?view=theater

At the beginning of the imperial régime Rome ruled the world but did not govern it. She kept the number of her functionaries down to a minimum, **her provinces were mere unorganized aggregates of cities where she only exercised police power, protectorates rather than annexed countries.**[4]

> 4. See Cicero's statement regarding the ancient Roman dominion (*De off.*, II, 8): "Illud patrocinium orbis terrae verius quam imperium poterat nominari."

As long as law and order were maintained and her citizens, functionaries and merchants could transact their business, Rome was satisfied. She saved herself the trouble of looking after the public service by leaving broad authority to the cities that had existed before her domination, or had been modeled after her. The taxes were levied by syndicates of bankers and the public lands rented out. **Before the reforms instituted by Augustus, even the army was not an organic and permanent force, but consisted theoretically of troops levied before a war and discharged after victory.**
...

What do we find three centuries later? **A strongly centralized state in which an absolute ruler, worshiped like a god and surrounded by a large court, commanded a whole hierarchy of functionaries; cities divested of their local liberties and ruled by an omnipotent bureaucracy, the old capital herself the first to be dispossessed of her autonomy and subjected to prefects.** Outside of the cities the monarch, whose private fortune was identical with the state finances, possessed immense domains **managed by intendants and supporting a population of serf-colonists.** The army was composed largely of foreign mercenaries, professional soldiers whose pay or bounty consisted of lands on which they settled. **All these features and many others caused the Roman empire to assume the likeness of ancient Oriental monarchies.**

https://books.google.fi/books?id=4TKC6ACbOrEC&lpg=PP1&hl=fi&pg=PA5#v=onepage&q&f=false

An increasing differentation between the elite and and the others in their social world was occurring in this period, and this dichotomy was in the process of being fixed in the Roman legal code through the juridical dichotomy between the *humiliores* and *honestiores*, the “more humble” and the “more honourable.”6 **The latter designation encompassed Roman senators, knights, and municipal decurions from the provinces, as well as military veterans. Thus, with the**

possible exception of veterans, it was reserved for empire's wealthy and prominent individuals.
...

Walter Scheidel points out that the *humiliores/honestiores* binary did not strictly correlate with economic worth. Wealth could not have been completely monopolized by the *honestiores*, who, he argues, would have accounted for only about 1 percent of the imperial population. **In Scheidel's words, "In the eyes of the government, the other 99 percent of the population may have been 'humble,' but they can hardly all have been of modest means"** (2006: 42). Scheidel proposes that a larger group must have occupied the economic midrange than is usually envisioned in historical discussion.8 He states, **"It is perfectly possible to reconcile the dominance of a disproportionately affluent elite with the presence of a substantial 'middle'"** (2006: 54). Scheidel makes a persuasive case for envisioning a substantial group of people with economic means who were not *honestiores*. **As all dichotomizing binaries are, the *humiliores/honestiores* division would have been porous, and its primary use was in the sphere of criminal law.**
...

Scheidel offers a definition that underscores the connection between the *honestiores* and the mechanics of empire: **"*Honestior* was perhaps not so much a legal as a functional category that lumped together the (free-born) agents of the imperial center"** (2006: 43). Scheidel's point that it is "absurd" to classify all *humiliores* among the lower classes is important, but perhaps it is even more important to note that **the state was categorizing all persons who were not its "agents,"** usually its wealthy, even "disproportionately affluent" agents (senators, knights, municipal leaders), **as *humiliores*, as "humble," as *tenuores*, persons having less presence in society.**
...

Neither a rich freed man nor a wealthy trader nor a poor free citizen (except a poor veteran) would qualify among the *honestiores*.

https://books.google.fi/books?id=a99zdvANyGkC&lpg=PP1&hl=fi&pg=PA26#v=onepage&q&f=false

The foundations on which Augustus had built – the Roman senate, the Italian citizen class, and the city states of the provinces – had all of them lost their strength. There remained only the imperial government and the imperial army, and, accordingly, the work of restoration had to be carried out from above by a bureaucratic organisation of the most absolute kind.
...

Thus the Roman emperors stepped into the place of the Ptolemies and the Pharaohs and took over the control of a society that embodied the most complete system of state socialism that the ancient world had known. "In direct opposition to the structure of of economic life in Greece and Italy," writes Professor Rostovtzeff, "the whole economic organization of Egypt was built up on the principle of centralization and control by the Government, as well as the nationalization of all production in agricultural and industrial life. Everything was for the State and through the State, nothing for the individual. ... **Nowhere in the whole evolution of mankind can be found so far reaching and so systematic limitations as those that applied to private property in Ptolemaic Egypt.**"6

The social and economic history of the later Empire is the history of the extension to the rest of the provinces of the main principles of this Egyptian Hellenistic system. The administration of the vast imperial estates, the development of the official hierarchy, the régime of tribute in kind and of forced services, above all the fixation of status in the hereditary guilds, and the binding of the cultivator to his holding and and the craftsman and the trader to his calling, were already fully developed institutions in Egypt centuries before they came to be applied to the rest of the Empire. **The system of compulsory state services – *liturgies* or *munera* – was, however, common to the Hellenistic East, and it had begun to make its influence felt in the West as early as the second century.** What Diocletian did, therefore, was not to introduce a new principle, but to make these oriental institutions an essential part of the imperial system. **The old institutions of the city state, which rested on private property and a privileged citizen class, had become an anachronism, and in their place arose a bureaucratic unitary state based on the principle of universal service.**

> https://en.wikisource.org/wiki/The_Women_of_the_Caesars/The_sisters_of_Caligula_and_the_marriage_of_Messalina
>
> For instance, **we know that all his servants were Egyptians, and that Helicon, his most faithful and influential freedman, was an Alexandrian.** But shortly after his elevation this

admiration for the land of the Ptolemies and the Pharaohs broke forth into a furor of Egyptian exoticism, which impelled him to an attempt to bring his own reign into connection with the policies of his great-grandfather Mark Antony.
…

In the madness of Caligula, as in the story of Antony and the tragedy of Tiberius, there is forever recurring, under a new form, the great struggle between Italy and the East, between Rome and Alexandria, which can never be divorced from the history of the last century of the republic and the first century of the empire. Whoever carefully sifts out the separate actions in the disordered conduct of the third Roman emperor will easily rediscover the thread of this idea and the trace of this latent conflict. For instance, we see the new emperor scarcely elected before he introduced the worship of Isis among the official cults of the Roman state and assigned in the calendar a public festival to Isis. **In short, he was favoring those Egyptian cults which Tiberius, with his "old-Roman" sympathies, had fiercely combatted. Furthermore**, **we see Caligula prohibiting the festival in commemoration of the battle of Actium, which had been celebrated every year for more than half a century.** At first sight the idea seems absurd; but it must not be considered a caprice; for with this act Caligula was intending to initiate the historical rehabilitation of Mark Antony, the man who had tried to shift the center of Roman politics from Rome to Alexandria. **The emperor meant to make plain to Rome that she was no longer to boast of having humiliated Alexandria with arms, since Alexandria would henceforth be taken as a model in all things.**

https://penelope.uchicago.edu/Thayer/E/Gazetteer/Places/Europe/Italy/_Texts/HODIHI/2d_edition/3/9*.html#ref27

But as the power of the Emperors grew, and as the forms of popular government by assemblies of the citizens at Rome faded into insignificance, the diversities of privilege between the various cities of the Empire faded also.
…

Thus, **during these early centuries of the Empire, the local government of the towns was both in name and in fact republican.** We need only recur to some familiar examples in the Acts of the Apostles, to understand how these municipal liberties existed side by side with the great machine of the Imperial administration, independent in their own sphere, yet trembling lest by any unauthorised proceeding they should be brought within its far-reaching and heavy stroke.
…

The first two centuries and a half of the Empire may be perhaps considered as the golden age of the *municipia*, and the large amount of prosperity and happiness thus secured to the middle classes of society was probably the chief cause of the admitted success of the Imperial administration during the greater part of that period.
…

This last and fatal phase in the history of the municipalities was probably, in great measure, the result of the remodelling of the Empire by Diocletian.29 That great statesman saw that some change was needed if the Empire was not to be rent asunder by the hands of its own children. The changes which he accordingly introduced have been already briefly described.30 **These changes answered their immediate purpose. The Roman Empire was held together for another century and a half, but it gained life at the cost of the means of living.** According to the old fable,31 Phaethon, when entrusted with the chariot of the Sun-god, drove it too near to the earth and began rapidly to dry up all the pools and fountains of waters. **Even so now, the Imperial Majesty, of which flatterers had made a kind of god upon earth, appearing in all the vigour of its new administrative powers close to every portion of the Empire, began at once to dry up many a reservoir of wealth which had escaped the rapacity of former Emperors.**
…

The *Curiae*, which had once been honoured and envied communities, easily bearing the weight of their public duties, and dispensing comfort and happiness to the district round them, were now mere gaols in which the middle classes were shut up from birth till death, to toil for the Imperial Treasury. The dignity of decurion, or *curialis* as he was now often called, was no longer bestowed on the most worthy by the suffrages of his fellow-citizens. It was a charge descending from the father to the son, which the son, however anxious to be freed from it, could not renounce.34 The longest 'title' (as it is called) in the Theodosian Code, is that which contains the 188 laws, passed during 150 years, concerning the rights and duties of the Decurions. **Of their rights perhaps eight laws speak, of their duties the remaining 180, and that in tones of inflexible severity.**
…

The prohibition went further: they were forbidden to take any kind of journey, lest they should defraud the Curia of their services, and for the same reason they were forbidden to leave the cities and take up their residence in the country.38 **That free circulation of the citizens, which makes the life of modern states, was a crime in the eyes of the Imperial legislator, because it interfered with the machinery of fiscal extortion.**
…

It might have been thought that when every Teutonic and Scythian nationality from the Caspian to the Scheldt was pouring down upon the Empire, when the Romans were

> 'Ringed around with barking dogs of war,'40

the mustering of men for the battle-field would have been an object of primary importance with their rulers, and that if an oppressive conscription were not resorted to, at least every volunteer would be eagerly welcomed. **By no means: the maintenance of the Curia, as a taxing-machine in a state of efficiency, was the first consideration, for upon this depended the splendour of the Imperial household, and the rapid fortunes of Prefects and Counts.**
…

Besides the Church and the Army another career, if he only could succeed in entering it, seemed to promise to the aspiring Curial an exemption from the crushing load of municipal liability. This was service in the vast Imperial households, for the *Palatinus* of whatever rank was not only entitled, as has been already seen, to share in the corn-largesses; **he was also, as the servant of the Emperor, free from 'mancipation' to any other master.** And in this way, no doubt, many thousands of Decurions managed to evade the onerous obligations of local self-government.
…

2. A more substantial privilege doubtless, though from its nature attainable by few, was the prospect of entering the Senate, and so passing from the class of the oppressed into that of the oppressors.
…

From this general survey of the laws relating to the Decurions it will be seen that we have here a state of things not altogether unlike that which existed in France before the Revolution. A court and *noblesse* above,49 exempt from the heaviest part of the national taxation, and with their hands for ever in the national exchequer: below, a people robbed and spoiled, *taillable et corvéable à merci*, that is, without mercy and without foresight, and consequently some of the most fertile countries in the world brought by the tax-gatherer to the verge of starvation. The difference between the two cases is that **in France *taille* and *corvée* reached down to the very lowest of the people:** in the Roman Empire, the slaves and the 'plebeians' (as the class of freemen who lacked the curial qualification were called) were not shut up in the taxing-pen of the Curia. It was essentially an oppression of the middle classes that was thus carried on; but a century and a half of this steady, persevering tyranny had so ground down the once prosperous and thriving Decurions, that it may be doubted whether they were not, when the Western Empire fell, practically lower than the lowest of the proletariat.
…

In Gaul, in Spain, in Italy, the exhaustion and impoverishment of the middle classes was, in the fifth century, so great that it had become a matter almost of indifference who ruled over them, a grandson of Theodosius, the Suevic Count Ricimer, the Herulian Odovacar, or Theodoric the Ostrogoth. **Their condition could not be worse under the barbarian than under the crushing, organised, relentless tyranny of the Roman bureaucracy.** It might be, and as far as Odovacar and Theodoric were concerned it probably was, better.

> https://archive.org/details/11ShahakJewishHistoryJewishReligion/page/65/mode/2up?view=theater
>
> An important part of such privileges, going as far back as the late Roman Empire, is the creation of a Jewish clerical estate which, exactly like the Christian clergy in medieval times, is *exempt from paying taxes to the sovereign* and is allowed to impose taxes on the people under its control – the Jews – for its own benefit. It is interesting to note that **this deal between the late Roman Empire and the rabbis antedates by at least one hundred years the very similar privileges granted by Constantine the Great and his successors to the Christian clergy.**
>
> From about AD 200 until the early 5th century, the legal position of Jewry in the Roman Empire was as follows. A hereditary Jewish Patriarch (residing in Tiberias in Palestine) was recognised both as a high dignitary in the official hierarchy of the Empire and as supreme chief of all the Jews in the Empire.10 As a Roman official, **the Patriarch was *virillustris*, of the same high official class which included the consuls, the top military commanders of the Empire and the chief ministers around the throne (the Sacred Consistory), and was out-ranked only by the imperial family. In fact, the Illustrious Patriarch (as he is invariably styled in**

> **imperial decrees) out-ranked the provincial governor of Palestine.** Emperor Theodosius I, the Great, a pious and orthodox Christian, executed his governor of Palestine for insulting the Patriarch.
>
> At the same time, all the rabbis – who had to be designated by the Patriarch – were freed from the most oppressive Roman taxes and received many official privileges, **such as exemption from serving on town councils (which was also one of the first privileges later granted to the Christian clergy).** In addition, the Patriarch was empowered to tax the Jews and to discipline them by imposing fines, flogging and other punishments.

https://books.google.fi/books?id=a99zdvANyGkC&lpg=PP1&hl=fi&pg=PA29#v=onepage&q&f=false

In fact it was only in this later period that the social unity of the Empire was completely realised and that men became fully conscious of the universal character of the Roman state. The early Empire outside Italy had been a foreign power imposed from above on a number of conquered societies; its relations were primarily not with the individual but with the subject community. To the ordinary man the *state* was not the Roman Empire but his native city. **It was only in proportion as the imperial bureaucracy encroached on the old city administration that a man's local citizenship became subordinated to his membership of the Empire.**

Thus the decay of the old city constitution was not an unmitigated misfortune, for it was accompanied by a development of imperial citizenship. **The third century, which saw the rise of a centralised bureaucratic state, also saw the extension of Roman citizenship to the provincials and the transformation of Roman law from the possession of a privileged class to the common law of the Empire.** And this development rested not merely on the desire of the central government to increase its control over its subjects; it also had a basis in the social and political ideals of the age. **These ideals already find expression in the writings of Greek men of letters, such as Dio Chrysostom and Aelius Aristides, who were the leaders of that somewhat academic revival of classical culture which characterised the second century A.D.** They saw in the Roman Empire the realisation of the traditional Hellenistic idea of the unity of the civilised world – the *oecumene* – and they held up to the emperors the Stoic ideal of an enlightened monarchy in which the ruler dedicates his life to the service of his subjects and regards government, not as a privilege, but as a duty. Thus the great emperors of the second century, from Trajan to Marcus Aurelius, who laid the foundations of the bureaucratic régime, had no intention of destroying civic liberty. Their ideal was that which was expressed by Marcus Aurelius as "the ideal of a polity in which there is the same law for all, a polity administered with regard to equal rights and equal freedom of speech, and the ideal of a kingly government which respects most of all the freedom of the governed."7 **And the same ideal inspired the great jurists of the following century, such as Ulpian and Papinian, through whom the humane and enlightened principles of the Antonine period became incorporated in the traditions of later Roman law.**

https://archive.org/details/a589105200kinguoft/page/n79/mode/2up?view=theater

If such were the morals of the Empire, what was its political state? One of complete disorganization. **The only uniting bond left seems to have been that of the bureaucracy, the community of tax-gatherers, who found it on the whole safer and more profitable to pay into the imperial treasury a portion of their plunder, than to keep it all themselves.**

https://books.google.fi/books?id=mQspAwAAQBAJ&lpg=PP1&hl=fi&pg=PA66#v=onepage&q&f=false

The administrative apparatus that Legalist reformers built to replace aristocratic functions was ideally bureaucratic.195 The Roman Empire embarked on a similar enterprise later. These were great achievements. **Bureaucracy is such a fixture of modern states we easily forget that after the fall of the Roman Empire, it reappeared in Europe only in the fifteenth century and matured in the nineteenth.** It cut into the privileges of patrimonial aristocrats, who resisted every step.

> https://archive.org/details/in.ernet.dli.2015.505416/page/n197/mode/2up?view=theater
>
> Ever since the days of the *Eupatridae* at Athens and of the patricians at Rome, the exercise of judicial functions, just as much as the bearing of arms, has been a most important duty of every aristocracy. Both military power and judicial functions have for their object the complete protection and security of property, and may lead to the acquirement of new rights. **Therefore in the history of the medieval nobilities quite as much attention should be paid to the great days of assize as to the decisive battles.**
> …
>
> In a work of his, written while he was quite a young man, Count Christopher Niczky (who was afterwards the right hand of Joseph II in his attempt to overthrow the older judicial and

> administrative system of Hungary) **considered the fact, that the nobility studied nothing but law, to be a sign of the backwardness of the nation.**2

https://archive.org/details/a-new-nobility-of-blood-and-soil-by-richard-walther-darre-1930/page/n293/mode/2up?view=theater

Responsible, independent action—the hallmark of every true leader—does not coincide with and is in fact the exact opposite of civil service, in the best sense of the term. The Prussian civil servant was the responsible guardian of the gears of the Prussian state, who saw to it that no cog in the Prussian state's great machinery came to harm—but he was not a leader, let alone capable of setting the gears of the Prussian state into motion on his own accord. **Thus it is no wonder that Prussia produced outstanding civil servants of consummate honesty, but hardly any leaders—leading Prussians were almost always Prussians-by-choice, i.e. born as non-Prussians, then voluntarily becoming Prussians.** Around 1809, the Prussian Minister of the Interior at the time, Count Alexander Dohna, noted with surprise:

> In no other country in Europe are all the qualities necessary for a capable representative as unheard of as in Prussia; on the other hand, in no other country can you find so many excellent people for the details of business.

On the same occasion, Freiherr vom Stein wrote about the Prussian civil service (and thus, incidentally, uttered prophet-like words that were to prove surprisingly true in the years after 1918):

> Our misfortune is that we are governed by bureaucrats who are salaried, academic, disinterested, and landless. This list goes on and on. **These four words: salaried, academic, [buchgelehrt] disinterested, landless [eigentumslos]—embody the spirit [der Geist] of our mindless [geistlosen] government machine.** Whether it rains or shines, whether taxes rise or fall, whether old traditional rights are destroyed or left in place, **whether all peasants are considered merely day laborers, and whether bondage to Jews and usurers is substituted for bondage to the lord of the manor—all this is of no concern to them.** They raise their salaries from the state treasury and write, write, write in their quiet, well-locked offices, raising their children to be equally useful writing machines.

https://en.wikipedia.org/wiki/Nomenklatura

Milovan Đilas, a critic of Stalin, wrote of the nomenklatura as the "new class" in his book *The New Class: An Analysis of the Communist System*, and he claimed that it was seen by ordinary citizens as a bureaucratic elite that enjoyed special privileges and had supplanted the earlier wealthy capitalist elites.[14]

> https://archive.org/details/in.ernet.dli.2015.503389/page/n147/mode/2up?view=theater
>
> **All abstract brooding over economic concepts that are remote from any economic experience must, if courageously and honestly followed out, lead in one way or another to reasoned conclusions against State and property, and only lack of vision saves these materialist Schoolmen from seeing that at the end of their chain of thought stands the beginning once more: effective Communism is *authoritative bureaucracy*.** To put through the ideal requires dictatorship, reign of terror, armed force, the inequality of a system of masters and slaves, men in command and men in obedience – in short: Moscow.

https://www.garynorth.com/freebooks/docs/pdf/marx_religion_of_revolution.pdf

Engels thoroughly enjoyed the trappings of the wealth he possessed, while Marx spent many years of his life in hock to pawn brokers. He financed Marx throughout their long relationship.42 **He outlived Marx by over a decade, corresponding with many revolutionaries throughout Europe, keeping the Marxist flame burning. He edited and published reprints of Marx's books and his many unpublished manuscripts. His *Socialism: Utopian and Scientific*43 has had far more impact in bringing men to Communism than *Das Kapital* has ever had.** He was not a pedant.
...

Engels was not a Ph.D-holding drudge. **Those who *are* Ph.D-holding drudges have a distinct tendency to identify with Marx rather than Engels.** They pretend to suffer with Marx, who was, like themselves, a heavily subsidized "victim" of the hated capitalist system. They share his alienation.
...

They write fat, unreadable books on Marxism, and they attribute to Marx rather than Engels almost everything of intellectual importance in Marxism. **They attribute far greater importance to Marx's academic drudgery than to Engels's original insights. In one sense, however, this assessment may be valid, because Marxism has always been a movement that owes its success to its appeal to envy-driven**

intellectuals and academics who have revolutionary pretentions. This explanation of Marxism's success is seldom discussed by Marxists and academic humanists.

https://www.gutenberg.org/cache/epub/55903/pg55903-images.html#link2H_4_0002

The services which M. Dumont has rendered to society can be fully appreciated only by those who have studied Mr. Bentham's works, both in their rude and in their finished state. The difference both for show and for use is as great as **the difference between a lump of golden ore and a rouleau of sovereigns fresh from the mint.**
…

Posterity will pronounce its calm and impartial decision; and that decision will, we firmly believe, place in the same rank with Galileo, and with Locke, the man who found jurisprudence a gibberish and left it a science. Never was there a literary partnership so fortunate as that of Mr. Bentham and M. Dumont. The raw material which Mr. Bentham furnished was most precious; **but it was unmarketable.** He was, assuredly, at once a great logician and a great rhetorician. But the effect of his logic was injured by a vicious arrangement, and the effect of his rhetoric by a vicious style.
…

If M. Dumont had never been born, Mr. Bentham would still have been a very great man. But he would have been great to himself alone. The fertility of his mind would have resembled the fertility of those vast American wildernesses in which blossoms and decays a rich but unprofitable vegetation, "wherewith the reaper filleth not his hand, neither he that bindeth up the sheaves his bosom." It would have been with his discoveries as it has been with the "Century of Inventions." **His speculations on laws would have been of no more practical use than Lord Worcester's speculations on steam-engines.** Some generations hence, perhaps, when legislation had found its Watt, an antiquarian might have published to the world the curious fact, that, in the reign of George the Third, there had been a man called Bentham, who had given hints of many discoveries made since his time, **and who had really, for his age, taken a most philosophical view of the principles of jurisprudence.**

Many persons have attempted to interpret between this powerful mind and the public. But, in our opinion, M. Dumont alone has succeeded. It is remarkable that, in foreign countries, where Mr. Bentham's works are known solely through the medium of the French version, his merit is almost universally acknowledged. Even those who are most decidedly opposed to his political opinions—the very chiefs of the Holy Alliance—have publicly testified their respect for him. In England, on the contrary, many persons who certainly entertained no prejudice against him on political grounds were long in the habit of mentioning him contemptuously. **Indeed, what was said of Bacon's Philosophy may be said of Bentham's.** It was in little repute among us, till judgments in its favour came from beyond sea, and convinced us, to our shame, **that we had been abusing and laughing at one of the greatest men of the age.**

https://archive.org/details/moraldarwinismho0000wike/page/108/mode/2up?view=theater

Typical of this approach was Denys Lambin **whose acclaimed critical edition of *De Rerum Natura*, published in Paris in 1563, was filled with the very highest praise for Lucretius the poet, carefully counterbalanced with condemnation for Lucretius the philosopher.**

https://archive.org/details/in.ernet.dli.2015.21897/page/n25/mode/2up?view=theater

The Stoics had a tremendous reputation for logic. In this department they were the successors, or rather the supersessors, of Aristotle. For after the death of Theophrastus the library of the Lyceum is said to have been buried underground at Scepsis until about a century before Christ. So that the Organon may actually have been lost to the world during that period. At all events under Strato, the successor of Theophrastus, who specialised in natural science, the school had lost its comprehensiveness. **Cicero**1 **even finds it consonant with dramatic propriety to make Cato charge the later Peripatetics with ignorance of logic!**
…

But, if the Stoics were strong in logic, they were weak in rhetoric.1 This strength and weakness were characteristic of the school at all periods. Cato is the only Roman Stoic to whom Cicero accords the praise of real eloquence. In the dying accents of the school, as we hear them in Marcus Aurelius, the imperial sage counts it a thing to be thankful for that he had learnt to abstain from rhetoric, poetic, and elegance of diction.2 The reader however cannot help wishing that he had taken some means to diminish the crabbedness of his style. **If a lesson were wanted in the importance of sacrificing to the Graces, it might be found in the fact that the early Stoic writers, despite their logical subtlety, have all perished, and that their remains have to be sought for so largely in the pages of Cicero.**

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0200%3Abook%3D1%3Achapter%3D10%3Asection%3D2

> [2] **For I suppose if Lacedaemon were to become desolate, and the temples and the foundations of the public buildings were left, that as time went on there would be a strong disposition with posterity to refuse to accept her fame as a true exponent of her power.** And yet they occupy two-fifths of Peloponnese and lead the whole, not to speak of their numerous allies without. Still, as the city is neither built in a compact form nor adorned with magnificent temples and public edifices, but composed of villages after the old fashion of Hellas, there would be an impression of inadequacy. **Whereas, if Athens were to suffer the same misfortune, I suppose that any inference from the appearance presented to the eye would make her power to have been twice as great as it is.**

https://en.wikisource.org/wiki/Lives_of_the_Eminent_Philosophers/Book_VII#cite_ref-89

180. **So renowned was he for dialectic that most people thought, if the gods took to dialectic, they would adopt no other system than that of Chrysippus. He had abundance of matter, but in style he was not successful.** In industry he surpassed every one, as the list of his writings shows; for there are more than 705 of them. He increased their number by arguing repeatedly on the same subject, setting down anything that occurred to him, making many corrections and citing numerous authorities. **So much so that in one of his treatises he copied out nearly the whole of Euripides' *Medea*, and some one who had taken up the volume, being asked what he was reading, replied, "The *Medea* of Chrysippus."** 181. Apollodorus of Athens in his *Collection of Doctrines*, wishing to show that what Epicurus wrote with force and originality unaided by quotations was far greater in amount than the books of Chrysippus, says, to quote his exact words, **"If one were to strip the books of Chrysippus of all extraneous quotations, his pages would be left bare."** So much for Apollodorus.

https://archive.org/details/academicquestio00cice/page/178/mode/2up?view=theater

Therefore, although in that discourse which was held with Torquatus we were not remiss, still we have now a much sharper contest before us with the Stoics. **For the statements which are made about pleasure are not expressed with any great acuteness or refinement.** For they who defend it are not skilful in arguing, nor have those who take the opposite side a very difficult cause to oppose. **Even Epicurus himself says, that one ought not even to argue about pleasure, because the decision respecting it depends on the sensations, so that it is sufficient for us to be warned respecting it, and quite unnecessary for us to be instructed.** And on this account, that previous discussion of ours was a simple one on both sides; for there was nothing involved or intricate in the discourse of Torquatus, and my own language, as it seems to me, was very clear. **But you are not ignorant what a subtle, or I might rather say, thorny kind of arguing [subtile vel spinosum potius disserendi genus] it is which is employed by the Stoics.**

> https://books.google.fi/books?id=6qHLEAAAQBAJ&lpg=PP1&hl=fi&pg=PT357#v=onepage&q&f=false
>
> To add insult to injury, intentionally or unintentionally (the former seeming more likely), the Latin phrase Schuyl employs when depicting these reprobates hindering solid Christian good sense – **“obscuris, intricatis et spinosis argutiis” – utilizing the Latin word “spinosus” meaning “prickly” or like “piercing thorns,”** plainly resorts to the same pun on Spinoza’s surname that his Sephardic opponents regularly employed.48

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Diodorus_Siculus/Introduction*.html#ref21

One mistake of method made it almost impossible for Diodorus to write either a readable story or an accurate history. So soon as he entered the period which allowed precise dating he became an annalist, or, in other words, he endeavoured to present under one year the events which took place in Greece, Sicily, Africa and Italy, to write a synchronistic universal history. For a closely related series of incidents which covered several years this meant that he either had to break the story as many times as there were years, or crowd the events of several years into one.
...

Again and again, and not alone in the Preface to the First Book, the Stoic doctrine of the *utilitas* of history is stressed, and nowhere does he demand that history be entertaining. Of the customs of Egypt he will mention, he tells us, only those which are especially strange and those which can be of most advantage to his readers (1.69.2), of its laws only those that can be of help to lovers of reading (1.77.1).
...

One merit even those critics who have dealt most severely with Diodorus accord him. Long speeches, happily used but unhappily introduced by Thucydides, Diodorus avoids, as he promises that he will do in the Preface to Book XX. With the exception of four instances he eliminates entirely that rhetorical device, which must have wearied even a contemporary audience.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Strabo/1B1*.html#ref43

3 As I was saying, Eratosthenes contends that the aim of every poet is to entertain, not to instruct. The ancients assert, on the contrary, that poetry is a kind of elementary philosophy, which, taking us in our very boyhood, introduces us to the art of life and instructs us, with pleasure to ourselves, in character, emotions, and actions. **And our School[46] goes still further and contends that the wise man alone is a poet.**

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Quintilian/Institutio_Oratoria/10A*.html#ref59

81 Proceeding to the philosophers, from whom Cicero acknowledges that he derived such a large portion of his eloquence, **we shall all admit that Plato is supreme whether in acuteness of perception or in virtue of his divine gift of style, which is worthy of Homer.** For he soars high above the levels of ordinary prose or, as the Greeks call it, pedestrian language, and seems to me to be inspired not by mere human genius, but, as it were, by the oracles of the god of Delphi.
...

84 **The ancient Stoics indulged their eloquence comparatively little. Still, they pleaded the cause of virtue, and the rules which they laid down for argument and proof have been of the utmost value. But they showed themselves shrewd thinkers rather than striking orators, which indeed they never aimed at being.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Quintilian/Institutio_Oratoria/12B*.html#ref11

Accordingly this exhortation of mine must not be taken to mean that I wish the orator to be a philosopher, since there is no other way of life that is further removed from the duties of a statesman and the tasks of an orator. 7 **For what philosopher has ever been a frequent speaker in the courts or won renown in public assemblies? Nay, what philosopher has ever taken a prominent part in the government of the state, which forms the most frequent theme of their instructions?** None the less I desire that he, whose character I am seeking to mould, should be a "wise man" in the Roman sense, that is, one who reveals himself as a true statesman, not in the discussions of the study, but in the actual practice and experience of life.

https://books.google.fi/books?id=eZSPCwAAQBAJ&lpg=PP1&hl=fi&pg=PA20#v=onepage&q&f=false

What especially sets later Stoicism apart from other schools of thought is the view that all theory, including what we would call theory or philosophizing about ethics, must serve an ethics in action. Theory and practice are inextricably intertwined at this point of view, but with an emphasis on practice. To the Stoics, positing pure thought (or even a higher state) as the goal of life and as practice (cf. Aristotle, *Pol.* 1325b) would make little sense, not in the least because they do not recognize a transcendent intelligible and noetic dimension to reality. For them, with their unified view of virtue in which all virtue entail one another, wisdom as the excellence of reason always constitutes *moral* virtue and being engaged *in the world* and a *web of social relations*.

> https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Cicero/de_Finibus/5*.html#ref15
>
> 13 The mind, on the other hand, and that dominant part of the mind which is called the intellect, possess many excellences or virtues, but these are of two main classes; one class consists of those excellences which are implanted by their own nature, and which are called non-volitional; and the other of those which, depending on our volition, are usually styled 'virtues' in the more special sense; **and the latter are the pre-eminent glory and distinction of the mind. To the former class belong receptiveness and memory; and practically all the excellences of this class are included under one name of 'talent,' and their possessors are spoken of as 'talented.'** The other class consists of the lofty virtues properly so called, which we speak of as dependent on volition, for instance, Prudence, Temperance, Courage, Justice, and the others of the same kind.
> ...
>
> The result will be that excellence of mind will be rated higher than excellence of body, **and the volitional virtues of the mind will surpass the non-volitional;** the former, indeed, are the 'virtues' specially so called, and are far superior, in that they spring from reason, the most divine element in man. For the inanimate or nearly inanimate creatures that are under nature's charge, all of them have their supreme good in the body; hence it has been cleverly said, as I think, about the pig, that a mind has been bestowed upon this animal to serve as salt and keep it from going bad. 14 But there are some animals which possess something resembling virtue, for example, lions, dogs and horses; in these we observe not only bodily movements as in pigs, but in some degree a sort of mental activity also**.** In man, however, the whole importance belongs to the mind, and to the rational part of the mind, which is the source of virtue; **and virtue is defined as the perfection of reason,[15] a doctrine which the Peripatetics think cannot be expounded too often.**

> [15] **This definition of moral virtue and the doctrine above of its superiority to intellectual excellence (the exact opposite of Aristotle's view) are Stoic tenets foisted on the Peripatetics by Antiochus.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Cicero/de_Finibus/Introduction*.html#ref3

> **Antiochus could only maintain his position by ignoring nice distinctions. The Ethics of Aristotle in particular seem to have fallen into complete oblivion.** Aristotle's cardinal doctrines are, that well-being consists not in the state of virtue but in the active exercise of all human excellences, and particularly of man's highest gift of rational contemplation; and that though for this a modicum of external goods is needed, these are but indispensable conditions, and in no way constituent parts, of the Chief Good.

Small wonder, then, that the later Stoics put so much emphasis on training (*meletê-askêsis*, as in Musonius Rufus fr. 6 Hense) as the indispensable bridge between theoretical insights and practice. **This notion, which has connections with the Socratic and Cynic traditions, encompasses much more than Aristotle's habituation, which is meant to shape the lower, irrational aspects of the soul (as in *Eth. Nic.* 2). The Stoics, with the potential and debated exception of Posidonius (see above), do not accept irrational aspects of the soul as existing independently from reason.** Hence, they argue, training and habituation involve a human being's entire disposition, including the process of learning to use one's reason correctly.
…

For the later Stoics, ethics in action means showing one's mettle in ordinary, everyday life circumstances and in one's given socio-political obligations. **For this reason, students are not meant to form settled attachments to a school, as increasingly happened, for instance, with the inner circles of the schools of Platonism.** Instead, the knowledge and training acquired through education has to be portable and to become fully interiorized, or digested as it were (Epictetus, *Diss*. 3.21.1-3; *Ench*. 46; Seneca *Ep*. 2.2-4, 84; *Ben*. 7.2.1). Thus Seneca and Epictetus show their own independence toward their Stoic predecessors and do not extol a Zeno, Cleanthes, or Chrysippus above all others. **"We Stoics," Seneca famously claimed, "are not subjects of a despot: each of us lays claim to his own freedom"** (*Ep*. 33.4). **If Chrysippus took the liberty to disagree with his teacher Cleanthes, "why, then, following the example of Chrysippus himself, should not every man claim his own freedom?"** (*Ep*. 113.23).

https://books.google.fi/books?id=9-8fIBVgCQYC&lpg=PP1&hl=fi&pg=PA134#v=onepage&q&f=false

Aristotle's distinction between apodictic and dialectical reasoning was accepted by the Stoics of the third century B.C. and thereafter. However, **the Stoics viewed dialectical reasoning not as a method of arriving at first principles** but as a method of analyzing arguments and defining concepts by distinction and synthesis of genus and species. And they lacked Aristotle's overriding concern for systematic exposition; **with them dialectics became an independent discipline,** not essentially different from logic but with strong elements also of rhetoric and grammar.

It was in its Stoic form, with the writings of Plato and Aristotle in the background, that Greek dialectics was imported into Rome in the republican period (second and first centuries B.C.). There it was taken up by the educated classes, including jurists, who applied it for the first time to prevailing legal institutions. The Greeks had never attempted such an application. The reasons for that are complex. The Greek cities did not experience the rise of a prestigious class of jurists entrusted with the development of law. Adjudication was by large popular assemblies, and those who argued before the assemblies practiced a mode of declamation that relied less on legal argument than on appeals to moral and political considerations. Moreover, the Greek philosophers did not recognize legal rules as starting points for reasoning. They professed an allegiance to a higher philosophical truth, attainable by observation and reason alone.22
…

Indeed, **Platonic thought attributed a transcendent reality to the idea of justice that inhibited the entrusting of its execution to lawyers.** Only the seeker after wisdom, the *philosophos*, was capable of governing, and then only when he had succeeded in his search and become a knower. **In Carl Friedrich's words, "The very transcendency of justice precludes [for Plato] its realization in a constitutional order." He adds that as a result constitutional law in the Western sense of the term "was unknown at Athens."**23

http://robertlstephens.com/essays/shafarevich/001SocialistPhenomenon.html#pagestart_13

> Though giving a detailed account of the life of the philosophers and guardians, Plato says almost nothing about the rest of the population--the artisans and peasants. Laws for them are determined by the philosophers in accordance with the basic principles expressed in the dialogue: "Nay, 'twould not be fitting... to dictate to good and honorable men. For most of the enactments that are needed about these things they will easily, I presume, discover." (425d)

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0168%3Abook%3D4%3Asection%3D425c

"But what, in heaven's name," said I, "about business matters, the deals[3] that men make with one another in the agora—[425d] and, if you please, contracts with workmen[1] and actions for foul language[2] and assault, the filing of declarations,[3] the impanelling of juries, the payment and exaction of any dues that may be needful in markets or harbors and in general market, police or harbor regulations and the like, can we bring[4] ourselves to legislate about these?"

2. τὰ τοιαῦτα is slightly contemptuous. **Specific commercial, industrial and criminal legislation was not compatible with the plan of the *Republic*,** and so Plato omits it here. Much of it is given in the *Laws*, but even there details are left to the citizens and their rulers. Cf. on 412 B.

3. Plato shows his contempt for the subject by this confused enumeration, passing without warning from contracts and torts to procedure and then to taxes, market, harbor and police regulations.

https://archive.org/details/newscienceofgiam030174mbp/page/n375/mode/2up?view=theater

1040 Now, because laws certainly came first and philosophies later, **it must have been from observing that the enactment of laws by the Athenian citizens involved their coming to agreement in an idea of an equal utility common to all of them severally, that Socrates began to adumbrate intelligible genera or abstract universals by induction,** that is by collecting uniform particulars which go to make up a genus of that in respect of which the particulars are uniform among themselves.

1041 Plato, reflecting that in such public assemblies the minds of particular men, each passionately bent on his private utility, are brought together in a dispassionate idea of common utility (according to the saying that men individually are swayed by their private interests but collectively they seek justice), raised himself to the meditation of the highest intelligible ideas of created minds, ideas which are distinct from these created minds and can reside only in God, **and thus he reached the height of conceiving the philosophical hero who commands his passions at will.**

1042 The way was thus prepared for the divine definition which Aristotle later gave us of a good law as a will free of passion, which is to say the will of a hero. He understood justice as queen of the virtues, seated in the spirit of the hero and commanding all the others. For he had observed legal justice seated in the spirit of the sovereign civil power and dictating prudence in the senate, fortitude in the armies and temperance at festivals, as well as the two forms of particular justice: **distributive justice in the public treasuries and commutative justice for the most part in the forum; the latter employing arithmetic proportion and the former geometric. He must have observed distributive justice in the census which is the basis of the popular commonwealths and which distributes honors and burdens in geometric proportion according to the patrimonies of the citizens.** For previously only arithmetic proportion had been understood; wherefore Astraea, heroic justice, was depicted for us with the scales, and in the Law of the Twelve Tables all the punishments—**which philosophers, moral theologians and professors writing on public law now say must be dispensed by distributive justice in geometric proportion**—all the punishments, we read, reduce either to the double (*duplio*) if pecuniary and to the like (*talio*) if corporal. And since the law of retaliation was invented by Rhadamanthus, he was made judge in the lower world, in which punishments are certainly distributed. **In Aristotle's *Ethics* retaliation was called Pythagorean justice,** invented by the Pythagoras whom we have revealed as founder of a nation in Magna Graecia, whose nobles were called Pythagoreans, as above noted. This invention would be a disgrace to the Pythagoras who later became a sublime philosopher and mathematician.

1043 **From all the above we conclude that these principles of metaphysics, logic and morals issued from the market place of Athens.** From Solon's advice to the Athenians, "Know thyself (as set forth above in one of the corollaries of our Poetic Logic), came forth the popular commonwealths, from the popular commonwealths the laws, and from the laws emerged philosophy; and Solon, who had been wise in vulgar wisdom, came to be held wise in esoteric wisdom. This may serve as a fragment of the history of philosophy told philosophically, **and a last reproof, of the many brought forth in this work, against Polybius who said that if there were philosophers in the world there would be no need of religions.** For [the fact is that] if there had not been religions and hence commonwealths, there would have been no philosophers in the world, and if human affairs had not been thus guided by divine providence there would have been no idea of either science or virtue.

https://archive.org/details/newscienceofgiam030174mbp/page/n79/mode/2up?view=theater

130 **This axiom dismisses from the school of our Science the Stoics who seek to mortify the senses and the Epicureans who make them the criterion. For both deny providence, the former chaining themselves to fate, the latter abandoning themselves to chance. The latter moreover affirm that the human soul dies with the body. Both should be called monastic or solitary philosophers.** On the other hand [this axiom] admits to our school the political philosophers, and first of all the Platonists, who agree with all the lawgivers on these three main points: that there is divine providence, that human passions should be moderated and made into human virtues, and that the human soul is immortal. Thus from this axiom are derived the three principles of this Science.

VI

131 **Philosophy considers man as he should be and so can be of service to but very few, who wish to live in the Republic of Plato, not to fall back into the dregs of Romulus.**

VII

132 **Legislation considers man as he is in order to turn him to good uses in human society.** Out of ferocity, avarice and ambition, the three vices which run throughout the human race, it creates the military, merchant and governing classes, and thus the strength, riches and wisdom of commonwealths. Out of these three great vices, which could certainly destroy all mankind on the face of the earth, it makes civil happiness.

http://www.ccel.org/g/gibbon/decline/volume2/chap44.htm#philosophy

The jurisprudence which had been grossly adapted to the wants of the first Romans, was polished and improved in the seventh century of the city, by the alliance of Grecian philosophy. **The Scaevolas had been taught by use and experience; but Servius Sulpicius was the first civilian who established his art on a certain and general theory.** (54) **For the discernment of truth and falsehood he applied, as an infallible rule, the logic of Aristotle and the stoics, reduced particular cases to general principles,** and diffused over the shapeless mass the light of order and eloquence. Cicero, his contemporary and friend, declined the reputation of a professed lawyer; but the jurisprudence of his country was adorned by his incomparable genius, which converts into gold every object that it touches. After the example of Plato, he composed a republic; and, for the use of his republic, a treatise of laws; in which he labors to deduce from a celestial origin the wisdom and justice of the Roman constitution. The whole universe, according to his sublime hypothesis, forms one immense commonwealth: gods and men, who participate of the same essence, are members of the same community; reason prescribes the law of nature and nations; and all positive institutions, however modified by accident or custom, are drawn from the rule of right, which the Deity has inscribed on every virtuous mind. From these philosophical mysteries, he mildly excludes the sceptics who refuse to believe, and the epicureans who are unwilling to act. The latter disdain the care of the republic: he advises them to slumber in their shady gardens**. But he humbly entreats that the new academy would be silent, since her bold objections would too soon destroy the fair and well ordered structure of his lofty system.** (55)

> 55. *Perturbatricem autem omnium harum rerum academiam, hanc ab Arcesila et Carneade recentem, exoremus ut sileat, nam si invaserit in haec, quae satis scite instructa et composita videantur, nimis edet ruinas, quam quidem ego placare cupio, submovere non audeo.* (de Legibus, i. 13.)
>
> **From this passage alone, Bentley (*Remarks on Free-thinking*, p. 250) might have learned how firmly Cicero believed in the specious doctrines which he has adorned.**

https://www.revilo-oliver.com/rpo/Reflections.html

I have often commented on the last paragraph of Cicero's *De natura deorum*, in which Cicero, the statesman, overrules Cicero, the philosopher, with a *raison d'état*. **Of the three major philosophic systems, Stoicism was the only one that enjoined patriotism and political action on men who had responsible positions in society.**

https://founders.archives.gov/documents/Adams/05-03-02-0001-0004-0016 **[3-4 December 1770]**

To use the words of a great and worthy man, a patriot, and an hero, and enlightned friend of mankind, and a martyr to liberty; I mean ALGERNON SIDNEY, who from his earliest infancy sought a tranquil retirement under the shadow of the tree of liberty, with his tongue, his pen, and his sword, **"The law, (says he,) no passion can disturb. Tis void of desire and fear, lust and anger. 'Tis *menc sine affectu;* written reason; retaining some measure of the divine perfection. It does not enjoin that which pleases a weak, frail man, but without any regard to persons, commands that which is good, and punishes evil in all, whether rich, or poor, high or low, —Tis deaf, inexorable, inflexible."**51 On the one hand it is inexorable to the cries and

lamentations of the prisoners; on the other it is deaf, deaf as an adder to the clamours of the populace.

> https://en.wikipedia.org/wiki/Lady_Justice
>
> The origin of Lady Justice was Justitia (or Iustitia), the goddess of Justice within Roman mythology. **Justitia was introduced by emperor Augustus, and was thus not a very old deity in the Roman pantheon.**
> …
>
> The blindfold was originally a satirical addition intended to show Justice as blind to the injustice carried on before her,[7] but it has been reinterpreted over time and is now understood to represent impartiality, the ideal that justice should be applied without regard to wealth, power, or other status. **The earliest Roman coins depicted Justitia with the sword in one hand and the scale in the other, but with her eyes uncovered.[8] Justitia was only commonly represented as "blind" since the middle of the 16th century.**

https://archive.org/details/historyrome12mommgoog/page/202/mode/2up?view=theater

This philosophy was really better adapted for Rome than for the land where it first arose. The objection of the pious believer, that **the god of the Stoic had neither sex nor age nor corporeality** and was converted from a person into a conception, had a meaning in Greece, but not in Rome. **The coarse allegorizing and moral purification, which were characteristic of the Stoical doctrine of the gods, destroyed the very marrow of the Hellenic mythology;** but the plastic power of the Romans, scanty even in their epoch of simplicity, had produced no more than a light veil enveloping the original intuition or the original conception, out of which the divinity had arisen — a veil that might be stripped off without special damage. Pallas Athene might be indignant, when she found herself suddenly transmuted into the conception of memory: Minerva had hitherto been in reality not much more.
…

The inclination also of the Stoa towards a casuistic morality and towards a systematic treatment of the professional sciences was quite to the mind of the Romans, especially of the Romans of this period, who no longer like their fathers practised in unsophisticated fashion self-government and good morals, but resolved the simple morality of their ancestors into a catechism of allowable and non-allowable actions; **whose grammar and jurisprudence, moreover, urgently demanded a methodical treatment,** without possessing the ability to develop such a treatment of themselves.
…

Thenceforth the most noted statesmen and scholars professed the Stoic philosophy—**among others Stilo and Quintus Scaevola, the founders of scientific philology and of scientific jurisprudence. The scholastic formality of system, which thenceforth prevails at least externally in these professional sciences and is especially associated with a fanciful, charade-like, insipid method of etymologizing, descends from the Stoa.**

https://www.gutenberg.org/cache/epub/18267/pg18267-images.html#Page_122

26. **Of all sciences philology at present is the most favoured,** its progress having been furthered for centuries by the greatest number of scholars in every nation who have had charge of the noblest pupils.
…

What if the truth were told about antiquity, and its qualifications for training people to live in the present?
…

If the world in general came to know what an unseasonable thing for us antiquity really is, philologists would no longer be called in as the educators of our youth.

The real Greeks, and their "watering down" through the philologists.

The future commanding philologist sceptical in regard to our entire culture, and therefore also the destroyer of philology as a profession.

https://web.oriel.ox.ac.uk/sites/default/files/psaila_l_essay_title_2.pdf

“The limits of my language mean the limits of my world.”

Ludwig Wittgenstein’s “*Tractatus Logico Philosophicus*,” published in 1921, was a pivotal work of the early 20th Century’s ‘linguistic turn’ – a time in which the importance of language was being investigated across many academic disciplines. The aim of Wittgenstein’s “*Tractatus*” is “to draw limit to thought”;1 he argues that for something to exist in the world – either imagined or physical – it must be possible to think of it.2 Therefore, the use of language to express thought is a means to map the boundaries of reality. The interaction between language and thought that Wittgenstein advocated was later labelled ‘linguistic relativism’, following the work of Edward Sapir and Benjamin Whorf.
…

George Orwell’s dystopian classic “1984”, poses questions concerning the nature of a language “designed not to extend but to diminish the range of thought” through the “reduction of vocabulary.”3 As Wittgenstein argues, for something to potentially exist in the world, it must be within the range of thought, which he believes to be reflected through the range of language. Therefore, decreasing the scope of language decreases the scope of thought, in turn decreasing the “limits of the world.” **For example, in Orwell’s world the word “free” is purged of its “heretical meaning” to suppress the public’s desire for political freedom, since they supposedly are no longer able to understand the concept.**

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Stoics

The part Panaetius took in philological and historical studies is characteristic of the man. **We know much of the results of these studies; of his philosophy technically we know very little.** He wrote only upon ethics, where historical knowledge would be of use. Crates of Mallus, one of his teachers, aimed at fulfilling the high functions of a “critic” according to his own definition—that the critic must acquaint himself with all rational knowledge. Panaetius was competent to pass judgment upon the critical “divination” of an Aristarchus (who was perhaps himself also a Stoic), and took an interest in the restoration of Old Attic forms to the text of Plato. Just then there had been a movement towards a wider and more liberal education, by which even contemporary Epicureans were affected. Diogenes the Babylonian had written a treatise on language and one entitled *The Laws*. **Along with grammar, which had been a prominent branch of study under Chrysippus, philosophy, history, geography, chronology and kindred subjects came to be recognized as fields of activity no less than philology proper.**

https://archive.org/details/latinitasandhel00smilgoog/page/n15/mode/2up?view=theater

There were perhaps three considerations which had weight with the Stoics in the formulation of their theory of style. (1) Their belief that to speak well was to speak the truth.1 (2) **Their conception that the function of an orator was merely to teach,**2 **and not as Cicero asserted "to teach, to delight, to move." This conception was an outgrowth of the Stoic doctrine of *ἀπάθεια*; they held that it was unworthy of an orator to cloud the reason of his audience by playing upon the emotions in any way.** (3) There was the general Stoic principle that anything to be ideal, whether speech or conduct, must be in harmony with nature. Given now an orator whose function is to speak the truth, to teach, and to use language that is in harmony with nature, it is easy to formulate a theory of style, the virtues of which shall be (1) pure and unperverted speech, (2) clearness, (3) precision, (4) conciseness, (5) appropriateness, (6) freedom from all artificial ornamentation. **And this was the Stoic theory which bore the name of *ἑλληνισμός* or Latinitas.** The reason why the first virtue gave its name to the theory, is quite evident, for the first virtue in a sense embraces the other five. **Speech that is pure and unperverted and in harmony with nature, will be of necessity clear, precise,**

concise, appropriate, and free from all artificiality. This is essentially the form in which we find it in its first extant enunciation, viz., that of Diogenes the Stoic of Babylon as it is preserved in Diogenes Laertius' life of Zeno (7, 59):

> https://en.wikisource.org/wiki/Lives_of_the_Eminent_Philosophers/Book_VII#cite_ref-29
>
> 58. There are, as stated by Diogenes[29] in his treatise on *Language* and by Chrysippus, five parts of speech: proper name, common noun, verb, conjunction, article.
> …
>
> 59. **There are five excellences of speech – pure Greek, lucidity, conciseness, appropriateness, distinction.** By good Greek is meant language faultless in point of grammar and free from careless vulgarity. Lucidity is a style which presents the thought in a way easily understood; conciseness a style that employs no more words than are necessary for setting forth the subject in hand; appropriateness lies in a style akin to the subject; distinction in the avoidance of colloquialism. **Among vices of style barbarism is violation of the usage of Greeks of good standing; while there is solecism when the sentence has an incongruous construction.**

As it was largely through Diogenes of Babylon and his pupil Panaetius that the Stoic doctrine was established at Rome, it may be worth while to examine the foregoing statement with some care. Some light for its interpretation may be had from Herodian who has given a similar enumeration of the *ἄρεταί λόγον* in his treatise *de Barbarismo et Soloecismo*,3 **Herodian presents three views that were held concerning the proper basis for *ἑλληνισμός*.** He says: "Some say that *ἑλληνισμός* is the poet," *i.e.* Homer (he means that a correct diction must be based on the usage of Homer), "others say that *ἑλληνισμός* is the common dialect of the Greeks who went against Ilium, others say that *ἑλληνισμός* is etymology," *i.e.* a correct diction must be based on a careful etymological study of words. These three views concerning the proper basis of *ἑλληνισμός* are important to our discussion only as they afford one of a number of proofs that the idea of *ἑλληνισμός* is thoroughly Stoic. **It was a Stoic tendency and almost a Stoic principle to look back for their ideals to the Golden Age when all things were perfect, even written and spoken language.** There, if anywhere, would be found the "sermo purus et incorruptus." And these three views concerning the proper basis of *ἑλληνισμός* are but three attempts to get back as close as possible to the Golden Age and its perfection. The first view was that a correct diction must be based on the usage of Homer, the earliest poet; the second, that it must be based on the dialect of the pre-Homeric Greeks; the third, that it must be based on a careful search after root meanings, the earliest meanings of words. **A careful search for, and a high valuation of the "verba antiqua" characterize the influence of the Stoic theory at all periods.**

http://www.perseus.tufts.edu/hopper/text?doc=Perseus:text:1999.04.0104:entry=crates-bio-3

Crates (Κράτης), of MALLUS in Cilicia, the son of Timocrates, **is said by Suidas (*s.v.*) to have been a Stoic philosopher, but is far better known as one of the most distinguished of the ancient Greek grammarians.** He lived in the reign of Ptolemy Philometor, and was contemporary with Aristarchus, in rivalry with whom he supported the fame of the Pergamene school of grammar against the Alexandrian, and the system of *anomaly* (ἀνωμαλία) against that of *analogy* (ἀναλογία). He is said by Varro to have derived his grammatical system from a certain Chrysippus, who left six books περὶ τῆς ἀνωμαλίας. **He was born at Mallus in Cilicia, and was brought up at Tarsus,** whence he removed to Pergamus, and there lived under the patronage of Eumenes II. and Attalus II. He was the founder of the Pergamene school of grammar, and seems to have been at one time the chief librarian. **About the year 157 B.C., shortly after the death of Ennius, Crates was sent by Attalus as an ambassador to Rome, where he introduced for the first time the study of grammar.** The results of his visit lasted a long time, as may be observed especially in the writings of Varro.
…

Among the ancients themselves he enjoyed a reputation little, if at all, inferior to that of Aristarchus. The school which he founded at Pergamus flourished a considerable time, and was the subject of a work by Ptolemy of Ascalon, entitled περὶ τῆς Κρατητείου αἱρέσεως.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Suetonius/de_Grammaticis*.html

1 1 1 **The study of Grammar was not even pursued at Rome in early days, still less held in any esteem; and naturally enough, since the state was then still uncultivated and given to war, and had as yet little leisure for liberal pursuits.** The beginnings of the subject, too, were humble, for the earliest teachers, who were also both poets and Italian[2] Greeks (I refer to Livius and Ennius, who gave instruction in both tongues at home and abroad, as is well known), did no more than interpret the Greeks or give readings from whatever they themselves had composed in the Latin language.
…

2 1 1 **In my opinion then, the first to introduce the study of grammar into our city was Crates of Mallos, a contemporary of Aristarchus.** He was sent to the senate by king Attalus between the second and

third Punic wars, at about the time when Ennius died; and having fallen into the opening of a sewer in the Palatine quarter and broken his leg, he held numerous and frequent conferences during the whole time both of his embassy and of his convalescence, at which he constantly gave instruction, and thus set an example for our countrymen to imitate.
…

3 1 1 The foundations of the study were laid, and it was advanced in all directions, by Lucius Aelius of Lanuvium and his son-in-law Servius Clodius, both of whom were Roman knights and men of wide and varied experience in scholarship and statecraft.

Aelius had two surnames, for he was called Praeconinus because his father had followed the occupation of a crier,[3] and Stilo[4] because he used to write speeches for all the great men of the day; and he was so devoted to the aristocratic party, that he accompanied Metellus Numidicus into exile.
…

After this the science constantly grew in favour and popularity, so much so that even the most eminent men did not hesitate to make contributions to it, while at times there are said to have been more than twenty well-attended schools in the city.

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Stilo_Praeconinus,_Lucius_Aelius

STILO PRAECONINUS, LUCIUS AELIUS, (*c.* 154-74 B.C.), of Lanuvium, the earliest Roman philologist, was a man of distinguished family and belonged to the equestrian order.
…

His most famous pupils were Varro and Cicero, and amongst his friends were Coelius Antipater, the historian, and Lucilius, the satirist, who dedicated their works to him. According to Cicero, who expresses a poor opinion of his powers as an orator, Stilo was a follower of the Stoic school.

> http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A2007.01.0048%3Abook%3D1%3Asection%3D23
>
> **And therefore we may follow the Stoics, who diligently investigate the etymology of words;** and we may accept their statement that “good faith” is so called because what is promised is “made good,” although some may find this derivation[2] rather farfetched.

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Varro,_Marcus_Terentius

The chief teacher of Varro was L. Aelius Stilo, the first systematic student, critic and teacher of Latin philology and literature, and of the antiquities of Rome and Italy. Varro also studied at Athens, especially under the philosopher Antiochus of Ascalon, whose aim it was to lead back the Academic school from the scepticism of Arcesilaus and Carneades to the tenets of the early Platonists, as he understood them. He was really a stoicizing Platonist; and this has led to the error of supposing Varro to have been a professed Stoic. The influence of Antiochus is clearly to be seen in many remains of Varro's writings.
…

The second section of Varro's works, those on history and antiquities, form to the present day the basis on which a large part of our knowledge of the earlier Roman history, and in particular of Roman constitutional history, ultimately rests. **These writings were used as a quarry by the compilers and dilettanti of later times, such as Pliny, Plutarch, Gellius, Festus, Macrobius, and by Christian champions like Tertullian, Arnobius and Augustine, who did not disdain to seek in heathen literature the means of defending their faith.** These men have saved for us a few remains from the great wreck made by time. Judging from what has been casually preserved, if any considerable portion of Varro's labours as antiquarian and historian were to be now discovered, scholars might find themselves compelled to reconstruct the earlier history of the Roman republic from its very foundations. **Varro's greatest predecessor in this field of inquiry, the man who turned over the virgin soil, was Cato the Censor. His example, however, seems to have remained unfruitful till the time of Varro's master, Lucius Aelius Stilo Praeconinus.** From his age to the decay of Roman civilization there were never altogether wanting men devoted to the study of their nation's past; but none ever pursued the task with the advantages of Varro's comprehensive learning, his indefatigable industry and his reverent yet discriminating regard for the men and the institutions of the earlier ages.
…

The fifth, sixth and seventh books give Varro's views on the etymology of Latin words. The principles he applies are those which he had learned from the philosophers of the Stoic school: Chrysippus, Antipater and others. **The study of language as it existed in Varro's day was thoroughly dominated by Stoic influences.**

https://archive.org/details/latinitasandhel00smilgoog/page/n57/mode/2up?view=theater

The Stoics had given themselves to a thorough study of grammar and had invented an elaborate grammatical terminology, with this one purpose in view, viz., that their speakers and writers whose sole function was to speak the truth and impart instruction, might have at their command language that was pure and in harmony with nature, – language that would serve as a proper vehicle for the precise and accurate transfer of thought. **That this was the real purpose of the earlier grammatical studies of the Stoics, there can be no doubt. And even in the days of Fronto, when the real purpose that had given birth to them both had almost been forgotten, grammar was still wedded to the Stoic theory of style.** This is proved by the fact that in the grammatical treatise *de Barbarismo et Soloecismo*, which Herodian dedicated to the Stoic Marcus Aurelius, a prominent place is given to an enumeration of the *ἄρεταί λόγου*, which constituted a theory of style almost identical with that which had been enunciated three hundred years earlier by Diogenes the Stoic of Babylon.
…

On page eleven he says: **"It is clear that with him (Fronto) oratory depended for its success almost wholly on the choice of words."** Then he devotes more than a page to quotations from Fronto, establishing this statement. But this fine differentiation of synonyms, this search after *the* word is the Stoic *κυριολογία*.

On page thirteen he comments at length on Fronto's fondness for the pre-Ciceronian writers and his archaizing tendencies. He says: **"Nor must we suppose that Fronto contented himself with merely lauding these antiquated worthies; he got copies to be made of them and dispatched them to his imperial pupil."** In pointing out this very marked characteristic of Fronto, Professor Ellis has failed to observe in it but an example of the general archaizing tendency of the Stoics, which was based upon the belief that the earliest speech was the purest and that the best models of style were those ancient writers who were nearest that Golden Age when all speech was in harmony with nature.
…

It seems clear that the Stoic *ἄρεταί λόγου* dominated the literary activities of Fronto and his contemporaries, and gave the impulse to the grammatical and lexicographical studies for which the age was noted. It must be admitted, however, that, although these *ἄρεταί* were dominant, the purpose which had given rise to the formulation of the theory – and to each of these virtues of style, – had largely been forgotten.

It is quite evident that Fronto in seeking for *συντομία* did not have in mind the avoidance of extraneous and artificial embellishment, but rather the fear of wearying his auditors with a style that was too copious. Again it must be admitted that **while the early Stoic sought *κυριολογία* because of his desire to state the truth with precision, Fronto seems to have sought it chiefly as a means of rhetorical embellishment.** His search for the "verbum inopinatum et insperatum" was prompted by a desire to produce in his hearers a certain intellectual titillation and delectation. Even in following the Stoic archaizing tendency, Fronto may not have been influenced altogether by the early Stoic motive, *i.e.*, a desire for the oldest, purest words. It is likely that here too he had in mind somewhat the embellishment of his style. For as Quintilian says, the "verba antiqua" have about them a certain "novitas," "delectatio" and "maiestas." **We read in the letters of Dante Gabriel Rossetti how the poet read the early English ballads in search of "stunning old words" that would enchain attention and lend a certain dignity and charm of strangeness to his verses.**

So this theory of style which was formulated by those who sought simply "docere" has in the age of Fronto been seized and appropriated by those whose chief object is "delectare." **And although its *ἄρεταί λόγου* remain practically unchanged, the theory which in its origin was wholly at enmity with all that savored of rhetoric, has itself degenerated into a style as truly rhetorical as was that of Gorgias or Cicero.**
…

The evidence of the Stoic theory of style in the *Noctes Atticae* is so varied and so voluminous that it is difficult to give it a full and effective presentation. On nearly every page there is some phrase to remind one of the "sermo purus et incorruptus" which constituted the *Latinitas* of Varro and his predecessors.
…

This defense of Cicero in itself, even if the writings of Gellius were not saturated with the Stoic terminology, would be evidence that there were those in this age who held an ideal of style, directly opposed to that of Cicero.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Gellius/10*.html#ref16

> 15 But if anyone has so rustic and so dull an ear that this brilliant and delightful speech and the harmonious arrangement of Cicero's words do not give him pleasure; **if he prefers the earlier oration because it is unadorned, concise and unstudied, yet has a certain native charm, and because it has, so to say, a shade and colour of misty antiquity** – let such a one, if he has any judgment at all, study the address in a similar case of Marcus Cato, a man of a still earlier time, to whose vigour and flow of language Gracchus could never hope to attain.

…

Again in the fourteenth chapter of the sixth book **he clearly defines this type of speech in describing the "oratio modesta et sobria" of Diogenes the Stoic of Babylon.** He characterizes the style as "gracilis"; its virtues are "venustas et subtilitas"; its faults are exemplified by those "ieiunidici et squalentes" who fall short in their attempt to be "graciles"; as an example of this type among the orators Menelaus is mentioned whose name had been used in a similar way by both Quintilian and the Younger Pliny; **among the poets the representative given is Lucilius who, three hundred years before, had presented the Stoic views of style in the ninth book of his satires. With regard to embellishment, the thing in respect to which the Ciceronian and Stoic styles diverged the most, Gellius seems to have held almost the same view as Lucilius.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Gellius/6*.html#ref78

> 6 **But true and genuine Latin examples of these styles are said by Marcus Varro[79] to be: Pacuvius of the grand style, Lucilius of the plain, and Terence of the middle.** 7 But in early days these same three styles of speaking were exemplified in three men by Homer: the grand and rich in Ulysses, the elegant and restrained in Menelaus, the middle and moderate in Nestor.
>
> 8 This threefold variety is also to be observed in the three philosophers whom the Athenians sent as envoys to the senate at Rome, to persuade the senators to remit the fine which they had imposed upon the Athenians because of the sack of Oropos;[80] and the fine amounted to nearly five hundred talents. 9 The philosophers in question were Carneades of the Academy, Diogenes the Stoic, and Critolaus the Peripatetic. When they were admitted to the House, they made use of Gaius Acilius, one of the senators, as interpreter; but beforehand each one of them separately, for the purpose of exhibiting his eloquence, lectured to a large company. 10 **Rutilius[81] and Polybius[82] declare that all three aroused admiration for their oratory, each in his own style. "Carneades," they say, "spoke with a vehemence that carried you away, Critolaus with art and polish, Diogenes with restraint and sobriety."**

https://eprints.nottingham.ac.uk/11295/1/DISSERTATIONFINALVERSION.pdf

> 4. S.D. Olson, *Athenaeus of Naucratis, The Learned Banqueters* Vol 1 (Cambridge Ma. 2006) xi-xii and B. Baldwin, 'Athenaeus and his work' *Acta Classica* 19 (1976) 21-42, esp. 34, have argued against the early third century, as the latest reference to an external event or person is the emperor Commodus, who reigned 180-192 AD. It seems that he is dead by the time of writing, which would place Athenaeus at the most two decades after Pausanias. **The character Ulpian is not to be identified with the jurist Ulpian, who died in AD 228, as was thought by Georg Kaibel in his Teubner edition of Athenaeus (vol. 1, Leipzig 1887, v-vii), but with his father who was, like the character, a grammarian and who died, like the character, a peaceful death.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Athenaeus/1A*.html

> **Of orators there was a company as numerous as that of the Cynics, against whom, as well as all the other speakers, Ulpian of Tyre inveighed.** He, through the constant investigation which he carries on at all hours in the streets, public walks, bookshops, and baths, has won a name that distinguishes him better than his own, Ceituceitus.[5] **This gentleman observed a law peculiar to himself, of never tasting food until he had asked whether or not a word was to be found in literature:** is, for example, the word *hora* ("season") found signifying part of a day?[6]

Ulpian o Keitoukeitos. The Influence of the Stoic Theory of Style in Athenaeus on JSTOR

Quintilian's statement (5, 14, 34): *iurisconsulti, quorum summus circa verborum proprietatem labor est,* can be confirmed by hundreds of citations from the *Digest.*2

Ulpian, whatever his philosophy may have been, had inherited from his Stoic predecessors in the law their traditions about purity and precision of diction.1

> 1. Perhaps the most striking example of Ulpian's indebtedness to the Stoics may be found in his definition of jurisprudence which occurs at the very opening of the Institutes of Justinian. **"Jurisprudentia est divinarum atque humanarum rerum notitia iusti atque iniusti scientia." This is simply a combination of the Stoic definitions of *σοφία* and *φρόνησις*.**

…

Out of one chapter of the Digest (50, 16) can be gathered more than seventy similar examples from Ulpian. It appears that this Stoic virtue of style *κυριολογία*, with its kindred archaizing tendency that often manifested itself in etymological studies, were for Ulpian matters of practical importance, necessary to precision of definition in the law. And so it is not strange that, when he dined with the deipnosophists, this should be his principal topic of conversation, in the discussion of which he could out-rhetorician even the rhetoricians.

https://en.wikisource.org/wiki/1911_Encyclopædia_Britannica/Stoics

It has been well said that the old heroes of the republic were unconscious Stoics, fitted by their narrowness, their stern simplicity and devotion to duty for the almost Semitic earnestness of the new doctrine. **In Greece its insensibility to art and the cultivation of life was a fatal defect;** not so with the shrewd men of the world, desirous of qualifying as advocates or jurists. It supplied them with an incentive to scientific research in archaeology and grammar; **it penetrated jurisprudence until the belief in the ultimate identity of the *jus gentium* with the law of nature modified the praetor's edicts for centuries.** Even to the prosaic religion of old Rome, with its narrow original conception and multitude of burdensome rites, it became in some sort a support. **Scaevola, following Panaetius, explained that the prudence of statesmen had established this public institution in the service of order midway between the errors of popular superstition and the barren truths of enlightened philosophy.**

> https://en.wikisource.org/wiki/Nicene_and_Post-Nicene_Fathers:_Series_I/Volume_II/City_of_God/Book_IV/Chapter_27
>
> **It is recorded that the very learned pontiff Scævola[1] had distinguished about three kinds of gods—one introduced by the poets, another by the philosophers, another by the statesmen.** The first kind he declares to be trifling, because many unworthy things have been invented by the poets concerning the gods; the second does not suit states, because it contains some things that are superfluous, and some, too, which it would be prejudicial for the people to know. It is no great matter about the superfluous things, for it is a common saying of skillful lawyers, "Superfluous things do no harm."[2] But what are those things which do harm when brought before the multitude? "These," he says, "that Hercules, Æsculapius, Castor and Pollux, are not gods; for it is declared by learned men that these were but men, and yielded to the common lot of mortals." What else? **"That states have not the true images of the gods; because the true God has neither sex, nor age, nor definite corporeal members."**
> …
>
> And, truly, in these same books, Scævola is not silent as to his reason for rejecting the poetic sort of gods,—to wit, "**because they so disfigure the gods that they could not bear comparison even with good men,** when they make one to commit theft, another adultery; or, again, to say or do something else basely and foolishly; as that three goddesses contested (with each other) the prize of beauty, and the two vanquished by Venus destroyed Troy; that Jupiter turned himself into a bull or swan that he might copulate with some one; that a goddess married a man, and Saturn devoured his children; that, in fine, there is nothing that could be imagined, either of the miraculous or vicious, which may not be found there, and yet is far removed from the nature of the gods."

---

http://www.ccel.org/g/gibbon/decline/volume2/chap44.htm#praise

In the selection of ancient laws, [Justinian] seems to have viewed his predecessors without jealousy, and with equal regard: the series could not ascend above the reign of Adrian, and the narrow distinction of Paganism and Christianity, introduced by the superstition of Theodosius, had been abolished by the consent of mankind. But the jurisprudence of the Pandects is circumscribed within a period of a hundred years, from the perpetual edict to the death of Severus Alexander: the civilians who lived under the first Caesars are seldom permitted to speak, and only three names can be attributed to the age of the republic. The favorite of Justinian (it has been fiercely urged) was fearful of encountering the light of freedom and the gravity of Roman sages. **Tribonian condemned to oblivion the genuine and native wisdom of Cato, the Scaevolas, and Sulpicius; while he invoked spirits more congenial to his own, the Syrians, Greeks, and Africans, who flocked to the Imperial court to study Latin as a foreign tongue, and jurisprudence as a lucrative profession.** But the ministers of Justinian, (78) were instructed to labor, not for the curiosity of antiquarians, but for the immediate benefit of his subjects. It was their duty to select the useful and practical parts of the Roman law; and the writings of the old republicans, however curious or excellent, were no longer suited to the new system of manners, religion, and government.

https://archive.org/details/greeks-romans-germans/page/335/mode/2up?view=theater

The perversion of the Roman legal tradition through racial miscegenation ultimately meant that "ink was stronger than blood"61 **– a dash of pen, and no longer their blood, determined a person's status. The simple tools of convention and freedom of choice were more important than biological necessity.** Schachermeyr made his indictment sharper and more specific by naming two jurists of the late empire, Ulpian62 and Papinian,63 both Levantine North Africans, who had left their nefarious mark on a thoroughly Judaized Roman law. Ferdinand Fried followed Schachermeyr's lead, **berating the "Phoenician-Semitic" Ulpian and the "Syrian" Papinian, as well as Salvius Julian, originally from "Africa," and Julius Paulus, "the most important among them, who was in all probability of Semitic origin."**64

https://www.constitution.org/sps/sps11.htm

1. *Ulpianus, On Taxes, Book I.*

It should be remembered that there are certain colonies subject to the Italian Law, as, for example, the magnificent colony of Tyre, in Phoenician Syria (where I was born), [Syria Phoenice splendidissima Tyriorum colonia, unde mihi origo est] the most noble of all, most ancient in point of time, warlike, and most constant in observance of the treaties which it made with the Romans. The Divine Severus and Our Emperor conferred upon it the privileges of an Italian city, on account of the extraordinary and distinguished fidelity which it always manifested in its intercourse with the Roman government.

https://ccel.org/g/gibbon/decline/volume1/chap2.htm#COL

The municipal cities insensibly equalled the rank and splendour of the colonies; and in the reign of Hadrian, it was disputed which was the preferable condition, of those societies which had issued from, or those which had been received into the bosom of Rome. (33)

> 33. Aul. Gell. Noctes Atticae, xvi. 13. **The emperor Hadrian expressed his surprise, that the cities of Utica, Gades, and Italica, which already enjoyed the rights of 'Municipia', should solicit the title of colonies.** Their example, however, became fashionable, and the empire was filled with honorary colonies.

https://en.wikipedia.org/wiki/Tyre,_Lebanon#Roman_period_(64_BCE_%E2%80%93_395_CE)

In 64 BCE the area of "Syria" finally became a province of the late Roman Republic, which was itself about to become the Roman Empire.[52] **Tyre was allowed to keep much of its independence as a "civitas foederata".[53]** A decree found at Tyre implies that Marcus Aemilius Scaurus – Pompey's deputy in Syria – played the key role in granting Tyre the privileged status of remaining a free city. Scaurus did apparently so "*against a certain payment*".[54]

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Hadrumetum

The town was originally a Phoenician colony founded by Tyrians long before Carthage (Sallust, Jug. 19). It became subject to Carthage, but lost none of its prosperity. Often mentioned during the Punic Wars, it was captured by Agathocles in 310, and was the refuge of Hannibal and the remnants of his army after the battle of Zama in 202. During the last Punic War it gave assistance to the Romans; **after the fall of Carthage in 146 it received an accession of territory and the title of *civitas libera*** (Appian, *Punica*, xciv.; *C.I.L.* i. p. 84).
…

Trajan made it a Latin colony under the title of *Colonia Concordia Ulpia Trajana Augusta Frugifera Hadrumetina*; a dedication to the emperor Gordian the Good, found by M. Cagnat at Susa in 1883 gives these titles to the town, and at the same time identifies it with Susa.

https://en.wikipedia.org/wiki/Pupput

A settlement existed here as early as the 1st century BC, **and this may have been of Berber-Punic origin. It was a simple vicus in Carthaginian territory at the time of the Roman Emperor Antoninus Pius (2nd century AD).[5] The Roman politician Salvius Julianus is thought to have been born in the village and it may be due to him that Pupput became an honorary Colonia under the Emperor Commodus (185-192).[6]** At this time the city was probably a satellite town of its neighbour Neapolis. The earliest documentary record of the city was in 168 when it was promoted to the status of a municipium governed by an elected council.

> **Madauros,** the emperor Septimius Severus of Lepcis Magna, the Christians Tertullian and Cyprian of Carthage, and Arnobius of Sicca and his pupil Lactantius; the angelic doctor Augustine of Thagaste, the epigrammatist Luxorius of Vandal Carthage, **and perhaps the biographer Suetonius,** and the poet Dracontius.—*Paul MacKendrick, The North African Stones Speak (1969), UNC Press, 2000, p. 326*

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.04.0104%3Aentry%3Djulianus-salvius-bio-1

Julianus, Salvius: an eminent Roman jurist, who flourished under Hadrian and the Antonines. Of his private history little is known, and different opinions have been held as to the place of his birth. **Many of his biographers (as Rivallius, Val. Forsterus, Pancirolus, Rutilius, Bertrandus, Guil. Grotius) make him a native of Milan (Insuber Mediolanensis), while the majority of more modern writers say that he was born at Hadrumnetum, a Phoenician colony on the coast of Africa.** These opposite opinions are both grounded on a passage of Spartianus (*Did. Julian*. 100.1), where it is asserted that the paternal grandfather of the emperor who ascended the throne after Pertinax came from Mediolanum, and the maternal grandfather from Hadrumetum. **It is well ascertained that Salvius Julianus the jurist was a *maternal* ancestor of the emperor Didius Julianus, and it is probable that, according to the express testimony of Spartianus (*l.c.*), the jurist was the great-grandfather (*proavus*) of the emperor,** not, as Politianus asserts (*Epist. ad Jac. Modestum*), the uncle, nor, as Paulus Diaconus (*Hist. Misc.* 10.20) would make him, the grandfather. Eutropius (8.9) hesitates. "Salvius Julianus," says he, "nepos vel, secundum Lampridium, pronepos Salvii Juliani, qui sub Hadriano perpetuum composuit edictum."

https://en.wikipedia.org/wiki/Salvius_Julianus#Among_modern_scholars

Professor William Warwick Buckland and Professor Peter Stein take stock of Iulianus, his rôle and style, and compare him to a great jurist who flourished during the 18th century:[46]

> No other jurist exercised so great an influence on the destinies of the law.[47]

His *Digest* was

> a comprehensive treatise on both civil and praetorian law. ... **The principal characteristics of Julian's work seem to be a very lucid style and a clear recognition of the fact that legal conceptions must move with the times. He seems to have played somewhat the part which Lord Mansfield did in English law.** He did a great work of co-ordination and generalisation, sweeping away unreal and pedantic distinctions. [Prof.] Karlowa justly observes that the appearance of Julian was epoch-making.[48]

https://en.wikipedia.org/wiki/Aemilius_Papinianus

Little is known about Papinian. He was of Arab origin and birth and a native of Emesa, **for he is said to have been a kinsman of Septimius Severus' second wife, Julia Domna,[4] who was a member of the Emesene dynasty.**

> https://books.google.fi/books?id=Hs2DDwAAQBAJ&lpg=PP199&hl=fi&pg=PT199#v=onepage&q&f=false
>
> All the world is full of knowing men, of most learned schoolmasters, and vast libraries; and it appears to me as a truth, **that neither in Plato's time, nor Cicero's, nor Papinian's, there was ever such conveniency for studying as we see at this day there is.**

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.04.0104%3Aentry%3Dpaulus-julius-bio-2

Paulus, Julius: one of the most distinguished of the Roman jurists, **has been supposed, without any good reason, to be of Greek origin, and from a Phoenician town.** Others conjecture that he was a native of Patavium (Padua), because there is a statue there, with an inscription, Paulus; but the statue and inscription may refer to another Paulus (Gellius, 5.4, 19.7). Paulus was in the auditorium of Papinian (*Dig*. 29. *tit*. 2. *s*. 97; 49. *tit*. 14. *s*. 50), and consequently was acting as a jurist in the joint reigns of Septimius Severus and Antoninus Caracalla, and also during the reign of Caracalla.
...

Paulus was perhaps the most fertile of all the Roman law writers, and there is more excerpted from him in the Digest than from any other jurist, except Ulpian. **It is said that there are 2462 excerpts from Ulpian, in the Digest, and 2083 from Paulus, or 2080, according to Puchta**

(*Cursus*, &c. vol. i. p. 458), which make about one sixth of the whole Digest. The excerpts from Paulus and Ulpian together make about one half of the Digest. Cervidius Scaevola, Paulus, and Ulpian, are named by Modestinus (*Dig*. 27. *tit*. 2. *s*. 13.2), who was the last of the great jurists, τῶν νομικῶν κορυφαίους: Paulus is honoured by Gordian with the title "prudentissimus" (*Coa*. 5. *tit*. 4. *s*. 6). It has been objected to him that his style is too condensed, and that he is sometimes obscure; but his style is as good as that of other writers of the period, though not so easy as that of Ulpian. **Some writers have discovered something of Grecism in him, which is made an argument in favour of his Greek origin.**

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.04.0104%3Aentry%3Dmodestinus-herennius-bio-1

Modestinus often cites Ulpian, and he is cited by Aurelius Arcadius Charisius. **Though Modestinus is the latest of the great Roman jurists, he ranks among the most distinguished.** There are 345 excerpts in the *Digest* from his writings, the titles of which show the extent and variety of his labours.

https://en.wikipedia.org/wiki/Diocletian#Legal

Admittedly, **Diocletian's praetorian prefects – Afranius Hannibalianus, Julius Asclepiodotus, and Aurelius Hermogenianus** – aided in regulating the flow and presentation of such paperwork, but the deep legalism of Roman culture kept the workload heavy.[256] Emperors in the forty years preceding Diocletian's reign had not managed these duties so effectively, and their output in attested rescripts is low. Diocletian, by contrast, was prodigious in his affairs: **there are around 1,200 rescripts in his name still surviving, and these probably represent only a small portion of the total issue.** [257] The sharp increase in the number of edicts and rescripts produced under Diocletian's rule has been read as evidence of an ongoing effort to realign the whole Empire on terms dictated by the imperial center.[258] Under the governance of the jurists Gregorius, Aurelius Arcadius Charisius, and Hermogenianus, the imperial government began issuing official books of precedent, collecting and listing all the rescripts that had been issued since the reign of Hadrian (r. 117-138).[259] **The Codex Gregorianus includes rescripts up to 292, which the Codex Hermogenianus updated with a comprehensive collection of rescripts issued by Diocletian in 293 and 294.**[243] Although the very act of codification was a radical innovation, given the precedent-based design of the Roman legal system,[260] the jurists were generally conservative, and constantly looked to past Roman practice and theory for guidance.[261] **They were probably given more free rein over their codes than the later compilers of the *Codex Theodosianus* (438) and *Codex Justinianus* (529) would have.** Gregorius and Hermogenianus's codices lack the rigid structuring of later codes,[262] and were not published in the name of the emperor, but in the names of their compilers.[263]

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.04.0104%3Aentry%3Dcharisius-aurelius-arcadius-bio-1

Herennius Modestinus, who was living in the reign of Gordianus III., is usually considered to be the last jurist of the classical period of Roman jurisprudence. "Hic oracula jurisconsultorum obmutuere," says the celebrated Jac. Godefroi (*Manuale Juris*, 1.7), "sic ut ultimum JCtorum Modestinum dicere vere liceat." For an interval of 80 or 90 years after Modestinus, no jurist appears whose works are honoured with citation in the Digest, unless Julius Aquila or Furius Anthianus belongs to that interval. The only two who can be named with certainty as posterior to Modestinus are Charisius and Hermogenianus. Of these two, the priority of date is probably, for several reasons, to be assigned to the former. It may be here mentioned, that Hermogenianus occupies the last place in the Florentine Index.
...

Both the matter and the language of the extracts from Charisius in the Digest mark the declining age of jurisprudence and Latinity. The matter betrays the mere compiler.

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.04.0104%3Aentry%3Dhermogenianus-bio-1

Jacques Godefroi, in the commencement of his Prolegomena to the Theodosian Code (vol. i. p. 193), cites several passages which make it likely that Hermogenianus survived Constantine, and wrote under the reign of his sons. Thus, in *Dig*. 28. *tit*. 1. *s*. 41, *Dig*. 39. *tit*. 4. *s*. 10, *Dig*. 49. *tit*. 14. *s*. 46.7, he speaks of *principes* and *imperatores* in the plural number.
...

Before his time, the living spirit of jurisprudence had departed. He is a mere compiler, and his language, like that of Charisius, is infected with barbarisms.

https://archive.org/details/orientalreligio00cumogoog/page/n38/mode/2up?view=theater

One cannot however deny Rome the glory of having elaborated a system of private law that was logically deduced from clearly formulated principles and was destined to become the fundamental law of all civilized communities. **But even in connection with this private law, where the originality of Rome is uncontested and her preeminence absolute, recent researches have shown with how much tenacity the Hellenized Orient maintained its old legal codes, and how much resistance local customs, the woof of the life of nations, offered to unification. In truth, unification never was realized except in theory.**[7] **More than that, these researches have proved that the fertile principles of that provincial law, which was sometimes on a higher moral plane than the Roman law, reacted on the progressive transformation of the old *ius civile*.** And how could it be otherwise? Were not a great number of famous jurists like Ulpian of Tyre and Papinian of Hemesa natives of Syria? **And did not the law-school of Beirut constantly grow in importance after the third century, until during the fifth century it became the most brilliant center of legal education? Thus Levantines cultivated even the patrimonial field cleared by Scaevola and Labeo.**[8]

> 8. Mommsen, *Gesammelte Schriften*, II, 1905, p. 366: "**Seit Diocletian übernimmt der östliche Reichsteil, die *partes Orientis*, auf allen Gebieten die Führung. Dieser späte Sieg des Hellenismus über die Lateiner ist vielleicht nirgends auffälliger als auf dem Gebiet der juristischen Schriftstellerei.**"

In the austere temple of law the Orient held as yet only a minor position; everywhere else its authority was predominant. The practical mind of the Romans, which made them excellent lawyers, prevented them from becoming great scholars. They esteemed pure science but little, having small talent for it, and one notices that it ceased to be earnestly cultivated wherever their direct domination was established. The great astronomers, mathematicians, and physicians, like the originators or defenders of the great metaphysical systems, were mostly Orientals. Ptolemy and Plotinus were Egyptians, Porphyry and Iamblichus, Syrians, Dioscorides and Galen, Asiatics. ...

Attention has often been called to the fact that those men of letters that were considered the purest representatives of the Greek spirit under the empire belonged almost without exception to Asia Minor, Syria or Egypt. The rhetorician Dion Chrysostom came from Prusa in Bithynia, the satirist Lucian from Samosata in Commagene on the borders of the Euphrates. A number of other names could be cited. **From Tacitus and Suetonius down to Ammianus, there was not one author of talent to preserve in Latin the memory of the events that stirred the world of that period,** but it was a Bithynian again, Dion Cassius of Nicea, who, under the Severi, narrated the history of the Roman people.

It is a characteristic fact that, besides this literature whose language was Greek, others were born, revived and developed. **The Syriac, derived from the Aramaic which was the international language of earlier Asia, became again the language of a cultured race with Bardesanes of Edessa.** The Copts remembered that they had spoken several dialects derived from the ancient Egyptian and endeavored to revive them. North of the Taurus even the Armenians began to write and polish their barbarian speech. **Christian preaching, addressed to the people, took hold of the popular idioms and roused them from their long lethargy. Along the Nile as well as on the plains of Mesopotamia or in the valleys of Anatolia it proclaimed its new ideas in dialects that had been despised hitherto,** and wherever the old Orient had not been entirely denationalized by Hellenism, it successfully reclaimed its intellectual autonomy.

http://attalus.org/translate/valerius2a.html#c2

[2.2] But how our ancient magistrates behaved themselves in upholding the majesty of the Roman people, may be observed from this, that among all their other marks of care for dignity, **they punctually maintained this rule, to talk with the Greeks only in the Latin language.** And also causing them to lay aside the volubility of their own language, they forced them to speak by an interpreter, not only in our own city, but in Greece and Asia, so that the honour of the Latin language might be spread with greater veneration among other nations. **They did not neglect the study of learning, but they did not hold it appropriate that the toga should in any way be subject to the Greek cloak.** They believed it a poor and demeaning thing, that the weight and authority of government should be tamed by the charms of eloquence.

[2.3] And therefore, Gaius Marius, you are not to be condemned for foolish rigour, not to let your old age, crowned with double laurels, illustrious with German and Numidian trophies, be softened and overcome by the eloquence of a vanquished nation. Perhaps you feared lest, if you appeared a foreigner in the exercise of your wit, you might seem to desert your native customs. **Who therefore opened the way to the Greek pleadings that now deafen the senate's ears? It was Molon the rhetorician, as I am persuaded – who likewise sharpened the studies of M. Cicero.** For he was the first foreigner that was ever heard in the senate without an interpreter; which honour he received not undeservedly,

having greatly advanced the force of the Roman eloquence. **Of conspicuous felicity is Arpinum, whether you respect the one man as a great despiser of learning, or the other as its abounding fountain.**

https://archive.org/details/in.ernet.dli.2015.231118/page/n489/mode/2up?view=theater

We should obscure these outstanding figures if we were to surround them with lesser lights. **After them there were no giants in pagan Latin letters. Reason had made its great effort from Ennius to Tacitus and had spent itself.** It is a shock to pass from the grandeur of the *Histories* and the *Annals* to the scandalous chronicle of Suetonius' *Lives of Illustrious Men* (110); history is here degenerating into biography, and biography into anecdote; portents and miracles and superstitions crowd the pages, and only the Elizabethan English of Philemon Holland's translation (1606) has raised the book to the level of literature. Less disturbing is the descent from Pliny to the letters of Fronto. Perhaps these were not meant for publication, and cannot be fairly compared with Pliny's; some were spoiled by a search for archaic phraseology, but many are touched by real affection of the teacher for his pupil. **Aulus Gellius supported the archaizing movement in his *Attic Nights* (169)—the largest collection of worthless trifles in ancient literature;** and Apuleius brought it to a climax in *The Golden Ass.* **Apuleius and Fronto came from Africa, and the fad may have had partial source in the fact that written Latin there had departed less than in Rome from the language of the people and the Republic.** Fronto rightly believed in strengthening literature with popular speech, as one freshens a plant by turning over the earth at its roots. But youth does not come twice to a man, a nation, a literature, or a language. **Orientalization had set in and could not be stopped.** The common Greek tongue of the Hellenistic East and Oriental Rome was becoming the language of literature as well as of life; Fronto's pupil chose it for his *Meditations.* Appian, an Alexandrian Greek living at Rome, chose Greek for his vivid *Histories* of Rome's wars (*ca.* 160); so did Claudius Aelian, a Roman by birth and blood; a half century later Dio Cassius, a Roman senator, would write his history of Rome in Greek. **Leadership in literature was passing back from Rome to the Greek East; not to the Greek spirit, but to the Oriental soul using Hellenic speech. There would be giants again in Latin; but they would be Christian saints.**

https://www.britannica.com/art/Latin-literature/Silver-Age-ad-18-133

The decentralization of the empire under Hadrian and the Antonines weakened the Roman pride and passion for liberty. Romans began again to write in Greek as well as Latin. The "new sophistic" movement in Greece affected the "novel poets" such as Florus. An effete culture devoted itself to philology, archaism, and preciosity. **After Juvenal, 250 years elapsed before Ausonius of Bordeaux (4th century AD) and the last of the true classics, Claudian (flourished about 400), appeared.**

https://ccel.org/g/gibbon/decline/volume1/chap2.htm#GNS

The sciences of physic and astronomy were successfully cultivated by the Greeks; the observations of Ptolemy and the writings of Galen are studied by those who have improved their discoveries and corrected their errors; **but if we except the inimitable Lucian, this age of indolence passed away without having produced a single writer of original genius, or who excelled in the arts of elegant composition.** The authority of Plato and Aristotle, of Zeno and Epicurus, still reigned in the schools; and their systems, transmitted with blind deference from one generation of disciples to another, precluded every generous attempt to exercise the powers, or enlarge the limits, of the human mind. The beauties of the poets and orators, instead of kindling a fire like their own, inspired only cold and servile imitations: or if any ventured to deviate from those models, they deviated at the same time from good sense and propriety on the revival of letters, the youthful vigour of the imagination, after a long repose, national emulation, a new religion, new languages, and a new world, called forth the genius of Europe. **But the provincials of Rome, trained by a uniform artificial foreign education, were engaged in a very unequal competition with those bold ancients, who, by expressing their genuine feelings in their native tongue, had already occupied every place of honour.** The name of Poet was almost forgotten; that of Orator was usurped by the sophists. A cloud of critics, of compilers, of commentators, darkened the face of learning, and the decline of genius was soon followed by the corruption of taste.

The sublime Longinus, who in somewhat a later period, and in the court of a Syrian queen, preserved the spirit of ancient Athens, observes and laments this degeneracy of his contemporaries, which debased their sentiments, enervated their courage, and depressed their talents.

> "In the same manner," says he, "as some children always remain pigmies, whose infant limbs have been too closely confined; **thus our tender minds, fettered by the prejudices and habits of a just servitude, are unable to expand themselves, or to attain that well-proportioned greatness which we admire in the ancients; who living under a popular government, wrote with the same freedom as they acted.**" (111)
>
> 111. Longin, de Sublim. c. 43, p. 229, edit. Toll. **Here too we may say of Longinus, "*his own example strengthens all his laws.*" Instead of proposing his sentiments with a manly**

> **boldness, he insinuates them with the most guarded caution, puts them into the mouth of a friend;** and, as far as we can collect from a corrupted text, makes a show of refuting them himself.

This diminutive stature of mankind, if we pursue the metaphor, was daily sinking below the old standard, and the Roman world was indeed peopled by a race of pygmies **when the fierce giants of the north broke in, and mended the puny breed. They restored a manly spirit of freedom; and after the revolution of ten centuries, freedom became the happy parent of taste and science.**

http://www.revilo-oliver.com/rpo/RPO_NewChrist/chap6.htm

It would be a waste of time to multiply examples of religious techniques in the Classical world amid the first great civilization of our race, but we may mention one measure of its decline. Livy knew from his sources the secret of the miraculous torches that were carried by hysterical females during the Bacchanalian craze, excited by a Greek-speaking evangelist in 186 B.C., but in the Second Century, **Suetonius, Cassius Dio, and Pausanias mention chemically similar miracles without indicating that they did not believe them to be of supernatural origin. One hopes those authors were not so credulous, but they lived in a century in which both reason and our race were nearing their end in the mongrelized Empire that was still called Roman.**

https://www.ccel.org/g/gibbon/decline/volume2/chap44.htm#third

In the third period, between the reigns of Alexander and Justinian, the oracles of jurisprudence were almost mute. The measure of curiosity had been filled: the throne was occupied by tyrants and Barbarians, the active spirits were diverted by religious disputes, and the professors of Rome, Constantinople, and Berytus, were humbly content to repeat the lessons of their more enlightened predecessors. From the slow advances and rapid decay of these legal studies, **it may be inferred, that they require a state of peace and refinement.** From the multitude of voluminous civilians who fill the intermediate space, it is evident that such studies may be pursued, and such works may be performed, with a common share of judgment, experience, and industry. **The genius of Cicero and Virgil was more sensibly felt, as each revolving age had been found incapable of producing a similar or a second: but the most eminent teachers of the law were assured of leaving disciples equal or superior to themselves in merit and reputation.**

https://en.wikipedia.org/wiki/Michael_Grant_(classicist)

He once described himself as "one of the very few freelancers in the field of ancient history: a rare phenomenon". As a populariser, his hallmarks were his prolific output and his unwillingness to oversimplify or talk down to his readership.
...

According to his obituary in *The Times* he was "one of the few classical historians to win respect from [both] academics and a lay readership".[2]

https://books.google.fi/books?id=o-Y7AAAAIAAJ&lpg=PP1&hl=fi&pg=PA72#v=onepage&q&f=false

But it was not until the second century A.D., and later still, that the greatest names in Roman Law appeared. **The law that these writers handed down is probably the greatest single gift made by Rome to civilisation.**
...

That is to say, they begin at a time when the histories of Latin literature often stop. The legal treatises are not usually included in accounts of this literature. But they should at least be mentioned, for two reasons. First, it is in such legal writings, dry as they are, that the special qualities of Latin, its clarity and precision, show most conspicuously. **Secondly, of all Latin writings these have perhaps been the most influential on the medieval and modern world.**
...

The earliest of the great names of this epoch is Salvius Julianus (*c.* A.D. 100-69). Like many other thinkers and writers of this and the following century, he was a North African.
...

Salvius Julianus and Gaius belong to the great period of Roman peace and prosperity in the second century A.D. It is remarkable that the next epoch of conspicuous progress and of famous legal names coincides with a later and much less happy period, the totalitarian military monarchy imposed on the war-impoverished empire by the African Septimius Severus (A.D. 193-211) and his successors. **This epoch witnessed striking legal advances.**

…

Roman Law continued to develop in these epochs of which the ordinary classical curriculum knows nothing. Even in as brief a study as this, room must be found for the name of a man who lived after the fall of Rome itself – three centuries after the jurists who have just been mentioned. This was Tribonian, who was born in southern Asia Minor and became the closest adviser of the Byzantine emperor Justinian (A.D. 527-65) in a mighty Latin codification of Roman Law. This included extracts from lawyers extending over more than 300 years. **According to the emperor, 3,000,000 lines – of 2,000 books – were read for the purpose of selection, but only 5 per cent of this material was chosen for publication.**
…

Tribonian's work is the basis of modern European law. In the early Middle Ages its effects were already present in the West. At first they were latent; but then the Church began to systematise what it knew. **In the twelfth century A.D. Roman Law came to the fore again, when a manuscript of the *Digest* was discovered at Florence, and 'Canon Law' was codified in Bologna. The old Stoic Law of Nature, in a contemporary guise, was actually held to be fully represented and exemplified by Roman Law.**

We do not, today, give Roman Law this overriding position. But our society has accepted many of the most important legal institutions which Rome had evolved. **We accept, for example, in very much the same way as Roman Law, the concepts of family, of private property, of the sanctity of contracts. But this sort of list by no means exhausts the Roman legal ideas which have had vast effects at different epochs of history – ideas including that of International Law, with its obvious debts to the Law of Nature and the Roman 'right of peoples.'**

We tend to take these things for granted. But the reason why we are able to do so is because the Romans, with the impact of Greek thought – largely introduced by Cicero and Seneca – operating on their native environment and mentality, developed them as workable ideas. Those ideas, at different stages of their development, were recorded by Salvius Julianus, Papinian, Tribonian and the rest. **That is why these must be ranked among the most influential writers in the Latin language.**

https://en.wikipedia.org/wiki/Charles_Phineas_Sherman

Sherman was born into an old New England family in West Springfield, Massachusetts.[1] The American Sherman family began with Philip Sherman, who emigrated from England in 1634 and became the Colony of Rhode Island's first Secretary.[2]
…

Sherman spent ten of these Yale years researching and writing what he called his magnum opus, *Roman Law in the Modern Worla*, which was published in 1917.[16]
…

It is a three-volume work of great ambition. Volume one consists of a history of Roman law from its possible beginnings in Babylon, through the Republic and Empire, medieval times, and into the modern world.[18] Volume two is a "manual," or exposition of the fundamental principles of Roman law, including their expressions in modern legal systems,[19] while volume three is a bibliography of Roman and civil law by subject.[20] **RLMW was a huge undertaking that would have taxed the abilities of even the greatest Roman law scholar,** and most critics decided Sherman had not been fully up to the task.[21]

https://archive.org/details/romanlawinmoder01shergoog/page/n87/mode/2up?view=theater

§ 57 The classical period of Roman law, A.D. 98-244.

The culmination of the development of Roman law from a local city law into a world law occurred under the Early Empire. But this culmination came gradually and was not caused suddenly as if by the blast of a hurricane. The jus civile was slowly submerged by the jus gentium, because the latter was more inherently reasonable and just and more in accordance with the private law of other nations. **From the 2d century to the middle of the 3d century A.D. was the Golden Age of Roman jurisprudence, beginning with the jurist Celsus and ending with Modestinus.** Through the labors of the Imperial jurists, Roman law in the century of the Antonines and Severi attained to such marvelous perfection that the whole period from the reign of Hadrian—better, Trajan—until shortly after the close of the reign of Alexander Severus is commonly called the "classical Roman law."
…

In the year 212 the Emperor Caracalla promulgated a law bestowing citizenship on all free inhabitants of the Empire.15 Thereafter, but few traces of the long-standing Roman antithesis between complete and partial citizenship remained, and these were formally abolished by Justinian. **Caracalla's Edict wiped out the old Republican distinction between Roman citizens and Roman subjects, and set up a new Imperial citizenship. Local citizenship and a local private law became replaced by universal citizenship and a universal private law. *The jus civile became the jus vetus.***

15. "In orbe Romano qui sunt, ex constitutione imperatoris Antonini cives Romani effecti sunt": *Dig.* 1.5.17.

https://books.google.fi/books?id=oR0LAAAAIAAJ&lpg=PA329&hl=fi&pg=PA526#v=onepage&q&f=false

Ius antiquum. The earlier law referred to for comparison with new legal provisions. **In imperial constitutions of the late Empire and with Justinian, *ius antiquum* denotes the classical law, sometimes going as far back as the Twelve Tables. Syn. *ius vetus*.** ant. *ius novum*.

https://archive.org/details/romanlawinmoder01shergoog/page/n95/mode/2up?view=theater

From Augustus to Diocletian Roman scientific jurisprudence was fully developed and just before Diocletian's reign attained its final maturity. The formative period of Roman law closed with the jurist Papinian. The jus gentium with its tenets of "natural" law and justice had now triumphed over the jus civile. Roman law became truly a world law,—suited for the wants of all mankind. After the accession of Diocletian, the development of Roman law practically ceased; it was then merely summed up by men of genius and crystallized in the form of codification.

Corpus Iuris Civilis, The Digest, Book L, Title 32.

The Same [Ulpian], On Sabinus, Book XLIII.

So far as the Civil Law is concerned, slaves are not considered persons, but this is not the case according to natural law, because natural law regards all men as equal.

https://droitromain.univ-grenoble-alpes.fr/Corpus/d-50.htm#17

50.17.32

Ulpianus libro 43 ad Sabinum

Quod attinet ad ius civile, servi pro nullis habentur: non tamen et iure naturali, quia, quod ad ius naturale attinet, omnes homines aequales sunt.

https://en.wikisource.org/wiki/Of_Clemency/Book_I#XVIII.

Slaves are allowed to run and take sanctuary at the statue of a god; though the laws allows a slave to be ill-treated to any extent, there are nevertheless some things which the common laws of life [commune ius animantium] forbid us to do to a human being. Who does not hate Vedius Pollio[10] more even than his own slaves did, because he used to fatten his lampreys with human blood, and ordered those who had offended him in any way to be cast into his fish-pond, or rather snake-pond? That man deserved to die a thousand deaths, both for throwing his slaves to be devoured by the lampreys which he himself meant to eat, and for keeping lampreys that he might feed them in such a fashion.

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0236%3Atext%3Ddisc%3Abook%3D1%3Achapter%3D13

WHEN some one asked, how may a man eat acceptably to the gods, he answered: If he can eat justly and contentedly, and with equanimity, and temperately and orderly, will it not be also acceptably to the gods? But when you have asked for warm water and the slave has not heard, or if he did hear has brought only tepid water, or he is not even found to be in the house, then not to be vexed or to burst with passion, is not this acceptable to the gods?—How then shall a man endure such persons as this slave? **Slave yourself, will you not bear with your own brother, who has Zeus for his progenitor, and is like a son from the same seeds and of the same descent from above?** But if you have been put in any such higher place, will you immediately make yourself a tyrant? **Will you not remember who you are, and whom you rule? that they are kinsmen, that they are brethren by nature, that they are the offspring of Zeus?**[1]—But I have purchased them, and they have not purchased me. **Do you see in what direction you are looking, that it is towards the earth, towards the pit, that it is towards these wretched laws of dead men?**[2] **but towards the laws of the gods you are not looking.**

2. I suppose he means human laws, which have made one man a slave to another; and when he says “dead men,” he may mean mortal men, as contrasted with the gods or God, who has made all men brothers.

https://en.wikipedia.org/wiki/Victor_Duruy

Already known as a historian by his *Histoire des Romains et des peuples soumis à leur domination* (7 vols, 1843-1844), **he was chosen by Napoleon III to assist him in his biography of Julius Caesar, and his abilities being thus brought under the emperor's notice, he was in 1863 appointed minister of education.**

https://archive.org/details/historyofromeofr05duru/page/498/mode/2up?view=theater

In the doctrine of the λόγος, which unites man to God and men to one another, the new Stoics asserted the principle—the basis of human society and of the divine commonwealth—that we ought to honor the divine spirit that is within us by moral purity, and that which is in our fellow-creatures by love towards them. **Now history has shown us these ideas coming forth from the school to permeate civil law, which they change, and even the administration of justice, which they modify. Jurisconsults such as the world has not seen since, following one another uninterruptedly during two centuries, have transformed the old Quiritarian law, first of all ameliorated by the law of nations, then by the law of nature, into the legislation which has been termed "written reason," or in the words of Ulpian, "the most holy civil wisdom."** Celsus, a friend of Hadrian, defined law as "the science of the good and the just;" and Justinian has placed at the head of his *Pandects* these three sentences of Ulpian: "The precepts of the law are to live honorably, to injure no one, to give to every one his due,"1 **Law became a religion, the worship of justice, and the *prudentes* with pride called themselves its priests.**2

> 2. ***Cujus merito quis nos sacerdotes appellet: justitiam namque colimus et boni et aequi notitiam profitemur*** (Ulpian, in *Digest*, I. i. sect. 1).

The spirit of equity, which the jurisconsults introduced into the law, entered also into government; imperial Rome shared her civil political rights with those whom Republican Rome had termed the foreigner and the enemy, and we have seen how the Antonines alleviated the condition of the woman, the son, and the slave, gave assistance to destitute children, a physician to the sick, and funeral rites to those who were unable to pay for a pyre or a tomb.1

https://en.wikipedia.org/wiki/William_Woodthorpe_Tarn

According to some, **Tarn offered a somewhat idealistic interpretation of Alexander's conquests as culturally inclusive and essentially driven by his vision of the "unity of mankind"** in the Opis Decree. Such a reading, which echoes Hellenistic philosophical ecumenicalism[5] has been challenged by recent revisionists.[6] Jeanne Reames remarked that **"Tarn's portrait of Alexander turned the Greek conqueror into a proper Scottish gentleman".**

https://archive.org/details/antigonosgonatas00tarn/page/32/mode/2up?view=theater

Moreover, when things indifferent – that is to say, everything intermediate between absolute virtue and absolute vice – were at last admitted to belong to two classes, the Stoic became bounden to choose the preferable class; and therewith came into the world the first beginnings, as a philosophic concept, of the idea of duty.62 **The ideal Wise Man was a monster of self-sufficiency, passionless, pitiless, perfect, but in the attempt to reach perfection the Stoic was led to examine the progress which he was making, and therewith came into the world the idea of conscious moral growth.**63 A philosophy which started from the moral consciousness of the individual was led to take up and develop, though it did not actually originate, the notion of conscience.64 **The idea of conscience is still perhaps incomplete; the idea of duty is still far from the categorical imperative; but it was much to get a start made.** And if the Stoic, happily, never realized his Wise Man, in the struggle toward him he realized much else; and the men whom he formed were men.65

> 64. *συνείδησις*. See Lightfoot, *St. Paul and Seneca*, (in his *Epistle to the Philippians*), p. 301. **The idea itself, which is not found in the Old Testament, appears in Greek literature, as *συνεσις*, first in Euripides (*Or*. 396), from whom, probably, Menander took it (Stob. *Flor*. 24, 3, p. 192, conscience makes cowards of the boldest); but the Stoics first brought it into philosophy.**
>
> https://en.wikisource.org/wiki/Lives_of_the_Eminent_Philosophers/Book_VII#cite_ref-53
>
> Furthermore, the term Duty is applied to that for which, when done,[54] a reasonable defence can be adduced, e.g. harmony in the tenor of life's process, which indeed pervades the growth of plants and animals. **For even in plants and animals, they hold, you may discern fitness of behaviour.** 108. **Zeno was the first to use this term καθῆκον of conduct.** Etymologically it is derived from κατά τινας ἥκειν, i.e. reaching as far as, being up to, or incumbent on so and so. [55] And it is an action in itself adapted to nature's arrangements.
>
> > 55. The ordinary meaning of the verb καθήκειν is well seen in Hdt. vii. 22 ὁ γὰρ Ἄθως ἐστὶ ὄρος μέγα τε καὶ ὀνομαστὸν ἐς θάλασσαν κατῆκον ("for Athos is a great and famous mountain, **reaching down** to the sea").

https://en.wikipedia.org/wiki/John_Dalberg-Acton,_1st_Baron_Acton

Acton took a great interest in the United States, considering its federal structure an ideal guarantor of individual liberties. During the American Civil War, his sympathies lay entirely with the Confederacy, for their defence of States' Rights against a centralised government that he believed would inevitably turn tyrannical. His notes to Gladstone on the subject helped sway many in the British government to sympathise with the South. **After the South's surrender, he wrote to Robert E. Lee that "I mourn for the stake which was lost at Richmond more deeply than I rejoice over that which was saved at Waterloo,"** adding that he "deemed that you were fighting battles for our liberty, our progress, and our civilization."[7]

https://oll.libertyfund.org/title/acton-the-history-of-freedom-and-other-essays#lf0030_label_020

We are dealing, not with the effects of freedom, but with its causes. We are seeking out the influences which brought arbitrary government under control, either by the diffusion of power, or by the appeal to an authority which transcends all government, and among those influences the greatest philosophers of Greece have no claim to be reckoned.

It is the Stoics who emancipated mankind from its subjugation to despotic rule, and whose enlightened and elevated views of life bridged the chasm that separates the ancient from the Christian state, and led the way to freedom. Seeing how little security there is that the laws of any land shall be wise or just, and that the unanimous will of a people and the assent of nations are liable to err, the Stoics looked beyond those narrow barriers, and above those inferior sanctions, for the principles that ought to regulate the lives of men and the existence of society. **They made it known that there is a will superior to the collective will of man, and a law that overrules those of Solon and Lycurgus.** Their test of good government is its conformity to principles that can be traced to a higher legislator. That which we must obey, that to which we are bound to reduce all civil authorities, and to sacrifice every earthly interest, is **that immutable law which is perfect and eternal as God Himself, which proceeds from His nature, and reigns over heaven and earth and over all the nations.**

The great question is to discover, not what governments prescribe, but what they ought to prescribe; for no prescription is valid against the conscience of mankind. Before God, there is neither Greek nor barbarian, neither rich nor poor, and the slave is as good as his master, for by birth all men are free; they are citizens of that universal commonwealth which embraces all the world, brethren of one family, and children of God. **The true guide of our conduct is no outward authority, but the voice of God, who comes down to dwell in our souls,** who knows all our thoughts, to whom are owing all the truth we know, and all the good we do; for vice is voluntary, and virtue comes from the grace of the heavenly spirit within.

What the teaching of that divine voice is, the philosophers who had imbibed the sublime ethics of the Porch went on to expound: It is not enough to act up to the written law, or to give all men their due; we ought to give them more than their due, to be generous and beneficent, to devote ourselves for the good of others, seeking our reward in self-denial and sacrifice, acting from the motive of sympathy and not of personal advantage. Therefore we must treat others as we wish to be treated by them, and must persist until death in doing good to our enemies, regardless of unworthiness and ingratitude. For we must be at war with evil, but at peace with men, and it is better to suffer than to commit injustice. True freedom, says the most eloquent of the Stoics, consists in obeying God. **A State governed by such principles as these would have been free far beyond the measure of Greek or Roman freedom; for they open a door to religious toleration, and close it against slavery.** Neither conquest nor purchase, said Zeno, can make one man the property of another.

These doctrines were adopted and applied by the great jurists of the Empire. The law of nature, they said, is superior to the written law, and slavery contradicts the law of nature. Men have no right to do what they please with their own, or to make profit out of another’s loss. **Such is the political wisdom of the ancients, touching the foundations of liberty, as we find it in its highest development, in Cicero, and Seneca, and Philo, a Jew of Alexandria.** Their writings impress upon us the greatness of the work of preparation for the Gospel which had been accomplished among men on the eve of the mission of the Apostles. **St. Augustine, after quoting Seneca, exclaims: “What more could a Christian say than this Pagan has said?” The enlightened pagans had reached nearly the last point attainable without a new dispensation, when the fulness of time was come.** We have seen the breadth and the splendour of the domain of Hellenic thought, and it has brought us to the threshold of a greater kingdom. The best of the later classics speak almost the language of Christianity, and they border on its spirit.

https://books.google.fi/books?id=eoNmDwAAQBAJ&lpg=PP1&hl=fi&pg=PA46#v=onepage&q&f=false

Jehu Baker, a lawyer, represented the state of Illinois in Congress from 1866 to 1869. He later served two more terms, from 1887 to 1889 and from 1897 to 1899.

https://archive.org/details/cu31924028288722/page/432/mode/2up?view=theater

Of the second sort, we have a fine illustration in **the capital legal conception that all human law ought to be brought into conformity with the law of nature**—a recognition of the "Higher Law" which laid at the foundation of the great and solid jural progress which the Romans made. **It may be added that, as regards *liberty*, the theory of the Roman law was even superior to the theories of the most eminent of the Greek philosophers.** Plato, in his ideal Republic, simply recommends—for an expedient reason—that there should be no slaves of *Hellenic* blood. Aristotle regards liberty and slavery as conditioned upon capacity,—nature, in his view, designing some men for a state of slavery, and others for a state of freedom. **But the Roman lawyers rose to the simple and uniform conception that, by the Law of Nature, Liberty is the status of all men, and that slavery, in contravention of this law, derived its origin from the usages of war;** "for wars ensued, and from these sprang captivity and slavery, which are contrary to natural justice; for by the law of nature all men are born free."6

> 6. *Bella etenim orta sunt, et captivitates secutae, et servitutes, quae sunt naturali juri contrariae: jure enim naturali omnes homines ab initio liberi nascebantur. Inst*., lib. i, tit. ii, 2.

These great jural conceptions—by which the Law of Nature is held up as the ideal standard of all legal excellence, and by which that law is interpreted as the perpetual sanction of Universal Liberty—must take their place among the most precious products of civilization; and they have exerted a very deep and widespread influence upon modern societies.7

https://en.wikipedia.org/wiki/Charles_Loring_Brace

Brace's Emigration Plan was also an anti-eugenic movement because despite his religious prejudices Brace believed that one's "gemmules" (an early, pre-genetic concept that blood carried a family's heritability and character) did not predetermine one's future. Brace was deeply moved by Charles Darwin's *Origin of Species*, having read it thirteen times.[21] **He argued Darwinism was compatible with charitable efforts like his, against some Social Darwinists who held the opposite view.** Brace was also an outspoken abolitionist who (unusually in his time even for abolitionists) entirely rejected scientific racism, arguing that Black people should have equal rights, and even held their having children with Whites could lead to a better future race.[22] In a bold move (and perhaps inspired by his abolitionist and Darwinian mindset), Brace did away with the centuries-old custom of indenture so that the "placed" children were allowed to leave a home if they were uncomfortable with the placement.

https://archive.org/details/unknowngodorins00bracgoog/page/n147/mode/2up?view=theater

From this Stoical principle of the brotherhood of man came forth the greatest influence of Stoicism, that upon the ideas of Roman jurists in international law.
...

These ideas have profoundly influenced modern political thought, and even practical institutions of government. They are the one great bequest of Stoicism to modern times, and they plainly sprang from its religion.7 **It is a mistake to suppose that Stoicism was always harsh and cruel. Zeno is quoted a saying that "the God who rules the city is Love."** The followers of this philosophy were full of the idea that man belongs to all others, and that he is a stranger to none. No school ever taught the brotherhood of man more clearly.

https://snaccooperative.org/view/62773237

Although influenced by the Hegelianism of John and Edward Caird, Wenley considered himself an objective idealist. At the University of Michigan, he was a popular and influential teacher, knowledgeable in both science and classical scholarship.

https://archive.org/details/in.ernet.dli.2015.103687/page/n141/mode/2up?view=theater

Limits of space preclude adequate discussion of Roman law in this connection. Suffice it to point out that this, the greatest gift of Rome to posterity, could not have developed as it did without the interposition of Stoicism. For centuries prior to her effective contact with Greek modes of thought, Rome observed her own law, the civil law (law of the city) or, in the expression which indicates its *local* character, the law of the *Quirites* – of those who shared full rights of citizenship. **As conquest brought expansion and constant intercourse with subject allies, putative enemies, and 'barbarians' (earlier law differentiated sharply between the three classes), another type of law gained recognition slowly.** This was the *Jus Gentium*, not our modern "law of nations," but usages so observed by aliens as to have the effect of law among them. Another and, probably, later name for the new departure seems to have been *Jus Commune*, a norm acknowledged by both parties to a cause almost as matter of 'common sense,' and therefore usual in that it might be anticipated among 'decent' people. **It embodied 'immemorial usage,' not technical or statuted legality which**

might well drift far from equity. But it did not revert to metaphysical principles. Thus another step had to be taken: hence, whatever the origin of the *Jus Gentium* at Rome (still in doubt), it came to be regarded, not as a code drawn in the special interest of aliens, nor even as a selection from their ways, but simply as the body of universal principles 'naturally' presupposed by all particular or municipal laws. This transition was mediated by Cicero and by the great jurisconsults of the Empire who, like directing Romans then, professed Stoicism almost as a religion. It would be a misapprehension to infer that Stoicism dominated specific statutes. In this respect it was like Christianity in Europe later, or the Utilitarian philosophy in liberal England after 1832. It furnished a certain ideal which, operating over a long period, transformed the *Jus Gentium*, an *exception*, into a rational system so flexible and sane as to become the embodiment of equity for western society.

We have seen that the Greeks were agitating high questions about Law and Justice and Right at a time when Rome was little more than a rural village. They were learning that Rights pertain to persons, operate between persons, and that the community would consult its own safety did it abstain from constant meddling with these "faculties." **Moreover, they were seeing dimly what the Romans never saw at all, that there may be Rights, pertaining to immaterial or spiritual affairs of human nature, of such intense significance as to merit the description "absolute."** This reached beyond the most generous Roman interpretation of the *Jus Gentium* or *Jus Commune*, which predicated observances already current. You may term the further step abstraction, if you please. It involved the typical Stoic notion of a "partnership of mankind" inseparable from the order of the universe. As such, it may consort with the *Jus Gentium*. Even so, it portends a transcendental ideal, that is, a state of relations not yet realized, but eminently to be desired. **The Stoics called it *Jus Naturale*, nigh a divine law, assuredly the origin, likewise the final cause, of all law. In other words, they supplied the sole philosophical ideas in which the Romans proved quite at home, – the speculative basis for systematic thought about Law and Justice and Rights. More important, they loosed the impulse whereby changes might be made in the temper of legal institutions. Briefly, the *Jus Naturale* injected a socio-political factor into the calculations of jurists which was destined to be of immeasurable influence later throughout western history. Jumping the centuries, contemporary "unrest" seems to testify to its potency now;** and, if we consider all the implications of the Virginia "Declaration of Rights," of the "Declaration of Independence," and of the Constitution, **we hardly exaggerate in suggesting that, without "the politics of a higher region" incident to the Stoic Law of Nature, the independent commonwealth known as the United States of America would never have found *reason* for existence.**

https://en.wikipedia.org/wiki/Rudolf_von_Jhering

In the second half of the 19th century, Jhering's reputation was as high as that of Savigny's in the first half. Their methods were almost diametrically opposed. Savigny and his school represented a historical approach. Jhering's conception of jurisprudence was as a science to be utilized for the further advancement of the moral and social interests of mankind.
...

He was also the great-great-grandfather of Australian singer and actress Olivia Newton-John through his daughter Helene Ehrenberg and her marriage to the German jurist Victor Ehrenberg.

https://archive.org/details/evolutionaryan01drucgoog/page/n241/mode/2up?view=theater

The advance achieved by Christ can no longer be credited to Judaism. The Semite has never got beyond the idea of the *national exclusiveness* of the deity, which has ever been the starting-point for the conception of a deity; neither has the Jew. **But the Greeks had already got beyond this when Christ appeared, and therefore his doctrine was appreciated by them as it could not be by any Semite.** The Hellenism of that time is characterized by the trait of cosmopolitanism, which animated it externally as well as internally: externally by the dispersion of the Greeks over the whole of the then civilized world, internally by their being elevated above the ideal of national exclusiveness: externally no longer bound to their native soil, cosmopolitans, everywhere met with as bearers of culture to all people; internally, **raised to the corresponding cosmopolitan conception that on religious territory found expression in deliverance from the idea of the national deity.**
...

In whatever way it happened to come about that Christ was influenced by Hellenism, it is quite certain that he went a very long way beyond it. Although the doctrine of the one God which Christ preached was not new to the learned Hellenes of his time, **the idea that God is Love, and that the salvation of mankind is bound up in love – this highest conception of the deity, beyond which there is nothing higher, was altogether new to them. In reaching this not merely intellectual, but moral, height, the principle of the universality of religion was for the first time practically realized, a true message of salvation was proclaimed to all mankind.**
...

That the same God who is for us is also for others – in short, the idea of universality or community in the domain of religion, in contrast to national character or exclusiveness – **this idea, without which Monotheism is but an empty name, was first realized by the Aryans;** and that this was so has its

ultimate proof, not in their superior intellectual endowments – for in this respect they were in no wise superior to the Semites – but in their higher moral elevation, in idealism, which forms the leading trait in their character (§ 36).

This contrast between national character and universality in religion is repeated amongst the Romans in the domain of law. As in the other case, the development begins with the idea of national character and exclusiveness: our law is ours only; the strangers have no part in it.2 In their own interests, for the purpose of furthering their trade, this principle was gradually set aside, but in reality abolished, that is to say it was first replaced, by the principle of universality in the *jus gentium* of the Romans, which was specially instituted by the side of the national law (which was solely for the use of Romans, *jus civile*), as general law, for the use of all nations trading with them. **The *jus civile* stands on a par with the exclusively national Polytheism or Monotheism; the *jus gentium* corresponds to the supra-national Monotheism of Christianity, and Roman lawyers attribute to it the same character of universal validity as the Christian Church ascribes to the former.**1 **The idea of universality first arises with the Aryans; it has always remained foreign to the Semites.**

> 1. ix., *De J. et J.* (l, i.): "*quod naturalis ratio inter omnes homines constituit, id apud omnes peraeque custoditur vocaturque jus gentium, quasi quo jure omnes gentes utuntur.*" **Similarly in the Middle Ages, Roman law, as "revealed law" (*ratio scripta*), was placed side by side with Christianity, as "revealed religion."**

https://miranda.revues.org/6680

Chamberlain scorned this “racial chaos of the late Roman Empire, which destroyed any racial and national principle”16—**this “chaos of peoples of the decadent Roman Empire” being a capital “sin against nature”.**17

> 16. “Das Rassen- und Nationalitätlose Völkerchaos des spätrömischen Imperiums,” *Ibid.*, p. 371.

As a true Wagnerian, Chamberlain needed heroes and saviours. Despite this biological disaster or the inevitable fall of the Romans, the Nordic race did not disappear. The Europe the Romans had ambitioned was saved by a racial messiah: the Germanic tribes which, by invading the Empire, preserved the continent and its civilization. The Teutonic warrior is therefore celebrated by Chamberlain’s book with the same resonating fury as Wagner’s operas:

> Without him, the Indo-Europeans would have disappeared. In a criminal way, the Asian and African slave had crawled up to the throne of the Roman Empire. **The Syrian bastard had taken possession of laws,** and the Jew used the Library of Alexandria to adapt Greek philosophy to the Mosaic Law (…). It was high time the saviour appeared.18

Contrary to what is being taught by “those who are too lazy to think and by flagrant historical lies”, **the Germanic invasions did not destroy the Empire but saved it from its fatal “jewification” and degeneration.**

> **The Roman Empire of the West fell because it had completed its work, and the time had come for it to be cut down, and to cumber the ground no longer. Its rise, its extension over nearly the whole civilised world, had been a vast blessing to humanity; its prolonged existence, even had it been governed by an endless succession of Emperors like Trajan and Marcus, would have been a bane as great as the blessing.** To all the nations around the Mediterranean sea it had brought peace, discipline, the reign of law, the preparation for Christianity; but it had robbed them of liberty, and as century was added to century, the virtues of the free man were being more and more effaced by the habit of blind submission to authority. **It was time for the Teutonic nations to rejuvenate the world, to bring their noisy energy into those silent and melancholy countries, peopled only by slaves and despots.** It was

> time to exhibit on the arena of the world the ruder virtues and the more vigorous vices of a people who, even in their vices, showed that they were still young and strong; it was time that the sickly odour of incense offered to imbecile Emperors and lying Prefects should be scattered before the fresh moorland-air of liberty. **In short, both as to the building up, and as to the pulling down of the world-Empire of Rome, we have a right to say, 'It was, because the Lord God willed it so.'**

https://archive.org/details/FoundationsOfNineteenthCenturygrundlagenDesNeunzehntenJahrhunderts/page/n229/mode/2up?view=theater

When I read Roman history I feel compelled to turn away with horror; but when I contemplate the two incomparable creations of this people, the ordered State and private law, I can only bow in silent reverence before such intellectual greatness.

But this heroic people died out, and after its complete extinction there came, as we saw, a second period of Roman politics. Foreigners occupied the supreme power and foreign lawyers became the masters of public law and constitutional law as well as of the incomparable private law which had grown like a living thing, and which they preserved, so to speak, in alcohol, in the wise conviction that it could not be made more perfect but at most might degenerate. **These advisers of the crown were mostly natives of Asia Minor, Greeks and Semites, that is to say, the recognised masters in the handling of abstractions and in juristic subtleties.** And now there came an episode of the Roman constitution in which, if nothing absolutely new was invented, there were many new interpretations, which were sublimated to principles, and then crystallised into rigid dogmas. The process is very analogous to that described in the passage dealing with Hellenic art and philosophy. The Roman republic had been a living organism, in which the people was constantly and industriously introducing improvements; the formal question of leading "principles" had never arisen, the present had never wished to hold the future in bondage. That went so far that the highest officials of the law-court, the praetors, nominated for a year, each issued on his entry into office a so-called "praetorian edict," in which he published the principles which he intended to follow in his administration of the law; and thus it became possible to adapt the existing code to changing times and conditions. Similarly everything in this State was elastic, everything remained in touch with the needs of life. **But exactly as the poetical inspirations of the Greek philosophers and their mystical interpretations of the Inscrutable had been transformed in Helleno-Semitic Alexandria to dogmas of faith, so here State and law were changed to dogmas, and pretty much by the same people.** We have inherited these dogmas, and it is important that we should know whence they come and how they arose.

For example, our idea of the monarch is derived neither from the Teutonic nations, nor from the Oriental despots, but from the learned Jurists who were in the service of the Illyrian shepherd Diocletian, of the Illyrian cowboy Galerius and of the Illyrian swineherd Maximinus, **and is a direct parody – if the truth must be told – of the greatest State-ideas of Rome.**
...

Elsewhere despots had ruled as the sons of gods, as for instance in Egypt and even at the present day in Japan – others, in former times and to-day, as representatives of God (I need only mention the Jewish kings and the Khalifs) – others again by the so-called *jus gladii*, the right of the sword. **But the soldiers who had usurped what had once been the Roman Empire founded their claims to rule as absolute autocrats upon Roman constitutional law! They had not in their opinion usurped the power like a Greek tyrant and overthrown the constitutional order; on the contrary, the all-powerful monarch was the flower, the perfection of the whole legal development of Rome: this the Oriental jurists had by their subtlety contrived to establish.** With the help of the transmission theory just explained, the trick had been accomplished – in the main as follows. One of the main pillars of Roman constitutional law is that no enactment has the force of law, if it is not approved by the people. Under the first emperors appearances were still maintained in this respect. But after Caracalla "Rome" had come to mean the whole civilised world. And now all rights of the people were "transmitted" to the Senate to simplify the issuing of new laws, &c. **In the *Corpus juris* it stands thus: "As the Roman people has grown to such an extent that it would be difficult to call it together to one spot for the purpose of approving laws, it was held to be right to consult the Senate instead of the people."** As we now speak of a Viceroy, so the Senate was called henceforth *vice populi*. The approval of the Senate too had become purely a matter of form – **once in possession of so beautiful an abstract principle, there was no stopping half-way; and so the text continues: "but that also which it pleases the Prince to decree has the power of law, for the people has transmitted to him its whole plenitude of power and all its rights."***

> **But it was not before the ideas, and even the language, of the Romans had been corrupted, that a *royal* law,** (39) **and an irrevocable gift of the people, were created by the fancy of Ulpian, or more probably of Tribonian himself;** (40) and the origin of Imperial power, though false in fact, and slavish in its consequence, was supported on a principle of freedom and justice.
>
> > "**The pleasure of the emperor has the vigour and effect of law, since the Roman people, by the royal law, have transferred to their prince the full extent of their own power and sovereignty.**" (41)

...

And this Roman "principate," as it is called, for the title of King was borne by no Caesar, forms to the present day the basis of all European kingships. By the introduction of constitutionalism, but still more by the manipulation of the law there is at present in many countries a movement back to the free standpoint of the ancient Romans; but everywhere "monarchical rule" is still in principle what the legal authorities of the fallen Roman State had made it, an institution which stands in direct contradiction to the true spirit of genuine Rome. **The army is not even at the present day the army of the people, defending the home of that people, it is everywhere (even in England) called the army of the king; the officials are not appointed and invested with authority by the collective will, they are servants of the king.** That is all Roman, but, as has been said, Roman of the cowboy, shepherd and swineherd age.

https://books.google.fi/books?id=x795CgAAQBAJ&lpg=PP1&hl=fi&pg=PT470#v=onepage&q&f=false

In 212 CE the emperor Caracalla decreed that all the free inhabitants of the Roman Empire, wherever they lived, from Scotland to Syria, were Roman citizens. It was a revolutionary decision, which removed at a stroke the legal difference between the rulers and the ruled, and the culmination of a process that had been going on for almost a millennium. More than 30 million provincials became legally Roman overnight. **This was one of the biggest single grants of citizenship – if not *the* biggest – in the history of the world.**
...

Whatever lay behind it, this decree changed the Roman world forever, and that is why my story of Rome closes here, at the end of the first Roman millennium. The big question that had guided politics and debate for centuries, about the boundary between the Romans and those they ruled, had been answered. **After a thousand years, Rome's 'citizenship project' had been completed and a new era had begun.**
...

The second Roman millennium – which did not finally end until Constantinople, the capital of the Roman Empire in the East by the sixth century CE, fell to the Ottoman Turks in 1453 CE – **was grounded on entirely new principles, on a new world order and, for most of the time, on a different religion.** The autocratic regime established by the first Augustus had been based in a political language and institutions that went back as far as anyone could trace in the first millennium of Roman history, and what I have called the Augustan template of imperial rule provided a relatively stable political framework for almost two hundred years after Augustus' death in 14 CE. **But if the emperor Tiberius, who succeeded the first Augustus, could have slipped fairly comfortably into the imperial shoes of Commodus at the end of the second century CE, he would not have understood what it was to be an emperor a few decades further on. Rome in its second millennium was effectively a new state masquerading under an old name.**

> https://vdare.com/posts/atlantic-the-secret-of-rome-s-success-invade-the-world-enlist-the-world
>
> In Houellebecq's satire *Submission*, the suave Obama-like Muslim politician who becomes president of France frames his power grab as essentially conservative. For example, **he eventually has Muslim North Africa and West Asia invited to join the E.U. in the name of reconstituting the Roman Empire.** By the end of the book, Ben Abbes moves the E.U. headquarters from Brussels to Rome to be more central to Mare Nostrum, as he prepares to be elected President/Emperor of Neo-Roman Empire.
>
> **A new, much publicized history of Rome by Mary Beard, *SPQR*, sounds like an unwitting fleshing out of Houellebecq's jest.** The review in *The Atlantic* emphasizes how much we ought to learn from Rome's grand strategy of Invade the World, Enlist the World.
> ...
>
> > Some readers may feel that Beard overemphasizes the gentler aspects of imperial rule. The newly subjugated were allies in name but not entirely in legal and political fact. **But she is right to stress that the Romans pioneered a revolutionary understanding of citizenship, and in making the concept more central to the whole story of Rome than previous historians have, she highlights its truly distinctive facets. The idea that one could be a citizen, even a partial citizen, of a place where one did not live, and had perhaps never been, was virtually unprecedented.** So was the idea that one could have a dual identity, as both Roman and Mantuan, Roman and Sicilian, or Roman and Oscan (when the Romans conquered the peninsula), or—later—Roman and Greek, Hispanic, Gallic, or British.

https://chalcedon.edu/resources/books/the-one-and-the-many-studies-in-the-philosophy-of-order-and-ultimacy

The reason for the long survival of Rome was precisely **this readiness to adopt each new movement or "revolution" as a part of the meaning of Rome. As a result, Rome underwent a series of revolutions from monarchy to republic to empire, and, thereafter especially, was in continual revolution as an empire, all of which left Rome sometimes in great self-contradiction to its yesterdays but faithful to eternal, divine, and evolving Rome.** Rome destroyed Carthage as a state in 146 B.C., but in time a Punic emperor, Septimius Severus, proud of his ancestry and speaking Greek and Latin with a Punic accent, came to rule Rome. He disdained to take even a Roman woman to wife, marrying rather Julia Domna, of his own race and the daughter of a prince-priest. He was by adoption made an Antonine, and he was steadily promoted by the Romans, who a few centuries before had destroyed his country, **but he was now a part of the ever-new and yet eternal Rome.**

https://archive.org/details/cu31924100532054/page/508/mode/2up?view=theater

Latium had been conquered; of the forty small peoples who inhabited it, Rome had exterminated half. She had despoiled some of their lands, and had left to others the title of allies. In B.C. 340 the latter perceived that the alliance was entirely to their detriment, that they were expected to obey in everything, and that they were required every year to lavish their blood and money for the sole benefit of Rome. **They formed a coalition; their chief, Annius, thus stated their demands in the Roman senate: "Give us equality. Let us have the same laws; let us form but a single state – *una civitas*; let us have but a single name; let us all alike be called Romans." Annius thus announced, in the year 340, the desire which all the nations of the empire, one after another expressed, and which was to be completely realized only after five centuries and a half.** Then such a thought was new and very unexpected; the Romans declared it monstrous and criminal. It was, indeed, contrary to the old religion and the old law of the cities. The consul, Manlius, replied, that if such a proposition should be accepted, he would slay with his own hand the first Latin who should come to take his seat in the senate; then, turning towards the altar, he called upon the god to witness, saying, "Thou hast heard, O Jupiter, the impious words that have come from this man's mouth. **Canst thou tolerate, O Jupiter, that a foreigner should come to sit in thy sacred temple as a senator, as a consul?**"

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0137%3Abook%3D7&force=y

Balbus Cornelius, also, the elder, was elected to the consulate;[369] but he had previously been accused, and the judges had been charged to discuss the point whether he could or not lawfully be scourged with rods; **he being the first foreigner,[370]—born even on the very shores of the ocean,—who obtained that honour, which our ancestors denied even to the people of Latium.[371]**

https://archive.org/details/in.ernet.dli.2015.231118/page/n401/mode/2up?view=theater

We must at the outset recall that by Nero's time they were only geographically Roman. The conditions that Augustus had failed to check—celibacy, childlessness, abortion, and infanticide among the older stocks, manumission and comparative fertility among the new—**had transformed the racial character, the moral temper, even the physiognomy, of the Roman people.**

Once the Romans had been precipitated into parentage by the impetus of sex, and lured to it by anxiety for the post-mortem care of their graves; now the upper and middle classes had learned to separate sex from parentage, and were skeptical about the afterworld. Once the rearing of children had been an obligation of honor to the state, enforced by public opinion; now it seemed absurd to demand more births in a city crowded to the point of redolence.

https://archive.org/details/dli.ernet.506079/page/505/mode/2up?view=theater

After *novi homines* Etruscan, Samnite or Picene, Spain and Narbonensis open the roll of provincial consuls. **They herald the Empire's invasion of the Roman government, they seize supreme power but do not hold it for long. Africa and the eastern lands are pressing rapidly behind, soon almost to overwhelm Italy and the western provinces in the cosmopolitan Senate of the Antonines.**1

1. Compare the results shown by P. Lambrechts, *La composition du sénat romain de l'accession au trône d'Hadrien à la mort de Commode* (1936), 183 ff.

> **The consular *Fasti* furnish the most patent evidence of the intrusion of alien elements;** but they indicate the climax rather than the origins of the process, which belong generations earlier when provincials were already equestrian officers and political or financial agents of the government, not merely under Augustus but even with Pompeius and Caesar. Once again, Balbus and Theophanes.

https://ccel.org/g/gibbon/decline/volume1/chap5.htm#OPP

Till the reign of Severus, the virtue and even the good sense of the emperors had been distinguished by their real or affected reverence for the senate, and by a tender regard to the nice frame of civil policy instituted by Augustus. But the youth of Severus had been trained in the implicit obedience of camps, and his riper years spent in the despotism of military command. His haughty and inflexible spirit could not discover, or would not acknowledge, the advantage of preserving an intermediate power, however imaginary, between the emperor and the army. He disdained to profess himself the servant of an assembly that detested his person and trembled at his frown; he issued his commands, where his request would have proved as effectual; assumed the conduct and style of a sovereign and a conqueror, and exercised, without disguise, the whole legislative as well as the executive power.

> https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Cassius_Dio/76*.html
>
> 8 1 **While reading to the senate a speech, in which he praised the severity and cruelty of Sulla, Marius and Augustus as the safer course and deprecated the mildness of Pompey and Caesar as having proved the ruin of those very men, he introduced a sort of defence of Commodus**
> 2 **and inveighed against the senate for dishonouring that emperor unjustly, in view of the fact that the majority of its members lived worse lives.**

New maxims of the Imperial prerogative.

The victory over the senate was easy and inglorious. Every eye and every passion was directed to the supreme magistrate, who possessed the arms and treasure of the state; **whilst the senate, neither elected by the people, nor guarded by military force, nor animated by public spirit, rested its declining authority on the frail and crumbling basis of ancient opinion.** The fine theory of a republic insensibly vanished, and made way for the more natural and substantial feelings of monarchy. **As the freedom and honours of Rome were successively communicated to the provinces, in which the old government had been either unknown, or was remembered with abhorrence, the tradition of republican maxims was gradually obliterated.** The Greek historians of the age of the Antonines (70) observe with a malicious pleasure, that although the sovereign of Rome, in compliance with an obsolete prejudice, abstained from the name of king, he possessed the full measure of regal power. **In the reign of Severus, the senate was filled with polished and eloquent slaves from the eastern provinces, who justified personal flattery by speculative principles of servitude.** These new advocates of prerogative were heard with pleasure by the court, and with patience by the people, when they inculcated the duty of passive obedience, and descanted on the inevitable mischiefs of freedom. The lawyers and the historians concurred in teaching that the Imperial authority was held, not by the delegated commission, but by the irrevocable resignation of the senate; that the emperor was freed from the restraint of civil laws, could command by his arbitrary will the lives and fortunes of his subjects, and might dispose of the empire as of his private patrimony. (71) **The most eminent of the civil lawyers, and particularly Papinian, Paulus, and Ulpian, flourished under the house of Severus; and the Roman jurisprudence having closely united itself with the system of monarchy, was supposed to have attained its full maturity and perfection.**

> 71. Dion Cassius seems to have written with no other view, than to form these opinions into an historical system. **The Pandects will show how assiduously the lawyers, on their side, laboured in the cause of prerogative.**

The contemporaries of Severus, in the enjoyment of the peace and glory of his reign, forgave the cruelties by which it had been introduced. **Posterity, who experienced the fatal effects of his maxims and example, justly considered him as the principal author of the decline of the Roman empire.**

https://archive.org/details/cu31924028288722/page/432/mode/2up?view=theater

Viewed as a single phenomenon, developing in time, the Roman law is deeply marked by two fundamental characters. **On the one hand, it is largely made up of "survivals" from the barbarous state of society in which it took its origin; and on the other, it gradually drew to itself and appropriated more enlightened principles of justice.**

Of the first sort, we have good illustrations in the power which the law gave to the father to sell his children or to put them to death; in the like power, **coupled with the one-sided and absolute liberty of divorce, which it gave to the husband over the wife;** in the power of life and death which it gave to the master over his slaves; and in the power which it conferred upon creditors either to cut in pieces the body of their insolvent debtor, or to sell him into slavery among foreigners. **These, and similar elements of Roman law, are striking instances of savage "survival," carried along by the state in its advance from its rude primitive condition, and gradually falling into desuetude as its civilization improved.**5
…

Thus, in the most comprehensive view which can be taken of the subject, Roman law is to be regarded as a connecting link between the ancient Barbarism of Europe and modern Civilization. Under the one relation, it participates largely of the character impressed upon it by its rude origin; under the other, it anticipates much of what is best in modern law.

> https://archive.org/details/orientalreligio00cumogoog/page/n242/mode/2up?view=theater
>
> **From coarse fetichism and savage superstitions the learned priests of the Asiatic cults had gradually produced a complete system of metaphysics and eschatology, as the Brahmins built up the spiritualistic monism of the Vedanta beside the monstrous idolatry of Hinduism, or, to confine our comparisons to the Latin world, as the jurists drew from the traditional customs of primitive tribes the abstract principles of a legal system that governs the most cultivated societies.**

https://www.traditioninaction.org/bkreviews/A_017br_Penty.htm

This "communist base" was further destroyed by the development of the codex of Roman Civil Law, which he refers to as "the bible of the Devil" (p. 33).

Then, according to Penty, the communist traditions and spirit of the early Christians replaced the capitalist maxims of Roman Law and created the guilds: "It was the communistic spirit of Christianity that gave rise to the Guilds" (p. 37). **But, the revival of Roman Law made private property return: "The revived study of Roman Law during the Middle Ages operated to undermine the communal relations of society and re-establish private property…"** (p. 33).

https://www.marxists.org/archive/marx/works/1877/anti-duhring/ch08.htm

It would necessarily have seemed insanity to the ancients that Greeks and barbarians, freemen and slaves, citizens and peregrines, Roman citizens and Roman subjects (to use a comprehensive term) should have a claim to equal political status. **Under the Roman Empire all these distinctions gradually disappeared, except the distinction between freemen and slaves, and in this way there arose, for the freemen at least, that equality as between private individuals on the basis of which Roman law developed — the completest elaboration of law based on private property which we know.** But so long as the antithesis between freemen and slaves existed, there could be no talk of drawing legal conclusions from general equality of *men;* we saw this even recently, in the slave-owning states of the North American Union.

> https://occidentaldissent.com/2024/12/17/2025-predictions/
>
> **In the 1850s, Americans became obsessed with the "Slave Power" conspiracy.** Americans were growing militant about slavery. And yet, plantation slavery was by this time a relic of a bygone age. **Slaveowners were still extremely powerful in America, but the wealth of the future was in industrialization.**

> https://www.marxists.org/archive/marx/works/1845/holy-family/ch04.htm#4.4
>
> When, however, the economists become conscious of these contradictions, *they themselves* attack *private property* in one or other *particular* form as the falsifier of what is in itself (i.e., in their imagination) rational wages, in itself rational value, in itself rational trade. Adam Smith, for instance, occasionally polemises against the capitalists, Destutt de Tracy against the money-changers, Simonde de Sismondi against the factory system, **Ricardo against landed property, and nearly all modern economists against the *non-industrial* capitalists, among whom property appears as a mere *consumer.***

https://www.gutenberg.org/files/47422/47422-h/47422-h.htm#Page_41

When the negro rose in value to two hundred gallons "of real rum" (the sable slave hunters were becoming as acute as Brother Jonathan himself, touching the adulterated article), the conscience of the holy adventurer began to be disturbed about the righteousness of the traffick. When the slave cost two hundred and fifty gallons, the scruples became troublesome; and when his price mounted up towards three hundred, by reason of the imprudence of the naughty man with his large cargo, from Barbadoes, the stings of conscience became intolerable. **By the principles of that religion which "supposeth that gain is godliness,"[22] the trade was now become clearly wrong.**

https://www.gutenberg.org/files/47422/47422-h/47422-h.htm#Page_185

The fact betrays itself in a thousand ways, that envy of the slaveholder and his supposed advantages and power, is the root of much of their zeal. Hence the epithets of "aristocrat," "lordly slaveholder," "Southern nabob," as ridiculously false to fact as envious, which form so large a part of the staple of their abuse. They hate us because they suppose we possessed a privilege of which they were deprived.
...

The wrongs of the slave have been the pretext, sectional and personal aggrandizement the true ends. That party, under the phase of "free-soil," has thrown off the mask, and avowed the declaration that the true meaning of their opposition to the rights of Southern masters in the territories is, that "the soil of America belongs to the white man;" and the poor negro, though now a native of it, is begrudged a home and a living upon it. There is no class of people in America which has expended so little of its money for the actual advantage of the black race, as the abolitionists. Usually, the history of the case has been, that they would give of their money, neither to ransom a slave from bondage, nor to aid the cause of African colonization, nor to assist a distressed free negro of their own section: the only use to which they can be induced to apply it is the printing of vituperations against the masters. **It was the testimony of the fugitive slaves themselves, that the philanthropy of the Abolitionists extended only to seducing them from their homes; thenceforth their whole thought was to make gain of their godliness.**

https://www.abbevilleinstitute.org/thomas-jeffersons-prophetic-anti-city-sentiments/

Years earlier (23 Sept. 1800), he says to Dr. Benjamin Rush: “**I view great cities as pestilential to the morals, the health and the liberties of man.** True, they nourish some of the elegant arts, but the useful ones can thrive elsewhere, and less perfection in the others, with more health, virtue & freedom, would be my choice.” To David Williams (14 Nov. 1803), **he states that cities encourage too many citizens to try to live by their heads, and not their hands**—that is, they discourage husbandry and self-sufficiency—and that is for Jefferson an impossible state of affairs for human happiness. They also bode ill for any who have a “turn for dissipation.” **So great was his enmity of cities that in the 1800 letter to Rush he states that the yellow-fever epidemic that hit Philadelphia and wiped out a large number of its citizens might just be Providence’s way of discouraging “the growth of great cities in our nation.”**

Cities for Jefferson marked a sort of natural decay—a slip away from the bucolic, agrarian ideal that Jefferson consistently championed, **though he made certain concessions concerning the need of some manufacture later in life.** In cities, that degree of freedom that gives citizens “a wholesome control over their public affairs” is absent. What is missing, he tells John Adams (28 Oct 1813), is ownership and care of land, which conduces to “law and order.” Owning land, citizens come to know its true value—the yield of arable land is cornucopian—and will wish to defend it in times of intra- or international strife. The mobs in cities—and a mob is a mere instrument of those with rank and birth—wallow in ignorance, poverty, and vice, and thus are incapable of rational activity. “The mobs of great cities add just so much to the support of pure government, as sores do to the strength of the human body,” writes Jefferson in Query XIX of his *Notes on the State of Virginia* in 1787. To James Madison in the same year (Dec. 20), he writes: **“I think we shall be [virtuous], as long as agriculture is our principal object, which will be the case, while there remain vacant lands in any part of America. When we get piled upon one another in large cities, as in Europe, we shall become corrupt as in Europe, and go to eating one another as they do there.”**

https://archive.org/details/truestorybarons00reyngoog/page/n188/mode/2up?view=theater

Fortunately for the country, there was an invisible agency—never absent from human affairs, but of which bad men make no account—that was silently thwarting the atrocious plot. **JEFFERSON DAVIS and his satellites were born too late by five hundred years.** The providence of God, which develops out of successive cycles an ever-augmenting sum of good for man, could not allow a type of government indigenous to the Middle Ages to become interpolated into the nobler text of the nineteenth century. **We owe our rescue from the greatest crime ever meditated against civilization to the simple fact that the Divine order could not tolerate so violent an anachronism.**

https://archive.org/details/altonlocketailo06kinggoog/page/n78/mode/2up?view=theater

Folks are getting somewhat tired of the old rodomontade that a slave is free the moment he sets foot on British soil! Stuff!—are these tailors free? Put any conceivable sense you will on the word, and then say—are they free? We have, thank God, emancipated the black slaves; it would seem a not inconsistent sequel to that act to set about emancipating these white ones. **Oh! we forgot; there is an infinite difference between the two cases—the black slaves worked for our colonies; the white slaves work for *us*.** But, indeed, if, as some preach, self-interest is the mainspring of all human action, it is difficult to see who will step forward to emancipate the said white slaves; **for all classes seem to consider it equally their interest to keep them as they are;** all classes, though by their own confession they are ashamed, are yet not afraid to profit by the system which keeps them down.

http://rcarterpittman.org/essays/misc/Which_Shall_It_Be.html

On page 9 he exposes a half-concealed truth in the midst of half-truths. Here it is:

> Against this [liberty] the equalitarianism in the Creed has been persistently revolting. The struggle is far from ended. **The reason why American liberty was not more dangerous to equality was, of course, the open frontier and free land. When opportunity became bounded in the last generation, the inherent conflict between equality and liberty flared up. Equality is slowly winning.** The New Deal during the 'thirties was a landslide.

For once Dr. Myrdal told the God's truth. Liberty and equality cannot coexist.

Hunter Wallace on X: **In the late 20th century, Jews were the top dog in the American elite, and "antisemitism" was strictly verboten.** It was relentlessly policed by the MSM and "watchdog" orgs and relegated to the fringes of society.

This is the world we all grew up in and are accustomed to with Dr. Pierce railing about the lemmings bamboozled by the Jewish media, but that world is ... increasingly archaic?

The analogy that is stuck in my mind is how the Southern planter class was gradually eclipsed by Northern industrialists. Slavery became controversial when it was becoming antiquated. **It suited the interest of Northern industrialists to have the public outraged at the Slave Power.**

> https://archive.org/details/dli.ernet.506079/page/489/mode/2up?view=theater
>
> ‘STEMMATA quid faciunt?’1 The satirist Juvenal makes mock of pedigrees. Not, however, with all the fierce, free invective of a robust democrat. **Juvenal derives his names and examples from the descendants of the Republican nobility—but not the living.** Few of them, indeed, survived in Juvenal’s day, and they mattered not at all. The Empire had broken their power and their spirit. **The satirist did not dare to deride the new nobility, the oligarchy of government in his own day. He makes mock of the needy Greek of low degree, clever, mendacious and unscrupulous.**2 A traditional and literary figure. Very different the proud sons of the great priestly and dynastic houses of Asia, now holding consular rank in the imperial Senate. **Still less does he venture to attack the opulent provincial families issuing from Spain and Narbonensis.** They were now dominant in the social and political hierarchy of the Empire, they wore the purple of the Caesars.

...

The big picture of the Civil War era is how America traded one elite – the old antebellum Southern planter class – for a new one which was the Gilded Age Northern industrialists.

...

In 1820, an activist calling for the abolition of slavery was speaking Truth To Power, but by 1850 that type of activist had become a useful instrument of rising Northern industrial interests. Antislavery was mainstream.

https://www.marxist.com/law-and-marxism-the-state-and-the-constitution.htm

Constitutional laws are a conquest of the bourgeois revolutions against the old feudal order, and they flow, in content and form, directly from a system based on commodity production.

...

In his book, Engels writes about the rise of the Athenian state. **He says that as long as Athenian production was on a low level the “gentile” constitution based on family ties and tribal administration was sufficient. But as the forces of production developed to produce surplus goods, classes of people became recognised on the basis of their relationship to the means of production, not on the basis of their “gens” or tribe.**

…

Yet this apparatus of brutal class dominance is not how the state appears to us today. **The ruling class and individual capitalists do not tend to run their own private armies to enforce their will.**
…

The ancient Athenian state described above, in which the state apparatus was transparently a weapon used by the possessing class against the non-possessors, did not last long. Engels explains that after the initial period of naked class domination through the state, Solon of Athens established a new constitution in 594 B.C.
…

Of course Solon's constitution only protected the free Athenian citizen, not the slaves whose deprivation of rights and protections was the whole basis of the Athenian economy.
…

In other words, the political revolution of Solon in 594 B.C. and the bourgeois revolutions in England, France and elsewhere, transformed the state and its armed bodies of men, but not in any fundamental way. **The state under capitalism remains the same weapon of direct class rule that it was under feudalism, albeit more refined, "perfected", and better suited to its task, i.e. defending the interests of the capitalist class and not the feudal landlords.**
…

A commodity exchange system requires that the market itself determine the exchange value of the commodities being traded. This is something in which the buyer and seller can't play individual roles – it is something to be resolved by the general level of technique in the economy and other socially-determined questions. **This means that the buyer and seller, while in the marketplace, must be stripped of all individuality that might disrupt the process of determining the exchange value of their commodities. In the process of exchange the buyer and seller must be empty vessels through which the commodities owned by them can assert themselves in the marketplace.**

In short, the buyer and seller have to be recognised as entirely equal to one another, even if in reality they are not. This equality is the nature of the legal relationship between individuals in a system of commodity exchange.

It should come as no surprise then that legal equality is one of the rallying cries of the constitutional state. It is part of the famous slogan of the French revolution "*Liberté, egalité, fraternité*", **which established the political supremacy of the bourgeoisie.** In his 2010 book, *The Rule of Law*, the former Law Lord Tom Bingham says that "equality before the law [is] a cornerstone of our society". **And this is the same idea put forward by Thomas Rainsborough during the Putney Debates at the time of the English Revolution in 1647 when he said "For really, I think, the poorest he that is in England has a life to live as the greatest he". The origin of this legal idea which seems unquestionable to us today is tied up with the birth of the capitalist system. Equality before the law is essential to the smooth-running of commodity exchange and the capitalist system as a whole.**

> http://www.thephora.net/forum/forum/the-academy/political-arena/62281-the-alt-right-and-christianity?p=1826070#post1826070
>
> So what cucked Christianity then? **It was commerce. When the martial landlords as the dominant class of Europe were replaced by merchants, the cult of "equality" became a necessity for the smooth operation of business.**
>
> https://archive.org/details/enlightenmentcon0000isra/page/558/mode/2up?view=theater
>
> **It is assuredly no accident that the modern idea of basic equality first emerged in the later Dutch Golden Age. For as Gregorio Leti, and later Mandeville, noted, a meaningful discourse of equality before the law requires a particular kind of administrative and judicial strength, anchored in the civic context.**52 By equalizing the protection and freedom afforded by the law which the monarchies and aristocracies of the day scarcely aspired to do, the United Provinces set a crucial example. As the Dutch Huguenot radical Jean-Frédéric Bernard had his Persian philosopher remark in 1711, **'cette égalité de protection,'** which he considers the most impressive feature of the Dutch Republic, 'est fondée sur le droit qu'a le citoien, comme membre de l'état.'53

> See, capitalism is not fundamentally racist – it can exploit racism for its purposes, but racism isn't built into it. **Capitalism basically wants people to be interchangeable cogs,** and differences among them, such as on the basis of race, usually are not functional. I mean, they may be functional for a period, like if you want a super exploited workforce or something, but those situations are kind of anomalous. **Over the long term, you can expect capitalism to be anti-racist – just because it's anti-human. And race is in fact a human characteristic – there's no reason why it should be a *negative* characteristic, but it is a human characteristic.** So therefore identifications based on race interfere with the basic ideal that people should be available just as consumers and producers, interchangeable cogs who will purchase all the junk that's produced – **that's their ultimate function, and any other properties they might have are kind of irrelevant, and usually a nuisance.**

Much of modern law, including concepts of individual ownership, can be traced back to ideas and principles present in Roman and ancient Athenian law. This is because commodity exchange developed to a fairly high level even in these societies based on slave economies. But precisely because of this economic basis, commodity exchange and therefore a legal system based on commodity exchange could never become generalised in ancient Rome – legal rights could never apply to slaves for example. The generalisation of commodity exchange that characterises capitalism has allowed the development of the concept of equal legal rights to its highest point.

In order for individuals to confront each other in an open marketplace as legal owners with equal rights, certain guarantees need to be in place regarding the safety and security of the individuals and their commodities. **Without these guarantees of rights to personal safety and property ownership, exchange could not take place and commodity production would grind to a halt.**

This wasn't a particularly big consideration in the early days of ancient Athens and the early feudal period because commodity exchange was comparatively rare and very localised. But as the forces of production were developed and a surplus of goods was produced on a regular basis, commodity production became a more common phenomenon. As the seeds of an exchange economy took root, force (or the threat of force) had to be used by those with wealth and power to guarantee the rights of the traders without whom commodity production could not continue. For example, as commodity exchange developed, it fell to the individual feudal lords to guarantee the security of trade in the marketplaces on their land.
…

This is the role of the bourgeois state and its function is to defend the system of commodity exchange. **A set of rules is required to guarantee the independence of this state from any one individual capitalist or group of capitalists, and to guarantee its loyalty to the capitalist system as a whole – these rules are constitutional laws.**
…

What Lenin is explaining here is that a democratic republic, or a constitutional state, builds capitalism into the foundations of the state – into the very rules within which it operates. **This is because, as explained above, it is based on commodity exchange and equal individual legal rights.** Once this has been established, political parties, people and institutions can come and go but they will all be limited by the constitutional rules of the "democratic republic", which means the rules of the capitalist system. This is why Lenin says that such a state is the "best possible political shell for capitalism".

Like everything, this has certain limits, because there are times under capitalism when the ruling class has to resort to *unconstitutional* means to keep itself in power, such as the fascist regimes of the 20th century, and the technocratic governments that were installed in Italy and Greece following the capitalist slump in 2008.

Also, in times of crisis, when the interests of national bourgeoisies can no longer be guaranteed through the 'rule of law', war breaks out to establish a new order, such as the First and Second World Wars. **During the rise of imperialism so-called 'rule of law' did not apply to the colonial peoples whose wealth was taken from them on the basis of *unequal exchange*,** which necessitated the use of the "armed bodies of men" at the disposal of the imperialist states.

https://www.marxists.org/archive/lenin/works/1922/feb/20c.htm

The new civil legislation is being drafted. I find that the P.C.J. is "swimming with the tide". But its task is to swim *against* the tide. **Its task is to create a new civil law, and not to adopt (rather, not to allow itself to be duped by the old and stupid bourgeois lawyers who adopt) the old, bourgeois concept of civil law.** It should not give in to the People's Commissariat for Foreign Affairs, which "ex officio" conducts the line of "adaptation to Europe", but *combat* this line and work out a *new* civil law, a new attitude to "private" contracts, etc. **We do not recognise anything "private", and regard *everything* in the economic sphere as falling under *public* and not private *law*. We allow *only* state capitalism, and as has been said, it is**

we who are the state. Hence, the task is to extend the application of state intervention in “private legal” relations; to extend the right of the state to annul “private” contracts; **to apply to “civil legal relations” not the *corpus juris romani* but *our revolutionary concept of law*;** to show systematically, persistently, with determination, through a series of model trials, *how* this should be done wisely and vigorously; to brand through the Party and expel those members of revolutionary tribunals and people’s judges who fail to learn this or refuse to understand it.

https://www.bloomsburycollections.com/book/roman-law-and-the-idea-of-europe/ch5-roman-law-after-1917-exile-statelessness-and-the-search-for-byzantium-in-the-work-of-mikhail-von-taube

In assaulting earlier publications on Roman law, Marxist legal theorists like Evgeny Pashukanis believed that it would eventually be possible to develop an alternative legal system not resting on private property.5 German communists like Alfons Paquet also argued that ‘war should be declared on the contemporary civilization which rests on Roman foundations’. He also blamed Roman law for the heightened struggle between nations which led to the collapse of all morality (Paquet 1923: 872-3). At around the same time, in Germany, **the notorious Article 19 of the NSDAP called to replace the ‘materialist’ ideas of Roman law with old ‘German common law’ (*ein deutsches Gemeinrecht*),** an idea which the Nazis began to put into practice partially, but particularly, in the context of the recolonization of Eastern Europe (cf. Landau 1989: 11-24).

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Tacitus/Histories/4C*.html#ref12

64 1 So the Tencteri, a tribe separated from the colony by the Rhine,[14] sent an embassy with orders to present their demands in an assembly of the people of Cologne. These demands the most violent of the delegates set forth thus: "**We give thanks to our common gods and to Mars before all others that you have returned to the body of the German peoples and to the German name,** and we congratulate you that at last you are going to be free men among free men; for until to-day the Romans have closed rivers and lands, and in a fashion heaven itself, to keep us from meeting and conferring together, or else—**and this is a severer insult to men born to arms—to make us meet unarmed and almost naked, under guard and paying a price for the privilege.**[15] But to secure for ever our friendship and alliance, **we demand that you take down the walls of your colony, the bulwarks of your slavery, for even wild animals forget their courage if you keep them shut up;** we demand that you kill all the Romans in your territories. Liberty and masters are not easily combined together. The property of those killed is to be put into the common stock that no one may be able to hide anything or separate his own interest. **Both we and you are to have the right to live on both banks, as our fathers once did. Even as Nature has always made the light of day free to all mankind, so she has made all lands open to the brave. [quo modo lucem diemque omnibus hominibus, ita omnis terras fortibus viris natura aperuit.] Resume the manners and customs of your fathers, cutting off those pleasures which give the Romans more power over their subjects than their arms bestow. A people pure, untainted, forgetting your servitude, you will live the equals of any or will rule others.**"

https://archive.org/details/feudalgermany0000jame/page/274/mode/2up?view=theater

Frederick I’s failure to read some of the most manifest signs of the time seems like stupidity. But his defect was not that. It was a colossal egotism which so warped his brain that he had not the intelligence to understand, the sympathy to tolerate, the new political philosophy, the new economic conditions, the new social transformations which Europe was undergoing. **His obstinate adherence to obsolete prerogatives, both in Germany and Italy, his obdurate determination “to maintain the honor of the empire which from the foundation of Rome has been glorious and undiminished,”**3 **in a time when the whole drift of European political development was away from the older medieval idea and toward nationalism – all this conduct makes Frederick I, in spite of his brilliant talents and strict enforcement of justice,**4 **a dangerous anachronism; but unfortunately he was not a lean and solemn phantom as anachronisms usually are, but a power terrible to pervert the present and to maim the future.**
…

Frederick I’s caesaristic madness1 and his mania for application of the Roman law was destructive of the best political traditions of medieval Germany. It is ineffectual argument for his admirers to claim that he never had any intention of introducing the Roman law into Germany, and to cite the decision of 1181 as evidence thereof.2 **For the same man had earlier, in 1165, repudiated German law in the face of the bitter opposition of Worms on the ground of the decrees of his “predecessors.” And whom did he mean by the word? Constantine and Valentinian, whose “sacred laws” he venerated as “oracles.”**3

The crowning wrong perpetrated by Frederick Barbarossa was the destruction of Saxony, the greatest and strongest state in feudal Germany, the real cornerstone on which a new Germany in

harmony with the spirit of the age and the conditions of the time might have been founded, and representative through the Guelf duke, Henry the Lion, of the new, constructive ideas of government.
…

He believed that the great deeds of the German people should be accomplished in Germany, not beyond the Alps. He believed in a forward-looking government, not one that looked backward to ancient Rome or even to Charlemagne for its sanctions. He believed that the feudal state, like all feudal society, was held together by compact; that a king was not of right an absolute monarch, but that he was bound by the rights and liberties of his subjects; that his prerogative was a limited one, and that misgovernment or tyranny justified rebellion. He believed in states-rights for the historic duchies which composed the German kingdom. Finally, as no king in Germany ever had, Henry the Lion possessed a vision of the great destiny of the German people in the New East (like our own New West in 1830) beyond the Elbe River, and labored for its expansion and settlement.1

Henry the Lion was not a political theorist nor a metaphysician, in these contestations, like Calhoun. But his political policies have kinship with those of that famous statesman of the Old South. One may find a concrete illustration in his doctrine (if it may be called by so formal a term in the twelfth century) of the preservation of ducal rights, or what I have denominated “states rights” in this feudal age.
…

Henry fought for the local sovereignty and the historical rights of the German duchies. The wish of the Lombard cities was to be assimilated to the status of grand vassals of the crown as collective or corporate urban feudatories. South of the Alps, as north of them, the test of the rival principles of Guelf and Hohenstaufen was made. The issue was much the same after all allowance had been made for difference in local traditions and in milieu. **Henry the Lion and the Lombard cities were the advocates and representatives of genetic and progressive political and social principles sprung from the womb of feudalism – a self-developing and constructive adjustment of European society to changed conditions.** Frederick I, on the other hand, insisted upon the public law of Europe as it had been in the time of Charlemagne, Louis the Pious, and Otto the Great, which was equivalent to a denial of the traditional rights and the new liberties for which both the Guelf and the communes asked recognition.1
…

The struggle between English customary, traditional liberties and Norman-Plantagenet tendency in the twelfth century offers a parallel to that which was happening in Germany. **Stephen stood for the maintenance of old English liberties; Henry Plantagenet, for Roman absolutism.**1 For Roman civil law, introduced into England by the canonists after 1066, within little more than a generation had become so great a menace to English traditional rights and liberties that Stephen silenced Master Vacarius, the chief teacher of it, and suppressed his books.2 It was as Liebermann describes:

> **The political instinct of the English government, influenced more than ever before or after by the lay baronage, stood up for the Teutonic feudal law of the Anglo-Normans against the decrees of Roman popes and emperors**. The foreign foe … opposed systematic jurisprudence to unwritten customs. It was neither the first nor the last time that the barons replied to canonistic pretentionists. *Noluimus leges Angliae mutari*.3

…

The barons were faithful to English feudal traditions as Henry the Lion strove to be loyal to German feudal traditions, which Frederick I, deeply imbued with the theories and the practices of the Roman law, aimed to suppress and efface.

> **Charles V. would protect her only so far as he could without losing in his military projects the support of the Protestant princes of the empire;** and when he wished to force the pope to his terms, he let loose his fanatical troops under the Constable Bourbon against Rome, who imprisoned him, and spoiled and sacked the city for nine months; **Philip II. would also serve the church and make a war of extermination on heretics in the Low Countries, but only in the hope of using her as an instrument in attaining to the universal monarchy at which he aimed.**

https://archive.org/details/historylatinchr33milmgoog/page/240/mode/2up?view=theater

The strong and remorseless rule of Philip Augustus, the popular virtues of Saint Louis, had lent lustre, and so brought power to the throne, which in England had been degraded by the tyrannical and pusillanimous John, and enfeebled by the long, inglorious reign of Henry III. In France the power of the clergy might have been a sufficient, as it was almost the only organized counterpoise to the kingly prerogative; **but there had gradually risen, chiefly in the Universities, a new power, that of the Lawyers: they had begun to attain that ascendency in the Parliaments which grew into absolute dominion over those assemblies. But the law which these men expounded was not like the common law of England, the growth of the forests of Germany, the old free Teutonic usages of the Franks, but the Roman imperial law, of which the Sovereign was the fountain and supreme head.**

https://archive.org/details/in.ernet.dli.2015.13326/page/n79/mode/2up?view=theater

Though the Bartolists were contemporaries of, sometimes intimate with, some of the greatest literary masters the world has ever seen, as, for example, Dante, Petrarch, Boccaccio, yet their style is marked by tedious diffuseness, prolixity, commonplace; the observation of Cujas is fully merited—"verbosi in re facili, in difficili muti, in angusta diffusi."

In Italy and France their influence remained till the coming of men like Alciati and Cujas, and here and there persisted even for some time after; in Germany it lasted much longer, indeed till the time of Savigny. In the latter country the definitive "reception" of Roman law took place in the fifteenth century; but it was an impure, glossed, Bartolized Roman law; the "heutiges römisches Recht" was more Roman in name than in substance.

http://www.geschichtsquellen.de/autor/4561

Oberrheinischer Revolutionär: Kunstname für den anonymen Verfasser einer König Maximilian I. gewidmeten Reformschrift. Er wurde wohl 1438 im Oberrheingebiet geboren und hielt sich um 1460 in Italien auf. **Sein Werk weist ihn als juristisch gebildet aus.** Nach K. H. Lauterbach ist er identisch mit Mathias Wurm († 1510), Sekretär Kaiser Friedrichs III. und Maximilians I., nach V. Huth mit dem Dr. iur. utr. Jakob Merswin aus Straßburg († 1514/15).

https://books.google.fi/books?id=18pKEAAAQBAJ&lpg=PR1&hl=fi&pg=PA349#v=onepage&q&f=false

On the basis of a reforming biblicism shaped by Wyclif, the Revolutionary of the Upper Rhine elaborated a vision of the future which was intended to reinvigorate the weakened power of the emperor by invoking guiding principles derived from Christianity and Scripture.1

https://archive.org/details/pursuitofmillenn0000norm_i9m3/page/118/mode/2up?view=theater

Far longer, more detailed and more truculent than the *Reformation of Sigismund* is the *Book of a Hundred Chapters*, by an anonymous publicist who lived in Upper Alsace or the Breisgau and who is generally known as 'the Revolutionary of the Upper Rhine.' This elderly fanatic was thoroughly familiar with the enormous mass of medieval apocalyptic literature and drew freely upon it for the purpose of elaborating an apocalyptic programme of his own. **Written in German in the opening years of the sixteenth century, his treatise is the last and most comprehensive expression of the popular eschatology of the Middle Ages.**
…

To this end God desired a certain pious person – naturally it is the author himself – to organize an association of pious laymen. **Only those born in wedlock and who were themselves married and had always been monogamous would be eligible for membership** (the author's preoccupation with adultery is obsessive).
…

The fanatical layman never tires of portraying – and in the most lurid possible colours – the chastisement which the coming Emperor, that is he himself, will inflict on those children of Satan, the friars and monks and nuns. In particular, he rages against priests who break their vow of chastity and set up households. Such priests, he cries, should be strangled or burnt alive, or else driven with their concubines into the hands of Turks; their children – true children of Antichrist – should be left to starve. **But indeed the whole clergy must be annihilated:** 'Go on hitting them,' cries the Messiah to his army, 'from the Pope right down to the little

students! Kill every one of them!' He forsees that 2,300 clerics will be killed each day and that this massacre will continue for four and a half years. And this is not the end, for scarcely less abominable than the clerics are the 'usurers' who flourish in the towns.
…

All these alike are to be massacred; **assisted by those who are referred to now as 'the pious Christians,' now as 'the common people,' the Emperor from the Black Forest is to burn all usurers and hang all lawyers.**
…

Church property is to be secularized and used by the Emperor for the benefit of the community as a whole and the poor in particular. All income derived either from landed property or from trade is to be confiscated – which amounts to an abolition of the principalities and an expropriation of all the rich. Rents, taxes, dues of every kind are to be imposed by the Emperor alone. But beyond these immediate reforms – sweeping as they are – the Revolutionary looks forward to a far more drastic transformation of society, to a state where private property will be abolished altogether and all things will be held in common: **'What a lot of harm springs from self-seeking! … It is necessary therefore that all property shall become one single property, then there will indeed be one shepherd and one sheepfold.'**
…

But in one respect the Revolutionary of the Upper Rhine was truly original – nobody before him had combined such devotion to the principal of communal or public ownership with such megalomaniac nationalism. **This man was convinced that in the remote past the Germans had in reality 'lived together like brothers on the earth,' holding all things in common. The destruction of that happy order had been the work first of the Romans and then of the Church of Rome. It was Roman Law and Canon Law which had introduced the distinction between Mine and Thine and which had thereby undermined the sentiment of fraternity and opened the way to envy and hate.** Behind this curious idea lay a whole philosophy of history. The Old Testament was dismissed as valueless; for from the time of the Creation onwards it was not the Jews but the Germans who were the Chosen People. **Adam and all his descendants down to Japhet, including all the Patriarchs, were Germans speaking Germans; other languages – Hebrew among them – came into existence only at the Tower of Babel. It was Japhet and his kin who first came to Europe, bringing their language with them. They had chosen to settle in Alsace, the heart of Europe; and the capital of the Empire which they founded was at Trier.** This ancient German Empire was a vast one, for it covered the whole of Europe – Alexander the Great could be claimed as a German national hero. And it was the most perfect of empires, a true earthly Paradise, **for it was governed according to a legal code, known as the Statutes of Trier, in which the principles of fraternity, equality and communal ownership were enshrined. It was in these Statutes, and not in the Decalogue invented by the charlatan Moses, that God had expressed his commandments to mankind** – for which reason the Revolutionary thoughtfully appended a copy of them to his work.

Very different was the history of the Latin peoples. These wretched breeds were not descended from Japhet and were not numbered amongst the original inhabitants of Europe. **Their homeland lay in Asia Minor, where they had been defeated in battle by the warriors of Trier and whence they had been brought to act as the serfs of their conquerors.** The French – a peculiarly detestable lot – ought therefore by rights to be a subject people, ruled by the Germans. **As for the Italians, they were descended from serfs who had been banished over the Alps for offences against the Statutes of Trier; whence the fact, which the publicist had no difficulty in establishing, that Roman history consisted of an almost uninterrupted series of defeats. These Latin peoples were the source of all wickedness – a poisoned source which had gradually polluted the whole sea.** Roman Law, the Papacy, the French, the Republic of Venice were so many aspects of an immense, age-old conspiracy against the German way of life.

Fortunately the time was at hand when the power of evil was to be broken for ever. When the great leader from the Black Forest seized power as Emperor Frederick he would not only cleanse German life from the Latin corruption and bring back the Golden Age based on the Statutes of Trier – he would also restore Germany to the position of supremacy which God intended for her. 'Daniel's Dream,' that old apocalypse which had brought such inspiration to the Jews during the Maccabean revolt, was subjected by the Revolutionary to yet another reinterpretation. **Now the four successive empires turned out to be France, England, Spain and Italy. Enraged by the overweening pride of these nations the Emperor will conquer them all – the Revolutionary claimed already to have discovered by means of alchemy the new explosives which the undertaking would demand.** 'By his cruelty he will instil fear into the peoples'; thereby establishing the Germans as the fifth and greatest empire, which shall not pass away. Next the Emperor, returning from his western campaigns, would utterly defeat the Turks who have penetrated into Europe. Pressing east at the head of a vast army drawn from many peoples he will carry out the task traditionally assigned to the Last Emperor. **The Holy Land will be conquered for Christendom and 'the society of Mohammedans' will be utterly overthrown. The infidel will be baptised 'and those that will not accept baptism are no Christians nor people of the Holy Scriptures, so they are to be killed, then they will be baptised in their blood.'** After all this the Emperor will reign supreme over the whole world, receiving homage and tribute from thirty-two kings.

It is worth remarking that the Christianity which was to be imposed so vigorously is scarcely recognizable as such. According to the Revolutionary the first Christians were the citizens of the Trier Empire and the God whom they worshipped was the same as Jupiter; his holy day was Thursday, not Sunday; **as**

emissaries to the Germans he sent not angels but spirits who dwelt in the Alsatian mountains. The teachings of the historical Christ were directed only to Jews, not to Germans. **The proper religion for Germans was still that which had prevailed in the Golden Age of Trier and this was the religion which the Emperor Frederick was to reinstate. When that happened** – and here the Revolutionary draws heavily on *Gamaleon* – **the spiritual centre of the world would not be Rome but Mainz, where a patriarch would preside in place of the vanquished pope. But this patriarch would be no pope but wholly dependent on the Emperor who would appoint and could if need be depose him. It was the Emperor – the Revolutionary himself, triumphant and glorified – who would be 'the supreme priest' and whom 'one must recognize as an earthly God.'** The future Empire was indeed to be nothing less than a quasi-religious community united in adoration and dread of a messiah who was the incarnation of the German spirit. This is what the Revolutionary had in mind when he cried, jubilantly: 'The Germans once held the whole world in their hands and they will do so again, and with more power than ever.'

In these phantasies **the crude nationalism of a half-educated intellectual** erupted into the tradition of popular eschatology. The result is almost uncannily similar to the phantasies which were the core of the National-Socialist 'ideology.' **One has only to turn back to the tracts – already almost forgotten – of such pundits as Rosenberg and Darré to be immediately struck by the resemblance.**

https://www.marxists.org/reference/archive/hegel/works/hi/lectures3.htm

The second point which we have particularly to remark, is the position taken by individuals as *persons.* Individuals were perfectly equal (slavery made only a trifling distinction), and without any political right. **As early as the termination of the Social War, the inhabitants of the whole of Italy were put on an equal footing with Roman citizens; and under Caracalla all distinction between the subjects of the entire Roman empire was abolished. Private Right developed and perfected this equality.** The right of property had been previously limited by distinctions of various kinds, which were now abrogated. We observed the Romans proceeding from the principle of abstract Subjectivity, which now realizes itself as Personality in the recognition of Private Right. Private Right, viz., is this, that the social unit as such enjoys consideration in the state, in the reality which he gives to himself – viz., in property. The living political body – that Roman feeling which animated it as its soul – is now brought back to the isolation of a lifeless Private Right. As, when the physical body suffers dissolution, each point gains a life of its own, but which is only the miserable life of worms; so the political organism is here dissolved into atoms – viz., private persons. Such a condition *is* Roman life at this epoch: on the one side, Fate and the abstract universality of sovereignty; on the other, the *individual* abstraction, "Person," which involves the recognition of the independent dignity of the social unit – not on the ground of the display of the life which he possesses – in his complete individuality – but as the abstract *individuum.* It is the pride of the social units to enjoy absolute importance as private persons; for the Ego is thus enabled to assert unbounded claims; but the substantial interest thus comprehended – the *meum* – is only of a superficial kind, and the development of private right, which this high principle introduced, involved the decay of political life.

https://www.marxists.org/reference/archive/hegel/works/hp/hpstoics.htm

The Roman jurists are also said to have been likewise Stoic philosophers, but, on the one hand, we find that our teachers of Roman law only speak ill of Philosophy, and, on the other, they are yet sufficiently inconsistent to state it to the credit of the Roman jurists that they were philosophers. So far as I understand law, I can find in it, among the Romans, nothing either of thought, Philosophy or the Notion. If we are to call the reasoning of the understanding logical thought, they may indeed be held to be philosophers, but this is also present in the reasoning of Master Hugo, who certainly does not claim to be a philosopher. The reasoning of the understanding and the philosophic Notion are two different things.

https://en.wikipedia.org/wiki/German_Historical_School

The German Historical School was divided into Romanists and the Germanists. The Romanists, to whom Savigny also belonged, held that the *Volksgeist* springs from the reception of the Roman law. While the Germanists (Karl Friedrich Eichhorn, Jakob Grimm, Georg Beseler, Otto von Gierke) saw medieval German Law as the expression of the German *Volksgeist*.

https://en.wikipedia.org/wiki/Heinrich_Heine#Universities

After a year at Bonn, **Heine left to continue his law studies at the University of Göttingen.** Heine hated the town. It was part of Hanover, then also rulers of the United Kingdom of Great Britain and Ireland, the power Heine blamed for bringing Napoleon down. **Here the poet experienced an aristocratic snobbery absent elsewhere. He hated law as the Historical School of law he had to study was used to bolster the reactionary form of government he opposed.** Other events conspired to make Heine loathe this period of

his life: he was expelled from a student fraternity due to anti-Semitism, and he heard the news that his cousin Amalie had become engaged.

https://www.marxists.org/archive/marx/works/1841/01/arndt.htm

It is against the French especially, whose invasion had been repulsed **and whose hegemony in external matters is based on the fact that they master, more easily than all nations at least, the form of European culture, namely, civilisation** — it is against the French that the iconoclastic fury was directed most of all. The great, eternal achievements of the revolution were abhorred as "foreign frivolities" or even "foreign lies and falsehoods"; **no one thought of the kinship between this stupendous act of the people and the national uprising of 1813; that which Napoleon had introduced, the emancipation of the Israelites, trial by jury, sound civil law in place of the pandects,[102] was condemned solely because of its initiator.** Hatred of the French became a duty.

https://archive.org/details/inequalityhuman00gobigoog/page/n120/mode/2up?view=theater

From the time of the Punic Wars among the Romans, and from that of Pericles, and especially of Philip, among the Greeks, this uniformity tended more and more to break down. The mixture of nations brought with it a mixture of civilizations. The result was a very complex and learned society, with a culture far more refined than before. But it had one striking disadvantage; **both in Italy and in Hellas, it existed merely for the upper classes,** the lower strata being left quite ignorant of its nature, its merits, and its aims. **Roman civilization after the great Asiatic wars was, no doubt, a powerful manifestation of human genius; but it really embraced none but the Greek rhetoricians who supplied its philosophical basis, the Syrian lawyers who built up for it an atheistic legal system, the rich men who were engaged in public administration or money-making, and finally the leisured voluptuaries who did nothing at all. By the masses it was, at all times, merely tolerated.** The peoples of Europe understood nothing of its Asiatic and African elements, those of Egypt had no better idea of what it brought them from Gaul and Spain, those of Numidia had no appreciation of what came to them from the rest of the world. Thus, below what we might call the social classes, lived innumerable multitudes who had a different civilization from that of the official world, or were not civilized at all.

https://archive.org/details/cu31924028280414/page/n47/mode/2up?view=theater

The hatred of the French Revolution and the doctrine of the Equality of man had thrown Gobineau into such antagonism against everything around him that he finally began to hate France down to her very historical roots. He was tempted to see charlatanism, theatricality and exuberant phrase-making (which are the characteristics of a democratic age) everywhere even in that grand early history of the Latin races, **and thus became very unjust, I think, to the whole of Graeco-Latin culture, and especially to the most flourishing ages of that culture, in Greece and Rome.** Henceforth his ideal in history became the Germanic tribes of the Middle Ages, and their feudal institutions, which allowed a man to attach and defend his honour sword in hand – times, when a man was his own master still and not subjected to the law of *Polis* or *Urbs*. **In *Polis* and *Urbs* the lawyers and phrasemongers would always prevail** – among the warrior tribes of the Franks, the Normans, the Lombards, the glib tongue of sly plebeians had never to be feared, and a free and noble personality never stood in danger of being suppressed.

>
> In any case, **it is a fact that the Germanic family has never been able to live or maintain itself for a long period of time [zu blühen bzw. sich am Leben zu erhalten] in an urban area or in circumstances otherwise detached from rural life without the necessary counterbalance of land ownership.** [*Sehr eindringlich lehren das z. B. die Lübecker Ortsgeschichte und die umfangreichen Urkunden derselben Stadt.*] Other races and peoples seem to have been better prepared for an urban existence detached from the land and rural life—perhaps because their ancestors, as nomads, were once accustomed to an unpredictable way of life79 and to rocky landscapes or treeless steppes without green and fresh forests. For the Germanic peoples, such developmentally favorable requirements for urban life are not present, **and for all of known history the Germanic has hated the city with all the fibers of his heart,** probably out of healthy sentiments. Where the Germanic did become a city-dweller this obviously always happened by force and never did him any good without the counterweight of a country home. **It is very significant that all the Germanic tribes of the Migration Period almost fearfully avoided settling in Roman cities.** As late as the eleventh century, for example, the small landowners of Lombardy, the *vavasours*,80 were the population in whom the Lombard blood had been preserved in the most unmixed form. The aversion to urban areas can be traced back to the Lower Saxons of King Henry I—who resorted to choosing by lot those who were

to live in the cities and castles that he founded, since the Saxon did not want to separate himself from the countryside—**through to the Anglo-Saxons of today's England, who seek their dwellings outside urban areas if at all possible.**81

[81] This is significant—when the French moved into Wiesbaden in 1918, they preferred the good flats close to the city center for their officers and officials. When the English occupying force of Cologne came to Wiesbaden a few years later and replaced the French, the English avoided the flats in the city center as much as possible and looked for flats in the urban outskirts or in the good villa areas of Wiesbaden.

The Maurya Empire had been centred in Magadha, right in the middle of the region where South Asia's second urbanisation was taking place. The Maurya capital, Pāṭaliputra, was a large city, according to some of the world's largest city at its time.4 **Brahmins detested towns and cities. They said so explicitly when obliged to talk about them. More often, they adopted a different strategy: they ignored their existence.**5 **Where possible, they depicted themselves in a world that was no longer there.** In this respect (and to avoid misunderstanding, let me add: only in this respect), their behavior was not dissimilar to that of another group that was obsessed with the past: the National-Socialists of the Third Reich. **In the House of German Art in Munich, opened by Hitler in 1937, there were hundreds of paintings; not one depicted urban and industrial life.**6

https://books.google.fi/books?id=u7tluJEQlZAC&lpg=PP1&hl=fi&pg=PA58#v=onepage&q&f=false

Everything that authors such as Hans Frank, Helmut Nicolai, Wilhelm Stuckart, Roland Freisler, Rudolf Walther Darré, Johann von Leers, or Alfred Rosenberg wrote about the reception of Roman law was drawn from the Germanistic literature since Georg Beseler, which had by then been infused with a national-Romantic and anti-Semitic language. **A brief monograph from 1913 reveals that even an emphatic approval of the Civil Code could be combined with this kind of language: "The legal force of Italian law *[welsche Recht]*, which has always remained foreign to the spirit of the German people and for centuries had forced Germanic consciousness under the Caudine yoke of black-haired Roman tyranny, was destroyed by the Civil Code."**64

The "Rembrandt-German" Julius Langbehn, Oswald Spengler,65 Houston Stewart Chamberlain,66 and, finally, Moeller van den Bruck67 were the authorities on the issue. **Their voices were little challenged, since the university publications in the 1930s sounded the same basic tune that the reception of Roman law was a "national misfortune."** What professors such as Herbert Meyer, Walther Merk, Gustav Klemens Schmelzeisen, or Walther Schönfeld said differed little in substance, and sometimes they said it less elegantly: **The received Roman law was alien from the people, selfish, individualistic, liberal, commercial, rational, a dead letter – and certainly "un-German."**

https://archive.org/details/in.ernet.dli.2015.41741/page/n77/mode/2up?view=theater

The man who followed the public career in Rome had necessarily to be jurist, general, administrator, and financial manager. **When he gave judgment as prætor, he had behind him a wide experience of many fields other than law. A judicial *class*, professionally (let alone theoretically) specialized in law as its sole activity, was entirely unknown to the Classical.** The whole outlook of the later jurisprudence was determined by this fact.
...

The earliest stratification that we can now detect consists of the collections (from 700 B.C.) ascribed to mythical or semi-mythical personages like Lycurgus, Zaleucus, Charondas, and Dracon,2 and certain Roman kings.3 That these existed the form of the saga shows, **but of their real authors, the actual process of their codification, and their original contents even the Greeks of the Persian War period were ignorant.**

A second stratification, **corresponding to Justinian's code and to the "Reception" of Roman Law in Germany,** is connected with the names of Solon (600), Pittacus (550), and others. Here the laws have already attained to a structure and are inspired by the city; **they are described as "politeiai," "nomoi," in contrast to old "thesmai" and "rhetrai."**4 **In reality, therefore, we only know the history of *late* Classical law.**
...

These legislative codes are one and all political acts, and party-political acts at that—in the case of Solon a democratic constitution (*πολιτεία*) combined with private laws (*νομοι*) of the same stamp, in that of Dracon and the Decemvirs1 an oligarchic constitution fortified by private law. It was left to Western historians, accustomed to their own durable law, to undervalue the importance of this connexion; Classical man was under no misapprehension as to what really happened in these cases. **The product of the Decemvirs was in Rome the last code of purely patrician character.** Tacitus calls it the end of right law ("*finis æqui juris*," *Annals*, III, 17). For, just as the fall of the Decemvirs was followed very significantly by the rise of another Ten, the Tribunes, so immediately the *jus* of the Twelve Tables and the constitution on which it was founded began to be

attacked by the undermining process of the *lex rogata* (people's law), which set itself with Roman constancy to do what Solon had achieved in one act in the case of Dracon's work, the *πατρίος πολιτεία* which was the law-ideal of the Attic oligarchy. **Thenceforward Dracon and Solon were the "slogans" in the long battle between Oligarchy and Demos, which in Rome meant Senate and Tribunate.** The Spartan constitution associated with the name "Lycurgus" not only stood for the ideal of Dracon and the Twelve Tables, but concreted it. **We can see, parallel with the closely related course of events in Rome, the tendency of the two Spartan kings to evolve from the condition of Tarquinian tyrants to that of tribunes of the Gracchan kind;** the fall of the last Tarquins or the institution of the Decemvirs—a *coup d'état* of one kind or another against the tribunician tendency2—corresponds more or less to the fall of Cleomenes (488) and of Pausanias (470); **and the revolution of Agis III and Cleomenes III (about 240) aligns itself with the political activity of C. Flaminius, which began only a few years later.** But never in Sparta were the kings able to achieve any thorough-going success over the senatorial element represented by the Ephors.
...

At the very moment when the creative mathematic closes off with Archimedes, juristic literature begins with Ælius's *Tripertita*, a commentary on the Twelve (198 B.C.).5 The first systematic private law was written by M. Scævola about 100. **The genuine maturity of Classical law is in the two centuries 200-0**—although we to-day, with quaint perversity, apply the time to a period which was really that of Early Arabian law. And from the relics of these two literatures we can measure the greatness of the gap that separates the thought of two Cultures.
...

Classical law is a law of bodies. In the general stock composing the world it distinguishes bodily Persons and bodily Things and, like a sort of Euclidean mathematic of public life, establishes ratios between them. **The affinity between mathematical and legal thought is very close.** The intention, in both, is to take the prima facie data, to separate out the sensuous-incidental, and to find the intellectually basic principle—the *pure* form of the object, the *pure* type of the situation, the *pure* connexity of cause and effect. **Life, in the Classical, presents itself to the critical waking-consciousness of the Classical man in a form penetrated with Euclidean character, and the image that is generated in the legal mind is one of bodies, of positional relations between bodies, and of reciprocal effects of bodies by contact and reaction—just as with Democritus's atoms.** It is juristic statics.2
...

Before Constantine, even, the Late Classical law of imperial decrees (*constitutiones*, *placita*), though the Roman form of city law was strictly kept, was genuinely a law for the *believers of the "Syncretic Church,"*3 that mass of cults perfused by one single religiousness. In Rome itself, it is true, law was conceived of by a large part of the population as city-state law, but this feeling became weaker and weaker with every step towards the East. The fusion of the faithful into a single *jural community* was effected in express form by the Emperor-cult, which was religious law through and through. In relation to this law Jews and Christians4 were infidels who ensconced themselves with their own laws in another field of law. When in 212 the Aramæan Caracalla, by the *Constitutio Antoniana*, gave Roman citizenship to all inhabitants except *dediticii* peregrins,5 **the form of his act was purely Classical, and no doubt there were plenty of people who understood it in the Classical spirit—i.e., as literally an incorporation of the citizens of every other city in the city of Rome. But the Emperor himself conceived it quite otherwise. It made everyone subject to the "Ruler of the Faithful," the head of the cult-religion venerated as *Divus*.** With Constantine came the great change; he turned Imperial Caliph law on to the creed-community of Christianity in lieu of that of Syncretism, and thereby *constituted the Christian Nation*.
...

The law-history of the West begins in total independence of Justinian's creation. **At that time it was in complete oblivion, so thoroughly unimportant, in fact, that of its main element, the Pandects (Digest), there was but one manuscript, which by accident (an unfortunate one) was discovered about 1050.**
...

The political life of the Gothic springtime, with its peasant, feudal, and simple burgher laws, leads very soon to particular development in three great branches of law which have remained distinct to this day—and there has been no unifying comparative history of law in the West to probe the deep meaning of this development.

The most important by far, owing to the political destinies in which it was involved, was the Norman law, which was borrowed from the Frankish. After the Conquest of England in 1066, this drove out the native Saxon, and since that day in England "the law of the great men has become the law of the whole people." **Its purely German spirit has developed it, without a catastrophe, from a feudal régime of unparalleled stringency into the institutions of the present day which have become law in Canada, India, Australia, South Africa, and the United States. Even apart from the extent of its power, it is the most instructive in West Europe. Its development, unlike that of the rest, did *not* lie in the hands of theoretical jurists. The study of Roman law at Oxford was not allowed to touch practice; and at Merton in 1236 the higher nobility expressly rejected it.** The Bench itself continued to develop the old law-material by means of creative precedents, and it was these practical decisions ("Reports") that formed the basis of law-books such as that of Bracton.1 Since then, and to this day, a statute law, kept living and progressive by the court decisions, and a common law, which always vividly underlies the legislation, exist side

by side, without its ever becoming necessary for the representatives of the people to make single large efforts at codification.

In the South, the law of the German-Roman codices above mentioned prevailed—in southern France the Visigothic (called the *droit écrit* in contrast to the Frankish *droit coutumier* of the north), and in Italy the Lombard **(which was the most important of them, was almost purely Germanic, and held its own till well into the Renaissance). Pavia became a study-centre for German law and produced about 1070 the "*Expositio*" by far the greatest achievement of juridical science in the age, and immediately after it a code, the "*Lombarda*."**2
...

The Diet of Worms in 1495 framed its "*Kammergerichtsordnung*"3 **after an Italian model.** Now there was not only the "Holy Roman Empire" on German ground, but "Roman law" as German common-law. The old German procedures were exchanged for Italian. **The judges had to study their law beyond the Alps, and obtained their experience not from the ambient life, but from a logic-chopping philology.** In this country alone are to be found, later, the ideologues for whom the *Corpus Juris* is an ark to be defended against the profanation of realities.

What, in fact, was it that under the high-sounding name passed into the intellectual keeping of a handful of Gothic men? **About 1100, at the University of Bologna, a German, Irnerius, had made that unique manuscript of the Pandects the object of a veritable Scholasticism. He transferred the Lombard method to the new text, "the truth of which, as a *ratio scripta*, was believed in as implicitly as the Bible and Aristotle."**1 Truth!—but the Gothic understanding, tied to the Gothic life-content, was incapable even of distantly guessing at the spirit of these texts, for the principles fixed in them were the principles of a civilized and megalopolitan life. This school of the glossators, like Scholasticism in general, stood under the spell of concept-realism; **as they held the genuine real, the substance of the world, to be not in things, but in universal concepts, so they maintained that the law was to be found not in custom and usage as displayed in the despised**2 ***Lombarda*, but in the manipulation of abstract notions.**

2. The punning contrast of Lombard *faex* (excrement) and Roman *lex* is Huguccio's (1200).

Their interest in the book was purely dialectical3—never was it in their minds to apply their work to life. **It was only after 1300, and then slowly, that their anti-Lombard glosses and summæ made their way into the cities of the Renaissance.** The jurists of the Late Gothic, above all Bartolus, had fused canon and Germanic law into one whole with a definitely practical intention, and into it they brought ideas of actuality—here, as in Dracon's code and the Imperial Edicts from Theodosius to Justinian, the actuality of a Culture that is on the threshold of its "Late" stage. **It was *the creation of Bartolus that became effective* in Spain and Germany as "Roman law"; only in France did the jurists of the Baroque, after Cujacius and Donellus, get back from the Scholastic to the Byzantine text.**
...

Urban rationalism turned, as in the case of the Sophists and the Stoics, to busy itself with the "law of nature," from its foundation by Oldendorp and Bodinus to its destruction by Hegel. In England the great Coke successfully defended Germanic self-developing practical law against the last attempts of the Tudors to introduce Pandect law. But on the Continent the systems of the learned evolved in *Roman* forms right down to the state codes of Germany and the schemes of the *Ancien Régime* in France on which the Code Napoléon was based. **And therefore Blackstone's *Commentaries on the Laws of England* is the one purely Germanic Code, and it appeared when the Faustian Culture had already reached the threshold of its Civilization.**
...

A scholar-class is alien to the world, and despises experience that does not originate in thought. Inevitably conflict arises between the "state of knowledge" as the scholar will accept it and the flowing custom of practical life. **That manuscript of the Pandect of Irnerius became, and for centuries remained, the "world" in which learned jurists lived.** Even in England, where there are no law faculties (in the European sense), it was exclusively the legal profession that controlled further growth, so that even here the development of legal ideas diverged from the development of general life.

Thus what we have hitherto called juristic science is in fact either the philology of law-language, or the scholarship of law-ideas. It is now the only science that still continues to deduce the meaning of life from "eternally valid" principles.

https://books.google.fi/books?id=_JghDQAAQBAJ&lpg=PP1&hl=fi&pg=PA67#v=onepage&q&f=false **[1924]**

From the new synthesis follows necessarily a turning away from our entire present system of education, which on the one hand has become a collection of dead knowledge, and on the other serves abstract doctrines rather than German ideals. The glorification of the humanistic *Gymnasium* was naïve, for it overlooked the fact that this so-called humanistic, that is, purely human educational system, in the last analysis was not representative of *mankind* but presupposed the *Greek nationality*. The Greek educational system, however, was an originally racial one and in the beginning served only the purpose of educating Greeks according to the ideal image of Greek soul. **It was this Greek life-feeling alone which created Hellenic culture, and the present purely abstract thinking is not only not representative of mankind, it is**

also not Greek; it is a mockery of the needs of the Greek nation. In sad imitation of the Greek spirit, admittedly related to ours in many respects, we have shifted the emphasis of our lives outside ourselves; we have used the standards of another people to measure our own achievements, **and we have forgotten in doing so that people, like personalities, can never be measured by the *same* standard.** Just as Michelangelo cannot be measured with the standard of Phidias, so the Strassburg cathedral cannot be considered a development of the Parthenon. **If one applies Greek standards to a Gothic cathedral, then it is the most horrible monstrosity in the world.** In the same way a Greek temple would appear strange to a Gothic master builder.
…

Closely connected to the educational system, a new concept of the law is developing; **nothing is more pleasing than the beginnings of a sharp struggle between the Roman code of law and German legal views. Late Roman law was entirely subservient to capitalism and today it legally protects the exploiter from the exploited;** now for the first time it has been fundamentally disavowed, and it being set aside by the old German conception of cooperative association [*Genossenschaftswesen*]3 and especially protection of the state and race.

https://www.bloomsburycollections.com/book/roman-law-and-the-idea-of-europe/ch6-the-denaturalization-of-nordic-law-germanic-law-and-the-reception-of-roman-law

The German legal historian Peter Landau (Landau 1989: 10-22) has actually discovered conduits between the reflections of nineteenth-century German jurists and the NSDAP, singling out the notable figures of Johannes Lehmann-Hohenberg and Arnold Wagemann, two intellectuals, a professional jurist and a jurophile of sorts, who were precocious members of the young party.[4] **These two incense bearers of Germanic law inspired the programme of the *Deutschsozialistische Partei*,[5] published on 31 May 1919, which states that the question of land and the ownership of land carries a fundamental importance.** Among other things, it is land ownership which is the dividing line between Roman law and 'Germanic law' – the Nazi jurists did not cease to revisit this before crying victory over the enactment of the *Erbhofgesetz* in September of 1933:

> The premier cause of our distress lies with our right of ownership over the earth
>
> … Therefore, we demand:
>
> 1. The free disposition of earth and land …
>
> 2. The abolition of Roman law, dominant up until now, which is to be replaced by a German common law [*Deutsches Gemeinrecht*]. Our right of ownership of the earth rests within Roman law … **Roman law was introduced in Germany 400 years ago by the princes and the high members of the clergy; the people opposed it, without success. The people know well that this foreign law estranges them from their land and their other possessions. The Peasants' War,[6] the first uprising from the community, was a bloody war against Roman law. Relentlessly the farmers demanded reinstatement of ancient Germanic law. Today, we state the same demand.** It is only due to you, the people of Germany, that it does not remain ignored. This question is more important than anyone can fathom: it is the cornerstone of our future way of living and our existence [*Bestehen*]. **Roman law was conceived in an era when Rome, in all her decadence, was flooded with Jews. It is antisocial and protects private profit at the cost of the community. It is a law for knaves and the ill-willed. On that legal foundation, Germany always loses faced with the Jew.** The facts confirm what we are claiming. This is the way the German people need to be provided with a law that corresponds to their race and their culture that respects the old principle: the common good takes precedence over the individual good. **The profound greed, dishonesty and immorality that manifests itself in our market place, this Judaification of our people, is the fault of Roman law, just as our economy is transformed into an economy of pure interest – which has imparted its evil to the world in recent decades, and finally resulted in the war.**

…

Rosenberg incriminates those 'imperial doctors foreign to the people' (Rosenberg 1937: 567-8) (*kaiserliche volksfremde Doktoren*) who, educated *in utroque jure*, introduced the Roman law of suzerainty and individuality to Germanic legal culture.
…

The introduction of legal individuality (it is the individual who is the holder of rights, not the community, the *Gemeinschaft*) and private property **had transformed the land, birth mother**

and property of the race, from its pure form: an immovable good quickly changed to a movable one through the demonic mechanism of sureties. The practice of mortgage had made the land into a pure paper title (*Wertpapier*) that usurers, bankers and other parasites had quickly turned into an object of speculation. Thus the injection of Roman law and its categories not only removed the *Volk* from its land, and separated *Blut* from *Boden*, but at the same time turned the soil into an abstract value, given over to commerce. As a jurist contemptuous of Roman law and its reception holds, one had in this manner 'replaced slavery to a master with slavery to the Jew and the usurer' (Jung 1934: 186).
…

Moreover, one may conclude that the question is nothing but a scholarly matter, and that it acquired a didactic function important enough to figure in a teaching manual for SS officers:

> Let us oppose again and again some maxims of our ancestors from Roman-Byzantine law that they have imposed upon us over recent centuries so that it became alien to our race, to demonstrate to what degree these foreign legal conceptions were – and it cannot be any other way – devastating to our thinking and our racial will: Roman-Byzantine law says: 'The owner may use his good according to his good judgment'. On this, Saxon law lays down: 'The common good goes before the individual good'. Roman law proclaims: 'The land is prone to cession on the same title as that for slaves or animals'. On this, Saxon law lays down: 'One cannot cede the land without the permission of the heirs' … **Or even: 'The law is codified in fifty books for all eternity'. Saxon law says: 'Written law cannot supersede the law of nature.'**[11]

…

This is the notion defended in 1933 by Rudolf Bechert of the University of Munich at a conference pertaining to commercial law and necessary reform of that law. Why were the Romans so prone to abstractions? The Roman Empire was 'international' (Bechert 1933: 81-2): It was applicable to all the races and cultures it absorbed on the basis of a legal discourse that all could comprehend. **The Roman people were also a minority in this Empire, and since 'they were flooded with foreigners' (Bechert 1933: 82), it would not have been feasible to regulate the Empire by means of a '*völkisch*' (Bechert 1933: 82) law, but instead it was reigned over by a law that was '*individualistisch*' (Bechert 1933: 82):** As the *Volk* could not have been the foundation and point of reference for the law, the individual became the smallest common denominator in what Rosenberg termed *racial chaos* when he speaks of Rome in late Antiquity.

The author maintains that he does not aim to 'underestimate the value of Roman legal thinking': The problem is not to establish a dichotomy between values (*Wertunterschied*), but to reiterate a difference of essence (*Wesensunterschied*) (Bechert 1933: 82), in the instance of racial make-up. **The Germanic people, identical to one another and racially coherent, could conceive of a law that was the reflection of this purity and this coherence, a communal law, since this biological community existed, contrary to the Roman case.**
…

In every text one can read the reluctance and the shame that overcomes the jurists in repudiating a Roman law with which they are familiar and which they were otherwise impressed with. Moreover, the existence or non-existence of Germanic law was evident for many jurists, who could do nothing but acquiesce in the statement by Houston Stewart Chamberlain, generally a convinced Germanophile, related to Wagner, and torch-bearer for nationalist-racist Germanic thought: **'Roman law is as peerless and inimitable as Greek art. This teutomaniacal ridicule does not change that. We hear jokes about a "Germanic law" that we have been deprived of by the introduction of Roman law: there never has been a "Germanic law", only a chaos of brutal and contradictory laws, one for each people.'**[15]
…

A small text composed in 1937 (most likely) by the association of National Socialist jurists, *Die Paragraphensklaverei und ihr Ende* ('Slavery to the paragraph and its purpose'), explicitly shows the nuances. Certainly, the text concerns the 'Roman law' of 'debt' (*Schuldenmasse*) necessary for a bankruptcy. But how does it understand Roman law? The text takes pains to determine and distinguish it:

> The ancient Romans were a juristically gifted people. They created a highly developed legal technique. **But none of the ancient Romans were any longer around when it was attempted, in the 15th century, to replace the diversity of Germanic laws by a general legal system. In this era, there was nothing left but decadent late-Roman**

> **legal science,** and it is this foreign legal science that became law in Germany... The spirit of a decadent science from late Antiquity reigned intact for centuries.[16]

…

The pamphlet title *Slavery to the Paragraph* effectively reveals the author and the beneficiary of this legal contamination, in posing the question *cui bono*:

> **Who profits from the law? Roman law, in its decadent form, as it was introduced in Germany, was auxiliary to a materialist perspective on the world. Disconnected from any and all relation to the race and the fatherland, from blood and from soil, it encouraged bourgeois-liberal as much as proletarian-Marxist materialism, which led to disastrous consequences, devastating for the race.[23]**

https://archive.org/details/TheMythOfTheTwentiethCentury_400/page/n337/mode/2up?view=theater

The grownup son could only withdraw from the tyranny of the head of the family by entry into the league of men, the Curia, the army. **These forces mutually balanced each other, watched over the discipline of state citizens, and created that rigid Roman type which conquered the world.** Its laws still determine the norm of western life even today. **It must be said here at once that the crassly individualistic, private capitalistic Roman law created Roman strength but – released from its environment of intrinsic type – had a disintegrating effect on the Germanic essence.** It must again be eliminated if we wish to recover our health.

https://archive.org/details/TheMythOfTheTwentiethCentury_400/page/n385/mode/2up?view=theater

The same soul had a creative influence upon our life for thousands of years until when an alien, still not reshaped, religion came on us. The alien ideas of the Roman state and its alien law also destroyed this life. **The Imperial folkish alien doctors transplanted alien law and dishonourable ideas into the Germanic tribes. They operated as mere bailiffs for the powers of the ruling church and the Roman state.** Geyler von Kaisersberg complained about the tongues of tittle tattlers who, with their gossip, were completely harmful to the common good, and who were concerned only with their own advantages. In the year 1513 a poem appeared, the *Marriage with a Foreigner*, which completely consciously attributes the loss of German freedom to the Roman law. Ulrich von Hutten alludes in his conversation in *Die Rauber* to the Lower Saxons who made their way in their law without the new Doctors. Things had gone better in Germany, he said, when the law resided in weapons, not in books. **Thus the first and only German social revolution was fully justified according to its essence. This was the peasant revolt at the beginning of the 16th century against Roman slavery in its threefold form as church, state, and manipulation of law.**
…

The Franks, Alemanns, and the rest, also carried on their wanderings their own racial versions of law. This law then displaced the ancient Roman law. The later disappearance of Frankish and Bavarian blood promoted the late Roman law. **The great French revolution signified the destruction of the Germanic constituents and interpretations of law. Since then France, that is, the land of the Franks, has been Jewish Roman in its determination.**
…

As our humanists of art looked at Hellas as at something which represented an artistic model entirely on its own, and not as organically shaped, so our Humanists also looked to Rome for a model of Law. They overlooked the fact that Roman Law was a product of the Roman people and could not be imitated by us because it related to supreme value other than our own. **The social and military prototype of Rome gave birth as a counterpart to a purely individualistic interpretation of law.** The paterfamilias who presided over the life and death of members of his kindred is an allegory of Roman objectivity and impartiality. **Thus the concept of property taken to its ultimate conclusion. The Roman interpretation of law simultaneously declared holy the concept of individual capitalism. Economic man became the supreme value.** It may defend its justified interests with all possible means, without anyone asking if the honour of the people has suffered harm in establishing this economic egoism. One may certainly not hold ancient Roman Law, which set its unwritten boundaries through the presiding prototypes, responsible for the late Roman bastard phenomena, which at all events possessed some racially identical Langobardic wefts which the Roman state and the Roman church presented us. This was done in order to legally complete the enslavement of free peoples. We have today attempted to take over the capitalist principle of law, although we cannot take over the whole of ancient Roman life. It can never really become alive again. It was torn from the beam supporting it as an organic state structure. It received another function and became even more an absolute measuring rod from a function. The subjective absence of control became a law. This fact has been veiled until today by formalities.

> The Romans would have never increased the legacy of mankind by the idea of a law independent of and equal to the state, if they had not with powerful one sidedness put into reality the opposite of the IVS SINGVLORVM and of the IVS POPVLI. **Here the sovereignty of the one and indivisible state authority, there the sovereignty of the individual; these were powerful levers of Roman legal history.** *Die soziale Aufgabe des Privatrechts*, Berlin, 1889, page 6.

https://archive.org/details/chapoutot-johann-the-law-of-blood-thinking-and-acting-as-ns-2018/page/57/mode/2up?view=theater

Carl Schmitt translated this idea into more technical terms. Seeking to order and establish a typology of legal thinking, he argued that it was necessary to distinguish between legal cultures in which "the law is understood as a rule, as a decision, or as an order"—in the sense of an objective order—and those in which the law was a "concrete order."139 Dominant legal scholarship pertained to these two categories: **"Nineteenth-century legal positivism is the combination of decision and law, of decisionism and normativism," as if it were possible to create law *ex abstracto* and *ex nihilo*,** by making decisions and by constructing abstract hierarchical structures of super- and subordinate norms that had no foundation in concrete, real orders.140 To Schmitt, the "victory of the French Revolution, which had imposed a society of citizens and individuals," and "the liberal 'Ideas of 1789,'" had led to "a disintegration of order thinking"; that is, of concrete legal thinking about the nature of order.141

The French Revolution had designated the individual as the beginning and ending of the law. It made the law—something voted on and therefore decided by Parliament—into the only valid norm. **In this, the French Revolutionaries were the heirs of a long tradition, one that Carl Schmitt traced back to the Stoics, and specifically to the scholar and Stoic philosopher Chrysippus, according to whom the law was "king, overseer, ruler, and master over morality and immorality, right and wrong."**142 **This had been followed by the natural law of the Classical and Enlightenment ages, "the rational law of the seventeenth and eighteenth centuries, ... which is part abstract normativism, part decisionism." A good Catholic, Schmitt did not condemn "the Aristotelian-Thomistic natural law of the Middle Ages."** This law, which was a law of nature above all, and a theoretical consecration of the order willed by God, was, "from the point of view of legal science, the concrete order."143

https://archive.org/details/chapoutot-johann-the-law-of-blood-thinking-and-acting-as-ns-2018/page/79/mode/2up?view=theater

In a vast survey published in 1937 that reviewed the history of philosophy of law "from the Greeks to today," Professor Kurt Schilling rejoiced that, thanks to Adolf Hitler, the German people "had been saved from extremely threatening dangers"—those of legal abstraction and inveterate egalitarianism.58 **In erudite, compelling terms, Schilling traced this mania for abstraction back to the Stoics, those anemic philosophers "in whose arteries not a single drop of blood still ran"—that is, not a single drop of pure, authentic blood.**59 The noxious Jean-Jacques Rousseau had been the Stoa's rightful heir, and his *Social Contract* horrified our author all the more in that it had been put into practice by proponents of the French Revolution, which had led to "an excessive politicization of the people in the form of the State," as well as in "this idiotic principle of the majority" that was the foundation of democracy.60

Democracy, majority, the parliamentary model—these were all key components of a new era of humanity, of an unprecedented and terrifying anthropology that had been enframed by mathematics. The liberal, industrial, and commercial nineteenth century, as our perspicacious professor noted, was both the age of democracy and that of science: **"Life became science, and science, statistics."**61 **With this transitive leap, he argued, the mystery of life in its organic and biological reality had become a simple matter of numbers, data, averages, and standard deviations. This mathematical age was characterized by abstraction, which was hostile to life.**
...

Gustav Adolf Walz, a professor of public law and chancellor of the University of Breslau, a brilliant and sought-after legal scholar, incriminated the mathematical reason of the Enlightenment and liberal democracy in an abstruse and jargon-filled work titled *Racial Equality against Equality in Principle*, in which he sought to rehabilitate the biology of difference as an argument against the mathematics of equality, and to use it as a new foundation for the law. Walz observed that all legal systems could be divided into two simple categories: first were those legal systems which "regulated on a leveling principle of equality," such as the old Judeo-liberal law; and second, those founded on "the principle of differentiation determined by race," such as the emerging National Socialist legal system.65

For Walz, there could be no doubt that "the regulating idea of equality is a product of the rationalist mentality of European man as it was formed in the seventeenth and eighteenth centuries."66 For understandable, logical reasons, the thinkers of the Enlightenment had wished to awaken humanity from its dogmatic slumber. To do so, they had made use of the admirable faculty known as reason, which they had "enthroned" over dogma. **Thereafter, "mathematics became the alpha and the omega of thought" in all areas of human creation, including the law:** "The law, the rational rule, appeared as the juridical expression of this way of thinking," marked by abstraction and by individualism—reason was, after all, the human faculty that fostered individual autonomy and helped people to throw off their cultural and political chains. This "legal understanding based on the individual is a system of subjective private rights," **although entirely contestable, had been in keeping with the ambitions and the spirit of the age.**67 **Such law**

was both the matrix and the expression of a society (as opposed to a community) that was liberal (and not organic), free (and not determined), mercantile and account-keeping (and not founded on solidarity). Under such conditions, "the law is a utilitarian rationalism intended to regulate relationships among individuals," because individuals were the only acknowledged reality, and their egotistical and private interests the only ones to be defended—both against those of others and against the potentially tyrannical state.68

Like the French revolutionaries fired with the zeal of Rousseau's philosophy, the Stoics had also been fervent defenders of this "legal mathematics."69 Their secret goal had been to promote this legal equality, which was couched in mathematical terms—in other words, in terms of universal equivalence.

https://archive.org/details/chapoutot-johann-the-law-of-blood-thinking-and-acting-as-ns-2018/page/93/mode/2up?view=theater

The Nazis, who took care to criticize Roman law in Article 19 of their 1920 political platform, were following a well-worn path—and racializing it. **In an article that is a tidy summation of the many treatises written on this topic, Hans Frank linked the arrival of the idea of sovereignty in Roman law to the development of the state—or rather, of states, which, in the Germanic sphere, grew from the ashes of the Holy Roman Empire starting in the fourteenth century, with a dramatic acceleration in the seventeenth century.** The development of the state was, naturally, accompanied by the development of the legal theory of sovereignty as well as of a caste of legal scholars who worked in the service of the prince—both lawyers charged with conceptualizing the state and lawmakers whose task it was to ensure that it lived and maintained power. In the Germanic era, the concept of the state and Roman law had been imported via the Roman Catholic Church, which had followed the model of the late and decadent Roman Empire by preserving its legal traditions and its political concepts. **This meant that Germany had undergone a kind of second evangelization: following in the footsteps of missionary bishops such as Ulfilas, *juris doctors* trained in "Italian universities" had surged to the north to "bring it typically Roman legal ideas."** This new plague from Italy sought "to dominate and to shape real life through eternal values according to a concept of life, an abstraction of life, that expressed the rigid ritual mechanism of the Vaticanist regime." 116
...

But heaven forfend it be confused with original Roman law, which was proud, noble, and sound. The racially pure roots of that Roman law were Germanic and Nordic, relics of the time when this great culture had colonized Italy and given birth to a glorious empire which had, alas, been slowly corrupted by the invasion of foreign bloods:

> **The Roman law of the *doctores juris* was unnatural: it was no longer the authentic and proud law of the nobility, of Nordic Romans who had created the greatest empire in Antiquity.** This law, organic, vital, was the law characteristic of a small racial entity based on the pure racial concept of the *civis romanus*. **This term did not mean "inhabitant of Rome" or "Roman citizen," but rather expressed a belonging, through blood, to the Roman racial essence.** So long as the law was an expression of the coarse and tough life of this racial cell, Rome was truly Rome, before the Romans' ill-considered extension of their Reich signed the death sentence of this original law. **The vital law of a race certain of its own destiny deteriorated into an artificial principle of state domination.** The racial citizen became a mere member of a Caracalla-style state.119

...

Ultimately, "the Roman law of Justinian," the law whose codes were studied, taught, and received in Germany, **"contained as much Roman law as all the world's oceans conceal nuggets of gold."**125 **The history of the "great reception" of Roman law was an unhappy one characterized by successive alienations:** first that of the "late Roman" from the "Roman," then that of the "Germanic" from the late Roman.126 Professor Walther Merk was another who deplored "this alienation of the law through the reception of late Roman and Byzantine law": "It was not the authentic and vigorous ancient Roman law, ... but the highly Orientalized law of a population of degenerate European-Asiatic bastards" that had been received in Germany. **Fundamentally foreign, this law "upset everything in the order created by the wisdom of our ancestors."**127

The reception had created a formal system, stupefyingly abstract, universalistic, and egalitarian, **"without the least breath of authentic, strong, and healthy Rome. It is in this form that it arrived in Germany. And it is for this—because of a Byzantine alienation—that our law was massacred"** by separating "the law of the people" from the "law of the state, truly a law of jurists, formal and judicial." The importation of an artificial and complex law had created a double tyranny. Lawyers had created an increasingly absolute princely power, because no one understood the plan these jurists were hatching: the people, fit and pure, armed with good sense, had become the *Hanswurst*, the Punchinellos, of the courts, whose language and hairsplitting they could not understand.

At a deeper level, and far more seriously, **life itself, in all its liberty and plasticity, in its labile and constantly moving indeterminacy, had been mortally stifled by the straitjacket of "paragraphs"—of writing, of death, of all that was fixed and unmoving.** Frank noted with outrage that through the actions of these *doctores juris*, the subsuming "of particular cases (of life!) to articles of law had become the main mission of the justice" system. But, he added, life would take its revenge, because "one does not subject life to formal constraints" for long.
...

According to Frank, the “war that we have declared on Roman law has nothing to do with the law of ancient Rome. It targets the falsification of the Roman law that we appropriated a few centuries ago, in the form of a Romano-Byzantine bastardization.”130

The willingness and energy with which these professional jurists went about discrediting and reviling their own profession is impressive. **What curious brand of masochism could possibly lead those with doctorates in law, who had studied Latin and legal codes, to qualify themselves and their colleagues as a pile of positivist, nit-picking quibblers, as a bunch of degenerates to whom life itself was a foreign concept?**

https://archive.org/details/in.ernet.dli.2015.180053/page/n113/mode/2up?view=theater **[1940]**

The Hereditary Farmlands Law revives the old Teutonic concept that the landowner is intimately linked to the land. **It is officially stated that “The idea engendered by Roman law that land was so much merchandise to be bought and sold at will is profoundly repugnant to German feelings. To us, soil is something sacred; the peasant and his land belong inseparably together.”** Emphasis is thus laid on the *Bauer*, imperfectly translated by our word *peasant*. The German *Bauer* is an independent landowner, self-respecting and proud of the name. We can best visualize him as like the old English yeoman.

This is the class which National Socialism seeks to foster by making peasant holdings hereditary; keeping the farm in the family, and keeping it intact by having it descend through the oldest son. That was the old Teutonic method, which still prevails by custom in parts of Germany. Over 700,000 of these hereditary farm holdings have now been established.

https://archive.org/details/Valentin-Antisemitism--HistoricallyAndCriticallyExamined/page/n129/mode/2up?view=theater

The prosecutor considered that Rechnitz and the author of the article were perhaps guilty of no crime in the "obsolete" view of the Roman law, but that they deserved sentence nevertheless, since they had attributed false motives to the Jewish policy of the Nazis and insinuated that the German Government did not protect the lives, honour and property of the German Jews as zealously as those of German citizens, an insinuation which was entirely unjustified (!) and might injure the prestige of Germany.

>
> In a novella taking place during the Second World War, Louis Aragon has one of his characters, a military judge, say:
>
> > **I was a professor of Roman law.** But to give priority to Germanic law, it is my point of view one has to erase all traces of Roman law from the modern world. **Roman law as a basis for modern laws is a disgusting absurdity and contrary to the German spirit.**
>
> He adds:
>
> > In these times, our courts are still infested with Roman law, the Napoleonic code, Jewish laws … **Today, we would have never let off Dimitrov; he would have been found guilty … according to Germanic law.**[2]
>
> This novella, entitled *Roman Law Is No More*, suggests a profound knowledge on the part of Louis Aragon of the debates, developments and in-fighting in the world of Nazi jurists.

https://www.bloomsburycollections.com/book/roman-law-and-the-idea-of-europe/ch2-exiled-romanists-between-traditions-pringsheim-schulz-and-daube

When the Nazis took power in 1933, Pringsheim criticized their legal policies early on in his lectures. He would go as far as writing an open letter to Carl Schmitt, at that point the main legal ideologue of the Nazi regime, about the role of Roman law in Germany. The Nazi policy had been to replace Roman law with Germanic people’s law, **but Pringsheim wrote that this was clearly wrong as Roman law was an organic part of the German legal tradition.** Though openly challenged, Schmitt was unenthusiastic about the confrontation and no consequences resulted.[8]

> [8] **Paragraph 19 of the NSDAP party programme from 24 February 1920: ‘We demand that Roman Law, which serves a materialistic world order, be replaced by a German common law.’**

…

In fact, what the research implied was that many of the principles that were dear to the German legal science were in fact the products of the hated post-classical Roman law.[10] This was a long-standing debate that had been exacerbated by the focus on interpolationism. **For Nazi scholars and even many conservatives in academia, the very idea that the texts of Roman law as they were now known were not purely Roman but rather the product of Greek, Hellenistic or even Semitic scholars who had edited them was a matter of great importance and passion. For conservatives like Salvatore Riccobono, the idea of oriental origins laid doubt on the whole legitimacy of Roman law as the product of pure Roman spirit. For Nazis like Ernst Schönbauer, the oriental roots would have meant that the law would be racially impure** (Riccobono 1925-6; Schönbauer 1939: 390-1).

https://www.bloomsburycollections.com/book/roman-law-and-the-idea-of-europe/ch7-the-idea-of-rome-political-fascism-and-fascist-roman-law

Here I would like to look in a different direction, and that is the alleged continuity between Roman law (in particular classical Roman law) and the new codification of Italian civil and commercial law, that, after the preparatory works started in the 1920s (cf. Caprioli 2008: 131ff), was completed with the entry into force of the Civil Code on 21 April (once again that fateful date) 1942, in the middle of the war (at a not unfavourable moment for Italian and German troops).[29]

Rather than a comprehensive analysis of the Code (which would be a titanic work), I intend to restrict my observations to some points in the official 'Report' (*Relazione*)[30] which the minister of justice, the Bologna lawyer Dino Grandi (1895-1988), a former minister for foreign affairs and ambassador in London, formally presented to the king. I am not interested in highly specific technical passages but will recall some points where Grandi more openly (and strategically) quotes ancient Rome and Roman law (cf. Caprioli 2008: 200f).
…

The terminology, while modern and perfectly matching that of legislation of 1865, regains its full historical value acquiring new meaning with the attachment to tradition:

> When we say Civil Code, our thoughts go back to the notion of the Roman *civis*, the active member of the political community of Rome, with its well-defined position with respect to the family and *civitas*. **This notion of *civis* has nothing in common with that of the *citoyen* of the French Revolution. The name of our code will not therefore mean that it is the code that governs the inherent rights of the citizen, as opposed to the rights of the State, much less does it mean the code of the bourgeoisie, that is, citizens of the middle classes (this concept also deriving from the French Revolution) as is sometimes called the French Code.** (*Relazione*: 33ff, § 11)

The uncoupling of liberal values is made clear by the rejection of any connection with French revolutionary ideas: fascist revolution is another thing.

> *For us* – continues the Minister – *the Civil Code means only the code that includes the civil law, in the sense that it was originally in Rome, as defined by Gaius in his Institutions* (I.1): *ius proprium civitatis*. **It is the proper law of the Roman *civitas*, like the walls and the gods born with it or received in it from the people who brought it into being, a law which cannot be confused with that of any other *civitas*. This original concept had necessarily become discoloured later, when what was once the exclusive law of Roman citizens, members of the *civitas*, became the general law of all subjects of the empire of Rome, whatever the race from which they derived.** (*Relazione*: 34, § 11)[31]

https://archive.org/details/newscienceofgiam030174mbp/page/n115/mode/2up?view=theater

350 By the definitions of truth and certitude above proposed [138], **men were for a long period incapable of truth and of reason, which is the fount of that inner justice by which the intellect is satisfied. This justice was practiced by the Hebrews, who, illuminated by the true God, were by his divine law forbidden even to have unjust thoughts, about which no mortal lawgiver ever troubled himself.** (For the Hebrews believed in a God all mind who searches the hearts of men, and the gentiles believed in gods composed of bodies and mind who could not do so.) **This same inner justice was later reasoned out by the philosophers, who did not arise until two thousand years after the nations were founded. In the meantime the nations were governed by the certitude of authority,** that is, by the same criterion which is used by our metaphysical criticism; namely the

common sense of the human race, which we have defined above in the elements [142], and on which the conscience of all nations reposes. So that, in this [third] principal regard, our Science comes to be a philosophy of authority, which is the fount of the outer justice of which the moral theologians speak. Of such authority account should have been taken by the three princes of the doctrine of the natural law of nations, and not of that drawn from passages in the writers. For the authority of which we speak reigned among the nations for more than a thousand years before writers could arise, and they could have taken no cognizance of it. **For that reason Grotius, more learned and erudite than either of the others, combats the Roman jurisconsults in almost every particular detail of this doctrine; but all his blows fall short, for the jurisconsults established their principles of justice on the certitude of the authority of the human race, not on the authority of the learned.**

https://www.gutenberg.org/cache/epub/52263/pg52263-images.html#THE_PROBLEM_OF_SOCRATES

5. With Socrates Greek taste veers round in favour of dialectics: what actually occurs? **In the first place a noble taste is vanquished: with dialectics the mob comes to the top.** Before Socrates' time, dialectical manners were avoided in good society: they were regarded as bad manners, they were compromising. Young men were cautioned against them. All such proffering of one's reasons was looked upon with suspicion. Honest things like honest men do not carry their reasons on their sleeve in such fashion. It is not good form to make a show of everything. **That which needs to be proved cannot be worth much. Wherever authority still belongs to good usage, wherever men do not prove but command, the dialectician is regarded as a sort of clown.** People laugh at him, they do not take him seriously. Socrates was a clown who succeeded in making men take him seriously: what then was the matter?

6. **A man resorts to dialectics only when he has no other means to hand.** People know that they excite suspicion with it and that it is not very convincing. Nothing is more easily dispelled than a dialectical effect: this is proved by the experience of every gathering in which discussions are held. **It can be only the last defence of those who have no other weapons. One must require to extort one's right, otherwise one makes no use of it. That is why the Jews were dialecticians.** Reynard the Fox was a dialectician: what?—and was Socrates one as well?

https://archive.org/details/LeoStraussThoughtsOnMachiavelli_201411/page/n123/mode/2up?view=theater

The distinction between "believing" and "judging" reminds us of a passage in the first chapter of Seneca's *De vita beata*: "**Everyone prefers to believe rather than to judge. One never judges but always believes regarding the things which are vital.** Error transmitted from hand to hand always turns us to and fro and throws us down headlong, and we perish through following examples taken from others. **We shall be cured if we were but to secede from the crowd. As it is, however, the people, the defender of its own evil, stands firm against reason.**" If we desire to understand Machiavelli's thought, we must pay great attention to the kinship which according to Seneca exists between "believing" and "the people."105

https://en.wikisource.org/wiki/Of_a_Happy_Life/Book_I

It is harmful to follow the march of those who go before us, and since every one had rather believe another than form his own opinion, we never pass a deliberate judgment upon life, [dum unusquisque mauult credere quam iudicare, numquam de uita iudicatur, semper creditur] but some traditional error always entangles us and brings us to ruin, and we perish because we follow other men's examples: we should be cured of this if we were to disengage ourselves from the herd; but as it is, the mob is ready to fight against reason in defence of its own mistake.

https://archive.org/details/dli.ernet.25058/page/405/mode/2up?view=theater

The life of the mind is a composition of two forces: **the necessity to believe in order to live, and the necessity to reason in order to advance. In ages of poverty and chaos the will to believe is paramount, for courage is the one thing needful; in ages of wealth the intellectual powers come to the fore as offering preferment and progress;** consequently a civilization passing from poverty to wealth tends to develop a struggle between reason and faith, a "warfare of science with theology."

The "commissar" ordering us to attack must be our own bravery, our own loyalty, our own obedience. There is an enormous difference. In our ranks, **we live according to our germanic laws, one of which, a really beautiful one, says, "Honour is compulsion enough."** With foreign peoples, we must apply Asiatic laws. We must never lose sight of that. If we have one of our blood before us, a Norwegian or Dutchman of good racial stock, then we can

> only win his heart over to us according to our, that means his and our, totally germanic laws. **With a Russian or Slav, from a racial point of view, we should never even try to apply our holy laws to them, but rather the tried and tested laws of the Russian commissar.**

>
> [51] But what any free man would call necessity is not merely present now, but is long ago past, and from the necessity that constrains a slave we must surely pray to be delivered. **Do you ask the difference? The strongest necessity that a free man feels is shame for his own position, and I know not if we could name a stronger; but for a slave necessity means stripes and bodily outrage, unfit to name here,** from which Heaven defend us!

https://books.google.fi/books?id=u7tluJEQlZAC&lpg=PP1&hl=fi&pg=PA51#v=onepage&q&f=false

The Nazi party, insofar as it even took an interest in the content of what was studied, continued to regard Roman law with suspicion after the Curriculum Regulations of 1935, **seeing it as "Jewified" and as the stronghold of everything the Nazis opposed: individualism, formalism, liberalism, "bookish wisdom," and "hair-splitting sophistry."**19 **Roman law became the "foreign" per se;**20 **it was regarded as the "strongly orientalized law of a degenerate mixed European-Asiatic population, a law of the ruthless large-scale capitalist exploitation of one's fellow man."**21
…

Studies over the last few decades have demonstrated that the categorical (a priori) dualism of the law as an idea was foreign to German jurisprudence up to the end of the eighteenth century.57 **Only after 1800 did idealistic philosophy and political and economic liberalism work hand in hand to effect a fundamental separation of state and society, of public and private law, and to enshrine them as categories of supposedly eternal value.** The notion of a dichotomy – if not philosophically "necessary," yet irrevocable in practical terms – saturated the legal order throughout the nineteenth century. Ulpian's formula of the *duae positiones* (*Digest* 1.1.1.2) supplied the venerable principle of categorization.

> https://droitromain.univ-grenoble-alpes.fr/Corpus/d-01.htm#1
>
> 2. ***Huius studii duae sunt positiones, publicum et privatum. Publicum ius est quod ad statum rei Romanae spectat, privatum quod ad singulorum utilitatem: sunt enim quaedam publice utilia, quaedam privatim.***
>
> https://www.constitution.org/sps/sps02_j2-01.htm
>
> (2) Of this subject there are two divisions, public and private law. Public law is that which has reference to the administration of the Roman government; private law is that which concerns the interests of individuals; for there are some things which are useful to the public, and others which are of benefit to private persons.

Even when liberalism had passed its zenith in 1878 and found itself on the defensive with regard to the interventionist state,58 **this dichotomy was retained as an intellectual construct.** The new labor and social law, the war administration law, the social tenancy laws, and the business law of the 1920s barely encroached upon this dogma. Even textbooks from the end of the Weimar period gave no indication of serious doubts about this legal dualism.

Only National Socialism made an official and emphatic break with nineteenth-century currents of tradition, proclaiming a new unity of the legal order and declaring that the separation of state and society was as outmoded as the basic rights of the citizen. **Residues of privacy were to be dissolved, society was to be integrated into the state and the state into the "movement."**
…

For instance, in 1935 Herbert Meyer **hailed the end of the separation of public and private law as the restoration of a legal unity that had always existed in Germanic-German law, blaming the reception of Roman law and nineteenth-century liberalism for the fact that this pernicious separation had established itself in the first place.**60 The Romanist who tried to declare that this separation was scientifically untenable, indeed philosophically "nonexistent," and who tried to protect his own discipline by seeking to prove that Roman law was not to blame for the historically undeniable fact of this separation, faced certain difficulties. **He had to classify Ulpian's statement as a product of late Roman decay in order to dismiss it.**
…

Moreover, it became clear, in terms of the politics of scholarship, why the nineteenth century had had such an interest in portraying this dichotomy as timeless, **superimposing it on Roman law as though the kind of separation of state and society that prevailed in nineteenth-century central Europe had existed in the Roman Empire. In this regard the National Socialist period produced "progress" as earlier defined: a persuasive historiographical insight that outlasted the fall of the National Socialist state.**

https://en.wikipedia.org/wiki/Reductio_ad_Hitlerum

The phrase *reductio ad Hitlerum* is first known to have been used in an article written by University of Chicago professor Leo Strauss for *Measure: A Critical Journal* in spring 1951,[10] although it was made famous in a book by Strauss published in 1953[3]
Natural Right and History, Chapter II:

> In following this movement towards its end we shall inevitably reach a point beyond which the scene is darkened by the shadow of Hitler. Unfortunately, it does not go without saying that in our examination we must avoid the fallacy that in the last decades has frequently been used as a substitute for the *reductio ad absurdum*: the *reductio ad Hitlerum*. **A view is not refuted by the fact that it happens to have been shared by Hitler.**

https://archive.org/details/leo-strauss-persecution-and-the-art-of-writing/page/8/mode/2up?view=theater

To recognize the fundamental difference between Christian scholasticism on the one hand, and Islamic and Jewish medieval philosophy on the other, one does well to start from the most obvious difference, the difference in regard to the literary sources. This difference is particularly striking in the case of practical or political philosophy. **The place that is occupied in Christian scholasticism by Aristotle's *Politics*, Cicero, and the Roman Law, is occupied in Islamic and Jewish philosophy by Plato's *Republic* and his *Laws*. Whereas Plato's *Republic* and *Laws* were recovered by the West only in the fifteenth century, they had been translated into Arabic in the ninth century.** Two of the most famous Islamic philosophers wrote commentaries on them: Fārābī on the *Laws*, and Averroes on the *Republic*.
…

By rejecting the notion of "rational commandments," the *falāsifa* implied that the principles of morality are not rational, but "probable" or "generally accepted." **"The rational laws (*nomoi*)" which they admitted, are distinguished from "the rational commandments," or the natural law, by the fact that they do not have obligatory character. The Stoic natural law teaching, which was transmitted to the Western world chiefly through Cicero and some Roman lawyers, did not influence the practical or political philosophy of the *falāsifa*.**

https://archive.org/details/cicerospractical0000unse/page/264/mode/2up?view=theater

In a review of Fink's book, **Strauss hesitated at the suggestion that the classical republicans were really classical, finding them more democratic than "their classical teachers" and more disposed to the modern belief in political perfection independent of the moral qualities of the citizens.**40
…

In *Natural Right and History*, normally taken as the basic statement of Strauss's overall position in political philosophy, there are nearly as many references to Cicero as there are to Plato (the most) and to Aristotle (the second most). No other thinker is there cited nearly as frequently as these three: Plato, Aristotle, and Cicero. More restricted in scope than *Natural Right and History* is Strauss's *The City and Man* which, being constituted by studies on Plato, Aristotle, and Thucydides, is limited to the Greeks;42 here too Cicero is cited with frequency but surrenders the third place to another Greek, Xenophon. In these books and in other writings, Strauss has cited almost exclusively the philosophical works of Cicero, and among those he has rarely referred to the rhetorical works.
…

Although at times he simply stated the conventional view that Cicero transmitted the Stoic teaching, on other occasions he elaborated so as to make clear that the version of that teaching which Cicero presented, *but did not himself embrace*, is an already rigidified or corrupted version of an original Stoic teaching that was much more Socratic.62
…

Strauss endeavored to sever Cicero's association with the natural law statement by Laelius by portraying the latter as "distrustful of philosophy in the full and strict sense of the term," as "absolutely at home on earth, in Rome," and as one who finds "no difficulty in reconciling natural law with the claims of the Roman Empire." The chief character of the dialogue, Scipio, is suggested as the representative of Cicero, and he "longs for the contemplative life" **and understands that the Roman regime is not simply just, that it can be seen as the best regime only by a standard of "diluted" natural law.** At the same time Strauss noted Cicero's identification with the Academic school and pointed out that another character in the *De Re Publica*, Philus, is an Academic skeptic and is called upon to attack the natural basis of right which Laelius above all defended.64 **This interpretation failed to address directly three considerations: the friendship and respect between those equals or near equals, Scipio and Laelius; that Cicero in his own name in an attack on Epicurean thought in *De Finibus* explicitly called upon the statement Laelius makes here; and the fact that Philus expresses his disgust and disagreement with the position he is here called upon to take.**65 Nor has a persuasive case been made that Laelius is any less aware than Scipio of the imperfections of the Roman past and the model Roman regime. But perhaps most important is the fact that although Scipio is the Roman spokesman in this dialogue for the merits and uses of speculative philosophy, the emphasis on the priority of moral and political philosophy which is put in the mouth of Laelius is consistent with Cicero's position throughout his writings.66

Much is made by Strauss and Holton of the "severe criticism" to which Cicero exposed Stoic metaphysics and theology in other writings, especially the *De Natura Deorum*. Even that work, however, provides especially in its closing lines ground for arguing that Cicero regarded the Stoic teaching as the best even if wanting in many ways. Cicero clearly wanted to distinguish the Stoic moral and political teaching from the metaphysics and theology. And what do Cicero's objections and doubts concerning the latter have to do with establishing his embrace of an earlier rather than later version of Stoic teaching? Would not either version be dependent on a first or fundamental philosophy, a satisfactory version of which Cicero has failed to find? And in fact those parts of the Stoic teaching, which Cicero has found more acceptable than others, were determined so not from a first philosophy but from the practical perspective, the fundamental concern with "human things" that Cicero shared with Socrates. **It must be asked why for Strauss a Stoic teaching that asserts the harmony or congruence of natural law with the essence of civil society was regarded as inaccessible from the perspective of prudence.**

https://books.google.fi/books?id=Ls9ZDwAAQBAJ&lpg=PP1&hl=fi&pg=PA81#v=onepage&q&f=false

Natural law institutionalizes, or believes it can institutionalize, what would be for Plato the decisions of the wise. **Strauss explained that the Stoics were the first to assert that there was a natural law because they were also the first to teach that there was a divine lawgiver who could mete out rewards and punishments for obeying or disobeying the law.**13 As we can see from his analysis of Plato, however, the divine origin of the natural law is not merely important at the level of *enforcement*. Rather, **only a divinity could conceive of a law that would apply in all cases, under all conditions, to all people and adhere to justice each and every time.** Such an achievement in certainly beyond the powers of the human mind, because it would combine the universality of legal justice and the specificity of equity. According to Strauss, echoing Aristotle, “Whereas a good ruler is necessarily beneficent, laws are not necessarily beneficent.”14 **Nevertheless, and related to this, the Stoics expected much more from most people than Plato or Aristotle did: “One is tempted to say that the Stoics treat the study of philosophy as if it were a moral virtue, *i.e.* as something which could be demanded from most men.”**15 The natural law of Thomas Aquinas goes even further than this, according to Strauss, not quite demanding that everyone study philosophy, but insisting that rationality is the path to morality. **This, at least in principle, is a path open to all.** He explained, “Differently stated, as a *rational being* man is by nature inclined toward acting according to reason; acting according to reason is acting virtuously; natural law prescribes therefore the acts of virtue.”16

If the natural law were merely rules handed down to the people from some lawgiver, that would be one thing. But it is more than this. **Aquinas, and perhaps even the Stoics, had to claim that the wisdom of Plato’s philosopher-king was somehow or in principle within the reach of everyone because man is defined for them as a *rational being*.** In other words, life according to reason is not the singular achievement of a few but the inherent capacity of all, if not now, then at some point in the future.17 Making this claim also entails supposing that politics need not be a compromise that wisdom must make with folly; rather, it can be understood rationally and proceed according to a rational plan.18 Put another way, **if all citizens are capable of acting rationally in all their affairs (or are morally expected to do so), political society is no longer a dilution of natural right that would have to be managed with prudence.**19

https://archive.org/details/politicalideasof0000drur/page/102/mode/2up?view=theater

In a letter to Helmut Kuhn, Strauss says that he realizes that his interpretation of Aristotle on natural right goes contrary to the authority of Aquinas, but it differs 'only by a nuance'. However, he adds that 'there are sometimes subtle nuances which are crucial importance'.54 This is the reason, as he explains to Kuhn, that he purposefully entitled his book *Natural Right*, not *Natural Law*. **Elsewhere he writes that natural law is an invention of the Stoics that was later adopted by Aquinas, and that the very idea of a natural law is for him a 'contradiction in terms'.**55 **This makes it clear that Strauss rejects the doctrine of natural law as having no roots in pagan wisdom. For Strauss, nature does not contain laws of conduct; unless, of course, one believes that there exists a divine legislator.** The pagan idea of natural right does not involve such assumptions.

---

https://www.peterkreeft.com/topics-more/religions_newpaganism.htm

In fact, Chesterton brilliantly summarized the entire spiritual history of the world in this one sentence: **"Paganism was the biggest thing in the world, and Christianity was bigger and everything since has been comparatively small."**

https://archive.org/details/politicalideasof0000drur/page/236/mode/2up?view=theater

> 56. Heidegger believes that Greek philosophy laid the foundations for modern rootlessness, and hence for the modern crisis (*SPPP*, p. 33). **It is true that for Strauss, philosophy transcends the roots of political society; it is an attempt to reach the universal truth about the human condition that transcends all ideologies and nationalities.** This is one reason why Strauss describes the philosopher as a stranger. However, for Strauss, the danger rests not so much in philosophy itself as in the 'publication' of philosophy. **Christianity is particularly instrumental in the 'publication' and hence the vulgarization of philosophy. Christianity is for Strauss, as it was for Nietzsche, Platonism for the masses because it introduces into religion, and eventually into politics, the universalistic element of philosophy – i.e. an element that transcends all particularity. But political society is particular and parochial by nature. Universalism succeeds only in perverting it, as the modern project illustrates. Strauss is at his most cautious when he speaks of Christianity;** it is no wonder that his conception of its role in the decline of Western civilization has been missed. See, for example, George Grant, 'Tyranny and Wisdom: A Comment on the Controversy Between Leo Strauss and Alexander Kojève', *Social Research*, vol. 31 (1964) pp. 45-72, reprinted in his *Technology and Empire* (Toronto: House of Anansi, 1969).

https://ccel.org/ccel/schaff/anf07/anf07.iii.ii.iv.iii.html

> **Since, therefore, as I have said, philosophy and the religious system of the gods are separated, and far removed from each other; seeing that some are professors of wisdom, through whom it is manifest that there is no approach to the gods, and that others are priests of religion, through whom wisdom is not learned; it is manifest that the one is not true wisdom, and that the other is not true religion.** Therefore philosophy was not able to conceive the truth, nor was the religious system of the gods able to give an account of itself, since it is without it. But where wisdom is joined by an inseparable connection with religion, both must necessarily be true; because in our worship we ought to be wise, that is, to know the proper object and mode of worship, and in our wisdom to worship, that is, to complete our knowledge by deed and action.
>
> **Where, then, is wisdom joined with religion? There, indeed, where the one God is worshipped, where life and every action is referred to one source, and to one supreme authority:** in short, the teachers of wisdom are the same, who are also the priests of God.[506] Nor, however, let it affect any one, because it often has happened, and may happen, that some philosopher may undertake a priesthood of the gods; and when this happens, philosophy is not, however, joined with religion; **but philosophy will both be unemployed amidst sacred rites, and religion will be unemployed when philosophy shall be treated of.**

Leo Strauss's Indictment of Christain Philosophy on JSTOR

Leo Strauss's writings reveal a subtle but consistent set of accusations against the influence of Christian thinkers on political philosophy. These accusations may be summarized in three charges. **First, the attempt by Aquinas and other Christian scholastics to synthesize faith and reason led later philosophers to eschew political prudence in favor of a humane project to employ science to transform political life.** The result was the destruction of the *modus vivendi*, safeguarded by classical political philosophy, between pious citizens and diffident but inwardly free philosophers. Second, unless all men become philosophers, this universal regime can be only a universal tyranny, ruled by means of perverted faith in the guise of a final philosophy. **Third, Christian thinkers must bear ultimate responsibility for precipitating the early modern rejection of classical political philosophy.**

Without the Christian appropriation of Aristotle, there might never have been a Machiavelli or a Hobbes.
...

Also unlike the classical philosophers, who had never supposed that more than a minority of human beings could ever attain their final end, could become philosophers, **Aquinas, true to the theological understanding of man, asserted that every human being has the potential to attain beatitude.**25 In this, we see that scholasticism has discounted what for classical philosophy had been seen as the most crucial and ineradicable source of inequality among men--the natural capacity for rational, especially speculative, thinking. **Scholasticism broke with the ancients by teaching that we are all equal with respect to the suprarational end of our actions; the moderns would transmute this same emphasis on equality by teaching that we are all equal with respect to the prerational or subrational passions that motivate our action.**
...

In this way, we see that the modern perspective is not a return to the classical view but a reverse image of the scholastic view.27 **Christian scholasticism viewed political life from above the natural horizon of the city; modern philosophy views political life from below the natural horizon of the city.**
...

We may admire the beauty of Thomas's vast intellectual celebration of the marriage of faith and reason, but how must these nuptials appear to a Platonic philosopher? From such a perspective, philosophy will be seen to have suffered at the hands of the Christian tradition a most insidious and perhaps ultimately mortal injury.
...

No longer is theology the political arm, the ministerial art, serving ends known to philosophy; theology has now become the master and philosophy the valued but firmly indentured servant.
...

Indeed, in one place, in a context well protected from casual readers, Strauss actually writes: "And modern philosophy emerged by way of transformation of, if in opposition to, Latin or Christian scholasticism."48 At the risk of being somewhat reckless, I will hazard to say plainly what I think Strauss implied: namely, that without Aquinas (or, at least, without the scholastic fusion of faith and philosophy) there need never have been a Machiavelli or a Hobbes.
...

From being the handmaiden of a faith that had promised to confirm and augment reason's grasp of the eternal truth, philosophy would now become an accessory to the basest passions and appetites shared by all men.65 **The moderns cut the cord that had tethered philosophy to the city's theological opinions only to tie it more firmly than ever to a host of new opinions: political glory (Machiavelli), the pre-political individual's fear of death (Hobbes), acquisitiveness (Locke), equality (Rousseau), until, finally, with Heidegger, we find philosophy embracing indiscriminately whatever may happen to be the dominant opinion among the *Volk*.**

https://www.newadvent.org/cathen/12023a.htm

Born about 25 B.C.. His family, of a sacerdotal line, was one of the most powerful of the populous Jewish colony of Alexandria. **His brother Alexander Lysimachus was steward to Anthony's second daughter,** and married one of his sons to the daughter of Herod Agrippa, whom he had put under financial obligations. Alexander's son, Tiberius Alexander, apostatized and became procurator of Judea and Prefect of Egypt.
...

Furthermore, his method of interpretation appears as something new and original among the juridical commentaries of the Palestinian rabbis. Eliminating what formed the common basis of all commentaries of this kind—the interpretation of the Hebrew proper names (Philo gives them at times a Greek etymology), the particular rules for the signs which indicate that Moses intended us to look beyond the literal sense (Siegfried), the oral traditions added to the account of the Pentateuch (and again, at the beginning of the "Life of Moses" these traditions are clearly of Alexandrine origin), and the prescriptions of the worship in Jerusalem—two essential features remain: first, the conviction that the Jewish law is identical with the natural; and then the allegorical interpretation. The first, according to which the acts of the prophets and the prescriptions of Moses are regarded as ideals conformable to nature (in the Stoic sense), **gives to the Jewish religion a universality incompatible with the narrow national Messianism of the Jewish sibyls. Philo thus abandons entirely the Messianic promises; there is no national tradition to exclude the Gentile from Judaism.** To find his precursors one must go back to the Prophets; tradition he revives, but only with serious modifications. **To the idea of moral universality he adds the idea of nature which he received**

from the Stoics. His interpretation is wholly bent on identifying the Mosaic prescription with natural law.

> https://www.academia.edu/23087417/Dialogic_Format_of_Philo_of_Alexandrias_De_animalibus
>
> Finally, while Philo argues for a doctrine of Stoic provenience, he uses the Platonic genre and emphasizes his Platonic allegiance by means of imitation of and allusions to the *Phaedrus*. This is consistent with Philo's philosophical position, which draws from both Middle Platonism and Stoicism;29 however, **Philo's Stoic position in *De anim.* is noteworthy in the context of the emphatically Platonic format of the dialogue.**
>
> > 29. As Reydams-Schils (2008: 169) observes, **"the scholarly debate over whether Philo should be considered a Stoic or a Platonist has been going strong since Lipsius, in the seventeenth century."**

https://archive.org/details/alexandriaandher00kinguoft/page/90/mode/2up?view=theater

But in one thing he was unfair; namely, in his allegorising. But unfair to whom? To Socrates and Plato, I believe, as much as to Moses and to Samuel. For what is the part of the old Jewish books which he evaporates away into mere mystic symbols of the private experiences of the devout philosopher? **Its practical everyday histories, which deal with the common human facts of family and national life, of man's outward and physical labour and craft. These to him have no meaning, except an allegoric one.** But has he thrown them away for the sake of getting a step nearer to Socrates, or Plato, or Aristotle? Surely not. To them, as to the old Jewish sages, man is most important when regarded not merely as a soul, but as a man, a social being of flesh and blood. **Aristotle declares politics to be the architectonical science, the family and social relations to be the eternal master-facts of humanity. Plato, in his Republic, sets before himself the Constitution of a State, as the crowning problem of his philosophy.** Every work of his, like every saying of his master Socrates, deals with the common, outward, vulgar facts of human life, and asserts that there is a divine meaning in them, and that reverent induction from them is the way to obtain the deepest truths. **Socrates and Plato were as little inclined to separate the man and the philosopher as Moses, Solomon, or Isaiah were.**

> https://books.google.fi/books?id=nVBDDwAAQBAJ&lpg=PR1&hl=fi&pg=PA149#v=onepage&q&f=false
>
> In contrast to the rabbis, Philo addresses a general audience intrigued by the otherness of Jewish life and formulates for the first time in Judaism a philosophy of law. **His attention to Mosaic law in his later writings is remarkable in light of his lack of interest in the topic in his earlier Alexandrian period.** In the *Allegorical Commentary* he addresses the issue of observance only once, reacting to Alexandrian Jews who argued that literal observance was no longer necessary if the allegorical meaning was implemented.

http://trisagionseraph.tripod.com/Texts/Free.html

Therefore, discarding all mention of those kinds of freedom which are only a pretense, **and of all those names also which are quite unconnected with nature, but which owe their existence only to opinion, such as slaves born in the house, slaves purchased with money, slaves taken in war, let us now investigate the character of the man who is truly free, who is alone possessed of independence, even if ten thousand men set themselves down as his masters; for he will quote that line of Sophocles, which differs in no respect from the doctrines of the Pythagoreans—**

> "God is my ruler, and no mortal man."

For, in real truth, that man alone is free who has God for his leader; indeed, in my opinion, that man is even the ruler of all others, **and has all the affairs of the earth committed to him, being, as it were, the viceroy of a great king, the mortal lieutenant of an immortal sovereign.**
…

And if any one beholding some persons who may have been bought and sold by traffickers in men, looks upon them at once as slaves, he is widely removed from the truth; for an act of selling does not make him who purchases the master, nor him who is sold the slave, since fathers at times have paid a price for their sons, and sons have often laid down a ransom for their fathers, in cases where they have been carried away as prisoners by some piratical sally, or have been taken captive in regular warfare, **though still the laws of nature, which are more stable than those of men, describe them as free.**
…

But the lawgiver of the Jews ventures upon a more bold assertion even than this, inasmuch as he was, as it is reported, a student and practicer of plain philosophy; **and so he teaches that the man who is wholly possessed with the love of God and who serves the living God alone, is no longer man,**

but actually God, being indeed the God of men, but not of the parts of nature, in order to leave to the Father of the universe the attributes of being both and God.
…

And Zeno, as much as any one else, being under the influence of virtue, ventures boldly to assert that the wicked have not a right to any equality of speech towards the virtuous; for he says, "Shall not the wicked man suffer if he contradicts the virtuous man?" Therefore the wicked man has not a right to freedom of speech as respects the virtuous man.
…

But Zeno appears to have drawn this maxim of his as it were from the fountain of the legislation of the Jews [Genesis 28:1], in the history of which it is recorded that in a case where there were two brothers, the one temperate and the other intemperate, the common father of them both, taking pity on the intemperate one who did not walk in the path of virtue, prays that he may serve his brother, conceiving that service which appears in general to be the greatest of evils is the most perfect good to a foolish man, in order that thus he may be deprived of his independence of action, so as to be prevented from misconducting himself with impunity, and that he may be improved in his disposition by the superintending management of him who is appointed to be his master.
…

X. But since some persons, who have paid but very little attention to literary pursuits, not understanding demonstrative arguments, which establish only general principles of action, are accustomed to ask us, "Who then are the men, whether previously existing or now alive, whom you thus represent to us?" it is well to make answer, that in former times there were some persons who surpassed all their contemporaries in virtue, **taking God alone for their guide, and living in strict accordance with the law, that is to say, with the right reason of nature, and who were not only free themselves, but who also filled all who came near to them with a spirit of freedom.** And now also, in our own time, there are some who are, as it were, images of them, bearing on themselves the stamp of the virtue of those wise men as their archetypal model; for it does not follow, that although the souls of such as contradict those virtuous men are deprived of all liberty for having been completely led away and enslaved by folly and other vices, that on this account the whole human race is so too.
…

But if there were any real anxiety for improvement in us, we ought carefully to trace out the hiding-places of these men, and to sit down before them as suppliants, and to entreat them to come forward to impart a tincture of civilization to life which was previously savage, by announcing, instead of inward slavery and innumerable evils, peace and an abundance of all other good things to flow over it continually.

But as things are, we do investigate all retreats only for the sake of money, and with this object we open the hard and rugged veins of the earth; and a great deal of the champaign country is opened in mines, and no small part of the mountainous district also, while we are seeking for gold, and silver, and brass, and iron, and all kinds of materials. But vain opinion, setting up pride as a god, has descended down to the very lowest depths of the sea in its researches to see whether there is any beautiful thing which might become an object of the outward senses lying covered anywhere; and finding many species of precious stones, some adhering closely to the rocks, and others lying concealed in oyster-shells, which are more valuable still, has thus shown a great desire to deceive the sight; and for the sake of the requirements of wisdom, or temperance, or courage, or justice, even that portion of the earth which is naturally inaccessible is travelled over, and seas which are dangerous to navigate are sailed over at any season of the year by sailors.
…

XII. Moreover Palestine and Syria too are not barren of exemplary wisdom and virtue, which countries no slight portion of that most populous nation of the Jews inhabits. There is a portion of those people called Essenes, **in number something more than four thousand in my opinion,** who derive their name from their piety, though not according to any accurate form of the Grecian dialect, because they are above all men devoted to the service of God, not sacrificing living animals, but studying rather to preserve their own minds in a state of holiness and purity. **These men, in the first place, live in villages, avoiding all cities on account of the habitual lawlessness of those who inhabit them, well knowing that such a moral disease is contracted from associations with wicked men, just as a real disease might be from an impure atmosphere,** and that this would stamp an incurable evil on their souls. Of these men, some cultivating the earth, and others devoting themselves to those arts which are the result of peace, benefit both themselves and all those who come in contact with them, not storing up treasures of silver and of gold, nor acquiring vast sections of the earth out of a desire for ample revenues, but providing all things which are requisite for the natural purposes of life; **for they alone of almost all men having been originally poor and destitute, and that too rather from their own habits and ways of life than from any real deficiency of good fortune, are**

nevertheless accounted very rich, judging contentment and frugality to be great abundance, as in truth they are.

Among those men you will find no makers of arrows, or javelins, or swords, or helmets, or breastplates, or shields; no makers of arms or of military engines; no one, in short, attending to any employment whatever connected with war, or even to any of those occupations even in peace which are easily perverted to wicked purposes; for they are utterly ignorant of all traffic, and of all commercial dealings, and of all navigation, but they repudiate and keep aloof from everything which can possibly afford any inducement to covetousness; **and there is not a single slave among them, but they are all free, aiding one another with a reciprocal interchange of good offices; and they condemn masters, not only as unjust, inasmuch as they corrupt the very principle of equality, but likewise as impious, because they destroy the ordinances of nature, which generated them all equally, and brought them up like a mother,** as if they were all legitimate brethren, not in name only, but in reality and truth.

>
> By claiming Jesus was a Jewish sectary, an Essene, and a teacher of 'natural religion,'160 Wachter provided just such a historically cogent account of the origins of Christianity, while simultaneously reducing Judaism and Christianity to historical offshoots of what were only ostensibly distinct and antagonistic spiritual traditions, termed 'Christianity' and 'Judaism,' but in reality a single – albeit hidden – tradition of truth reaching back across the ages to the early Greeks. **Among those persuaded by Wachter's Essene thesis was Frederick the Great, who wrote to d'Alembert in October 1770, insisting the historical Jesus was undoubtedly an Essene, that Essene views contained much of the teaching of Zeno, and that the Christian religion as commonly understood is a mere tissue of fiction.**161
>
> > 161. 'Jesus était proprement un Essenien,' wrote Frederick, '**il était imbu de la morale des Esseniens, qui tient beaucoup de celle de Zenon.** Sa religion était un pur déisme, et voyez comme nous l'avons brodée'; quoted in Schröder, 'Einleitung' (1995), 13.

>
> Yes! **The right of property is in decline. Generous spirits prophesy and call for its fall. The Essenian principle of reality has slowly sapped it over the course of eighteen centuries through the successive abolition of the various servitudes which served as the basis for its power.** It will disappear one day, along with the last privileges that serve as its refuge and nook. The past and the present guarantee us this resolution. For humanity is never stationary. It either advances or goes back. Its progressive march led it to equality. **Its backward march climbs, by all of privilege's steps, to personal slavery, the final word in the right of property.**

But in their view this natural relationship of all men to one another has been thrown into disorder by designing covetousness, continually wishing to surpass others in good fortune, and which has therefore engendered alienation instead of affection, and hatred instead of friendship; **and leaving the logical part of philosophy, as in no respect necessary for the acquisition of virtue, to the word-catchers, and the natural part, as being too sublime for human nature to master, to those who love to converse about high objects (except indeed so far as such a study takes in the contemplation of the existence of God and of the creation of the universe),** they devote all their attention to the moral part of philosophy, using as instructors the laws of their country which it would have been impossible for the human mind to devise without divine inspiration.
…

In the first place, then, there is no one who has a house so absolutely his own private property, that it does not in some sense also belong to every one: for besides that they all dwell together in companies, the house is open to all those of the same notions, who come to them from other quarters; then there is one magazine among them all; their expenses are all in common; their garments belong to them all in common; their food is common, since they all eat in messes; **for there is no other people among which you can find a common use of the same house, a common adoption of one mode of living, and a common use of the same table more thoroughly established in fact than among this tribe: and is not this very natural?** For whatever they, after having been working during the day, receive for their wages, that they do not retain as their own, but bring it into the common stock, and give any advantage that is to be derived from it to all who desire to avail themselves of it; **and those who are sick are not neglected because they are unable to contribute to the common stock, inasmuch as the tribe have in their public stock a means of supplying their necessities and aiding their weakness,** so that from their ample means they support them liberally and abundantly; and they cherish respect for their elders, and honor them and care for them, just as parents are honored

and cared for by their lawful children: being supported by them in all abundance both by their personal exertions, and by innumerable contrivances.

XIII. Such diligent practicers of virtue does philosophy, **unconnected with any superfluous care of examining into Greek names** render men, proposing to them as necessary exercises to train them towards its attainment, all praiseworthy actions by which a freedom, which can never be enslaved, is firmly established.
…

XXII. Therefore having put an end to empty opinion, on which the chief multitude of men depends, and being devoted to that most sacred possession, truth, **let us not use incorrect terms so as to attribute to those who thus call themselves citizens any real share in a free constitution, or any real liberty; nor, on the other hand, let us reproach those who have been born in the house of a master, or who have been bought with money as slaves, but let us rather pass over all ideas of birth, all writings implying mastership, and, in short, everything relating to the body, and let us confine ourselves to investigating the nature of the soul.**

For if it is driven to and fro by appetite, or if it is attracted by pleasure, or turned out of the way by fear, or contracted by grief, or tortured by want, it then makes itself a slave, and makes him who possesses such a soul the slave of ten thousand masters. But if it has resisted and subdued ignorance by prudence, and intemperance by temperance, and cowardice by bravery, and covetousness by justice; it then adds to its indomitable free spirit, power and authority.

And all the souls which are not as yet partakers of either of these two classes, neither of that which is enslaved, nor of that by which prudence is confirmed, but which are still naked like those of completely infant children; those we must nurse and cherish carefully, prescribing for them at first tender food instead of milk, namely, instruction in the encyclical sciences, and after that stronger food, such as is prepared by philosophy, by which they will be strengthened so as to become manly, and in good condition, and conducted on to a favorable end, not more that recommended by you than enjoined by the oracle, **"To live in conformity to nature."**

> https://en.wikisource.org/wiki/On_the_Embassy_to_Gaius#II
>
> (11) For as they had never yet all together admired any emperor who had ever existed at that time, not expecting to have in future the possession, and use, and enjoyment of all private and public good things, but thinking that they actually had them already as a sort of superfluity of prosperity which happiness was waiting to fill to the brim: (12) accordingly now there was nothing else to be seen in any city, but altars, and victims, and sacrifices, and men clothed in white garments, and crowned with garlands, and wearing cheerful countenances, and displaying their joy by the brightness of their looks, and festivals, and assemblies, and musical contests, and horse-races, and revels, and feasts lasting the whole night long, with the music of the flute and of the lyre, and rejoicings, and holidays, and truces, and every kind of pleasure addressed to every one of the senses. (13) **On this occasion the rich were not better off than the poor, nor the men of high rank than the lowly, nor the creditors than the debtors, nor the masters than the slaves, since the occasion gave equal privileges and communities to all men, so that the age of Saturn, which is so celebrated by the poets was no longer looked upon as a fiction and a fable, on account of the universal prosperity and happiness which reigned every where, and the absence of all grief and fear,** and the daily and nightly exhibitions of joy and festivity throughout every house and throughout the whole people, which lasted continually without any interruption during the first seven months of [Caligula's] reign.

https://www.garynorth.com/Deuteronomy4.pdf

Modernism's gods are the lineal descendants of the gods of the Hellenistic world, which were *influence, wealth, and sophistication*. They are gods of a systematically secular civilization: *politics, economics, and formal education*.
…

Modernism's gods are like the gods of classical humanism, for they are part of the creation. Modernism denies judicial significance to anything outside the space-time continuum. Modernism's gods are gods of man's professed autonomy. **Unlike the gods of classical humanism, they are universal gods that honor no geographical boundaries. They are idols of the mind and spirit. They offer power, wealth, and prestige to those who are willing to submit to their impersonal laws.** They serve as the foundations of empire: man's empire.
…

The gods of the modern world, being universal in their claims, imitate the universalism of the kingdom of God. They undergird the kingdom of man. Their proffered blessings are not uniquely tied to

the land as the gods of the ancient world were. **These gods are not placated by sacred offerings of the field. They are placated only by confession and conformity:** the affirmation of their autonomous jurisdiction within an ever-expanding realm of law – civil, private, or both. Their priestly agents offer positive sanctions to those who conform covenantally: the traditional human goals of health, wealth, power, fame, and security, as well as the great lure of the twentieth century, low-cost entertainment. The last goal has become necessary to offset the side effect of the first five: boredom.
...

The ancient empires adopted syncretism as a way to hold together the political order. Just as the syncretistic gods of the families and clans in Greece and Rome entered into the common pantheon of the city-state, becoming political gods, so did the gods of conquered city-states enter into the pantheon of the Roman Empire. The welcoming of these gods into the Roman pantheon undermined the ritual-theological foundations of the Roman Republic. Empires in the ancient world required the subordination of local gods to the political order.

This is in principle no different in modern pluralism. What has changed is the local character of the participating gods. **They have become universalistic, mimicking the God of the Bible. The modern pantheon is not filled with idols.** Pluralism acknowledges all religions as equal, just an syncretism acknowledged all idols as equal. But in both cases, this equality was the equality of subordination to the god of politics. This god is the supreme god of every political empire.

https://www.garynorth.com/freebooks/docs/html/gnbd/appendix_e.htm.

Stoicism offered no basis for political theory. **Stoic man, as a citizen of the universe, did not regard participation in politics as the means of maintaining his universal citizenship. This citizenship was granted to him by natural law.** Wolin has identified the elitism of such a view of citizenship, "a kind of invisible church of rational beings."(59) Wolin cites the Stoic emperor (and persecutor of the church),(60) Marcus Aurelius, who defended the existence of common reason, common law, and common citizenship. This rational ideal became the foundation for empire, a one-world State and one-State world: "For of what other common political community will any one say that the whole human race are members?"(61)

Citing the same passage, **C.N. Cochrane is even more forthright regarding the pretensions of this absolute religion of reason:** "In point of fact, it constitutes an audacious anthropomorphism, a kind of sky-writing(62) which projects upon the cosmos a merely human rationality and translates it into an account of nature and of God."(63) **Stoic natural law theory was a pagan attempt to restructure the universe in terms of man's reason. It was the antithesis of biblical law, which places man under God's absolute sovereignty, mediated by His revealed law.** Stoicism's command was "follow nature."(64) This means following autonomous reason.(65) In contrast, the Bible's command is "follow God" by obeying His law.
...

Under the influence of Greek philosophy, especially Stoicism, and Roman law, a new guild of Western legal theorists appeared in the twelfth century. They moved from the acceptance of customary tribal laws (civil) and penitential law (ecclesiastical) to the ideal of universal natural law in the guise of a revival of Roman imperial law.(68) This judicial transformation was accompanied by a parallel development among philosophers: an attempted fusion of Greek concepts of autonomous reason and the biblical ideal of God's revealed law.

https://onlinelibrary.wiley.com/doi/epdf/10.1111/zygo.12679

Robert Boyle's *A Free Enquiry into the Vulgarly received Notion of Nature* (1686) captured amiably the problem of ascribing personal qualities to nature, as medieval Aristotelianism had done. Although it was true that "nature is a thing of" God's "establishing, and subordinate to him," **many of Boyle's contemporaries "seldom or never lifted up their eyes to any higher cause" than nature, thus the "agency of God is little taken notice of in their thoughts"** (Boyle 1744, 4:361). One of the key doctrines of orthodox theology was the fundamental Creator-creature distinction. For Boyle, the main culprit for flattening the ontological distinction between nature and God was Aristotle. His propagation of the doctrine of the "eternity of the world" inevitably led to an open denial of God's creation of the world *ex nihilo* **since by "ascribing the admirable works of God to what he calls nature, he tacitly denies him the government of the world"** (Boyle 1744,4:362) Yet, when Boyle read Scripture, he noticed a devastatingly countervailing evidence. When Genesis 1 recounts the story of creation (1:11;1:24; 1:25), Boyle averred that the "divine historian ascribes the formation" of all of creation to "God's immediate *fiat*" without the intermediary of nature. Furthermore, Boyle continued:

> **And I do not remember, that in the *Old Testament*, I have met with any one Hebrew word, that properly signifies nature, in the sense we take it in**...So likewise, though *Job*, *David*, and *Solomon*, and other *Israelitish* writers, do, on diverse occasions, many times mention the corporeal works of God, **yet they do not take notice of nature, which our philosophers would have his great viceregent in what relates to them**...And when St. *Paul* himself, who was no stranger to the Heathen learning, writing to the *Corinthians*, who were *Greeks*, speaks of

> the production of corn out of seed sown, he does not attribute the produced body to nature. (Boyle 1744, 4:368)

This quote above highlights two themes in tension: nature as a putative key and eternal element in Aristotle's philosophy, and Scripture's deafening silence concerning its role in creation narratives in Jewish and Christian Scriptures.

>
> Strauss argues in many writings that both philosophers and religious believers often fail to see the underlying incompatibility of these two premises. Most are reluctant to admit the exclusive choice of seeing the universe as created or as eternal, as miraculous or as governed by impersonal necessities. **Hence, it is shocking for people to read Strauss's claim that the Hebrew Bible has no word for "nature" because nature in the strict sense means an eternal order that exists on its own power rather than a created order that depends on God.**7

https://www.garynorth.com/public/2280.cfm

Today, only a few conservative social thinkers, a few Protestant conservatives, and followers of Murray Rothbard still proclaim faith in natural law theory as a ground for ethics and society.

WHAT'S THE PROBLEM?

Natural law theory has always suffered from the dualism of all Greek thought: law vs. change. **The unchanging pure logic of Parmenides cannot be reconciled to the constant historical flux of Heraclitus.** Greek philosophy never resolved this dualism. No humanist philosophy ever has, either.

The problem today is that the tiny handful of natural law theory defenders are trying to breathe life into a long-dead horse. They are wasting precious time. **Natural law theory has never worked as the basis of any social order, but after Charles Darwin, the academic community abandoned natural law theory. Darwin taught that nature is impersonal and not normative.** There is no universal ethics. There is only a constant struggle for personal survival.
…

Christian social theorists (there are not many) are among the few remaining defenders of natural law theory. This is ironic, because natural law theory cannot be defended biblically. **Paul wrote, "The natural man receiveth not the things of the spirit of God" (I Corinthians 2:14a).** He wrote that natural men turn to false Gods and suppress the truth that is in them (Romans 1:18-22). This undermines any theory of natural law for a consistently Christian society.

https://www.garynorth.com/freebooks/docs/html/gnde/Chapter72.htm

The humanism of natural law theory is obvious. **Prior to Darwin's implicit destruction of all natural law theory, natural law theory was Western humanism's primary judicial alternative to Christian law.** Darwin destroyed men's faith in a common legal order that is grounded in man's reason because men are individuals caught in a purposeless evolutionary process that has no fixed ethical standards.[(5)]
...

Why did God's people have to wait for Roman Stoics to discover the theory of natural law, by which they explained why Rome had the authority to create an empire out of the ruins of the Greek city-states? **The Stoics provided a philosophical justification for empire that could not be provided by the polytheism of classical religion. Yet Christians are expected to believe that God waited until the advent of the tyrannical Roman Empire in order to inform His covenant people of the sole authority of man's universal reason in establishing civil law.** He raised up Stoic philosophers rather than prophets to bring this message to the church. Furthermore, it was not until Roger Williams in the early 1640's discovered pluralism's principle of religiously neutral civil commonwealth that God's church was presented with this theory in the name of Christianity.[(6)]

https://www.garynorth.com/MosesAndPharaoh.pdf

The popularity of natural law concepts has been very great throughout the history of the church. By importing Greek and Roman concepts of natural law into church law, medieval theologians unknowingly mixed together two rival systems of thought. The Greek and Roman concept of natural law rested on the presupposition of man's *autonomy*. It rested on the presupposition of *neutrality* in human thought. The Bible recognizes the common heritage of the image of God in man, but it sees this image as twisted and perverse in rebellious man. Thus, the universality of men's perception of certain aspects of biblical law is a *universality of condemnation*.

…

As men's faith in God and His revealed word has declined along the greased skids of human autonomy—**from Roman law to canon law, to scholastic natural law, to Deism's natural law, and then to the positive law of the State**—the State has become increasingly dominant.

http://triablogue.blogspot.com/2016/04/thomas-train-wreck-and-analogia-entis.html

Thomas Aquinas is perhaps the best known and most articulate expositor of the *analogia entis*. In this respect, Aquinas cobbled together something of an Aristotelian metaphysic with a Pseudo-Dionysian notion of "remotion" – that "we can't know God as he is". Of course, Aquinas also relied on "the Psalms, the Wisdom books of the Greek Old Testament, the patristic tradition, and so on", to achieve his "grand synthesis". "The assumption is that the world reveals the glory of God: the divine presence is more or less evident".

It is this "grand synthesis", this Medieval version of "why can't we all just get along", that has caused the train wreck that is Roman Catholicism. Roman Catholicism is not a Biblical faith; instead, it is an agglomeration of disparate and unrelated thoughts and activities. The notion is that "all truth is related", but the contexts are so different, the result is a mish-mosh of philosophical concepts that may or may not resemble the God of the Bible in any discernible way.

https://archive.org/details/politicalideasof0000drur/page/108/mode/2up?view=theater

Strauss's criticisms of Aquinas's natural law are subtle, but not undetectable. **In Strauss's view, Aquinas has failed to recognize the radical, threatening and destructive nature of a transcendent natural law independent of political right.** It has the tendency to demote political society, undermine its dignity, status and authority, and as a result, threatens its very survival. If there is a moral order higher than that of the state that is more worthy of their allegiance, men are likely to disregard the conventional rules whenever they come into conflict with the higher law.
…

Strauss objects to natural law not just for being too radical, but for being too timid. It excessively restricts the 'latitude' of prudent statesmen in forbidding certain types of actions that may be necessary for the protection of the state.
…

Strauss does not criticize natural law openly. On the contrary, he tries to blur the distinction between it and natural right. Since the public dissemination of natural law is beneficial, it should not be openly undermined. **As the *falasifa* were well aware, the efficacy of the conventional rules of conduct depends on their being regarded as binding without qualifications, without ifs and buts. But there is not reason for philosophers to mistake a salutary delusion for the truth. Aquinas dispenses with esotericism because he has mistaken a noble lie for the truth.**
…

Aquinas is usually credited with having reconciled Aristotle with the Bible. But for Strauss, such a reconciliation is impossible. **Far from making Aristotle compatible with the Bible, Aquinas has succeeded only in baptizing Aristotle.**82 **He banished philosophy altogether and replaced it with theology. Fortin points out that Aquinas was repudiated by the Latin Averroists who 'objected to the enslavement of the very philosophy that they could credit with having made them free'.**83 This is reminiscent of Strauss's remark, noted earlier, that Christianity (unlike Islam and Judaism) did a disservice to philosophy: by bringing it close to its bosom, it subjected it to ecclesiastical supervision, and as a result, deprived it of the freedom that is its very essence.84

https://archive.org/details/moraldarwinismho0000wike/page/100/mode/2up?view=theater

Third, because of the excesses of some who were enamored with Aristotle and neglected or downplayed Scripture as a source of truth (the so-called radical Aristotelians), other Christians (the so-called radical Augustinians) came to see Aristotle's thought as a kind of spiritual contamination and tried to destroy its influence. **The theology they used to combat Aristotelianism, called nominalism, inadvertently paved the way for Epicureanism.**

First, and without going into too much detail, Aristotle's account of nature was itself partially forged against the atomism of Democritus (both Epicurus and Lucretius lived after Aristotle), and Epicurus and Lucretius borrowed heavily from Democritus. Since, as we shall see, Darwinism is simply a modern form of Epicureanism, it turns out that Aristotle's account of nature is directly opposed to Darwinism as well.
…

In his efforts to provide Christianity with a natural philosophy to undergird its revealed view of nature, **Thomas stood as a mean between two extreme tendencies.** On the one extreme, there was radical Aristotelianism, which was so enamored with the pagan philosopher that it seemed to reject Christianity for paganism, elevating natural truth above revealed truth. This extreme alarmed some of the orthodox Christians, who, rejecting Aristotle, embraced radical Augustinianism, which took revelation to be all that was needed, and considered any pagan philosophy whatsoever to be a horrible contagion infecting revealed truth.
…

Christians who believe that the goodness of the natural intellect was only wounded by sin will find themselves attracted by Aristotle, Aquinas and intelligent design theory. Christians who believe that the goodness of the natural intellect was wholly corrupted by sin will find themselves attracted to radical Augustinianism, especially if they believe that Aristotelianism and Thomism (or their combination in scholasticism) have forgotten the wounds of sin completely and have elevated natural reason above revelation (as did the radical Aristotelians in the Middle Ages). This train of radical Augustinianism was given intellectual authority and historical influence at the end of the Middle Ages by the famous Catholic theologian, William of Occam (or Ockham), who lived just after Aquinas, from about 1285 to 1347.
...

By asserting that only particular things were real, and that universals or species names had no reality, nominalism was inadvertently siding with Epicurean materialism's denial of the reality of form/species distinctions. **For Epicurean materialism, we recall, only individual atoms are real. The forms or shapes these atoms happen to make are ultimately unreal, and the names we apply to them ("dog," "cat," etc.) are merely conventional.**
...

But William was not finished. **He argued that not only were all actions utterly particular but actions were good and evil simply because God happened to designate them as either good or evil.** Since God is all-powerful, he could command anything he wanted, completely unrestrained by all merely human conceptions of good and evil. So radical was William's claim for God's omnipotence in this regard that he even asserted that God could change the first commandment:

> Every will can conform to the divine precepts, but God can command the created will to hate him, and the created will can do this (thereby refusing its own happiness and ultimate end). Furthermore, any act that is righteous in this world can also be righteous in the next, the fatherland; **just as hatred of God can be a good act in this world, so can it be in the next.**4

...

Finally, radical Augustinianism affirmed the plurality of worlds, even a plurality of inhabited worlds other than the earth. Again, **this inadvertent support for an Epicurean position was the result of the rejection of Aristotle,** in particular the rejection of Aristotle's argument (rooted in his rather complicated doctrine of natural place) that there could only be one world.

https://www.newadvent.org/cathen/15636a.htm

He was cited before the pontifical Court at Avignon in 1328, but managed to escape **and join John of Jandun and Marsilius of Padua, who had taken refuge at the Court of Louis of Bavaria. It was to Louis that he made the boastful offer, "Tu me defendas gladio; ego te defendam calamo".**

In his controversial writings William of Ockham appears as the advocate of secular absolutism. **He denies the right of the popes to exercise temporal power, or to interfere in any way whatever in the affairs of the Empire. He even went so far as to advocate the validity of the adulterous marriage of Louis's son, on the grounds of political expediency, and the absolute power of the State in such matters.** In philosophy William advocated a reform of Scholasticism both in method and in content. The aim of this reformation movement in general was simplification. This aim he formulated in the celebrated "Law of Parsimony", commonly called "Ockham's Razor": "Entia non sunt multiplicanda sine necessitate". **With this tendency towards simplification was united a very marked tendency towards skepticism: a distrust, namely, of the ability of the human**
mind to reach certitude in the most important problems of philosophy. Thus, in the process of simplification he denied the existence of intentional species, rejected the distinction between essence and existence, and protested against the Thomistic doctrine of active and passive intellect. **His skepticism appears in his doctrine that human reason can prove neither the immortality of the soul nor the existence, unity, and infinity of**
God. These truths, he teaches, are known to us by Revelation alone.

https://en.wikipedia.org/wiki/William_of_Ockham#Life

Because of the pope's attack on the Rule of Saint Francis, William of Ockham, Michael of Cesena and other leading Franciscans fled Avignon on 26 May 1328, and eventually took refuge in the court of the Holy Roman Emperor Louis IV of Bavaria, who was also engaged in dispute with the papacy, and became William's patron.[18]
...

After Michael of Cesena's death in 1342, **William became the leader of the small band of Franciscan dissidents living in exile with Louis IV.** William of Ockham died (prior to the outbreak of the plague) on 9 April 1347.[24]

https://plato.stanford.edu/entries/ockham/#Ethi

Thus, in Exodus, the Israelites' "spoiling the Egyptians" (or rather their *intention* to do so, which they carried out) was not a matter of theft or plunder, but was morally permissible and indeed obligatory—because God had commanded it.
…

The divine command themes so prominent in Ockham's ethics are much more muted in his political theory, which on the contrary tends to be far more "natural" and "secular."[53]
…

The Spirituals, among whom were Ockham, Michael of Cesena, and the other exiles who joined them in fleeing Avignon, tried to preserve the original ideal of austere poverty practiced and advocated by St. Francis himself (c. 1181-1226). The Conventuals, on the other hand, while recognizing this ideal, were prepared to compromise in order to accommodate the practical needs of a large, organized religious order; they were by far the majority of the order. The issue between the two parties was never one of doctrine; neither side accused the other of heresy.
…

In short, for John XXII, it follows that it is impossible fully to live the life of absolute poverty, even for the individual person (much less for a permanent institution like the Franciscan order). The institution of property, and property "rights," therefore began in the Garden of Eden, the first time Adam or Eve ate something. These property rights are not "natural" rights; on the contrary, they are established by a kind of positive law by God, who gave everything in the Garden to Adam and Eve.

Ockham disagreed. For him, there was no "property" in the Garden of Eden. Instead, Adam and Eve there had a natural right to use anything at hand. This natural right did not amount to a *property* right, however, since it could not have been used as the basis of any kind of legal claim. Both John XXII and Ockham seem to agree in requiring that "property" (ownership) be a matter of positive law, not simply of natural law. But John says there was such property in the Garden of Eden, whereas Ockham claims there was not; there was only a *natural* right, so that Adam and Eve's use of the goods there was legitimate. For Ockham, "property" first emerged only after the Fall when, by a kind of divine permission, people began to set up special positive legal arrangements assigning the legal right to use certain things to certain people (the owners), to the exclusion of anyone else's having a *legal* right to them. The owners can then give permission to others to use what the owners own, but that permission does not amount to giving them a legal right they could appeal to in a court of law; it can be revoked at any time. For Ockham, this is the way the Franciscans operate. Their benefactors and donors do not give them any legal rights to use the things donated to them—i.e., no right they could appeal to in a court of law. Rather the donation amounts only to a kind of permission that restores the original natural (not legal) right of use in the Garden of Eden.[56]

https://iep.utm.edu/ockham/#SH8b

Ockham extends his commitment to poverty beyond just the Franciscan order, convinced that wealth is an inappropriate source of power for the Catholic Church as a whole. In his view, the Catholic Church has a spiritual power which sets it apart from the secular world. **This conviction leads Ockham to propose the doctrine that was to become the foundation of the United States Constitution: separation of church and state.**
…

Ockham boldly proposes a third alternative: the pope and the emperor should be separate but equal, each supreme in his own domain. **This was an outrageous suggestion, unwelcome on both sides.** Ockham's argument for it stems from reflections that foreshadow the "state of nature" thought experiments of premier modern political theorists Thomas Hobbes (1588-1679), John Locke (1632-1704) and Jean-Jacques Rousseau (1712-1778).

In the Garden of Eden, God gave the earth to human beings to use to their common benefit. **As long as we were willing to share there was no need for property among us. After the fall, however, human beings became selfish and exploitative.** Laws became necessary to restrain immoderate appetite for secular or "temporal" goods and to prevent the neglect of their management. Since laws are useless without the ability to enforce them, we arrived at the need for secular power. The function of the secular power is to punish law breakers and in general coerce everyone into obeying the law.

By renouncing property, the Franciscans were attempting to live as God originally intended. In a perfect world, there would be no need for property and the coercive authority it spawns. All Christians should aspire to this anarchic utopia, even though they may never fully achieve it. In the meanwhile, they should avoid mixing the spiritual and the secular as much as possible. Ockham writes,

> **For this reason, the head of Christians does not, as a rule, have power to punish secular wrongs with a capital penalty and other bodily penalties and it is for thus punishing such**

> **wrongs that temporal power and riches are chiefly necessary; such punishment is granted chiefly to the secular power. The pope therefore, can, as a rule, correct wrongdoers only with a spiritual penalty. It is not, therefore, necessary that he should excel in temporal power or abound in temporal riches, but it is enough that Christians should willingly obey him.** [*A Letter to the Friars Minor and other Writings*, p. 204]

For Ockham, the separation of church and state is a separation of the ideal and the real.

Ockham mentions democracy only in passing, arguing in favor of monarchy as the best form of secular government. Moreover, he finds representational forms of government objectionable on the grounds that there is no such thing as a common will. Ockham is not holding out for a superhuman leader. On the contrary, he seems to think that a fairly ordinary, good man can make a decent king. One wonders if Louis of Bavaria, to whose protection he and Michael fled, inspired this confidence. **Perhaps Ockham is content with monarchy because, in his view, the secular world will always be intrinsically flawed. He sets his hopes instead on the spiritual world, and this is why he was so bitterly disappointed in Pope John XXII.**
…

Although Ockham never came to criticize the institution of the papacy itself, as would later Protestant thinkers, he did accuse the popes he opposed of heresy and called for their expulsion. Ironically, Ockham's extensive analysis of the concept of heresy turns into a defense of free speech.

In keeping with his doctrine of the separation of church and state, Ockham maintains that the pope, and only the pope, has the right to level spiritual penalties, and only spiritual penalties, against someone who knowingly asserts theological falsehoods and refuses to be corrected. **A man might *unknowingly* assert a theological falsehood a thousand times, however.** As long as he is willing to be corrected, he should not be judged a heretic, especially by the pope.

Ockham's political treatises are strewn with biblical exegesis, often glaringly ad hoc and sometimes quite interesting, as in the present case. In Matthew 28:20 Jesus promises his disciples: **"I will be with you always, to the end of the age."** This text traditionally provided justification for the doctrine of papal infallibility according to which the pope cannot be wrong when speaking about official church matters. **Ockham rejects this doctrine, however, arguing that the minimum required for Jesus to keep his promise is that one human being remain faithful at any given time, and this one could be anyone, even a single baptized infant. This implies that the entire institution of the church could become completely corrupt.** As a result, any theological claim, no matter how ancient or universally accepted, is always open for dispute.

Even more interesting, however, is Ockham's view of non-theological speech. He writes that

> **… purely philosophical assertions which do not pertain to theology should not be solemnly condemned or forbidden by anyone, because in connection with such assertions anyone at all ought to be free to say freely what pleases him,** [*Dialogus*, I.2.22]

This statement long predates the *Areopagitica* of John Milton (1608-1674), which is typically heralded as the earliest defense of free speech in Western history.

https://www.gutenberg.org/cache/epub/18269/pg18269-images.html#SECTION_V

Custom creates the whole of equity, for the simple reason that it is accepted. It is the mystical foundation of its authority;[115] **whoever carries it back to first principles destroys it.**
…

We must not see the fact of usurpation; law was once introduced without reason, and has become reasonable. **We must make it regarded as authoritative, eternal, and conceal its origin, if we do not wish that it should soon come to an end.**
…

337. *The reason of effects.*—Degrees. **The people honour persons of high birth. The semi-learned despise them, saying that birth is not a personal, but a chance superiority. The learned honour them, not for popular reasons, but for secret reasons. Devout persons, who have more zeal than knowledge, despise them, in spite of that consideration which makes them honoured by the learned, because they judge them by a new light which piety gives them.** But perfect Christians honour them by another and higher light. So arise a succession of opinions for and against, according to the light one has.

338. True Christians nevertheless comply with folly, not because they respect folly, but the command of God, who for the punishment of men has made them subject to these follies. ***Omnis creatura subjecta est***

vanitati.[125] ***Liberabitur.***[126] **Thus Saint Thomas**[127] **explains the passage in Saint James on giving place to the rich, that if they do it not in the sight of God, they depart from the command of religion.**

https://books.google.fi/books?id=wrx9BgAAQBAJ&lpg=PP1&hl=fi&pg=PA321#v=onepage&q&f=false

Pascal is particularly in accord with the libertines and especially with Hobbes in the matter of justice, law, and custom. He rejects the common orthodox attitude that there is a rational natural law which is the source of our laws and justice.
…

One does not obey a law because it is just, even though the people think it is just; one obeys it because it is a force. And Pascal wrote the marvelous # 298: “Et ainsi, ne pouvant faire que ce qui est juste fût fort, on a fait que ce qui est fort fût juste.”
…

Thus Pascal offered almost simultaneously a critique of rationalistic philosophy and a critique of reason as an instrument for penetrating to truth, and of its optimistic faith in justice. In this latter respect, **he deviated from the humanistic tendency to see the primacy of moral law over political coercion, and the existence of a providential order reason and justice which mankind must respect. This current, which will be resumed in the eighteenth century and which was continued from Erasmus in the Renaissance through Grotius in the seventeenth century, was ignored by the libertines. They were more inclined to subscribe to the more realistic policies of Machiavelli.** Naudé, La Mothe le Vayer and even Cyrano de Bergerac all adhere to the belief that the prince should be the unquestioned ruler of his people without the interference of any form of representational government; Hobbes, of course, was its principal exponent, since it was the keystone of his doctrine of peace. **This idea that the leviathan state is a guarantee of order and peace was accepted by Pascal also, who thereby rejected the principle of an antecedent natural law, seeing that it had been corrupted by the nature of man.** Custom is the only basis of equity, merely because it is accepted by the masses. “Rien, suivant la seule raison, n’est juste en soi.”

The consequences of this doctrine are even more disastrous than Montaigne’s paradoxical stand. Law is just because it is the law, and it must be obeyed merely for this reason. **Property rights are not a natural right; they represent a usurpation which has been confirmed by custom.** The social order does not represent a justice supported by force, but rather a force imposed upon the people as a system of justice. **The power of the king is founded upon the ungovernable folly of the populace.** The wise man, knowing well these incompatibilities with reason, will always retain “la pensée de derrière la tête.” He knows that all social life, which rests only on force, is a comedy.

The point to be noted here is that Pascal’s views which accord with those of the libertines and especially with those of Hobbes **are motivated not only by skepticism (as was the case with the libertines) and by a desire for peace and order (as was the case with Hobbes),** but by a conviction that man’s reason is an unreliable instrument in formulating his world, that facile optimism as regards his natural birthright is totally unjustified, and that (as St. Augustine proclaimed) man’s corrupt nature has corrupted everything. The importance of this position in the evolution of thought lies in the fact that on this stand Pascal and the libertines, and to a certain extent the Jansenists and the libertines, are united against Cartesianism because of a certain compatibility between the skepticism of the libertines and the pessimistic Augustinianism of Jansenism, **whereas, according to Brunetière, there are other times in which the forces of libertinism and Cartesianism are combined against Jansenism.**

Accepting of this interpretation entails seeing in Pascal not only an opponent of Cartesian rationalism but an opponent also of that derivative of Cartesianism, rationalistic optimism. Pascal’s view of man borders upon despair and is the very opposite of the “généreux” of Descartes. Further, Pascal entered upon his subject of demeaning man with such effect that the second part of his program, that of enhancing man’s value, was all but forgotten. Adam explains his pessimistic portrayal as the result of foreseeing the triumph of this rationalistic optimism which was at the origin of the deism adopted by the subsequent period. **It is certainly true that insofar as Voltaire represents the opposite point of view to Pascal’s, it is on the grounds of rationalistic optimism based on confidence in the power of God.** This attitude of Voltaire, however, wore thin in the fifties and was replaced by a view which, while not as permanently hopeless as Pascal’s, was nevertheless full of misery.

https://books.google.fi/books?id=3jiGsoP_ExgC&lpg=PP1&hl=fi&pg=PR59#v=onepage&q&f=false

But Bossuet, anxious as he is to find a permanent model of perfect government in Hebrew monarchy, and to overturn any suggestion that the throne of David and Solomon arose out of popular concession or “will,” also offered “secular” objections to contractarianism **which show an appreciation of Hobbes’ writing and turns of phrase, if not of his conclusions.** Beginning with an attack on Jurieu, Bossuet soon broadens the argument of the *Cinquième avertissement aux protestants* to take in the whole contract tradition.

> **He [Jurieu] has imagined that the people are naturally sovereign;** or, to speak as he does, that they naturally possess sovereignty, since they give it to whom they please. **Now this is to err in principle, and not to understand terms. For, to consider men as they naturally are, and before all established government, one finds only anarchy,** that is to say a savage and wild liberty in all men, where each one can claim everything, and at the same time contest everything; where all are on guard, and in consequence in a continual war against all; **where reason can do nothing, since each calls reason the passion that transports him; where even natural law itself remains without force, since reason has none;** where in consequence there is neither property, nor domain, nor good, nor secure repose – nor, to speak truly, any right whatsoever, except that of the strongest (and again one never knows who that is, because each can become such by turns, according as the passions conspire to throw more or fewer people together.)168

To know whether "the human race in its entirety" has ever been in such a state of nature, "or whether some peoples have been in it in some places," to know "how and by what degrees they left it" – to know this, Bossuet goes on, "it would be necessary to count to infinity, and understand all the thoughts which can arise in the human heart."169

https://books.google.fi/books?id=3jiGsoP_ExgC&lpg=PP1&hl=fi&pg=PA15#v=onepage&q&f=false

Take away the government, the earth and all its goods are as common among men, as the air and the light. God said to all men: "Increase and multiply, and fill the earth."8 He gave to them all, indiscriminately, "every herb bearing seed upon the earth, and all trees that have in themselves seed of their own kind."9 **According to this right of nature, no one has a particular right to anything whatever and every thing is the prey of all.**10

https://books.google.fi/books?id=3jiGsoP_ExgC&lpg=PP1&hl=fi&pg=PA25#v=onepage&q&f=false

It is thus that the law places, as it were in common, the property that has been divided for the public and private convenience. **It leaves, even in the lands so justly divided, some mark of the ancient community, but reduced to certain limits for the sake of public order.** "Going into thy neighbor's vineyard, thou mayest eat as many grapes as thou pleases: but must carry none with thee. If thou go into thy friend's corn, thou mayest break the ears, and rub them in thy hand: but not reap them with a sickle."5
...

Moses, by this means, recalls to the memory of the possessors, that they should always regard the earth as a common mother and the nurse of all men, and does not will that the division which has been made of it should make them forget the original right of nature [*le droit primitif de la nature*].

https://books.google.fi/books?id=vx75FeIRcRYC&lpg=PP1&hl=fi&pg=PR17#v=onepage&q&f=false

The philosophers of the new natural sciences advanced a concept of nature as a non-purposive realm of atoms on which God imposes, by an act of will, motion and an extrinsic order of efficient causes or regularities. The task of philosophers of natural law was henceforth to bring natural law into line with this scientific concept of nature and human nature (Tully 1988).

Pufendorf performs this task at the beginning of *DJN* and *DOH* I.1-2 **by setting forth morality and politics as the extrinsic imposition of moral concepts by a superior on to an unordered realm of human movements that lack any intrinsic moral properties, and of human agents who lack any innate dispositions to moral and political life** (Laurent 1982, Schneewind 1987). Hobbes and Locke share this imposition picture – or moral non-realism – to varying degrees. **However, to take it as a defining feature of 'the modern school of natural law' is apt to be misleading since it is neither a sufficient nor a necessary condition of a modern natural law theory. The voluntarist tradition of natural law associated with William of Ockham shares this feature yet it predates this 'modern' school by 300 years.** Conversely, one of the rival schools of natural law in the seventeenth century accepted the (limited) validity of the new form of explanation in the natural sciences yet went on to argue that this is in no way undermines teleological explanation of human agency and the assumption that moral properties inhere in their objects (moral realism). **Leibniz and the Cambridge Platonist Ralph Cudworth (1617-88) constructed modern neo-Aristotelian and neo-Platonic natural law philosophies in response to the revolution in the natural sciences. They argued that their reconstructions were invulnerable to criticisms launched by Mersenne's circle, criticized Hobbes and Pufendorf for reductively modelling moral and political philosophy on the new natural philosophy, and interpreted their theories as a continuation of the old voluntarism** (Leibniz 1698, Lee 1702, Cudworth 1731).

> 259. **M. Bayle believes that if it were a question only of the evil of guilt, or of moral evil among men, the case would soon be terminated to the advantage of Pliny, and Euripides would lose his action.** To that I am not opposed; our vices doubtless exceed our virtues, and this is the effect of original sin. It is nevertheless true that also on that point men in general exaggerate things, and that even some theologians disparage man so much that they wrong the providence of the Author of mankind. That is why I am not in favour of those who thought to do great honour to our religion by saying that the virtues of the pagans were only *splendida peccata*, splendid vices. **It is a sally of St. Augustine's which has no foundation in holy Scripture, and which offends reason.**

https://research.vu.nl/ws/files/1923415/Barbeyrac%20Fathers.pdf

In bringing the Church Fathers to trial before the court of Reason, Barbeyrac has a field day. **Augustine's arguments on property, he contends, are similar to, and just as specious as, the contentions of Thomas Hobbes. Both men believed that the principle of 'mine and thine' did not apply in the state of nature. It was a pity that Hobbes did not utilize Augustine's impressive authority, since the latter's mere approval would have made Hobbes's writings palatable to everyone.** Indeed, there are authors who have taken up the Augustinian-Hobbesian argument, contending that property rights exist only in civil society, and that an absolute monarch is crucial to their maintenance. 'Il n'y a que trop d'exemples, qui prouvent, combien les Ecclésiastiques de l'Eglise Romaine savent persuader aux Rois, qu'ils sont maîtres absolus & des Biens & des Vies de leurs Sujets; bien entendu qu'ils ne touchent point à ce qui regarde les Personnes & les Biens de ces mêmes Ecclésiastiques (…).'22 **Barbeyrac is thinking of that other ecclesiastic, Jacques-Bénigne Bossuet.**

https://www.garynorth.com/conspiracyinphiladelphia.pdf

It has taken the Civil War, the Fourteenth Amendment, and Supreme Court decisions, beginning around 1960, to make the Constitution's humanistic foundation obvious to everyone except a handful of Christian scholars, most of whom were not trained as historians. **The only people who have been deceived by these interpretations are evangelical Christians. They, like their teachers, are the victims of two centuries of Whig propaganda and two millennia of natural law theory.**
…

For over two centuries, Christian historians have neglected to conduct such a detailed study of the origins of the Constitution. Most of them have accepted the view of the victors of 1788: the Constitution is a philosophically neutral, procedurally neutral, morally neutral, **religiously neutral document that is somehow consistent with "true" Christianity. Yet it is also supposedly consistent with Christianity's rivals. If these assumptions are true, then Stoic natural law philosophers were right, Newtonian unitarians were right, and Freemasons are right: there is a morally and theologically neutral system of fixed law that is both unchanging and accessible to the minds of rational men in the midst of history.** The Constitution is the incarnation of this religion of neutrality.
…

Ancient Rome sought Madison's political goal by inviting all conquered cities of the Empire to send their local gods into the pantheon; Madison told the conquered cities of the republic to keep their gods home and multiply them. He then emptied the pantheon. **This confidence in what should be described as a unitarian political settlement was based on some version of Newtonian or Ciceronian natural law. It was also the worldview of Freemasonry. Freemasons believed that the religious "factions" or traditions—creeds, liturgies, and unique institutional histories—are peripheral to the true spiritual unity of the Brotherhood under the Supreme Architect.**

The Constitution had not yet been ratified when the Antifederalists began organizing to capture Congress under the new Constitution.29 Political factions and parties had already sprung up during the Revolutionary War era.30 They developed even further during the Confederation period.31 They became entrenched after 1788.32 Madison's dream was shattered before sunrise. **There is universal agreement among historians: this Madisonian faith in a world devoid of**

politically influential factions was utopian in 1788, just as it would be utopian today. What few of them are willing to say forthrightly is that the very presence of such a faith marks Madison as the most rationalistic of political philosophers. He paid no attention to the realities of politics in constructing the rationale for the constitutional blueprint. He believed that the Constitution would actually balance real-world politics into oblivion. Patrick Henry's assessment of the man was on target: "a man of great acquirements, but too theoretical as a politician."33 Madison and his peers were totally naive on this point, historians agree. But the historians tend to ignore the origins of his utopian faith; it just somehow was universal among the nationalists. **They do not pursue the obvious: the intellectual ideal of a political world of Newtonian mechanism**34 **and the rhetoric of Ciceronian natural law had fused with the Masonic ideal of a creed-overcoming brotherhood to produce a political world without men's passions and interests.** It was a stillborn ideal by 1788.
…

Rushdoony did not recognize in 1964 what ought to be obvious to any person who has read the tracts and treatises of that Constitutional generation: the American Deists of the second half of the eighteenth century adopted the same strategy of infiltration that the followers of neo-orthodox theologians Karl Barth and Emil Brunner adopted in the twentieth century, namely, *importing alien religious and philosophical principles under the cover of language that had long been considered Christian.* In fact, this process of infiltration has been going on in Christianity since the second century, as Van Til argued throughout his career. **The difference by 1770, however, was that the anti-Christians in America were self-consciously using these alien Greek and Roman stoic concepts to undermine the religious and especially the judicial foundations of what was then clearly a Christian society. Christians had long invoked natural law philosophy as a support for orthodoxy. The main Framers of Constitutional nationalism—Washington, Franklin, Jefferson, Hamilton, John Adams, and Madison**27**—used natural law philosophy as a tool to undermine orthodoxy.**

> https://en.wikipedia.org/wiki/Hiram_Abiff
>
> In 1 Kings 7:13-14, Hiram is described as the son of a widow from the tribe of Naphtali who was the son of a Tyrian bronze worker, sent for by Solomon to cast the bronze furnishings and ornate decorations for the new temple. From this reference, Freemasons often refer to Hiram (with the added Abiff) as "the widow's son."
>
> 2 Chronicles 2:13-14 relates a formal request from King Solomon of Jerusalem to King Hiram I of Tyre, for workers and for materials to build a new temple. King Hiram (Huram in Chronicles) responds **"And now I have sent a skillful man, endowed with understanding, *Ḥuram 'abi.*[6] (the son of a woman of the daughters of Dan, and his father was a man of Tyre), skilled to work in gold and silver, bronze and iron, stone and wood, purple and blue, fine linen and crimson, and to make any engraving and to accomplish any plan which may be given to him, with your skillful men and with the skillful men of my lord David your father."[7]**

AULUS CAECINA, son of Aulus Caecina who was defended by Cicero (69 B.C.) in a speech still extant, took the side of Pompey in the civil wars, and published a violent tirade against Caesar, for which he was banished. He recanted in a work called *Querelae*, and by the intercession of his friends, above all, of Cicero, obtained pardon from Caesar. **Caecina was regarded as an important authority on the Etruscan system of divination (*Etrusca Disciplina*), which he endeavoured to place on a scientific footing by harmonizing its theories with the doctrines of the Stoics.**

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Chaeremon_(philosopher)

CHAEREMON, of Alexandria (1st century A.D.), Stoic philosopher and grammarian. He was superintendent of the portion of the Alexandrian library that was kept in the temple of Serapis, and as custodian and expounder of the sacred books (ἱερογραμματεύς sacred scribe) belonged to the higher ranks of the priesthood. In A.D. 49 he was summoned to Rome, with Alexander of Aegae, to become tutor to the youthful Nero.
…

Chaeremon was the chief of the party which explained the Egyptian religious system as a mere allegory of the worship of nature.

https://en.wikisource.org/wiki/The_Works_of_the_Emperor_Julian/Letters/Letter_20

But these Jews are in part god-fearing, seeing that they revere a god who is truly most powerful and most good and governs this world of sense, and, as I well know, is worshipped by us also under other names.[9] They act as is right and seemly, in my opinion, if they do not transgress the laws; but in this one thing they err in that, while reserving their deepest devotion for their own god, they do not conciliate the other gods also; but the other gods they think have been allotted to us Gentiles only, to such a pitch of folly have they been brought by their barbaric conceit.

https://archive.org/details/greeklatinauthor0002unse/page/484/mode/2up?view=theater

> But the schools of Iamblichus, Syrianus and Proclus consider him (i.e. the god worshipped by the Jews) to be the demiurge, calling him the god of the four elements.

https://en.wikisource.org/wiki/The_Works_of_the_Emperor_Julian/Against_the_Galileans#cite_ref-161

And yet, I call the gods to witness, I am one of those who avoid keeping their festivals with the Jews; but nevertheless **I revere always the God of Abraham, Isaac and Jacob;[162] who being themselves Chaldaeans, of a sacred race, skilled in theurgy, had learned the practice of circumcision while they sojourned as strangers with the Egyptians. And they revered a God who was ever gracious to me and to those who worshipped him as Abraham did, for he is a very great and powerful God, but he has nothing to do with you.** For you do not imitate Abraham by erecting altars to him, or building altars of sacrifice and worshipping him as Abraham did, with sacrificial offerings. 356. For Abraham used to sacrifice even as we Hellenes do, always and continually. And he used the method of divination from shooting stars. Probably this also is an Hellenic custom.

https://en.wikisource.org/wiki/The_Works_of_the_Emperor_Julian/Letters/Letter_51

And since I wish that you should prosper yet more, I have admonished my brother Iulus,[3] your most venerable patriarch, that the levy[4] which is said to exist among you should be prohibited, and that no one is any longer to have the power to oppress the masses of your people by such exactions; so that everywhere, during my reign, you may have security of mind, **and in the enjoyment of peace may offer more fervid prayers[5] for my reign to the Most High God, the Creator, who has deigned to crown me with his own immaculate right hand.** For it is natural that men who are distracted by any anxiety should be hampered in spirit, and should not have so much confidence in raising their hands to pray; but that those who are in all respects free from care should rejoice with their whole hearts and offer their suppliant prayers on behalf of my imperial office to Mighty God, even to him who is able to direct my reign to the noblest ends, according to my purpose. This you ought to do, **in order that, when I have successfully concluded the war with Persia, I may rebuild by my own efforts the sacred city of Jerusalem,[6] which for so many years you have longed to see inhabited, and may bring settlers there, and, together with you, may glorify the Most High God therein.**

https://en.wikisource.org/wiki/Nicene_and_Post-Nicene_Fathers:_Series_I/Volume_I/Letters_of_St._Augustin/Letters_of_St._Augustin/Chapter_16

Grecian mythology tells us, but without sufficient warrant for our believing the statement, that Mount Olympus is the dwelling-place of the gods. But we actually see the market-place of our town occupied by a crowd of beneficient deities; and we approve of this. **Who could ever be so frantic and infatuated as to deny that there is one supreme God, without beginning, without natural offspring, who is, as it were, the great and mighty Father of all? The powers of this Deity, diffused throughout the universe which He has made, we worship under many names, as we are all ignorant of His true name,** the name God[1] being common to all kinds of religious belief. Thus it comes, that while in diverse supplications we approach separately, as it were, certain parts of the Divine Being, we are seen in reality to be the worshippers of Him in whom all these parts are one.

https://www.garynorth.com/conspiracyinphiladelphia.pdf

The Framers at the Constitutional Convention issued a death warrant against Christianity, but for tactical reasons, they and their spiritual heirs refused for several generations to deliver it to the intended victims. They covered this covenantal death sentence with a lot of platitudes about the hand of Providence, the need for Morality, the grand design of the universe, and similar Masonic shibboleths. **The death sentence was officially delivered by the Fourteenth Amendment.** It has been carried out with escalating enthusiasm since the 1950s.

http://www.newadvent.org/cathen/09771a.htm#VII

Thus French Freemasonry, as the standard-bearer of all Freemasonry, pretends to inaugurate the golden era of the Masonic universal republic, comprising in Masonic brotherhood all men and all nations. "The triumph of the Galilean", said the president of the Grand Orient, Senator Delpech, on 20 September, 1902, "has lasted twenty centuries. But now he dies in his turn. **The mysterious voice, announcing (to Julian the Apostate) the death of Pan, today announces the death of the impostor God who promised an era of justice and peace to those who believe in him.** The illusion has lasted a long time. The mendacious God is now disappearing in his turn; he passes away to join in the dust of ages the divinities of India, Egypt, Greece, and Rome, who saw so many creatures prostrate before their altars. Bro. Masons, we rejoice to state that we are not without our share in this overthrow of the false prophets. The Romish Church, founded on the Galilean myth, began to decay rapidly from the very day on which the Masonic Association was established".[161]

https://www.garynorth.com/conspiracyinphiladelphia.pdf

Then came Darwinism. **We can accurately date the advent of unbelief in the United States: 1865-90.**49 With the rapid philosophical erosion of the traditional eighteenth-century worldview, the long-term covenantal basis of U.S. Constitutional law was undermined. No one has described this process better than Thomas Woodrow Wilson, Ph.D., who in 1908 wrote this of the Constitution: "**The government of the United States was constructed upon the Whig theory of political dynamics, which was a sort of unconscious copy of the Newtonian view of the universe. In our day, whenever we discuss the structure or development of anything, whether in nature or in society, we consciously or unconsciously follow Mr. Darwin; but before Mr. Darwin, they followed Newton.** Some single law, like the law of gravitation, swung each system of thought and gave it its principle of unity."50 Once we accept this view of the Constitution, there are inescapable judicial implications. Wilson spelled them out forthrightly.

> **The trouble with the theory is that government is not a machine, but a living thing. It falls, not under the theory of the universe, but under the theory of organic life. It is accountable to Darwin, not to Newton.** It is modified by its environment, necessitated by its tasks, shaped to its functions by the sheer pressure of life. **No living thing can have its organs offset against each other as checks, and live. On the contrary, its life is dependent upon their quick cooperation, their ready response to the commands of instinct or intelligence, their amicable community of purpose.** Government is not a body of blind forces; it is a body of men, with highly differentiated functions, no doubt, in our modern day of specialization, but with a common task and purpose. Their cooperation is indispensable, their warfare fatal. There can be no successful government without leadership or without the intimate, almost instinctive, coordination of the organs of life and action. This is not theory, but fact, and displays its force as fact, whatever theories may be thrown across its track. **Living political constitutions must be Darwinian in structure and in practice.**51

https://americanvision.org/6505/is-a-return-to-law-a-good-thing/

Natural law as it was constructed throughout the centuries died in 1859 with the publication of Darwin's *On the Origin of Species*. **"Charles Darwin destroyed natural law theory in biological science. … His successors destroyed natural law theory in social science. In the 1920's, quantum physics destroyed natural law theory in the subatomic world. This immediately began to undermine modern legal theory."**[2] An evolving law means a flexible law that can be manipulated by whoever's in power.

http://test.darashpress.com/articles/natural-law-summary-and-critique

Natural law is one of the more difficult subjects that a person can encounter. **Whitehead states: "The concept of natural law is one of the most confused ideas in the history of Western thought."**[1]
…

Natural law proponents consistently make four claims in regard to natural law: 1) there are unchanging principles of law that exist in "nature" (are part of the natural realm) that define for man what is right, just, and good, and which ought to govern his actions; 2) these principles of law are accessible to all men and are discovered by the right use of reason; 3) these principles of law apply to all men at all times and in all circumstances; 4) man-made laws (e.g., those promulgated by the state) are just and authoritative only insofar as they are derivable from the principles of law in nature.[2]
…

Henry summarizes the church's discussion over natural law during this period:

> **There was little debate over the ontological existence of the natural law, but there was significant debate as to the epistemological basis for perceiving the natural law.** Augustine maintained that man's fall into sin so thoroughly corrupted the *imago dei* within him that revelation and grace were necessary foundations for the right use of reason. Thomas Aquinas, on the other hand, emphasized the structures of the *imago dei* which remained intact despite the fall into sin, suggesting that grace and revelation serve as corrective supplements to the right use of reason. **While Augustine did not deny that even pagans have some concept of natural justice, he obviously placed more emphasis on the supernatural in social ethics than Aquinas.** Generally speaking, Protestant thinkers have generally been "Augustinian" and Catholic thinkers have been "Thomistic" in dealing with the natural law question.[22]

With the coming of the Reformation and a return to the Bible and Augustinianism, the place of natural law in the social ethic of the church diminished (although it retained its prominence among the Roman Catholics, as it does to this day). **Even though John Calvin taught that natural law (which he identified as "equity")**

was normative in civil law and social ethics,[23] the whole system of his theology led to an undermining of the natural law view on social ethics. Therefore, those who adhered to the Calvinistic system began to move away increasingly from natural law to a more biblical formulation of civil law, culminating in the explicit biblical law perspective of the Scottish Covenanters and English and New England Puritans.

However, the Enlightenment, with its emphasis on the power of man's reason to discover truth apart from supernatural revelation, led to a revival of natural law thinking in the Protestant church.
…

It is on the basis of what the Bible says about natural revelation that Christian thinkers have sought common ground with the Greek and Stoic concepts of natural law, and have attempted to incorporate the philosophy of natural law into Christian theology and ethics.
…

Gill describes the natural moral law given to Adam as follows:

> The natural law, or law of nature, given to Adam, was concreated with him, written on his heart, and engraved and imprinted in his nature from the beginning of his existence; by which he was acquainted with the will of his Maker, and directed to observe it; which appears from the remains of it in the hearts of all men, and even of the Gentiles; and from that natural conscience in every man, which if not by some means lulled asleep, that it does not perform its office, excuses men from blame when they do well, and accuses them, and charges them with guilt when they do ill, Rom. ii. 14, 15.[31]

There is, therefore, biblical warrant for a concept of natural law, if (and only if) one interprets that concept within the parameters of the biblical doctrine of natural revelation. Natural law, in that context, is the knowledge of God's law and of His righteous judgment as imparted to man through the activity of the mind and conscience. The natural law imprinted upon man's nature is part of the image of God in man and enables him to function as a responsible moral agent.

However, it must be recognized that this concept of natural law is radically different in its presuppositions than the Greek and Stoic notions of natural law. **The natural law of the philosophers is a theory of ethics devised by autonomous man to facilitate his rebellion against God and His law-word (Rom. 1:18-25, Ps. 2:1-3).** Thus, the attempt to reconcile the Greek concept of natural law with the biblical concept of natural revelation is an attempt to reconcile human autonomy (i.e., the sovereignty of reason) with God's sovereignty. **But the claimed autonomy of Athens cannot be reconciled with the covenantal submission of Jerusalem.** All attempts to build a Christian natural law theory on the basis of Greek and Stoic concepts of natural law lead to the introduction of human autonomy into Christian ethics.

Therefore, **Christians must not be fooled by the apparent agreement between pagan theories of natural law and the biblical concept of natural revelation** and be drawn into a natural law perspective on social and political ethics, even if it purports to be Christian.
…

This darkened, carnal, foolish mind, this defiled conscience is the means of knowing and establishing the moral law? Yes, says the theory of natural law. We say, God forbid! The objective standard of God's own infallible Word alone can suffice to reveal His moral law.

Furthermore, nature itself is under the curse (Gen. 3:17-19; Rom. 8:19-22). Nature cannot be normative, even in an unfallen world—to make it such is a form of idolatry, worshipping the creature rather than the Creator[32]—how much more in a world cursed by sin. **As Rushdoony notes: "For the Christian, however, nature is not the standard, because the world of nature is a fallen world, a world in rebellion against God and infected by sin and death. For a standard, we must look beyond nature to God."[33]**
…

Natural law may seem to suffice for those who have no higher vision than the restoration of "family values" or "traditional values" to our culture. But for those who understand the rebellious autonomy inherent in natural law theory; for those who desire to bring every sphere of life under the authority of God and His Word; for those who long to see the crown rights of Jesus Christ acknowledged by all—including presidents, governors, senators, representatives, judges, and "we the people"—natural law theory must be firmly rejected.

https://ironink.org/2023/05/is-thomistic-natural-law-legitimate-part-i/

Conscience is one of those words that has been made to carry a great deal of foreign freight. **In the philosophy of Stoicism "conscience" was made to mean the place where resides the infallible "sense of oughtness" resident in human nature.**

The Biblical concept of conscience is different from the pagan notion of Stoicism.

Interestingly enough the Hebrew OT never refers to the "conscience." There isn't even a Hebrew word for it, though there are times where the KJV will translate the Hebrew word "Heart" as "conscience" but this is an example where people were interpreting instead of translating. **No one who had the Law ever appealed to "conscience" as an inner judge for right and wrong.** It was the Torah that served as judge for right and wrong. Since Jews had the Torah they did not need a conscience.

When we come to the NT, the word "conscience" does not appear in the Gospels and is never referenced by Jesus or His disciples. In the Epistles the Greek word we use for "conscience" can simply mean to be sincere in what one says and does.

Romans 9:1 "*I am telling the truth in Christ, I am not lying, my conscience testifies with me in the Holy Spirit"*

Barclay and Nida in their commentary on Romans point out

"conscience may be variously translated depending upon the particular set of associations connected w/ certain terms or phrases – for example, "my heart," "my innermost," "that which speaks within me," or "the voice of my heart."

The conscience does not have any ontological reality. It seems often to serve as a kind of "Deus ex machina" to communicate the source of one's convictions.

Vincent's word studies give us insight into the meaning of conscience:

"In Scripture we are to view the conscience as Bishop Ellicott remarks, not in its abstract nature, but in its practical manifestations. Hence it may be weak (I Cor. 8:7, 12), unauthoritative and awakening only the feeblest emotion. It may be evil or defiled (Heb. 10:22, Tit. 1:15), through consciousness of evil practice. It may be seared (I Tim. 4:2), branded by its own testimony to evil practice, hardened and insensible to the appeal of good. OTOH, it may be pure (II Tim. 1:3), unveiled, and giving honest and clear testimony. It may be void of offense (Acts 24:16), unconscious of evil intent or act: good as here, or honorable (Heb. 13:18). The expression and the idea, in the full Christian sense, are foreign to the OT, where the testimony to the character of moral action and character is born by external revelation rather than by the inward moral consciousness."

So we see that those who teach that conscience is the place in human nature where there resides the infallible "sense of oughtness" are those who are teaching the meaning according to the ancient pagan philosophy of stoicism and not Christianity.

REGENERATION

As we seek to wrest Romans 2 away from those who teach, by way of pagan Natural Law theories, that God's Law is written on the hearts of all men, we would point to the idea of the work of Regeneration.

In all other references in Scripture to the law being written in the heart what we find is a reference to the work of regeneration.

Jer. 31:33 *"But this is the covenant which I will make with the house of Israel after those days," declares the LORD, "I will put My law within them and on their heart I will write it; and I will be their God, and they shall be My people."*

---

https://biblehub.com/nkjv/1_corinthians/6.htm

1 **If any of you has a dispute with another, do you dare to take it before the ungodly for judgment instead of before the Lord's people?** 2 **Or do you not know that the Lord's people will judge the world? And if you are to judge the world, are you not competent to judge trivial cases?** 3 **Do you not know that we will judge angels? How much more the things of this life!** 4 **Therefore, if you have disputes about such matters, do you ask for a ruling from those whose way of life is scorned in the church?** 5 **I say this to shame you. Is it possible that there is nobody among you wise enough to judge a dispute between believers?** 6 **But instead, one brother takes another to court—and this in front of unbelievers!**

https://gedsh.bethmardutho.org/entry/Ishobokht-of-Rev-Ardashir?fq=;fq-Browse:Browse;I;

Ishoʿbokht was consecrated by Cath. Ḥenanishoʿ, most likely Ḥenanishoʿ II (d. 779/80). He wrote his law book in Persian, from which language it was translated into Syriac at the instigation of Cath. Timotheos I, probably after Ishoʿbokht's death. It is divided into six books. The first is of a general and theoretical nature. Books 2 and 3 deal with matrimonial law. Book 4 is devoted to inheritance law; book 5 to donations, testaments, and obligations. Book 6 deals with the right of appeal. **Ishoʿbokht brings his knowledge of biblical law, Roman law, Persian law (and to some extent even Islamic law) together and aims at creating a unified system that would transcend local differences existing among Christians.** Ishoʿbokht is familiar with traditions that are incorporated in the Persian 'Book of thousand judgments' (*Mādīgān ī hazār dādestān*) and his work has been used by scholars of Persian-Sasanian law (Macuch). Ishoʿbokht's engagement with Zoroastrian law and customs was used by Sachau as an argument for dating him earlier than Shemʿon, from whose law book Zoroastrian doctrines and practices are largely absent (see under Shemʿon). **Dauvillier regards Ishoʿbokht as a powerful and original mind, and perhaps the best jurist of the Ch. of E.** (340).

https://archive.org/details/SeeingIslamAsOthersSawItASurveyAndEvaluationOfChristianJewishAndZoroastrianWritingsOnEarlyIslam/page/n223/mode/2up?view=theater

A ninth-century Muslim treatise, dedicated to the demonstration of God's existence and unity from the order manifest in terrestrial and celestial phenomena, cites among its sources **“a book composed in the days of the Umayyads, which Ishoʿbokht, metropolitan of Fars, put together and which he wrote in Persian.”**117
…

The legal tract of Ishoʿbokht, called simply *Maktbānūtā d-ʿal dīnē* (“Composition of the Laws”) by its Syriac translator, is a substantial work comprising six books and 82 chapters. It is not merely a collection of canons, but an attempt to systematise and codify the Christian law, and its originality prompts Ishoʿbokht proffer an explanation for his undertaking. He begins by reviewing the motives that impelled men of earlier times to write on history, metaphysics, natural science and the liberal arts, then emphasises that such factors played no part in his decision to take up his pen:120

> Rather I came to this composition for the following reasons: I have observed that there are many differences among people in the matter of laws, not only from religion from religion, from language to language and from nation to nation, **but also in one and the same religion, nation and language, as in the religion of Christianity. While the Jews in every place have one law, as also the error of the Magians and likewise also those who now rule over us, among the Christians the laws which are determined in the land of the Romans are distinct from those in the land of the Persians, and they in turn are distinct from those in the land of the Arameans, and different from Ahwaz, and different in Mayshan, and likewise also in other places.** Thus also from district to district and from city to city there are many differences in the matters of laws. **And though the religion of the Christians is one, the law is not one and the same** and we shall speak of the reason for that later. Moreover, we have learnt that in the same place the laws determined by earlier generations are other than the later generations, each man according to his knowledge and according to his wish. Because of this I desired that I assemble, as far as possible, those things which I have learnt from the tradition of the earlier generations, whether from those fathers who were in our churches or from those who were in other churches, and also what I arrive at from straight thinking, and [then] to put it in this book for the education of myself and of those who, like me, felt in need of such instruction.121

Yet it was not only his own wishes that had spurred him to write, **but also the demands of many friends and bishops similarly distraught at the heterogeneity of Christian law and who sought unity in their province at least, if it could not prevail in the whole church.** Ishoʿbokht now proceeds to discuss, “in the form of question and answer, so that it will be most clear to those reading it,” what is civil law (*dīnā*), what is rectitude (*trīṣūtā*), what is ideal law (*nāmōsā*),122 how do they differ from each other, why the civil laws are not the same for mankind, **“why when the ideal laws of the Christians are the same, their civil laws are not the same?”** The whole of the first book is devoted to such questions of jurisprudence.123

> 122. This is Ishoʿbokht's tripartite definition of law; ***nāmōsā* means the ideal principles found in the New Testament** (e.g. see Matthew v) and so is the same for all Christians (see the last question of this paragraph).

Interest in this subject is not found in pre-Islamic Christian legal writings. There are some hints of related activity by authors of the late seventh and early eighth century,124 but it is the work of Ishoʿbokht which first embarks upon a proper treatment of the matter, and so he is something of a pioneer.

> 124. The whole of catholicos George's preamble to the synod of 676 is taken up with a discussion of mankind's need for laws and the provision of them by God and the church (*Synodicon orientale*, 215-16). **Note also that the Armenian patriarch John of Ojun (718-29) became the first to codify Christian law in his country** (see Albert *et al.*, *Christianismes orientaux*, 146), **and Leo III (717-41) compiled one of the very few Byzantine legal codes, his *Ekloga*** (see Freshfield, "Official Manuals of Roman Law of the Eighth and Ninth Centuries"). Crone, "Islam, Judeo-Christianity and Byzantine Iconoclasm," 71-73, argues that Leo's *Ekloga* was a response to Islam; see also *eadem* and Cook, *Hagarism*, 180-81 n. 18.

What spurred him to this innovation is clear from the above introduction: the variations in Christian law as compared with that of Jews, Zoroastrians and Muslims ("those who now rule over us"). But he and his friends did not reach this conclusion simply by observation, rather it was pointed out to them, as we see from the heading of one of the chapters of Ishoʿbokht's first book: **"Concerning what is said by the Jews and the *ḥanpē* that the Christians have no laws and it is not possible that their lives be conducted without laws."**125 **The usual Jewish accusation had been that the Christians did not hold to the law of Moses, not specifically that they had no laws.** So the question must have

originated with the *ḥanpē*, which can here only mean the Muslims, as is evident from the occurrence of the same question in a Christian-Muslim disputation:

> **The emir then moved on to ask about the laws of the Christians, what and after what fashion were they and if they were written in the Gospel or not. … And the illustrious emir said: … "Show me that your laws are written in the Gospel and that you conduct yourselves by them, or submit to the law of the Muslims."**126

The Christian interlocutor's reply is that "we Christians have laws which are right and just and accord with the teachings and prescriptions of the Gospel, the canons of the apostles and the laws of the church." **Ishoʿbokht's response is to deny the need for civil laws, arguing that the Christian community is more virtuous than its rivals.** Simeon of Rewardashir, probably writing soon after Ishoʿbokht,127 also considers this issue. His solution is to stress the non-literary modes of transmission of Christian law: **"We have found many other things which, though they have not been handed on to us from the earlier generations in writing, they have come from them to us in their practices."**128

> 128. Simeon of Rewardashir, *Canons* "intro.," 233. Simeon wrote the introduction to his collection of 22 canons on inheritance law in reply to four questions: "Why did our Lord not confer them (ecclesiastical laws) by his own legislation, what is the reason that we do not make *dīnē* according to the *nāmōsā* of Moses, from where did we receive the legal tradition which has reached us, and how are certain special cases of laws in the practice we follow to be treated?"

https://chalcedon.edu/resources/books/the-one-and-the-many-studies-in-the-philosophy-of-order-and-ultimacy

Meanwhile, also, another threat to Christianity was reviving in the form of natural law. *The Institutes of Justinian* clearly perpetuated the Roman doctrine and transmitted it to the centuries to come.499 The universal sovereignty and government of God was restricted to the realm of grace and revelation, and nature became the universal government rather than God. This appeared clearly in a statement of Orosius: **"Among Romans, as I have said, I am a Roman; among Christians, a Christian; among men, a man. The state comes to my aid through its laws, religion, through its appeal to the conscience, and nature through its claim of universality."**500

https://en.wikisource.org/wiki/1911_Encyclopædia_Britannica/Tribonian

The first article is unquestionably meant for the jurist. It is based on Procopius, whose very words are to some extent copied, and indeed it adds nothing to what the latter tells us, except the statement that Tribonian was the son of Macedonianus, was ἀπό δικηγόρων τῶν ὑπάρχων, **and was a heathen and atheist, wholly averse to the Christian faith.**
…

The charge of heathenism we find in Suidas is probable enough; that is to say, Tribonian may well have been a crypto-pagan, like many other eminent courtiers and litterateurs of the time (including Procopius himself), a person who, while professing Christianity, was at least indifferent to its dogmas and rites, cherishing a sentimental recollection of the older and more glorious days of the empire.

> https://archive.org/details/romanlawinmoder01shergoog/page/n163/mode/2up?view=theater

> Ecclesiastically, the codification of Justinian reveals great traces of Christian influence. Justinian begins his Code by formulating an Imperial Creed on the Trinity, and by hurling Imperial anathemas against heretics. **Justinian asserted a majestic superiority over the clergy and canonical jurisdiction, although he makes the bishops Imperial judicial officers for certain matters;** for instance, the guardians of lunatics swore before the bishop on the Gospels to administer their trust with fidelity.639
>
> **But in the domain of private law, the influence of Christianity is not easy to trace, and it is to be found only by indirect methods of investigation.** By comparison and analysis of the doctrines of Roman law as they are manifested prior or subsequent to the Christian Emperors it is possible to observe the uplifting influence of Christian ethics. But "the changes in Roman law consequent upon the establishment of Christianity were more largely changes of machinery than of material, for though Christianity could not fail to have far reaching effects on the Corpus Juris Civilis, the principles of that magnificent system were well-nigh definitely settled before Christianity attained temporal supremacy."640 **Hence most of the private law of Justinian reads as if exclusively Roman and seemingly ignorant of the existence of Christianity. It contains quotations from Homer frequently, but never allusions to the sacred Christian writings.** In fact, Tribonian, who framed Justinian's great work of jurisprudence, has even incurred the suspicion of atheism: **from the Institutes of Justinian one would never easily detect the Christianity of Justinian.**

https://archive.org/details/influenceofgreek00hatc/page/168/mode/2up?view=theater

At the end of the fourth century the new state of things was formally recognized by ecclesiastical writers. Love was no more “the handbook of divine philosophy:”1 **the chief contemporary theologian of the West, Ambrose of Milan, formulated the current theory in a book which is the more important because it not merely expresses the ideas of his time and seals the proof of their prevalence, but also became the basis of the moral philosophy of the Middle Ages.** But the book is less Christian than Stoical.1 It is a *rechauffée* of the book which Cicero had compiled more than three centuries before, chiefly from Panaetius. **It is Stoical, not only in conception, but also in detail. It makes virtue the highest good. It makes the hope of the life to come a subsidiary and not a primary motive. Its ideal of life is happiness: it holds that a happy life is a life according to nature, that it is realized by virtue, and that it is capable of being realized here on earth.** Its virtues are the ancient virtues of wisdom and justice, courage and temperance. It tinges each of them with a Christian, or at least with a Theistic colouring; but the conception of each of them remains what it had been to the Greek moralists. Wisdom, for example, is Greek wisdom, with the addition that no man can be wise who is ignorant of God: justice is Greek justice, with the addition that its subsidiary form of beneficence is helped by the Christian society.

The victory of Greek ethics was complete. **While Christianity was being transformed into a system of doctrines, the Stoical jurists at the imperial court were slowly elaborating a system of personal rights. The ethics of the Sermon on the Mount, which the earliest Christian communities endeavoured to carry into practice, have been transmuted by the slow alchemy of history into the ethics of Roman law. The basis of Christian society is not Christian, but Roman and Stoical.** A fusion of the Roman conception of rights with the Stoical conception of relations involving reciprocal actions, is in possession of practically the whole field of civilized society. The transmutation is so complete that the modern question is not so much whether the ethics of the Sermon on the Mount are practicable, as whether, if practicable, they would be desirable. The socialistic theories which formulate in modern language and justify by modern conceptions such an exhortation as “Sell that thou hast and give to the poor,” meet with no less opposition within than without the Christian societies.

>
> But not one line does this funereal panegyric contain breathing an evangelic feeling, or adverting to the great principles of the Gospel! It would be wrong to speak of this elaborate composition as defective, or ambiguous, or erroneous, in relation to the leading truths of Christianity; for it touches them not even in the remotest manner. **As well say that the Phædo of Plato is wanting in evangelic perspicuity, or that Cicero, De natura deorum, does not fully express the doctrine of the thirty-nine articles. Cicero, Seneca, Epictetus, any one we may choose to name, is as evangelic as Ambrose, so far as the composition before us goes.**

https://en.wikisource.org/wiki/Nicene_and_Post-Nicene_Fathers:_Series_II/Volume_X/Works/On_the_Duties_of_the_Clergy/Book_I/Chapter_28

132. **Next they considered it consonant with justice that one should treat common, that is, public property as public, and private as private. But this is not even in accord with nature, for nature has poured forth all things for all men for common use. God has ordered all things to be produced, so that there should be food in common to all, and that the earth should be a common possession for all. Nature, therefore, has produced a common right for all, but greed has made it a right for a few. Here, too, we are told that the Stoics taught that all things which are produced on the earth are created for the use of men, but that men are born for the sake of men, so that mutually one may be of advantage to another.**[3] 133. **But whence have they got such ideas but out of the holy Scriptures?** For Moses wrote that God said: “Let us make man in our image, after our likeness, and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over every creeping thing that creepeth upon the earth.”[4] And David said: “Thou hast put all things under his feet; all sheep and oxen, yea, and the beasts of the field, the fowls of the air, and the fishes of the sea.”[5] **So these philosophers have learnt from our writings that all things were made subject to man, and, therefore, they think that all things were produced also for man’s sake.**

https://archive.org/details/pursuitofmillenn0000norm_i9m3/page/190/mode/2up?view=theater

At least by the third century A.D. Christian doctrine had assimilated from the extraordinarily influential philosophy of Stoicism the notion of an egalitarian State of Nature which was irrecoverably lost. And although it was hardly possible to talk of social and economic organization of the Garden of Eden, orthodox theologians nevertheless managed to use the Graeco-Roman myth to illustrate the dogma of the Fall.

At the centre of this theory of society stands the distinction between the State of Nature, which was based on Natural Law and expressed directly the divine intention, and the conventional state, which has grown out of and is sanctioned by custom. It was agreed by most of the later Fathers that inequality, slavery, coercive government and even private property had no part in the original intention of God and had come into being only as a result of the Fall.
…

And nevertheless it was above all the teaching of the Church which perpetuated the idea that the 'natural' society was an egalitarian one.
…

It was also to be the judgement of the secular feudal lawyers. The opinion of the famous French jurist Beaumanoir, in the thirteenth century, can be taken as representing the normal opinion of medieval thinkers: **'Although there now exist several estates of men, it is true that in the beginning all were free and of the same freedom; for everyone knows that we are all descended from one father and one mother…'**

Most curious is the way in which Catholic doctrine incorporated and conserved the idea that all things on earth ought to belong to all human beings communally. In the third century we find the stock phrases of the Stoics being repeated by St Cyprian. God's gifts, he points out, are given to all mankind. The day brings light to all, the sun shines upon all, the rain falls and the wind blows for all, the splendour of the stars and the moon are common property. Such is the impartial beneficence of God; and a man who would imitate God's justice should share all his belongings with his fellow-Christians. **By the second half of the fourth century this view had won wide acceptance amongst Christian writers.** We find St Zeno of Verona repeating the comparison, which had become a commonplace: ideally all goods ought to be in common 'like the day, the sun, the night, the rain, being born and dying – things which divine justice bestows equally on all mankind without distinction of persons.' More striking still are certain pronouncements of the great Bishop of Milan, St Ambrose, **in which the tradition once formulated by Seneca finds most vigorous expression:** 'Nature has poured forth all things for all men, to be held in common. For God commanded all things to be produced so that food should be common to all, and that the earth should be a common possession of all. Nature, therefore, created a common right, but use and habit created private right…' **In support of this view Ambrose cites, as though they were wholly concordant authorities, the Stoics and the Book of Genesis.** And elsewhere he remarks: 'The Lord God specially wanted this earth to be the common possession of all, and to provide fruits for all; but avarice produced the rights of property.'

> But the struggle against Plato, or – **to speak plainer, and for the "people" – the struggle against the ecclesiastical oppression of millenniums of Christianity (for Christianity is Platonism for the "people"),** produced in Europe a magnificent tension of soul, such as had not existed anywhere previously; with such a tensely strained bow one can now aim at the furthest goals.

>
> > [4] **Sixteen centuries ago, Ulpian drew the conclusion that, according to the "jus naturale," the elements "mare," "aer," and, at any rate, "litora," are the common property of all living things.** Isidore of Seville (see *Voigt,* p. 576), **probably founding himself on Ulpian,** reckons "communis omnium possessio et omnium una libertas, acquisitio corum quæ cœlo, terra marique capiuntur," as among the natural rights of men.

A passage glorifying the communistic state of nature, including free love, is to be found even in Gratian's *Decretum*, **the treatise which became the basic text for the study of Canon Law in all universities and which forms the first part of the *Corpus juris canonici*.** The story of how it came to be there is surely one of the strangest in the history of ideas. Pope Clement I, one of the earliest bishops of Rome, who flourished towards the end of the first century, came to be regarded after his death as a pupil of St Peter himself. The prestige which this brought to his name resulted in a great amount of apocryphal literature being fathered upon him. One of these works purported to be a narrative written by Clement to St James, describing his travels with St Peter and culminating in his 'recognition' of his parents and brothers, from whom he had been separated since childhood. Probably first written in Syria about 265 A.D., the work was given its present form about a century later. In the *Recognitions of Clement* as we possess them the father of Clement appears as a pagan with whom Peter and Clement debate and whom they finally convert. **In the course of the argument the father quotes the following opinions, which he attributes to 'Greek philosophers' – correctly enough, if only he had not then tried to father them on to Plato:**

> For the use of all things that are in this world ought to have been common to all men, but through injustice one man says this is his, and another says that is his, and so division is created amongst mortals. In short, a very wise Greek, knowing these things to be so, says that all things should be in common amongst friends. **And unquestionably amongst 'all things' spouses are included. He also says, just as the air cannot be divided up, nor the splendour of the sun, so the other**

> **things which are given in this world to be held in common by all ought not to be divided up, but really ought to be held in common.**

Some five centuries later this passage acquired an entirely new significance. About 850 A.D. the French monk known as Pseudo-Isidore (because he fathered his works upon Isidore, Archbishop of Seville) was producing spurious decretals and canons for the celebrated collection now known as the False Decretals. The collection opens with five 'Epistles of Pope Clement,' all of them apocryphal and three of them forged by Pseudo-Isidore himself. **In the fifth epistle, which is addressed to St James and the Christians of Jerusalem, Pseudo-Isidore included the passage quoted above – no longer however as the saying of a pagan but as expressing the views of Pope Clement himself. And the Pope is made to reinforce the argument by quoting *Acts* iv on the first Christian community at Jerusalem:**

> And the multitude of them that believed were of one heart and of one soul: neither said any of them that aught of the things which he possessed was his own; but they had all things common. ... Neither was there any among them that lacked; for as many as were possessors of lands and houses sold them, and brought the prices of the things that were sold, and laid them down at the apostles' feet: and distribution was made unto every man according to his need.

It was in this hybrid form, half Christian and half Stoic, that the argument was encountered by the founder of the science of Canon Law. When, about 1150, Gratian came to make his great compilation, he never questioned – any more than his contemporaries did – the genuineness of the decretals of Pseudo-Isidore. The Fifth Epistle of Clement, with its strange affirmation of anarcho-communism, was included in the *Decretum* and thereby acquired an authority which it was to keep until the sixteenth century, when it was discredited along with the rest of the False Decretals. **Gratian, it is true, attaches to the document certain comments which tend to restrict its scope; but elsewhere in the *Decretum* he makes its arguments (save in the matter of free love) unreservedly his own.** And in the later Middle Ages it became a commonplace amongst canonists and scholastics that in the first state of society, which had also been the best state, there had been no such thing as private property because all things had belonged to all people.

> G.M. This seems excellent and sacred, but the community of women is a thing too difficult to attain. **The holy Roman Clement says that wives ought to be common in accordance with the apostolic institution, and praises Plato and Socrates, who thus teach, but the Glossary interprets this community with regard to obedience. And Tertullian agrees with the Glossary, that the first Christians had everything in common except wives.**
>
> Capt. These things I know little of. **But this I saw among the inhabitants of the City of the Sun, that they did not make this exception. And they defend themselves by the opinion of Socrates, of Cato, of Plato, and of St. Clement; but, as you say, they misunderstand the opinions of these thinkers.** And the inhabitants of the solar city ascribe this to their want of education, since they are by no means learned in philosophy. **Nevertheless, they send abroad to discover the customs of nations, and the best of these they always adopt. Practice makes the women suitable for war and other duties. Thus they agree with Plato, in whom I have read these same things. The reasoning of our Cajetan does not convince me, and least of all that of Aristotle.**

>
> Several years after *City of the Sun,* Campanella wrote another work, *On the Best State,* in which he analyzes certain objections to the social concept expressed in his first book. He justifies, in particular, the communality of property by reference to the Apostolic community, and cautiously defends the communality of wives by quoting various Fathers of the Church. Especially interesting is the passage where he asserts that the possibility of such a state is confirmed by experience: "**And this, moreover, has been demonstrated by monks and lately by the Anabaptists who live in communes;** if they possessed the true dogma of the faith, they would have succeeded in this even more. Oh, were they not heretics and should they do justice as we preach it, then they would serve as an exemplar of this truth."

> There is nothing particularly Christian about Aristotelian cosmology. In fact there are points at which it cannot be reconciled with the Bible. **How did the church find itself in the position of defending Aristotelian cosmology against the new Copernican cosmology?** It found itself in that position because it accepted the argument of Aquinas that the biblical texts which contradicted Aristotle should not be pressed as the Bible was not written in technical philosophical language. Moses spoke the language of his day.

When it comes to universalism, cosmopolitanism, and humanitarianism, the most hide-bound critics are ready to feature the rôle enacted by Stoicism in "the Preparation for Christianity." But, this is not enough. Taken together, these inseparable conceptions not only foreshadowed the Evangelical outlook, but furnished it a standpoint – framework with facts. **Alexander the Great may have been a general of genius; his real importance roots in his abolition of the circumstances which divided Greek from Barbarian, Jew from Gentile, and, eventually, Roman citizen from subject alien. In the same way, Frederick II (1194-1250) may have been the "wonder of the world, in mere accomplishments the greatest prince who ever wore a crown;" his real importance roots in the impetus he gave to alignments wherein nations were to arise once more. Between the two, Stoic cosmopolitanism had free course.** The universe is a single whole, governed by a single Reason, and men are scions of a single race, bound in a single brotherhood. **Zeno's "one flock feeding in one pasture" is a vision no more when the Roman Empire, the foretaste, has been supplanted by the City of God on earth, the Church Catholic.** Plainly enough, if mankind be one, and if the world of their habitation be one, then the common unity, the overruling Power, must flow as freely through things as through souls. "I cannot find it in my heart to be angry with any *man*, for we are all made for mutual help, as the feet, the hands, the eyelids." Such was the cosmopolitanism of Marcus Aurelius. If so, then ultimately the human spirit, in its obligations and destiny alike, must revert to some universal guidance and, seeking, find it in a cosmopolitan organization. Further, with the universal Empire as theorised and supervised by Stoics at actual work in Rome, **this all-inclusive community of perfectionists was bound to take no account of race or place, but solely of its peculiar oecumenical function.** "He cannot have God for his father who has not the Church for his mother," as Cyprian (*c.* 240) was among the first to see. The Stoic City of Zeus had descended from heaven to dwell among men. **Thanks in no secondary measure to Stoic universalism, cosmopolitanism, and humanitarianism, Catholic and Roman became identical, and means were devised which transformed the lives of millions *after* the "*disappearance* of Stoicism"!** What irony! Truth to tell, Stoicism was absorbed in and, eventually, transcended by the Christian system.

https://books.google.fi/books?id=9-8fIBVgCQYC&lpg=PP1&hl=fi&pg=PA135#v=onepage&q&f=false

The Roman jurists were intensely practical in their approach to law. **Their importation of Greek dialectical reasoning in the second and first centuries B.C, although it was the first scholarly inroad into Roman law, was not the intermarriage of Roman law with Greek philosophy that took place over a thousand years later in the universities of western Europe.** The Roman jurists refused to adopt the Hellenistic system of education; legal training continued to consist chiefly of very informal, individual apprenticeship in the house of an older practitioner. "The [Roman] jurisconsults did not discuss with their pupils basic conceptions like justice, law, or legal science, though to the Greeks these seemed problems of the highest, nay almost of sole importance. The student was plunged straight into practice, where he was faced with the everrecurrent question: What, on the facts stated, ought to be done?"25 Nevertheless, it was in this period – **before the great flowering of so-called classical Roman law in the first to third centuries A.D.** – that jurists first attempted systematically to classify Roman law into its various kinds (genera and species) and with precision to define general rules applicable to specific cases.
...

Subsequently, **in the classical and postclassical periods (first to fifth centuries A.D.),** the Roman jurists refined and developed the dialectical techniques that had been applied by their republican predecessors, without changing them fundamentally. There was a tendency to toward somewhat greater abstraction. In the first part of the second century they began to speak expressly of "rules" (*regulae*) and not only of "definitions."
...

Indeed, the entire Title 50.17 of the Digest must have demonstrated beyond a doubt to the Roman lawyers of Justinian's time the validity of the famous rule of Javolenus, also contained in Title 50.17, **"All rules [*definitiones*] in civil law are dangerous, for they are almost always capable of being distorted." (That, too, was probably aimed at a specific definition.)**38

The classical and postclassical Roman jurists thought of a legal rule as a generalization of the common elements of decisions in a restricted, specified class of cases. Only by thus limiting the scope of legal rules did they hope to achieve their objective of using Greek methods of classification and generalization as a rational basis for deciding cases. **The Greeks had never attempted any such rationalization of legal decisions and rules; for them dialectical reasoning was a technique for deriving valid philosophical conclusions – "propositions" – from agreed premises. The Romans converted the Greek dialectic from an art of discovery to an art of judging.**

It is important to distinguish Roman legal casuistry from the legal casuistry of the western European jurists of the eleventh and twelfth centuries and thereafter, as well as from the case method of analysis practiced by English and American common lawyers to this day. On the one hand, the Romans did not use cases in in order to illustrate principles or test them by going back a step, so to speak, in order to see their applications. On the other hand, they reduced their cases to bare holdings, without treating them in their fullness – without discussion of ambiguities or gaps in their fact situations, or alternative formulations of the legal issues involved.39 **Max Weber undoubtedly went too far when he referred to the classical Roman jurists' use of rules as a "merely paratactic and visual association of the analogy."**40 Yet their failure to articulate the assumptions and deeper reasons on which the analogies were founded – indeed, their failure even to define the most important legal terms41 – led to a narrowness, or woodenness, in case analysis; and this was just what the Roman jurists wanted! **When Cicero argued for a more complex systematization of the law, with clear definitions and abstract legal rules, the jurists "answered these strictures by polite silence."**42 They had no reason to try to transform the Roman genius for consistent adjudication into a philosophical system. **They had every reason to be suspicious of the applicability of the higher ranges of Greek philosophy to the practical needs of adjudication.**

The western European jurists of the eleventh and twelfth centuries carried the Greek dialectic to a much higher level of abstraction. They attempted to systematize the rules into an integrated whole – not merely to define elements common to particular species of cases but also to synthesize the rules into principles and the principles themselves into an entire system, a body of law or corpus juris.

One of the techniques the scholastic jurists used to achieve this objective was to treat the Roman *regulae*, found in Title 50.17 of the Digest and elsewhere, as legal "maxims," that is, as independent principles of universal validity. **The word "maxim" was drawn from Aristotelian terminology; it referred to a "maximum proposition," that is, a "universal."**

https://archive.org/details/in.ernet.dli.2015.103687/page/n149/mode/2up?view=theater

Lecky writes: "In no respect is the greatness of the Stoic philosophers more conspicuous than in the contrast between the gigantic steps of legal reform made in a few years under their influence, and the almost insignificant steps taken when Christianity had obtained an ascendancy in the empire, not to speak of the long period of decrepitude that followed."32 However this may be, one must remember that, when the first onset of the Renaissance (*c.* 1050-1350) manifested itself, at Pavia, Ravenna, and Bologna, **in renewed study of Roman law, Stoic principles were read in the light of Christian problems, theological and political.**
...

In short, a movement has started bound to gravitate toward the *dictum* of Suarez (1569-1619), *Lex injusta non est lex*. With this, a door is opened wide to political casuistry. 'Natural law' takes rank – almost precedence – as an *a priori* source, warranting contrary interpretations of disputable cases. In point of fact, a tendency ensued to erect two abstractions: on the one hand, a *Jus Naturale* or *Lex Naturalis* whereby men share in the moral order of the universe deducible by unaided 'natural reason': on the other, a *Jus Divinum*, revealed to humanity with supernatural intent, to wit, the preservation of the *absolutely* valuable single soul to immortal life. **When the former is subordinated to the latter, and by an authoritative organization, all may go well. But, when Cynic rationalism, guiltless of revealed sanctions, returns to magnify the former, the 'unwritten' law may justify any abrogations and in any interest.** "Universal consent is the voice of nature," as Cicero said; but, consent about what? Allow an ideal of excellence to penetrate practical politics, and you have adopted an ethical conception in semi-legal guise which may lead very far afield. **Thus, going behind the attitude of the Roman jurisconsults, the legal renaissance of the eleventh century hinted the possibility of a code superior to, and therefore capable of abrogating, man-made laws.** So long as "divine law" interpreted by the Church Universal remained powerful, tangential novelties were stayed. But, with the disintegration accompanying the Renaissance and Reformation, **the Stoic doctrine might presage anything, from 'national' rights to counsels of political despair. The 'modern' world was to furnish many examples.**

https://archive.org/details/historyofenglish01polluoft/page/22/mode/2up?view=theater

As to the Digest, during some four hundred years its mere existence seems to have been almost unknown. It barely escaped with its life. When men spoke of 'the pandects' they meant the bible.2 The romantic fable of the capture of an unique copy at the siege of Amalfi in 1135 has long been disproved; **but, if some small fragments be neglected, all the extant manuscripts are said to derive from two copies, one now lost, the other the famous Florentina written, we are told, by Greek hands in the sixth or seventh century.** In the eleventh the revival began. **In 1038 Conrad**

II., the emperor whom Cnut saw crowned, ordained that Roman law should be once more the territorial law of the city of Rome.3 **In 1076 the Digest was cited in the judgment of a Tuscan court.**4 Then, about 1100, Irnerius was teaching at Bologna.5

> 4. Ficker, Forschungen, iii. 126; iv. 99; Conrat, op. cit. 67. **Apparently the most industrious research has failed to prove that between 603 and 1076 any one cited the Digest. The bare fact that Justinian had issued such a book seems to have vanished from memory.** Conrat, op. cit. i. 69.
>
> https://biblehub.com/2_kings/22-8.htm
>
> **Then Hilkiah the high priest said to Shaphan the scribe, "I have found the Book of the Law in the house of the LORD." And Hilkiah gave the book to Shaphan, and he read it.**

Here, again, there is room for controversy. It is said that he was not self-taught; it is said that neither his theme nor his method was quite new; it is said that he had a predecessor at Bologna, one Pepo by name. All this may be true and is probable enough: and yet undoubtedly he was soon regarded as the founder of the school which was teaching Roman law to an intently listening world. **We with our many sciences can hardly comprehend the size of this event. The monarchy of theology over the intellectual world was disputed. A lay science claimed its rights, its share of men's attention.** It was a science of civil life to be found in the human, heathen Digest.1

> 1. Esmein, op. cit. 347: 'Une science nouvelle naquit, **indépendante et laïque,** la science de la société civile, telle que l'avaient dégagée les Romains, et qui pouvait passer pour le chef-d'oeuvre de la sagesse humaine... Il en résulta qu'à côté du théologien se plaça le légiste qui avait, comme lui, ses principes et ses textes, et qui lui disputa la direction des esprits avides de savoir.' It is only by slow degrees that the Digest comes by its rights. **Throughout the middle ages the Code appears, as Justinian intended that it should appear, as the prominent book:** it contains the new law.

A new force had begun to play and sooner or later every body of law in western Europe felt it. **The challenged church answered with Gratian's Decretum (circ. 1139) and the Decretals of Gregory IX. (1234).** The canonist emulated the civilian and for a long while maintained in the field of jurisprudence what seemed to be an equal combat. Unequal is was in truth. The Decretum is sad stuff when set beside the Digest and the study of Roman law never dies.

https://archive.org/details/historyofinquisi01leah/page/58/mode/2up?view=theater

Even more menacing to the Church was the revival of the Civil Law. Whether or not this was caused by the discovery of the Pandects of Amalfi, the ardor with which it came, by the middle of the twelfth century, to be studied in all the great centres of learning is incontestable, and men found, to their surprise, that there was a system of jurisprudence of wonderful symmetry and subtle adjustment of right, **immeasurably superior to the clumsy and confused canon law and the barbarous feudal customs,** while drawing its authority from immutable justice as represented by the sovereign, and not from canon or decretal, from pope or council, or even from Holy Writ. **The clearsightedness of St. Bernard was not in fault when, as early as 1149, he recognized the danger to the Church, and complained that the courts rang with the laws of Justinian rather than with those of God.***

> https://www.poetryintranslation.com/PITBR/Italian/DantPar8to14.php#anchor_Toc64099868
>
> **So the Gospels and the Great Doctors are neglected, and only the Decretals, the law-books are studied, as can be seen by their margins.** On that, the Pope and Cardinals are intent: their thoughts do not stray to Nazareth, where Gabriel's wings unfolded.

https://archive.org/details/historyofenglish01polluoft/page/110/mode/2up?view=theater

But we must add that in any case the middle of the twelfth century would have been critical. Even had Harold held his own, had his sons and grandsons succeeded him as peaceful and conservative English kings, their rule must have come into contact with the claims of the cosmopolitan but Roman church, and must have been influenced, if only in the way of repulsion, by the growth of the civil and canon law. **Of all the centuries the twelfth is the most legal. In no other age, since the classical days of Roman law, has so large a part of the sum total of intellectual endeavour been devoted to jurisprudence.**

We have told above how Irnerius taught at Bologna.1 Very soon a school had formed itself around his successors. The fame of 'the four doctors,' Bulgarus, Martinus, Jacobus, Hugo, had gone out into all lands; the works of Placentinus were copied at Peterborough. **From every corner of Western Europe students flocked to Italy. It was as if a new gospel had been revealed. Before the end of the**

century complaints were loud that theology was neglected, that the liberal arts were despised, that Seius and Titius had driven Aristotle and Plato from the schools, that men would learn law and nothing but law.1 This enthusiasm for the new learning was not soon spent; it was not spent until in the middle of the thirteenth century Accursius had summed up its results in the *Glossa Ordinaria* **and Azo of Bologna had taught Bracton what a law-book should be.**

https://en.wikipedia.org/wiki/Frederick_I,_Holy_Roman_Emperor#Frederick_and_the_Justinian_code

The historian Norman Cantor described Corpus Iuris Civilis (Justinian Body of Civil Law) as "the greatest legal code ever devised".[102] **It envisaged the law of the state as a reflection of natural moral law (as seen by the men of the Justinian system), the principle of rationality in the universe.** By the time Frederick assumed the throne, this legal system was well established on both sides of the Alps. **He was the first to utilize the availability of the new professional class of lawyers.** The Civil Law allowed Frederick to use these lawyers to administer his kingdom in a logical and consistent manner. It also provided a framework to legitimize his claim to the right to rule both Germany and northern Italy. **In the old days of Henry V and Henry VI, the claim of divine right of kings had been severely undermined by the Investiture controversy. The Church had won that argument in the common man's mind. There was no divine right for the German king to also control the church by naming both bishops and popes. The institution of the Justinian code was used, perhaps unscrupulously, by Frederick to lay claim to divine powers.**[103]

In Germany, Frederick was a political realist, taking what he could and leaving the rest. In Italy, he tended to be a romantic reactionary, reveling in the antiquarian spirit of the age, exemplified by a revival of classical studies and Roman law. **It was through the use of the restored Justinian code that Frederick came to view himself as a new Roman emperor.**[104] **Roman law gave a rational purpose for the existence of Frederick and his imperial ambitions. It was a counterweight to the claims of the Church to have authority because of divine revelation. The Church was opposed to Frederick for ideological reasons, not the least of which was the humanist nature found in the revival of the old Roman legal system.**[105] When Pepin the Short sought to become king of the Franks in the 8th century, the church needed military protection, so Pepin found it convenient to make an ally of the pope. **Frederick, however, desired to put the pope aside and claim the crown of old Rome simply because he was in the likeness of the greatest emperors of the pre-Christian era.**

https://archive.org/details/frederickthesecо000027mbp/page/292/mode/2up?view=theater

By his organisation of the emancipated "secular" spirit Frederick II broke once and for all the spell which the Church had laid on the whole domain of the non-material as an intellectual and spiritual unity. **Even more clearly than by the state philosophy, the complete mental independence of the new State was demonstrated by the fact that the clergy ceased to play a part in the administration of Sicily, and their spiritual influence on it gradually ceased.**

The Sicilian state itself is the proof that lay education had made great strides in Frederick's century, for the Emperor was able to risk basing his whole kingdom on it. On the other hand the existing supply of educated laymen was not sufficient, and in order to be able to draw on larger numbers Frederick founded the University of Naples. In the Charter of the University Frederick stated: "We propose to rear many clever and clearsighted men, by the draught of knowledge and the seed of learning; men made eloquent by study and by the observation of just law, who will serve the God of all and will please us by the cult of Justice. ... We invite learned men to our service, men full of zeal for the study of *Jus* and *Justitia*, to whom we can entrust our administration without fear."
...

The whole state was thick-sown with lawyers. Ousting the clergy, hitherto the only representatives of education and culture, the jurists now had the entry to the Emperor's court, and the replacing of a clerical atmosphere by an emancipated secular atmosphere was pregnant with momentous change even in the highest politics. The Church had long been striving to enlist to her side the newly-awakened town-dweller. Frederick II now entered the lists, and while the Church, with the support of the mendicant orders, was successful in capturing the masses the Emperor won over the educated classes, the new intellectual aristocracy. These were usually inclined to support the Government. It was, therefore, of the greatest importance that Frederick II, recognising their vigour and their potentialities, enlisted the town lawyers in his service, gave them the widest possible scope, in administration, in his chancery work, and in his court circles, and by this means within a few years revolutionised the whole central government of Sicily and even of the Empire. The two administrations of Sicily and of the Empire were originally to be kept apart, in accordance with the agreement with Rome, but they were afterwards amalgamated.
...

The young judge next had an opportunity of entering the narrower State service as *judex* to one of the justiciars, or, later, in Northern Italy, to one of the numerous vicars, vicars general or podestas. With good fortune he might ultimately reach the office of High Court Judge. This was not the only avenue to the High

Court bench, for we know of High Court Judges who had never officiated as ordinary judges: the famous Thaddeus of Suessa, for example, a courtier and one of Frederick's intimates. It is worth noting that quite a number held the title of High Court Judge without having officiated at all. These were the *consiliarii*, the counsellors who were employed in the imperial Chancery and on diplomatic missions and formed part of the Emperor's immediate following. **This is the first time that professional lawyers figure in the permanent personnel of an Emperor's court, not merely as occasional experts.** The judges of lower degree could find many niches for themselves in the service; we find them as chamberlains, as tax collectors, as overseers of the accounts departments, as keepers of the King's treasury and in other capacities; in offices which might perfectly well have been filled by non-legal nobles or burgesses. **It is important to note how the lawyers were thrusting into posts of every sort.**
...

This penetration of the secular state by the legal spirit was only a reflection of what had already taken place within the bosom of the Church. **A knowledge of Canon Law was indispensable for every cleric of any position.** The carefully cultivated style of the notaries was also originally a product of the Church. It followed that a course of study at Naples and employment in the imperial Chancery might be the opening of a clerical career. There was the possibility of Church promotion for anyone who had mastered both laws, and if this did not offer the Chancery was a safe refuge. We have already alluded to the Emperor's efforts to secure the appointment of his notaries to vacant bishoprics. In the early days these efforts always failed, but after the second excommunication the Emperor flung aside all restraint and began to appoint Sicilian bishops of his own choice, or allow Archbishop Berard of Palermo to do so, except in cases where he preferred to keep a vacancy. **The Ottos and the Salians long ago in Germany used to rear up their private chaplains to be their future bishops, and the Chancery of the Imperial Court now served the same purpose as of old the private chapel of the Emperor. The radical innovation was that these clerical Chancery officials, never very numerous, were appointed not because they were clerics but because they were jurists, and in spite of their being clerics.** The Emperor found them in no way indispensable, and their priestly character was a matter of indifference to him, fraught with no danger. **Walter of Ocra, notary and chaplain of the Emperor, and one of his busiest officials, rose to be Sicilian Chancellor, but he was on an entirely different footing from the bishop-chancellors of earlier days: he was simply an imperial official who happened to be a cleric.** The higher clergy were still represented at Court, especially by prelates who were able to adapt themselves to the new spirit of the times. The Archbishops Berard of Palermo, and Jacob of Capua, belonged to the most intimate circle of the Emperor. Frederick had utilised the latter as collaborator in the Constitutions of Melfi, especially in those sections which dealt with the Church and the Sicilian clergy. A few other bishops were intimate with the Emperor, Archbishop Berard of Messina and Bishop Peter of Ravello. These prelates had weight in the intellectual life of the court only in so far as they accommodated themselves to the literary and mental pursuits around them. They were no longer themselves the independent purveyors of spiritual life as bishops had been wont to be. Still we must not undervalue the fact that the mental atmosphere of the Court was sufficiently catholic to give scope even to canonistic culture. It was inevitable that the University of Naples should have a number of clerical students, since all Sicilian subjects were compelled to attend it. **One of the greatest of all churchmen was a product of Naples: Thomas Aquinas, the *doctor angelicus* of the Roman Church.**

Two years after founding the University of Naples Frederick II had closed the University of Bologna on account of the fiasco of the Cremona Diet in 1226. In so doing he had a special intention of his own. **He wrote to the professors as well as to the scholars of Bologna: the last thing he wished was that learned men should suffer through the recalcitrance of the rebellious Bolognese who had joined the Lombard League. He invited them, therefore, to quit Bologna and come to Naples, "where instituted by us with much care, study flourishes ... the beauty of the neighbourhood attracts, no less than the lavish supplies of everything, and the reverend community of doctors."** This great plan of transferring to Naples the famous Law School of Bologna fell through. The Pope's intervention secured a truce with the Lombard League, and the Emperor had to retract his outlawry of Bologna and permit the reopening of the University. The scholars of Bologna made merry over the imperial University of Naples: this ambitious home of all sciences was at best an embryo, and one not likely to thrive. For it depended on the caprice of its founder, who had no obligations and whose mood might easily change. The Bolognese were not far wide of the mark. For better or worse the fate of this suddenly-founded University was linked with the fate of the Emperor and his State. When the Papal troops invaded the kingdom all study ceased in Naples, though only for a few years. In 1234 Frederick re-established the University and attracted a really excellent teaching staff. At first Roffredo of Benevento taught Civil Law; the Canon Law scholar, Bartholomew Pignatellus, the Decretals; Master Terrisius of Atina gave instruction in Arts; a Catalonian, Master Arnaldus, lectured on Aristotle's natural philosophy. The grammarian, Walter of Ascoli, was secured, and completed in Naples his great Etymological Encyclopaedia, begun in Bologna. Finally, Peter of Ireland, the teacher of Thomas Aquinas, whom his contemporaries called *gemma magistrorum et laurea morum* represented natural science.

Frederick II's severe struggles with the Church compelled certain retrenchments of study to be made at a later date, but the university was never again dissolved. After its re-establishment in 1234 its

administration was in the hands of a Justiciar of Students, so that the University enjoyed a certain independence, though it remained immediately connected with the High Court and with the imperial Chancery. Students and professors were well aware who was the determining personality; when they begged, in 1234, for the opportunity of resuming their studies, they did not appeal direct to the Emperor but to the "Master," who was even then considered as "the expounder of the sole truth for the ears of the Emperor," the High Court Judge, Piero della Vigna.
...

As Logothetes, "one who places words," this greatest Latin stylist of the Middle Ages was, both in writing and speaking, the mouthpiece of imperial thought and act, the creator of the imperial diction and the majestic utterance; **as jurist, probably the author of all the Emperor's laws;** as scholar and humanist of the first water, the counsellor and intimate, nay the friend of the Emperor. He was quite indispensable to Frederick, this master of expression, who had at his command the most telling phrase for each phase of the versatile Emperor's activity, who supplied the most convincing explanation of his master's acts, and often in so doing helped to determine the next step, whose duty it was to announce and make plausible Frederick's constant changes of front.
...

Legend ascribed the basest origin to Piero della Vigna, son of an unknown father, and an abandoned mother, who miserably supported herself and her infant by beggary. **He was, in fact, of reputable family, his father probably a town judge in Capua,** where Piero was certainly born. The boy seems to have gone to Bologna without the family approval, and to have carried on his studies in canon law and civil law amid considerable hardships. At last he addressed a petition to Archbishop Berard of Palermo. It is a testimony to both that on the strength of this one letter, so the story goes, Berard of Palermo immediately commended the petitioner to the Emperor's attention. When Frederick returned in 1221 he installed the young man as notary in his Chancery, and, recognising his outstanding ability, speedily promoted him to be High Court Judge, then Chief Notary of the Sicilian kingdom, till he finally created for him the post of Logothetes, who should actually speak for the Emperor in the High Court, as well as write for him. As High Court Judge Piero della Vigna was one of the legal Counsellors in the closest attendance on the Emperor. **In this capacity he formulated the whole body of Laws that comprised the Constitutions of 1231. So amply did he play "Tribonian to the Justinian of Sicily" that posterity inserted his name at the end of the *Liber Augustalis*.** Later, della Vigna took over the sole direction of the imperial Chancery, and his fame rested more especially on his stylistic accomplishment.
...

Piero della Vigna is the last creative writer of living Latin. It was a living language that spoke with pomp and pride and smooth-flowing magnificence from his obscure periods. Its comprehensiveness and joy in style bore within them the seeds of classic humanistic Latin. **Della Vigna's speech, a *Summa* in its own domain, exhausted every possibility of Latin-Christian linguistics in the realms of Church and Empire.**

For centuries to come, long after the Christian Roman world that had begotten them was dead, his collected letters lived on in the Chanceries of Europe as masterpieces of style, and preserved the image of that Emperor who had imposed it on his spokesman. How much in these letters is Piero della Vigna, and how much Frederick, will never be known, but the composite result dictated the style of all the other imperial secretaries. **The Capuan's elaborate and emotional forms of expression would have rung false and hollow without the living reality that underlay them, without the wide circle of the Roman Empire, and in the background the Emperor holding the pen. King Manfred's letters in della Vigna's style disclose a painful discrepancy.**

The information we crave about Piero della Vigna's personal and private life is not forthcoming, but his poems, letters and manifestos betray him as one of those highly-cultured literati whom humanism, awaking with Petrarch, later produced in numbers. Piero della Vigna was the most eminent amongst the few existing in the early thirteenth century. On the one hand he was master of the old: the formalism of the time, canon and civil law, scholastic and ancient philosophy, ancient authors and church divines, rhetoric, versifying, letter-writing. On the other hand he was zealous to face the new with an elemental fire and passion that flash from his writings. He was ready to turn his hand to anything: scholar and judge, philosopher and artist, stylist, diplomat and courtier, ambassador and go-between, even warrior when occasion demands, drawing up the lines of battle, perhaps even taking part in the fight.
...

Piero della Vigna's duties to the Naples University and to the imperial Chancery and High Court were not confined to the administration, but extended also to the personnel. For one thing, Court officials gave lectures at the University; amongst them the High Court Judge, Roffredo of Benevento, and later an imperial Court Notary, Nicolas of Rocca, who started rhetorical courses in Naples. The relation of the Chancery to the students was even more important, for the budding jurist, especially the young notary, received the groundwork of his training at the University, but the final polish at the Emperor's court. **The literary education of the favoured few was more or less directly in the hands of Piero della**

Vigna, in whose Chancery they acquired the *stilum supremum*. Piero della Vigna was in this the upholder of a tradition which lingered, not in the Court, but in his native town of Capua. For the art of style, the *ars dictandi*, had been so specially cultivated in this town that one may fairly talk of a Capuan School, the peculiar character of which was its direct reversion to late classical prose. **Piero della Vigna very possibly learnt his own skill in Capua, whereas the stylists of preceding generations had adopted the famous epistolary manner of the Roman Curia under the great Innocent. Piero della Vigna quite probably owed the Archbishop of Palermo's recommendation to the fact that the Emperor was anxious for his Chancery to attain the same distinction of style as the Curia.** Della Vigna's first petition must have displayed remarkable skill to lead to his reception in the High Court. The value which Frederick II attached to the style of his letters, and his ambition to compete in this with the Curia, would have combined with his own artistic appreciation to perceive the political significance of such unusual ability. **The Emperor had to win public opinion by his manifestos, which supplied in the Christian world the place of the ancient Forum. Epistolary art replaced the forensic eloquence of Rome and the Greek cities. People justly compared Piero della Vigna, the orator of Capua, to Cicero.**

There was at the beginning of the thirteenth century in Capua a flourishing school of written rhetoric, of which Piero della Vigna himself was a product. It was extremely significant that he established a close connection between it and the High Court and even transplanted it to the imperial Chancery. The Chancery itself thus became a school of rhetoric, the focus of the literary life of the Court. **Everything about the Emperor's Court which seems a foretaste of Humanism: the reversion to classic models; the Emperor's cult of Rome; his echo of the Caesars in formula and title, simile and metaphor, all this had its roots in the learned circles of Piero della Vigna, who were inspired on their side by the presence of a living Caesar. The two reinforced each other: Frederick II could pose as Caesar because his entourage could accept him in such a role, and he was driven to pose as Caesar because rhetorical and literary style proclaimed him such.** The same applied to his Christian attitude: for the imperial art of letter-writing sprang from the curial style which provided all the Biblical comparisons, including the comparisons with Christ. This blend of the Christian and the ancient Roman which prevails in Frederick's writing and smacks of the Renaissance, is the product of this group of stylists to whom a knowledge of the Bible was as necessary as a knowledge of the classics.
...

One prelate wrote: "Vinea was the *Petrus* on whose rock the Emperor's Church was founded when the Emperor refreshed his spirit by a meal with his disciples." They called him "the Emperor's Vicar," corresponding to the Prince of the Apostles, Peter, Vicar of Christ, and as such the "Bearer of the Keys" of this world's empire, of the Emperor's heart, a simile of which Dante later made use. Della Vigna's indirect influence on Court society was no less great. Men hummed round him as Frederick's favourite; the highest dignitaries of Church and State inquired of him the general temper of the Court, the mood of the "Dominus" or the "Caesar." They reproached him for his long silence, or for warded requests and recommendations for the Emperor, begging his support. All these letters seek to attain the lofty style of the master, and his answers often show a touch of delicate irony as he couches them in even more pompous phrase and metaphor. Piero della Vigna maintained intercourse with the law professors of Bologna for some time. **But whereas in earlier days Roman Emperors turned to Bologna to enquire the interpretation or application of a law, the doctors of Bologna now betook themselves to Frederick II to enquire from him about some enactment peculiar to Sicily, and right gladly Frederick answered them. Piero della Vigna's Constitutions of Melfi represent one of the greatest legal achievements of the century.** Commentaries on the *Liber Augustalis* began to appear almost at once, and many of the commentators were alumni of the University of Naples. Thus one creation reacted on the other.

The art of writing Latin verse was part of the school routine for students of style and rhetoric; **it was practised almost exclusively in legal stylistic circles. Secular Latin literature was a relatively late growth in Italy, and one of the earliest goliard compositions in Italy is ascribed to Piero della Vigna. It is a long satirical poem, directed against the greed of prelates and mendicant monks, and differs from the other songs of vagrant poets by its positive political importance.**
...

Certain philosophical lines of thought which were simply dubbed "Ghibelline ideas" in later times were a product of the spirit that flowed from Frederick II and his circle: **The recurrence of Nature, Reason, Necessity in certain connections, the belief in Fortune instead of Providence, the disappearance of threadbare Bible tags in favour of quotations from the classics.** Frederick's contemporaries were ripe for these things. Della Vigna's activity has shown, however, how conscious, intentional and well-thought-out was the intellectual preparation of the ground.
...

The whole imperial group was young, not only in spirit but in years, incomparably young, full-blooded and alive. Aged, aged Pope Gregory had good reason to feel afraid; he even lodged a complaint against the

excessive youthfulness of the imperial officials. **The Emperor curtly retorted that it was none of the Pope's business, and begged to call the Pope's attention to the fact that, according to the Sicilian Book of Laws, to debate about the suitability of imperial officers was sacrilege.** That was fairly cynical.

https://archive.org/details/fredericktheseco000027mbp/page/522/mode/2up?view=theater

After the second excommunication it became the fashion for the courtiers to keep up this "style" even in conversation amongst themselves. **It is noteworthy, indicating the plane on which the Emperor moved, that all their allusions are either to Caesar or to Christ, never to Charlemagne or any of the great medieval Emperors. Piero della Vigna had had the largest share in creating this figure of his master.** The vital thing was that Frederick II found spirits to praise him and recognise him: that he not only felt himself to be the emissary of God but was believed to be so by his followers.

It is Piero della Vigna and his circle of jurists, stylists and literati who supply the enduring expression of this conception. The time believed that the first and second ages of Adam and of Christ were overpast and that the third was drawing on. Piero della Vigna boldly pointed to his imperial master as the hero of the third and coming age, the ruler "whom the Great Artificer's hand created man," "into whose breast all virtues are poured, on whom the clouds rain justice and the heavens send their dew." And della Vigna praises in this last Emperor of the ancient Empire the "ideal of good," "who is free from crooked sight, who bindeth the corners of the earth and ruleth the elements, that frost is mated with fire, and wet with dry, and rough with smooth, and the pathless is wedded to him whose ways are straight."

The marriage of opposites had been from of old the token of an *aurea aetas*, a Golden Age in which strife and war shall cease: an age of peace which the Saviour-Emperor shall bring. The Logothetes, therefore, praises his master: "In his day shall the bonds of evil be loosened and with might shall security be sown: men shall beat their swords to ploughshares for the bond of peace causeth all fear to cease."
...

Della Vigna became "like unto the new Law-bearer, Moses, descending from Sinai, bringing the tables of the law from Heaven to men," or, again, "a second Joseph to whom as a true interpreter the mighty Caesar whose power the Sun and Moon admire has handed over the direction of the kingdoms of the earth. He was the Peter who bears the keys of Empire and locks what no man may open, and opens what no man again may lock." "Peter, the humble fisher, the Prince of the Apostles, who left his nets and followed God ... but this law-bearing Peter quits not his Master's side. The Galilean thrice denied his Lord ... far be it from the Capuan to deny his Master once." The trend of courtly thought is even more clearly revealed in the half serious letter which was written to Piero della Vigna. "And the Lord said: 'Peter, lovest thou me? Feed my sheep,' and thus the Lord who loveth Justice wished to build justice on this rock and give the reins of law into the hands of Peter, making you the custodian of justice. **To show this the more clearly the Lord hath placed you over against the face of him who is the President but also the Perverter of the Church, that the true vicegerent Peter may rule through Justice while the false Vicar of Christ perverts his vicegerency to the injury of many in body, goods and name.** ... If such a charge oppresses you, since you are unaccustomed to it and never sought it ... you can only answer 'Lord thou knowest that I love thee. If I can serve thy people I refuse not the service: Thy will be done.'"

This was not, as has sometimes been assumed, a serious suggestion that Piero della Vigna should be, in fact, elevated as a real Anti-Pope, but it contained the idea that the Head of the "imperial Church," the jurist hierarchy, should be in a special sense an "Anti-Pope." Below the half-serious, half-jesting flattery with which the courtier recalls the master to his lofty duties, urging: "the Pope is useless, do thou, as the true Peter, discharge his duties," we detect the lofty sense of dignity and responsibility which inspired the Court, **and the clear consciousness that the imperial hierarchy of jurist and official formed an independent spiritual order like the Pope's Church, and quite as good. Napoleon's thought: "Gown against gown, esprit de corps against esprit de corps, judge against priest," was anticipated, in other words, at Frederick's court.** To express ideas such as these was in those days only possible by using the symbols of the only spiritual kingdom then known: the Church with Christ her King.

To establish the worship of a spiritual ruler without the Church men were fain to employ the Church's methods; while to celebrate the warlike triumphs of the Emperor their thoughts leaped forthwith to the pagan Caesars. **Thus it is that the State is called the *imperialis ecclesia*, the provinces are conceived as bishops' dioceses and the purchase of office as simony.** At moments men went further and stated that the Emperor's Church, founded on Peter, was manifest whenever "the spirit of the Illustrious Emperor draws strength from a supper with his disciples.''

Giuseppe Mazzotta describes the historical Pier thusly:

> **Pier delle Vigne … was the chancellor of the empire, and he conceived the first state university in Europe, the University of Naples, because Frederick wanted a university that would prepare lawyers, diplomats, people who could go on a state mission and write papers for the state … the first lay secular school in Europe.** Pier delle Vigne was a poet, and he also compiled the so-called institutes of justice for the kingdom, all of which are inspired by the language of moderation, the idealistic language of order, and the natural law that could be used to organize the state … **he is the secterary of the emperor, a role that becomes crucial throughout the Renaissance.** He is a counselor. … Quite a figure of prestige, he views himself as, and he was, a strict collaborator of the emperor.8

The clergy had retired to their own stronghold of the canon law, while they seemed not aware of the dangerous rivals which were rising up against them. The Lawyers became thus, as it were, a new estate: they lent themselves, partly in opposition to the clergy, partly from the tendency of the Roman law, to the assertion and extension of the royal prerogative.

The hierarchy found, almost suddenly, **instead of a cowering superstitious people, awed by their superior learning,** trembling at the fulminations of their authority, a grave intellectual aristocracy, equal to themselves in profound erudition, resting on ancient written authority, appealing to the vast body of the unabrogated civil law, of which they were perfect masters, opposing to the canons of the Church canons at least of greater antiquity. The King was to the lawyers what Caesar had been to the Roman Empire, what the Pope was to the Churchmen. **Caesar was undisputed lord in his own realm, as Christ in his. The Pandects, it has been said, were the gospel of the lawyers.**1

https://archive.org/details/albigensiancrusa00stra/page/170/mode/2up?view=theater

The one escape from the growing provincialism of Languedoc was to become more French than the French and more royalist than the king. Guillaume de Nogaret, who had been a judge in the South and the become one of the chief ministers of the King Philip the Fair, offers one of the earliest and best examples of this attitude. **When Nogaret became convinced that Pope Boniface VIII was trying to subvert the authority of the king, he simply took the pope prisoner, in order, as he said, "to defend my fatherland." To justify his position, Nogaret practically had to invent French patriotism.** In excusing his actions, he spoke again and again of his *patria* – his fatherland – which was the kingdom of France.
…

But the traditions that clustered around Reims and St. Denis meant little to the men of the South. The religion of monarchy was a northern religion. Wholehearted acceptance of French domination in the South could not be based on personal loyalty to the king or on the myths of the Capetian house.
…

It was easier for Nogaret (and some of his friends) to develop the concept of an all-embracing French patriotism because they had had thorough training in Roman law. Nogaret's idea of a fatherland was full of reminiscences of Latin writers; he had even absorbed the idea that man's highest duty was to die for his fatherland. The common welfare demanded the preservation and the strengthening of the kingdom of France; anyone who threatened France was to be struck down, even if he were a pope. **It is quite possible that some of Nogaret's ancestors had been heretics. In any case, like most southerners, he had little respect for the organized Church.** He gave his full devotion to the French state, and as a result he attained a higher position than any other southerner was to hold for generations. For over ten years (1302-1313) Nogaret was one of the most influential ministers of Philip the Fair; he kept the king's confidence to the day of his death.

Pope Boniface VIII intervened, asking the King to free the Prelate. He sent Philip the Bull *Ausculta fili* [Listen to me, my son], in which he stated the doctrine of St. Gregory VII about the superiority of the Pope over temporal monarchs. **The bull was burned by the advisors of the King in his presence, and the King and his legist counselors prevented it from being circulated in France.** Instead, Flote and Nogaret wrote a false bull, which was broadly disseminated and was aimed at stimulating French nationalism and setting the people against the Pope. This fake bull was intended to fuel the slanders already being spread by the trio that Pope Boniface VIII was a heretic, simoniac, and an invalidly elected Pope. The King called a meeting of the Estates General in Paris **and Pierre Flote delivered a skillful speech against the Pope, painting him as an enemy of the Kingdom.**

http://www.newadvent.org/cathen/12004a.htm

These legists were called the *chevaliers de l'hôtel,* the *chevaliers ès lois,* the *milites regis;* they were not nobles, neither did they bear arms, but they ranked as knights. The appearance of these legists in the Government of France is one of the leading events of the reign of Philip IV. Renan explains its significance in these words: "An entirely new class of politicians, owing their fortune entirely to their own merit and personal efforts, unreservedly devoted to the king who had made them, and rivals of the Church, whose place they hoped to fill in many matters, thus appeared in the history of France, and were destined to work a profound change in the conduct of public affairs."
...

"The reign of Philip IV," writes Renan, "is the reign which contributed most to form the France of the five succeeding centuries, with its good and bad qualities. The *milites regis,* those ennobled plebeians, became the agents of all important political business; the princes of the royal blood alone remained superior to or on an equality with them; the real nobility, which elsewhere established the parliamentary governments, was excluded from participating in the public policy." Renan is right in declaring that the first act of the French magistracy was "to diminish the power of the Church *per fas et nefas*" to establish the absolutism of the king; and that such conduct was for this magistracy "an original sin."

https://archive.org/details/B-001-015-424/page/n57/mode/2up?view=theater

Such, in the very heyday of its strength, was the theory of divine sovereignty; so little favourable was it to the exercise of a boundless authority that emperors and kings, seeking Power's enlargement, could not but clash with it. Sometimes, to escape the Church's yoke, we see them advance the plea that, since their authority is immediately held from God, it is not for man to supervise their use of it (this argument rests mainly on the Bible and St. Paul's Epistle to the Romans); but more often, and to more purpose, **they have recourse to the tradition of the Roman jurists which ascribes sovereignty not to God, but—to the people!**

It is for this reason that Marsilius of Padua—an adventurer who was pushing the claims of the then uncrowned Emperor, Louis of Bavaria—and many other champions of Power besides, supplanted the postulate of divine sovereignty with that of popular sovereignty: "The supreme legislator of the human race," he asserts, "is none other than the Totality of mankind, to whom the sanctions of Law fall to be applied. ..."11 The reliance of Power on this idea to render itself absolute is very significant.12
...

The medieval champions of Power conducted their case clumsily enough. Marsilius of Padua, for instance, after postulating that the supreme legislator" was the "totality of mankind," goes on to the proposition that this authority has been conferred on the Roman people; and he reaches this triumphant conclusion: "Finally, if the Roman people has conferred legislative power on its prince, then there is no escaping the conclusion that this power belongs to the prince of the Romans"—to, in other words, Marsilius's client, Louis of Bavaria. The argument makes no attempt to conceal its lack of disinterestedness. The point of it is, as any child could see, that the multitude has been endowed with this majestic authority merely that it may pass it on, stage by stage, to a despot. In course of time, however, the selfsame dialectic will find more plausible guise in which to present itself.

https://books.google.fi/books?id=8A4ysGPJO2EC&hl=fi&pg=PA199#v=onepage&q&f=false

We look upon Gallicanism, as expressed in the four article adopted at the dictation of the government by the assembly of the French clergy, in 1682, **and which had shown itself all along from Philip the Fair, the grandson of St. Louis, which broke out in great violence with Louis XII., and his *petit concile* of five cardinals at Pisa, acted on by the *politiques* of Henry IV.,** and formulated by the great Bossuet under Louis XIV., as the most formidable as well as the most subtle enemy the church has ever had to contend with.

The essence, the real virus, so to speak, of Gallicanism is not, as so many suppose, in the assertion that the dogmatic definitions of the pope are not irreformable – though that is a grave error, in our judgment – but in the assertion of the independence of the state in the face of the spiritual order. **No doubt Bossuet's purpose in drawing up the four articles was to prevent the French government from going further and carrying away the kingdom into open heresy and schism; but the subtle secularism to which he gave his sanction, especially as sure to be practically understood and applied, is far harder to deal with than either heresy or schism, and it seems to us far more embarrassing to the church. It forbids the Catholic to be logical, to draw from his Catholic principles their proper consequences,** or to give them their legitimate application; takes away from the defences of faith its outposts, and reduces them to the bare citadel, and proves an almost insurmountable obstacle to the church in her efforts to reach and subdue the world to the law of God.
...

James I., the English Solomon, declared himself ready to accept the church, if allowed to do it on Gallican principles. Protestants have very little controversy with out-and-out Gallicanism. They feel instinctively that the Catholics who assert the independence, which means practically the supremacy, of the

secular order, and bind the pope by the canons which the church herself makes, are near enough to them; and if they are not separated from the church, it is all the better, because they can better serve the Protestant cause in her communion than they could if out of it.

> https://books.google.fi/books?id=RtHLCgAAQBAJ&lpg=PP1&pg=PA158#v=onepage&q&f=false
> **[1703]**
>
> **Everyone knows that in France people are only half-Catholic; please God that they were sufficiently Christian!** The authority of the Pope, even in ecclesiastical matters, is considered there only when they want to flatter him, in order to have him in their thrall, to oppress him one day with the others.

https://www.newadvent.org/cathen/06351a.htm

According to the Gallican theory, then, the papal primacy was limited, first, by the temporal power of princes, which, by the Divine will, was inviolable; secondly by the authority of the general council and that of the bishops, who alone could, by their assent, give to his decrees that infallible authority which, of themselves, they lacked; lastly, by the canons and customs of particular Churches, which the pope was bound to take into account when he exercised his authority.
...

Parliamentary Gallicanism, therefore, was of much wider scope than episcopal; indeed, it was often disavowed by the bishops of France, and about twenty of them condemned Pierre Pithou's book when a new edition of it was published, in 1638, by the brothers Dupuy.
...

"Of all Christian countries", says Fleury, "France has been the most careful to conserve the liberty of her Church and oppose the novelties introduced by Ultramontane canonists". **The Liberties were so called, because the innovations constituted conditions of servitude with which the popes had burdened the Church, and their legality resulted from the fact that the extension given by the popes to their own primacy was founded not upon Divine institution, but upon the false Decretals.**
...

At the opening of the fourteenth century, however, the conflict between Philip the Fair and Boniface VIII brings out the first glimmerings of the Gallican ideas. That king does not confine himself to maintaining that, as sovereign he is sole and independent master of his temporalities; he haughtily proclaims that, in virtue of the concession made by the pope, with the assent of a general council to Charlemagne and his successors, he has the right to dispose of vacant ecclesiastical benefices. **With the consent of the nobility, the Third Estate, and a great part of the clergy, he appeals in the matter from Boniface VIII to a future general council—the implication being that the council is superior to the pope.** The same ideas and others still more hostile to the Holy See reappear in the struggle of Fratricelles and Louis of Bavaria against John XXII; they are expressed by the pens of William Occam, of John of Jandun, and of Marsilius of Padua, professors in the University of Paris.
...

From Eugene IV to Leo X the popes did not cease to protest against the Pragmatic Sanction, until it was replaced by the Concordat of 1516. But, if its provisions disappeared from the laws of France, the principles it embodied for a time none the less continued to inspire the schools of theology and parliamentary jurisprudence. **Those principles even appeared at the Council of Trent, where the ambassadors, theologians, and bishops of France repeatedly championed them, notably when the questions for decision were as to whether episcopal jurisdiction comes immediately from God or through the pope, whether or not the council ought to ask confirmation of its decrees from the sovereign pontiff, etc.** Then again, it was in the name of the Liberties of the Gallican Church that a part of the clergy and the *Parlementaires* opposed the publication of that same council; and the crown decided to detach from it and publish what seemed good, in the form of ordinances emanating from the royal authority.

Nevertheless, **towards the end of the sixteenth century, the reaction against the Protestant denial of all authority to the pope and, above all, the triumph of the League had enfeebled Gallican convictions in the minds of the clergy, if not of the parliament.** But the assassination of Henry IV, which was exploited to move public opinion against Ultramontanism and the activity of Edmond Richer, syndic of the Sorbonne, brought about, at the beginning of the seventeenth century, a strong revival of Gallicanism, which was thenceforward to continue gaining in strength from day to day. **In 1663 the Sorbonne solemnly declared that it admitted no authority of the pope over the king's temporal dominion, nor his superiority to a general council, nor infallibility apart from the Church's consent.**
...

In spite of these disavowals, the Declaration of 1682 remained thenceforward the living symbol of Gallicanism, professed by the great majority of the French clergy, obligatorily defended in the faculties of theology, schools, and seminaries, guarded from the lukewarmness of French theologians and the attacks of foreigners by the inquisitorial vigilance of the French parliaments, which never failed to condemn to suppression every work that seemed hostile to the principles of the Declaration.

From France Gallicanism spread, about the middle of the eighteenth century, into the Low Countries, thanks to the works of the jurisconsult Van-Espen. Under the pseudonym of Febronius, Hontheim introduced it into Germany where it took the forms of Febronianism and Josephism. **The Council of Pistoia (1786) even tried to acclimatize it in Italy. But its diffusion was sharply arrested by the Revolution, which took away its chief support by overturning the thrones of kings. Against the Revolution that drove them out and wrecked their sees, nothing was left to the bishops of France but to link themselves closely with the Holy See.** After the Concordat of 1801—itself the most dazzling manifestation of the pope's supreme power—French Governments made some pretence of reviving, in the Organic Articles, the "Ancient Gallican Liberties" and the obligation of teaching the articles of 1682, **but ecclesiastical Gallicanism was never again resuscitated except in the form of a vague mistrust of Rome.** On the fall of Napoleon and the Bourbons, the work of Lamennais, of "L'Avenir" and other publications devoted to Roman ideas, the influence of Dom Guéranger, and the effects of religious teaching ever increasingly deprived it of its partisans. **When the Vatican Council opened, in 1869, it had in France only timid defenders.** When that council declared that the pope has in the Church the plenitude of jurisdiction in matters of faith, morals, discipline, and administration, that his decisions ex cathedra are of themselves, and without the assent of the Church, infallible and irreformable, it dealt Gallicanism a mortal blow.
...

At the beginning, its first advocates were Pierre d'Ailly and Gerson, whose somewhat daring theories, reflecting the then prevalent disorder of ideas, were to triumph in the Council of Constance. In the sixteenth century Almain and Major make but a poor figure in contrast with Torquemada and Cajetan, the leading theorists of pontifical primacy. But in the seventeenth century the Gallican doctrine takes its revenge with Richer and Launoy, who throw as much passion as science into their efforts to shake the work of Bellarmine, the most solid edifice ever raised in defence of the Church's constitution and the papal supremacy.
...

"The Gallican Liberties", Joseph de Maistre has said, "are but a fatal compact signed by the Church of France, in virtue of which she submitted to the outrages of the Parliament on condition of being allowed to pass them on to the sovereign pontiff".
...

It was Gallicanism which allowed the Jansenists condemned by popes to elude their sentences on the plea that these had not received the assent of the whole episcopate. **It was in the name of Gallicanism that the kings of France impeded the publication of the pope's instructions,** and forbade the bishops to hold provincial councils or to write against Jansenism—or at any rate, to publish charges without endorsement of the chancellor. **Bossuet himself, prevented from publishing a charge against Richard Simon, was forced to complain that they wished "to put all the bishops under the yoke in the essential matter of their ministry, which is the Faith".** Alleging the Liberties of the Gallican Church, the French Parliaments admitted *appels comme d'abus* against bishops who were guilty of condemning Jansenism, or of admitting into their Breviaries the Office of St. Gregory, sanctioned by Rome; and on the same general principle they caused pastoral letters to be burned by the common executioner, or condemned to imprisonment or exile priests whose only crime was that of refusing the sacraments and Christian burial to Jansenists in revolt against the most solemn pronouncements of the Holy See. Thanks to these "Liberties", the jurisdiction and the discipline of the Church were almost entirely in the hands of the civil power, and Fénelon gave a fair idea of them when he wrote in one of his letters: "In practice the king is more our head than the pope, in France—Liberties against the pope, servitude in relation to the king—The king's authority over the Church devolves upon the lay judges—The laity dominate the bishops". **And Fénelon had not seen the Constituent Assembly of 1790 assume, from Gallican principles, authority to demolish completely the Constitution of the Church of France. For there is not one article of that melancholy Constitution that did not find its inspiration in the writings of Gallican jurists and theologians.**

Think, preacher! Your Jesus was no better than Muhammad, Muhammad was no better than Moses, and none of these three was superior to Confucius, **though Confucius did set down a number of perfectly valid principles whereas the others talked nonsense.** But they and their ilk are mountebanks who have been mocked by thinking men, believed by the rabble, and should have been strung up by due process of law.

PRIEST: Alas, such was only too true in the case of one of the four.

DYING MAN: Yes, He who deserved it most. He was a seditious influence, an agitator, a bearer of false witness, a scoundrel, a lecher, a showman who performed crude tricks, a wicked and dangerous man. He knew exactly how to set about hoodwinking the public and was therefore eminently punishable in the type of kingdom and state of which Jerusalem was then a part. It was a very sound decision to remove Him and it is perhaps the only case in which my principles, which are incidentally very mild and tolerant, could ever admit the application of the full rigour of Themis. **I forgive all errors save those which may imperil the government under which we live; kings and their majesty are the only things that I take on trust and respect. The man who does not love his country and his King does not deserve to live.**

https://www.newadvent.org/cathen/15125a.htm

> The Revolution adopted this polemical term from the old regime: **the "Divine State", formerly personified in the prince, now found its personification in the people, becoming more "Divine" than ever as the State became more and more laic and irreligious, and, both in principle and in fact, denied any other God but itself.** In presence of this new form of the old state-worship, the "Ultramontane" is the antagonist of the atheists as much as the non-Catholic believers, if not more--**witness the Bismarckian *Kulturkampf*, of which the National Liberals rather than the orthodox Protestants were the soul.**

https://quod.lib.umich.edu/cgi/t/text/text-idx?c=ecco;cc=ecco;rgn=main;view=text;idno=004837226.0001.000

Henry VII. ever ruled by a faction, and that by the lesser faction. To give full scope to his tyrannical rapacity, he nominated for his ministers Empson and Dudley, two profligate men, **equally enabled by their knowledge in the law to pervert the forms of justice to the oppression of the innocent,** and perfectly qualified to prey upon the defenceless people.

https://web.archive.org/web/20160316234515/http://www.thomasmorestudies.org/docs/Erasmus%20to%20Ulrich%20von%20Hutten.pdf

[Thomas More] had drunk deep of Good Letters from his earliest years; and when a young man, he applied himself to the study of Greek and of philosophy; but his father was so far from encouraging him in this pursuit, that he withdrew his allowance and almost disowned him, because he thought he was deserting his hereditary study, being himself an expert professor of English Law. **For remote as that profession is from true learning, those who become masters of it have the highest rank and reputation among their countrymen; and it is difficult to find any readier way to acquire fortune and honour. Indeed a considerable part of the nobility of that island has had its origin in this profession, in which it is said that no one can be perfect, unless he has toiled at it for many years.** It was natural, that in his younger days our friend's genius, born for better things, should shrink from this study; nevertheless, after he had had a taste of the learning of the Schools, he became so conversant with it, that there was no one more eagerly consulted by suitors; **and the income that he made by it was not surpassed by any of those who did nothing else;** such was the power and quickness of his intellect.

https://books.google.fi/books?id=E2G6wM-yRmEC&lpg=PP1&hl=fi&pg=PA124#v=onepage&q&f=false

Not only does *Utopia* depict an earthly society, however virtuous its inhabitants; it is an urban society, **conceived by the son of a London lawyer and the grandson of a London baker.** The Arcadian mode, much imitated in the Renaissance, was alien to the first utopia. Though he passed a brief period in Oxford, More was very much a city man, educated in London, practicing law in the courts or listening to public lectures and sermons, often indistinguishable from each other. More's teacher Colet has established his school of humanist education at St. Paul's in the heart of London.
…

Utopia is pointedly antifeudal – there are no great baronial estates or manors; nor does it glorify a return to nature. The society is composed of families who have all tilled the soil at one time or another, **but who come back from their rural stint to dwell in the cities.** The fundamental institutions of Utopia are urban.
…

Great warrior nobles and their retainers are barbaric enemies in Utopia. The cities will manage to defend themselves with mercenaries and through the bribery and subversion of foreign courts. For the most part the heroic virtues are superfluous. The monarch depends upon civilian councillors in Utopia as in contemporary England, where ambassadors were lawyers and great clerics, not soldiers. The high valuation of learning in Utopia was not revolutionary; it was an extension of what was already taking place in the royal service of many European monarchies.16 **More was the educator of the new merchant classes who were related by birth and marriage to scholars and lawyers.**

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Guicciardini,_Francesco

His family was illustrious and noble; and his ancestors for many generations had held the highest posts of honour in the state, as may be seen in his own genealogical *Ricordi autobiografici e di famiglia* (*Op. ined.* vol. x.). After the usual education of a boy in grammar and elementary classical studies, his father, Piero, sent him to the universities of Ferrara and Padua, where he stayed until the year 1505. The death of an uncle, who had occupied the see of Cortona with great pomp, induced the young Guicciardini to hanker after an ecclesiastical career. **He already saw the scarlet of a cardinal awaiting him, and to this eminence he would assuredly have risen. His father, however, checked this ambition, declaring that, though he had five sons, he would not suffer one of them to enter the church in its then state of corruption and debasement. Guicciardini, whose motives were confessedly**

ambitious (see *Ricordi, Op. ined.* x. 68), turned his attention to law, and at the age of twenty-three was appointed by the Signoria of Florence to read the *Institutes* in public. Shortly afterwards he engaged himself in marriage to Maria, daughter of Alamanno Salviati, prompted, as he frankly tells us, by the political support which an alliance with that great family would bring him (*ib.* x. 71). **He was then practising at the bar, where he won so much distinction that the Signoria, in 1512, entrusted him with an embassy to the court of Ferdinand the Catholic.** Thus he entered on the real work of his life as a diplomatist and statesman.
…

If one single treatise of that century should be chosen to represent the spirit of the Italian people in the last phase of the Renaissance, **the historian might hesitate between the *Principe* of Machiavelli and the *Ricordi politici* of Guicciardini.** The latter is perhaps preferable to the former on the score of comprehensiveness. It is, moreover, more exactly adequate to the actual situation, for the *Principe* has a divine spark of patriotism yet lingering in the cinders of its frigid science, an idealistic enthusiasm surviving in its moral aberrations; whereas a great Italian critic of this decade has justly described the *Ricordi* as "Italian corruption codified and elevated to a rule of life."

https://archive.org/details/in.ernet.dli.2015.13326/page/n81/mode/2up?view=theater

[Alciati] was an only son, and **his father, Ambrogio, a wealthy merchant,** was a decurion (municipal magistrate or councillor) in Milan, and had acted as envoy to Venice; **his mother, Margherita, was a woman of high nobility.**
…

As Paolo Giovio (Paulus Jovius) said,1 almost in Alciati's words, the flame of knowledge was extinguished in Italy about the middle of the sixteenth century, and passed over to France and Germany.
…

His aim was to demonstrate the intrinsic significance of the Roman law, **to clear it from the spurious additions made by alien hands, to set it forth in the condition in which it left the classical jurisconsults,** and interpret its meaning and application not through the vision of subsequent glossators and commentators, but from the point of view of the time and place of its elaboration.
…

Thus he was perhaps the first of lawyers in whose writings we find purity and elegance of diction, and that marked personal note, that indefinable charm which characterizes the cultured humanist and the true artist.
…

Thus Albericus Gentilis maintained that the presumptuous humanists or Alciatists ("Alciatei," as he called them) were scarcely entitled to the name of jurists at all, and that jurists could get on well enough without devoting themselves to Greek and Latin letters.1 **However, Alciati throughout insisted on independence and culture as against the shackles of blind faith and tyrannous authority.** He emphasized that conviction based on right and adequate knowledge, and sound judgment founded on the actual materials concerned (as the ultimate data from which valid conclusions may be drawn), are of greater import than a passive acceptance of the conclusions of scholastic exegesis, and still more so than acquiescence in the accumulated opinions of commentators merely repeating each other.2 **Truth, inviolable, immutable, is alone the all-compelling authority. Though he was near to becoming a cardinal, yet he denied the large claims of the pope, and even refused to accept the Bible as finally decisive.**

The new method introduced in the sixteenth century into the science of Roman law is not the result of an isolated manifestation, but is at one with the general revolt of the human mind against the burdens of tradition and its accompanying abuses; it is part of the gradual efflorescence of the human intellect in all the regions of thought and belief. Thus it has a close affinity with the religious insurrection of Luther and Calvin, with the philosophic doubt of Descartes, with the scepticism of Rabelais and Montaigne, with the pioneer work of scholars like Scaliger and Lipsius, with the general literary revolt in Europe, with the efforts to reintroduce classical types of architecture, and with many other phenomena of a like tendency. In a word, it indicates the passing away from medievalism with its dogma and authority and stifled individuality, to modernism with its freedom, expansion of personality, and demand for the actual and real.

Already in the first of his published writings, the Commentary on the last three books of the Code, Alciati proclaims defiantly in his prefatory dedication the demands of the new method in jurisprudence, and the necessity to bring it into line with humanism. **He realizes that before him some effort had here or there been made to bring about an emancipation from the old incubus by appealing to the Corpus Iuris and taking refuge in it.**
…

Alciati did not eliminate from his consideration canon law, customary and local law, German, Lombard, French, or Italian; as an advocate he had frequent occasion to refer thereto. But when he speaks of jurisprudence he means, of course, Roman law; and in his view it would be the highest glory of a modern jurist to grasp it and expound it as forcibly and acutely as a Papinian or a Scaevola. Times and seasons, he says, come and go; but the Roman system remains in all its splendour and greatness,—as the ancients said, it is a work of the eternal gods.3 A great jurist is only a priest in the service of Justice.
…

One perusal of the Corpus Iuris itself is far more profitable than a whole life given to *interpretationes*, *repetitiones*, and *disputationes*. What would Justinian have said of the dialectical proceedings concerned, as they were, more with words than with things, more with dogmatic asseverations than with unprejudiced searching for truth?4 Return, then, to the method of Justinian if you would find your way out of the existing confusion. And again, besides going to the veritable sources, we must effect a constant alliance of the study of law with that of other relative subjects, so that the results of the latter will help to explain or reinforce, or if need be modify, the conclusions of the former. On account of the unity of knowledge and essential correlation of its branches, the subsidiary subjects in question will be numerous; but some are of especial importance, *e.g.* history, philology, literature ("bonae literae").
…

As to the glossators and commentators, Accursius, Bartolus, and their associates, not once did they even sip of non-juristic knowledge.7 True jurisprudence, indeed, necessarily embraces, or is closely related to, all other sciences: ''Haec ars ceteras omnes in se continet,"8 and so is, in a sense, pre-eminent. **The comparative method, therefore, of Alciati aims at revealing the indissoluble connection of the Corpus Iuris with the entire ancient culture,** by making systematic use of mutual illustration and exemplification; and the sound application of this method consequently demands many-sided knowledge.

https://en.wikipedia.org/wiki/%C3%89tienne_de_La_Bo%C3%A9tie

La Boétie was born in Sarlat, in the Périgord region of southwest France, in 1530 to an aristocratic family. His father was a royal official of the Périgord region **and his mother was the sister of the president of the Bordeaux Parliament (assembly of lawyers).** Orphaned at an early age, he was brought up by his uncle and namesake, the curate of Bouilbonnas, and received his law degree from the University of Orléans in 1553. His great and precocious ability earned La Boétie a royal appointment to the Bordeaux Parliament the following year, despite his being under the minimum age. There he pursued a distinguished career as judge and diplomatic negotiator until his untimely death from illness in 1563 at the age of thirty-two. La Boétie was also a distinguished poet and humanist, translating Xenophon and Plutarch, and being closely connected with the leading young
Pleiade group of poets, including Pierre de Ronsard, Jean Daurat and Jean-Antoine de Baïf.[6] La Boétie was favorable to the conciliation of Catholicism and Protestantism; "warned of the dangerous and divisive consequences of permitting two religions, which could lead to two opposed states in the same country. The most he would have allowed the Protestants was the right to worship in private, and he pointed out their own intolerance of Catholics. His policy for religious peace was one of conciliation and concord through reforms in the church that would eventually persuade the Protestants to reunite with Catholicism".[7]

https://www.lewrockwell.com/1970/01/murray-n-rothbard/overthrowing-the-state/

La Boétie's great contribution to political thought was written while he was a law student at the University of Orléans, where he imbibed the spirit of free inquiry that prevailed there.
…

The study of law in those days was an exciting enterprise, a philosophical search for truth and fundamental principles. **In the sixteenth century, writes Paul Bonnefon, "The teaching of the law was a preaching rather than an institution, a sort of search for truth, carried on by teacher and student in common, and which they feverishly undertook together, opening up an endless field for philosophic speculation."[2]** It was this kind of atmosphere in the law schools of Orléans and other leading French universities in which Calvin himself, two decades earlier, had begun to develop his ideas of Protestant Reform. [3] And it was in that kind of atmosphere, as well, that lawyers were to form one of the most important centers of Calvinist strength in France.
…

The *Discourse* was circulated in manuscript form and never published by La Boétie. One can speculate that its radical views were an important reason for the author's withholding it from publication. It achieved a considerable fame in local Périgordian intellectual circles, however. **This can be seen by the fact that Montaigne had read the essay long before he first met La Boétie as a fellow member of the Bordeaux Parlement in 1559.**

The first striking thing about the *Discourse* is the form: La Boétie's method was speculative, abstract, deductive. This contrasts with the rather narrowly legal and historical argument of the Huguenot monarchomach writers (those sectarian writers who argued for the right of subjects to resist unjust rulers) of the 1570's and 1580's, whom La Boétie resembled in his opposition to tyranny. **While the Huguenot monarchomachs, best exemplified by François Hotman's *Franco-Gallia* (1573), concentrated on grounding their arguments on real or presumed historical precedents in French laws and institutions, La Boétie's only historical examples were numerous illustrations of his general principles from classical antiquity, the very remoteness of which added to the timeless quality of his discourse.** The later Huguenot arguments against tyranny tended to be specific and concrete, rooted in actual French institutions, and therefore their conclusions and implications were limited to promoting the specific liberties against the State of various privileged orders in French society. In contrast, **the very abstraction and universality of La Boétie's thought led inexorably to radical and sweeping conclusions** on the nature of tyranny, the liberty of the people, and what needed to be done to overthrow the former and secure the latter.
...

Thus, Emile Brehier makes a point of contrasting the cynical realism of Machiavelli with the "juridical idealism" of Étienne de La Boétie.[5] **In fact, however, La Boétie's concentration on abstract reasoning and on the universal rights of the individual might better be characterized as foreshadowing the political thinking of the eighteenth century.** As J. W. Allen writes, the *Discourse* was an "essay on the natural liberty, equality and fraternity of man." The essay "gave a general support to the Huguenot pamphleteers by its insistence that natural law and natural rights justified forcible resistance to tyrannous government." **But the language of universal natural rights itself, Allen correctly adds, "served no Huguenot purpose. It served, in truth, no purpose at all at the time, though, one day, it might come to do so."[6] Or, as Harold Laski trenchantly put it: "A sense of popular right such as the friend of Montaigne depicts is, indeed, as remote from the spirit of the time as the anarchy of Herbert Spencer in an age committed to government interference."[7]**

The contrast between the proto-eighteenth-century speculative natural rights approach of La Boétie, and the narrowly legalistic and concrete-historical emphasis of the Huguenot writers who reprinted and used the *Discourse*, has been stressed by W. F. Church. **In contrast to the "legal approach" which dominated political thought in sixteenth-century France, Church writes, purely speculative treatises, so characteristic of the eighteenth century, were all but non-existent and at their rare appearances seem oddly out of place.** Church then mentions as an example of the latter La Boétie's *Discourse of Voluntary Servitude*.[8]
...

He makes clear also that this opposition is grounded on a theory of natural law and a natural right to liberty. In childhood, presumably because the rational faculties are not yet developed, we obey our parents; but when grown, we should follow our own reason, as free individuals. **As La Boétie puts it: "If we led our lives according to the ways intended by nature and the lessons taught by her, we should be intuitively obedient to our parents; later we should adopt reason as our guide and become slaves to nobody."[12]** Reason is our guide to the facts and laws of nature and to humanity's proper path, and each of us has "in our souls some native seed of reason, which, if nourished by good counsel and training, flowers into virtue, but which, on the other hand, if unable to resist the vices surrounding it, is stifled and blighted."[13] **And reason, La Boétie adds, teaches us the justice of equal liberty for all. For reason shows us that nature has, among other things, granted us the common gift of voice and speech.** Therefore, "there can be no further doubt that we are all naturally free," and hence it cannot be asserted that "nature has placed some of us in slavery."[14] Even animals, he points out, display a natural instinct to be free. **But then, what in the world "has so, denatured man that he, the only creature really born to be free, lacks the memory of his original condition and the desire to return to it?"[15]**
...

La Boétie concludes his exhortation by assuring the masses that to overthrow the tyrant they need not act, nor shed their blood. They can do so "merely by willing to be free." In short,

> Resolve to serve no more, and you are at once freed. I do not ask that you place hands upon the tyrant to topple him over, but simply that you support him no longer; then you will behold him, like a great Colossus whose pedestal has been pulled away, fall of his own weight and break in pieces.[16]

...

But while La Boétie cannot be considered an anarchist, his sweeping strictures on tyranny and the universality of his political philosophy lend themselves easily to such an expansion. All this considerably disturbed La Boétie's biographer, Paul Bonnefon, who wrote of the *Discourse*:

> **After having failed to distinguish legitimate from illicit authority, and having imprudently attacked even the principle of authority, La Boétie put forth a naive illusion. He seems to believe that man could live in a state of nature, without society and without government, and discovered that this situation would be filled with happiness for humanity.** This dream is puerile...[22]

...

After graduating from law school, Étienne de La Boétie took up an eminent career as a royal official in Bordeaux. He never published the Discourse, and as he pursued a career in faithful service of the monarch, never a hint did he express along the lines of his earlier treatise. Certainly one of the reasons for Montaigne's stout insistence on his friend's conservatism and monarchical loyalty is that La Boétie had changed his political views by the time they met around 1559. **Indeed, in late 1562, shortly before he died, La Boétie wrote but did not publish a manuscript forgotten and lost until recent years, in which he, with moderate conservatism, advised the State to punish Protestant leaders as rebels, to enforce Catholicism upon France, but also to reform the abuses of the Church moderately and respectably by the agency of the king and his Parlements.** Protestants would then be forced to convert back to Catholicism or leave the country.[55]

https://archive.org/details/romanlawinmoder01shergoog/page/n265/mode/2up?view=theater

Legal instruction in France during the 16th century was marked with a scientific clearness and breadth unknown since the days of the classical Roman jurisconsults.55 This is the era of the so-called Humanists, the French historical school of jurisprudence.
…

And yet, although the Humanists were highly philosophical and systematic in considering and studying Roman law in connection with Roman literature and history, **they still lacked the fundamental idea of the modern historical school founded by Savigny—namely that law is the product of the entire history of a people, an evolution by organic growth.**57

Influenced by the Renaissance, the Humanists aimed to revive and introduce a better knowledge of Roman law for the practical purpose of ameliorating French law and judicial administration.58 The founder of the Humanist school of jurisprudence was the renowned Alciat.59 The greatest of all the Humanists was the very famous Cujas,60 who lived during the same century.

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Cujas,_Jacques

CUJAS (or CUJACIUS), JACQUES (or as he called himself, JACQUES DE CUJAS) (1520-1590), French jurisconsult, was born at Toulouse, **where his father, whose name was Cujaus, was a fuller. Having taught himself Latin and Greek, he studied law under Arnoul Ferrier, then professor at Toulouse, and rapidly gained a great reputation as a lecturer on Justinian.**
…

Recalled to Bourges at the death of Duaren in 1559, he remained there till 1567, when he returned to Valence. There he gained a European reputation, and collected students from all parts of the continent, among whom were Joseph Scaliger and de Thou.
…

In the religious wars which filled all the thoughts of his contemporaries he steadily refused to take any part. *Nihil hoc ad edictum praetoris*, "this has nothing to do with the edict of the praetor," was his usual answer to those who spoke to him on the subject. His surpassing merit as a jurisconsult consisted in the fact that he turned from the ignorant commentators on Roman law to the Roman law itself. He consulted a very large number of manuscripts, of which he had collected more than 500 in his own library; but, unfortunately, he left orders in his will that his library should be divided among a number of purchasers, and his collection was thus scattered, and in great part lost. His emendations, of which a large number were published under the title of *Animadversiones et observationes*, were not confined to lawbooks, but extended to many of the Latin and Greek classical authors. **In jurisprudence his study was far from being devoted solely to Justinian; he recovered and gave to the world a part of the Theodosian Code, with explanations; and he procured the manuscript of the *Basilica*, a Greek abridgment of Justinian,** afterwards published by Fabrot (see BASILICA).

https://archive.org/details/in.ernet.dli.2015.13326/page/n117/mode/2up?view=theater

In his hands, therefore, the *Corpus Juris* was not treated as a homogeneous body of laws (for such it had been frequently assumed before him), but a complex mass which could not well be understood without decomposing it again and examining all its parts. It was his bold design to re-create what Tribonian, that versatile and remarkable minister of Justinian, had altered or consigned to oblivion, to restore the purity of Roman traditions which had been adulterated by the pretentious barbarism of Byzantium, to resuscitate the work of the classical jurisconsults by uniting scattered fragments, to set forth the very principles of Roman jurisprudence as they had been in the minds of those who conceived them, to show the magnificent Roman heritage in its most favourable, that is, in its true, light. Cujas brought to bear on his work the disinterested judicial view of an historian, the imagination of a creative artist, and the exact learning of a scholar.
…

In pursuance of his design he inquired into and annotated the *Regulae* of Ulpian, the *Sententiae* of Paul; he wrote a commentary on Africanus; and restored the work of Papinian, that profound legal genius and victim of Caracalla. This supreme jurist's works had reached us only in mutilated fragments; but Cujas applied himself to these sacred remains, and with diligence and penetration brought them to life, and extracted their secret, hitherto unascertained.
…

In some quarters the methods of Cujas met with strong opposition — for it is to be remembered that the Roman law found a hardy opponent in the customary law, which had powerful adherents and advocates. **The old maxim, ''coutume passe droit'' (*i.e.* Roman law), was often emphasized. Indeed, in the university of Paris the teaching of the civil law had by ordinance been for a considerable time forbidden,** and, as we have seen, it was partially revived by way of a special favour to Cujas.
…

And so the work of Cujas served as an authoritative appeal and powerful inspiration to successive ages, until it was in a large measure finally embodied in the French Civil Code, which has still more assured it perennial vitality.

https://archive.org/details/in.ernet.dli.2015.13326/page/n107/mode/2up?view=theater

Cujas, however, did not assume such an uncompromising or decisive attitude towards religion. **He perhaps belonged, with Erasmus and Montaigne, to that party which was characterized by a mild scepticism or by the broadest toleration, and detested fanaticism of any kind.** This point of view was not due to lack of courage or vacillation; when necessity arose, he was ready to risk his life rather than surrender his convictions to the seditious clamours of a threatening crowd of leaguers. **He practised Catholicism, but it is significant that in his will he made no declaration in its favour, forbade the sale of his books to the Jesuits, and recommended his wife and daughter simply to abide by the precepts of the Holy Scripture.** It was thought that he had openly embraced the reformed faith, for we find Hotman accusing him of deserting it again. However, **in his discussions, whenever legal matters were confronted by religious arguments, he was wont to observe: "Nihil hoc ad edictum praetoris," and thus constantly emphasized that the spheres of law and religion were separate, affirmed the secular character of jurisprudence, and declared that it could no longer be the humble servant of theology.**

https://archive.org/details/enlightenmentcon0000isra/page/364/mode/2up?view=theater

Hence Voltaire's unbending maxim that 'if God did not exist, it would be necessary to invent him,' though this was actually an old topos in French thought, **Bayle attributing to Bodin the remark that if God did not exist the interest of the human race would require men to be ignorant of this truth, 'et qu'ils se persuadassent le contraire.'**102

https://www.newadvent.org/cathen/02609a.htm

Bodin represents a reaction against Machiavelli in the field of moral and political science. **Unlike Cujas and the "Romanist" jurisconsults, who confined themselves to the observation of Greek and Roman antiquity, he drew upon the modern history of Germany, England, Spain, and Italy.** His theory of the influence of climates foreshadows that of Montesquieu. Bodin collects carefully numerous small facts, definite and concrete information; daily experience and the observation of current events are the sources of his almost "scientific" researches concerning the laws of political life. It is somewhat surprising to note that as early as 1580 this thoughtful writer wrote a work (La Démonomanie des Sorciers) to demonstrate the existence of sorcerers and the legality of their condemnation, **on the basis of "experience" and respect for *res judicatae* or the reliability of the courts.** This belief in witchcraft rests on the same arguments as his theory of civil government.

In 1576 this somewhat puzzling man was chosen a deputy of the Third Estate (*tiers état*) to the States-General of Blois where he championed the cause of the Reformers, thereby incurring the royal displeasure. **Fourteen years later (1590) as Attorney-General at Laon, he sided with the "Ligue", persuaded the citizens to do likewise, and finally went over to Henry IV.** This superstitious believer in sorcery left in manuscript a work known as "Colloquium Heptaplomeres" which propounds a certain rationalistic spiritualism. Though a civil magistrate and a partisan of the Ligue, his writings exhibit him as one of the earliest advocates of the theory of religious toleration. Brunetière assigns Bodin a place in French literature beside Henri Estienne and Amyot; **at a time when men looked to antiquity for guidance only in the domain of good taste, all three showed that from the same source could be drawn lessons in history, politics, and morality.**

Though Bodin never abandoned the Catholic religion, and was buried in the Franciscan Church at Laon, **his writings often betray an un-Catholic temper, when they are not more or less openly hostile to the existing ecclesiastical order. In religion he inclines to an abstract theism.** In keeping with the Gallican legists of France he champions the absolute supremacy of the State, though he bases it on the Divine will and the natural law; his ideal prince is not an impious and unjust ruler of the Machiavelli type. **All the works of**

Bodin were placed on the Index in 1628; the edition of 1900 continues the prohibition of his "Universae naturae theatrum".

https://iep.utm.edu/bodin/

Bodin joined the Carmelite brotherhood at an early age. Surviving documents tell us that he was released from his vows a few years later. He is known to have studied, and later, taught law at the University of Toulouse during the 1550s. Bodin was unable to obtain a professorship at the university, and this may have driven him away from Toulouse and academic life.
…

He was at the very heart of French political power in the 1570s – first during the reign of Charles IX and also, after Charles' death in 1574, during the reign of his brother, Henri III. **In 1576, Bodin lost the favor of King Henri III after he opposed, among other things, the king's fiscal policies during the States General of Blois where Bodin served as representative for the third estate of Vermandois.**
…

Bodin writes that there are four kinds of interpreters of law. The most skilled among them are those who are

> …trained not only by precepts and forensic practice but also in the finest arts and the most stable philosophy, **who grasp the nature of justice, not changeable according to the wishes of men, but laid down by eternal law; who determine skillfully the standards of equity; who trace the origins of jurisprudence from ultimate principles;** who pass on carefully the knowledge of all antiquity; who, of course, know the power and the dominion of the emperor, the senate, the people, and the magistrates of the Romans; **who bring to the interpretation of legislation the discussion of philosophers about laws and state;** who know well the Greek and Latin languages, in which the statutes are set forth; who at length circumscribe the entire division of learning within its limits, classify into types, divide into parts, point out with words, and illustrate with examples. (Bodin 1945, 4-6)

…

Bodin is recognized today as one of the earliest advocates of the abolition of slavery. For him, slavery was a universal phenomenon in the sense that slaves exist in all parts of the world, and slavery was widely accepted by the *droit des gens*. **Bodin writes that there are difficulties concerning slavery that have never been resolved.** He wishes to answer the following question: "Is slavery natural and useful, or contrary to nature?"

Bodin opposes Aristotle's opinion (*Politics* 1254a) according to which slavery is something natural – some people are born to govern and command, while it is the role of others to serve and obey. Bodin admits that "there is certain plausibility in the argument that slavery is natural and useful in the commonwealth." After all, Bodin continues, the institution of slavery has existed in all commonwealths, and in all ages wise and good men have owned slaves. But if we are to consider the question according to commonly received opinions, thus allowing ourselves to be less concerned with philosophical arguments, we will soon understand that slavery is unnatural and contrary to human dignity.

Bodin's opposition to slavery is manifold. First of all, he considers slavery in most cases to be unnatural, as the following passage attests: **"I confesse that servitude is well agreeing unto nature, when a strong man, rich and ignorant, yeeldeth his obedience and service unto a wise, discreet and feeble poore man: <u>but for wise men to serve fools, men of understanding to serve the ignorant, and the good to serve the bad; what can bee more contrarie unto nature?</u>"** (Bodin 1962, 34) Secondly, slavery is an affront to religion since the law of God forbids making any man a slave against their good will and consent. Thirdly, slavery is against human dignity, because of the countless indescribable humiliations that slaves have been forced to suffer. **According to one interpretation, Bodin's opposition to slavery must above all be understood within the context of his opinions concerning the commonwealth in that slavery poses a permanent threat to the stability of the state.** Bodin relies on a historical narrative to prove that slavery is incompatible with a stable commonwealth (Herrel 1994, 56). Thus, in the following passage, he states:

> Wherefore seeing it is proved by the examples of so many worlds of years, so many inconveniences of rebellions, servile warres, conspiracies eversions and changes to have happened unto Commonweals by slaves; so many murthers, cruelties, and detestable villanies to have bene committed upon the persons of slaves by their lords and masters: who can doubt to affirme it to be a thing most pernitious and daungerous to have brought them into a Commonweale; or having cast them off, to receive them againe? (Bodin 1962, 44)

…

Like many of his contemporaries, Bodin held that the levying of new taxes without consent was a violation of the property rights of the individual, and, as such, contrary to the law of God and nature. He was particularly firm in opposing new taxation without proper consent and sought confirmation for his opinion in French and European history. One of the main differences between a legitimate ruler and an illegitimate one concerns the question of how each treats the private property of their subjects.
…

The matter of true religion is discussed in the final three books of the *Colloquium heptaplomeres*. **True religion, Bodin holds, is tolerant of all religions, and accepts different ways to approach God. Leathers Kuntz has observed that "no religion is true whose point of view is not universal, whose expression is not free, whose center does not reflect the intimate harmony of God and nature"** (Bodin 2008, xliii). The same opinion is expressed in the *Démonomanie* and in Bodin's letter to one Jean Bautru des Matras, an advocate working in Paris.
…

Leathers Kuntz has detected three stages in the development of Bodin's religious thinking. She has argued that Bodin's religious views became more liberal as he grew older (Bodin 2008, xliii-xliv). In 1559, when he wrote the *Discours au Senate et au peuple de Toulouse*, **Bodin held that people should be brought up publicly in one religion. This he considered as an indispensable element in the cohesiveness of the state.** Religious unity should be preserved, and religion should not be debated, since disputations damage religion and cast doubt upon it. When writing the *République*, Bodin's main concern was the political stability of the French state. He considered religion to provide for the unity of the state, and as supporting the king's power. Furthermore, religion strengthened the subjects' obedience toward their sovereign prince and their respect for the execution of laws. **Uniformity of worship must be enforced within the commonwealth when it is possible, but tolerance should become the norm when religious minorities become influential enough to no longer be repressed.** The final and most liberal stage of Bodin's religious opinions becomes most apparent in the *Colloquium heptaplomeres*, "in which his religious opinions seem to have developed into a kind of theism which leaves each man's religion, provided he has some, to his own personal conscience" (ibid.).
…

Although Bodin's understanding of true religion as something profoundly personal, for which no church was required, made him an unorthodox believer in the eyes of many, it seems inconceivable that he should be considered an atheist (Bodin 2008, xxix). In fact, he considered atheism to be extremely dangerous to the commonwealth, as the following passage from the *République* (4, VII), discussing the difference between atheism and superstition, proves:

> And truely they (in mine opinion) offend much, which thinke that the same punishment is to be appointed for them that make many gods, and them that would have none at all: or that the infinitie of gods admitted, the almightie and everliving God is thereby taken away. **For that superstition how great soever it be, doth yet hold men in feare and awe, both of the laws and of the magistrats;** as also in mutuall duties and offices one of them towards another: whereas mere Atheisme doth utterly root out of mens minds all the feare of doing evill. (Bodin 1962, 539)

…

According to Bodin, law is divided into two categories: natural (*ius naturale*) and human (*ius humanum*). **Bodin thus rejects the common threefold division based on the *Digest* – natural law, law of peoples and civil law** – because he considers dichotomy more convenient. The two principal divisions of human law are *ius civile* (civil law) and *ius gentium* (law of peoples). **Bodin strongly criticizes law professors, or Romanists, for he writes that they have concentrated almost exclusively on *ius civile* – particularly the civil law of the Romans – and that, as a consequence, the *ius gentium* has not been properly studied, and, therefore, has no proper methodology. Bodin's personal interest lies precisely in the *ius gentium* because it is concerned with the universal laws that are common to all peoples.** The methods of the Romanists are inadequate for the study of *ius gentium* because the *ius civile* varies from state to state and no universally valid truths can be derived from it; in this sense it is not even part of legal science. A new critical method is therefore required; a method that is both historical and comparative.

Bodin's system of universal law is a drastic rupture with the exegetical methods of the Middle Ages. **Medieval jurists applied Roman law to their own societies and saw no problem in doing so. It is with the arrival of the so-called humanist scholars, in the sixteenth century, and their use of the methods of classical philology, that the internal coherence and authority of the *Corpus juris civilis* were challenged.**
…

As the work's numerous editions and translations attest, Bodin's *République* was widely read in Europe after its publication, up until the mid-seventeenth century. **It was subsequently forgotten, however, and Bodin's influence during the eighteenth century was only marginal.** It was not until the twentieth century that his works, slowly, but decisively, began to interest scholars again. Growing interest in his works has assured Bodin the place he deserves among the most important political thinkers of the sixteenth century.
…

Dutch jurist Hugo Grotius published his renowned *De jure belli ac pacis* in 1625; Grotius does not conceal his admiration for Bodin, nor for the method used by French writers that consisted of combining the study of history with the study of law.

> Thirdly, private and particular persons have no Right to question how those came by their Power that are in Authority over Them; for, if that were once admitted, there would be no end of disputes in the world touching Titles. It is ground enough for the submission of particular Persons in things of politicall equity, that those which have gotten the Power are irresistable, and able to force it if they refuse:* **For, as touching this Case (saith the most excellent *Grotius) Private persons ought not to take upon them to meddle with these Controversies in point of Title, but rather to follow them that are in possession.*** For, all Power is from God; and, our Saviour told *Pilate,* the Power that he had was given him from above, though all the world knows that *Pilate* was but a Deputy-governour, and (in a civill acceptation) received his Power from *Caesar,* who was an Usurper. **To this accords that of *Bodinus* 1.* *de repub. cap.* 6. who saith, that *all Governments are lawfull in respect of the first Cause,* viz. *God; but on the other side, if we regard secondary Causes, all Governments have had their Beginning and Foundation upon Force and Violence.***

Jean Bodin (1530-1596), **who had provided the original Divine Right-style justification for the French crown, is generally considered the first apologist for the modern theory of Divine Right kingship. Interestingly, while Bodin began by denouncing Machiavelli (such denunciations had, even by then, become a standard pose), in fact "Machiavelli's influence on Bodin is omnipresent."**6 It is fair to say that Bodin's theory is not fully Machiavellian, and so not really secular in a precise sense, but his account certainly was influential among other monarchs, including English monarchs, whose aims were secular.

https://archive.org/details/BarruelMemoirsIllustratingTheHistoryOfJacobinism/page/n263/mode/2up?view=theater

> 6. We may safely assert, that if Montesquieu has borrowed such dross as the System of Climates from Bodin, he has thrown aside many articles which by no means coincided with his ideas. For example, the definition of a Sovereign given by Bodin could never agree with Montesquieu's notions of a free people, or of its representatives. The former is exaggerated. **In Bodin's language, we might say, that the covenant by which the Sovereign is constituted, gives him the right of disposing at pleasure of the lives and fortunes of every citizen: That the sole distinction between the Tyrant and the lawful King is, that the former exercises his authority for the subjugation, while the latter exerts his for the happiness of the people.** The generality of Montesquieu's principles appear not to recognize a sufficient Sovereignty in the real Monarch; but the opposite excess into which Bodin had fallen may, by disgusting Montesquieu, have driven him into the opposite extreme.

https://studenttheses.universiteitleiden.nl/access/item%3A2658919/view

The vital statement for this thesis is Bodin's proclamation: **"Just as Almighty God (*Dieu*) cannot create (*ne peut faire*) another God equal with Himself (*pareil à lui*), since He is infinite (*entant qu'il est infini*) and two infinities cannot co-exist, so the sovereign prince, who is the image of God (*l'image de Dieu*), cannot make a subject equal with himself (*un sujet égal à lui*) without self-destruction (*anéanti*)."**119 **Bodin concludes that the only limitations that can be placed on the absolute sovereign are the laws of "God" and "Nature" (*la loi naturelle et divine*):** "…the sovereign…cannot in any way be subject to the commands of another".120 By "natural law", Bodin understands the eternal mathematical principles of "natural reason" (*raison naturelle*).121 By "divine law", Bodin understands those normative acts which are "directly contrary to the law of God" (*directement contraire à la loi de Dieu*) such as "incest, adultery, parricide" (*incestes, adultères, parricides*) and so on.122

One of the central motives behind the labours of the Renaissance jurists and their disciples, particularly in France, was the conviction that eternal and universal truths, of inestimable value for the conduct of men

everywhere, had been known to the great Greek and Roman thinkers, and could, with sufficient effort, be recovered. **They believed that this *restauratio* could be achieved once the distortions, confusions, interpolations and incrustations of Byzantine and medieval editors and interpreters, from Justinian's editor Tribonian to the medieval Accursians and Bartolians and their successors (sadly affected as these last were held to be by the anti-pagan bias of the traditions of the Church), were identified and removed, and the original texts disinterred, reconstructed and understood.** In part, the work of restoration was stimulated by sheer love learning, by intellectual curiosity, by desire to rescue the truth from ignorance, error and deliberate perversion, and by pure admiration for the classical world, free from any utilitarian or ethical purpose. **But together with such disinterested motives, there clearly were at work theological and political passions too: Protestant, anti-papal, anti-medieval, and, particularly in France, Gallican and nationalist.** Nevertheless, it remains true that the dominant impulse was that of the Platonic and humanist faith that, in the light of the newly discovered standards of ideal truth and ideal beauty, gifted and energetic men, unaffected by the condemnations of this world by the *tristes docteurs*, and liberated from the tyranny of a superstitious and obscurantist priesthood, could once again develop the rich potentialities of human nature, and build a life worthy of their new-found knowledge and genius. The timeless principles in the light of which Roman law was built – whether *jus naturale* or *jus gentium* or *jus civile* – would, once the ground was cleared of the accumulated rubbish of centuries, be the basis of a new life, both social and individual, which rational men, from whose eyes the medieval scales had fallen, **would establish in accordance with the unalterable laws of nature, which were identical with those of human reason as they were formulated by the great philosophers and jurists.**
…

Thus the route to the genuine past, it was now believed, lay via 'philology.' Valla (and Dumoulin and Cusanus) demonstrated this in the course of exposing the forged Donation of Constantine; the great historical jurists – Budé, Cujas, Alciati – and their disciples used the new method to clear away the medieval rubble and Byzantine carelessness which, in their view, concealed the authentic texts of the great Roman lawyers.
…

The great Gallican controversialist, Charles Dumoulin, the disciple of Valla and the one-time friend of Calvin, appealed to linguistic usage in interpreting the true tradition in his defence of the claims of the French monarchy against Roman universalism. In the same spirit the defender of Roman orthodoxy, Raymond Le Roux, takes Dumoulin to task for being over-literal: words change meanings; lawyers who deal with facts and not with mere words should not fall into the error of attaching static meanings to words; central terms change meanings at different times and in different states.1 But the same principle could be used with equal effect by the opponents of Rome: language and monuments can be used not only to expose clerical anachronisms and forgeries, but to reconstruct the structure of past societies in terms of which alone the significance of this or that sentence in the Digest or Ulpian can be understood.2 **So François Baudouin demanded knowledge of universal history on the part of anyone claiming true mastery of the law; to understand the tradition of the Church one must understand the Commonwealth 'in whose bosom, as it were, [the Church] is nourished';**3 **all history and all jurisprudence should ideally be united in one single *corpus*.**4 **Law and history are one and indivisible.**5 **It is by adhering to this principle that Budé and Cujas, Alciati and Le Douaren and their disciples succeeded in purging the texts of Roman law from the distortions and blunders of medieval 'barbarians' – Bartolists and Accursians.** Indeed it was only by using such methods that **the unhistorical lumping together of Roman texts of different dates by Justinian's editor Tribonian – the *bête noire* of the new school of French jurists** – could be exposed, and the chronology and therefore the significance and relationships of the texts properly established.
…

One of the original motives for labouring to restore the texts of Gaius or Papinian was the belief that they contained the clearest statement of those universal rules of conduct to which all men aspire by nature, no matter how barbarous or deeply perverted they may be, so that contemplation of the principles of Roman law should give any man a sense of homecoming, of return out of the long night of the Middle Ages to the rule of reason and the light of day. **But what was gradually discovered was a way of life that seemed remote or, at the very least, unfamiliar to those seekers for the single true tradition. The more faithfully the despised medieval accumulation was removed, the stranger the classical world appeared: if anything, it was the alleged monkish distortions that gave it such affinity to the ideas of later ages as it once seemed to have.** This was not what had been expected by neo-Stoics, neo-Aristotelians, or Platonists and Neoplatonists of the Renaissance. But it was grist to the mills of those who wished to protect local or corporate liberties and privileges against the encroachment of the great centralising powers – whether papal or royal. **Legal historians have often remarked on François Hotman's unceasing effort, while ostensibly wholly engaged on learned labours intended to establish the true meaning of Roman law, to emphasise the unbridgeable differences between it – and, indeed, the rules of *jus naturale*, too – and the ancient customs of France, which followed an authentic, native, 'Franco-Gallic' tradition; from which it**

followed that Roman law, whether 'municipal' or international, was not relevant to the French State. Hotman's and his allies' insistence on the gulf that divided Roman law from the 'immemorial' native Franco-German traditions was part of their defence of feudal, or local, or national rights against the champions of uniformity, centralisation and all those who appealed to timeless and universal truths to support claims to overriding authority.

This great argument, stemming as it did from many sources – early consciousness of nationhood, the zeal of reformers, Gallicans and other dissenters against the Roman hierarchy, the claims of estates and provincial *parlements* and corporations against the central executive: from every movement or outlook that found it advantageous to underline differences between places, times, ways of life – was eagerly seized upon by the defenders of local custom, ancient ways, individual traditions that varied from place to place with roots too remote and tangled to be rationalised and fitted into any universal system. This great political and theological conflict, one of the great ideological battles which has continued into our day, as often as not clothed itself in legal forms, appeals to precedents and historical institutions the path to which was built by embattled jurists and grammarians. In the effort to diminish the authority of Roman law, to undermine the notion that civil law, even if it was not always, at least always strove to be, the application of natural law to particular situations, Hotman speaks of 'les saisons et mutations des moeurs & conditions d'un peuple,'1 which divide it from other people's, and indeed even from its own past; the French have their own *complexions* and *humeurs*.2 What have they to do with the laws of a society long dead and originating in another country? **What have the lists of 'natural law' maxims enunciated by Gratian or his predecessors, obedient mouthpieces of the Vatican, or spokesmen for an ancient civilisation born in far-away Athens and flourishing in an only slightly less distant Rome, what have they to do with our own peculiar, unique, Frankish, that is, in the end, Germanic, or 'Franco-Gallic,' individuality or 'complexion'? In his *Anti-Tribonianus* (which Vico cites in another connection),**3 **Hotman uses this appeal to historical continuity in resisting royal claims as against the customary law of the Frankish conquerors of Gaul,** or against other codes which had developed out of the needs and traditions of the varied associations of men of whom the King's realm consists. The Romans had a *respublica*, not a monarchy: the administration of France 'has nothing in common with' that of Rome, said Étienne Pasquier.1 The argument from the 'irrelevance' of what the Romans did to modern situations became a powerful weapon in the hands of the defenders of the prerogatives of various estates – Montesquieu's later defence of such *corps intermédiaires*, and his anti-centralist pluralism, drew sustenance from the sharp contrasts between the variety of systems, each valid for its own day. Hence flowed relativism, historicism, political pluralism, and, more particularly, **suspicion of abstraction, of tidy general schemas, whether a priori or naturalistic, advocated by no matter whom – Aristotle, Seneca, Ulpian, the Digest, Aquinas, Descartes, Locke, the *philosophes*.** Hence, above all, ever since Lorenzo Valla and the new 'philology,' the appeal to the concrete and the particular in specific times and places.

Nor is the new path to the past confined to historical lawyers. The *mos gallicus* captured history proper as well. Étienne Pasquier looks on laws as custom recorded in writing, and since society and its language and habits alter, there is need of constant readjustment. One can reconstruct the past not by attending to narrative history, so much as by renewed study of acts of *parlements*, juridical records, papal bulls, poems, coins, statues; historians tend to be subjective, a 'je ne sçay quoy de passion'2 is apt to affect them, especially if religion is at issue.3 Pasquier's distaste for Roman law and architecture throws the dissimilarity between the Roman past and the French tradition into sharp relief: this is surely the direct result of the doctrines taught in the schools of Bourges, Valence, Toulouse, Turin. **Vignier, who treats Homer and the Bible in the same detached fashion as he does coins and inscriptions, shows no respect for the 'immemorial wisdom of the ancients.'**
…

In England this movement took the form of Coke's sense of the common law, and Matthew Hale's doctrine that law was born not made, and those other forerunners (such as Hume and Bolingbroke) of Burke, who reacted against the cut and dried 'rigidities of ordered reason' and 'towards the customary, the native, the feudal and the barbarous … the primitive, the inarticulate and the mutable.'2

> 2. Pocock, p. 15. **So began what Maitland once called 'a Gothic revival' in jurisprudence. 'English Law and the Renaissance'** (1901): p. 146 in *Selected Historical Essays of F. W. Maitland,* ed. Helen M. Cam (Cambridge, 1957).

https://oll.libertyfund.org/title/pollock-the-genius-of-the-common-law#lf1381_label_032

Lack of executive power had always been the weak point of the Common Law, and in order to keep faction permanently repressed, after Henry VII's victory had closed the dynastic strife, more drastic methods were required. What the Chancellor was already doing in matters of private law was now to be done by the King's Council in the Star Chamber and in the special palatine and frontier jurisdictions. Thus Sir Thomas Smith tells us of 'the insolency of the noblemen and gentlemen of the north part of England, who being far from the king and the seat of justice made almost as it were an ordinary war among themselves'; and Bacon speaks in like manner of 'maintenance or headship of great persons' as one

chief reason why jurisdiction of this kind was needful and politic; and we could have no two more competent witnesses to the traditions of sixteenth-century statecraft. More than this, **there was a time when the demand for strong government was virtually leagued against the Common Law with a learned intellectual movement among Romanizing scholars and publicists.** Maitland has given us the proofs in his brilliant essay – not the less solid because brilliant – on English Law and the Renaissance. **Towards the middle of the century, the situation might well have seemed critical;** a foreign observer might even have expected that the Court of Chancery, not yet officially declared to be an ordinary court of justice, would easily be drawn into the confederacy. Such a forecast would have been wrong but not without plausibility. What actually followed we know; **the last quarter of the sixteenth century saw, concurrently with the steady growth of equity jurisdiction, a great revival of the Courts at Westminster, based on clear and proud consciousness of their historical authority and doctrine.** Antiquarian jurisprudence was militant and triumphant, with the compilers of the Abridgments and the printers of the Year Books for its armourers, **and Sir Edward Coke for its champion; a champion to be venerated, still active and valiant, by a younger generation fighting the battle of constitutional right with like weapons against Charles I.** The history was not always critical in either case, but that was not material for the result. **Such a revival is among the most impressive evidences of a vitality not only professional but national, which might be obscured but could not be suppressed by adverse conjunctures.**

https://en.wikisource.org/wiki/Dictionary_of_National_Biography,_1885-1900/Bacon,_Nicholas

BACON, Sir NICHOLAS (1509-1579), lord keeper, born in 1509, probably in a house belonging to the parents of Sir Francis Walsingham at Chislehurst, Kent, was the second son of Robert Bacon, of Drinkstone, Suffolk, **sheepreeve to the abbey of Bury St. Edmunds.**
...

On his return he studied common law at Gray's Inn, being called to the bar in 1533, and becoming an 'ancient' of the society in 1536. A little later Archbishop Cranmer recommended Bacon to the minister Cromwell for the appointment of town-clerk of Calais.
...

Bacon was desirous that the confiscated revenues of the dissolved monasteries should be applied to useful purposes, and with two friends, Thomas Denton and Robert Cary, drafted a scheme for their employment in the establishment of a college for the education of statesmen. **It was proposed to erect a house in London where young men of good family and attainments should be taught civil law, Latin, and French.** Some of the students were to be attached to foreign embassies, and others were to compile histories of official transactions. But the proposal met with little favour, and the monastic estates were distributed among the king's friends.

https://www.gutenberg.org/cache/epub/2333/pg2333-images.html#link2H_4_0008

It is hardly necessary to say that Francis Bacon was the son of Sir Nicholas Bacon, **who held the great seal of England during the first twenty years of the reign of Elizabeth.** The fame of the father has been thrown into shade by that of the son. But Sir Nicholas was no ordinary man. **He belonged to a set of men whom it is easier to describe collectively than separately, whose minds were formed by one system of discipline, who belonged to one rank in society,** to one university, to one party, to one sect, to one administration, and who resembled each other so much in talents, in opinions, in habits, in fortunes, that one character, we had almost said one life, may, to a considerable extent, serve for them all.

They were the first generation of statesmen by profession that England produced. Before their time the division of labour had, in this respect, been very imperfect. Those who had directed public affairs had been, with few exceptions, warriors or priests; warriors whose rude courage was neither guided by science nor softened by humanity, priests whose learning and abilities were habitually devoted to the defence of tyranny and imposture. The Hotspurs, the Nevilles, the Cliffords, rough, illiterate, and unreflecting, brought to the council-board the fierce and imperious disposition which they had acquired amidst the tumult of predatory war, or in the gloomy repose of the garrisoned and moated castle. On the other side was the calm and subtle prelate, versed in all that was then considered as learning, trained in the Schools to manage words, and in the confessional to manage hearts, **seldom superstitious, but skilful in practising on the superstition of others;** false, as it was natural that a man should be whose profession imposed on all who were not saints the necessity of being hypocrites; selfish, as it was natural that a man should be who could form no domestic ties and cherish no hope of legitimate posterity, more attached to his order than to his country, and guiding the politics of England with a constant side-glance at Rome. But the increase of wealth, the progress of knowledge, and the reformation of religion produced a great change. **The nobles ceased to be military chieftains; the priests ceased to possess a monopoly of learning; and a new and remarkable species of politicians appeared.**

These men came from neither of the classes which had, till then, almost exclusively furnished ministers of state. **They were all laymen; yet they were all men of learning; and they were all men of**

peace. They were not members of the aristocracy. They inherited no titles, no large domains, no armies of retainers, no fortified castles. **Yet they were not low men, such as those whom princes, jealous of the power of a nobility, have sometimes raised from forges and cobblers' stalls to the highest situations.** They were all gentlemen by birth. They had all received a liberal education.

https://archive.org/details/in.ernet.dli.2015.13326/page/n131/mode/2up?view=theater

Gentilis is the first great writer of *modern* international law, the first clearly to define its subject-matter, and to treat it in the way which is fundamentally in harmony with the conception and practice of our own time.1 For this reason it may justifiably be claimed that—as the precursor of Grotius, and as the one who substantially prepared the way for him and greatly influenced his and all succeeding work—Gentilis is the real "father" of the modern law of nations (that is, if it is at all proper to confer such a title on any particular jurist).2
...

Notwithstanding various shortcomings—indeed, inevitable at the time he wrote—the entire work of Gentilis is manifestly superior to all previous productions, such as, for example, those of Ayala, Victoria, Soto, Belli, or Suarez, who either confused civil law with rules regulating international relations or failed to grasp the difference between philosophical or theological principles and juridical rules, or, again, confounded the rules of interstatal war with the municipal prescriptions of military discipline,1 or identified the "societas gentium" with an exclusive Christian commonwealth. **The theological basis of the whole subject, which was generally affirmed or assumed by his predecessors, was once and for all undermined. The dogmatic procedure of the theologians was unreservedly impugned; they were roundly advised not to meddle with matters which did not concern them, "silete theologi in munere alieno."**2
...

Grotius approves St, Thomas's interpretation of the fifty-first Psalm as to the irresponsibility of princes and their superiority to law; Gentilis, though writing earlier, shows himself to be more in harmony with modern views when he asserts that it is a hallucination of theologians, mere adulation of lawyers to represent to kings that they are permitted to do everything, and that their sovereignty is absolute.3

Finally, having conceived of a ''societas gentium'' on a civil basis, a system of rules freed from the bonds of theological casuistry, **Gentilis took a further step—a remarkable one, though a corollary flowing from his general thesis—and included in this society of States infidel and even barbarian communities.**1 The common opinion of writers was that only Catholic, or, at most, Christian, princes could be vested with *dominium*; but Gentilis held that heretics and infidels could legitimately enjoy the right of sovereignty in their own domains. **Heresy or infidelity or even idolatry is not intrinsically a just cause of war.**2 Treaty relationships may be established with peoples of this character,3 who possess also the right of legation.4 **On the other hand, those who have no religion at all are in the position of pirates,**5 **as the natural enemies of mankind, and are therefore outside the pale of the society of States;** they are on the level of the lowest brutes and are in a sense opposed to God and to nature, and consequently ought to be warred upon and compelled to follow the ways of the rest of mankind.6
...

The Christian wars against the Turks were lawful, not for religious reasons, or for reasons of natural enmity, but because of their perfidious, harassing, hostile conduct; whereas had they remained peaceful any attack on them would have been illegitimate.7
...

Hence, **resistance may be justly offered to the Turks and to the Spaniards, as it is manifest they are aiming at universal dominion.**10 **Further, there is "honesta defensio,"**11 **which permits help to be given to a nation against its unjust aggressors:**1 **for the ''generis humani societas" is a unity, the world is one body, "mundus unum est corpus."**2 Gentilis quotes with approbation the statement of Ambrose3 as a principle of canon law: "Plena est iustitia quae defendit infirmos."4 May we defend the subjects of another State as against their sovereign?5 If the dispute between them is a private one, it is a question for their own tribunals; **but in a public conflict, in which a great number of subjects rebel against their ruler, we may intervene if it is clear that he is grossly unjust or cruel;** hence the justifiable intervention of England in the Netherlands, especially so in view of the ties of old friendship and consanguinity. Gentilis heartily approves of the Earl of Leicester's policy in favour of the Belgians, **and agrees with Justus Lipsius that Spanish violence would be left unrestrained if that part of the continent fell.**6
...

The work of Gentilis is of enduring value in the history of the law of nations. **He did more than any other writer to free international law from the besetting theological importations and the incubus of scholastic casuistry.** In his clear recognition of and constant insistence on the

predominant positive aspects of the subject, he foreshadowed the modern prevailing view, which emphasizes that the regulation of interstatal relationships is based on law and not merely on courtesy. **He frequently appeals to divine law; he is always ready to invoke the authority of "natural reason,'' of the law of nature, but in doing so his aim is to apply additional sanctions to matters which are universally affirmed by the intuitive consciousness of mankind.** Metaphysical abstractions and dialectic subtleties he avoided as being a menace to the stability of the very foundations of the subject.
...

He clearly marked out the respective spheres of the international jurist and the theologian; he carefully differentiated between the work of the international lawyer and that of the civilian. He is not given to fallacious presumptions of analogy between the civil law and the law of nations—**presumptions which govern the fundamental classification of the work of Grotius.**

Meanwhile, jurists like Coke equated English common law with natural law. **They declared that custom, the basis of the common law, was the product of natural law.** Often unconsciously, humans wrote into law those customs which worked best – that is, which best conformed to experience and nature. **The passage of time refined the law through trial and error, making it ever more compatible with natural law. The process was a form of legal natural selection.**5

Memorandum: when the play *Ignoramus* (made by one Ruggle of Clare Hall†) was acted with great applause before King James, **they dressed Sir Ignoramus like Chief Justice Coke** and cut his beard like him and feigned his voice. Mr Peyton, our vicar of Chalk, was then a scholar at King's College and saw it. **This drollery did lead to serious evil: <u>it set all the lawyers against the clergy</u>,** and shortly after this Mr Selden wrote of tithes that they were not according to God's laws.

https://en.wikisource.org/wiki/Dictionary_of_National_Biography,_1885-1900/Selden,_John

His father, John Selden, is described by Selden himself as 'ex familia quæ tunc ibi viguit honesta;' by Aubrey as 'an yeomanly man of about 40l. per annum,' and in the baptismal register of his son as 'the minstrell,' an office which appears from the parish accounts to have involved attendance at the church ales. Selden's mother was Margaret, only daughter of Thomas Baker of Rushington, of a knightly family in Kent. She is said to have been won by the musical talents of her husband, and to have brought him a pretty good estate.
...

A fourth and still more important book appeared in the same year (1617), the 'History of Tythes,' the best known of all Selden's productions, except his 'Table Talk.'
...

In more than one passage of this essay Selden handles the question whether tithes are payable *jure divino*. In the sixth chapter (section 6), he first approaches the subject; **he does not deny that they are payable by what he calls 'ecclesiastical or positive law,' but he denies that they are payable by what he calls 'the divine moral law or the divine natural law, which should bind all men and**

ever;' and he endeavours to show that the practices of the early church were consistent only with this view. In the seventh chapter he again reverts to the subject, and states the chief question in debate among divines in these terms: 'whether by God's immediate moral law the evangelical priesthood have a right to tythes in equal degree as the layman hath to his nine, or if they have them only as by human positive law and so given them for their spiritual labour.' It obviously follows that if tithes are of divine law, both as to their existence and their quota, they cannot be affected by human law; and here Selden's love of the common law comes into play, and he urges the fact that **'the practised common law … hath never given way herein to the canons, but hath allowed customs and made them subject to all civil titles, infeodations, discharges, compositions, and the like.'** It is not perhaps difficult to guess in which direction the mind of Selden leaned on this crucial question between the canon and the common law, but it is difficult to find in the treatise any direct expression of his private judgment.
...

In this preface he with more than usual spirit turns on his critics; he energetically protests that his book is 'not written to prove that tythes are not due by the law of God; not written to prove that the laity may detain them; not to prove that lay hands may still enjoy appropriations; in sum, not at all against the maintenance of the clergy; neither is it anything else but itself—that is, a mere narrative of the History of Tythes.' **With increased heat he pointed to the opposition which the clergy offered in past times to the progress of true knowledge and to the suspicions with which they had viewed 'the noble studies' of Roger Bacon, Reuchlin, Budæus, and Erasmus.**
...

In the same year Selden, with some other members of both houses, sat in the assembly of divines at Westminster. In the debates of this body (says Whitelocke) 'Mr. Selden spake admirably, and confuted divers of them in their own learning. And sometimes when they had cited a text of scripture to prove their assertion, he would tell them, "Perhaps in your little pocket-bibles with gilt leaves" (which they would often pull out and read) "the translation may be thus, but the Greek or the Hebrew signifies thus and thus," and so would totally silence them.' **Selden proved a thorn in the sides of the Westminster divines, for he liked the claims of presbytery no better than those of episcopacy; and, according to Fuller (*Church Hist*. bk. xi. sect. ix. par. 54), he used his talents rather 'to perplex than inform' his auditors, his interests being 'to humble the jure-divinoship of presbytery.'**
...

During the trial and execution of the king and the rise of Cromwell, Selden abstained from any expression of his views. **'The wisest way for men in these times is to say nothing' was a maxim of his,** on which he seems to have rigorously acted (*Table Talk*, Peace).
...

Of his deathbed several narratives have been preserved, though none of them seem to be first-hand accounts. One given by Aubrey represents him as refusing to see a clergyman through the persuasion of Hobbes; another, found in the Rawlinson MSS. at the Bodleian, as refusing to receive Hobbes, confessing his sins, and receiving absolution from Archbishop Ussher, and as expressing the wish that he had rather executed the office of a justice of the peace than spent his time in what the world calls learning (Macray, *Annals of the Bodleian Library*, 2nd edit. p. 110 *n.*).
...

It was not till 1689, when the revolution had given freedom to the press, that the 'Table Talk' of Selden, the book by which he is generally known to fame, was first printed. This work was composed by Richard Milward [q. v.], a secretary of Selden, and contains reports of Selden's utterances from time to time during the last twenty years of his life. Its authenticity was doubted by Dr. Wilkins, but for reasons which have not satisfied the world; **and the work may safely be accepted as the most vivid picture extant of the habits of thought and the modes of expression of the great Erastian lawyer. The conversations cover a great range of subjects relative to human life and history; but Selden was never metaphysical and rarely philosophical.** The book exhibits him with a great and varied knowledge of life; as a man of strong and somewhat scornful intellect; as delighting to illustrate his discourse by similitudes; **as solving all questions in church and state by a reference to one or two simple principles—the sovereignty of the state, and the contract between the sovereign and his people. 'All is as the state pleases;' 'every law is a contract between the king and the people, and therefore to be kept'—are two sentences characteristic of Selden's habitual thought. Such principles are destructive of the claims to *jus divinum* alike of kings, bishops, and presbyters; and they exclude those theories of natural right to which ardent reformers are wont to have recourse.**
...

The tone adopted by him in his discussion of ecclesiastical questions, the devout language of his last will, and the circumstances of his deathbed, all seem to show that he was a genuine believer in Christianity as a religion having a divine origin, though he thought far otherwise of

the particular modes of government and of the ceremonies of the church. His latitudinarian views, coupled probably with a cynical mode of speaking on the questions which were so keenly debated in his time, together with the fact that Selden was on friendly terms as well with Hobbes as with Archbishop Ussher, are probably the source of the rumour that Selden 'was at the heart an infidel and inclined to the opinions of Hobbs.' Sir Matthew Hale, says Richard Baxter, 'oft professed to me that Mr. Selden was a resolved, serious Christian, and that he was a great adversary to Hobbs's errors, and that he had seen him openly oppose him so earnestly as either to depart from him or drive him out of the room' (Baxter's App. to the 'Life and Death of Hale,' Hale's *Works*, 1805, i. 112).

In politics, if Selden did not exhibit the character of a hero, a martyr, or a saint, he played the part of an honest man. **The fact that he was consulted alike by the commons on their rights and by the lords on their privileges is a remarkable testimony not only to his learning, but to his freedom from party bias.** He seems in all cases to have maintained what he believed to be the right, and to have been diverted from this course neither by the hope of popular applause nor by the favour of the court, nor by resentment for wrongs by which many men would have been soured. His desire was for an ordered liberty, and that he thought was to be found in the ancient constitution of the country. **He had no democratic feeling, and no admiration for the great mass of mankind.** 'So generous,' he says, 'so ingenuous, so proportioned to good, such fosterers of virtue, so industrious, of such mold are the few; so inhuman, so blind, so dissembling, so vain, so justly nothing but what's ill disposition are the most' (Dedication to *Titles of Honour*). Nor did he cherish the sanguine belief which characterises the zealous reformer, that all change is for the better and that all movement is forward. On the contrary, **he had perhaps to a degree unusual even with Englishmen the love of precedent;** he felt that in the records of the race was to be found the only remedy for the shortness of the life of the individual.

https://books.google.fi/books?id=FM0VBoVW8nEC&lpg=PP1&hl=fi&pg=PA32#v=onepage&q&f=false

But with the Hobbesism Stubbe now mixed for the first time in print another element deriving from the Hebrew scholarship of John Selden (1584-1654), an element that would bulk even larger in his thinking after the Restoration and indeed to the very end of his life. Selden had been at the head of the Erastian faction in the Long Parliament and the Westminster Assembly, and supported his religious position, close in spirit to Hobbes's own, with his Biblical and rabbinical studies. The Scottish Presbyterians in the Westminster Assembly were fond of arguing that their form of church government rested on divine right **and pointed for evidence to support their case to the example of the Jewish Sanhedrin. <u>But Selden shot back 'that the Jewish State and Church was all one, and that so in England it must be, that the Parliament is the Church.'</u>**39

There was much else in Selden's thought to delight Stubbe the Hobbesian Independent. **Selden's rational views led him to deny the existence of 'spiritual jurisdictions' and the notion of heresy.**40 His remarks in the Westminster Assembly were recorded by his secretary Richard Milward and eventually published in *Table Talk* (1662).41 There he revealed himself as a believer, but one who accepted a natural religion based upon God's commands as set down in Scripture.42
…

Selden claimed that the ancient Hebrews had practiced toleration and that it was their example in this regard that should be followed. Stubbe repeated his argument.
…

There was John Selden of course, **and we have seen Selden's scholarship was chiefly responsible for supplying Stubbe with his model for natural religion, the precepts of Noah, which Stubbe was willing to adopt as a basis of religious belief and practice in revolutionary England.** Stubbe also probably knew of the religious views of a fellow student of Selden, James Harrington,54 who preached a civil religion in which the citizen's devotion to the equal commonwealth would amount to a universal form of religious worship, another kind of natural religion, in which controversy and turmoil would disappear in favor of service to the republic.55

In a word, ***Libraries and Booksellers shops abound with such Books, as teach such Doctrines, Philosophers, Historians, Papists and Protestants; and yet no such outcry of Treason and Rebellion hath been raised against them, but the Books commonly tolerated and read:*** *And we that never owned such things are by Plotters represented as if we were ready by our disloyal Doctrine to destroy the King and Kingdom.*

https://oll.libertyfund.org/title/pollock-the-genius-of-the-common-law#lf1381_label_032

Far more deliberate, though much less known to posterity, was the attack made on the Common Law in America not by Popes or bishops but by Puritans. The settlers of Massachusetts refused to admit any authority but that of their own enactments, tempered by a general deference to 'God's word,' meaning thereby the text of the Mosaic law: not the system of the great medieval Rabbis, but the letter of the Pentateuch interpreted after their own fashion. **Such was the prevailing temper, down to the eighteenth century, throughout the New England States,** and the zeal of Massachusetts was equalled or even exceeded elsewhere (I do not, of course, refer to the spurious 'Blue Laws' of Connecticut; the genuine examples are sufficient). Besides the constant Puritanic or Judaizing bias, these early colonial ordinances exhibit curious reversions to archaic ideas and classification. Outside New England there was not the same downright

aversion to English law and procedure, but it would be hard to find even in Virginia or the Carolinas, within the same period, any received presumption in favour of the Common Law being the groundwork of local jurisprudence.1 **It may seem a paradox, but it is a fact which research more and more tends to confirm, that it was none of the Pilgrim Fathers, but the Fathers of the Constitution, who, in the very act of repudiating allegiance to king and parliament, enthroned our lady the Common Law on the western shores of the Atlantic.**

https://www.garynorth.com/conspiracyinphiladelphia.pdf

> It is only against the background of the Old World Enlightenment that we can appreciate the political achievements of the men who were to be immortalized as Founding Fathers of the new Republic, their resourcefulness, their ingenuity, their wisdom, their sagacity, their virtue. **Where most of the philosophes of the Old World were recruited from Naturalists and doctors and ecclesiastics—how the Abbés disported themselves in the pages of the Encyclopédie!—in America most of them were students of the law.** Law was the common denominator of Jefferson and Madison, of George Mason who wrote Virginia's famous Bill of Rights and George Wythe who presided over her highest court, of Alexander Hamilton and of John Jay, of John Adams who was the chief justice of his state (he never took office, to be sure) and Roger Sherman and Oliver Ellsworth of Connecticut, and the American Blackstone, James Wilson, and his fellow commentator on the Constitution, Nathaniel Chipman of Vermont, and the two brilliant Pinckneys of South Carolina, and even of the educator and lexicographer Noah Webster. **And even those who were not trained to the law, like Franklin, Dr. Rush, and Tom Paine, were more than lawyers, they were political philosophers. <u>It was the lawyers who had written the Declaration of Independence and the Northwest Ordinance—and it was mostly lawyers who drafted the Constitutions of the States and of the new United States.</u> For forty years every President of the new nation, with the exception of Washington himself, and every Vice-President and Secretary of State, without exception, was a lawyer.** In America politics was the universal preoccupation, legislation the universal resource, and Constitutions the universal panacea.
>
> Henry Steele Commager (1977)1

…

They saw the need to escape an Anglican bishop in the colonies, but they did not see the enormous threat to Christian civilization posed by the unitarians and Masons who were becoming the colonial leaders, and who were articulating the civil principles of the Revolution. The pastors became "the black regiment" of the Revolution,7 but they did not become its general officers. In 1776, they became chaplains at home and in camp for an army that was under the hierarchical control of a dedicated Mason of great public virtue. They preached their fast-day sermons and their regimental sermons just as they had preached election-day sermons since the Indian wars of 1675-76: as anointers of the state. Their messages had been self-consciously devoid of specific biblical judicial content for a century by the time of the Revolutionary War.8 This did not change, 1776-1788. The pastors had long since deferred politically to the lawyers. **The lawyers inherited the kingdom of politics during the American Revolution. They did this ingeniously; <u>in fact, like the rise of the empire in Rome, politics fell into their hands as a by-product of war.</u>**

…

To put it another way, why were the lawyers in charge of the Convention and the pastors absent? **Why were the pamphlet debates of 1787-88 conducted in terms of Roman historical examples and not biblical historical examples? Why was there never any appeal to specific biblical laws, but endless appeals to natural laws?**

…

But, on the whole, Schaff's statement is representative of two centuries of incomparable historical misrepresentation—a myth that is taken seriously by virtually all conservative American Christians.

The conspirators of 1787 were successful beyond their wildest dreams. Their victims still do not know what happened to them. That a serious historian could write about the oath in this manner—the oath that is in fact the exact opposite of what Schaff claimed it is—is mind-boggling. It is self-deception on a scale not normally encountered, even in academia. This oath does indeed recognize the Supreme Being, to whom the oath is a solemn appeal; that Supreme Being is the sovereign incorporating People.

…

https://books.google.fi/books?id=OymeBQAAQBAJ&lpg=PR1&hl=fi&pg=PA133#v=onepage&q&f=false

> 26. *BW* I, no. 181, [24 December 1609]. Grotius hurried to make known his good intentions. He was unwilling to pass judgment on the controversy with Arminius: 'Caeterum, quae Arminio tecum ac cum bonis multis disconvenere, ea nec satis scio, nec si sciam temere me interponam. Habet ista res suos iudices.' In a letter to J. Rutgersius, 24 December 1609 (*BW* I, no. 182) **he says that he did not understand the greater part of the theological polemic, but referring to a knock-down argument used by the famous Jacobus Cuiacius (Cujas) when asked his opinion of the French wars of religion ('Nihil hoc ad edictum praetoris'),** Grotius claimed that a modicum of theology was enough for him: 'Nobis modica theologia sufficit.'

…

Although Gomarus' followers stubbornly refused to tolerate the moderate ideas of Arminius, **Grotius steadfastly played the role of honest broker before the outside world.** In many letters he spoke out as an energetic advocate of peace; he sought to calm heated passions, to win over such moderate conservative theologians as Anthonius Walaeus for the cause of toleration, to restrain such fanatical Remonstrants as Petrus Bertius, and to keep the perpetually timid Gerardus Joannes Vossius in the background as his anonymous adviser.

But Grotius' professions of impartiality were a smokescreen. This is clear enough from the ferocity with which he attacked the quarrelsomeness and intolerance of the professional theologians on the Contra-Remonstrant side.33 **In reality he and Wtenbogaert were in the vanguard of the Arminian pressure group,** each of them deploying his own particular talents and strong points.

>
> "Erastianism," as a by-word, is used to denote the doctrine of the supremacy of the state in ecclesiastical causes; but the problem of the relations between church and state is one on which Erastus nowhere enters. **What is known as "Erastianism" would be better connected with the name of Grotius.**

https://books.google.fi/books?id=OymeBQAAQBAJ&lpg=PR1&hl=fi&pg=PA657#v=onepage&q&f=false

This biography has already referred many times to the *Grotiana*, a collection of erudite confidences and *bons mots* which the Paris physician Guy Patin noted down from Grotius' lips during several conversations in the rue des Saints-Pères from 1 June 1643.

…

Grotius also made some noteworthy remarks to Patin about his teachers and intellectual models, particularly their confessional attitudes. Of course he reminisced to Patin about Scaliger, who had abandoned the Catholic Church early on because he could not reconcile himself to the abuses that prevailed in it. **Grotius agreed with the jurist Jacques Cujas (Jacobus Cuiacius), who had tried to persuade Scaliger that he ought not to leave the Catholic Church for the sake of a few abuses, which a reasonable man, 'un habile homme,' would certainly take in his stride. One could stay within the Catholic Church, as Erasmus had done, and still criticize the ignorance of the priesthood and the dissolute, perfidious life of the monks.** According to Grotius, Scaliger had been too obstinate to take advice from anyone and so he had rejected Cujas's arguments. Here Grotius was clearly agreeing with the idea that the abuses in the Church were not serious enough to justify leaving it.265

https://en.wikipedia.org/wiki/De_jure_belli_ac_pacis

De iure belli ac pacis (English: *On the Law of War and Peace*) is a 1625 book in Latin, written by Hugo Grotius and published in Paris, on the legal status of war.[1] It is now regarded as a foundational work in international law.[2]

…

According to Pieter Geyl:

> It is an attempt by a theologically and classically educated jurist to base upon law order and security in the community of states as well as in the national society in which he had grown up. **In the rather naïve rationalism, the belief in reason as the lord of life, is revealed the spiritual son of Erasmus.**[5]

In particular, this work is remembered for the Latin sentence:

> *Et haec quidem quae iam diximus, locum aliquem haberent etiamsi daremus, quod sine summo scelere dari nequit, non esse Deum, aut non curari ab eo negotia humana.*[6]
>
> What we have been saying would have a degree of validity even if we should concede that which cannot be conceded without the utmost wickedness: that there is no God, or that the affairs of men are of no concern to Him.[7]

https://archive.org/details/crisisofeuropean0000haza/page/270/mode/2up?view=theater

The law of God, the law of Nature. … It was not Grotius who invented this twofold formula. It had done duty long before his time; the Middle Ages were acquainted with it. What then was it that was new about it? How came it to be criticized and condemned by the ecclesiastical authorities? Why did it create such a stir?

Its novelty lay in the patent separation of the two terms; in the no less evident tendency to stretch their opposition; and then in an attempt to reconcile the two, which of itself implied that the rift was a real one. Above all, it lay in an idea of which we have already made mention, an idea which, though not as yet clearly defined, was full of vigour: **War, violence, disorder, which the law of God does not repress but suffers rather, and even justifies, as being part of an inscrutable design, all the ills which man is heir to – perhaps the day will come when some human law will bring about their mitigation, their abolition. Thus it is that we are invited, with manifold excuses for such boldness, to pass from the Order of Providence to the Order of Humanity.**

> https://archive.org/details/newscienceofgiam030174mbp/page/n133/mode/2up?view=theater
>
> 395 **First Grotius, just because of the great love he bears the truth, sets aside divine providence and professes that his system will stand even if all knowledge of God be left out of account. Thus all the reproofs which in a great number of matters he brings against the Roman jurists, do not touch them at all,** since they took divine providence for their first principle and proposed to treat of the natural law of nations, not that of the philosophers and moral theologians.

https://books.google.fi/books?id=LT5WAAAAYAAJ&pg=PA36#v=onepage&q&f=false

Who was it, I pray, that introduc'd in the last Age, the methodical Study of the Law of Nature; that first attempted to give the World a System of this so vast, and necessary a Science? Was it any of the Ecclesiasticks, or Professors of Divinity? No: 'twas the illustrious *Grotius*; whose Memory wou'd on this very Account, be for ever bless'd amongst all sincere Lovers of Truth and Virtue; tho' he had not otherwise gain'd an immortal Reputation, by the many Pieces he has wrote of another Nature; all excellent in their kind.—**Yet no sooner did that admirable Treatise, of the *Right of War and Peace*, appear in the World; but the Ecclesiasticks, instead of returning thanks to the Author for it; every where declar'd against him:** And his Book was not only put into *the Expurgatory Index* of the k *Roman Catholick* Inquisitors, (which is not so much to be wonder'd at;) **but many, even Protestant Divines, labour'd to cry it down. And thus it far'd too with Mr. *Pufendorf*'s Book of, *The Law of Nature and Nations*.** The *Jesuites* of *Vienna* caus'd it to be prohibited; l and many Protestant Divines, both of *Sweden* and *Germany*, did their best, to make this excellent Work share every where else the same Fate.

https://oll.libertyfund.org/quote/jean-barbeyrac-on-the-need-to-disobey-unjust-laws-1715

The French jurist and translator of Grotius and Pufendorf, Jean Barbeyrac (1674-1744), also expressed his own interpretations of natural law in very lengthy footnotes and appendices to his translations, thus meriting being taken seriously as a legal theorist in his own right.

>
> **For in the end, the instant that the most genuine laws of the most legitimate sovereign conflict in any way whatsoever with these immutable laws written in our heart, there is no question of seeking a balance, because it is absolutely necessary, cost what it may, to disobey the former in order not to do damage to the latter. Men's submission to civil government does not extend, and never could extend even when they wished it, to the**

point where a human legislator is set higher than God, the author of nature, the creator and supreme legislator of men. As for things indifferent, it is entirely reasonable if, beyond the mountain or the river, something is considered just, while as a result of the contrary wills of the legislators of two different states, on this side it is considered unjust. But when it is a question of that which is clearly commanded or forbidden by the universal law of humankind, all the laws in the world can no more render just what is unjust than they can render healthy what is toxic for our bodies.11

https://books.openedition.org/larhra/735

Frustrated in his attempt to become a full minister of the French church—on account of his supposed Socinian leanings—he turned instead to the study of natural law.
…

Most revealing, perhaps, is the remarkable address Barbeyrac held in 1721, four years after his arrival in Groningen: *De magistratu, forte peccante, e pulpitis sacris non traducendo*. The address questioned the lawfulness of denouncing magistrates from the pulpit. **Barbeyrac's message was unmistakable. No clergyman, he claimed, has the right to publicly criticize the magistracy for any reason whatsoever.** A minister of the church has the same obligation as any other citizen.
…

It would probably not be far off the mark to claim that most Dutch law students—many of whom would later follow a career as a magistrate—were quite familiar with the contents of Barbeyrac's anticlerical address. Moreover, in the course of the eighteenth century references to the address surfaced time and again, in poems, in moral weeklies, in sermons, and so on.

"Nor has there ever been, amongst all the Philosophers, l yet extant, who have spoke in stronger Terms of the fatal Necessity of Things; or who have more magnify'd m the Liberty of Man, than the *Stoicks*." These Principles, I must own, are monstrous; and the several Philosophers of that Sect have, each in particular, added thereto some new Absurdities. However, bating some certain Things, nothing can be more beautiful than their Morality, consider'd in itself; which, **by only correcting a few of its Maxims, with some small Difference in their Explanation; might be easily reduc'd to a System of Morality, very near approaching to that of the Gospel;** to that, I say, which alone is entirely conformable to the Dictates of right Reason.
…

There was never any Sect of Philosophers, who so well understood, and so strongly press'd those indispensable Duties of Humanity, which Men, precisely consider'd as such, owe to one another. A learned *Englishman*, x in the Preface to his great and instructive Commentary on the *Reflections* of *Marcus Antoninus*, has given us a short Summary of the most shining Precepts of the Morality of the *Stoicks*; taken chiefly from the Writings of that Emperour, *Epictetus*, and *Seneca*; who are the only Philosophers of that Sect, whose Writings we have left. I am persuaded, it will not be displeasing to insert it here; **since this will serve to let us see how far the Light of Reason alone, tho' not exactly follow'd, and in some Things too a little defac'd; has carry'd those among the Pagans, who have thought fit to consult her.**
…

This is the beautiful Side of the Morality of the Stoicks; **and it must be further acknowledg'd, to their Praise, that they stopp'd not at general Notions; and indeterminate unapply'd Maxims:** But on the contrary, to judge of the Matter only by those few Writings, we have left us by the three Persons above mention'd, with the Fragments of others, and the Writings of those who have reason'd upon their Principles; **it may be truly affirm'd, that of all the Philosophers of Antiquity, they are the Men, who have gone the farthest into the Particulars of Morality;** and have the best apply'd its general Precepts to the several States of Life; and the different Exigences of humane Affairs.

https://books.google.fi/books?id=LT5WAAAAYAAJ&hl=fi&pg=PA77#v=onepage&q&f=false

The *Roman Lawyers*, of whom the greatest Part were *Stoicks*, contributed very much to the perfecting that Part of Morality, which may be call'd *Natural Jurisprudence*. y The Study of the Law having under the Emperours, become a principal Step to Preferment; the Men of the greatest Genius, and Parts among the *Romans*, continu'd to apply themselves to this Study, for near the Space of two Centuries. It were to be wish'd, that we had had the Writings of those famous Lawyers intire; they would no doubt have afforded us very great Light. But the Emperour *Justinian*, having been pleas'd to a bridge the *Roman* Laws; of which the Decisions of these Lawyers, were the most considerable Part; their Works hereupon grew out of Use; so that we have now left of 'em, only some Fragments in the

> *Digest*. *Tribonian* the Lawyer, to whose Care the Emperour had committed this Work; has left us a very Chaos, z full of Obscurity and Contradictions; which afford a vast Field for Chicanery; and which have, in the latter Centuries, produc'd that prodigious Number of senseless, and confus'd Commentaries.

https://oll.libertyfund.org/title/grotius-the-rights-of-war-and-peace-2005-ed-vol-1-book-i#lf1032-01_head_009

V. *But since it would be a vain Undertaking to treat of Right, if there is really no such thing; it will be necessary, in order to shew the Usefulness of our Work, and to establish it on solid Foundations, to confute here in a few Words so dangerous an Error. And that we may not engage with a Multitude at once, let us assign the man Advocate.* ***And who more proper for this Purpose than*** **Carneades,** ***who arrived to such a Degree of Perfection, (the utmost his Sect aimed at,) that he could argue for or against Truth, with the same Force of Eloquence?*** *This Man having undertaken to dispute against Justice, that kind of it, especially, which is the Subject of this Treatise, found no Argument stronger than this.*1 *Laws (says he) were instituted by Men for the sake of Interest; and hence it is that they are different, not only in different Countries, according to the Diversity of their Manners, but often in the same Country, according to the Times.* ***As to that which is called*** **Natural Right,** ***it is a mere Chimera. Nature prompts all Men, and in general all Animals, to seek their own particular Advantage: So that either there is no Justice at all, or if there is any, it is extreme Folly, because it engages us to procure the Good of others, to our own Prejudice.***

VI. *But what is here said by the Philosopher, and by the Poet after him,*

> By naked Nature ne'er was understood
> What's Just and Right.1

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0063%3Abook%3D1%3Apoem%3D3%3Acard%3D76

> They who are pleased [to rank all] faults nearly on an equality, are troubled when they come to the truth of the matter: **sense and morality are against them, and utility itself,[6] the mother almost of right and of equity.** When [rude] animals, they crawled[7] forth upon the firstformed earth, the mute and dirty herd fought with their nails and fists for their acorn and caves, afterward with clubs, and finally with arms which experience had forged: **till they found out words and names, by which they ascertained their language and sensations: thenceforward they began to abstain from war, to fortify towns, and establish laws:** that no person should be a thief, a robber, or an adulterer. For before Helen's time there existed [many] a woman who was the dismal cause of war: but those fell by unknown deaths, whom pursuing uncertain venery, as the bull in the herd, the strongest slew. It must of necessity be acknowledged, if you have a mind to turn over the aeras and annals of the world, that laws were invented from an apprehension of the natural injustice [of mankind]. **Nor can nature separate what is unjust from what is just, in the same manner as she distinguishes what is good from its reverse, and what is to be avoided from that which is to be sought: nor will reason persuade men to this, that he who breaks down the cabbage-stalk of his neighbor, sins in as great a measure, and in the same manner, as he who steals by night things consecrated to the gods.**

*must by no Means be admitted. For Man is indeed an Animal, but one of a very high Order, and that excells all the other Species of Animals much more than they differ from one another; as the many Actions proper only to Mankind sufficiently demonstrate. Now amongst the Things peculiar to Man, is his Desire of*2 *Society, that is, a certain Inclination to live with those of his own Kind,* ***not in any Manner whatever, but peaceably, and in a Community regulated according to the best of his Understanding; which Disposition the*3 **Stoicks** ***termed*** **Οἰκείωσιν.4** *Therefore the Saying, that every Creature is led by Nature to seek its own private Advantage, expressed thus universally, must not be granted.*
…

VIII. ***This Sociability, which we have now described in general, or this Care of maintaining Society*1 *in a Manner conformable to the Light of human Understanding,*2 *is the Fountain of Right, properly so called;*** *to which belongs the Abstaining*3 *from that which is another's, and the Restitution of what we have of another's, or of the Profit we have made by it, the Obligation of fulfilling Promises, the Reparation of a Damage done through our own Default, and the Merit of Punishment among Men.*

> 1. **Hence it appears that our Author does not mean that bare natural Instinct in the Rule of the Law of Nature; but that he adds Reason for the Direction of such Instinct, without which it might misguide us, and induce us to consult only our private Interest.** Hence it is also that he elsewhere makes what belongs to the Law of Nature consist in a necessary Conformity to, or Difformity from a reasonable and sociable Nature, Book I. Chap. I. § 12. Num. I. **So that it is ridiculous to object, as Gaspar Ziegler has done, that the Desire of Society, which Grotius lays down as the Foundation of the Law of Nature, might be gratified, though a Man were united in Society and Friendship with one Nation only, or even with one single Family: and that Highwaymen and Pyrates have also their Societies,** &c. **For Reason, which is peculiar to Man, and which is more natural to him than the Desire of Society, of which we find some Traces in Beasts, clearly**

teaches us that it is not proper to confine Sociability and Affection to a small Number of Persons, or to one single Community; but that it ought, in some Manner or other, to extend to all Men, or to all of our own Species; on whom it is equally diffused by Virtue of the Design of Nature, and on the Account of their being naturally all alike and equal. I shall not here enlarge on this Subject, but refer the Reader to the Explication and Defence of the general Principle of Sociability, in my Notes on PUFENDORF's *Law of Nature and Nations*, Book II. Chap. III. So that, on the whole, a Man must be very wrong headed, who will hereafter expose himself by starting and multiplying frivolous Difficulties against a Truth, which when well understood, leaves no room for any plausible Objection.

2. **SENECA makes an excellent Application of this Principle.** "That a Sentiment of Gratitude," says he, "is a Thing valuable in its own Nature, appears from the odious Character which Ingratitude bears in the World, there being nothing so destructive of Concord and the Union of Mankind, as this shameful Vice. **In reality, on what does our Security depend, but on the mutual Exchange of good Offices? Certainly nothing but this Commerce of Benefits can make Life commodious, and put us in a Condition of guarding against unforeseen Insults and Invasions. How miserable would Mankind be, if every one lived apart, and had no Resource, but in himself? So many Men, so many Persons exposed every Moment to be the Prey and Victims of other Animals: Blood continually ready to be spilt, in a Word, Weakness itself. Other Animals are strong enough to defend themselves. All such as are designed for a wandering Life, and whose natural Ferocity doth not allow them to go in Bodies, come into the World armed, as I may say. Whereas Man is defenceless on all Sides, having neither Claws nor Teeth to make him formidable.** But in Society with his like he finds the wanted Succours. Nature to make him amends, has furnished him with two Things, which from weak and miserable as he would have been, render him very strong and powerful; I mean, Reason and a Disposition to Society. So that he, who when alone was not able to resist any other, by this Union becomes Master of all. The Disposition to Society gives him the Dominion over all the Animals, not even excepting those bred in the Sea, which live in another Element. It is Society also that furnishes him with Remedies against Distempers, Assistance in his old Age, Relief and Comfort in the midst of Sorrows and Afflictions. This is what puts him in a Condition of defying Fortune, if I may use the Expression. Take away the Disposition to Society, and you will at the same Time destroy the Union of Mankind, on which the Preservation and Happiness of Life depend. Now to maintain that Ingratitude is not a detestable Vice and what ought to be avoided for its own Sake, but only on the Account of its pernicious Consequences, is no better than destroying the Disposition to Society." *De Benefic.* Lib. IV. Cap. XVIII. GROTIUS.

...

XI. *And indeed, all we have now said would take place,*1 *though we should even grant, what without the greatest Wickedness cannot be granted, that there is no God, or that he takes no Care of human Affairs.* ***The contrary of which appearing*2 *to us, partly from Reason, partly from a perpetual Tradition, which many Arguments and Miracles, attested by all Ages, fully confirm;*** *it hence follows, that God, as being our Creator, and to whom we owe our Being, and all that we have, ought to be obeyed by us in all Things without Exception, especially since he has so many Ways shewn his infinite Goodness and Almighty Power; whence we have Room to conclude that he is able to bestow, upon those that obey him, the greatest Rewards, and those eternal too, since he himself is eternal; and that he is willing so to do ought even to be believed, especially if he has in express Words promised it; as we Christians, convinced by undoubted Testimonies, believe he has.*

XII. *And this now is another Original of Right, besides that of Nature, being that which proceeds from the free Will*1 *of God, to which our Understading infallibly assures us, we ought to be subject: And even the Law of Nature itself, whether it be that which consists in the Maintenance of Society, or that which in a looser Sense is so called, though it flows from the internal Principles of Man, may notwithstanding be justly ascribed*2 *to God, because it was his Pleasure that these Principles should be in us.* ***And in this Sense* Chrysippus3 *and the* Stoicks *said, that the Original of Right is to be derived from no other than* Jupiter *himself; from which Word* Jupiter *it is probable*4 *the* Latins *gave it the Name* Jus.**

1. For this Reason, according to the Sentiment of MARCUS ANTONINUS, every Man, who commits an Act of Injustice, renders himself guilty of Impiety. Ὁ ἀδικῶν ἀσεβεῖ. Lib. IX. § 1. GROTIUS.

2. "When I speak of Nature," says St. CHRYSOSTOM, on 1 Cor. xi. 3. "I mean God; for he is the Author of Nature." And CHRYSIPPUS expresses himself thus. **"For it is not possible to find any other Principle or Origin of Justice, than *Jupiter* and universal Nature; for there we must always begin, whenever we design to treat of Good and Evil."** Book III. *Of the Gods.* GROTIUS.

XIII. *There is yet this farther Reason for ascribing it to God, that God by the Laws which he has given,* ***has made these very Principles more clear and evident, even to those who are less capable of strict Reasoning, and has forbid us to give way to those impetuous*1 *Passions,*** *which, contrary*2 *to our own Interest, and that of others, divert us from following the Rules of Reason and Nature; for as they are exceeding unruly, it was necessary to keep a strict Hand over them, and to confine them within certain narrow Bounds.*

XIV. *Add to this, that sacred History, besides the Precepts it contains to this Purpose,* ***affords no inconsiderable Motive to social Affection, since it teaches us that all Men are descended from the same first Parents. So that in this Respect also may be truly affirmed, what* Florentinus *said in***

another Sense, That*1 *Nature has made us all akin: Whence it follows, that it is a Crime for one Man to act to the Prejudice of another.

1. *Digest.* Lib. I. Tit. I. *De Justitiâ & Jure.* Leg. III. **The Ideas of the Stoicks, and such was this Lawyer, concerning the Origin of Mankind, were very confused; and though they introduced the Divinity, it was in a very different Manner from what MOSES uses in his History of the Creation.** See JUSTUS LIPSIUS's *Physiolog. Stoic.* Lib. III. Dissert. IV. **The *Kindred*, which they conceived as subsisting among Men, did not consist in their considering all Mankind as descended from the same Father and the same Mother; but only in the Conformity of their Nature, and the Principles or Materials of which they thought them composed.** See MARCUS ANTONINUS, Book II. § 1. and GATAKER'S learned Notes on that Place.

https://quod.lib.umich.edu/w/wsfh/0642292.0036.007?view=text;rgn=main#N34-ptr1

One of the most influential works in framing the Enlightenment theory of comparative religion, Bernard de Fontenelle's *De l'origine des fables*, was published in the same year as Lafitau's *Moeurs*. [37] **Alfonso Iacono stresses the importance of the differences between these authors' assumptions, writing that "while Lafitau postulates a sole origin from which peoples' times unfold genetically ... for Fontenelle the principle that unites men and peoples ... [is] the uniformity of human nature."**[38]

...

XVII. *Therefore the Saying, not of* Carneades *only, but of others,*

Interest, that Spring of Just and Right.1

1. ***Atque ipsa Utilitas Justi propè mater, & Aequi.*** HORAT. Lib. I. Sat. III. Ver. 98. Upon which Place, an ancient Commentator on HORACE, whether ACRON or any other Grammarian, makes the following Remark. **"The Poet here opposes the Tenets of the Stoicks; for his Design is to prove that Justice is not Natural, but derived from Interest."** See what St. AUGUSTIN says against this Opinion, *De Doctrina Christiana,* Lib. III. Cap. XIV. GROTIUS.

if we speak accurately, is not true; for the Mother of Natural Law is human Nature itself, which, though even the Necessity of our Circumstances should not require it, would of itself create in us a mutual Desire of Society: And the Mother of Civil Law is that very Obligation which arises from Consent, which deriving its Force from the Law of Nature, Nature may be called as it were, the Great Grandmother of this Law also. ***But to the Law of Nature Profit is annexed: For the Author of Nature was pleased, that every Man in particular*2 *should be weak of himself, and in Want of many Things necessary for living commodiously, to the End we might more eagerly affect Society:*** *Whereas of the Civil Law Profit was the Occasion; for that entering into Society, or that Subjection which we spoke of, began first for the Sake of some Advantage. And besides, those who prescribe Laws to others, usually have, or ought*3 *to have, Regard to some Profit therein.*

XVIII. *But as the Laws of each State respect the Benefit of that State; so amongst all or most States there might be, and in Fact there are, some Laws agreed on by common Consent, which respect the Advantage not of one Body in particular, but of all in general.* ***And this is what is called the Law of Nations,*1 when used in Distinction to the**2 ***Law of Nature. This Part of Law*** **Carneades** ***omitted, in the Division he made of all Law into Natural and Civil of each People or State;*** *when notwithstanding, since he was to treat of the Law which is between Nations (for he added a Discourse concerning Wars and Things got by War) he ought by all means to have mentioned this Law.*

...

XLIII. ***Among Philosophers*** **Aristotle** ***deservedly holds the chief Place, whether you consider his Method of treating Subjects, or the Acuteness of his Distinctions, or the Weight of his Reasons. I could only wish that the Authority of this great Man had not for some Ages past degenerated into Tyranny, so that Truth, for the Discovery of which*** **Aristotle** ***took so great Pains, is now oppressed by nothing more than the very Name of*** **Aristotle.** *I, for my Part, both in this and in all my other Writings, take to myself the Liberty of the ancient Christians, who espoused no Sect of Philosophers; not that they held with those who asserted that nothing can be known, than which there is nothing more foolish; but were of Opinion, that there was no one Sect that had discovered all Truth, nor any but what held something that was true. Therefore to collect into a Body the Truths that were dispersed in the Writings of each Philosopher and each Sect, they conceived to be nothing else, but*1 *to deliver the true Christian Doctrine.*

1. **This is what LACTANTIUS says,** ***Would any one but collect what Truths are scattered through the Writings of each of them, and diffused through the several Sects, and reduce them into one Body, he would not differ from us.*** Instit. Divin. *Lib.* VII. *Cap.* VII. (*Num. 4. Edit. Cellar.*) JUSTIN MARTYR speaks to the same Purpose in his first Apology: *Not*, says he, *because the Doctrines of* PLATO *are entirely different from those of* CHRIST; *but because they are not conformable to them in every Particular.* ***Which is also the Case in regard to the Tenets of the other Philosophers, as of the Stoicks, and of the Poets and Historians; for each of them, being directed by a Ray of the Light of innate Divine Reason, discovered something conformable to it, and spoke well so far*** (p. 34. *Edit. Oxon.*) **TERTULLIAN frequently calls SENECA,** ***our Seneca;*** but then he observes

that, *none but* CHRIST *could give us a complete Body of Spiritual Virtues*, (Adv. Jud. Cap. IX.) St. AUGUSTINE lays it down as a Fact that *those Rules of Morality, which are so highly commended by* CICERO, *are taught and learnt in the Christian Churches, diffused through the whole World*, Ep. CCII. See what the same Father says in regard to the *Platonists*, whom he maintains to be almost Christians, *Ep.* LVI, in his Treatise *De Verâ Religione*, Cap. III. and *Confess.* Book VII. Chap. IX. and Book VIII. Chap. II. GROTIUS.

XLIV. ***Among other Things, (that I may mention this by the by, as not being foreign to our Purpose,) it is not without Reason, that some of the*** **Platonists** ***and ancient***[1] ***Christians seem to dissent from*** **Aristotle** ***in this, that he placed the very Nature of Virtue***[2] ***in a Mediocrity of Passions and Actions;*** *which being once laid down, drove him to this, that of Virtues of a different Kind, as for Instance,*[3] *Liberality and Frugality, he made but one; and assigned*[4] *to Veracity two Opposites between which there is not an equal Contrariety*, viz. *Boasting and false Modesty; and imposed the Name of Vice upon some Things, which either are not in Nature, or in themselves are not Vices, as, the*[5] *Contempt of Pleasure and*[6] *Honours, and an Insensibility to Injuries, which*[7] *hinders us from being angry against Men.*

XLV. *But that this Principle of Mediocrity, taken universally, is not rightly laid, appears from the Instance of Justice itself, whose Opposites, too much and too little, when he could not find in the Affections and their subsequent Actions,*[1] *he sought for* Both *in the Things themselves about which Justice is conversant.* ***Which very thing is in the first Place to leap from one kind of Thing to another, which he deservedly blames in others;*** *and in the next Place, to receive less*[2] *than one's Due may indeed happen to be a Vice, when the Circumstances of himself or his Family cannot allow of any Abatement; but certainly it cannot be repugnant to Justice, since it consists wholly in abstaining from that which is another Man's. Like to which Mistake is that of his not allowing*[3] *Adultery proceeding from Lust, and Murder from Anger, to belong properly to Injustice: Whereas the very Nature of Injustice consists in nothing, else, but in the Violation of another's Rights; nor does it signify, whether it proceeds from Avarice, or Lust, or Anger, or imprudent Pity, or Ambition, which are usually the Sources of the greatest Injuries. For to resist all Temptations of what Kind soever, and that for this only Reason*, viz. *the preserving of Human Society inviolable, is indeed the proper Business of Justice.*

XLVI. *To return from this Digression, true indeed it is, that to some Virtues it happens, that they moderate the Affections, yet not for the Reason, that it is the proper and perpetual Office of all Virtue to do so; but because right Reason, which Virtue always follows,*[1] *prescribes a Measure to be followed in some Things; in others it excites us to the utmost we are capable of.* ***We cannot, for instance,***[2] ***serve God with too much Ardour; for the Crime of Superstition consists not in serving God with too much Ardour, but in serving him perversely. Neither can we too much desire eternal Happiness, nor too much dread eternal Misery, nor too much hate Sin.*** *It is therefore truly said of* Gellius,[3] *there are some Things whose Extent has no Bounds, and which are so much more commendable as they are carried to a higher Pitch.* Lactantius,[4] *after having discoursed largely on the Passions, says*, Wisdom does not consist in moderating them, but in regulating the Impressions of the Causes that produce them, for they are excited by external Objects. Neither ought a Restraint to be put principally upon them, because it is possible for them to be very weak in those who commit the greatest Crime, and to be very violent without leading to any Crime at all. ***Our Purpose is to set always a high Value upon*** **Aristotle,** ***but so as to reserve to ourselves the same Liberty which he himself took with his Masters,*** *for the Sake of finding Truth.*
…

XLIX. *The Authority of those Books which Men inspired by God, either writ or approved of, I often use, but with a Difference of the Old and New Law. Some there are who*[1] *urge the Old Law for the very Law of Nature, but they are undoubtedly in the wrong: For many Things*[2] *in it proceed from the Free Will of God, which yet is never repugnant to the Law of Nature itself; and so far an Argument may be rightly drawn from it,* ***provided we carefully distinguish the***[3] ***Rights of God, which God sometimes exercises by the Ministry of Men, from the Rights of Men among themselves.***

> 3. **From what God is pleased to do or command by Virtue of his supreme Authority over the Life and Goods of his Creatures, no Consequence can be drawn that the same Thing is ordered in Regard to Men, or allowed by the Law of Nature.** On this Occasion are alledged the Example of *Abraham*, whom God commanded to sacrifice his Son: And that of the *Israelites* who received an express Order from him to carry off the *Egyptians* Gold and Silver Vessels, and utterly exterminate the seven Nations of *Canaanites*, after having seized on their Country, and all their Possessions.

…

LI. *The* New Testament *I use for this Purpose,* ***that I may shew, what cannot be elsewhere learned, what is lawful for Christians to do; which Thing itself, I have notwithstanding, contrary to what most do, distinguished from the Law of Nature; as being fully assured, that in that most holy Law a greater Sanctity is enjoined us, than the meer Law of Nature in itself requires.***
…

LIV. *Of those that profess the Knowledge of the* Roman *Laws, there are three Sorts.* ***The first is of those whose Works appear in the Digest, the Codes of*** **Theodosius** ***and*** **Justinian,** ***and the Novels. The second is, of those who succeeded***[1] **Irnerius,** ***as***[2] **Accursius, Bartolus,**[3] ***and many others, that for a long time reigned at the Bar. The third comprehends***[4] ***those who joined the Knowledge of the*** **Belles Lettres** ***with the Study of Laws. For the first I have a great Deference; for they both supply us with Reasons, and those often the very best, to demonstrate what belongs to the Law of Nature;*** *and also*

*often give Testimony to it, as well as to the Law of Nations; yet so as that they, as well as others, often*5 *confound these Words, nay and often call that the Law of Nations, which prevails among some Nations only, and that not by a sort of tacit Agreement, but by Imitation of one another, or even by a casual Consent. But again,* ***those Things which really belong to the Law of Nations, they often handle promiscuously and indiscriminately with those that belong to the*** **Roman** ***Law,*** *as appears from the*6 *Title concerning* Captives *and* Postliminy. *Therefore we took Pains to have these distinguished.*

The French philosopher Charron was one of the men least demoralised by party spirit, and least blinded by zeal for a cause. In a passage almost literally taken from St. Thomas, he describes our subordination under a law of nature, to which all legislation must conform; and he ascertains it not by the light of revealed religion, but by the voice of universal reason, through which God enlightens the consciences of men. **Upon this foundation Grotius drew the lines of real political science.** In gathering the materials of international law, he had to go beyond national treaties and denominational interests for a principle embracing all mankind. **The principles of law must stand, he said, even if we suppose that there is no God. By these inaccurate terms he meant that they must be found independently of revelation.** From that time it became possible to make politics a matter of principle and of conscience, so that men and nations differing in all other things could live in peace together, under the sanctions of a common law. Grotius himself used his discovery to little purpose, as he deprived it of immediate effect by admitting that the right to reign may be enjoyed as a freehold, subject to no conditions.

When Cumberland and Pufendorf unfolded the true significance of his doctrine, every settled authority, every triumphant interest recoiled aghast. None were willing to surrender advantages won by force or skill, because they might be in contradiction, not with the Ten Commandments, but with an unknown code, which Grotius himself had not attempted to draw up, and touching which no two philosophers agreed. It was manifest that all persons who had learned that political science is an affair of conscience rather than of might or expediency, must regard their adversaries as men without principle, that the controversy between them would perpetually involve morality, and could not be governed by the plea of good intentions, which softens down the asperities of religious strife. Nearly all the greatest men of the seventeenth century repudiated the innovation. In the eighteenth, the two ideas of Grotius, that there are certain political truths by which every State and every interest must stand or fall, and that society is knit together by a series of real and hypothetical contracts, became, in other hands, the lever that displaced the world.

Samuel Pufendorf was a student of Grotius and developed his theory in Sweden. Neither Sweden, nor his native Germany resembled Spain, England or Holland in colonial method. **Pufendorf does not begin with war as a given and then consider the conditions under which it may be just, neither does he begin with the origins of property and then consider man's natural state. These are the premises of and the questions put to political theorists living within an aggressive colonial power. Pufendorf, unlike Grotius or Locke, is not attempting to reconcile natural law with his patron's colonial needs.**
…

Unlike Grotius, Pufendorf begins his examination of the natural state not in the context of property but of moral science. Like Grotius, he considers man to be in a state of natural liberty but one which must be “conditioned by a certain restraint of sound reason and natural law.”37 **Pufendorf derives the 'natural state' by stripping civil man of his civilities.** He begins his discussion of natural man, thus:

> By the natural state of man we [understand] that condition for which man is understood to be constituted, by the mere fact of his birth, all inventions and institutions either of man or suggested to him from above, being disregarded.38

It is interesting to note the natural state for Pufendorf is something which existed only in a primitive time. **He does not refer, unlike Locke, Hobbes and Grotius, to America or other parts of the colonial world as examples of contemporary natural states.**39 **On the contrary, Pufendorf makes clear that he believes the inhabitants of the Americas are not atomised individuals within one great natural state, as Locke and Grotius seem to believe,** but members of nations who must be treated with the same respect as those of European states.
…

Pufendorf challenges Hobbes's position that the state of nature is concurrently a state of war. **Quoting "the infallible authority of the sacred scriptures," Pufendorf concludes, "the natural state of men was one of peace rather than war and that men were more like friends to one another than enemies."**44 This natural peace is based on natural law but is "a weak and untrustworthy thing and therefore ... it is, without other safeguards but a poor custodian of man's safety."45
…

Thus, while consent was crucial to both Grotius's and Pufendorf's conceptions of property and was to be attacked directly by Locke, it nevertheless played profoundly different roles in each theorist's thought. **For Grotius, the original community of things was positive in that each individual had the right to claim, through simple use, private ownership of a thing.** An agreement by consent therefore, simply recognized those private possessions which individuals had already claimed as their own. **Pufendorf, on the other hand, begins with a negative form of community where use implied no right of ownership and the agreement could give rise to any form of private or communal division of property.**
…

According to Richard Tuck, the removal of the state's right to punish undermines the Europeans' claims to have the right to attack native tribes in the new colonies such as the Americas.56

This becomes explicit when Pufendorf directly contradicts Grotius's claim that war can be waged against "those who feed on human flesh," revealing an understanding that such arguments were often used to justify attacks on Arnericin natives as a whole.

> **Thus we cannot agree…that sufficient cause for waging war upon the Americans can be found in the fact that they can be held condemned by the very law of nature, because it is their custom to sacrifice men and eat human flesh.** On this matter we should carefully consider whether a Christian prince can attack the Indians, as men condemned by nature, merely because they eat the flesh of their own religion, or because they eat that of strangers. And in connexion with their treatment of strangers we must again inquire, whether those foreigners come to their shores as enemies and robbers, or come as innocent guests or driven by storms – for only in the last case does a right of war lie with those whose citizens are treated with such cruelty, not in the others.57

…

The starting point for Locke and Grotius is the same. **Property is assumed to be given by God as a positive communal right of ownership.** Nothing could reflect more clearly the aggressive colonialism of the Dutch and English than the assumption that we actually possess everything on earth and it is up to each individual person or nation to grab its claim before anyone else does.

Pufendorf, on the other hand, believes that nobody owns anything but everyone is free to use, rather than possess, the world.
…

Locke writes, "It seems to some a very great difficulty, how any one should ever come to have a *Property* in any thing."8 **The 'some' that Locke refers to includes Samuel Pufendorf, the natural law theorist.** Locke's statement at the end of this paragraph that he hopes to show how men come to have a property in several parts of the 'common' "without any express Compact of all the Commoners" is a clear reference to Pufendorf's insistence that property can only be made private when consented to by all.9 As James Tully concludes in reference to this paragraph:

> Who are the some who find difficulties with this particular problem of individuation of common property? ... one member of the 'some' is clearly Pufendorf.10

…

Pufendorf challenged both Grotius and the Spanish legal theorist Francisco Vitoria on the right of entering new lands, claiming that the Indians of the Americas have greater rights, by natural law, than either of these colonial powers had yet granted them. **Pufendorf most pointedly rejected the notion of a natural state of nomadic and solitary figures amongst the American Indians,** in order to claim that Indian nations, like those of Europe, have an equal right to defend themselves from the encroachment of others.

https://books.google.fi/books?id=VJ1WDwAAQBAJ&lpg=PP1&hl=fi&pg=PA53#v=onepage&q&f=false

In a century that saw a flourishing discourse about the rights of man, Boulainvilliers, in his political and historical writings between 1700 and 1722, focused particularly on the rights of nobles. Anticipating the abbé Mably, who would draw on France's deep medieval past to articulate the primordial rights of the nation, Boulainvilliers celebrated a primitive nation whose rights were nonetheless restricted to an elite.

In a time when increased attention was being given to the power of education and environmental conditioning, Boulainvilliers aggressively argued for the determining rights of lineage and *race*.
…

By right of conquest, in Boulainvilliers's accounting, the Franks had reduced the Gauls to a form of servility that made inequality an organic feature of the emerging French social order. It bears emphasizing, however, that in making this point Boulainvilliers acted less as an apologist for violence than as a defender of historical contingency. **His portrayal of Frankish superiority offered not a moral argument about "might making right" but a political argument about the undeniable social effects of the exercise of power in history. "Violence," he wrote in his "Dissertation on the French Nobility" of 1700, "has established the distinctions between liberty and slavery, nobility and common status."**4

https://www.marxists.org/archive/plekhanov/1895/anarch/bourgeois-revolution.htm

> **When the representatives of the nobility and clergy, in one of the first sessions of the estates, fell back upon the foundation of their privileges—the historic right of conquest**—the theoretician of the bourgeoisie, Abbé Sieyès, proudly replied: '*Rien que cela, messieurs? Nous serons conquérants a notre tour!* '—which means: 'Nothing but that, gentlemen? Well, we too shall be conquerors in our turn!'

For this reason, he acknowledged in his *Memoir for the Nobility of France* of 1716, that one could be justified in regarding nobility itself as "odious" because of the "horrifying violence" attendant upon its creation.5 **"It is certain," Boulainvilliers granted, "that according to natural law [*droit commun*] all men are born equal" – thus demonstrating, already in 1700, his awareness of and debt to the natural law arguments that were so critical to the formation of Enlightened attitudes in the eighteenth century.**
…

Boulainvilliers thus celebrated nobility both as a historical inevitability and as a positive moral good. **The distinction between noble and commoner "is of such long-established usage in the world that it has acquired the force of a natural law (*loi naturelle*)."**13
…

The words equality, liberty, rights, and nation thus resonated within a very particular register of meaning for Henri de Boulainvilliers. **He spoke this language for a specific linguistic community, one might say – the community of aggrieved nobles anxious about the multiplying status distinctions within the second estate and eager to combat the arbitrariness of modern royal authority. He used a language of liberation and justice without regard for its possible appropriation by a wider community users and without regard for its potential to fuel a critique of nobility itself.**
…

Henri de Boulainvilliers, of course, had found much worth recovering in the Frankish forests, including the pure principles with which he hoped to liberate the modern nobility from its unwarranted state of servitude. But by burrowing so deeply into that time of "blindness and violence," Boulainvilliers also seems to have blinded himself and his many admiring readers to the multiple visions of nationhood that the prospect of liberation from despotism would finally yield. **After all, article one of the Declaration of the Rights of Man – "men are born and remain free and equal in rights" – had already been anticipated by Boulainvilliers himself. Not only were men "born equal" in his eyes, but they also "have naturally equal shares of reason and humanity."**53 What he failed to recognize, and what seems to have surprised the nobility at large in 1789, what that the habit of criticizing unjust hierarchies, once widely dispersed across a population practiced in the language of equality and rights, might move actors outside the nobility to contemplate the destruction of legal hierarchy itself.

https://archive.org/details/enlightenmentint0000gayp/page/406/mode/2up?view=theater

A few philosophers among the ancients, notably those cosmic cosmopolitans, the Stoics, had deplored slavery; but inclined as they were to accept the course of the world with dignified resignation, they argued not for its abolition in law, but, as it were, in men's minds. They taught that the slave is free if he learns to disdain cruel fortune, freer indeed than his master, driven by the anxieties and crushed by the burdens that society imposes in a man of wealth and rank. Such teachings may have done something for the morale of educated slaves; they did not lead to the abolition of slavery. **The Roman Law described slavery as contrary the laws of nature and solely sanctioned by the laws of men, the *ius gentium*;** Christianity, with its doctrine of individual salvation, contained and concealed a kind of "latent egalitarianism."9 But for centuries, **the tensions that the reasonings of Roman lawyers and doubts of Christian theologians introduced into the discussion of slavery were repressed, or, rather, resolved, in favor of the slaveholder. In the sixteenth century, Jean**

Bodin, the greatest theorist of sovereignty, reopened the debate, arguing that there were sound, in fact compelling, moral and legal arguments against an institution that that positive law had condoned for centuries; in the seventeenth, and in the philosophes' own century, a sense of moral outrage over slavery, even of guilt, spread to a certain number of Quakers and other Protestant Dissenters, and to a handful of Anglicans and Catholics who took the virtue of Christian charity seriously.
…

Quakers like William Penn had still owned slaves; with his descendants, conscience, and (as both the abbé Raynal and Adam Smith noted) the relative insignificance of slaves to the economy in Pennsylvania, induced them to abolish slavery among themselves and to petition for general emancipation. Earlier, as early as 1702, Daniel Defoe, as usual one of the first to discern, applaud, and encourage dawning humanitarian impulses, had vigorously satirized the slave trade. And by mid-century, Horace Walpole began to punctuate his correspondence with energetic denunciations of slavery in general, and of the slave trade in particular.
…

The denunciations of slavery by Horace Walpole and Samuel Johnson, by Granville Sharp and the marquis de Lafayette, came half a century after Montesquieu first vented his antislavery sentiments in the *Lettres persanes*. Before Montesquieu, certainly, objections to slavery had been comfortably unspecific. **It is true that John Locke had assailed the very idea of slavery in the first sentence of his *First Treatise*: "Slavery," he had written there, "is so vile and miserable an estate of man, and so directly to the temper and courage of our nation, that it is hardly to be conceived that an Englishman, much less a gentleman, should plead for it."** But then, this energetic declaration was really directed against Filmer's paternalistic theory of government; and besides, Locke's part in the establishment of the Carolina colonies, and his investments in the slave-trading monopoly, the Royal African Company, shows plainly enough that actual slavery did not trouble his conscience. **It may be charged that it was easy for Montesquieu and his fellow philosophes to detest slavery: they had no financial stake in it;** after all, when one of them, Thomas Jefferson, did have such a stake, he might denounce it vigorously but could still live with, and off it. But at least, **except for those philosophes who happened to be Virginians, their conduct did not compromise with their pronouncements.**

https://archive.org/details/enlightenmentint0000gayp/page/420/mode/2up?view=theater

Samuel Johnson was a passionate adversary of slavery. Boswell, much to his regret, was constrained to report that Johnson, "upon one occasion, when in company with some very grave men at Oxford," had offered the toast: "'Here's to the next insurrection of the negroes in the West Indies.'"5 Johnson deeply resented the clamor of American colonists for freedom as nothing less than revolting hypocrisy: "How is it," he asked, "that we hear the loudest *yelps* for liberty among the drivers of negroes?"6
…

Johnson's abolitionism rose above a humane and angry sympathy for particular victims to general principles, **and his expression of those principles sounded practically like a plagiarism from a writer whom he detested almost as much as he detested slavery:** Jean-Jacques Rousseau. In 1777, joining in the legal struggle initiated by Granville Sharp to have slavery declared illegal in Britain, Johnson dictated a memorandum to Boswell in which he expressed his doubts **"whether slavery can ever be supposed the natural condition of man. It is impossible not to conceive that men in their original state were equal."**

https://archive.org/details/enlightenmentint0000gayp/page/414/mode/2up?view=theater

When Voltaire argued, in the *Questions sur l'Encyclopédie*, that slavery is an innovation that violates man's original free nature, he was saying what Montesquieu and others had said before him. **But then he went beyond Montesquieu: partisans sometimes suggest that a poor laborer would rather be a pampered slave, but ask the laborer – he will cling to his freedom.** And a slave, in turn, will choose freedom over slavery, even if he must leave the kindest of masters to face unforeseen hardships. **Lawyers like Grotius and Pufendorf may say what they like, if they hold that slavery is ever legal they are wrong and, Voltaire insists, it is nature that proves them wrong.**3

Other philosophes also pitted the law of nature against the natural lawyers. Jaucourt argued in the *Encyclopédie* that a Negro cannot divest himself of his natural right, which is freedom, and that no one else can legally deprive him of it.4 Rousseau argued the same case in the first book of his *Contrat social*: it is true, as Aristotle and other defenders of slavery since his time have said, that some men are born slaves, but they have mistaken the effect for the cause – men born into slavery, knowing nothing else, may lose the desire for freedom and love their chains. **"So if there are slaves by nature, that is because there have been slaves against nature. Force made the first slaves, their cowardice perpetuated their slavery."**5 **But force, Rousseau insists, does not create rights. A man who gives himself away is insane, and even if one actually could enter slavery voluntarily, he cannot**

commit his children: "They are born men, and free."6 Grotius claims to derive his argument from international law: the conqueror may spare his prisoners in return for their selling their own freedom. But this, Rousseau objects, is a misreading of that law: war is a conflict between states which in no way entitles the victor to kill the vanquished. Grotius's supposed legal argument is nothing better than a sophism; slavery rests on a gigantic illogicality that touches man in his very essence. "To renounce one's liberty," Rousseau concludes in an emphatic paragraph, "is to renounce one's humanity, one's human rights, and even one's duties – *sa qualité d'homme, aux droits de l'humanité, même à ses devoirs*. There is no possible reparation for the one who renounces everything. Such a renunciation is incompatible with the nature of man; it is to remove all morality from his actions and all freedom from his will."7 **By making his particular case against slavery a special instance of his general case for freedom, Rousseau supplied abolitionism with arguments of absolute universality.**

https://archive.org/details/enlightenmentint0000gayp/page/456/mode/2up?view=theater

Reformers found arguments from natural law extraordinarily convenient: **the distinction between nature and convention that lay at its heart, a distinction, it was argued, that was easy to discover in the hearts of good men everywhere and therefore universal in its application,** made it a potentially devastating critic of existing laws and institutions. It gave rational men good reasons for disapproving and perhaps disobeying positive law. **Aristotle had already said that an unjust law is not a law, and Roman lawyers had drawn the implication from this distinction by arguing that while the positive law depends quite simply on man's will, the natural law rests firmly on his noblest endowment, his reason. Slavery, as we know, was legal in the courts of men, but not in the court of nature.**

For the Stoics and other natural lawyers in antiquity, these claims had metaphysical, even religious status; the appeal from positive law to natural law, from *lex scripta* to *recta ratio*, was an ethical injunction: as a participant in the universal right reason which he often violates but to which he is still subject, man has a duty to discover what he ought to do. **In the Christian era, natural law had been overshadowed by higher laws; compared to divine edicts manifesting themselves in revelations, to Scriptures and the decrees of the church, it was humble enough.** But humble things had their place in the Christian scheme of the world, and natural law served effectively in the pious endeavor to discover the legal order in which Christian men should live. Then, in the seventeenth century, **when natural-law doctrines like the state of nature, the social contract, and natural rights became staples of political argumentation, natural law was secularized.** Grotius, the greatest among the founders of modern natural law and a widely read if controversial author in the Enlightenment, was anything but impious, yet he insisted that the law of nature would retain its universal validity, and should still be obeyed, even if there were no God. Early in the Enlightenment, Montesquieu said precisely the same thing: **"Even if there should be no God, we should always love justice"; indeed, "though we might be free from the yoke of religion, we should never be free from the yoke of equity," for in truth, "justice is eternal and does not depend on human conventions."**5 **Montesquieu's beloved Cicero had not put it any differently.**

https://archive.org/details/enlightenmentcon0000isra/page/294/mode/2up?view=theater

What was most problematic, then, about Montesquieu's 'structuralism' from any 'enlightened' viewpoint – radical or moderate – was that it precluded any absolute standard, or fixed point of justice and liberty, by which it becomes possible to condemn despotism, slavery, or serfdom, and, in sharp contrast, to Boulainvilliers, Voltaire, and Mably, precludes also any mechanism of 'revolution.' **Admittedly, Montesquieu's instinctive aversion moves him to make an exception in the case of black slavery, and step momentarily outside his structural framework: since all men are born equal 'il faut dire que l'esclavage est contre la nature'; but literally only for a moment.**161 Slightly further on, reverting to his system of climate of *moeurs*, he suggest that in certain lands slavery too 'est fondé sur une raison naturelle.' With respect to despotism and serfdom, moreover, this difficulty with his system is left completely unmitigated.

https://en.wikisource.org/wiki/The_Spirit_of_Laws_(1758)/Book_XV

SLAVERY, properly so called, is the establishment of a right which gives to one man such a power over another, as renders him absolute master of his life and fortune. **The state of slavery is in its own nature bad. It is neither useful to the master nor to the slave;** not to the slave, because he can do nothing through a motive of virtue; not to the master, because by having an unlimited authority over his slaves, he insensibly accustoms himself to the want of all moral virtues, and from thence grows fierce, hasty, severe, choleric, voluptuous, and cruel.

In despotic countries, where they are already in a state of political slavery, civil slavery is more tolerable than in other governments. Every one ought to be satisfied in those countries with necessaries and life. Hence the condition of a slave is hardly more burdensome than that of a subject.

But in a monarchical government, where it is of the utmost importance that human nature should not be debased, or dispirited, there ought to be no slavery. In democracies, where they are all upon an equality; and in aristocracies, where the laws ought to use their utmost endeavours to procure as great an equality as the nature of the government will permit, slavery is contrary to the spirit of the constitution; **it only contributes to give a power and luxury to the citizens which ought not to have.**

CHAP. II. *Origin of the Right of Slavery among the Roman Civilians.*

ONE would never have imagined that slavery should owe its birth to pity, and that this should have been excited three different ways[1].

The law of nations, to prevent prisoners from being put to death, has allowed them to be made slaves. The civil law of the Romans empowered debtors, who were subject to be ill used by their creditors, to fell themselves. And the law of nature requires, that children, whom a father reduced to slavery is no longer able to maintain, should be reduced to the same state as the father.

These reasons of the civilians are all false. It is false that killing in war is lawful, unless in a case of absolute necessity: but when a man has made another his slave, he cannot be said to have been under a necessity of taking away his life, since he actually did not take it away. **War gives no other right over prisoners than to disable them from doing any further harm, by securing their persons. All nations[2] concur in detesting the murdering of prisoners in cold blood.**

2. Excepting a few Canibals.

2. Nor is it true, that a freeman can sell himself. Sale implies a price; now when a person sells himself, his whole substance immediately devolves to his master; the master therefore in that case gives nothing, and the slave receives nothing. You will say, he has a *peculium*. But this peculium goes along with his person. If it is not lawful for a man to kill himself, because he robs his country of his person, for the same reason he is not allowed to sell himself. The liberty of every citizen constitutes a part of the public liberty; and in a democratical state is even a part of the sovereignty. **To sell one's citizenship[3] is so repugnant to all reason, as to be scarce supposeable in any man.**

3. I mean slavery in a strict sense, as formerly among the Romans, and at present in our colonies.

If liberty may be rated with respect to the buyer, it is beyond all price to the seller. The civil law, which authorizes a division of goods among men, cannot be thought to rank among such goods, a part of the men who were to make this division. The same law annuls all iniquitous contracts; surely then it affords redress in a contract where the grievance is most enormous.

The third way is birth; which falls with the two former. For if a man could not sell himself, much less could he sell an unborn offspring. It a prisoner of war is not to be reduced to slavery, much less are his children.

The lawfulness of putting a malefactor to death, arises from this; the law, by which he is punished, was made for his security. A murderer, for instance, has enjoyed the benefit of the very law which condemns him; it has been a continual protection to him; he cannot therefore object against it. **But it is not so with the slave. The law of slavery can never be beneficial to him; it is in all cases against him, without ever being for his advantage; and therefore this law is contrary to the fundamental principle of all societies.**

If it be pretended, that it has been beneficial to him, as his master has provided for his subsistence; slavery at this rate should he limited to those who are incapable of earning their livelihood. But who will take up with such slaves? As for infants, nature, who has supplied their mothers with milk, had provided for their sustenance, and the remainder of their childhood approaches so near the age in which they are most capable of being of service, that he who supports them cannot be said to give them an equivalent, which can intitle him to be their master.

Nor is slavery less opposite to the civil law than to that of nature. **What civil law can restrain a slave from running away, since he is not a member of society, and consequently has no interest in any civil laws?** He can be retained only by a family law, that is, by the master's authority.
...

I WOULD as soon say that religion gives its professors a right to enslave those who dissent from it, in order to render its propagation more easy.

This was the notion that encouraged the ravagers of America in their iniquity[5]. Under the influence of this idea, they founded their right of enslaving so many nations; for these robbers, who would absolutely be both robbers and Christians, were superlatively devout.

Lewis XIII.[6] was extremely uneasy at a law, by which all the negroes of his colonies were to be made slaves; but it being strongly urged to him as the the readiest means for their conversion, he acquiesced without further scruple.
...

CHAP. VI. *The true Origin of the Right of Slavery.*

IT is time to enquire into the true origin of the right of slavery. It ought to be founded on the nature or things; let us see if there be any cases where it can be derived from thence.

In all despotic governments, people make no difficulty in selling themselves; the political slavery in some measure annihilates the civil liberty.

According to Mr. Perry,[7] the Muscovites sell themselves very readily: their reason for it is evident; their liberty is not worth keeping.

At Achim every one is for selling himself. Some of the chief lords[8] have not less than a thousand slaves, all principal merchants, who have a great number of slaves themselves, and these also are not without their slaves. Their masters are their heirs, and put them into trade. In those states, the freemen, being overpowered by the government, have no better resource than making themselves slaves to the tyrants in office.

This is the just and rational origin of that mild law of slavery, which obtains in some countries: and mild it ought to be, as founded on the free choice a man makes of a master, for his own benefit; which forms a mutual convention betwixt the two parties.

CHAP. VII. *Another Origin of the Right of Slavery.*

THERE is another origin of the right of slavery, and even of the most cruel slavery, which is to be seen among men.

There are countries where the excess of heat enervates the body, and renders men so slothful and dispirited, **that nothing but the fear of chastisement can oblige them to perform any laborious duty:** slavery is there more reconcileable to reason; and the master being as lazy with respect to his sovereign, as his slave is to him, this adds a political to a civil slavery.

Aristotle[9] endeavours to prove, that there are natural slaves, but what he says is far from proving it. If there be any such, I believe they are those of whom I have been speaking.

But as all men are born equal, slavery must be accounted unnatural, though in some countries it be founded on natural reason; and a wide difference ought to be made betwixt such countries, and those where even natural reason rejects it, as in Europe, where it has been so happily abolished.

Plutarch, in his life of Numa, says, that in Saturn's time, there was neither slave nor master. Christianity has restored that age in our climates.

CHAP. VIII. *Inutility of Slavery among us.*

NATURAL slavery, then, is to be limited to some particular parts of the world. In all other countries, even the most laborious works of society may be performed by freemen.

Experience verifies my assertion. **Before Christianity had abolished civil slavery in Europe, working in the mines was judged too toilsom for any but slaves or malefactors: but at present, there are men employed in them, who are known to live[10] happily.** They have, by some small privileges, encouraged this profession; to an increase of labour, they have joined an increase of gain; and have gone so far, as to make them better pleased with their condition than with any other which they could have embraced.

10. As may be seen in the mines of Hartz in Lower Saxony, and in those of Hungary.

No labour is so heavy, but it may be brought to a level with the workman's strength, when regulated by equity, and not by avarice. The violent fatigues which slaves are made to undergo in other parts, may be supplied by commodious machines, invented by art, and skilfully applied. The Turkish mines in the Bannat of Temeswar, though richer than those of Hungary, did not yield so much; because their invention reached no further, than the strength of their slaves.

I know not whether this article be dictated by my understanding, or by my heart. Possibly there is not that climate upon earth, where the most laborious services might not, with proper encouragement, be performed by freemen. Bad laws having made lazy men; they have been reduced to slavery, because of their laziness.

CHAP. IX. *Several Kinds of Slavery.*

SLAVERY is of two kinds, real and personal. The real annexes the slave to the land, which Tacitus[11] makes the condition of slaves among the Germans. They were not employed in the family; a stated tribute of corn, cattle, or other moveables, paid to their master, was the whole of their servitude. **And such a servitude still continues in Hungary, Bohemia, and several parts of lower Germany.**

Personal slavery consists in domestic services, and relates more to the master's person.

The worst degree of slavery is, when it is at once both real and personal, as that of the Helotes among the Lacedæmonians. They underwent the fatigues of the field, and suffered all manner of insults within the house. This Helotism is contrary to the nature of things. The real slavery is to be found only among nations[12] of a plain manner of living; all family business being done by the wives and children. The personal slavery is peculiar to voluptuous nations; luxury requiring the service of slaves in the house. But Helotism joins in the same persons the slavery established by voluptuous nations, and that of the most simple.
…

Men grow reconciled to every thing, and even to servitude, if not aggravated by the severity of the master. **The Athenians treated their slaves with great lenity; and this secured that state from the commotions raised by the slaves among the austere Lacedæmonians.**

It does not appear that the primitive Romans met with any trouble from their slaves. Those civil wars[22], which have been compared to the Punic wars, were the consequences of their having divested themselves of all humanity towards their slaves.

22. Sicily, says Florus, suffered more in the servile than in the Punic war. Lib. 3.

A frugal and laborious people generally use their slaves more kindly, than those who are above labour. **The primitive Romans lived, worked, and eat with their slaves; they behaved towards them with great justice and humanity.** The greatest punishment they made them suffer, was to make them pass before their neighbours with a forked piece of wood on their backs. Their manners were sufficient to secure the fidelity of their slaves; there was no necessity for laws.

But when the Romans aggrandized themselves; when their slaves were no longer the companions of their labour, but the instruments of their luxury and pride; **as they then wanted morals, they had need of laws.** It was even necessary for these laws to be of the most terrible kind, in order to establish the safety of those cruel masters, who lived in the midst of their slaves, as in the midst of enemies.
…

The law of Moses was extremely severe. "If any one struck his slave so that he died under his hand, he was to be punished; but if he survived a day or two, he was not, because he was as his money." **Strange that a civil law should thus amongst these people relax the law of nature!**

http://turretinfan.blogspot.com/2013/04/the-bible-and-slavery-some-limitations.html

I'm sure that the regulations above are insufficient for Enlightenment and Post-Enlightenment anti-slavery proponents, but the regulations were actually pretty substantial. While slaves were recognized as property of their owners (see the 10th commandment for example) and while God uses the master-slave metaphor to describe his relationship to us, the regulations on slavery in Israel maintained the fact that the slaves had the image of God and consequently were to receive the sign of the covenant, were to be treated leniently, were not to be killed, and were to be freed in many cases.

http://christian-thinktank.com/qnoslave.html

Summary: It should be QUITE CLEAR from the above, **that the institution in the Mosaic law involving voluntary, fixed-term, flexible, and protected servant-laborer roles was unlike "western", chattel labor in almost ALL RESPECTS.** To label it as 'slavery', except in the most general/metaphorical sense of the word, is significantly inappropriate.

By a law of the Greeks[30] a slave too roughly treated by his master, might insist upon being sold to another. In the latter times there was a law of the same nature[31] at Rome. A master displeased with his slave, and a slave with his master, ought to be separated.

30. Plutarch on *superstition.* 31. See the constitution of Antoninus Pius, *Institut. Lib. 1. tit. 7.*
…

At Athens[34] he who had abused the slave of another, was punished severely, and sometimes even with death. The law of Athens was very reasonable, in not adding the loss of safety to that of liberty.

https://archive.org/details/enlightenmentcon0000isra/page/828/mode/2up?view=theater

The moment *L'Esprit des lois* appeared, recalled La Beaumelle in 1750, it was as eagerly sought after everywhere as it had, for years, been impatiently awaited by his friends; in fact, he asserted, **everyone who was not 'Jésuite ou Janséniste, dévôt ou bel-esprit' (an admission that the real *esprits forts* were unimpressed), judged it the triumph of 'l'humanité, le chef d'oeuvre du genie, la Bible des politiques.'**70
…

La Beaumelle's claim that a dozen editions of *L'Esprit des lois* sold out in six months was by no means an exaggeration: for around fifteen editions had appeared by the end of 1749 in four different countries.72 From Ireland to Italy, *L'Esprit des lois* resoundingly won **the unprecedented status of being a philosophical best-seller,** something which undoubtedly struck some royal officials, as well as many churchmen, as distinctly disturbing in itself: for this hardly seems to bear out Voltaire's maxim that few men both read and think. How could any work of *philosophie* become a best-seller?

https://oll.libertyfund.org/title/sharswood-commentaries-on-the-laws-of-england-in-four-books-vol-1#lf1387-01_label_2250

I. As to the several sorts of servants: I have formerly observed (a) that pure and proper slavery does not, nay, cannot, subsist in England: such, I mean, whereby an absolute and unlimited power is given to the master over the life and fortune of the slave. And indeed it is repugnant to reason, and the principles of natural law, that such a state should subsist anywhere. **The three origins of the right of slavery assigned by Justinian** (b) **are all of them built upon false foundations.** (c)

(c) Montesq. Sp. L. xv. 2.

As, first, slavery is held to arise "jure gentium," from a state of captivity in war; whence slaves are called *mancipia*, *quasi manu capti*. The conqueror, say the civilians, had a right to the life of his captive; and, having spared that, has a right to deal with him as he pleases. But it is an untrue position, when taken generally, that by the law of nature, or nations, a man may kill his enemy: he has only a right to kill him, in particular cases: in cases of absolute necessity, for self-defence; and it is plain this absolute necessity did not subsist, since the victor did not actually kill him, but made him prisoner. **War is itself justifiable only on principles of self-preservation; and therefore it gives no other right over prisoners but merely to disable them from doing harm to us, by confining their persons: much less can it give a right to kill, torture, abuse, plunder, or even to enslave, an enemy, when the war is over.** Since therefore the right of *making* slaves by captivity depends on a supposed right of slaughter, that foundation failing, the consequence drawn from it must fail likewise.

But, secondly, it is said that slavery may begin "jure civili;" when one man sells himself to another. **This, if only meant of contracts to serve or work for another, is very just: but when applied to strict slavery, in the sense of the laws of old Rome or modern Barbary, is also impossible.** Every sale implies a price, a *quid pro quo*, an equivalent given to the seller in lieu of what he transfers to the buyer: but what equivalent can be given for life and liberty, both of which, in absolute slavery, are held to be in the master's disposal? His property also, the very price he seems to receive, devolves *ipso facto* to his master, the instant he becomes his slave. In this case therefore the buyer gives nothing, and the seller receives nothing: **of what validity then can a sale be, which destroys the very principles upon which all sales are founded?**

Lastly, we are told, that besides these two ways by which slaves "fiunt," or are acquired, they may also be hereditary: "servi nascuntur;" the children of acquired slaves are *jure naturæ*, by a negative kind of birthright, slaves also. **But this, being built on the two former rights, must fall together with them.** If neither captivity nor the sale of one's self, can by the law of nature and reason reduce the parent to slavery, much less can they reduce the offspring.

Upon these principles the law of England abhors, and will not endure the existence of, slavery within this nation; so that when an attempt was made to introduce it, by statute 1 Edw. VI. c. 3, which ordained, that all idle vagabonds should be made slaves, and fed upon bread and water, or small drink, and refuse meat; should wear a ring of iron round their necks, arms, or legs; and should be compelled, by beating, chaining, or otherwise, to perform the work assigned them, were it never so vile; the spirit of the nation could not brook this condition, even in the most abandoned rogues; and therefore this statute was repealed in two years afterwards.(d) **And now it is laid down,(e) that a slave or negro, the instant he lands in England, becomes a freeman;** that is, the law will protect him in the enjoyment of his person, and his property.1

https://www.garynorth.com/conspiracyinphiladelphia.pdf

William Blackstone's *Commentaries on the Laws of England* was published in 1765. Almost immediately, it became the standard textbook for apprentices in law in the American colonies.
…

Blackstone said that he believed in a literal ethical Fall of a literal man. The Fall of man had corrupted human reason. "**And if our reason were always, as in our first ancestor before his transgression, clear and perfect, unruffled by passions, unclouded by prejudice, unimpaired by disease or intemperance, the task would be pleasant and easy; we should need no other guide but this.** But every man now finds the contrary in his own experience; that his reason is corrupt, and his understanding full of ignorance and error."15 Therefore, God gave us revelation regarding His law in the Bible. "The doctrines thus delivered we call the revealed or divine law, and they are to be found only in the holy scriptures."16

He went so far as to argue that “the revealed law is (humanly speaking) of infinitely more authority than what we generally call the natural law.” He based this conclusion on the weakness of human reason to understand the natural law. Revealed law is more certain. “If we could be as certain of the latter as we are of the former, both would have an equal authority; but, till then, they can never be put in any competition together.”17

Having said this, he then spent four volumes describing English common law with only a few footnote references to the Bible. In the first three volumes, running almost 500 pages each, each has one footnote reference to the Bible. The fourth volume, on criminal law (*Public Wrongs*), has 10 references. Not one of them is taken by Blackstone as authoritative for civil law; they were seen merely as historical examples. **There is not a single reference to “Bible,” “Moses,” or “Revelation” in the set’s index.**

How could this be if he was persuaded that biblical law and natural law are the same, but with biblical law so much clearer to us? Blackstone’s preliminary remarks were familiar in his era. **Englishmen commonly tipped the brim of their epistemological caps to God and the Bible, but they did not take off their caps in the presence of God.** They pursued their academic specialties just as Christians do today: with no systematic study of what biblical law specifically reveals regarding those disciplines. **It was considered sufficient for Blackstone to have formally equated biblical law with natural law. Having done so, he could then safely ignore biblical law.**
…

Thus, by the time that the *Commentaries* appeared, the foundation of his defense of the superiority of biblical law to natural law—the greater clarity of biblical revelation compared to reason’s perception of natural law—was not believed by most men who called themselves educated.

This raises another question: Was Blackstone in fact deliberately lying? **In a perceptive essay by David Berman, we learn of a strategy that had been in use for over a century: combating a position by supporting it with arguments that are so weak that they in fact prove the opposite. This was a tactic used by those who did not believe in immortality to promote their skepticism.** Berman makes a very shrewd observation regarding academic historians and scholars: “Most of us do not like liars or lying; nor are we inclined to accept conspiracy theories or explanations that postulate secret codes or cabals. These aversions may explain why the art of theological lying has been so generally ignored. …”20 There is at least reasonable suspicion that Blackstone was lying. **If he was not lying, then he was naive beyond description, for his lame defense of biblical revelation greatly assisted the political triumph of the enemies of Christianity in the American colonies.**

https://discovery.ucl.ac.uk/id/eprint/1317765/1/283910.pdf

Donald S. Lutz argues that Blackstone is second only to Montesquieu in the number of times he is quoted by American writers during this period.

> **In a survey of all the published American political writing in the founding era, the period from 1760 to 1805, finds that Montesquieu and Blackstone were by far the most commonly cited sources but that the next common were Locke and Hume.**33

https://books.google.fi/books?id=9sHebfZIXFAC&lpg=PP1&hl=fi&pg=PA30#v=onepage&q&f=false

In her work on the *Nakaz*, however, Catherine felt that she was guided most of all by one of the greatest thinkers of the French Enlightenment, Charles Louis de Secondat, Baron de la Brède et de Montesquieu. She wrote to d’Alembert:

> For the sake of my Empire, I have stolen from Montesquieu, without mentioning him by name. If he sees me at my work from the next world, **I hope that he will pardon me this plagiarism, for the good of twenty million men.** He loved humanity too well to take offense at it. His book is my breviary.

https://archive.org/details/iconaxeinterpret00bill/page/218/mode/2up?view=theater

Her position on the throne as initially little more secure than that of her recently murdered husband, Peter III. **Threatened in particular by the plan of Nikita Panin to limit severely imperial authority by an aristocratic Imperial Council,** Catherine turned in 1763 to the drawing up of a comprehensive defense of absolute monarchy. After three separate drafts, she submitted it to **a specially convened legislative commission of 1766-7 which had a majority of non-aristocratic elements subject to her bidding.** The

commission unanimously awarded Catherine the title “Catherine the Great, Wise, Mother of the Fatherland” and arranged for the publication in Russian, German, French and Latin of the final draft of her flowery philosophic defense of monarchy, generally known as the Instruction, or *Nakaz*.14
…

According to the *Nakaz*, Russia was a European state, its subjects “citizens,” and its proper laws those of the rational, natural order rather than the traditional historical one. Although the *Nakaz* was not widely distributed within Russia, the legislative commission was broad enough in its representation to carry its ideas to every social group in Russia except the bonded peasantry. With four out of 18 million Russians represented by the 564 deputies, the commission was the first crude attempt at a genuinely national assembly since the *zemsky sobors* of the early seventeenth century;15 **but it is strikingly different from all previous assemblies ever held on Russian soil in that it was totally secular. There was one deputy from the Synod, but none at all from the clerical estate.**

Catherine’s basic idea of the “good” and “natural” encouraged scepticism not only toward revealed religion but toward traditional natural philosophy as well. Her “Instruction” directed men’s thinking not to ultimate truths or ideal prototypes but to a new relativistic and utilitarian perspective. It seems altogether appropriate that Jeremy Bentham, the father of English utilitarianism, was one of the most honored of foreign visitors to Catherine’s Russia; and that translated books of and about Bentham in Russia soon began to outsell the original editions in England.16

Like a true utilitarian, Catherine defined legislation as “the Art of conducting People to the greatest Good,” which is “whatever may be useful to mankind” in a given tradition and environment. Autocracy must rule through intermediary powers and clear laws, which require that the individual “be fully convinced that it was his Interest, as well as Duty, to preserve those Laws inviolable.” **The French monarchy rightly appraised the subversive implications of such an approach to the justification of authority,** confiscating some two thousand copies en route to France in 1771, and preventing any of the twenty-four foreign versions of the work from being printed there.17

Catherine admired not only Bentham but his adversary, Blackstone, whose *Commentaries* she carefully studied and had translated in three volumes. She was widely admired not only in England but also in Italy, where a vast treatise was dedicated to her in 1778, celebrating the victorious alliance of power and reason in the eighteenth century.18 Nearly one sixth of the articles in Catherine’s *Nakaz* were take directly from the work of another Italian, Beccaria’s *On Crimes and Punishment*, which armed Catherine with her conviction that crime comes from ignorance and poor laws, and punishment shold be precise and pedagogic rather than arbitrary and vindictive.19

https://en.wikipedia.org/wiki/William_Murray,_1st_Earl_of_Mansfield

As the most powerful British jurist of the century, Mansfield's decisions reflected the Age of Enlightenment and moved the country onto the path to abolishing slavery. He advanced commercial law in ways that helped establish the nation as world leader in industry, finance and trade; modernised both English law and the English courts system; rationalized the system for submitting motions, and reformed the way judgments were delivered to reduce expense for the parties. For his work in *Carter v Boehm* and *Pillans v Van Mierop*, **he has been called the founder of English commercial law.**
…

Other Americans such as Julian S. Waterman, the founder of the University of Arkansas School of Law, described him as **"not only the greatest common law judge but the greatest judge in Anglo-American legal history",** while Joseph Story himself said that Mansfield "broke down the narrow barrier of the common law, redeemed it from feudal selfishness and barbarity" and that **"he was one of those great men raised up by Providence, at a fortunate moment, to effect a salutary revolution in the world".**[121]

https://oll.libertyfund.org/title/pollock-the-genius-of-the-common-law#lf1381_label_050

For a parting word concerning Lord Mansfield, **let us note that, being a Scotsman by birth, he followed, consciously or unconsciously, the Scottish tradition of cosmopolitan jurisprudence rather than the insular learning of the Inns of Court.** Without that temper, made a ground of reproach against him by short-sighted enemies, the peaceful conquest of the Law Merchant by the Common Law might not have been achieved, or not so well.

https://archive.org/details/romanlawinmoder01shergoog/page/n91/mode/2up?view=theater

In a public classroom of the University of Edinburgh, Scotland, there is one embellishment,—a statue of Socrates under which are inscribed these words of Lord Mansfield: "I will take the liberty of calling him the great lawyer of antiquity, since the first principles of all law are derived from his philosophy."30

http://www.commonlii.org/int/cases/EngR/1772/57.pdf

[Mr. Hargrave] **There is now at last an attempt, and the first yet known, to introduce [slavery] into England; long and uninterrupted usage from the origin of the common law, stands to**

oppose its revival. All kinds of domestic slavery were prohibited, except villenage. The villain was bound indeed to perpetual service; liable to the arbitrary disposal of his lord. There were two sorts; villain regardant, and in gross: the former as belonging to a manor, to the lord of which his ancestors had done villain service; in gross, when a villain was granted over by the lord. Villains were originally captives at the Conquest, or troubles before.

>
> **The common law** – so named because it was "common" to all the king's courts across England – **originated in the practices of the courts of the English kings in the centuries following the Norman Conquest in 1066.**[10]
>
> https://www.historytoday.com/archive/normans-and-slavery-breaking-bonds
>
> In 1070 William the Conqueror deposed the elderly pre-Conquest Archbishop of Canterbury, Stigand, and replaced him with Lanfranc, **one of the leading lights of the reform movement and William's own moral tutor since boyhood. The new archbishop was soon urging his pupil to abolish the slave trade and the Conqueror complied.**
> …
>
> The effect of the Conquest on slavery was not immediate and the Conqueror's ban was clearly not wholly effective. **As late as 1102 a Church council condemned 'that shameful trade by which in England people used to be sold like animals'. But this was, significantly, the last ecclesiastical council to issue such a prohibition.** By the time William of Malmesbury was writing in the 1120s slavery was gone and at least some of his contemporaries were willing to give credit where it was due. 'After England began to have Norman lords', wrote the monk Lawrence of Durham, 'the English no longer suffered from outsiders that which they had suffered at their own hands. In this respect they found that foreigners treated them better than they had treated themselves.'

[Mr. Alleyne] 'Tis well known to your Lordships, that much has been asserted by the ancient philosophers and civilians, in defence of the principles of slavery: Aristotle has particularly enlarged on that subject. **An observation still it is, of one of the most able, most ingenious, most convincing writers of modern times, whom I need not hesitate, on this occasion, to prefer to Aristotle, the great Montesquieu, that Aristotle, on this subject, reasoned very unlike the philosopher. He draws his precedents from barbarous ages and nations, and then deduces maxims from them, for the contemplation and practice of civilized times and countries.**

https://en.wikipedia.org/wiki/Somerset_v_Stewart

> **The state of slavery is of such a nature, that it is incapable of now being introduced by Courts of Justice upon mere reasoning or inferences from any principles, natural or political; it must take its rise from positive law;** the origin of it can in no country or age be traced back to any other source: immemorial usage preserves the memory of positive law long after all traces of the occasion; reason, authority, and time of its introduction are lost; **and in a case so odious as the condition of slaves must be taken strictly, the power claimed by this return was never in use here; no master ever was allowed here to take a slave by force to be sold abroad because he had deserted from his service, or for any other reason whatever;** we cannot say the cause set forth by this return is allowed or approved of by the laws of this kingdom, therefore the black must be discharged.

https://web.archive.org/web/20070102150330/http://www.historycooperative.org/journals/lhr/24.3/cleve.html

The main reason that Lord Mansfield chose not to declare that English common law prohibited chattel slavery was that to have done so would have confronted him with two equally unpalatable choices. **Either, as Lord Hardwicke had reasoned in *Pearne v. Lisle*, Mansfield would also have outlawed slavery in at least part, if not all, of the British colonies, or Mansfield would have been forced to confirm Blackstone's position that there were two systems of law where slavery was concerned, one for England under the common law and one for the colonies that were governed "outside" that law as conquests.** Either result would have been politically divisive, if not wholly unacceptable, in 1772, since one result would have politically threatened colonial slaveowners whose allegiance Britain wanted while the other would have offended both English and colonial opponents not just of slavery but of Crown American policy.
…

In an important case on the authority of common law courts, *Harrison v. Evans*, **Lord Mansfield took the position that the common law could not create a crime where Parliament had decided none existed.** In *Harrison*, heard in the House of Lords on appeal in 1767, a London by-law made it an offense punishable by a substantial fine for a Dissenter to decline to serve in Corporation offices such as sheriff.[196] However, Dissenters were by statute disabled from serving in such offices. Defending religious

toleration, Lord Mansfield vigorously attacked Blackstone's position supporting the by-law, and the House of Lords sustained Mansfield's position. Mansfield argued that if nonconformity were a crime now, it must be by virtue of common law. He reasoned:

> [N]o usage or custom ... makes Nonconformity a crime. ... Natural Religion ... [and] Revealed Religion are part of the Common law. ... But it cannot be shewn from the principles of Natural or Revealed Religion, that ... temporal punishments ought to be inflicted for mere opinions with respect to particular modes of worship. **Persecution for ... conscience, is not to be declared from reason or the fitness of things;** it can only stand upon positive law. ...[197]

...

Given *Harrison*, Lord Mansfield surely appreciated that for the slaveowners, his decision was a "poisoned chalice." **A positive law rationale without emancipation preserved the *short-term political*—but *not the long-term legal*—status quo on colonial slavery.** Although Mansfield protected the colonial status quo until Parliament acted, he did so by creating a legal framework that also deliberately devalued slave property **and did as much damage to the legitimacy of the slaveowners' position as possible, short of an outright ruling against them.** Mansfield's deliberate devaluation of slave property had foreseeable adverse consequences for slavery's continuation throughout the empire. **Not surprisingly, major slaveowner representatives immediately and vigorously attacked the decision, while abolitionists applauded it.**

Mansfield's comment in the judgment that slavery had originated not just in England but in every country solely from positive law was a deliberate effort to demolish legal justification for slavery on any other basis, in England as well as in the colonies. Mansfield's positive law holding meant that slavery existed only within those jurisdictions where positive law sanctioned it, and only to the extent it was sanctioned. **The fact that slavery became entirely a creature of positive law also meant that it could be selectively altered or abolished in the colonies.** By the late eighteenth century, the English Crown had limited legal authority to govern in the colonies without Parliament's acquiescence; therefore, **Mansfield's creation of a positive law framework for slavery in the context of rising abolitionist sentiment laid the groundwork for Parliamentary control of colonial slavery.**[200]

> [200] O'Shaughnessy analyzed the political importance to England of the continued allegiance of the West Indies in the American Revolution. **One important effect of the Revolution was to diminish sharply the political force of the British slaveowners' lobby, because it represented only half as many slaves after the Revolution as before.** O'Shaughnessy, *An Empire Divided*, xii.

Perhaps equally important was that making slave property a creature of positive law raised substantial issues about whether compensation to slaveowners would be required if Parliament chose to alter or abolish slavery.[201]

Mansfield's positive law holding also knowingly devalued slave property by making slave status wholly dependent on the law of individual jurisdictions, which he (and slaveowners) knew meant that slave flight would increase because fugitive slaves could become free or protected against excessive force and compelled return, not just in England but in the colonies.[202]

Whether Lord Mansfield qualified his remarks on slavery's origin by referring to limits on the powers of "courts of justice" to sanction slavery or not, a larger point remains. **Reached after extraordinarily comprehensive and highly visible public arguments from England's preeminent lawyers, Lord Mansfield's conclusion on the origin of slavery, even if qualified, was inevitably, as he well knew, profoundly destructive of the moral and legal legitimacy of slavery, since it made slave property an artificial creature of statute and deprived slavery of the sanction of the common law.[203] The sanction of the common law was also the sanction of religion and morality because it was widely believed at the time that they were subsumed within the common law.** Mansfield's argument in *Harrison* and the religious and political arguments of Somerset's counsel amply illustrate the power of the contemporary view that the common law must be consistent with morality and religious belief. The sweeping nature of Mansfield's statement on positive law intentionally undermined the moral and religious, and thus the political, legitimacy of colonial slavery.

Although Lord Mansfield's decision may have bought time for slaveowners, as intended, it was "the handwriting on the wall" for them.[204] **That colonial slaveowners understood Mansfield's unwillingness to defend their position largely accounts for their concerted attacks on the judgment that began almost immediately after it was announced.**[205] Mansfield's public defection in *Somerset* meant that it was really only a question of time until public opinion deserted slaveowners as well.

...

Yet, *Somerset* expanded freedom when it banished any doubt that English law protected certain fundamental "rights of man" even for African slaves in England, including the right of access to the courts to protect against unlawful imprisonment or abuse, and freedom from chattel slavery. *Somerset* was also

a farsighted decision to narrow sharply the legal authority for slavery, devaluing slave property by destroying its "imperial property" status and its moral, and hence political, legitimacy. **Mansfield was a loyal servant of the Crown, but he was also a friend of justice.** Mansfield's decision in *Somerset*, though an effort to serve both masters at a time when many thought their interests conflicted, nevertheless commends him to history.

http://www.ouramericanrevolution.org/index.cfm/page/view/m0149

The year 1772 was a watershed of sorts in the history of slavery—it might be called the beginning of its end, as the legal framework upon which slavery was based began to crumble, at least in England, beginning with the landmark decision in *Somerset v. Stewart*.

> https://valerietarico.com/2015/02/13/christianitys-painfully-mixed-track-record-on-slavery/
>
> It took John Wesley, founder of the Methodist denomination, to bring abolitionism into the Christian main current. **A son of the Enlightenment as well as the Christian tradition, Wesley drew on both secular and religious tools to make his case.**

> https://archive.org/details/enlightenmentint0000unse_i6k5/page/346/mode/2up?view=theater
>
> **In the light of such denunciations it is ironic that pagan classicism should touch even the Methodists – but it did.** John Wesley, as we know, studied his ancients as assiduously as his Bible; he had to be recalled from his “philosophy” by a stern Moravian. And when his brother Charles learned of John’s marriage, a marriage which he rightly feared would be a disaster, he took from his shelf a volume of Marcus Aurelius’s *Meditations* to learn patience in affliction.

> Neither primitive, nor reformed, nor Romanist, nor modern divines taught the doctrine of the intrinsic sinfulness of slaveholding. The church as a body never dreamed it. Slavery remained almost universal. **It remained for the political agitators of atheistic, Jacobin France, almost eighteen hundred years after Christ's birth, to give active currency to this new doctrine, and thus to infuse energy into the fanaticism of the few erratic Christian teachers, such as Wesley, who had hitherto asserted this novelty.**

> https://biblicalstudies.org.uk/pdf/anvil/24-2_097.pdf
>
> **Evangelical Christians were prominent in the campaign to bring about the end of the British slave trade in 1807.** However, John Coffey here shows how, in the mid-eighteenth century, evangelical Christians on both sides of the Atlantic acquiesced in the slave trade and slavery. **By the 1770s to 1780s their ideas underwent a dramatic change and with the establishment of the committee to Effect the Abolition of the Slave Trade in 1787 evangelicals joined Quakers at the heart of the new abolitionist movement.**
> …
>
> On 15 September 1791, the Connecticut Society for the Promotion of Freedom held its annual meeting in the university town of New Haven. Its speaker was the Rev. Dr. Jonathan Edwards Jr., pastor of the local Congregational church, and son of the famous revivalist and theologian. His sermon was on *The Injustice and Impolicy of the Slave Trade, and of the Slavery of the Africans*. The preacher realised that some in his audience might struggle to embrace abolitionism, ‘because it seems to bear hardly on the characters of our pious fathers, who held slaves’. **‘Thirty years ago’, he noted, ‘scarcely a man in this country thought either the slave-trade or the slavery of Negroes to be wrong’. The previous generation had been like Abraham, Jacob, David and Solomon, who ‘were ignorant that polygamy or concubinage was wrong’.** ‘As to domestic slavery’, he continued, ‘our fathers lived in a time of ignorance which God winked at; but now he commandeth all men everywhere to repent of this wickedness’.2
> …
>
> **At no time in the 1750s (or indeed in the 1760s or 1770s) did [John] Newton express remorse for trading in slaves. He retired from the business not because of moral qualms, but because of a minor stroke he suffered as he was preparing to embark on another slaving voyage in 1754.** When he published his autobiographical *Authentic Narrative* (1764), he lamented the sins of his youth, blasphemy, drunkenness and immorality. **But this classic Evangelical text did not seriously question the ethics of the slave trade; indeed, Newton wrote that ‘I never knew sweeter or more frequent hours of**

divine communion, than in my last two voyages to Guinea'. In his mind (and in the eyes of nearly all his contemporaries), slave trading was just a job.10

The case of Newton confirms that one could experience a full-blown Evangelical conversion without feeling any real compunction about the slave trade.
…

The first generation of Evangelicals, then, signally failed to question the morality of the African slave trade. There was no Evangelical equivalent to the prophetic Quaker voices of Benjamin Lay, John Woolman and Anthony Benezet. The early Evangelicals preached about turning from 'the world', but when it came to the slave trade, they were social conformists.

https://brycchancarey.com/Carey_BJRL_2003.pdf

Until the early 1770s, with the exception of the period in America, references to slavery occur only infrequently in both Wesley's letters and his *Journal*. On 12 August 1772, however, Wesley records in his *Journal* that he had been reading a 'book, published by an honest Quaker, on that execrable sum of all villainies, commonly called the Slave-trade'.13
…

It is not coincidental that Wesley was reading Benezet's work at this time. **Slavery had been in the news recently following the landmark legal decision in the case of James Somerset.**16 Somerset was a slave, the property of Charles Stewart of Boston, Massachusetts, who had absconded, been recaptured, and was now imprisoned on a ship bound for Jamaica. Following the intervention of Granville Sharp, the captain of the ship was ordered to produce Somerset before the court of King's Bench where Lord Chief Justice Mansfield heard his case. This attracted a great deal of attention in the press, and members of the public donated funds for lawyers on both sides of the argument. **On 22 June 1772, Lord Mansfield ruled that: 'no master was ever allowed here to take a slave by force to be sold abroad because he deserted from his service, or for any other reason whatever'.** Somerset was discharged, and his supporters, who included both black and white Londoners, immediately celebrated a great victory.
…

Clearly, Wesley was interested in the Mansfield judgement, as it is just six weeks later that he records reading Benezet's work. However, this may not have been Wesley's introduction to antislavery sentiment. **Wesley's biographers, using the evidence of his journal and correspondence, have traditionally dated his interest in antislavery from this date,** but there is evidence to show that he was already corresponding on the subject earlier in the year, if not the previous year.
…

Accordingly, early in 1774, a short fifty-three-page pamphlet appeared with the simple title of *Thoughts upon slavery by John Wesley, A.M.*19

https://docsouth.unc.edu/church/wesley/wesley.html

3. But waving, for the present, all other considerations, I strike at the root of this complicated villainy. I absolutely deny all slave-holding to be consistent with any degree of even natural justice. **I cannot place this in a clearer light, than that great ornament of his profession, judge *Blackstone* has already done.**
…

It clearly follows, that all slavery is as irreconcileable to justice as to mercy.

https://archive.org/details/romanlawinmoder01shergoog/page/n95/mode/2up?view=theater

§ 66 Survival to modern times of the doctrine of "natural law."

The Roman theory of natural law and its universal applicability has survived to modern times and in great vigor. The so-called "natural law" or "natural philosophers" of the 18th century, such as Rousseau, Montesquieu, repeat the tenets of the Greek philosophers, especially the Stoics. **All the familiar phrases of the "natural rights of man to life, liberty, and the pursuit of happiness" and many other expressions cherished by the modern world as embodying eternal principles of justice merely repeat the phrases of the Roman law as furnished by philosophy. Our wonderful Declaration of Independence—a monument to 18th century philosophy—enshrines many a tenet of Roman jurists who confessed the alliance of philosophy with law. "By natural law all men are equal," is the famous statement of the great Ulpian.**38

38. *Dig*. 50, 17, 32. See also *Inst*. 1, 2, 2: "Jure enim naturali ab initio omnes homines liberi nascebantur."

https://archive.org/details/romanlawinmoder01shergoog/page/n275/mode/2up?view=theater

The leaders of the so-called school of the philosophers of the "Natural Law" were Fénelon, Montesquieu, Voltaire, Rousseau, and Mirabeau. The one immutable law of nature whereby all men are born free and equal, the inalienable rights of life, liberty, and the pursuit of happiness, the social contract of liberty, fraternity, and equality, constitute the teachings and legacy of this group of clerical and lay philosophers, which arose while the monarchy was at its zenith under Louis XIV,—"whom Fénelon treated more severely than the disciples of Voltaire did Louis XV."158 The tenets of these thinkers spread over all Europe and America, and are still very much alive. **Whence came this theory of theirs as to the universal Law of Nature, and the natural inalienable rights of man? From the medieval scholastics and the Canon Law, into which had descended the philosophical speculations of the Roman jurists due to the culture-influence of Greece.**159

https://en.wikipedia.org/wiki/Henry_James_Sumner_Maine

Sir Henry James Sumner Maine, KCSI (15 August 1822-3 February 1888), was a British Whig[1] comparative jurist[2] and historian.[3] **He is famous for the thesis outlined in his book *Ancient Law* that law and society developed "from status to contract."[4] According to the thesis, in the ancient world individuals were tightly bound by status to traditional groups, while in the modern one, in which individuals are viewed as autonomous agents, they are free to make contracts and form associations with whomever they choose.**

https://archive.org/details/ancientlaw030840mbp/page/n15/mode/2up?view=theater

The space allotted in the third and fourth chapters to certain philosophical theories of the Roman Jurisconsults has been appropriated to them for two reasons. **In the first place, those theories appear to the author to have had a wider and more permanent influence on the thought and action of the world than is usually supposed.** Secondly, they are believed to be the ultimate source of most of the views which have been prevalent, till quite recently, on the subjects treated of in this volume. It was impossible for the author to proceed far with his undertaking without stating his opinion on the origin, meaning, and value of those speculations.

LONDON, *January 1861*.

https://archive.org/details/ancientlaw030840mbp/page/n57/mode/2up?view=theater

The most superficial student of Roman history must be struck by the extraordinary degree in which the fortunes of the republic were affected by the presence of foreigners, under different names, on her soil. The causes of this immigration are discernible enough at a later period, for we can readily understand why men of all races should flock to the mistress of the world; but the same phenomenon of a large population of foreigners and denizens meets us in the very earliest records of the Roman State.
...

Whatever were the circumstances to which it was attributable, **the foreign element in the commonwealth determined the whole course of its history, which, at all its stages, is little more than a narrative of conflicts between a stubborn nationality and an alien population. Nothing like this has been seen in modern times; on the one hand, because modern European communities have seldom or never received any accession of foreign immigrants which was large enough to make itself felt by the bulk of the native citizens,** and on the other, because modern states, being held together by allegiance to a king or political superior, absorb considerable bodies of immigrant settlers with a quickness unknown to the ancient world, where the original citizens of a commonwealth always believed themselves to be united by kinship in blood, and resented a claim to equality of privilege as a usurpation of their birthright.
...

The circumstances of the origin of the Jus Gentium are probably a sufficient safeguard against the mistake of supposing that the Roman lawyers had any special respect for it. **It was the fruit in part of their disdain for all foreign law, and in part of their disinclination to give the foreigner the advantage of their own indigenous Jus Civile.** It is true that we, at the present day, should probably take a very different view of the Jus Gentium, if we were performing the operation which was effected by the Roman jurisconsults.
...

But the results to which modern ideas conduct the observer are, as nearly as possible, the reverse of those which were instinctively brought home to the primitive Roman. What we respect or admire, he

disliked or regarded with jealous dread. The parts of jurisprudence which he looked upon with affection were exactly those which a modern theorist leaves out of consideration as accidental and transitory; the solemn gestures of the mancipation; the nicely adjusted questions and answers of the verbal contract; the endless formalities of pleading and procedure. The Jus Gentium was merely a system forced on his attention by a political necessity. He loved it as little as he loved the foreigners from whose institutions it was derived and for whose benefit it was intended. **A complete revolution in his ideas was required before it could challenge his respect, but so complete was it when it did occur, that the true reason why our modern estimate of the Jus Gentium differs from that which has just been described, is that both modern jurisprudence and modern philosophy have inherited the matured views of the later jurisconsults on this subject. There did come a time, when from an ignoble appendage of the Jus Civile, the Jus Gentium came to be considered a great though as yet imperfectly developed model to which all law ought as far as possible to conform.** This crisis arrived when the Greek theory of a Law of Nature was applied to the practical Roman administration of the Law common to all Nations.

>
> **The stone which the builders rejected Has become the chief cornerstone.**
>
> https://en.wikipedia.org/wiki/Man-made_law#Historical_change:_from_lowest_rank_to_supreme_law
>
> **In the Thomist view of the Middle Ages, man-made law was the lowest form of law. Above it were the *lex naturalis*, the *lex divina*, and the *lex aeterna*.** Man-made law only had authority in as much as it expressed and concurred with higher laws.[11][12]
>
> **Over the centuries, this idea has been turned on its head. Rather than being a lesser law because it is made by man rather than by the divine, modern conceptions of man-made law rank it as fundamental and supreme law *because* it is man-made,** thanks to the notion of the sovereignty of the people that saw expression in events such as the American Revolution and French Revolution of the 18th century.[10][13]
>
> Legal theory in the Soviet Union went further, not recognizing any such thing as divine or natural law, and considering the state to be sovereign. **Only man-made law, as made by the state, existed according to Marxist legal theory.[14]**
>
> Although laws higher than the man-made law of the sovereign people are not formally recognized in the legal theories of countries such as the United States, **the Thomist idea of man-made law being subordinate to divine law is still espoused by many people in those countries.** For example: Martin Luther King, Jr., in his *Letter from Birmingham Jail* cited Thomas Aquinas in his ways to know that a law is unjust:[15][16]
>
> > "A just law is a man made code that squares with the moral law or the law of God. An unjust law is a code that is out of harmony with the moral law. To put it in the terms of St. Thomas Aquinas: An unjust law is a human law that is not rooted in eternal law and natural law."—*King 1963*
>
> In several Islamic countries, man-made law is still, in 20th and 21st century legal theory, considered to be subordinate to divine law, in the form of the sharia. **In that legal theory, the sovereign power is Allah, not the people, and God-made law takes precedence over man-made law.[17]**
>
> https://en.wikipedia.org/wiki/Apeiron#Apeiron_as_an_origin
>
> Searching for some universal principle, Anaximander retained the traditional religious assumption that there was a cosmic order and tried to explain it rationally, using the old mythical language which ascribed divine control on various spheres of reality. This language was more suitable for a society which could see gods everywhere; therefore the first glimmerings of laws of nature were themselves derived from divine laws.[8] **The Greeks believed that the universal principles could also be applied to human societies. The word *nomos* (law) may originally have meant *natural law* and used later to mean man-made law.[9] Greek philosophy entered a high level of abstraction. It adopted *apeiron* as the origin of all things, because it is completely indefinite.**

https://archive.org/details/ancientlaw030840mbp/page/n65/mode/2up?view=theater

Now, just as the oldest Greek theorists supposed that the sports of chance had changed the material universe from its simple primitive form into its present heterogeneous condition, so their intellectual descendants imagined that but for untoward accident the human race would have conformed itself to simpler rules of conduct and a less tempestuous life. To live according to *nature* came to be considered as the end for which man was created, and which the best men were bound to compass. **To live according to *nature* was to rise above the disorderly habits and gross indulgences of the vulgar to higher laws of action which nothing but self-denial and self-command would enable the**

aspirant to observe. It is notorious that this proposition—live according to nature—was the sum of the tenets of the famous Stoic philosophy. Now on the subjugation of Greece that philosophy made instantaneous progress in Roman society. It possessed natural fascinations for the powerful class who, in theory at least, adhered to the simple habits of the ancient Italian race, and disdained to surrender themselves to the innovations of foreign fashions. Such persons began immediately to affect the Stoic precepts of life according to nature—an affectation all the more grateful, and, I may add, all the more noble, from its contrast with the unbounded profligacy which was being diffused through the imperial city by the pillage of the world and by the example of its most luxurious races. In the front of the disciples of the new Greek school, we might be sure, even if we did not know it historically, that the Roman lawyers figured. We have abundant proof that, there being substantially but two professions in the Roman republic, the military men were generally identified with the party of movement, but the lawyers were universally at the head of the party of resistance.

The alliance of the lawyers with the Stoic philosophers lasted through many centuries. Some of the earliest names in the series of renowned jurisconsults are associated with Stoicism, and ultimately we have the golden age of Roman jurisprudence fixed by general consent at the era of the Antonine Cæsars, the most famous disciples to whom that philosophy has given a rule of life. **The long diffusion of these doctrines among the members of a particular profession was sure to affect the art which they practised and influenced.**

>
> According to author Jon Perdue, "The logo of the Fabian Society, a tortoise, represented the group's predilection for a slow, imperceptible transition to socialism, while its coat of arms, a 'wolf in sheep's clothing', represented its preferred methodology for achieving its goal."[3]
>
> https://www.conservapedia.com/Long_march_through_the_institutions
>
> "**Revolution is not a short act when something happens once and then everything is different. Revolution is a long, complicated process, where one [*der Mensch*] must become different...the process goes along this way, which I have once named 'The Long March through the Established Institutions',** in which [*institutions*], through clarification [*Aufklärung*], systematic clarification and direct actions, awareness is brought [*Bewusstwerdung*] to further minorities in and outside the university, in schools, in trade schools, in engineer schools, also technical universities and finally in factories, where workers are currently worrying about their jobs. The process has begun, and that is a long story, which right now has been set on its course by us."[7][8]

Several positions which we find in the remains of the Roman jurisconsults are scarcely intelligible, unless we use the Stoic tenets as our key; but at the same time it is a serious, though a very common, error to measure the influence of Stoicism on Roman law by counting up the number of legal rules which can be confidently affiliated on Stoical dogmas. It has often been observed that the strength of Stoicism resided not in its canons of conduct, which were often repulsive or ridiculous, but in the great though vague principle which it inculcated of resistance to passion. Just in the same way the influence on jurisprudence of the Greek theories, which had their most distinct expression in Stoicism, consisted not in the number of specific positions which they contributed to Roman law, but in the single fundamental assumption which they lent to it. After nature had become a household word in the mouths of the Romans, **the belief gradually prevailed among the Roman lawyers that the old Jus Gentium was in fact the lost code of Nature,** and that the Prætor in framing an Edictal jurisprudence on the principles of the Jus Gentium was gradually restoring a type from which law had only departed to deteriorate. **The inference from this belief was immediate, that it was the Prætor's duty to supersede the Civil Law as much as possible by the Edict, to revive as far as might be the institutions by which Nature had governed man in the primitive state.** Of course, there were many impediments to the amelioration of law by this agency. There may have been prejudices to overcome even in the legal profession itself, and Roman habits were far too tenacious to give way at once to mere philosophical theory. The indirect methods by which the Edict combated certain technical anomalies, show the caution which its authors were compelled to observe, and down to the very days of Justinian there was some part of the old law which had obstinately resisted its influence. **But, on the whole, the progress of the Romans in legal improvement was astonishingly rapid as soon as stimulus was applied to it by the theory of Natural Law.**
...

But then, while the Jus Gentium had little or no antecedent credit at Rome, **the theory of a Law of Nature came in surrounded with all the prestige of philosophical authority, and invested with the charms of association with an elder and more blissful condition of the race.** It is easy to understand how the difference in the point of view would affect the dignity of the term which at once described the operation of the old principles and the results of the new theory. **Even to modern ears it is not at all the same thing to describe a process as one of "levelling" and to call it the "correction of anomalies," though the metaphor is precisely the same.** Nor do I doubt that, when

once Æquitas was understood to convey an allusion to the Greek theory, associations which grew out of the Greek notion of *ἰσότης* began to cluster round it.
...

At Rome, as the intervention of the Praetor was at first dictated by simple concern for the safety of the state, it is likely that in the earliest times it was proportioned to the difficulty which it attempted to get rid of. Afterwards, when the taste for principle had been diffused by the Responses, he no doubt used the Edict as the means of giving a wider application to those fundamental principles which he and the other practising jurisconsults, his contemporaries, believed themselves to have detected underlying the law. **Latterly he acted wholly under the influence of Greek philosophical theories, which at once tempted him to advance and confined him to a particular course of progress.**
...

Another remarkable characteristic of both English and Roman Equity is the falsehood of the assumptions upon which the claim of the equitable to superiority over the legal rule is originally defended. **Nothing is more distasteful to men, either as individuals or as masses, than the admission of their moral progress as a substantive reality. This unwillingness shows itself, as regards individuals, in the exaggerated respect which is ordinarily paid to the doubtful virtue of consistency.** The movement of the collective opinion of a whole society is too palpable to be ignored, and is generally too visible for the better to be decried; but there is the greatest disinclination to accept it as a primary phenomenon, and it is commonly explained as the recovery of a lost perfection—the gradual return to a state from which the race has lapsed. This tendency to look backward instead of forward for the goal of moral progress produced anciently, as we have seen, on Roman jurisprudence effects the most serious and permanent. **The Roman jurisconsults, in order to account for the improvement of their jurisprudence by the Prætor, borrowed from Greece the doctrine of a Natural state of man—a Natural society—anterior to the organisation of commonwealths governed by positive laws.**

> https://archive.org/details/newscienceofgiam030174mbp/page/n195/mode/2up?view=theater
>
> 550 In this way the boundaries of the fields were fixed and maintained. **This division, too generally set forth by Hermogenianus the jurisconsult, has been imagined as taking place by deliberate agreement of men, and carried out with justice and respected in good faith,** at a time when there was as yet no armed public force and consequently no civil authority of law. But it cannot be understood save as taking place among men of extreme wildness, observing a frightful religion which had fixed and circumscribed them within certain lands, and whose bloody ceremonies had consecrated their first walls.

In England, on the other hand, a range of ideas especially congenial to Englishmen of that day, explained the claim of Equity to override the common law by supposing a general right to superintend the administration of justice which was assumed to be vested in the king as a natural result of his paternal authority. The same view appears in a different and a quainter form in the old doctrine that Equity flowed from the king's conscience—**the improvement which had in fact taken place in the moral standard of the community being thus referred to an inherent elevation in the moral sense of the sovereign.**
...

It will be inferred from what has been said that the theory which transformed the Roman jurisprudence had no claim to philosophical precision. It involved, in fact, one of those "mixed modes of thought" which are now acknowledged to have characterised all but the highest minds during the infancy of speculation, and which are far from undiscoverable even in the mental efforts of our own day. The Law of Nature confused the Past and the Present. **Logically, it implied a state of Nature which had once been regulated by natural law; yet the jurisconsults do not speak clearly or confidently of the existence of such a state, which indeed is little noticed by the ancients except where it finds a poetical expression in the fancy of a golden age.** Natural law, for all practical purposes, was something belonging to the present, something entwined with existing institutions, something which could be distinguished from them by a competent observer. The test which separated the ordinances of Nature from the gross ingredients with which they were mingled was a sense of simplicity and harmony; **yet it was not on account of their simplicity and harmony that these finer elements were primarily respected, but on the score of their descent from the aboriginal reign of Nature. This confusion has not been successfully explained away by the modern disciples of the jurisconsults,** and in truth modern speculations on the Law of Nature betray much more indistinctness of perception and are vitiated by much more hopeless ambiguity of language than the Roman lawyers can be justly charged with. There are some writers on the subject who attempt to evade the fundamental difficulty by contending that the code of Nature exists in the future and is the goal to which all civil laws are moving, but this is to reverse the assumptions on which the old theory rested, or rather perhaps to mix together two inconsistent theories. The tendency to look not to the past but to the future for types of perfection was brought into the world by Christianity. Ancient literature gives few or no hints of a belief that the progress of society is necessarily from worse to better.

But the importance of this theory to mankind has been very much greater than its philosophical deficiencies would lead us to expect. Indeed, **it is not easy to say what turn the history of thought, and therefore of the human race, would have taken, if the belief in a law natural had not become universal in the ancient world.**

https://books.google.fi/books?id=K-mRDQAAQBAJ&lpg=PP1&hl=fi&pg=PT27#v=onepage&q&f=false

It is an old trick of political innovator to describe that which they seek to realize as Ancient and Natural, as something which has existed from the beginning and which has been lost only through the misfortune of historical development; men, they say, must return to this state of things and revive the Golden Age. **Thus natural law explained the rights which it demanded for the individual as inborn, inalienable rights bestowed upon him by Nature. This was no question of innovation, but of the restoration of the "eternal rights which shine above, inextinguishable and indestructible as the stars themselves."** In the same way the romantic Utopia of common ownership as an institution of remote antiquity has arisen. Almost all peoples have known this dream. In Ancient Rome it was the legend of the Golden Age of Saturn, described in glowing terms by Virgil, Tibullus, and Ovid, and praised by Seneca.13 Those were the carefree, happy days when none had private property and all prospered in the bounty of a generous Nature.14 **Modern Socialism, of course, imagines itself beyond such simplicity and childishness, but its dreams differ little from those of the Imperial Romans.**

https://www.marxists.org/archive/marx/works/1843/10/23.htm

Although Fourier's writings do not display those bright sparks of genius which we find in Saint-Simon's and some of his disciples; although his style is hard, and shows, to a considerable extent, the toil with which the author is always labouring to bring out his ideas, and to speak out things for which no words are provided in the French language — nevertheless, we read his works with greater pleasure; and find more real value in them, than in those of the preceding school. **There is mysticism, too, and as extravagant as any, but this you may cut off and throw it aside, and there will remain something not to be found among the Saint-Simonians — scientific research, cool, unbiased, systematic thought; in short, *social philosophy;* whilst Saint-Simonism can only be called *social poetry.*** It was Fourier, who, for the first time, established the great axiom of social philosophy, that every individual having an inclination or predilection for some particular kind of work, the sum of all these inclinations of all individuals must be, upon the whole, an adequate power for providing for the wants of all. From this principle, it follows, that if every individual is left to his own inclination, to do and to leave what he pleases, the wants of all will be provided for, without the forcible means used by the present system of society. **This assertion looks bold, and yet, after Fourier's mode of establishing it, is quite unassailable, almost self-evident — the egg of Columbus.**

Far different were the position and influence of the Stoic philosophy in Italy. In direct contrast to these schools it attached itself to the religion of the land as closely as science can at all accommodate itself to faith. To the popular faith with its gods and oracles the Stoic adhered on principle, in so far as he recognized in it an instinctive knowledge, to which scientific knowledge was bound to have regard and even in doubtful cases to subordinate itself. **He believed in a different way from the people rather than in different objects;** the essentially true and supreme God was in his view doubtless the world-soul, but every manifestation of the primitive God was in its turn divine, the stars above all, but also the earth, the vine, the soul of the illustrious mortal whom the people honoured as a hero, and in fact every departed spirit of a former man.

http://www.attalus.org/translate/justin7.html#43.1

3 The first inhabitants of Italy were the Aborigines, whose king, Saturnus, is said to have been a man of such extraordinary justice, **that no one was a slave in his reign, or had any private property, [privatae rei] but all things were common to all, and undivided, as one estate [patrimonium] for the use of every one;** 4 **in memory of**

> **which way of life, it has been ordered that at the Saturnalia slaves should everywhere sit down with their masters at the entertainments, the rank of all being made equal.** 5 **Italy was accordingly called, from the name of that king, Saturnia; and the hill on which he dwelt Saturnius, on which now stands the Capitol, as if Saturnus had been dislodged from his seat by Jupiter.** 6 After him, third in descent, they say that Faunus was king, in whose time Evander came into Italy from Pallanteum, a city of Arcadia, accompanied with a small band of his countrymen, to whom Faunus kindly gave land, and the mountain which he afterwards called Palatium.

https://archive.org/details/newscienceofgiam030174mbp/page/n391/mode/2up?view=theater

Killings of plebeians, on the other hand, were either committed by their own lords against whom no accusation could be brought, or by others who could indemnify the man's own lord for the loss as if he had been a slave, as is still the custom in Poland, Lithuania, Sweden, Denmark and Norway. **But the learned interpreters of Roman law did not see this difficulty because they relied on the vain opinion of the innocence of the golden age, just as the political theorists for the same reason relied on Aristotle's statement that in the ancient commonwealths there were no laws concerning private wrongs and offenses; whence Tacitus, Sallust and other writers who are otherwise most discerning, when they speak of the origin of commonwealths and laws, relate that in the primitive state preceding the cities men led lives like so many Adams in the state of innocence.**

> **Vetustissimi mortalium, nulla adhuc mala libidine, sine probro, scelere eoque sine poena aut coercitionibus agebant. neque praemiis opus erat cum honesta suopte ingenio peterentur; et ubi nihil contra morem cuperent, nihil per metum vetabantur. at postquam exui aequalitas et pro modestia ac pudore ambitio et vis incedebat, provenere dominationes multosque apud populos aeternum mansere.**

https://books.google.fi/books?id=E2G6wM-yRmEC&lpg=PP1&hl=fi&pg=PA72#v=onepage&q&f=false

Eventually the myth of the golden race, with all the ambiguities of a myth in Greek culture, was reduced to a matter-of-fact description of an actual historical epoch. In the intermediate stages along the way, the mythic and historical components were inextricably intermingled. **At some point difficult to establish, but surely by Hellenistic times, Hesiod's five races were completely supplanted by four ages (the race of heroes was dropped) and the golden race became a golden age.** When this occurred, the temporal and historical character of the myth was firmly established.
…

Many later utopias would seek to reproduce the continence and benevolent spirit of Plato's early ages of mankind. More than two thousand years after Plato, a young French engineer, Nicolas Boulanger, member of the philosophical circle of the Baron d'Holbach, revived much of the Platonic phraseology in his *L'Antiquité dévoilée* (published posthumously in 1766), an impassioned re-creation of the human condition after upheavals in the physical structure of the earth. His purpose was to relate the naturally moral postdiluvians to the rational good men who were being fashioned in European society by the Enlightenment. The Platonic lawgiver aimed to

institute at one fell swoop what the most sanguine of the eighteenth-century philosophes hoped to achieve only gradually. **What for Plato was still a myth became scientific truth for the engineer-philosophe, who could prove that the deluge had in fact occurred by pointing to seashells on the mountains, and who derived the image of tender and gentle postdiluvian man from mythology and Plato's text.** Nothing in Plato ever died; in new guises his images were reborn in the utopian fantasies of later generations.

>
> *Athenian:* In the first place, **owing to their desolate state, they were kindly disposed and friendly towards one another; and secondly, they had no need to quarrel about food.** [679a] For they had no lack of flocks and herds (except perhaps some of them at the outset), and in that age these were what men mostly lived on: thus they were well supplied with milk and meat, and they procured further supplies of food, both excellent and plentiful, by hunting. They were also well furnished with clothing and coverlets and houses, and with vessels for cooking and other kinds; for no iron is required for the arts of moulding and weaving, [679b] which two arts God gave to men to furnish them with all these necessaries, in order that the human race might have means of sprouting and increase whenever it should fall into such a state of distress. **Consequently, they were not excessively poor, nor were they constrained by stress of poverty to quarrel one with another; and, on the other hand, since they were without gold and silver, they could never have become rich.** Now a community which has no communion with either poverty or wealth is generally the one in which the noblest characters will be formed; [679c] for in it there is no place for the growth of insolence and injustice, of rivalries and jealousies. **So these men were good, both for these reasons and because of their simple-mindedness, as it is called; for, being simple-minded, when they heard things called bad or good, they took what was said for gospel-truth and believed it.** For none of them had the shrewdness of the modern man to suspect a falsehood; but they accepted as true the statements made about gods and men, and ordered their lives by them.
> …
>
> *Athenian:* And shall we not say that people living in this fashion for many generations were bound to be unskilled, as compared with either the antediluvians or the men of today, **and ignorant of arts in general and especially of the arts of war as now practised by land and sea, including those warlike arts which, disguised under the names of law-suits and factions, are peculiar to cities, contrived as they are with every device of word and deed to inflict mutual hurt and injury;** [679e] **and that they were also more simple and brave and temperate, and in all ways more righteous?**

The vision of man in a primitive state of nature in Rousseau's *Discourse on the Origin of Inequality*, its most noteworthy modern envelopment, makes only peripheral reference to Plato's fable of early mankind, though Rousseau knew the *Dialogues*. **From his notes we gather that he was inspired rather by the work of a later writer, Dicaearchus of Messana, a pupil of Aristotle who spent most of his life in Sparta. His *Bios Hellados* (Life in Greece), the first universal history of culture ever written, is preserved in a summary by Porphyry in that same treatise to which we owe the fragment from Empedocles on the primitive reign of love, and came to Rousseau circuitously through excerpts in Saint Jerome. Dicaearchus completely demythicized the golden age and reduced it to plain historical reality. Virtually all the physical and moral qualities that grace Rousseau's state-of-nature man have an antecedent in this Hellenistic portrait of the first generation,** an age extolled as the best life ever enjoyed by men, when they were truly like unto the gods. They ate little – no heavy foods – and therefore did not sicken from loaded down with foul matter. The arts had not yet been invented, and men thrived, without care or toil, on the spontaneous fruits of nature. Similarly, Rousseau's natural man was superior to societal man in "physique" and in "morale," he never suffered from disease, and he needed no doctors, the bane of civilized existence. Both in Dicaearchus and in Rousseau the acorn sufficed the peaceful primitives. There was no conflict or emulation among them because there was nothing of value about which to contend. **To the later multiplication of desires Dicaearchus, a true forerunner of Rousseau, imputed all the evils that had beset mankind.**8

By the time Aratus of Soli wrote his astronomical poem, the *Phaenomena*, for the Macedonian court in the third century before Christ, the temper of the golden age had been subtly changed. **No**

longer depicted as primitive, it was a philosophical epoch in which the first men practiced the rationalist moral virtues esteemed by the author.
…

Life had lost something of its easygoing character as men ploughed the fields with oxen, but the air of the pastoral idyll was preserved: Existence remained simple, nature was generous, and the pernicious influences of foreign trade had not yet corrupted men by stimulating a taste for luxury. The poem of Aratus was popular in the Roman world; it was translated by Cicero and adapted by Hyginus, who added nothing to the original.
…

Far better known than the Greek poets, Vergil and especially Ovid were pivotal figures in preserving and handing down the myth of a golden age.
…

Beginning with the Renaissance, Ovid's *Metamorphoses* was one of the most popular schoolbooks in Western Europe; and his portrayal of the golden age in Book I, which filled out Hesiod's spare text, was the definitive form in which the myth was infused into utopian thought. Ovid, who was a friend of Hyginus, did not disguise his close kinship with Hesiod, for all his rich embellishments of the *aurea aetas*; **but the atmosphere had become heavily scented with the primitivist nostalgia of an oversophisticated society.**
…

As one moves from Ovid through time, the literary rendering of a golden age becomes ever more laden with ornaments until in the epics of the Italian Renaissance the exuberance of detail is oppressive and suffocating. **The reign of natural righteousness without legal sanctions, with which Ovid began, was in itself utopia for the law-ridden society of Rome and its heirs. The elimination of any need for the external compulsions and restraints of law remained a dominant theme in utopian thought down through Marx's *Critique of the Gotha Program*, albeit his concept was animated by a romantic idea of *Gemeinschaft* which no Roman would have countenanced.**

There are two special dangers to which law, and society which is held together by law, appear to be liable in their infancy. **One of them is that law may be too rapidly developed. This occurred with the codes of the more progressive Greek communities, which disembarrassed themselves with astonishing facility from cumbrous forms of procedure and needless terms of art, and soon ceased to attach any superstitious value to rigid rules and prescriptions.** It was not for the ultimate advantage of mankind that they did so, though the immediate benefit conferred on their citizens may have been considerable. One of the rarest qualities of national character is the capacity for applying and working out the law, as such, at the cost of constant miscarriages of abstract justice, without at the same time losing the hope or the wish that law may be conformed to a higher ideal. **The Greek intellect, with all its mobility and elasticity, was quite unable to confine itself within the strait waistcoat of a legal formula;** and, if we may judge them by the popular courts of Athens, of whose working we possess accurate knowledge, the Greek tribunals exhibited the strongest tendency to confound law and fact. The remains of the Orators and the forensic commonplaces preserved by Aristotle in his Treatise on Rhetoric, show that questions of pure law were constantly argued on every consideration which could possibly influence the mind of the judges. No durable system of jurisprudence could be produced in this way. **A community which never hesitated to relax rules of written law whenever they stood in the way of an ideally perfect decision on the facts of particular cases, would only, if it bequeathed any body of judicial principles to posterity, bequeath one consisting of the ideas of right and wrong which happened to be prevalent at the time.** Such a jurisprudence would contain no framework to which the more advanced conceptions of subsequent ages could be fitted. It would amount at best to a philosophy, marked with the imperfections of the civilisation under which it grew up.

Few national societies have had their jurisprudence menaced by this peculiar danger of precocious maturity and untimely disintegration. It is certainly doubtful whether the Romans were ever seriously threatened by it, but at any rate they had adequate protection in their theory of Natural Law. **For the Natural Law of the jurisconsults was distinctly conceived by them as a system which ought gradually to absorb civil laws, without superseding them so long as they remained unrepealed.** There was no such impression of its sanctity abroad, that an appeal to it would be likely to overpower the mind of a judge who was charged with the superintendence of a particular litigation. **The value and serviceableness of the conception arose from its keeping before the mental vision a type of perfect law, and from its inspiring the hope of an indefinite approximation to it, at the same time that it never tempted the practitioner or the citizen to deny the obligation of existing laws which had not yet been adjusted to the theory.** It is important too to observe that this model system, unlike many of those which have mocked men's hopes in later days, was not entirely the product of imagination. **It was never thought of as founded on quite untested principles. The**

notion was that it underlay existing law and must be looked for through it. Its functions were in short remedial, not revolutionary or anarchical. And this, unfortunately, is the exact point at which the modern view of a Law of Nature has often ceased to resemble the ancient.

>
> In the end, Luxemburg concluded that Bernstein was not simply arguing for a "more realistic" way to socialism, but had thrown out the prospect of socialism:
>
> > That is why people who pronounce themselves in favour of the method of legislative reform in place and in contradistinction to the conquest of political power and social revolution, do not really choose a more tranquil, calmer and slower road to the same goal, but a different goal. Our program becomes not the realization of socialism, but the reform of capitalism; not the suppression of the wage labor system but the diminution of exploitation, that is, the suppression of the abuses of capitalism instead of suppression of capitalism itself.

The other liability to which the infancy of society is exposed has prevented or arrested the progress of far the greater part of mankind. The rigidity of primitive law, arising chiefly from its early association and identification with religion, has chained down the mass of the human race to those views of life and conduct which they entertained at the time when their usages were first consolidated into a systematic form. There were one or two races exempted by a marvellous fate from this calamity, and grafts from these stocks have fertilised a few modern societies; **but it is still true that, over the larger part of the world, the perfection of law has always been considered as consisting in adherence to the ground-plan supposed to have been marked out by the original legislator.** If intellect has in such cases been exercised on jurisprudence, it has uniformly prided itself on the subtle perversity of the conclusions it could build on ancient texts, without discoverable departure from their literal tenor. **I know no reason why the law of the Romans should be superior to the laws of the Hindoos, unless the theory of Natural Law had given it a type of excellence different from the usual one.**

> http://ambedkar.org/ambcd/38B1.%20Who%20were%20the%20Shudras%20PART%20I.htm#_msoanchor_100
>
> **From this brief survey of the basis of rights and disabilities in Roman Law, it will be clear that the basis was the same for all. They did not differ from community to community.** Rights and disabilities according to Roman Law were regulated by general considerations, such as *caput* and *existimatio.* Whoever had *caput* and *existimatio* had rights. Whoever lost his *caput* and his *existimatio* suffered disabilities. What is the position under the Brahmanic Law? There again, it is quite clear that rights and disabilities were not based on general uniform considerations. They were based on communal considerations. All rights for the first three *Varnas* and all disabilities for the Shudras was the principle on which the Brahmanic Law was based.
> ...
>
> It may be that the Roman Law did recognise communal distinction in distributing rights and disabilities. **The point is that the disabilities of the Plebians were not regarded as permanent.** Although they existed they were in course of time removed. That being so, the protagonists of Brahmanic Law cannot merely take solace in having found a parallel in the Roman Law **but have to answer why the Brahmanic Law did not abolish the distinction between the Traivarnikas and the Shudras as the Roman Law did by equating the Plebians with the Patricians?**
> ...
>
> The next feature of the Roman Law which distinguishes it from the Brahmanic Law is most noteworthy. It relates to the extinction of disabilities. Two points need be borne in mind. **First is that the disabilities under the Roman Law were only contingent. So long as certain conditions lasted, they gave rise to certain disabilities. The moment the conditions changed, the disabilities vanished and a step in the direction of equality before law was taken.** The second point is that the Roman Law never attempted to fix the conditions for ever and thereby perpetuate the disabilities. On the other hand, it was always ready to remove the conditions to which these disabilities were attached as is evident in the case of the Plebians, the Slaves, the Foreigners and the Pagans.
> ...
>
> **Thus, the Brahmanic Law not only seeks to impose disabilities but it endeavours to make them permanent.** One illustration will suffice. A Shudra is not entitled to perform Vedic sacrifices as he is not able to repeat the Vedic *Mantras.* Nobody would quarrel with such a disability. But the Dharma Sutras do not stop here. **They go further and say that it will be a crime for a Shudra to study the Vedas or hear it being pronounced** and if he does commit such a crime his tongue should be cut or molten lead should be poured into his ear. **Can anything be more barbarous than preventing a man to grow out of his disability?**

> The *fear* of ancestors and their power, the consciousness of owing debts to them, necessarily increases, according to this kind of logic, in the exact proportion that the race itself increases, that the race itself becomes more victorious, more independent, more honoured, more feared. **This, and not the contrary, is the fact. Each step towards race decay, all disastrous events, all symptoms of degeneration, of approaching disintegration, always *diminish* the fear of the founder's spirit, and whittle away the idea of his sagacity, providence, and potent presence.**

https://archive.org/details/ancientlaw030840mbp/page/n93/mode/2up?view=theater

The eighteenth century was half over when the most critical period in the history of Natural Law was reached. Had the discussion of the theory and of its consequences continued to be exclusively the employment of the legal profession, there would possibly have been an abatement of the respect which it commanded; for by this time the *Esprit des Lois* had appeared. Bearing in some exaggerations the marks of the excessive violence with which its author's mind had recoiled from assumptions usually suffered to pass without scrutiny, yet showing in some ambiguities the traces of a desire to compromise with existing prejudice, **the book of Montesquieu, with all its defects, still proceeded on that Historical Method before which the Law of Nature has never maintained its footing for an instant.** Its influence on thought ought to have been as great as its general popularity; but, in fact, it was never allowed time to put it forth, **for the counter-hypothesis which it seemed destined to destroy passed suddenly from the forum to the street, and became the key-note of controversies far more exciting than are ever agitated in the courts or the schools.** The person who launched it on its new career was that remarkable man who, without learning, with few virtues, and with no strength of character, has nevertheless stamped himself ineffaceably on history by the force of a vivid imagination, and by the help of a genuine and burning love for his fellow-men, for which much will always have to be forgiven him. **We have never seen in our own generation—indeed the world has not seen more than once or twice in all the course of history—a literature which has exercised such prodigious influence over the minds of men, over every cast and shade of intellect, as that which emanated from Rousseau between 1749 and 1762. It was the first attempt to re-erect the edifice of human belief after the purely iconoclastic efforts commenced by Bayle, and in part by our own Locke, and consummated by Voltaire;** and besides the superiority which every constructive effort will always enjoy over one that is merely destructive, it possessed the immense advantage of appearing amid an all but universal scepticism as to the soundness of all foregone knowledge in matters speculative. **Now, in all the speculations of Rousseau, the central figure, whether arrayed in an English dress as the signatory of a social compact, or simply stripped naked of all historical qualities, is uniformly Man, in a supposed state of nature. Every law or institution which would misbeseem this imaginary being under these ideal circumstances is to**

be condemned as having lapsed from an original perfection; every transformation of society which would give it a closer resemblance to the world over which the creature of Nature reigned, is admirable and worthy to be effected at any apparent cost. **The theory is still that of the Roman lawyers, for in the phantasmagoria with which the Natural Condition is peopled, every feature and characteristic eludes the mind except the simplicity and harmony which possessed such charms for the jurisconsult; but the theory is, as it were, turned upside down. It is not the Law of Nature, but the State of Nature, which is now the primary subject of contemplation.** The Roman had conceived that by careful observation of existing institutions parts of them could be singled out which either exhibited already, or could by judicious purification be made to exhibit, the vestiges of that reign of nature whose reality he faintly affirmed. Rousseau's belief was that a perfect social order could be evolved from the unassisted consideration of the natural state, a social order wholly irrespective of the actual condition of the world and wholly unlike it. **The great difference between the views is that one bitterly and broadly condemns the present for its unlikeness to the ideal past; while the other, assuming the present to be as necessary as the past, does not affect to disregard or censure it.** It is not worth our while to analyse with any particularity that philosophy of politics, art, education, ethics, and social relation which was constructed on the basis of a state of nature. It still possesses singular fascination for the looser thinkers of every country, and is no doubt the parent, more or less remote, of almost all the prepossessions which impede the employment of the Historical Method of inquiry, **but its discredit with the higher minds of our day is deep enough to astonish those who are familiar with the extraordinary vitality of speculative error. Perhaps the question most frequently asked nowadays is not what is the value of these opinions, but what were the causes which gave them such overshadowing prominence a hundred years ago. The answer is, I conceive, a simple one. The study which in the last century would best have corrected the misapprehensions into which an exclusive attention to legal antiquities is apt to betray was the study of religion.** But Greek religion, as then understood, was dissipated in imaginative myths. The Oriental religions, if noticed at all, appeared to be lost in vain cosmogonies. There was but one body of primitive records which was worth studying—the early history of the Jews. **But resort to this was prevented by the prejudices of the time. One of the few characteristics which the school of Rousseau had in common with the school of Voltaire was an utter disdain of all religious antiquities; and, more than all, of those of the Hebrew race.** It is well known that it was a point of honour with the reasoners of that day to assume not merely that the institutions called after Moses were not divinely dictated, nor even that they were codified at a later date than that attributed to them, but that they and the entire Pentateuch were a gratuitous forgery, executed after the return from the Captivity. **Debarred, therefore, from one chief security against speculative delusion, the philosophers of France, in their eagerness to escape from what they deemed a superstition of the priests, flung themselves headlong into a superstition of the lawyers.**

https://www.gutenberg.org/cache/epub/1860/pg1860-images.html#link2HCH0024

Humboldt has somewhere a curious passage; in which, looking on some wretched group of Indians, squatting stupidly round their fires, besmeared with grease and paint, and devouring ants and clay, he somewhat naively remarks, that were it not for science, which teaches us that such is the crude material of humanity, and this the state from which we all have risen, he should have been tempted rather to look upon those hapless beings as the last degraded remnants of some fallen and dying race. One wishes that the great traveller had been bold enough to yield to that temptation, which his own reason and common sense presented to him as the real explanation of the sad sight, instead of following the dogmas of a so-called science, which has not a fact whereon to base its wild notion, and must ignore a thousand facts in asserting it. **His own good sense, it seems, coincided instinctively with the Bible doctrine, that man in a state of nature is a fallen being, doomed to death—a view which may be a sad one, but still one more honorable to poor humanity than the theory, that we all began as some sort of two-handed apes. It is surely more hopeful to believe that those poor Otomacs or Guahibas were not what they ought to be, than to believe that they were.** It is certainly more complimentary to them to think that they had been somewhat nobler and more prudent in centuries gone by, than that they were such blockheads as to have dragged on, the son after the father, for all the thousands of years which have elapsed since man was made, without having had wit enough to discover any better food than ants and clay.

Our voyagers, however, like those of their time, troubled their heads with no such questions. Taking the Bible story as they found it, they agreed with Humboldt's reason, and not with his science; or, to speak correctly, agreed with Humboldt's self, **and not with the shallow anthropologic theories which happened to be in vogue fifty years ago; [1855]** and their new hosts were in their eyes immortal souls like themselves, “captivated by the devil at his will,” lost there in the pathless forests, likely to be lost hereafter.

https://www.gutenberg.org/cache/epub/46333/pg46333-images.html#A_DISCOURSE_b

The philosophers, who have inquired into the foundations of society, have all felt the necessity of going back to a state of nature; but not one of them has got there. Some of them have not hesitated to ascribe to man, in such a state, the idea of just and unjust, without troubling themselves to show that he must be possessed of such an idea, or that it could be of any use to him. Others have spoken of the natural right of every man to keep what belongs to him, without explaining what they meant by belongs. **Others again, beginning by giving the strong authority over the weak, proceeded directly to the birth of government, without regard to the time that must have elapsed before the meaning of the words authority and government could have existed among men.** Every one of them, in short, constantly dwelling on wants, avidity, oppression, desires and pride, has transferred to the state of nature ideas which were acquired in society; so that, in speaking of the savage, they described the social man. **It has not even entered into the heads of most of our writers to doubt whether the state of nature ever existed; but it is clear from the Holy Scriptures that the first man, having received his understanding and commandments immediately from God, was not himself in such a state; and that, if we give such credit to the writings of Moses as every Christian philosopher ought to give, we must deny that, even before the deluge, men were ever in the pure state of nature;** unless, indeed, they fell back into it from some very extraordinary circumstance; a paradox which it would be very embarrassing to defend, and quite impossible to prove.

Let us begin then by laying facts aside, as they do not affect the question. The investigations we may enter into, in treating this subject, must not be considered as historical truths, but only as mere conditional and hypothetical reasonings, rather calculated to explain the nature of things, than to ascertain their actual origin; just like the hypotheses which our physicists daily form respecting the formation of the world. **Religion commands us to believe that, God Himself having taken men out of a state of nature immediately after the creation, they are unequal only because it is His will they should be so: but it does not forbid us to form conjectures based solely on the nature of man, and the beings around him, concerning what might have become of the human race, if it had been left to itself.**

https://www.gutenberg.org/cache/epub/46333/pg46333-images.html#FNanchor_8_67

I have endeavoured to trace the origin and progress of inequality, and the institution and abuse of political societies, **as far as these are capable of being deduced from the nature of man merely by the light of reason, and independently of those sacred dogmas which give the sanction of divine right to sovereign authority.** It follows from this survey that, as there is hardly any inequality in the state of nature, all the inequality which now prevails owes its strength and growth to the development of our faculties and the advance of the human mind, and becomes at last permanent and legitimate by the establishment of property and laws.

https://archive.org/details/moraldarwinismho0000wike/page/172/mode/2up?view=theater

But there was another reason for Rousseau to call such reasonings “hypothetical and conditional” – that of Machiavelli. **As Rousseau noted, "Religion commands us to believe that ... God Himself took men out of the state of nature immediately after the creation."** In order to avoid persecution, Rousseau was compelled to present his Epicurean account as merely hypothetical, for religion "commanded us" what to believe. Yet, Rousseau hastily added, religion "does not forbid us to form conjectures, drawn solely from the nature of man and the beings surrounding him, about what the human race might have become if it had remained abandoned to itself."54 But such, of course, was a ruse. It is quite clear, as Rousseau's analysis proceeds, **that he considered Lucretius to be the true authority on human origins, not the Bible, for he soon dropped any pretense of offering a hypothetical account.**
…

Life in the state of nature was not "solitary, poor, nasty, brutish, and short" as the Epicurean hedonist Hobbes would have it, but solitary and tranquil, as Lucretius had described it, a condition in which our desires were at a bare minimum, and sexual desire was fortuitously aroused and easily satisfied without any of the disturbing entanglements of love, the family, or society, or any of the worrisome burdens or morality, for "men in that state, not having among themselves any kind of moral relationship or known duties, could be neither good nor evil, and had neither vices not virtues."57

As with both Hobbes and Locke, Rousseau provided an Epicurean counter-myth of human origins to displace the Genesis story, an account not based on evidence, but simply on the requirements of materialism devoid of divine design.

https://en.wikipedia.org/wiki/Aggañña_Sutta#Digging_Deeper_Into_the_Sutta

According to Richard Gombrich, **the sutta gives strong evidence that it was conceived entirely as a satire of Hindu claims regarding the divine nature of the varnashrama, showing that it is nothing but a human convention.**[2][3]

> According to Gombrich, the Buddha satirizes the Vedic "Hymn of the Cosmic Man" and etymologizes "reciter of the Veda" so as to make it mean "non-meditator" instead.[4]

https://archive.org/details/ancientlaw030840mbp/page/n97/mode/2up?view=theater

Looking back, however, to the period at which the theory of the state of nature acquired the maximum of political importance, there are few who will deny that it helped most powerfully to bring about the grosser disappointments of which the first French Revolution was fertile. **It gave birth, or intense stimulus, to the vices of mental habit all but universal at the time, disdain of positive law, impatience of experience, and the preference of *à priori* to all other reasoning.** In proportion too as this philosophy fixes its grasp on minds which have thought less than others and fortified themselves with smaller observation, its tendency is to become distinctly anarchical. **It is surprising to note how many of the *Sophismes Anarchiques* which Dumont published for Bentham, and which embody Bentham's exposure of errors distinctively French, are derived from the Roman hypothesis in its French transformation, and are unintelligible unless referred to it.**

> https://www.gutenberg.org/cache/epub/55903/pg55903-images.html#link2H_4_0004
>
> The literature of France has been to ours what Aaron was to Moses, the expositor of great truths which would else have perished for want of a voice to utter them with distinctness. **The relation which existed between Mr. Bentham and M. Dumont is an exact illustration of the intellectual relation in which the two countries stand to each other.** The great discoveries in physics, in metaphysics, in political science, are ours. **But scarcely any foreign nation except France has received them from us, by direct communication.** Isolated by our situation, isolated by our manners, we found truth, but we did not impart it. France has been the interpreter between England and mankind.

On this point too it is a curious exercise to consult the *Moniteur* during the principal eras of the Revolution. The appeals to the Law and State of Nature become thicker as the times grow darker. They are comparatively rare in the Constituent Assembly; they are much more frequent in the Legislative; in the Convention, amid the din of debate on conspiracy and war, they are perpetual.

There is a single example which very strikingly illustrates the effects of the theory of natural law on modern society, and indicates how very far are those effects from being exhausted. **There cannot, I conceive, be any question that to the assumption of a Law Natural we owe the doctrine of the fundamental equality of human beings. That "all men are equal" is one of a large number of legal propositions which, in progress of time, have become political. The Roman jurisconsults of the Antonine era lay down that "omnes homines naturâ æquales sunt," but in their eyes this is a strictly juridical axiom.** They intend to affirm that, under the hypothetical Law of Nature, and in so far as positive law approximates to it, the arbitrary distinctions which the Roman Civil Law maintained between classes of persons cease to have a legal existence. **The rule was one of considerable importance to the Roman practitioner, who required to be reminded that, wherever Roman jurisprudence was assumed to conform itself exactly to the code of Nature, there was no difference in the contemplation of the Roman tribunals between citizen and foreigner, between freeman and slave, between Agnate and Cognate.** The jurisconsults who thus expressed themselves most certainly never intended to censure the social arrangements under which civil law fell somewhat short of its speculative type; nor did they apparently believe that the world would ever see human society completely assimilated to the economy of nature. But when the doctrine of human equality makes its appearance in a modern dress it has evidently clothed itself with a new shade of meaning. Where the Roman jurisconsult had written "æquales sunt," meaning exactly what he said, the modern civilian wrote "all men are equal" in the sense of "all men ought to be equal." **The peculiar Roman idea that natural law coexisted with civil law and gradually absorbed it, had evidently been lost sight of, or had become unintelligible,** and the words which had at most conveyed a theory concerning the origin, composition, and development of human institutions, were beginning to express the sense of a great standing wrong suffered by mankind.

As early as the beginning of the fourteenth century, the current language concerning the birth-state of men, though visibly intended to be identical with that of Ulpian and his contemporaries, has assumed an altogether different form and meaning. The preamble to the celebrated ordinance of King Louis Hutin enfranchising the serfs of the royal domains would have sounded strangely to Roman ears. "**Whereas, according to natural law, everybody ought to be born free;** and by some usages and customs which, from long antiquity, have been introduced and kept until now in our realm, and peradventure by reason of the misdeeds of their predecessors, many persons of our common people have fallen into servitude, therefore, We, etc."

> https://www.historytoday.com/archive/normans-and-slavery-breaking-bonds

The idea that slavery in Europe declined as Christianity spread has long been discredited. **Until the turn of the first millennium the Church had little problem with slavery.** The Bible is full of stories of slaves and their masters; churchmen were generally content to urge slaves to be obedient and masters to be merciful. **Nevertheless in the decades around the millennium the powerful Church reform movement began to take root and reformed churchmen took an increasingly dim view of concubinage and bastardy.** In France lay leaders, who in the past had thought nothing of having several wives, now found themselves subjected to opprobrium, if they took up with more than one.

Perhaps more important were the simultaneous structural changes taking place in French society. The political fragmentation of France during the 10th century, the increase in knights and growth of castle-building, had made violence and warfare more endemic and, precisely for this reason, better regulated. **Warriors concluded it was better to capture and ransom each other in war rather than risk death every time they took to the battlefield. At the same time the Peace of God movement urged the protection of non-combatants.** By the 11th century young men and women were no longer a legitimate target in warfare, to be led away in chains once the fighting was over.

https://archive.org/details/romanlawinmoder01shergoog/page/n261/mode/2up?view=theater

The earliest law school in France is that of Montpellier. This was founded in the 12th century by the Italian Placentinus,16 who had taught law at Mantua and Bologna. **The study of Roman law was embraced at Paris with such extraordinary fervor that Pope Honorius III in the year 1220 had to issue a decree forbidding ecclesiastics from leaving holy orders and betaking themselves to Paris for the study of law.** Paris being forbidden, law schools were then started at Toulouse17 and elsewhere.

https://archive.org/details/HistoryOfFranceV1/page/n373/mode/2up?view=theater

The young feudal king, humanized by the want of money, did not disdain to treat with serfs and with Jews. The famous ordinance of Louis Hutin for the enfranchisement of the serfs of his domains, is exactly similar to that of Philippe-le-Bel for the Valois, already quoted:—"**As according to the right (law) of nature each ought to be born free,** and through ancient usages and customs which from time long past have been introduced and observed in our kingdom hitherto, and perchance for the misdeed of their predecessors, many of our common people have fallen into bond of servitude and of diverse conditions, which is exceedingly displeasing to us—**We, considering that our kingdom is called and named the kingdom of the Franks, (freemen,) and desiring that the reality accord with the name,** and that the condition of the people be amended by us and by the advent of our new government—by deliberation of our grand council, have ordained and do ordain, **that generally throughout our kingdom, so long as it may belong to us and to our successors,** such servitudes be restored to franchises, and that to all those who, by origin, or antiquity, or newly, by marriage, or by residence of place in servile condition, have fallen or may fall into bond of servitude, franchise be given on good and suitable conditions."§

> § **Comme selon le droit de nature chacun doit naistre franc;** et par aucuns usages et coustumes, qui de grant ancienneté ont esté entroduites et gardées jusques cy en nostre royaume, et par avanture pour le meffet de leurs prédecesseurs, moult de personnes de nostre commun pueple, soient encheues en lieu de servitudes et de diverses conditions, qui moult nous desplaît: **Nous considerants que nostre royaume est dit, et nomme le royaume des Francs, et voullants que la chose en vérité soit accordant an nom,** et que la condition des gents amende de nous et la venue de nostre nouvel gouvernement; par délibération de nostre grand conseil avons ordené et ordenons, **que generaument, par tout nostre royaume, de tant comme il pent appartenir à nous et à nos successeurs,** telles servitudes soient ramenées à franchises, et à tous ceus qui de origine, ou ancienneté, ou de nouvel par mariage, ou par residence de lieus de serve condition, sont encheues, ou pourroient eschoir ou lieu de servitudes, franchise soit donnée à bonnes et convenables conditions. Ord. i. p. 583.

It is curious to see the son of Philippe-le-Bel admitting serfs to liberty; but it is trouble lost. The merchant vainly swells his voice and enlarges on the worth of his merchandise; the poor serfs will have none of it. Had they buried in the ground some bad piece of money, they took care not to dig it up to buy a bit of parchment. In vain does the king wax wroth at seeing them dull to the value of the boon offered. **At last, he directs the commissioners deputed to superintend the enfranchisement, to value the property of such serfs as preferred "remaining in the sorriness (chétiveté) of slavery," and to tax them "as sufficiently and to such extent as the condition and wealth of the individuals may conveniently allow, and as the necessity of our war requires."**

But with all this it is a grand spectacle to see proclamation made from the throne itself of the imprescriptible right of every man to liberty. The serfs do not buy this right, but they will remember both the royal lesson, and the dangerous appeal to which it instigates against the barons.*

https://oll.libertyfund.org/title/montesquieu-complete-works-vol-3#lf0171-03_head_106

> It is a long time since the Christian princes set free all the slaves in their kingdoms; because, say they, Christianity makes all men equal. **It is true, this act of religion hath been very serviceable to them. They destroyed, by this means, the power of the nobility, by which they kept the people in subjection to themselves.** They afterwards made conquest in countries where they found it was to their advantage to have slaves; they allowed of buying and selling them; forgetting those principles of religion, which had so much touched them. What shall we call this? Truth at one time, error at another.

This is the enunciation not of a legal rule but of a political dogma; **and from this time the equality of men is spoken of by the French lawyers just as if it were a political truth which happened to have been preserved among the archives of their science.** Like all other deductions from the hypothesis of a Law Natural, and like the belief itself in a Law of Nature, it was languidly assented to and suffered to have little influence on opinion and practice until it passed out of the possession of the lawyers into that of the literary men of the eighteenth century and of the public which sat at their feet. With them it became the most distinct tenet of their creed, and was even regarded as a summary of all the others. **It is probable, however, that the power which it ultimately acquired over the events of 1789 was not entirely owing to its popularity in France, for in the middle of the century it passed over to America. The American lawyers of the time, and particularly those of Virginia, appear to have possessed a stock of knowledge which differed chiefly from that of their English contemporaries in including much which could only have been derived from the legal literature of continental Europe.**

>
> Permit me, Sir, to add another circumstance in our Colonies which contributes no mean part towards the growth and effect of this untractable spirit. I mean their *education*. **In no country perhaps in the world is the law so general a study. The profession itself is numerous and powerful; and in most provinces it takes the lead. The greater number of the deputies sent to the Congress were lawyers. But all who read, and most do read, endeavor to obtain some smattering in that science. I have been told by an eminent bookseller, that in no branch of his business, after tracts of popular devotion, were so many books as those on the law exported to the Plantations.** The Colonists have now fallen into the way of printing them for their own use. I hear that they have sold nearly as many of Blackstone's Commentaries in America as in England. General Gage marks out this disposition very particularly in a letter on your table. **He states that all the people in his government are lawyers, or smatterers in law;** and that in Boston they have been enabled, by successful chicane, wholly to evade many parts of one of your capital penal constitutions. The smartness of debate will say that this knowledge ought to teach them more clearly the rights of legislature, their obligations to obedience, and the penalties of rebellion. All this is mighty well. But my honorable and learned friend on the floor, who condescends to mark what I say for animadversion, will disdain that ground. He has heard, as well as I, **that when great honors and great emoluments do not win over this knowledge to the service of the state, it is a formidable adversary to government.** If the spirit be not tamed and broken by these happy methods, it is stubborn and litigious. *Abeunt studia in mores.*26 This study readers men acute, inquisitive, dexterous, prompt in attack, ready in defence, full of resources.

A very few glances at the writings of Jefferson will show how strongly his mind was affected by the semi-juridical, semi-popular opinions which were fashionable in France, and we cannot doubt that it was sympathy with the peculiar ideas of the French jurists which led him and the other colonial lawyers who guided the course of events in America to join the specially French assumption that "all men are born equal" with the assumption, more familiar to Englishmen, that "all men are born free," in the very first lines of their Declaration of Independence. The passage was one of great importance to the history of the doctrine before us. The American lawyers, in thus prominently and emphatically affirming the fundamental equality of human beings, gave an impulse to political movements in their own country, and in a less degree in Great Britain, which is far from having yet spent itself; **but besides this they returned the dogma they had adopted to its home in France, endowed with vastly greater energy and enjoying much greater claims on general reception and respect. Even the more cautious politicians of the first Constituent Assembly repeated Ulpian's proposition as if it at once commended itself to the instincts and intuitions of mankind;** and of all the "principles of 1789" it is the one which has been least strenuously assailed, which has most thoroughly leavened modern opinion, and which promises to modify most deeply the constitution of societies and the politics of states.

---

https://oll.libertyfund.org/title/canavan-select-works-of-edmund-burke-vol-2#lf0005-02_head_018

Judge, Sir, of my surprize, when I found that a very great proportion of the Assembly (a majority, I believe, of the members who attended) was composed of practitioners in the law. It was composed not of distinguished magistrates, who had given pledges to their country of their science, prudence, and integrity; not of leading advocates, the glory of the bar; not of renowned professors in universities—but for the far greater part, as it must in such a number, of the inferior, unlearned, mechanical, merely instrumental members of the profession. There were distinguished exceptions; but the general composition was of obscure provincial advocates, of stewards of petty local jurisdictions, country attornies, notaries, and the whole train of the ministers of municipal litigation, the fomenters and conductors of the petty war of village vexation. **From the moment I read the list I saw distinctly, and very nearly as it has happened, all that was to follow.**

The degree of estimation in which any profession is held becomes the standard of the estimation in which the professors hold themselves. Whatever the personal merits of many individual lawyers might have been, and in many it was undoubtedly very considerable, **in that military kingdom, no part of the profession had been much regarded, except the highest of all, who often united to their professional offices great family splendour, and were invested with great power and authority. These certainly were highly respected, and even with no small degree of awe.** The next rank was not much esteemed; the mechanical part was in a very low degree of repute.
…

It was not an event depending on chance or contingency. It was inevitable; it was necessary; it was planted in the nature of things. They must *join* (if their capacity did not permit them to *lead*) in any project which could procure to them a *litigious constitution;* which could lay open to them those innumerable lucrative jobs which follow in the train of all great convulsions and revolutions in the state, and particularly in all great and violent permutations of property. **Was it to be expected that they would attend to the stability of property, whose existence had always depended upon whatever rendered property questionable, ambiguous, and insecure?**

> https://archive.org/details/aglanceatrevolu03macfgoog/page/n291/mode/2up?view=theater
>
> **Even without changing the French laws of inheritance and other laws which ought to be changed – for they were conceived in the very spirit of ultra-democratism, and their tendency is to bring all men and families down to a dead level, and to render any prolonged existence of an aristocracy an impossibility** – I am of opinion that most important and beneficial changes (as beneficial to the country as to themselves) would ensue if all the Neapolitan nobility would forsake the capital for six months every year, and pass that time on their estates.
> …
>
> **It is precisely from this plunderous class of "middle-men" and agents and factors that the *ultra-liberali*, the presidents and orators of clubs, and the real architects of the barricades have sprung,** and do yet spring, not only in this kingdom, but through the rest of Italy, where the noblesse have been equally negligent and averse to a country life, and have been equally pillaged. **Italian robbers always call the man they rob a thief and assassin. Men always hate those whom they most wrong.** In acquiring the estates of the nobility, these provincial, rustical agents have not been able to obtain a footing in the noble society of Naples, or the *entrée* at court. They are fenced out. Family pride has survived the decay of family wealth; and it is only on very rare occasions that the *novi homines* are to be seen in the house of a second-rate nobleman at Naples, let their wealth be what it may. **But these enriched rustics very commonly send their sons up to Naples to be educated, and to study the law – and these young lawyers from the provinces are your revolutionists *par excellence*.**

…

Were they then to be awed by the super-eminent authority and awful dignity of an handful of country clowns who have seats in that Assembly, some of whom are said not to be able to read and write? and by not a greater number of traders, who, though somewhat more instructed, and more conspicuous in the order of society, had never known any thing beyond their counting-house? No! **both these descriptions were more formed to be overborne and swayed by the intrigues and artifices of lawyers,** than to become their counterpoise. With such a dangerous disproportion, the whole must needs be governed by them.
…

Such in general was the composition of the *Tiers Etat* in the National Assembly; in which was scarcely to be perceived the slightest traces of what we call the natural landed interest of the country.
…

> **The magistrates of the supreme courts and bailliages belonged to the order of the Nobility, and were represented in its representation to the number of 28;** and even if

> they had been eligible, the electors of the Third Estate would hardly have entrusted them with their interests. But 162 magistrates of other tribunals were among the representatives of the Third Estate.

https://en.wikipedia.org/wiki/Estates_General_of_1789#Elections_of_early_spring_1789

The Third Estate representation was doubled to 578 men, representing about 98 percent of the population of roughly 28 million. Half were well-educated lawyers or local officials. Nearly a third were in trades or industry; 51 were wealthy land owners.[13][14]

https://en.wikipedia.org/wiki/Nobles_of_the_Robe

Under the Ancien Régime of France, **the Nobles of the Robe or Nobles of the Gown (French: *noblesse de robe*) were French aristocrats whose rank came from holding certain judicial or administrative posts.** As a rule, the positions did not of themselves give the holder a title of nobility, such as baron or viscount (although the holder might also have such a title), but they were almost always attached to a specific function. The offices were often hereditary, and by 1789, most of the holders had inherited their positions. **The most influential of them were the 1,100 members of the 13 parlements, or courts of appeal.**

https://archive.org/details/lazarecarnotrepu0000dupr/page/14/mode/2up?view=theater

Lazare's father was the twentieth "homme de robe" in the family since the sixteenth century. On the paternal side, of seventy-four ancestors since the end of the sixteenth century there were twenty lawyers, notaries or judicial functionaries, four ecclesiastics, five public or private administrators, one officer, three doctors and surgeons, and one painter.
…

At the age of fourteen, Lazare, with his older brother, was lodged with a Madame Gondier, in Autun, and enrolled in the Collège d'Autun for the study of the classics. The Oratoriens had recently succeeded the Jesuits in the governance of this excellent *Collége*. At the time, of course, elementary and secondary education in France was almost exclusively in the hands of the various orders of the church. **After the suppression and expulsion of the Jesuits in 1762, the Oratoriens took the lead in the instruction offered in the thirty *colleges* scattered throughout France.**16 It is quite evident that the Oratoriens were liberal innovators in education in the eighteenth century. They took the lead in introducing the study of the French language and literature and in the simplification of the study of Latin. In addition to the improved study of the classics, this order introduced and emphasized the teaching of geography, history, mathematics, and science. **The Oratoriens also warmly supported the philosophy of Descartes.**
…

A perusal of the plan of studies of the Oratoriens for 174517 reveals how central was the place of Cicero, Cato, Ovid, Virgil, Caesar, Terence, St. Chrysostome, Sallust, Livy, Tacitus, Suetonius, Horace, Seneca, Juvenal, Demosthenes, Homer, Pindar, Sophocles, Euripides, and other literary and history-writing figures of ancient Greece and Rome. **Erasmus and Comenius were also given an important place.**

Carnot was thoroughly absorbed in the study of classical antiquity. This was common for his class in the period.18 There is no doubt that this discipline and this taste date from the years which he spent in the Collège d'Autun.
…

Later on in life Carnot translated a great deal from the Latin for his own pleasure and profit. His political speeches and writings are replete with classical references and allusions that reveal a thorough familiarity with the history of Greece and Rome.19

His feelings for a common humanity, his leanings towards a universal principle of justice and right, and his theory of natural rights bear testimony to his close study of the Stoic philosophy. The natural tendency of the period to idealize and glorify ancient Greece and Rome was characteristic of Carnot. Dissatisfied with their own society, the educated of the period looked back to the model of an earlier one, in order to sketch a new order for themselves.
…

During his first eighteen months in this private school the youth systematically studied theology largely under his own direction and under the compulsion of his own conscience and doubts. **He suffered the ridicule of his classmates because of his piety. He ended this period by discarding theological works forever and by adopting the prevalent ideas of deism.** He retained, however, a deep respect for the holy books of Christianity. His son noted much later that "as to his religious principles, these were based upon a deism freed of all mythology, and upon a considered confidence in immortality."22

> https://archive.org/details/lazarecarnotrepu0000dupr/page/176/mode/2up?view=theater
>
> Carnot was president of the Convention on May 16, when the Jacobins presented their address congratulating the Convention on this decree. "Replying coldly," writes Professor Aulard, "**[Carnot] spoke more as a disciple of Diderot than as an admirer of Savoyard Vicar, appeared to confound God with nature,** and by the shades of his language, showed as well as he could without risking his head, that he did not adhere to the new cult."23 Carnot said, in part, "Justice, humanity, love of country, consolation for the one who suffers,

> hope of a better future ... **all these things together make the Supreme Being;** he is the unification of all thoughts which are the happiness of man, of all sentiments which spread flowers in the way of life.
>
> "**To deny the Supreme Being is to deny the existence of Nature;** for the laws of Nature are supreme wisdom itself. What is the Supreme Being, if it is not the great final truth which contains all truth, the eternal order of nature, immutable justice, the sublime virtue which includes all the virtues, the love which embraces all pure affections. ... To invoke the Supreme Being is to call on the spectacle of nature."24
> ...
>
> At a later date Carnot's son summarized the religious beliefs of his father: "Without seeking a metaphysical explanation of God, **Carnot accepted the idea of a Supreme Wisdom, working together with love for the conservation of the world.** He did not question that man was the master of his own destiny, and because of that belief, he disdained all speculation which did not lead directly to the improvement of the individual or to the progress of the social order: **his philosophy took a very practical direction.**"27

https://archive.org/details/lazarecarnotrepu0000dupr/page/32/mode/2up?view=theater

In this *Mémoire* Carnot combined general political discussion with the technical treatment. His general position was revealed when he wrote **"War is the art of conserving; the art of destruction is its abuse. … Every just war, every war which merits the name, is essentially defensive."** He criticised rulers for invoking divine sanction for their wars of aggression, and in no uncertain terms he protested against wars of conquest. **"If there is a country in Europe," he wrote, "whose particular interest is in accord on this point (the laws of equity and natural religion) with the principles of this universal morality, of this great political philosophy which considers all nations as parts of the same humanity, it is undoubtedly France."** Thus this military engineer reveals his absorption in the ideas of the *philosophes* which were the current stock in trade of the literate, sensitive bourgeoisie. **His ideas also attest his familiarity with the central theses of the Stoics in Ancient Greece and Rome.**

https://archive.org/details/lazarecarnotrepu0000dupr/page/58/mode/2up?view=theater

Carnot returned to Paris around January 9, 1793. On January 12 the official Report of the Commission was deposited in the Convention. It was read there before the members in the session of January 29 by Carnot.47 The applause of the Convention frequently interrupted the reading of the Report and it was ordered to be printed and distributed. Throughout, the Report was a most thorough, practical, sane, concrete document of grievances and of suggested remedies.48 It spoke particularly in terms of specific abuses rather than in terms of principles, and asked for their redress by the responsible government. The report breathed the spirit of Turgot. It is truly a masterly document in practical politics. **It gives the "highest idea of Carnot, as thinker and as writer."**49
...

Some of the demagogical phraseology of the republicans appears in the introduction: **"The irresistible voice of reason, in proclaiming the rights of the people and in opening their eyes, taught them that they have no other sovereigns than themselves, no other enemies than the stupid idols worshipped under the name of Kings, and that in the whole world there should no longer be any but equals, friends and brothers."**50 The Report went on to state that the league of princes formed to preserve their own tyranny would be dissolved by the general love of equality and by the courage of free men.

https://archive.org/details/lazarecarnotrepu0000dupr/page/192/mode/2up?view=theater

He believed in a strongly centralized government for the crisis, and he was responsible for the defense of France, both within and on the frontiers of the Nation. **He saw the need for absolute control at home. He opposed tyranny but he favored the virtual dictatorship of the Committee of Public Safety.** He claimed only to be a specialist.
...

Sorel has written of Carnot in this regard, **"He confined himself to his rôle, achieving a sort of stoicism of state and imposed upon himself as a duty, … this capitulation of his humanity; letting the Terrorists guillotine so long as they let him defend France."**93

https://www.marxists.org/archive/marx/works/1852/18th-brumaire/ch01.htm

Camille Desmoulins, Danton, Robespierre, St. Just, Napoleon, **the heroes as well as the parties and the masses of the old French Revolution, performed the task of their time – that of unchaining and establishing modern bourgeois society – in Roman costumes and with Roman phrases.** The

first one destroyed the feudal foundation and cut off the feudal heads that had grown on it. The other created inside France the only conditions under which free competition could be developed, parceled-out land properly used, and the unfettered productive power of the nation employed; and beyond the French borders it swept away feudal institutions everywhere, to provide, as far as necessary, bourgeois society in France with an appropriate up-to-date environment on the European continent. **Once the new social formation was established, the antediluvian colossi disappeared and with them also the resurrected Romanism – the Brutuses, the Gracchi, the publicolas, the tribunes, the senators, and Caesar himself.** Bourgeois society in its sober reality bred its own true interpreters and spokesmen in the Says, Cousins, Royer-Collards, Benjamin Constants, and Guizots; its real military leaders sat behind the office desk and the hog-headed Louis XVIII was its political chief. **Entirely absorbed in the production of wealth and in peaceful competitive struggle, it no longer remembered that the ghosts of the Roman period had watched over its cradle.**

> https://oll.libertyfund.org/title/pollock-the-genius-of-the-common-law#lf1381_label_032
>
> Indeed it is notorious that in political convulsions the legal part of an established order has often fared the best. **When the French Revolution had swept away the rank and privileges of the nobles, the substance of the civil law remained in other respects much as it had been before.** Napoleon's codes were based on the customs and ordinances of the monarchy; they were found quite well fitted to serve, with a moderate amount of editing and local amendment, for the Province of Quebec, where the Revolution had never passed.

https://www.gutenberg.org/files/1717/1717-h/1717-h.htm#link2H_4_0005

But that modern movement which many would count the most anarchic of all is in this sense the most conservative of all. **Never was the past more venerated by men than it was by the French Revolutionists.** They invoked the little republics of antiquity with the complete confidence of one who invokes the gods. The Sans-culottes believed (as their name might imply) in a return to simplicity. They believed most piously in a remote past; some might call it a mythical past.

https://www.sacred-texts.com/cla/fsgr/fsgr06.htm#an_fr_40_1

This claim of a new thing to be old is, in varying degrees, a common characteristic of great movements. The Reformation professed to be a return to the Bible, the Evangelical movement in England a return to the Gospels, the High Church movement a return to the early Church. **A large element even in the French Revolution, the greatest of all breaches with the past, had for its ideal a return to Roman republican virtue or to the simplicity of the natural man.**40_2

> 40_2 Since writing the above I find in Vandal, *L'Avènement de Bonaparte*, p. 20, in Nelson's edition, a phrase about the Revolutionary soldiers: 'Ils se modelaient sur ces Romains ... sur ces Spartiates ... et ils créaient un type de haute vertu guerrière, quand ils croyaient seulement le reproduire.'

https://books.google.fi/books?id=9-8fIBVgCQYC&lpg=PP1&hl=fi&pg=PA112#v=onepage&q&f=false

Like the English Revolution of the seventeenth century, the Papal Revolution pretended to be not a revolution but a restoration. Gregory VII, like Cromwell, claimed that he was not innovating, but restoring ancient freedoms that had been abrogated in the immediately preceding centuries. **As the English Puritans and their successors found precedents in the common law of the thirteenth and fourteenth centuries, largely passing over the century or more of Tudor-Stuart absolutism, so the Gregorian reformers found precedents in the patristic writings of the early centuries of the church, largely passing over the Carolingian and post-Carolingian era in the West.** The ideological emphasis was on tradition, but the tradition could only be established by suppressing the immediate past and returning to an earlier one. **Writings of leading Frankish and German canonists and theologians of the ninth and tenth centuries were simply ignored.** In addition, the patristic writings were interpreted to conform to the political program of the papal party, and when particular patristic texts stood in the way of that program they were rejected. **Faced with an obnoxious custom, the Gregorian reformers would appeal over it to truth, quoting the aphorism of Tertullian and St. Cyprian, "Christ said, 'I am the truth.' He did not say 'I am the custom.'"** Gregory VII quoted this against Emperor Henry IV. Becket quoted it against King Henry II. **It had a special force at a time when almost all the prevailing law was customary law.**

It is the hallmark of the great revolutions of Western history, starting with the Papal Revolution, that they clothe their vision of the radically new in the garments of a remote past, **whether those of ancient legal authorities (as in the case of the Papal Revolution), or of an ancient religious text, the Bible (as in the case of the German Reformation), or of an ancient civilization, classical Greece (as in the case of the French Revolution), or of a prehistoric classless society (as in the case of the Russian Revolution).** In all these great upheavals the idea of a restoration – a return, and in that sense a revolution, to an earlier starting point – was connected with a dynamic concept of the future.

https://www.gutenberg.org/files/19104/19104-h/19104-h.htm#fna738

It will be remembered that Rousseau like Weishaupt held that the Golden Age of felicity did not end in the garden of Eden, as is popularly supposed, but was prolonged into tribal and nomadic life. Up to this moment Communism was the happy disposition under which the human race existed and which vanished with the introduction of civilization. **Civilization is therefore the *fons et origo mali* and should be done away with. Let no one exclaim that this theory died out either with Rousseau or with Weishaupt;** the idea that "civilization is all wrong" runs all through the writings and speeches of our Intellectual Socialists to-day.

> https://www.marxists.org/archive/lafargue/1883/lazy/ch01.htm
>
> Look at the noble savage whom the missionaries of trade and the traders of religion have not yet corrupted with Christianity, syphilis and the dogma of work, and then look at our miserable slaves of machines.[1]
>
> > [1] **European explorers pause in wonder before the physical beauty and the proud bearing of the men of primitive races, not soiled by what Paeppig calls “the poisonous breath of civilization.”** Speaking of the aborigines of the oceanic Islands, Lord George Campbell writes: “There is not a people in the world which strikes one more favorably at first sight. Their smooth skin of a light copper tint, their hair golden and curly, their beautiful and happy faces, in a word. their whole person formed a new and splendid specimen of the ‘genus homo’; their physical appearance gave the impression of a race superior to ours.” **The civilized men of ancient Rome, witness Caesar and Tacitus, regarded with the same admiration the Germans of the communist tribes which invaded the Roman empire.** Following Tacitus, Salvien, the priest of the fifth century who received the surname of master of the Bishops, held up the barbarians as an example to civilized Christians: “We are immodest before the barbarians, who are more chaste than we. Even more, the barbarians are wounded at our lack of modesty; the Goths do not permit debauchees of their own nation to remain among them; alone in the midst of them, by the sad privilege of their nationality and their name, the Romans have the right to be impure. (Pederasty was then the height of the fashion among both pagans and Christians.) The oppressed fly to the barbarians to seek for mercy and a shelter.” (*De Gubernatione Dei*) **The old civilization and the rising Christianity corrupted the barbarians of the ancient world, as the old Christianity and the modern capitalist civilization are corrupting the savages of the new world.**

I have referred elsewhere to Mr. H.G. Wells's prediction that mankind will more and more revert to the nomadic life, and Mr. Snowden has recently referred in tones of evident nostalgia to that productive era when man "lived under a system of tribal Communism."1

> 1. Mr. Philip Snowden in debate on Socialism in the House of Commons on March 20, 1923: **"By far the greatest time that man has been upon this globe he has lived not under a system of private enterprise, not under capitalism, but under a system of tribal communism, and it is well worth while to remember that most of the great inventions that have been the basis of our machinery and our modern discoveries were invented by men who lived together in tribes."**

...

Here, then, is the theory on which this yearning for a return to nature is based. **For it is quite probable that if a Golden Age ever existed it was Communistic; it is also true that certain primitive tribes have found it possible to continue the same system,** for the simple reason that when and where the earth was very thinly populated it brought forth, without the artificial aid of agriculture, more than enough to supply each man's needs. **There was therefore no need for laws to protect property, since every man could help himself freely to all that he required. If at the present time a dozen people were shipwrecked on a fertile island some miles in area, the institution of property would be equally superfluous;** if, however, several hundred were to share the same fate, it would at once become necessary to institute some system of cultivation which in its turn would necessitate either the institution of property, by which each man would depend on his own plot of land for his existence, or a communal system, by which all would be obliged to work for the common good and force applied to those who refused to do their allotted share.

https://archive.org/details/newscienceofgiam030174mbp/page/n349/mode/2up?view=theater

981 The two greatest eternal properties of the aristocratic commonwealths, as we have said above, are the guarding of the frontiers and the guarding of the orders.

982 The guarding of the frontiers began to be observed, as we have seen above, by bloody religions under the divine governments, **for it was necessary to set up boundaries to the fields in order to put a stop to the infamous sharing of things in the bestial state. On these boundaries were to be fixed the frontiers first of families, then of clans or houses, later of peoples, and finally of nations.** Hence the giants, as Polyphemus tells Ulysses, lived separately, each in his own cave with his wife and children, and did not meddle in one another's affairs, thus following the habits of their recent savage origin; and they savagely slew any who entered within their boundaries, as Polyphemus

attempted to slay Ulysses and his companions. (In this giant, as we have remarked several times, Plato discerns the fathers in the state of the families.) From this, as we showed above, **the custom was derived whereby the cities for a long period of time looked upon each other as enemies. So much for the harmonious division of the fields described by Hermogenianus the jurisconsult and received in good faith by all interpreters of Roman law.** From this first and most ancient principle of human things, with which its subject matter began, it would be reasonable to begin also the doctrine which teaches *De rerum divisione et acquirendo earum dominio* —"Of the classification of things and of acquiring ownership of them." This guarding of the frontiers is naturally practiced in the aristocratic commonwealths, which, as political writers point out, are not established by conquest. But later, **when the infamous communism of things had ceased and the boundaries of the peoples were well fixed,** came the popular commonwealths which are made for the expansion of empires, and finally the monarchies which are even more efficient in that respect.
...

985 **The guarding of the orders began in divine times from jealousy** (the jealousy of Juno, the goddess of solemn matrimony, as noted above) **with a view to the certainty of the families as against the nefarious communism of women.** Such vigilance is a natural property of the aristocratic commonwealths, **desirous of keeping family relationships, successions, and consequently wealth and through it power, within the order of the nobles.** On this account testamentary laws were late in appearing among the nations.

https://en.wikipedia.org/wiki/Karl_Polanyi

Polanyi graduated from Budapest University in 1912 with a doctorate in Law.

https://en.wikipedia.org/wiki/The_Great_Transformation_(book)

Prior to the Market Society, markets had a very limited role in society and were confined almost entirely to long-distance trade.[9] As Polanyi wrote, **"the same bias which made Adam Smith's generation view primeval man as bent on barter and truck induced their successors to disavow all interest in early man, as he was now known not to have indulged in those laudable passions."**[10]

The modern market economy was forced by the powerful modern state, which was needed to push changes in social structure, and in what aspects of human nature were amplified and encouraged, which allowed for a competitive capitalist economy to emerge. For Polanyi, these changes implied the destruction of the basic social order that had reigned throughout pre-modern history. **Central to the change was that factors of production, such as land and labor, would now be sold on the market at market-determined prices instead of allocated according to tradition, redistribution, or reciprocity.**[11]
...

Polanyi also remarks that the **pre-modern economies of China, the Incan Empire, the Indian Empires, Babylon, Greece, and the various kingdoms of Africa operated on principles of reciprocity and redistribution with a very limited role for markets,** especially in settling prices or allocating the factors of production.[12] The book also presented his belief that market society is unsustainable because it is fatally destructive to human nature and the natural contexts it inhabits.

Polanyi attempted to turn the tables on the orthodox liberal account of the rise of capitalism by arguing that "laissez-faire was planned", whereas social protectionism was a spontaneous reaction to the social dislocation imposed by an unrestrained free market. He argues that the construction of a "self-regulating" market necessitates the separation of society into economic and political realms. **Polanyi does not deny that the self-regulating market has brought "unheard of material wealth",** but he suggests that this is too narrow a focus. The market, once it considers land, labor and money as fictitious commodities, and including them "means to subordinate the substance of society itself to the laws of the market."[13]
...

He ended his work with a prediction of a socialist society, noting, "after a century of blind 'improvement', man is restoring his 'habitation.'"[14]
...

The sociologists Fred L. Block and Margaret Somers argue that Polanyi's analysis could help explain why the resurgence of free market ideas has resulted in "such manifest failures as persistent unemployment, widening inequality, and the severe financial crises that have stressed Western economies over the past forty years." **They suggest that "the ideology that free markets can replace government is just as utopian and dangerous" as the idea that Communism will result in the withering away of the state.**[18]
...

Deirdre McCloskey has criticized several aspects of the *Great Transformation*. She notes that Polanyi's account of "pre-market" societies are inconsistent with anthropological evidence which suggests these societies were not as equitable, socially stable, and successful as Polanyi makes them appear to be. **McCloskey notes that**

market-based societies are not a nascent invention, as Polanyi claims, but that they extend further back in time. She also criticizes Polanyi's conceptualization of self-regulating markets whereby any and all government intervention in the markets means the markets are no longer markets.[16]

>
> **Neither absolute Individualism nor absolute Socialism would be compatible with civilization at all; and among the arguments of the extremists of either side the only unanswerable ones are those which show the absurdity of the position of the other.** Not so much as the first step towards real civilization can be taken until there arises some development of the right of private property; that is, until men pass out of **the stage of savage socialism in which the violent and the thriftless forcibly constitute themselves co-heirs with the industrious and the intelligent** in what the labor of the latter produces. But it is equally true that every step toward civilization is marked by a check on individualism.

http://kpolanyi.scoolaid.net:8080/xmlui/bitstream/handle/10694/565/Con_13_Fol_06%20REVISED.pdf?sequence=3

Marx starts from primitive Communism as the original state of mankind. Human relationships in daily life are here immediate, direct, personal.

In a developed market-society distribution of labour intervenes. Human relationships become indirect; instead of immediate co-operation there is indirect co-operation by the medium of the exchange of commodities. The reality of the relationships persists; the producers continue to produce for one another. But this relationship is now hidden behind the exchange of goods; it is impersonal; it expresses itself in the objective guise of the exchange value of commodities, it is objective, thing-like. Commodities, on the other hand, take on a semblance of life. They follow their own laws; rush in and out of the market; change places; seem to be masters of their own destiny. **We are in a spectral world, but in a world in which *spectres are real*. For the pseudo-life of the commodity, the objective character of exchange value, are *not* illusion.** The same holds true of other "objectifications" like the value of money, Capital, Labour, the State. They are the reality of a condition of affairs in which man has been estranged from himself. Part of his self is embodied in these commodities which now possess a strange self-hood of their own. **The same holds true of all social phenomena in Capitalism, whether it be the State, Law, Labour, Capital, or Religion.**

But the true nature of man rebels against Capitalism. Human relationships are the reality of society. In spite of the division of labour they must be immediate, i.e. personal. **The means of production must be controlled by the community.** Then human society will be real, for it will be humane: a relationship of persons.

> https://www.marxists.org/archive/marx/works/1844/08/07.htm
>
> But the community from which the workers is *isolated* is a community of quite different reality and scope than the *political* community. **The community from which *his own labor* separates him is *life* itself,** physical and spiritual life, human morality, human activity, human enjoyment, human nature. *Human nature is the true community of men*. **Just as the disastrous isolation from this nature is disproportionately more far-reaching, unbearable, terrible and contradictory than the isolation from the political community,** so too the transcending of this isolation and even a partial reaction, a *rebellion* against it, is so much greater, **just as the *man* is greater than the citizen and human life than political life. Hence, however limited an industrial revolt may be, it contains within itself a *universal* soul: and however universal a political revolt may be, its *colossal* form conceals a *narrow* split.**

…

It is always a suggestive fact when a line of thought unconsciously takes off at a point that proves to be a crossroad.

Bachofen's work on matriarchy was, apart from Morgan, the main source of the Marxian vision of primitive society. Marx and Engels might have been as much fascinated as Klages himself by its poetic emphasis on the alleged unity of human existence in prehistoric times. But their impulses lie in opposite directions. **Nietzsche's Dionysian principle and Klages's Body-Soul represent a move backwards to the blissful regions of undeveloped harmony. Marxism represents the move onward towards a higher replica of the primeval harmony of man with his environment.** Thus, Socialism and Fascism appear for an instant on the same plane, representing alternative roads, as it were, to the conditions of closer human community. **But the reactionary road is illusionist. Regression – but how far back?** German Nationalists proposed to go back beyond 1918. Reactionary romantics like Moeller van der Bruck made it 1789.

Spann and the German Christians proclaimed a counter-Renaissance, thus extending the recession to half a millennium. The German Faith Movement realized that unless we put back the clock by full two thousand years there is neither safety nor permanence in reaction. **It is Klages's achievement to have shown that the destruction of Christianity is not enough; ten thousand years is nearer the mark!**

The revolutionary solution was based on realities. The counter-revolutionary one leads to an endless regression.

https://chalcedon.edu/resources/books/noble-savages-exposing-the-worldview-of-pornographers-and-their-war-against-christian-civilization

Sigmund Freud saw man as being basically determined by the remnants in man's unconscious of the primordial horde, the id and the ego, so that this need, to cope with himself, is to understand that his will to live is the desire for parricide, incest, and cannibalism.15 Both the will to live and the will to death emerge out of man's primordial past, a world of chaos, and man must understand his past to live in the present. Freud saw no hope for regeneration, but some of his followers insisted on affirming hope by means of eros. Marcuse saw Freud's conception of man as "reactionary."16 **Marcuse's goal is a "nonrepressive culture," one which will supposedly have all the benefits of Christian civilization and all the "advantages" of the primitive cultures. There would be a regression behind the attained level of disciplined rationality.** According to Marcuse,

> This regression would be psychical as well as social; it would reactivate early stages of the libido which were surpassed in the development of the reality ego, and it would dissolve the institutions of society in which the reality ego exists. **In terms of these institutions, instinctual liberation is relapse into barbarism.** However, occurring at the height of civilization, as a consequence not of defeat but of victory in the struggle for existence, and supported by a free society, such liberation might have very different results. **It would still be a reversal of the process of civilization, a subversion of culture—but *after* culture had done its work and created the mankind and the world that could be free. It would still be "regression"—but in the light of mature consciousness, and guided by a new rationality.** Under these conditions, the possibility of a nonrepressive civilization is predicated not upon the arrest, but upon the liberation, of progress—so that man would order his life in accordance with his fully developed knowledge so that he would ask again what is good and what is evil. If the guilt accumulated in the civilized domination of man by man can ever be redeemed by freedom, then the "original sin" must be committed again: **"We must again eat from the tree of knowledge in order to fall back into the state of innocence."**17

17. *Ibid.*, 198. The concluding quotation is from Heinrich von Kleist. Marcuse's position is like that of the girl, a university student in the 1960s, who upon advocating the abandonment of civilization and work was asked, "Who will provide the food?" Her answer: "Food is."

---

https://en.wikipedia.org/wiki/Treatise_of_the_Three_Impostors#Trait%C3%A9_sur_les_trois_imposteurs,_from_1719

According to Silvia Berti, the book was originally published as *La Vie et L'Esprit de Spinoza* (The Life and Spirit of Spinoza), containing both a biography of Benedict Spinoza and the anti-religious essay, and was later republished under the title *Traité sur les trois imposteurs*.[21] The creators of the book have been identified by documentary evidence as Jean Rousset de Missy and the bookseller Charles Levier.[22] The author of the book may have been a young Dutch diplomat called Jan Vroesen or Vroese.[21][22] Another candidate, to whom Levier attributed the work, is Jean-Maximilien Lucas.[23]

https://archive.org/details/radicalenlighten0000isra/page/694/mode/2up?view=theater

Philosophically, the text is of little significance and less originality, being little more than a crude vulgarization of Spinoza supplemented with a collage of additional matter drawn from several writers. But none of this detracts from its appreciable historical significance as a propaganda tool of the Radical Enlightenment, the most ubiquitous and influential of the clandestine philosophical manuscripts throughout Europe as far afield as Stockholm, St Petersburg, Poland, and Hungary.61 Vehement in tone, it constitutes a veritable declaration of war on the entire existing structure of authority, faith, and tradition, proving that by the 1680s there was already a European intellectual fringe fired with a zealotry which was unabashedly revolutionary, dogmatic, and intolerant.

…

The *Traité* in its final form is a collage drawn from Spinoza, Hobbes, Charron, Naudé, La Mothe le Vayer, and Vanini, skilfully woven by Levier, Rousset, and Aymon into a coherent, dynamic unity. **The opening two chapters, setting the scene and laying down the basic philosophical principles on which the work is based, are borrowed directly from Spinoza.**
…

Once the philosophical framework is established in the opening chapters, however, the *Traité* no longer draws directly on Spinoza. Subsequently, material is taken from writers representing quite different philosophical traditions,78 a circumstance which has led to the frequently repeated thesis that the *Traité* is really eclectic rather than representative of a particular philosophical outlook. **But the borrowings from Hobbes, Naudé, and others are actually used only to illustrate Spinozistic arguments** and do not substantially influence the systematically mechanistic, deterministic, materialist, and non-providential principles on which the work is uncompromisingly based.
…

The fundamental aim of the *Traité* is nothing less than to convince readers 'there are no such things in Nature as either God or Devil or Soul or Heaven or Hell, after the fashion as they are described' and that the 'theologians, that is to say, these men who exhibit and spread about ridiculous *Fables* for sacred truths divinely revealed are all of them except some few ignorant dunces … people of villaneous principles, who maliciously abuse and impose on the credulous populace.'80 **This was not remotely Hobbes' message (even if he agreed with parts of it privately) and still less was it the battle cry of intellectual libertines like Charron or Naudé. Nor were any of the latter intending to destroy the presumption of the theologians that 'all that far greatest part of mankind, whom they audaciously term the lay vulgar, were only capable of chimera** or that they ought not to be nourished with any other food than this insipid truth of theirs, wherein is to be found nothing but folly, emptinesse, and nonsense, without a single grain of the salt of truth and wisdom.'81 **The Spinozists alone entertained this design.**

https://infidels.org/library/historical/unknown-three-impostors/

Only a little good sense is needed to see that God is neither passionate nor jealous, that justice and mercy are false titles attributed to him, and that nothing of what the Prophets and Apostles have said constitutes his nature nor his essence.
…

By this it may be seen that Nature or God does not propose any end, and that all final causes are but human fictions. A long lecture is not necessary since this doctrine takes away from God the perfection ascribed to him, and this is how it may be proved. If God acted for a result, either for himself or another, he desires what he has not, and we must allow that there are times when God has not the wherewith to act; he has merely desired it and that only creates an impotent God.
…

I. **Until now we have fought the popular idea concerning the Divinity, but we have not yet said what God is, and if we were asked, we should say that the word represents to us an Infinite Being, of whom one of his attributes is to be a substance of extent and consequently eternal and infinite.** The extent or the quantity not being finite or divisible, it may be imagined that the matter was everywhere the same, our understanding not distinguishing parts. For example, water, as much as water is imagined, is divisible, and its parts separable from one another, though as much as a corporeal substance it is neither separable nor divisible. [So of water, however, it may be subject to generation and corruption, as long as it is substance it is not subject to separation and division.] **Thus neither matter or quantity have anything unworthy of God, for if all is God, and all comes surely from his essence, it follows quite absolutely that He is all that he contains, since it is incomprehensible that Beings quite material should be contained in a Being who is not. That we may not think that this is a new opinion, Tertullian, one of the foremost men among the Christians, has pronounced against Apelles, that, "that which is not matter is nothing," and against Praxias, that "all substance is matter," without having this doctrine condemned in the four first Councils of the Christian Church, ecumenical and general.**

II. These sentiments are plain and the only ones that good and sound judgment can form of God. However, there are but few who are satisfied with such simplicity. **Boorish people, who are accustomed to adulation of opinion, demand a God who resembles earthly kings.**
…

Yes, such is the malice and stupidity of men that they prefer to pass their lives disputing with one another, **and worshipping a book received from ignorant people; a book with little order or method, which everyone admits as confused and badly conceived, only serving to foment**

divisions. Christians would rather adore this phantom than listen to the law of Nature which God—that is to say, Nature, which is the active principle—has written in the heart of man. All other laws are but human fictions, and pure illusions forged, not by Demons or evil spirits, which are fanciful ideas, but by the skill of Princes and Ecclesiastics to give the former more warrant for their authority, and to enrich the latter by the traffic in an infinity of chimeras which sell to the ignorant at a good price.
…

Before the word Religion was introduced in the world mankind was only obliged to follow natural laws and to conform to common sense. **This instinct alone was the tie by which men were united, and so very simple was this bond of unity, that nothing among them was more rare than dissensions.** But when fear created a suspicion that there were Gods, and invisible powers, they raised altars to these imaginary beings, so that in putting off the yoke of Nature and Reason, which are the sources of true life, they subjected themselves by vain ceremonies and superstitious worship to frivolous phantoms of the imagination, and that is whence arose this word Religion which makes so much noise in the world.
…

What is said of the Immortality of the Soul? of the Resurrection, of Hell, and the greater part of his Morals, I see nothing more admirable than in the works of Epictetus, Epicurus and many others. In fact, the latter was cited by St. Jerome (Book VIII, against Jovian, ch. viii), as man whose virtue puts to the blush better Christians, observing that all his works were filled with but herbs, fruits and abstinence, and whose delights were so temperate that his finest repasts were but a little cheese, bread and water. **With a life so frugal, this Philosopher, pagan as he was, said that it was better to be unlucky and rational, than rich and opulent without having good sense,** adding, that it is rare that a fortune and wisdom are found in the same individual, and that one could have no knowledge of happiness nor live with pleasure unless felicity was accompanied by prudence, justice and honesty, which are qualifications of a true and lasting delight.

As for Epictetus I do not believe that any man, not excepting Jesus himself, was more austere, more firm, more equitable, or more moral. I say nothing but what is easy to prove, and not to pass my prescribed limit I will not mention all the exemplary acts of his life, but give one single example of constancy which puts to shame the weakness and cowardice of Jesus in the sight of death. Being a slave to a freeman named Epaphroditus, captain of the guards of Nero, it took the fancy of this brute to twist the leg of Epictetus. Epictetus perceiving that it gave him pleasure said to him, smiling, that he was well convinced that the game would not end until he had broken his leg; in fact, this crisis happened. “Well,” said Epictetus with an even smiling face, “did I not say that you would break my leg?” **Was there ever courage equal to that? and could it have been said of Jesus Christ had he been the victim?** He who wept and trembled with fear at the least alarm, and who evinced at his death a lack of spirit that never was witnessed in the majority of his martyrs.
…

II. God is either a natural being or one of infinite extent who resembles what he contains, that is to say, that he is material **without being, nevertheless, neither just nor merciful, nor jealous, nor a God in any way as may be imagined, and as a consequence is neither a punisher nor a remunerator.** This idea of punishment and recompense only exists in the minds of the ignorant who only conceive that simple being called God, under images which by no means represent him. Those who use their understanding without confounding its operations with those of the imagination, and who are powerful enough to abandon the prejudice of a limited education, **are the only ones who have sound, clear and distinct ideas. They consider him as the source of all beings which are produced without distinction:** one being no more than another in His regard, and man no more difficult to produce than a worm or a flower.

III. **That is why it is not to be believed that this natural and infinite being which is commonly called God, esteems man more than an ant, or a lion more than a stone, or any other being more than a phantasy, or who has any regard for beauty or ugliness, for good or bad, for the perfect or imperfect.** Or that he desires to be praised, prayed, sought for or caressed, or that he cares what men are, or say, whether susceptible of love or hate, or in a word that he thinks more of man than of any other creatures of whatever nature they be. **All these distinctions are only the invention of a narrow mind, that is to say, ignorance has created them and interest keeps them alive.**
…

VII. Not to shuffle, as all these philosophers have done, and to have as perfect an idea as is possible of the souls of animals, **let us admit that in all, without excepting man, it is of the same nature,** and has no different functions, but by reason of the diversity of organs and humors; hence we must believe what follows.

It is certain that there is in the universe a very subtle spirit, or a very delicate matter, and always in motion, the source of which is in the Sun, and the remainder is spread in all the other bodies, more or less, according to Nature or their consistency. That is the Soul of the Universe which governs and vivifies it, and of which some portion is distributed among all the parts that compose it. This Soul, and the most pure Fire which is in the universe does not burn of itself, but by the different movements that it gives to the particles of other bodies where it enters, it burns and reflects its heat. The visible fire has more of this spirit than air, the latter more than water, and the earth much less than the latter. Among the mixed bodies, plants have more than minerals, and animals more than either. To conclude, this fire being enclosed in the body, it is rendered capable of thought, and that is what is called the soul, or what is called animal spirits, which are spread in all parts of the body. **Now, it is certain that this soul being of the same nature in all animals, disperses at the death of man in the same manner as in other animals,** from whence it follows that what Poets and Theologians sing or preach of the other world, is a chimera which they have invented, and which they narrate for reasons that are easy to guess.

https://en.wikipedia.org/wiki/Jean_Meslier

None of the arguments used by Meslier against the existence of God were original. In fact, he derived them from books written by orthodox theologians in the debate between the Jesuits, Cartesians, and Jansenists.
…

In his book *In Defense of Atheism* (2007) the atheist philosopher Michel Onfray describes Meslier as the first person to write an entire text in support of atheism:

> For the first time (but how long will it take us to acknowledge this?) in the history of ideas, a philosopher had dedicated a whole book to the question of atheism. He professed it, demonstrated it, arguing and quoting, sharing his reading and his reflections, and seeking confirmation from his own observations of the everyday world. His title sets it out clearly: *Memoir of the Thoughts and Feelings of Jean Meslier*; and so does his subtitle: ***Clear and Evident Demonstrations of the Vanity and Falsity of All the Religions of the World*. The book appeared in 1729, after his death. Meslier had spent the greater part of his life working on it. The history of true atheism had begun.**[25]

…

According to Colin Brewer (2007), who co-produced a play about Meslier's life,

> **Historians argue about who was the first overt, post-Classical atheist but Meslier was arguably the first to put his name to an incontrovertibly atheist document.** That this important event is largely unrecognised (Meslier was absent from both Richard Dawkins' and Jonathan Miller's recent TV series on atheism) is due partly to Voltaire who published, in 1761, **a grossly distorted "Extract" that portrayed Meslier as a fellow-deist and entirely suppressed Meslier's anti-monarchist, proto-communist opinions.**

https://archive.org/details/enlightenmentcon0000isra/page/716/mode/2up?view=theater

As with Challe, so with Meslier, the writer who was arguably the most coherently and systematically radical thinker of the French early eighteenth century, **a key figure whose vast text, mostly written in the early 1720s, similarly cites no English sources at all and whose otherwise inexplicable neglect in conventional accounts of the Enlightenment may indeed be partly explicable in terms of his remarkable system obvious having nothing to do with English authors and ideas.** This renegade priest built his elaborate atheistic materialism wholly on elements taken from Descartes, Malebranche, and Bayle as well as Tournemine's critique of Spinoza, **most of his polemical barbs being directed against Malebranche and Fénelon.**72
…

Erudite in an old-fashioned way, familiar with Scripture, the Fathers, ancient history and some Roman authors, besides Montaigne and Pascal, Meslier was aware of remarkably few books published after 1700. **He apparently knew nothing of Locke, Clarke, Toland, Collins, or Newton or indeed Hobbes.** He knows about Spinoza, though, of whom he approves as a thinker who 'ne reconnoissoit aucune divinité,' but only at second hand, thanks to Tournemine's widely read refutation of that thinker.114
…

Meslier's social and political criticism, and doctrine of the equality of all men, rests on a systematic materialism using strands of Plato, Aristotle, Epicurus, and Averroes but especially, as we have seen, Descartes, Bayle, Malebranche, and Tournemine's refutation of Spinoza.121 **For him our whole cosmos integrally coheres, unified by that same 'raison universelle' which yet has no author which *Malebranchisme* can be construed to hint at, on which Bayle's 'Stratonism' rests, and Bruzen de La Martinière rightly identified as the basis of Bayle's sedition.**122

https://theanarchistlibrary.org/library/michel-onfray-jean-meslier-and-the-gentle-inclination-of-nature

Meslier believes in natural law. Not that of the Christians (their religion transformed the laws of nature into its own cultural law) but that of judicial naturalists — whom he has probably not read. (Hugo) Grotius, (Baron Samuel von) Pufendorf… — according to whom people naturally by the law of life have each day the right to nourish themselves, to clothe themselves, to house themselves, to assure a decent education for their children, but also to enjoy their natural liberty, then to work for public usefulness and the common welfare of all.

http://robertlstephens.com/essays/shafarevich/001SocialistPhenomenon.html#pagestart_106

Meslier considers religion to be responsible for the majority of human misfortunes. In particular, it sows dissent and promotes religious wars. **But at the same time, he himself calls with sincere conviction for an uprising, the killing of kings, and the annihilation of all who could be considered more fortunate and prosperous.**

> "In this connection, **I am reminded of the wish of one man who expressed the desire that 'all the mighty of this world and the noble lords be hanged and strangled with loops made of priests' bowels.'** This judgment is certainly somewhat coarse and harsh, but there is some naive frankness about it. It is brief but eloquent and in a few words expresses what people of this kind really deserve." (49: I: p. 71)

…

The person of Christ is especially hateful to him, and here he literally runs out of terms of abuse. "And what of our God--and Christ--worshipers? To whom do they ascribe divinity? To the paltry man who had neither talent, nor intelligence, nor knowledge, nor skill, and was utterly scorned in the world. Whom do they ascribe it to? Shall I say? Indeed I shall: they ascribe it to the lunatic, demented, wretched bigot and ill-starred gallows-bird." (49: II: p. 25) **The champion of the rights of the poor perceives irrefutable proof of Christ's teaching in the fact that "he was always poor, and was merely the son of a carpenter."** (49: II: p. 26)

…

In his *Testament* there is nothing said about concrete measures for improving the position of the poor nor about the rich doing something to help. The book merely fans the hatred of the former for the latter.

> "You are told, dear friends, about devils; they frighten you with the devil's name alone; you are forced to believe that devils are the most evil and repulsive of creatures, that they are the worst enemies of humankind, that they strive only to ruin people and render them unhappy in hell forever. ... **But know, dear friends, that for you the most evil and true devils, those you ought to fear, are those people of whom I speak--you have no worse and no more evil enemies than the noble and the rich.**" (49: II: p. 166)

The essence and true cause of inequality is private property, which also is justified by religion.

> "For this reason some drink and stuff themselves, wallowing in luxury, while others die from starvation. For this reason some are almost always happy and gay, while others are eternally sad and grieving." (49: II: p. 201)

Meslier's entire social program comes down to a few lines:

> **"What a great happiness it would be for people if they used all life's blessings together."** (49: II: p. 209)

In a just society, Meslier feels, production and consumption must be organized according to principles of communality.

> "People ought to possess all wealth and riches of the earth together and on equal terms and also use them together and equitably." (49: II: p. 198)

Food, clothing, education for children, ought not to differ greatly in different families. Everyone ought to work under the guidance of wise elders (in another passage, Meslier speaks about elected officials).

These measures would lead to miraculous results. No one would be in need; everyone would love his neighbor. Heavy work, deceit, vanity, would all disappear. **Then, Meslier says, "no unhappy people would be seen on earth, whereas at present we come across them on every hand."** (49: II: p. 217)

Family relations would also change, for a great evil introduced by the church would fall away--the indissolubility of marriage.

> "**It is necessary to provide the identical freedom to men and to women to come together without hindrance, following their own inclination,** and the freedom also to separate and leave one another when life together becomes intolerable or when a new attraction moves them to contracting a new union." (49: II: p. 214)

...

To those he called "brethren," Voltaire wrote repeatedly, urging them to circulate extracts from the *Testament.*

> "Know that God's blessing is on our nascent church: In one of the provinces, three hundred copies of Meslier have been distributed, which has produced many new converts." (49: III: p. 417)

The work was thought to be dangerous. In arguing for its publication, Voltaire wrote:

> "Is it impossible, without compromising anyone, to turn to that good old soul Merlin? I would not wish for any of our brethren to take the slightest risk." (49: III: p. 416)
>
> **"Let us thank the good people who distribute it gratis and pray to the Lord to bless this useful reading."** (49: III: p. 419)
>
> "You have clever friends who would be not unwilling to have this book in a safe place; moreover, it is suitable for the edification of youth." (49: III: p. 408)
>
> "Jean Meslier must convince the whole world. Why is his Gospel so little circulated? You are too retiring in Paris! You are hiding your lamp." (49: III: p. 410)
>
> "In a Christian fashion, I wish for the *Testament* of the priest to be multiplied like the five loaves to nourish four or five thousand souls." (49: III: p. 411)

Later, in 1793, when the Convention was carrying out a program of de-Christianization and introducing the cult of Reason, **Anacharsis Cloots proposed putting up in the temple of Reason a statue of the first priest to reject religious error--"the brave, magnanimous and great Jean Meslier."**

https://books.google.fi/books?id=pgTDlLHAMekC&lpg=PP1&hl=fi&pg=PA170#v=onepage&q&f=false

In his ninety-four-page pamphlet, *A Philosophical Dissertation upon Death* (1732), Radicati seeks to defend and legitimize suicide against Christianity and the state.

...

This right to death is based on a radically materialist conception of nature and inspired by Epicurean and Stoical arguments that suicide is an honourable gesture: the legitimate withdrawal from a state of unbearable pain. Such views were rejected as paganism by the Christian tradition, notably in Augustine and Aquinas, **although, as we have already seen, one already finds arguments against suicide in Plotinus.**

...

By definition, the fear of death cannot be based in experience as no one experiences death twice, as it were. Nor can the fear of death be ascribed to our natural constitution. **Therefore, the fear of death has been imposed on mankind by**

> **Ambitious Men, who, not contenting themselves with the State of Equality which Nature had given them, took it into their heads to thirst for Dominion over others.**

https://archive.org/details/radicalenlighten0000isra/page/74/mode/2up?view=theater

Indeed, **in Radicati the revolutionary impulse went further than in almost any other Early Enlightenment *philosophe*.** For not only does he affirm unequivocally that if the prince or magistrates alter or change laws 'the people have a right to depose and punish them, according to their deserts seeing that the conditional obedience promised to them, ceases as soon as they cease to do their duty,'85 but Radicati also insists that republics are intrinsically better than other kinds of government, and especially monarchies, which are 'the worst of all,' but that, in order to succeed they have to be placed on a democratic basis. The 'republics of Geneva, Switzerland, and others,' he says, 'notwithstanding they designed to settle a perfect democracy, were not able to succeed in it, because they did not establish it upon a proper foundation.'86 What this 'proper foundation' entails, holds Radicati, is a fundamental social and economic reorganization so that 'men are equal in nobility, power and riches.' To this end, he asserts, **'all possessions must belong to the republic, which like a good mother, must distribute them to every man, according to his necessities; so that no man must**

be reduced to beggary, and no man must enjoy superfluities.'87 **Influenced perhaps by reading the Baron Lahontan's eulogy of equality in his *Nouveaux voyages* of 1703, Radicati goes so far as to condemn private property itself as 'inconsistent with the nature of a democratical government, and destroying it in its very infancy.'**88

https://archive.org/details/enlightenmentcon0000isra/page/598/mode/2up?view=theater

Yet it was virtually only radical writers who took the significant step of asserting the equal, and in some respects superior, moral worth of primitive men. If Hobbes, asserted Radicati, had investigated the 'state of nature' with greater care, he would have changed his opinions regarding its alleged brutishness and blatant inferiority to society under the state. **'Witness the ancient inhabitants of the Canary-Islands,' he remarks, 'who, before they were discovered by the Christians had always lived in the blessed state of Nature. For they fed upon herbs and fruits, lay upon leaves in the forests, went naked, and their women, and all other things were in common amongst them.'**38

https://archive.org/details/enlightenmentcon0000isra/page/226/mode/2up?view=theater

Radicati, whose democratic republicanism drew on Machiavelli, Sarpi, Sidney, and 'the ingenious Mr. Toland,' besides Bayle and Spinoza, **went furthest, of those writing before Rousseau, in assailing Hobbes's notion of the 'state of nature.' Envisaging the 'state of nature' as a utopia of primitive communism, not unlike Morelly, who later spoke of 'le doux empire de la nature et de la vérité,'**9 **Radicati insists, against Hobbes, that 'savages and brutes of the same species, that follow the laws of nature only, are more sociable among themselves than men that are civilized: since they live together with great kindness and cordiality, and observe the laws of equity in everything;** each enjoying the fruits of the earth, and their females and suffering the rest to do so, without envy or ambition, being all equal, and having everything in common.'10

https://archive.org/details/enlightenmentcon0000isra/page/244/mode/2up?view=theater

Morelly's anonymous *Code de la Nature* (1754), **having as its subtitle 'ou le véritable *Esprit* de ses Loix,' a text usually attributed to Diderot during the French Revolution (and publicly condemned during the trial of Babeuf, in 1797, as one of the prime roots of revolutionary social radicalism),** full-frontally attacks Montesquieu's conservative, hierarchical conception of society, seeking to substitute an uncompromisingly democratic, if also thoroughly utopian, vision in its place.10

An idealist-materialist and, yet, 'Deist' thinker, Morelly had espoused a radical conception of democracy by the early 1750s, building his democratic vision on typically Spinozistic premises. These included the ideas that every man seeks his own 'conservation,' that a new worldly and sensual morality is needed, that monarchy grows in outward splendour and inner corruption and the *bien général* suffers, the more inequality of status and property in society increases,11 and that **as our needs are equal and wills equivalent** so a fundamental equality is the general principle on which a truly secular politics must be structured, nature having shown men 'par la parité de sentimens et de besoins, leur égalité de conditions et de droits, et la nécessité d'un travail commun.'12

https://robertlstephens.com/essays/shafarevich/001SocialistPhenomenon.html#pagestart_111

The Code of Nature or the True Spirit of the Law by Morelly appeared in 1755. Almost nothing is known about the author; arguments are still going on as to whether he ever existed or whether "Morelly" is simply a pseudonym.
…

Mankind once lived in a natural state, the Golden Age, the memory of which is preserved among all peoples. But this state was lost due to the mistaken introduction of private property by legislators. **A return to a condition where no private property exists will take place thanks to progress, which Morelly considers to be the basic driving force of history.**

> "The phenomena that I observe demonstrate everywhere, even in a gnat's wing, the presence of a consistent development. I experience, I feel the progress of reason. I am justified, therefore, to say that by some miraculous analogy there also exist favorable transformations in the moral field, and that despite their power and pleasantness, the laws of nature do only gradually gain complete power over mankind." (50: p. 159)

Only after having experienced various forms of rule will the people understand what is truly good. The society described by Morelly will arise ultimately, as an inevitable triumph of reason, and mankind will come to the end of its journey from the unconscious Golden Age to the conscious one.

https://www.franz-oppenheimer.de/state2.htm#II_a

> As compared with unions of families, the state represents, doubtless, a much higher species; since the state embraces a greater mass of men, in closer articulation, more capable of conquering nature and of warding off enemies. It changes the half playful occupations of men into strict methodic labor, and thus brings untold misery to innumerable generations yet unborn. **Henceforth, these must eat their bread in the sweat of their brow, since the golden age of the free community of blood relations has been followed by the iron rule of state dominion. But the state, by discovering labor in its proper sense, starts in this world that force which alone can bring about the golden age on a much higher plane of ethical relation and of happiness for all. The state, to use Schiller's words, destroys the untutored happiness of the people while they were children, in order to bring them along a sad path of suffering to the conscious happiness of maturity.**

https://www.academia.edu/11673887/Anacharsis_Cloots_and_the_Birth_of_Modern_Cosmopolitanism

Cloots was born on 24 June 1755 in the family castle of Gnadenthal (Val-de-Grâce in French) near Cleves, and baptised Joannes Baptista Hermannus Maria—or Jean-Baptiste. His family is of Dutch origins, his father having made a fortune as a merchant in Amsterdam, and then sought social recognition in Prussia and managed to get the title of baron after becoming adviser to Frederic the Great, and to acquire a castle and lands near Cleves, a town near the Dutch border. **His mother's brother was none other than the renowned philosopher Cornelius de Pauw (1735-1799), who became canon in the nearby town Xanten when Cloots was a child.**

Cloots had a typical aristocratic education, entirely in French, which remained the language for his writings. He certainly also knew German and Dutch, as his correspondence in these languages show, even if he never wrote in these languages. He was sent at nine to a Catholic boarding school in Brussels, together with his brother, who died two years later. Cloots was sent to the Jesuits in Mons, before asking to be educated at the Jesuit collège du Pléssis-Sorbonne in Paris a eleven years old, **and studied at the same benches as other future revolutionaries like La Fayette. He would proudly recall later in his writings an episode when he ate a bacon omelette on a Friday, defying authorities.** He then went to the prestigious and elitist *Académie militaire de Berlin*, where he was notably taught by Professor Sulzer (1720-1779), a disciple of Christian Wolff, and read Grotius and other works on the law of nations.
…

"Anacharsis" was the object of a biography by the Jesuit scholar Barthélemy (1788) that told the story of this Scythian philosopher, Anacharsis, who travelled South from his native North to Athens to discover philosophy.
…

Wolff, as translated by Formey, has had arguably a great influence on French natural law theories and the *Declaration of the Rights of Man* (Renaut *et al.* 1999, 71). **Wolff posits the universality of humankind since the essence or nature of man is the same everywhere.** Man is determined by his freedom that gives him will.
…

Barbeyrac introduces the concept of a moral community in French natural law theory, which is the "*communauté de Droite Raison*":7

> […] the first Society that Men have, is with GOD, because of this community of Right Reason, out of which a Law is born, which they have in common; **in such a way that the Universe is like a great Body of State, composed of Gods and Men.** (Quoted in French in Hochstrasser 1993, 298)

…

In his article on natural law in the *Encyclopédie*, Diderot considers that the individual must look at the "general will" to find the limits of natural rights, and this limit is to do only what is not contested by the rest of humankind (Diderot 1755). General will is deduced from the pure act of reason of any individual stifling his passions. Since only the general will is always right, and individual will can be wrong, legislative power must belong to the general will. The general will also exists between individual societies for Diderot, but he does not stress explicitly the existence of a legislative power above the nations.

Rousseau responded in the first version of his *Social Contract* to Diderot's conception of "general will," which reflects his views well, even if it was unpublished. Like Holbach, Rousseau rejects the idea of a "golden age" of the state of nature (Rousseau 1887).8

> 8. This first version of the *Social Contract* was only discovered and published in 1887.

…

Humankind, however, is separated into societies. Through the concept of "general will", Rousseau introduces the fact that a society forms a "political body", that is, a moral person with a will of its own, which always aims

at the conservation of its members. This principle stops at other “political bodies” because for them, this general will is then a particular will. However, justice is still applied because it finds its source in natural law:

> **[…] for then the big city of the human race becomes the political body of which the law of nature is always the general will, and of which the states and the peoples are but individual members.** (Rousseau 1755, 245)

Rousseau’s system of particular society defined by a social contract is not unsympathetic to the idea of a more general society (cf. chapter by Lex in this volume). **Rousseau defended Saint-Pierre’s (1713) project. He believed in the existence of a “European society”, established by a common history and culture since the Greek and Roman time, making all European nations mutually dependent (Rousseau 1761). A “coercive force” must then be set in place to complete this state of unfledged society. This can only be done through a union between the most important sovereigns in the form of a *Diète* or Senate. However, Voltaire (1761) would sarcastically note that the Chinese emperor was not invited to this “universal” assembly.**

Cloots in a letter to his cousin directly mentions his admiration for Barbeyrac’s preface to his translation of Pufendorf. Burlamaqui is not directly mentioned in any of Cloots’ work, but his continuation of Barbeyrac’s thought is directly relevant to the whole natural law tradition in France.
…

Cloots’ political system can be traced in three of his major post-revolutionary political writings: *L’Orateur du genre humain, ou dépêche du prussien Cloots au prussien Hertzberg*, March 1791; *La République universelle, ou adresse aux tyrannicides*, February 1792; *Bases constitutionnelles dela république du genre humain*, April 1793.
…

On the one hand, **recent French history is constantly evoked by Cloots, against Montesquieu’s analysis of a separation of powers, to argue that no sub-national “corporation” should ever exist without having the possibility to gather sufficient power to create violent conflicts.** And obviously, no multiple national powers should ever exist, as armies and wars are the only way they can solve conflicts. Only the “perfect fusion” of a “Confederation of individuals” can exist for Cloots.

Cloots expressed his atheism previously on diverse occasions. **All metaphysical discussion for him is vain.** To the natural law theorists discussing if God is sovereign because he created man, or if it is man who ought to respect God’s power through reason, one could consider his answer to be what he writes about God: “The study of man makes us careful and lenient. Let us see nature as she is and not as we imagine it to be” (Cloots 1792, 257); “Does the chicken come before the egg or the egg before the chicken?” (p. 251); for “We belong to earth and not to the heavens” (p. 258).

So if God is out of the equation, it is the people that represent the only possible source of power. The only truth comes from the people: **“The people is my oracle; truth does not come down the heavens, but down the rostrum”** (Cloots 1793, 475). Cloots is here even more explicit in replacing the sovereign God of natural law. “[…] the human race is God […]” (p. 476), or “[…] the human race, the supreme Being […]” (p. 476).

In other words, the cosmos is complicated enough, without adding supposition about a possible *theos*. One should just examine nature, because humankind is subject to primitive laws just as animals are (Cloots 1793, 494). And this natural state is the same as the civil state.

> The human species is subjected to primitive laws, like the family of bees or beavers. Let us rise to animal instinct, let us subject ourselves to the invariable laws. Natural laws are not distinct from civil and political laws because the social state is as natural to man as it is to bees or ants. (Cloots 1793, 497)

And if nature is one, society is equally one. It is by consulting nature, claims Cloots (1793, 476), that he discovered his political system. The goal of a society is the conservation of natural rights (Cloots 1793, 497). What are natural rights? Natural rights are expressed in the 1789 *Declaration*. **Cloots ascribed thereby a special status to this *Declaration*. It is the one and definitive expression of natural law. A curious position, when one considers the debates that surrounded the *Declaration*, its provisory character due to the compromises made, as well as its apparent division, at least implicitly, between civil and pre-civil (natural) rights.**

The *Declaration* states that all men are born free and equal. Cloots’s reasoning is twofold. If all men are free, then none can claim power over another. Anyone claiming sovereignty would be in contradiction with the “eternal principle” of the *Declaration*, on which Cloots bases his reflection. No individual or any group of individuals can claim sovereignty over a territory without being in contradiction with the eternal principle of freedom and equality. Only one community can exist in cohesion with human freedom: the whole of humankind.

Secondly, **this freedom does not mean anything if it is limited,** if others represent a constant threat to it, if barriers are needed to contain this threat, if military expenses for safety drive society into financial crisis, if the borders are a limit to the freedom of movement of persons and freedom of trade, or if they confine industries within limited territories.

This is why only the whole of humankind can hold sovereignty. Moreover, sovereignty is so despotic that no other power than humankind should hold it (Cloots 1793, 495).

In fact, Cloots would use French history, and the privileges and Machiavellian intrigues of the "corporations", to illustrate his system. Thanks to its unification, France managed to crush the corporations, not only professional ones, but also provincial or local ones. **Therefore, the same principle ought to apply to the whole globe.**

One more argument evokes the most fundamental principle of politics: that it ought to be founded on the general interest. The general will, as Cloots underlines, is the first principle of politics. In that, Cloots is faithful to Rousseau or Diderot. **However, Cloots posits that Rousseau was wrong in delimiting this general will to tiny republics. If Rousseau would have lived in Cloots's own time, Cloots condescends, Rousseau would have agreed with him that the general will is in fact the universal will for all humankind.**

Individuals are the foundation on which legitimate power is ascribed. Their rights are enshrined in the *Declaration*. Together they all form what Cloots calls a "confederation of individuals". Only collectively can individuals achieve something greater. Alone, they are pathetic creatures. **United in a nation, like France, they are able to create great things. With a bit of imagination, Cloots argues that the whole nation of humankind could achieve even greater marvels.**

The concepts of nation or *patrie* are not limited to France for Cloots. There is not space here for a *Begriffsgeschichte* of these two concepts (studied by e.g. Dann 1997; Delon 1987; Fehrenbach 1986), but one should indicate along with Koselleck that **they were highly contested, together with the concept of sovereignty, especially between 1750 and 1850. The nation was not only used to describe a specific type of people, but also became—and Sieyès is the most famous example—the new concept replacing the King as the holder of sovereignty.** Philosophers ascribed an idealist and abstract content to nation and *patrie*, as a collective of free and equal individuals, and a "*civitas*" in which these individuals would be citizens and not subjects. There is thus no contradiction in speaking of a nation of humankind, and of being patriotic in defending the nation. **A patriot fights for the universality of the rights of man and the citizen.**9

> 9. **Kymlicka (2001) has equally—among others—argued that liberal nationalism was close to cosmopolitanism in its Enlightenment roots** and Conversi (2000) discussed the complexity of such an antagonism.

As nature is the model, Cloots considers his system in a highly positivist manner: "Liberty has only one form" (Cloots 1793, 477).

In line with the dominating conception of sovereignty, Cloots defines it as follow:

> **Sovereignty resides essentially in the whole human race; it is one, indivisible, imprescriptible, immutable, inalienable, imperishable, unlimited, absolute, without boundaries and all mighty;** consequently two peoples could not be sovereigns, because, by reuniting, there would only be one indivisible sovereign; thus no partial reunion, no individual can grant oneself sovereignty. (Cloots 1793, 476-477)

This immutable model based on nature and reason, as scientific as physics, admits therefore no division of power. For that reason, Cloots rejects any proposition for a federal constitution, and heavily criticizes the American constitution for being weak in that respect, and for necessarily leading to future conflicts among the thirteen states. Cloots distrusted any separation of powers for two reasons. Firstly, because of the French experience of various corporations with their privileges and powers, leading to the paralysis of the country and the creating of obstacles to the general will. Secondly, **Cloots notices that in a united country like France, provinces do not engage in wars against each others, unlike Italian or German polities. To Cloots any provincial or national division is a barbarian political model, absurd and feudal. The division of humankind on the globe is nothing but a global feudalism in a barbaric time.**

Therefore, and contrary to what Kleingeld argues (2011, 63-65), **Cloots's argument is not entirely ahistorical and merely philosophical, but rather semi-historical and semi-philosophical.** Cloots does not merely claim that the only nation possible is all humankind solely based on extending Rousseau's contract theory to the whole world—200 years before Beitz's extension of Rawls's revival of the contract theory (Beitz 1979; Rawls 1999). He also observes that it is in the world's interest, and puts forward historical evidence. **When France started to form only one political body, the peoples inhabiting its territory stopped engaging in wars against one another, and instead engaged in peaceful judicial litigation.** In comparison, Cloots notes that this is not the case for instance in Italy, or with the German countries (Cloots 1792, 8). This leads Cloots to think that sovereignty should not be divided. By the same token, Cloots is strongly opposed to any federation of states.

This historical observation of the peaceful effect of uniting peoples under one modern political body named the "nation", coupled with the philosophical argument of the nation as the abstract entity of free and equal men, leads Cloots to present his "system" of the unique sovereign nation of the human race.

The French revolution represents this hope, and is therefore a universal revolution. **The French national assembly is in fact a representative and embryonic assembly of all humankind because the revolution was based on the *Declaration of the Rights of Man*.** The new constitution should protect this fact and take into consideration the very likely future adhesion of other members to the French constitution.

However, Cloots negates all French imperialism. These principles are not French; they are universal. The declaration is not French but for everyone: **“Liberty, never mind what Montesquieu says, is a plant that becomes acclimatized everywhere”** (Cloots 1792, 249). Cloots even suggests, as we have seen earlier, that France drop its “beautiful name” for the one of Germany, the German Republic, as in the original meaning of German, that is, *brotherhood*.

In short, the universal republic is a minimal state in charge of protecting human rights. All collectivity in the universal republic is free to decide on the use of taxes, as long as universal taxes are collected.
...

As Gauthier (1998) or Conversi (2000) show in their studies, the ideals of natural law disappeared during the revolution. The idea of social law without any further reference to the “Supreme Being” imposed itself.

https://www.marxists.org/archive/bax/1911/babeuf/ch01.htm

Old Claude Babeuf, we are told, on his deathbed, handed to his son, as a last gift, a well-worn copy of Plutarch’s *Lives*, telling him that the book had been his solace throughout the joys and sorrows of his life. He continued to press upon his son to study the lives of the great men of antiquity. “As for me,” he went on to say, “I could have wished to have resembled Caius Gracchus, even though I were doomed to perish like him and his for the greatest of all causes, the cause of the common welfare; but circumstances have not been favourable to the accomplishment of my designs.” Expressing his conviction that his son would follow in his steps: “Swear,” said he, “upon this sword, that has never yet departed from the path of honour, never to abandon the interests of the people, which are everything, and to pour out, if need be, the last drop of your blood to enlighten and defend this downtrodden race.” The oath on the sword was taken as desired.

https://www.marxists.org/history/france/revolution/conspiracy-equals/1787/letter.htm

July 8, 1787.

The system of the Reformer of the whole world, and the reflections of your correspondent concerning the reformation of the Code, have provoked me today into further reflections, through which I will undertake to examine what these different projects of reform have in common, and what they have not.

Both seem to be tenderly disposed toward the common good. But, dream for dream, paradox for paradox, I hardly know to which of the two thinkers I would accord preference. Meanwhile, the aim of one of them covers far more ground than that of the other. The Apostle of the Universal Code seems to desire that men of all classes, in every country, be accorded the same rights in the order of succession to property; and *that would be very good.* **But the general Reformer would like to obtain for all individuals, without distinction, an absolutely equal portion of all the goods and advantages that can be enjoyed in this mean world; and *that, it seems to me, would be even better.***

The inconsistency of our Customs is astonishing. But it seems to me that when one goes back to the epoch in which they were formed, one can no longer be surprised about anything that he sees. The men of those times, ignorant and barbaric, could have created only things in conformity with their character. Exalted by the enthusiasm over their conquests, they found themselves driven, as if by a natural outcome of that inhuman inclination from which the incredible feudal system had newly gathered its strength, to establish practices that would serve to satisfy their ridiculous vanity.

A lucky brigand would be only half-satisfied when he had succeeded in assuring himself a rich property. His gluttonous pride would suffer when, looking into the future, he envisaged this property being parcelled out among all his descendants, and saw that it could not thus suffice for very long to provide for its possessor the foolish importance that blind fortune ordinarily imparts, especially in the eyes of men guided by prejudices like those with which men were generally smitten in the era about which I am speaking.

To ward off this possible draw back, a new indignity was conceived. It was necessary to smother the voice of kinship for the sake of ostentation, **and so almost the very means of subsistence were taken away from the younger sons in order to load up the eldest with superfluities, and give him a pretended illustriousness by passing on to him usurped goods and a name that had once been odious.**

This is the origin of the so-called "nobility," and of all these revolting distinctions in every segment of society.

Whoever was less ferocious, less deceitful, or more unfortunate in combat, was placed at the service of others and made the object of their contempt.

This, furthermore, was the source of those bizarre codes that served as confirmatory titles for the usurpers, made it legitimate for them to pillage, and rendered irrevocable the confiscation of the goods of the families that were defeated.

Moreover, things were arranged in such a way as to prevent these defeated families from ever rising again from this debasement, and to keep them, rather, in such a state that they could never be regarded by the victorious class as constituting anything but a most inferior class of humanity.

To satisfy both the pride and the great acquisitiveness of this supposed nobility, it was set down that they need recognize as their principal heir only the oldest male among their children, and that the younger children, and even those daughters that were older than the principal heir, would be considered only halves, quarters, or even very often only fifths, of a child. Those who had, in the assemblies convoked for the purpose of drawing up the codes, greater influence and authority because of their wealth, saw to it that the articles were formulated in accordance with their desires. This is the reason for the inconsistency and inconsequentiality of these productions that men sometimes cite as works of prudence and of the utmost fairness, and that really present only the most unequivocal proof of the passions that always guided them.

What, then, would a new code amount to if it contained no other change than that of *putting an end to the prohibition in one province of that which is legitimate in some other?* A very small palliative for a very great evil. It would not put a stop to these children being born poor and deprived, while those of my neighbor start gorging themselves from the moment that their eyes first see the light of day. It would not prevent this neighbor, bloated with his immense fortune, from looking down upon me with sovereign contempt for no other reason than that I am an unfortunate, crushed under the weight of indigence. **It would not prevent the feudal heir of this high and mighty man from becoming a very fat lord of the manor, while his younger brother remains but a rather skinny fellow by comparison, or from forcing his sister, whose tender heart is a long way from disgusted at the prospect of tying the hymenal knot, to ensconce herself in a gloomy cloister, so that he can fatten himself still more.** It would not prevent, etc., etc., and still a great deal more, etc.

But how I like the general Reformer! It is really too bad that he leaves unexplained the means he has in mind for bringing about his reforms. I hope that he can soon have his subscription filled, so that he can explain this matter to us. His plan covers all points, and I do not see, all things considered, that any punishable crime would remain in existence, once his arrangements had been brought about, except that of failing to participate in some way in the common effort for the good of all humanity. For all this to be achieved, kings would have to renounce their crown, and all titled persons would have to give up their dignities, posts and positions in society. But that would not suffice. For a major revolution to be wrought, there would have to be great changes. What is the meaning, after all, of all these dignified titles? Are they anything more than vain and chimerical expressions, invented by pride and confirmed by baseness? Must there be any distinctions at all between men? Why accord any greater dignity to him who carries a sword than to him who forges it? **Did Nature, who gave predominance to our species, command that it submit to other laws than those drawn up for all the other species of animate beings? Did it desire that one individual be less well-fed, less well-clothed and less well-housed than another? Is it likely that this is the way things were done in the earliest ages of life on earth? Our most advanced knowledge of what were the natural customs of our brothers, the American Indians, before we discovered their peaceful country and began treating them so poorly, certainly would disprove any assertion to that effect.**

The first man, says the author of *Emile,* who, after enclosing a plot of land, saw fit to say: "This is mine," was the initial author of all the evils that afflicted humanity. Jean-Jacques said elsewhere that these evils opened the way for all the knowledge that we have acquired since that time. But he maintains that all we have acquired only renders us less happy than we were in the earliest state of nature; he seems, therefore, to want us to return to it, in order to obtain the highest well-being that can possibly be enjoyed.

It seems to me that our Reformer does better than the citizen of Geneva, whom I have sometimes heard called a dreamer. **In truth, he dreamed well, but our man dreams better.** Like the citizen of Geneva, he maintains that, since men are absolutely equal, they must not have any private possessions, but must enjoy everything in common, so that no one can, by the mere fact of birth, be either more or less rich, or be considered less worthy, than any of those around him. **But far from sending us back into the woods,** as M. Rousseau does, in order to live thus, to sate ourselves under an oak, refresh ourselves at the nearest stream, and then repose serenely under the same oak where we first found our

food, instead of all this, **our Reformer has us eat four good meals a day, dresses us most elegantly, and also provides those of us who are fathers of families with charming houses worth a thousand *louis* each.**

This is a fine reconciliation between the worthy aspects of social life and those of the natural and primitive life.

https://books.google.fi/books?id=E2G6wM-yRmEC&lpg=PP1&hl=fi&pg=PA572#v=onepage&q&f=false

Babeuf hated the existing social order, **whose humiliations he had endured as a clerk,** and it was now permissible to hate vehemently, to give utterance to feelings that had been choked up.
...

Babeuf, **who had once sorted the papers of the aristocrats,** had gone back to the documents and found the real origins of their possessions, those feudal “rights” that they were bent of restoring.
...

He was surprised to find that he had become unfit for anything but journalism (*publicisme*) and matters of related to legislation – meditation on the true principles of what the laws should be and their implementation. Before the Revolution Babeuf had dabbled in pure theory; as the Revolution progressed, he became ever more deeply involved in action. Not long before the Conspiracy of the Equals was crushed, his journal *Le Tribun du Peuple* called for a new apocalypse: “All evils have reached their peak. Things cannot get worse. **A cure can come about only through a total upheaval!!! Let confusion reign! Let all the elements be confounded and entangled, let them clash with one another! May everything return to a primitive chaos, and out of chaos may a new, regenerated world be born.**”20
...

Babeuf’s conduct at his Vendôme trial set a precedent for the use of the establishment’s judicial procedure to broadcast revolutionary doctrine. He constantly interrupted the prosecutor, refusing to play the compliant victim and throwing the judges into confusion. **Classical rhetoric flowed from the mouth of an antique Roman in modern dress.** Two days after his imprisonment Babeuf addressed a letter to the Directorate: “Death or exile would be for me the road to immortality **and I shall march in that direction with heroic and religious zeal.**”32 At one dramatic moment, by prearrangement, Babeuf and his fellow conspirator Darthé tried to rob the oppressors of their victims by stabbing each other. But the noble Romans were out of phase, and, as Buonarroti reports, “the fragility of their daggers, which broke in their hands, did not allow the condemned to deprive each other of life.”33

> http://robertlstephens.com/essays/shafarevich/001SocialistPhenomenon.html#pagestart_124
>
> Buonarroti believed that "the teaching of Jesus, if depicted as flowing out of the natural religion from which it does not differ, could become a support of a reform based on reason." (55: I: p. 168) **But Babeuf held a more narrow view: "I attack relentlessly the main idol, until now venerated and feared by our philosophers, who dared to attack only his retinue and surroundings. ... Christ was neither a *sans-culotte* nor an honest Jacobin nor a wise man nor a moralist nor a philosopher nor a legislator."** (55: II: p. 398)

> Babeuf is the direct descendant of ideas which stirred the masses to enthusiasm in 1793; he, Buonarotti, and Sylvain Maréchal have only systematised them a little or even merely put them into literary form. **But the secret societies organised by Babeuf and Buonarotti were the origin of the *communistes matérialistes* secret societies through which Blanqui and Barbes conspired under the bourgeois monarchy of Louis-Philippe.** Later on, in 1866, the International Working Men's Association appeared in the direct line of descent from these societies.

> The French Revolution was the rise of democracy in Europe. Democracy is, as I take all forms of government to be, a contradiction in itself, an untruth, nothing but hypocrisy (theology, as we Germans call it), at the bottom. **Political liberty is sham-liberty, the worst possible slavery; the appearance of liberty, and therefore the reality of servitude.** Political equality is the same; therefore democracy, as well as every other form of government, must ultimately break to pieces: **hypocrisy cannot subsist, the contradiction hidden in it must come out; we must have either a regular slavery — that is, an undisguised despotism, or real liberty, and real equality — that is, Communism. Both these consequences were brought out in the French Revolution; Napoleon established the first, and Babeuf the second.** I think I may be short upon the subject of Babouvism, as the history of his conspiracy, by Buonarroti, has been

translated into the English language. The Communist plot did not succeed, because the then Communism itself was of a very rough and superficial kind; and because, on the other hand, **the public mind was not yet far enough advanced.**

https://www.marxists.org/history/france/revolution/conspiracy-equals/1796/song.htm

During humanity's childhood
We saw no gold, no war,
No ranks, no sovereign,
No luxury, no poverty!
Sacred and sweet equality
Fills the earth and makes it fertile.
In these days of felicity
The sun shines for all.

Everyone loved everyone else, all lived happily,
Enjoying a common ease;
Regrets, shameful debates
Didn't trouble independence.

Alas! Soon **ambition**
Relying on imposture
Dared to contemplate the plot and outrage
Of usurpation.

We saw princes, subjects,
The opulent, the poverty-stricken;
We saw masters, valets:
The day before all were alike.

https://www.marxists.org/glossary/people/m/a.htm#marechal-sylvain

After studying law Sylvain Maréchal very early turned to literature. Heavily influenced by Rousseau and the atheist priest Jean Meslier, his ideology was a mix of utopian (mainly agrarian) socialism and materialism.

In 1780 he published his "Alamanach des Honnetes Gens," which replaced the saints on the Catholic calendar with scholars and writers, a book that earned him three months in prison. In 1790 he became editor of "Revolutions de Paris," but remained aloof from the struggle between the Girondins and the Jacobins. After the ninth of Thermidor and the fall of Robespierre he was one of Babeuf's Equals and was the author of the "Manifesto of the Equals."

Thanks to the anonymous nature of his work with Babeuf he escaped the repression that fell on the failed conspiracy. The most militant of atheists, in 1799 he published a "Dictionary of Ancient and Modern Atheists."

https://www.marxists.org/history/france/revolution/marechal/1799/preliminary-discourse.htm

Ecce vir

There was not always a God. <u>There was a time when a man, living with his family, knew no other authority than that of his father.</u> He had few needs because he had few desires. He wasn't a brute, a barbarian, or an eater of men, as we have been led to believe. Nor was he a polished and false city-dweller, vain and servile: he was a man in all his plenitude, ignorant of the art of writing, perhaps even that of speaking, but knowing how to live; that is, he loved his father, his wife and his children. He worked for them, with them and died in their embrace. **In his eyes his fields were the entire universe.** Regulating his occupations by the sun's movements and the earth's fecundity, his arms and his heart comprised his entire fortune and pleasure. **Suspecting nothing beneath the vegetal layer of the soil he cultivated,** man of that time was a stranger to sciences and vices, to social virtues and crimes, but was entirely given over to nature, to innocence.

<u>Travelers have found a few faint traces of the golden age: it is not a chimera. Poets have rendered its existence doubtful by loading it with factitious ornaments, but that happy age once shone.</u>

Why should we feel any repugnance about believing such things? Are they in the realm of the possible? Is it so difficult to live in this way? And isn't the current existence of humankind even more astonishing?

At that time man, limited to the surface of heaven and earth, neither had nor could he have had any idea of any power other than that which put him on earth and raised him. Do we think about something we have no need of? And what need do we have of a God when we have a father, a wife, children, a friend, arms, eyes and a heart?

But a true atheist is the man of the golden age. The atheist is he who, retreating into himself and freeing himself from the ties he has been forced to contract, or that were made unbeknownst to him, retreats from civilization to that former state of humanity and, in the forum of his conscience, laying low all prejudices of every color, approaches as nearly as possible that fortunate time when there was no suspicion of the divine existence, where all was well, where we contented ourselves strictly with family obligations. The atheist is the man of nature.

Nevertheless, placed today in a more complicated and narrow sphere he fulfills his obligations as a citizen and resigns himself to the decrees of necessity. **While groaning about the vicious bases of political institutions, while striking with contempt those who so poorly organize them, he submits to the public order of the place he lives.** But we don't find him becoming chief of a party or of opinion. We never meet him on the banal road that leads to useful or brilliant posts. Consistent with his principles, he lives among his corrupted or corrupting contemporaries like the voyager who, having to traverse muddy beaches, protects himself from the venom of reptiles. He gets off with only being deafened by their insults. He goes his way among these evil beings without taking on their tortuous and servile allure.

The true atheist is thus not the sybarite who, taking himself for an epicurean when he is nothing but a debauchee, doesn't fear to say deep in his worn-out heart: "There is no God, thus there is nor morality, so I can permit myself everything."
…

The true atheist is not he who says: "No, I don't want a God." Rather it is he who says: "I can be wise without a God."

The true atheist doesn't reason with great argumentative skill against divine existence. On the contrary, the weakest theologians could embarrass him if he crossed swords with them.

https://www.marxists.org/history/france/revolution/marechal/1799/atheists.htm

BORNO – The peoples of Borno have neither law nor religion. – Dapper

n.b. Yet they are no less wise or happy.
…

CANARIES – Nature was the only divinity of the ancient inhabitants of the Canaries – Herbert, English traveler
…

EGYPTIANS – Jablonski, in the article on Phtha, depicts the Egyptians as atheists, whose system so resembles that of Spinoza that, if one has the least power of observation, it is impossible to mistake it.
…

MYTHOLOGISTS – **The authors of mythology, both poets and prose writers, were Spinozists, composing their gods of personified parts of nature.**

The Mythologists had more imagination and good faith than the theologians, their successors.

> In Burr Brundage's book *The Fifth Sun: Aztec Gods, Aztec World,* he describes the relationship between the Aztec gods and the monistic underlying unity of the world:
>
> > the blatant polytheism which appears to be so characteristic of ancient Mexico is simply a symbolic reference to natural phenomena. **The two thousand gods were only so many manifestations of the One.** In the figure of Tonacatecuhtli we find a substitute for monotheism. … In order to express the idea that the cosmic forces were emanations of the divine principle the gods of nature were called children of Tonacatecuhtli.

https://www.marxists.org/history/france/revolution/conspiracy-equals/1796/manifesto.htm

Written by Sylvain Marechal, one of the conspirators, the Manifesto didn't meet with unanimous support from the directors of the revolt. **Especially contested was Marechal's "Let the arts perish, if need be, as long as real equality remains."**

For fifteen centuries you lived as slaves and, consequently, unhappy. For the last six years you barely breathe, waiting for independence, freedom and equality.

EQUALITY! The first wish of nature, the first need of man, the first bond of all legitimate association! People of France! You were not more blessed than the other nations that vegetate on this unfortunate globe! **Everywhere and at all times the poor human race, delivered over to more or less deft cannibals, served as an plaything for all ambitions, as prey for all tyrannies.** Everywhere and at all times men were lulled with beautiful words; at no time and in no place was the thing itself ever obtained along with the

word. **From time immemorial they hypocritically repeat to us: *all men are equal*;** and from time immemorial the most degrading and monstrous inequality insolently weighs upon the human race. As long as there have been human societies the most beautiful of humanity's privileges has been recognized without contradiction, **but was only once put in practice: equality was nothing but a beautiful and sterile legal fiction. [l'égalité ne fut autre chose qu'une belle et stérile fiction de la loi.]** And now that it is called for with an even stronger voice they answer us: be quiet, you wretches! Real equality is nothing but a chimera; **be satisfied with conditional equality; you're all equal before the law.** What more do you want, filthy rabble?

---

Abortion is based on the obviously unfactual legal fiction that an unborn human is not a person.

Legal fictions are used to prevent laws coming into conflict with one another, such as the law concerning murder and the law concerning abortion.

> "Legal Fiction
> noun
> an assertion that is accepted as true for legal purposes, even though it may be untrue or unproven."

Abortion's lay adherents outside the legal trade confuse the legal fiction with an empirical truth, and because it is obviously not so their attempts to defend it as empirical truth makes them appear as fools.

> http://www.romans45.org/articles/finney.htm
>
> Finney spends a considerable amount of time in several of his works arguing against "that theological *fiction* of *imputation*" [*Memoirs,* 58]. Those who have any grasp of Protestant doctrine will see immediately that his attack at this point is a blatant rejection of the doctrine of justification by faith alone *(sola fide).* It places him outside the pale of true evangelical Protestantism. **The doctrine of imputed righteousness is the very heart of the historic difference between Protestantism and Roman Catholicism.** The whole doctrine of justification by faith hinges on this concept. But Finney flatly rejected it. He derided the concept of imputation as unjust: **"I could not but regard and treat this whole question of imputation as a theological fiction, somewhat related to our legal fiction of John Doe and Richard Roe"** [*Memoirs,* 60].
> ...
>
> Protestants have historically insisted that justification is a purely forensic declaration, giving the penitent sinner an immediate right standing before God on the merit of Christ's righteousness, not their own (cf. Rom. 10:3; Phil. 3:9). **By *forensic,* we mean that it is a legal declaration, like a courtroom verdict or a marriage pronouncement ("I now pronounce you husband and wife"). It changes the person's external status rather than affecting some kind of internal change; it is a wholly *objective* reality.**

https://en.wikipedia.org/wiki/Legal_fiction#Development_of_the_concept

Typically, a legal fiction allows the court to ignore a fact that would prevent it from exercising its jurisdiction by simply assuming that the fact is different.
...

Proponents of legal fictions, particularly their use historically (for example, before DNA evidence could give every child the right to have both genetic parents determined easily), identify them as "scaffolding around a building under construction".[6]
...

The concept of the law treating corporate entities as if they were persons dates back to Ancient Rome.[8] This simple fiction enabled corporations to acquire wealth, expand, and become the preferred organizational form for businesses of all sizes.
...

Henry Maine argued that legal fictions seem an ornate outgrowth of the law that ought to be removed by legislation. Jeremy Bentham sharply criticised the notion of legal fictions, saying that "fictions are to law what fraud is to trade."[4][5]

> **This essay contains the famous statement that 'Natural rights is simple nonsense; natural and imprescriptible rights, rhetorical nonsense, nonsense upon stilts.'**19 It is a vigorous and sustained attack on the French Declaration of the Rights of Man originally issued in

1789, on parts of the Declaration of the Rights and Duties of Man issued in 1795, and on parts of a draft Declaration of Rights written by Emmanuel Sieyès in the summer of 1789.

https://www.gutenberg.org/files/55902/55902-h/55902-h.htm#link2H_4_0003

However sharply he may speak of us, **we can never cease to revere in him the father of the philosophy of Jurisprudence.**
…

The theory of the original contract is a fiction, and a very absurd fiction; but in practice it meant, what the "greatest happiness principle," if ever it becomes a watchword of political warfare, will mean—that is to say, whatever served the turn of those who used it.
…

The "original contract" meant in the Convention Parliament the co-ordinate authority of the Three Estates. If there were to be a radical insurrection to-morrow, the "original contract" would stand just as well for annual parliaments and universal suffrage.
…

The whole science of Jurisprudence is his. He has done much for political economy; but we are not aware that in either department any improvement has been made by members of his sect. He discovered truths; all that *they* have done has been to make those truths unpopular. **He investigated the philosophy of law; he could teach them only to snarl at lawyers.**

https://archive.org/details/deciveorcitizen00inhobb/page/50/mode/2up?view=theater

Whether therefore men be equall by nature, the equality is to be acknowledged, or whether unequall, because they are like to contest for dominion, its necessary for the obtaining of Peace, *that they be esteemed as equall*; and therefore it is in the eight place a precept of the Law of nature, *That every man be accounted by nature equall to another*, the contrary to which Law is PRIDE.

https://www.amren.com/archives/back-issues/august-2011/#cover

In a nutshell, whites lie about race because it is rational, and craven rationality will nearly always trump idealistic truth seeking. It is a matter of incentives: liars are rewarded, truth-tellers punished. Both whites and blacks are equally guilty in this infatuation with mendacity, though for different reasons. **When all is said and done, dishonesty makes perfect sense in a society where keeping the racial peace is paramount,** and no one cares about really curing anybody's pathologies or scoring points as a truth teller.

https://en.wikisource.org/wiki/Schopenhauer_as_Educator#8

The state has never any concern with truth, but only with the truth useful to it, or rather, with anything that is useful to it, be it truth, half-truth, or error. A coalition between state and philosophy has only meaning when the latter can promise to be unconditionally useful to the state, to put its well-being higher than truth.

https://oll.libertyfund.org/page/liberty-matters-knud-haakonssen-pufendorf-on-power-and-liberty#leadessay

Pufendorf's other starting point is a sharp distinction between the natural and the social world, the *entia physica* and the *entia moralia* respectively. The latter are all either directly or indirectly introduced into the world through acts of human will; they are, as he says, imposed upon the natural world. The natural, or physical, world is obviously not irrelevant to us in our formation of intentions and exertions of will. It is the case that we refer to nature in making our choices in life – the "natural goods" of food or the "natural evils" of climate or violent animals or other humans. But we do not *derive* our choices, our "moral goods" and "moral evils," from nature. **Pufendorf therefore sharply rejects what he took to be Thomas Hobbes's attempt to derive natural rights and the legitimacy of authority from the characteristics of human nature. No doubt we will take our neighbor's physical or psychological prowess into account when considering what moral status (entity) to ascribe to him or her, but it is our choice whether to see the other person as friend or foe.** In other words, natural rights and natural equality are as much moral entities as rights and equality in positive law in that they are introduced into the world through intentional human activity. **They are juridical fictions in natural law: irrespective of how naturally equal or unequal people are, we have to *regard* them as equal and we have to *ascribe* to them certain basic qualities, such as being a person (cf. Locke on "person" as a forensic term) different from animals and capable of choosing to be subject to the law of nature.**

https://archive.org/details/threecriticsofen0000berl_z2z0/page/108/mode/2up?view=theater

Vico's intellectual courage – even if it is the only kind of courage he possessed – was very great. **It was a very bold undertaking to attack the ancient conception of natural law as being something universal, absolute, objective, a set of eternal truths in the light of which Europe had lived for two millennia. It was especially audacious to do so in the century the greatest jurists of which had laid it down that these laws were as certain as those of mathematics and could not be altered even by God himself;** and to substitute for this the notion of natural law as a set of rules covering all the vast variety of social experience, organised not by its deducibility from a single set of timeless axioms, but by its relation to the fundamental – not perhaps wholly immutable – categories in which human beings in fact think and act.
...

Where the natural law theorists are abstract, Vico is concrete; where they invented fictions, the natural man, or the state of nature, he remained uncompromisingly committed to what he called history, a history which may not have been accurate, but which was time-bound through and through. Where they distinguished morals from politics, he regarded these as one organic evolutionary process, connected with every other self-expression of human beings in society. Where the natural lawyers were individualists, he grasped the social nature of man – in the sense that he thought that the majority of human activities would not be intelligible if one attempted to describe them as the acts of solitary Robinson Crusoes. For Vico, men acted as they did because their membership of social groups, and their sense of this relationship, was as basic and as decisive as their desire for food, or shelter, or procreation, as their lusts and sense of shame, their search for authority and truth, and everything else that makes men what they are. **Where the lawyers were exact, clear, formal, rationalistic, utilitarian, he remained religious, vague, intuitive, disordered, and painfully obscure.**
...

Two hundred years before our time he conceived of mathematics as the invention of fictions, as an art or game like chess, not as a descriptive procedure, or system of tautologies.

https://archive.org/details/BarruelMemoirsIllustratingTheHistoryOfJacobinism/page/n77/mode/2up?view=theater

The same cunning is to be found in the article of the SOUL. When the Sophisters treat directly of its essence they give the ordinary proofs of its *spirituality and of its immortality*. They will even add in the article BRUTE, that the soul cannot be supposed *material*, nor can *the brute be reduced to the quality of a mere machine, without running the hazard of making man an Automaton*. **And under NATURAL LAW we read, that if the determinations of man, or even his oscillations, arise from any thing *material, and extraneous to his soul, there will be neither good nor evil, neither just nor unjust, neither obligation nor right*. Then *referred* to the article LOCKE, in order to do away all this consequence, we are told that it is of no importance *whether matter thinks or not; for what is that to justice or injustice, to the immortality of the soul and to all the truths of the system, whether political or religious*;** the reader, enjoying the Equality and Liberty of his reason, is left in doubt with regard to the spirituality, **and no longer knows whether he should not think himself all matter. But he will decide when, under the article ANIMAL, he finds *that life and animation are only physical properties of matter*, and lest he should think himself debased by his resembling a plant or an animal, to console him in his fall,** they will tell him, article ENCYCLOPEDIA and ANIMAL, *that the only difference between certain vegetables, and animals such as us, is, that they sleep and that we wake, that we are animals that feel, and that they are animals that feel not*; and still further in the article ANIMAL, that the sole difference *between a stock and a man, is, that the one ever falls, while the latter never falls after the same manner*. After perusing these articles *bona fide*, the reader must be insensibly drawn into the vortex of Materialism.

In treating of Liberty or free agency we find the same artifice. **When they treat of it directly, they will say, "Take away Liberty, all human nature is overthrown, and there will be no trace of order in society—Recompense will be ridiculous, and chastisement unjust.—The ruin of Liberty carries with it that of all order and of police, and legitimates the most monstrous crimes.—So monstrous a doctrine is not to be debated in the schools, but punished by the magistrates, &c. *Oh Liberty!* they exclaim. *Oh Liberty, gift of heaven! Oh, Liberty of action! Oh, Liberty of thought!* thou alone art capable of great things."** [*See articles* AUTHORITY and the PRELIMINARY DISCOURSE.] But at the article CHANCE (*fortuit*) all this liberty of action and of thought is only *a power that cannot be exercised, that cannot be known by actual exercise*: and Diderot in the article EVIDENCE, pretending to support Liberty, will very properly say, **"This concatenation of causes and effects supposed by the Philosophers, in order to form ideas representing the mechanism of the Universe, is as fabulous as the Tritons and the Naïads;" but both he and D'Alembert will descant again on that concatenation,** and, returning to CHANCE (*fortuit*), will tell us "That though it is *imperceptible*, it is not the less *real*; that it *connects* all things in nature, and that *all events depend on it*; just as the wheels of the watch, as to their motion, depend on each other; **that from the first moment of our existence, we are by *no means masters of our motions*;** that were there a thousand worlds similar to this, simultaneously existing, and governed by the same laws, every thing in them

would be done in the same way; and that *man, in virtue of these same laws, would perform at the same instants of time the same actions* in each one of these worlds." This will naturally convince the uninformed reader of the chimera of such a Liberty or free agency, which cannot be exercised. **Not content with this, Diderot in the article FATALITY, after a long dissertation on this *concatenation of causes*, ends by saying, that it *cannot be contested* either *in the physical world*, or *in the moral* and *intellectual world*.** Then what becomes of that Liberty without which there no longer exists *just* or *unjust*, *obligation* or *right*.

https://archive.org/details/enlightenmentint0000gayp/page/416/mode/2up?view=theater

I have suggested that after Montesquieu the Enlightenment's denunciations of slavery yield little that is new. But there was at least one other argument, the utilitarian, that gained prominence, fittingly enough, in the second half of the eighteenth century, in tune with the Enlightenment's shift of temper from natural law to utility. Like war, the argument runs in brief, slavery is, in addition to all its other palpable and irreparable vices, a bad bargain. **Among the first to develop this line of reasoning was David Hume.**

https://archive.org/details/enlightenmentint0000gayp/page/454/mode/2up?view=theater

Hume had no use for the "mere philosophical fictions"3 **that underlay current political philosophy. His most conspicuous target was "the suppos'd *state of nature*," the "fallacious and sophistical" theory of the social contract,**4 **and with it the whole school of natural law. He piously insisted that he was in wholehearted agreement with the liberalism of the natural lawyers; he professed to share their aims and to reject only their reasoning.** Despite these reassurances, however, Hume's attack on natural law remains an ambiguous venture; it was part of the Enlightenment's general attack on fictions, but it exposed the attackers to considerable risks. **After all, natural law, almost from its emergence among the Greeks and codification among the Romans, had served ends to which the philosophes also subscribed.**
…

Increasingly (though, it is worth repeating, by no means exclusively), the philosophes came to legitimize the state on the ground of its utility, rather than on tradition or an original contract. This justification was a test of governmental conduct and if necessary a call to revolution: Bentham complained that Blackstone's natural-law doctrines were actually a defense of conservatism, and insisted that utilitarianism alone, with its persistent questioning, was consistently progressive.
…

The point of Hume's argument is not to vindicate authority at all costs; on the contrary, **he constructed it to show that while the doctrines of natural law are untenable in logic and history alike, their disappearance in no way implies a return to religious or traditionalist doctrines of authority.**

https://archive.org/details/enlightenmentint0000gayp/page/676/mode/2up?view=theater

It is generally agreed that in the course, and through the agency, of the Enlightenment, natural law was in decline in the eighteenth century. In his widely used *A History of Political Theory* (3rd edn., 1962) George H. Sabine entitles his chapter on French eighteenth-century thought "France: The Decadence of Natural Law." **I have gone beyond that to argue (*Voltaire's Politics*, appendix I, and in this volume) that even philosophes who used the rhetoric of natural law abandoned its logic and remained loyal to tatters of natural-law argument for convenience's sake only.**

https://archive.org/details/enlightenmentint0000gayp/page/458/mode/2up?view=theater

Natural law is essentially a rational and a rationalist construct. **As historians and sociologists, the philosophes recognized differences in men's ways; as reformers, they insisted on the imperfections of positive laws. Now these very differences and imperfections proved the assertions of natural law to be organized wishes rather than current realities,** moral imperatives rather than generalizations from experience. **True, the philosophes called upon factual evidence to make their generalizations; Diderot in particular, with his appeal to the practice of nations and the universal passions of men, sought to give the natural law an empirical grounding.** Just as the philosophes had repudiated objective laws in aesthetics but argued for a consensus on works of art, so in their political writings the philosophes thought they possessed good grounds for asserting the existence of laws that were higher than the laws in the statute books.

It was a brave but unsuccessful attempt to rescue what the philosophes should not have tried to rescue. **Yet, while they were destroying the logic of natural law with their epistemology, their sociology, and their history, they continued to use its language as a support for their social criticism and guide for their reform program.** Natural law appears in their writings as a commonplace, a kind of shorthand on which all educated, and many uneducated men, may be presumed

to agree, or, with Kant, as an aim toward which mankind should strive. **It is no accident that natural-law phrases should figure prominently in the pamphlets of the American and French Revolutions:** they were appealing battle cries, slogans of reform, humanity, and constitutionalism. **As pragmatists, many of the philosophes preferred effectiveness to consistency, and they persisted in proclaiming what their own thought made implausible.**

https://books.google.fi/books?id=Mau9wgEACAAJ&lpg=PP1&hl=fi&pg=PA187#v=onepage&q&f=false

Like Spinoza, d'Holbach believed Nature endows people with very different strengths and weaknesses both mental and physical so that nothing is more illogical than averring, as Rousseau does, that people are equal by nature. The "rights of mankind" which d'Holbach deploys so effectively for the first time in the history of modern political thought, and on which Brissot, Condorcet, Volney, Destutt, and the rest built during the Revolution, **are essential to empowering the law to offset the natural inequalities of wealth, strength, and intellect.**
…

It is because people are fundamentally unequal by nature that laws designed to equalize by formalizing equal rights are needed to enable the democratic republic based on popular sovereignty and the common good, or what Condorcet called the "bien général de tous," to properly function, doing so by evening things up.
…

The formalized "rights" and freedoms that men enjoy in society, where equal, are always the artificial, political creation of the (democratic) republic itself which is why monarchies and aristocracies are innately inferior to the democratic republic. D'Holbach's doctrine is thus identical to Spinoza's,70 while Rousseau's innate, natural equality and unmediated "general will," d'Holbach, like Diderot and Condorcet, who both also dismissed Rousseau's natural, inalienable equality as destabilizing and dangerous, scorned utterly.71 **Where Rousseau views men as equal by nature, and Robespierre later expressly rebuked Condorcet for proceeding, when discussing rights of mankind, as if the eternal laws of nature were less inviolable "que les conventions des hommes"** [than the conventions of men], d'Holbach "condemns inequality before the law," that is the man-made inequality, here once again diverging widely from Voltaire, who simply sanctioned social inequality,72 as well as from Abbé Henri Grégoire, the revolutionary Catholic churchman who, on his deathbed, was refused the last rites by the Archbishop of Paris owing to his near radical views, **a clergyman strenuously advocating emancipation of blacks and Jews, certainly, but claiming that men's equal rights derive from their Maker and can be justified only within the context of Revelation.**73

While in its early stages the French Revolution sought to anchor its "universal and equal" rights in nature, declaring "natural rights," a concept Bentham firmly opposed, during the transition of 1795 in revolutionary debate, the neo-Brissotin leaders, Danou, Sieyès, Louvet, and others shifted equal rights from being anchored in Nature to *l'état social*, the needs of society. With this the Rousseauist view of universal rights gave way to the (Spinozist) Diderotian and d'Holbachian approach.74 Where man's individual will is passionate, unreasonable, violent, and precipitate, **the "general will" or "l'intérêt général de la société," as d'Holbach also dubs it, is calm, dispassionate, and intent on forging a "balance of power" out of the everyday clashes of individual wills.**

> http://nietzsche.holtof.com/Nietzsche_various/homers_competition.htm
>
> In order now to attain, through the medium of the state the highest furtherance of their selfish aims, it is above all necessary, that the state be wholly freed from those awfully incalculable war-convulsions so that it may be used rationally; **and thereby they strive with all their might for a condition of things in which war is an impossibility. For that purpose the thing to do is first to curtail and to enfeeble the political separatisms and factions and through the establishment of large equipoised state-bodies and the mutual safeguarding of them to make the successful result of an aggressive war and consequently war itself the greatest improbability;** as on the other hand they will endeavour to wrest the question of war and peace from the decision of individual lords, in order to be able rather to appeal to the egoism of the masses of their representatives; for which purpose they again need slowly to dissolve the monarchic instincts of the nations. **This purpose they attain best through the most general promulgation of the liberal optimistic view of the world, which has its roots in the doctrines of French Rationalism and the French Revolution, i.e., in a wholly un-Germanic, genuinely neo-Latin, [gänzlich ungermanischen, echt romanisch] shallow, and unmetaphysical philosophy.**

Whereas each individual "in the savage state," according to d'Holbach's anti-Rousseauist viewpoint, is a "brutal, ignorant animal, a wicked and ferocious beast, like bears and ourang-outangs," the society, guided by Enlightenment, social science, and the state, can become a **"community of citizens, united**

by fraternal sentiments, and reciprocal wants, turning their respective strengths into one common force," a "bank of interest," where love of one's neighbor infuses the whole.75 It was on the basis of these characteristically *Idéologue* social and moral principles that Volney and Destutt initiated moves in the National Assembly, in 1789-90, to ban all dynastic, royal, and colonial wars and warfare and later renewed Raynal's war on the great colonial trading companies, including the French Compagnie des Indes (for which Destutt earned a public rebuke from Edmund Burke).76

The "inequality that nature interposes between individuals," holds d'Holbach, far from being the the source of misfortune, is the "true base of their happiness." **Only through "entire dependence" on society, explains Condorcet, does d'Holbach's individual attain the "happiness" that is his main object in life.**77 D'Holbach was actually among the very first to deploy "universal and equal rights" as a political construct designed to correct the state of nature where society functions in pursuit of the common good. **Despite men being wholly unequal by nature, society's legislation can correct this: "des loix impartiales et inflexibles commandent également à tous: c'est en cela qu'elles établissent une egalité très-réelle, la seule à laquelle les hommes aient le droit de pretendre" [impartial and inflexible laws command equally to everyone, it is there that they establish a very real equality, the only one men have a right to claim].**78 Condorcet warmly endorsed d'Holbach's analysis, deeming it the sole correct philosophical foundation of the French Revolution's universal and equal rights and the "general will." **Natural inequality between individuals, physically and in their talents, being irreducible for d'Holbach and Condorcet (as for Spinoza), only through becoming members of society "are men invited and compelled to join together to lend each other mutual help. Inequality of strength and talents obliges them to rework in common, for the good of all, what nature assigns each individual in particular."**79 No genuine liberty exists where some men enjoy rights or privileges that others lack. **D'Holbach's logic was so compelling, suggested Condorcet, during the Revolution, that he and his fellow architects of public policy should now altogether abandon the "fictive equality believed [by Rousseau] to have originally existed among men."** Government by representatives of the people, whether constitutional monarchist or republican, being innately superior in d'Holbach's eyes to all other forms of government, **he firmly rejected Rousseau's "illusion" that "a people ceases to be free" from the moment in chooses "representatives"** just as he did Rousseau's natural equality.80

Rousseau was never a "moderate"; but after 1757 he abandoned the radical stance of his early phase and developed an immensely influential but idiosyncratic political thought that in the 1790s has often been considered the most formative intellectual influence on the Revolution – though it caused intractable difficulties for the revolutionary leadership. A key consequence of the clash between the rival human rights and "general will" systems of d'Holbach and Rousseau is that **whereas in Rousseau, as in Montesquieu, only small countries, like the Swiss cantons, are fitted for the republican form of government, in d'Holbachian political thought, it is the reverse: small republics do not depend on elected representatives, and large councils, as much as big ones, and hence are more "popular" and populist, nearer to direct democracy, and thus more irrational,** anarchic, and vulnerable to faction. Big republics require fixed constitutional rules, elections and representation and hence remain inherently more stable and rational.81
…

[D'Holbach's] ideal electoral candidate facing the electorate would be "riche et bon" (like himself). But special care was needed to ensure representatives did not become, or come to represent, a particular social group or economic stratum. Along with being self-supporting and having a stake in society, integrity, talent, and enlightenment are the essential qualifications and most likely to converge in persons owning some land. **What he proposed was what a Marxist would despise as an elusive bourgeois idyll for prominent urban and rural proprietors.**86
…

The convergence between d'Holbach's doctrine of representation and that of Sieyès was reflected in the work of the revolutionary National Assembly's *Comité de Constitution*, in 1789, when the committee's leading figures, Sieyès and Thouret, drew heavily on earlier French Enlightenment thought, **expressly endorsing d'Holbach's doctrine as expounded in the article on "Representatives," in the *Encyclopédie* (and later work), that "it is possession of property which makes a man a citizen."**93 For d'Holbach, elected representatives gathered in a national assembly constitute the supreme safeguard against ordinary people's irrationality, ignorance, and "superstition," **and are the means to organize government for the people without the people being able to "command."**94
…

Here the distinction between violent revolution via the masses, the Marxist conception, **and revolution not initiated by social forces but generated from within society by underground intellectual networks, or what we have termed Spinoza's alternative revolutionary strategy,** is what matters. **The prospect of mass insurgency filled d'Holbach (like Spinoza, Bayle, and Toland) with revulsion, but this did not preclude far-reaching, sweeping structural change guided by "reason."**

…

Reviling social turmoil, strife, and war, they preferred peace and social harmony. **What they conspired to engineer was another kind of revolution altogether – sweeping structural change plotted and instigated by their underground fraternity of reason.**

https://archive.org/details/in.ernet.dli.2015.503389/page/n65/mode/2up?view=theater

> But the Rights of Man enthusiasts soon made the discovery that the wild onsets of these uniformed masses produced something quite unexpected: a glorious, barbaric, and quite untheoretical joy in danger, mastery, and victory. It was the relic of healthy race-instinct, the trace of Nordic heroism left in these nations.

…

The right to elect representatives belongs to all “vrais citoyens” [true citizens], as d’Holbach and Diderot first affirmed in their article “Représentants” for the *Encyclopédie*, written between 1762 and 1764; **by “true citizens” d’Holbach meant settled inhabitants with a stake in society:** the right to vote should be withheld from vagabonds, mercenaries, and criminals.153 He who owns nothing, or is a vagabond, held d’Holbach, lacks ties to his country.
…

Behind the scenes, without the public knowing it, d’Holbach’s political ideas played a formative role in the French Revolution, much as Condorcet claimed, albeit not directly among the public but rather in a private more subtly subversive fashion, among the top vanguard of the democratic republican intellectual leadership. Especially those gathering in the entourages of Mirabeau and Sieyès, and at Auteuil in the salon of Madame Helvétius, the front line of French democratic republicanism, judged his political ideas a crucial resource. Meanwhile, the dense haze of mystery and concealment d’Holbach deliberately fostered around himself and his activities from the end of the 1760s down to 1789, during which his anonymously-published books were widely propagated in Europe (principally from Holland), only partially lifted during the Revolution. No doubt this was principally owing to his being a wholly unknown quantity among the general public as a result of the longstanding, masked, illicit way his influence had diffused earlier.

Yet modern scholarship has lamentably failed to draw attention, let alone do justice, to his crucial innovations. The lingering anonymity and secrecy shrouding his authorship of key subversive works during the 1770s, and contributions to political articles in the later volumes of the *Encyclopédie*, and continued semi-anonymity still after 1789, no doubt helped explain why, despite his extensive revolutionary significance, he has long languished among the most underestimated, marginalized, and ignored of the revolutionary age’s major political theorists. **Even so, his almost complete subsequent eclipse, in the nineteenth and twentieth centuries, still remains hard to explain.**
…

Scholars commenting on the profound differences between the two rival “general will” theories acknowledge d’Holbach’s concept is more fixed and universal, more tolerant, cosmopolitan, and firmly tied to promotion of man’s happiness and the good of society,207 **but then revert to the old view that, as far as the *Declaration of the Rights of Man and the Citizen* of 1789 is concerned, “Rousseau is the only source that really matters,” naturally without giving any reason for a judgment, the erroneousness of which should be obvious to anyone who reflects.** For it was not Rousseau, but d’Holbach, who was on the right track, as far as Diderot, Condorcet, Volney, Destutt, Naigeon, and other key democratic republican late Enlightenment “general will” theorists and adversaries of Rousseau’s and Robespierre’s ideas were concerned.208

D'Holbach, affirms the author of the classic account of his life and work in French, Pierre Naville (1903-93), son of a Protestant Swiss banker and friend of André Gide, successively a Stalinist, Trotskyist, and finally a founder of the French New Left, “did not want and did not foresee a revolution.” Of course, d’Holbach was not thinking of a socialist revolution brought about by the proletariat; but Naville also claims d’Holbach was not a “republican” or a “democrat.” **He hugely misled many.** Daniel Roche agrees that the Revolution revealed what he too saw as the basic contradiction between d’Holbach’s “philosophical radicalism” and his “political moderation,” further befogging the issue by insisting d’Holbach was an unremarkable “moderate” and “monarchist” not very different in general outlook from Voltaire (a revived familiar theme nowadays) in no way propagating advanced ideas. **For many, Marxists and Postmodernists alike, there cannot be any direct link between ‘l’athéisme de salon” and the politics of the Revolution.**210 **Both are greatly mistaken.**

https://books.google.fi/books?id=Mau9wgEACAAJ&lpg=PP1&hl=fi&pg=PA5#v=onepage&q&f=false

Fundamental to the "Radical Enlightenment" throughout was that its "democratizing republicanism" was always focused on "representative democracy"; all Radical Enlightenment theorists from Spinoza to d'Holbach, Condorcet, Price, Volney, Destutt, and Bentham rejected pure "direct democracy," considering the common people of their time still too ignorant, superstitious, and prey to "priestcraft" to understand the issues, though they hoped, and some optimistically expected, this would change in the future. **For "democracy," as they understood it, to work, the "common good," or "general will," contrary to Rousseau's teaching, must be represented by responsible, aware, and well-educated spokesmen and delegates. Radical Enlightenment hence invariably opted for "representative democracy" or, in its most sophisticated versions – as with Condorcet or the post-1810 Bentham – a complex balancing of representative and direct democracy backed by frequent re-election of representatives.**6 Pure "direct democracy," by contrast, the voice of the streets, Rousseau's dispensing with representation, radical thinkers down to 1848 invariably abjured as "unenlightened" and dangerous. **Failing to see this, critics assuring readers the thesis collapses because key radical enlighteners like d'Holbach and Volney repudiated "direct democracy," as indeed they did, are confusing the issue.**7

What is sometimes called Robespierre's "ultra-democratic project," direct popular sovereignty, was intrinsically alien to the Radical Enlightenment creed which remained relentless in stressing the ignorance of "the multitude," **albeit "multitude" understood not in terms of class but in terms of ability or inability to understand the "reality of things." In Spinoza and d'Holbach this exacting standard by no means ruled out unprivileged, poor, and humble individuals who are perceptive and aware.** But their "multitude" definitely did encompass most kings, princes, courtiers, aristocrats, professors, and clergymen who, radical enlighteners typically assumed, either fail to grasp or deliberately obfuscate the reality of things. Radical Enlightenment was inherently and always entirely at odds with Rousseau's "sublime science of simple souls."8

> https://counter-currents.com/2012/06/from-salon-to-guillotine/
>
> At this critical point in the argument, where explicitness and clarity are most indispensable, Rousseau turns coy and vague: the general will is "in conformity with principles"; it "only exists virtually in the conscience or imagination of 'free men,' 'patriots.'" Cochin calls this "the idea of a *legitimate people*—very similar to that of a legitimate prince. **For the regime's doctrinaires, the people is an ideal being**" (p. 158).
> …
>
> Incredibly, to the very end of the Terror, the Jacobins had no *legal standing*; they remained officially a private club. **"The Jacobin Society at the height of its power in the spring of 1794, when it was directing the Convention and governing France, had only one fear: that it would be 'incorporated'—that it would be 'acknowledged' to have authority"** (p. 176). There is nothing the strict democrat fears more than the responsibility associated with public authority.
>
> **The Jacobins were proud that they did not *represent* anyone. Their principle was direct democracy, and their operative assumption was that they *were* "the people."** "I am not the people's defender," said Robespierre; "I am a member of the people; I have never been anything else" (p. 57; cf. p. 154). He expressed bafflement when he found himself, like any powerful man, besieged by petitioners.
>
> Of course, such "direct democracy" involves a social fiction obvious to outsiders. **To the adherent "the word *people* means the 'hard core' minority, *freedom* means the minority's tyranny, *equality* its privileges, and *truth* its opinion,"** explains our author; "it is even in this reversal of the meaning of words that the adherent's initiation consists" (p. 138).

https://www.nestormakhno.info/english/equality.htm **[February 1926]**

The 14th Congress of the Russian Communist Party has roundly condemned the notion of equality. Prior to the congress, **Zinoviev had mentioned the idea in the course of his polemic against Ustrialov and Bukharin. He declared then that the whole of contemporary philosophy was sustained by the idea of equality.** Kalinin spoke up forcefully at the congress against that contention, taking the line that any reference to equality could not help but be harmful and was not to be tolerated. His reasoning was as follows:

> *"**Can we talk to peasants about equality? No, that is out of the question, for in that case, they would set about demanding the same rights as workers, which would be in complete contradiction with the dictatorship of the proletariat.** Likewise, can we talk of equality to workers? No, that is out of the question too, for if, say, a communist and a non-party member do the same job, the difference resides in the former being paid twice the wage of the latter. **To concede equality would allow non-party members to demand the same pay as is paid out to a communist.** Is that acceptable, comrades? No, it is not. Can*

> *we call for equality among communists then? No, that is not on either, for they too occupy different positions, in terms of their rights and their material circumstances alike."*

On the basis of such considerations, Kalinin concluded that Zinoviev's use of the term "equality" could only have been demagogic and harmful. In his reply, Zinoviev in turn told the congress that, whilst he had spoken of equality, he had meant it in quite a different sense. **As for himself, all he had had in mind was "socialist equality," that is, the equality that would one day come to pass in a more or less distant future.** For the time being, until such time as the world revolution had taken place and as there was no way of knowing when it would, there could be no question of any equality. In particular, there could be no equality of rights, for that would risk dragging us in the direction of very dangerous "democratic" deviations.

This understanding on the notion of equality was not spelled out in a resolution from the congress. But, essentially, the two camps that clashed at the congress were agreed in regarding the idea of equality as intolerable.

Formerly, and not all that long ago, the Bolsheviks spoke quite a different language. It was under the banner of equality that they operated during the great Russian revolution, to overthrow the bourgeoisie, in concert with the workers and peasants, at whose expense they rose to political control over the country.

> https://www.marxists.org/archive/trotsky/1928/3rd/ti03.htm#p1-10
>
> From prominent leaders of the Comintern we have had to hear such an argument as: **the theory of socialism in one country, of course, is unfounded, but it provides the Russian workers with a perspective in the difficult conditions under which they labor and thus gives them courage. It is difficult to plumb the depths of the theoretical debacle of those who seek in a program not for a scientific basis for their class orientation but for moral consolation.** Consoling theories which contradict facts pertain to the sphere of religion and not science; and religion is opium for the people.
> ...
>
> But in need of it is the functionary who looks down on the masses from above; the petty administrator who does not want to be disturbed; **the apparatus retainer who seeks to dominate under cover of an all-saving and consoling formula. It is they who think that the ignorant people need the “good tidings,” and that there is no dealing with the people without consoling doctrines.** It is they who catch up the false words about “90% socialism,” for this formula sanctions their privileged position, their right to dominate and command, their need to be rid of criticisms on the part of “skeptics” and men of “little faith.”
>
> http://chronicle.com/article/In-Praise-of-Marx/127027/
>
> The truth is that Marx was no more responsible for the monstrous oppression of the communist world than Jesus was responsible for the Inquisition. **For one thing, Marx would have scorned the idea that socialism could take root in desperately impoverished, chronically backward societies like Russia and China.** If it did, then the result would simply be what he called "generalized scarcity," by which he means that everyone would now be deprived, not just the poor. It would mean a recycling of "the old filthy business"—or, in less tasteful translation, "the same old crap." Marxism is a theory of how well-heeled capitalist nations might use their immense resources to achieve justice and prosperity for their people. **It is not a program by which nations bereft of material resources, a flourishing civic culture, a democratic heritage, a well-evolved technology, enlightened liberal traditions, and a skilled, educated work force might catapult themselves into the modern age.**

https://www.marxists.org/reference/archive/stalin/works/1931/dec/13.htm

Stalin: The kind of socialism under which everybody would get the same pay, an equal quantity of meat and an equal quantity of bread, would wear the same clothes and receive the same goods in the same quantities—such a socialism is unknown to Marxism. All that Marxism says is that until classes have been finally abolished and until labor has been transformed from a means of subsistence into the prime want of man, into voluntary labor for society, people will be paid for their labor according to the work performed. **"From each according to his ability, to each according to his work."** Such is the Marxist formula of socialism, i.e., the formula of the first stage of communism, the first stage of communist society. **Only at the higher stage of communism, only in its higher phase, will each one, working according to his ability, be recompensed for his work according to his needs.** "From each according to his ability, to each according to his needs."

It is quite clear that people's needs vary and will continue to vary under socialism. **Socialism has never denied that people differ in their tastes, and in the quantity and quality of their needs.** Read how Marx criticized Stirner for his leaning towards equalitarianism; read Marx's criticism of the Gotha Programme of 1875; read the subsequent works of Marx, Engels and Lenin, and you will see how sharply they attack equalitarianism. **Equalitarianism owes its origin to the individual peasant type of mentality, the**

psychology of share and share alike, the psychology of primitive peasant "communism." Equalitarianism has nothing in common with Marxist socialism. Only people who are unacquainted with Marxism can have the primitive notion that the Russian Bolsheviks want to pool all wealth and then share it out equally. That is the notion of people who have nothing in common with Marxism. **That is how such people as the primitive "Communists" of the time of Cromwell and the French Revolution pictured communism to themselves.** But Marxism and the Russian Bolsheviks have nothing in common with such equalitarian "Communists."

https://en.wikipedia.org/wiki/Shining_Path#Use_of_violence

The Shining Path rejected the concept of human rights; a Shining Path document stated:

> We start by not ascribing to either the Universal Declaration of Human Rights or the Costa Rica Convention on Human Rights, but we have used their legal devices to unmask and denounce the old Peruvian state... **For us, human rights are contradictory to the rights of the people, because we base rights in man as a social product, not man as an abstract with innate rights. "Human rights" do not exist except for the bourgeois man, a position that was at the forefront of feudalism, like liberty, equality, and fraternity were advanced for the bourgeoisie of the past.** But today, since the appearance of the proletariat as an organized class in the Communist Party, with the experience of triumphant revolutions, with the construction of socialism, new democracy and the dictatorship of the proletariat, **it has been proven that human rights serve the oppressor class and the exploiters who run the imperialist and landowner-bureaucratic states.** Bourgeois states in general... Our position is very clear. We reject and condemn human rights because they are bourgeois, reactionary, counterrevolutionary rights, and are today a weapon of revisionists and imperialists, principally Yankee imperialists. — *Communist Party of Peru – Shining Path, Sobre las Dos Colinas*[127]

http://www.ditext.com/woodward/fitzhugh.html

For an intellectual tradition that stands in desperate need of contrast and suffers from uniformity—albeit virtuous liberal uniformity—this oversight is unfortunate. Granting his wicked excesses and sly European importations, Fitzhugh could at least furnish contrast. The distance between Fitzhugh and Jefferson renders the conventional polarities between Jefferson and Hamilton, Jackson and Clay, or Hoover and Roosevelt—all liberals under the skin—insignificant indeed. **When compared with Fitzhugh, even John Taylor of Caroline, John Randolph of Roanoke, and John C. Calhoun blend inconspicuously into the great American consensus, since they were all apostles in some degree of John Locke.**
…

But what of the Revolutionary generation of the Virginia Enlightenment—the Masons, the Randolphs, the Jeffersons, the Madisons, the Washingtons—and their apparently firm commitment to the antithesis of Filmerism, to the Lockean principles of rationalistic individualism and its picture of an atomistic society? **Whatever principles these gentry subscribed to in the 1770's and later, they were one and all patriarchs on their own—Thomas Jefferson included.** The anthropological, sociological, and political realities of Virginia society were those of the patriarchal family. Those realities might better be understood in Filmerian than in Lockean terms. **And curiously enough, many of these Revolutionary Lockeans were blood relatives—remote "cozens" of Sir Robert himself.** "In Virginia the Filmers and the Filmer connections," writes Laslett, "were associated with all the great families which finally gave to the thirteen colonies their Revolutionary leadership in the 1770's—the Washingtons, the Byrds, the Berkeleys, and the Randolphs and so the Jeffersons. Whatever the subsequent literary and philosophical reputation of Sir Robert Filmer, he had been a great genealogical success."[70] Sir Robert was a family man in more ways than ideological.

It was not "simple fraud" that led George Fitzhugh to seize upon Filmer in his search for some ideological basis on which to construct his defense and his understanding of Virginia society, even in mid-nineteenth century. As a sociologist he had got hold of some firm anthropological data. **It is rather more a wonder that the patriarchs of Revolutionary Virginia should have temporarily embraced Locke than that their sons should have returned to Filmer.**

> http://www.thephora.net/forum/forum/the-academy/economics/38387-classical-liberalism-private-property-and-christianity#post828603
>
> > *Property is related to propriety, and is an ethical institution. It is a feature of our civilization.*[1]
> >
> > **This is how a great Classical Liberal, Gottfried Dietze, starts his book, *In Defense of Property*. We can safely say that his book is the greatest treatise on the defense of**

private property written by a Classical Liberal. Dietze was a respected scholar of the Austrian School, a friend of Hayek, his book on the Federalist Papers was an astonishing success, and he was known for the "symmetry, precision, and profundity" of his writings.

And yet, throughout the book, he fails to defend his thesis in his first sentence. **He defends property on linguistic grounds, historical grounds, biological grounds, pragmatic grounds, "natural law" grounds.** But he never touches the issue of the intrinsic ethical goodness of private property. He starts the book with the claim that property is an ethical institution, but then he subjects its ethical value to many other things. **He doesn't show how property is good *per se*.** He doesn't show any eternal ethical values in property. Property is good because it is part of our civilization; or because property rights have been acknowledged by so many law codes in the past; or because it has been an integral part of the rise of the West; and so on. **But we don't see anywhere a statement that private property is good just because it is good, period.** The ethical institution is lost or forgotten, as Dietze progresses with his defense of property.
…

Ludwig von Mises—the man whose name is symbolic of the Austrian School—**devoted only two pages to private property in his 900-page fundamental work, *Human Action*. The book was Mises' magnum opus, a superb defense of free markets.** Mises was a profound thinker and scholar. He knew economic thought was not isolated from philosophy, so he started it with a thorough exposition of his epistemology and a defense of his methodological individualism. The book is a delight to read—page after page of rational, precise definitions, arguments and conclusions. And yet, when he comes to private property, he is next to silent. He says at the very beginning of the small subsection on "Private Property" in Chapter 24, on page 682: **"Private ownership of the means of production is the fundamental institution of the market economy."**[2]

One would think "the fundamental institution" would deserve at least a chapter in such a book. But no, it only get's two pages. And no defense on ethical grounds. **To the contrary, unlike Dietze, Mises makes sure he points to the fact that there is no defense of property on ethical grounds: "Private property is a human device. It is not sacred."**[3]
…

Dietze, Mises, Rand, and other Classical Liberal or Objectivist authors know this very well; they know very well that a rational defense of an ethical institution is impossible. But they are nevertheless reluctant to build an ethical defense of property. Why?

Because they have prior commitment to a philosophy that rejects any possibility for ethical defense of anything: evolutionism.

Being strong believers in natural law, the Classical Liberals saw property and property rights as evolving from an earlier state of common ownership of resources. **In this they agreed with another strong proponent of natural law in the antiquity, Cicero. While he defended property rights, he admitted that in their natural state before they created civilizations, humans owned all things in common.** Mises agreed with this: property came as a result of human action; a very useful and beneficial result indeed, but it was not part of the original "natural" state.

> https://web.archive.org/web/20160407204516/http://classicpersuasion.org/pw/cicero/dnv1-1.htm
>
> II. For there was a time when men wandered at random over the fields, after the fashion of beasts, and supported life on the food of beasts; nor did they do anything by means of the reasoning powers of the mind; but almost everything by bodily strength. **No attention was as yet paid to any considerations of the religious reverence due to the gods, or of the duties which are owed to mankind: no one had ever seen any legitimate marriages, no one had beheld any children whose parentage was indubitable; nor had any one any idea what great advantage there might be in a system of equal law.** And so, owing to error and ignorance, cupidity, that blind and rash sovereign of the mind, abused its bodily strength, that most pernicious of servants, for the purpose of gratifying itself.

…

In order to defend property, we must declare its sacredness. We must declare its intrinsic goodness. And we must declare its naturalness. **If it is not sacred, if it is not intrinsically good, and if it is not part of human nature—as opposed to external to human nature—property is only an expedient tool to be disposed of at will.** If it is so, we have no recourse against those that want to confiscate our property in the name of expediency or of "return to nature."

And the only way to declare its sacredness, goodness, and naturalness is to accept the Bible's claim that man was created an owner, and that he owned private property from the very beginning of his created existence. **Humans did not develop the concept of property, nor did it evolve in result of man's praxis or interaction.** Property was inextricably part of man's existence in the Garden, and there is no way to define man as a being without property.
…

This definition of man as a being that naturally has life and property is not a mere philosophical assumption; it flows from the very nature of objective reality because God Himself is a Proprietor. In the Third Commandment—which corresponds to the Eighth in the first five Commandments—God declares limits to man's use of His name. God is not a remote being. He owns everything, including the breath from our mouth, and we are not allowed to use that breath in a way that violates God's name. Using God's name in an inappropriate way was as heavy a crime as worshipping other gods, and violating His property was a crime against the Person of God. **In the same way, Biblically, violating a man's property was a crime against the person of man.**

http://www.christianciv.com/ChristCivEssay_Pt2.htm#Economics

That aggregates of people ought to value the same thing, whether a high GNP or individual property rights, also presupposes a fixed human nature, but that is inconsistent with naturalistic evolution. Marx argued that human nature is not fixed, and therefore economic systems should evolve as well. **As Gary North says, "What if the socialist argues that we are entering into a new era? The old laws of capitalism, including bourgeois morality, are now being superseded by a new era of proletarian production, proletarian morality, and proletarian economics! This is precisely what Marx and his followers have been arguing since the 1840's. This has been an extremely successful argument."**[24] Given that atheist capitalists accept the premise of naturalistic evolution, they cannot avoid the reasonableness of Marx's conclusion.

https://archive.org/details/essayonaristocra00bran/page/50/mode/2up?view=theater

I am of opinion that the institution of marriage, **which may have been very useful in taming brutes,** causes more misery to mankind than even the Church has done. Church, monarchy, marriage, property, these are to my mind four old venerable institutions which mankind will have to reform *from the foundations* in order to be able to breathe freely. And of these marriage alone kills the individuality, paralyses liberty and is the embodiment of a paradox. **But the shocking thing about it is that humanity is still too coarse to be able to shake it off.**

http://reason.com/archives/1974/02/01/slavery-and-socialism/1

Of socialist views on property, Fitzhugh, a self-educated lawyer and historian, remarked: **"None but lawyers and historians are aware how much truth, justice, and good sense there is in the notions of the Communists, as to the community of property."** [S, p. 161]

https://archive.org/details/sociologyforsout00fitz/page/184/mode/2up?view=theater

Property is not a natural and divine, but conventional right; it is the mere creature of society and law. In this all lawyers and publicists agree.

https://archive.org/details/FoundationsOfNineteenthCenturygrundlagenDesNeunzehntenJahrhunderts/page/n241/mode/2up?view=theater

It was worse when their Asiatic love of dogmatism and stickling for principle induced the really important legal teachers of the so-called "classical jurisprudence" to formulate clearly **the quite un-Roman idea of a natural law** and to introduce it systematically. Ulpian calls natural law that "which is common to animals and men." A monstrous thought! Not merely in art is man a free creator, in law too he proves himself a magnificent inventor, an incomparably skilled, thoughtful workman, the forger, of his own fate. **Roman law is as characteristic a creation of the one individual human spirit as Hellenic art.**

What would be said of me if I were to speak of a “natural art” and then tried to draw an analogy, however far-fetched, between the spontaneous chirping of a bird and a tragedy of Sophocles? **Because the jurists form a technical guild, many of them have for centuries talked nonsense like this without the world noticing it.**
...

But the ghost of natural law still merrily haunts certain brains; for example, legal theorists, as far apart as Hobbes and Rousseau, agree in this one idea; but the greatest achievement was the famous Hugo Grotius' division in natural, historical, and divine law, which makes one ask whether then the divine law was unnatural? or the natural a work of the devil? It needed the brilliant intellect and the outspoken impertinence of a Voltaire to venture to write: **"Rien ne contribue peut-être plus à rendre un esprit faux, obscur, confus, incertain, que la lecture de Grotius et de Pufendorf."***

* *Dictionnaire philosophique*. **J.J. Rousseau, too, calls Grotius "un enfant, et qui pis est, un enfant de mauvaise foi"** (*Emile*, v.).

In the famous dedication of his *Discourse on the Origin of Inequality* to the Republic of Geneva, Jean-Jacques Rousseau drew a vivid picture of his father sitting at his watchmaker’s bench. “I see him still, **living by the work of his hands, and feeding his soul on the sublimest truths. I see the works of Tacitus, Plutarch, and Grotius,** lying before him in the midst of the tools of his trade. At his side stands his dear son, receiving, alas with too little profit, the tender instruction of the best of fathers. ...” Rousseau’s reminiscence is testimony to the authority which Grotius’s *De Iure Belli ac Pacis* had come to possess in the century since it was first published in 1625; in the eyes of both father and son, the book had the same standing as the great works of classical antiquity. **Rousseau was to devote much of his life to a complicated and subtle repudiation of Grotius, but he never lost his sense of the book’s importance, describing Grotius in *Emile* as “the master of all the savants” in political theory (though he added that, nevertheless, he “is but a child, and, what is worse, a dishonest child,”** and that “true political theory is yet to appear, and it is to be presumed that it never will”).1
...

As this publishing history in itself illustrates, it would be hard to imagine any work more central to the intellectual world of the Enlightenment. But from the late eighteenth century onward, the stream of new editions dried up, and the book came to be treated not as the formative work of modern moral and political theory but as an important contribution to a different genre, “international law” (a term coined by Jeremy Bentham in 1780). Many intellectual developments of the period contributed to this shift, including the criticisms of Grotius found (alongside his admiration) in Rousseau, and the contempt expressed by Kant for the “sorry comforters” such as Grotius and Pufendorf, whose works “are still dutifully quoted in *justification* of military aggression, although their philosophically or diplomatically formulated codes do not and cannot have the slightest *legal* force, since states as such are not subject to a common external constraint.”7 William Whewell, professor of international law at Cambridge and translator of Grotius, tried in the mid-nineteenth century to restore Grotius as a major moral thinker, but with limited success; **by the time of the post–First World War settlement, Grotius was regarded almost exclusively as the founder of modern civilized interstate relations, and as a suitable tutelary presence for the new Peace Palace at The Hague. As we shall see, in some ways that was to radically misunderstand Grotius’s views on war; he was in fact much more of an apologist for aggression and violence than many of his more genuinely pacific contemporaries.**
...

Each element also had a different range of supporters: broadly speaking, the Calvinist Church and its ministry looked to the princes of the House of Orange to secure its power over the population, while other more heterodox religious groups looked to the oligarchical urban rulers for their protection.

During the first two decades of the seventeenth century, the religious antagonisms within the republic reached the point where civil war was threatened. **Many people (including to some extent Grotius himself) felt that there had been little point in throwing off the tyranny of Spain if it was to be replaced by the tyranny of an organized and intolerant Calvinist Church.** Oldenbarnevelt and Grotius worked tirelessly on behalf of the Estates to try to protect the more liberal theologians (in particular, the ministers who agreed with Jacobus Arminius’s denial of the Calvinist doctrine of grace) from the attacks of the Calvinists; Grotius also circulated privately a theological work of his own in which he argued for a minimalist and irenic version of Christianity.8 **But in the end, both Oldenbarnevelt and Grotius seem to have concluded that the only way to secure religious toleration in the republic was in effect to mount a military coup against the Statholder and thereby to remove the principal weapon in the hands of the Calvinists.** There is a close parallel with events thirty years later in England, when the representatives of heterodox religious groups in the House of Commons also came to the conclusion that only a coup against their prince would destroy the power of the church that he supported. **In England, the Commons won, though only after a long and bloody civil war; in the United Provinces, Oldenbarnevelt and Grotius lost.** Prince Maurice arrested

them both and had them arraigned for treason; Grotius gave evidence against his old friend and was sentenced to life imprisonment, while Oldenbarnevelt was publicly beheaded in May 1619.
…

Rousseau was to remark sardonically that Grotius's use of quotations concealed the fundamental similarity between Grotius and Hobbes: **"The truth is that their principles are exactly the same: they only differ in their expression. They also differ in their method. Hobbes relies on sophisms, and Grotius on the poets; all the rest is the same."**11

>
> **Natural law arguments associated with Hugo Grotius, in particular, played a distinctive part in the formation of the opposing ideas of Bayle and Jurieu** on the nature of moral and political obligation and the possibility of civil toleration. **That Grotius' arguments could be deployed on the same topic to such wholly divergent ends was precisely expressive of** not only the range of views on resistance to sovereigns within the Refuge but also **the spectrum of opinions that could be identified in Grotius' own writings.**

…

Grotius boldly stated his central argument as follows:

> **God created man αὐτεξούσιον, "free and *sui iuris,*" so that the actions of each individual and the use of his possessions were made subject not to another's will but to his own.** Moreover, this view is sanctioned by the common consent of all nations. For what is that well-known concept, "natural liberty," other than the power of the individual to act in accordance with his own will? **And liberty in regard to actions is equivalent to ownership in regard to property. Hence the saying: "every man is the governor and arbiter of affairs relative to his own property."**19

…

And he made clear in his long defense of violence, Book I, Chapter II, that these laws did not supersede our natural right to defend ourselves: **"The Christian Religion commands, that we should lay down our Lives one for another; but who will pretend to say, that we are obliged to this by the Law of Nature[?]"** (I.II.6.2).

The natural state of man was thus one of wary defensiveness: **men should not unnecessarily injure one another, but they need not actually help one another.** Only if they formed civil associations, with the

express intention of improving one another's lives and creating something richer than the state of nature, would principles such as mutual aid apply.
…

Although the Prolegomena to *De Iure Praedae* began with the simple statement "What God has shown to be His Will, that is law," even in that work Grotius refused to derive the laws of *nature* from "oracles and supernatural portents."27 Instead, they were to be deduced solely from "the design [*intentio*] of the Creator" as manifested in the generally recognized constitution of the natural world. **Self-defense was the first and most basic of all principles: all individuals (not just men, but also animals, and even inanimate objects) possessed a fundamental drive to preserve themselves**. **Grotius was even prepared to say (quoting Horace) that to this extent "expediency [*utilitas,* "profit" or "self-interest"] might perhaps be called the mother of justice and equity,"** though he acknowledged that only part of justice was based on self-defense.
…

It is clear that both Grotius's derogation of the role of God and the priority he gave to self-interest were alarming to many of his contemporaries, particularly among the Calvinists who surrounded the Prince of Orange. In order to accommodate the book more to their views when he produced the second edition, Grotius toned down his argument. **Thus he cut out the claim that man was driven purely by self-interest "before he came to the use of that which is special to man" and replaced it with the emphatic assertion that "*the Saying, that every Creature is led by Nature to seek its own private Advantage, expressed thus universally, must not be granted.*"** Similarly, he contrived to widen the scope of God's authority. For example, in 1625 the very first sentence of the Prolegomena included the claim that "few people have tackled the law that mediates between different countries or their rulers, whether that law stems from nature itself or from custom and tacit agreement, and so far no one at all has dealt with it comprehensively and methodically." In 1631, this read "*that Law, which is common to many Nations or Rulers of Nations, whether derived from Nature,* ***or instituted by Divine Commands,*** *or introduced by Custom and tacit Consent, few have touched upon, and none hitherto treated of universally and methodically*"—Grotius now allowed that the law of nature might be "instituted by Divine Commands." Similarly, **he dropped the word "necessarily" from the sentence where he had said that the natural law "necessarily derives from intrinsic principles of a human being" and added to his discussion at that point the thought that**

> ***God by the Laws which he has given, has made these very Principles more clear and evident, even to those who are less capable of strict Reasoning,*** *and has forbid us to give way to those impetuous Passions, which,* contrary *to our own Interest, and that of others, divert us from following the Rules of Reason and Nature;*32 *for as they are exceeding unruly, it was necessary to keep a strict Hand over them, and to confine them within certain narrow Bounds.* (*Preliminary Discourse,* XIII)

So he now conceded that the natural law might properly be deduced not from the necessary constitution of the physical world, but from the records of God's pronouncements about the law directly to mankind.

Almost all these changes are found in the Prolegomena; the remainder of the book continued to lay out the same case that Grotius had advanced in the first edition. The result of this was to throw many of his later readers, including Barbeyrac, into some confusion; Barbeyrac consistently sought to emphasize the wider character of Grotian sociability and to bring him in line with Pufendorf (whose main aim was to attack the account of man's narrow and self-interested natural life found in Hobbes).33 **But anyone who read the first edition (as Hobbes himself probably did), or who could see through the confusion artfully introduced by Grotius (as Rousseau seems to have done), would be aware that Grotius's theory of the law of nature was more like Hobbes's than Pufendorf and Barbeyrac were ever prepared to acknowledge.** When Rousseau said of Grotius and Hobbes (in the passage I quoted earlier) that "their principles are exactly the same," he may well have been surprisingly close to the mark.
…

Throughout his discussion of property, especially in Book II, Chapters II and III of *De Iure Belli ac Pacis,* but also in *Mare Liberum* (which was the relevant portion of *De Iure Praedae*), Grotius made clear the extremely weak character of private property. In a state of nature, all commodities were in common, in the sense that each man took what he needed from the common store of nature and left what he did not need for other people to use; allocation of resources was simply on the basis of "first Occupancy" (II.III.1). The introduction of private property gave the owners merely a presumptive right to first use, entitling their own needs to be met by the commodity that they owned, before those of anyone else (II.II.8); but once the owners' needs had been met, Grotius always argued, the surplus could be claimed by the genuinely needy. A regime of private property did not give people a moral right to more extensive possessions; it merely changed the method by which they laid claim to the necessities of life.

Thus the sea could not be owned, as he insisted throughout *Mare Liberum* and in II.II.3 of *De Iure Belli ac Pacis,* because use of the sea itself (as distinct from the fish taken from it) could not be regarded as answering a basic need. The same was true of the original wastelands of the world, over which wild animals roamed. Agricultural land, on the other hand, could be owned, since (Grotius believed) only settled possession enabled the farmers to plant seed and harvest crops unmolested, and thereby to produce new commodities that could be used to fulfill basic needs. **The paradoxical consequence was that, according to Grotius, it was not the European settlers who were guilty of any injurious actions when they took hunting grounds away from the primitive peoples of the world; it was the primitive peoples themselves who were**

behaving badly when they tried to resist the settlements, and who could be punished for their conduct.35

> 35. See II.II.17. Grotius there and elsewhere distinguished between "Property" and "Jurisdiction": **Just as a fleet at sea can claim the right to regulate the use of the sea in its neighborhood** (always allowing for the moral rights of other people to use surplus resources), **so an aboriginal nation could regulate the use of its territory. But if it failed to allow settlement under its aegis, the land could be taken from it as punishment for its breach of the law of nature.**

…

However, one practice that could *not* be used as justification for the conquest of primitive peoples was their religion. It had occasionally been argued that "infidels" could rightly be conquered by Christians, but Grotius was always adamant that war could never be made against any theists on the grounds that their religion was false. As he said in II.XX.46, **"That there is a Deity, (one or more I shall not now consider) and that this Deity has the Care of human Affairs, are Notions universally received, and are absolutely necessary to the Essence of any Religion, whether true or false," and "those who first attempt to destroy these Notions, ought, on the Account of human Society in general, which they thus, without any just Grounds, injure, to be restrained, as in all well-governed Communities has been usual."** So atheism was a moral crime, as it was to be for Locke (though not for Hobbes). But any religion that corresponded to this minimal definition should be tolerated, and Christianity could not be forced on its adherents (II.XX.48), though Christianity itself had to be tolerated by nonbelievers on pain of international punishment (II.XX.49).
…

Whatever their different views about what he had done, Grotius's readers in the seventeenth and eighteenth centuries were united in their praise for his originality, for in *De Iure Belli ac Pacis* we have indeed found many of the central themes of modern political theory. **Grotius's men are born free, under no authority but that which all men will recognize, the authority of a minimal kind of natural law. They are equal, for the essence of Grotius's natural justice (as distinct from the distributive justice characteristic of civil societies) is that it treats all men as equal and does not recognize distinctions of rank or even of merit;** furthermore, in nature our property is extremely exiguous, and no one can claim property rights at the expense of the poor. And yet, on the other hand, his men are competitive and censorious, eager to conquer new territories if that will promote the rational use of the world's resources, and eager to intervene in the internal affairs of other nations if they see injuries being suffered by the innocent. **The world Grotius depicted is indeed recognizably our world, for good or ill.**

Then, too, during the first half of the seventeenth century, the Dutch were Europe's sole middlemen: their mercantile marine was three times as big as that of all other countries. And although—or indeed because—the whole world depended on it, there arose a bitter hatred against it (contrasting strangely with the extravagant admiration accorded to their manners and comforts) which was intensified by the brutal and reckless extremes to which they went in maintaining their advantage. **"Trade must be free everywhere, up to the gates of hell," was their supreme article of faith. But by free trade they meant freedom for themselves—in other words, a ruthlessly exploited monopoly.** This was also the kind of freedom that Grotius meant when in his famous treatise on international law, *Mare liberum*, he stated that the discovery of foreign countries does not in itself give right of possession, and that the sea by its very nature is outside all possession and is the property of everyone. **But as the sea was in fact in the possession of the Dutch, this liberal philosophy was no more than the hypocritical mask for an economic terrorism.**

https://books.google.fi/books?id=mTdUtsbybqkC&lpg=PP1&hl=fi&pg=PA56#v=onepage&q&f=false

For Benjamin Straumann, **'the reason why Cicero's arguments in favor of a natural law lent themselves to Grotius was that both Cicero's and Grotius's doctrines originally stem from an attempt to legally defend imperial expansion,' with Cicero's argument in *De re publica* being set out specifically as a response to the arguments of Carneades.**76

> https://books.google.fi/books?id=mTdUtsbybqkC&lpg=PP1&hl=fi&pg=PR13#v=onepage&q&f=false
>
> More recently, **Richard Tuck has proposed that the arguments of Lipsius and Michel de Montaigne, which drew on two of the Hellenistic philosophies, Stoicism and Scepticism, were the inspiration behind much of what he calls the 'new humanism'** that spread across Europe in the early decades of the seventeenth century and which in turn formed the crucial intellectual background for the political theories of first Hugo Grotius and later Thomas Hobbes.
> …
>
> Tuck's narrative of modern political philosophy has at its heart an interpretation of Grotius as a thinker who drew on an Epicurean understanding of self-love to fashion a reply to Scepticism, **but his argument overstates the role of both Scepticism and Epicureanism in Grotius's thinking and radically underplays the significance of Stoicism.**

https://discovery.ucl.ac.uk/id/eprint/1317765/1/283910.pdf

Grotius' natural state was originally one of “primitive simplicity,” identified from the outset as that of Indians.

> This primitive state ... exemplified in the community of property arising from extreme simplicity, may be seen among certain tribes in America which have lived for many generations in such a condition.15

The state of nature has suddenly been profoundly transformed. Beginning with Grotius, and followed shortly by Thomas Hobbes and later John Locke and Jean Jacques Rousseau, the natural state, as it has developed in political and Christian thought from Cicero through Aquinas, is with the 17th century thinkers wholly grafted without consideration for its implications on to the European notion of America and its natives. **Christianity and legal theory are fused and become, through natural law, the singular viewpoint for understanding the new world and its inhabitants.**

Like the Christian Edenic myth, Grotius' natural state is quickly corrupted. Thus, he states:

> **But men did not however continue to live this simple and innocent life, but turned their thoughts to various kinds of knowledge, the symbol for which was the tree of knowledge.**6

Natural law has also changed. **For the first time, Grotius incorporates the idea of natural rights into his theory of natural law.** Rights are defined as “a moral quality of a person, making it possible to have or do something lawfully.”17 Grotius, it should be noted, is concerned primarily with the rights of nations or companies, rather than individuals.

Secondly, ‘ius gentium’ is redefined. **Previously defined as the law *of* nations, that is those aspects of law common to all nations, Grotius's ‘ius gentium’ becomes the law *between* nations and Grotius, himself, becomes the founder of international law. Implicit in his analysis, as shall become explicit in Locke's, is that man under natural law in the state of nature is equivalent to European nations under the very same law, with the same natural rights.** The state of nature becomes a metaphor for explaining the relationship between states which have no overarching authority beyond that of God and natural law.
...

While Hugo Grotius, employed by the East Indies Company, defended Holland's right in common with all, to the sea; Locke and his patron Shaftesbury were more interested in the defense of England's private rights to American soil. It was argued that natural law allowed land to be appropriated only through cultivation rather than occupation. **Thus, lack of private ownership of the seas and the beginning of such ownership in the lands formed the fundamental bases for the laws of nature posited by Grotius and Locke, respectively. Samuel Pufendorf, on the other hand, with no colonial master, founds his theory of natural law on an “sociable attitude.”**

> https://books.google.fi/books?id=nCB0DwAAQBAJ&lpg=PR2&hl=fi&pg=PA211#v=onepage&q&f=false
>
> The distinction of the property of the goods of this world, whereby every man ought to be master and assured possessor of his own, has been introduced by the law and right of nature, which wills that to every man be yielded what belongs to him; or else by the right of nations, which all comes to one end. This distinction of property maintains the commerce and traffic among men; it entertains buying and selling, permutations, loans, and such like, which are bonds of all human society. And if the distinction of property is not maintained in the world, all commerce is destroyed, and all society decayed and resolved. **For although some poets and philosophers praise the community of goods, remembering us of that golden world of Saturn, yet it is plainly evident to all people of judgment that communism induces and brings a carelessness, idleness, discord, and confusion into the commonwealth,** as learnedly Aristotle demonstrates in his *Politics*.
>
> https://archive.org/details/originofpropert00fust/page/2/mode/2up?view=theater
>
> Long before the present century, there were thinkers who loved to picture to themselves mankind living together, when society was first formed, in a fraternal communism. **What is new in this, what is peculiar to our own times, is the attempt to rest this theory on a foundation of historical fact,** to support it with quotations from historical documents, to deck it out, so to speak, in a learned dress.

>
> Therefore, [Dr. Johannes Unold] wrote, with the outlandish exaggeration typical of the Monists, ‘**considered from an evolutionary point of view Social Democracy was the most**

reactionary of all the political parties. For it was not content, as were some of the conservatives, or [members] of the Center Party, to return to medieval political conditions, but wished rather to impose primitive forms of state and social organization on our richly evolved civilized communities with their densely and highly individualized populations, their many activities, and their diverse needs.'34 In fact, **the only time in history when the Marxist program had ever been fulfilled in any way was at the dawn of civilization when common tribal ownership of land existed. 'At that time there was no classes but only equality of rights and equality of duties for all.'** But with social evolution all that has changed and society can never return to the condition of its origin. By its support of common ownership of the means of production, therefore, Marxism simply was advocating a return to the most promitive conditions of mankind's past. **'In the Social Democratic proposals one may observe a deliberate pursuit ... of evolution in a reverse direction, a complete return to truly original stages, a form of state and social organization which is similar to the phenomenon of child-like behaviour in old age.'**35

https://www.nature.com/articles/nature17159.epdf

Here we test the social control hypothesis by applying Bayesian phylogenetic methods to a geographically and socially diverse sample of 93 traditional Austronesian cultures. **We find strong support for models in which human sacrifice stabilizes social stratification once stratification has arisen, and promotes a shift to strictly inherited class systems.**
…

According to the social control hypothesis, human sacrifice legitimizes class-based power distinctions by combining displays of ultimate authority—the taking of a life—with supernatural justifications that sanctify authority as divinely ordained2,8,13.
…

Ethnographic descriptions highlight that the sacrificial victims were typically of low social status, such as slaves, and the instigators were of high social status, such as priests and chiefs3,4,27.
…

The approach adopted in this paper demonstrates the way causal hypotheses about major transitions in human social organization can be tested by combining computational models and language phylogenies with a wealth of cultural and historical data. **Unpalatable as it might be, our results suggest that ritual killing helped humans transition from the small egalitarian groups of our ancestors, to the large stratified societies we live in today.**

https://oll.libertyfund.org/title/hakluyt-the-free-sea-hakluyt-trans#lf0450_label_099

By the first law of nations, which sometimes also is called natural and which the poets elsewhere describe in the golden age, and in another place in the kingdom of Saturn or Justice, nothing was proper, which Cicero affirmed: "For by nature nothing is private."3

3. Cicero, *De officiis,* I.8.21.

And Horace:

nam proprie telluris herum natura nec illum,
*nec me, nec quemquam statuit.*4

4. "Nature, in truth, makes neither him nor me nor anyone else lord of the soil as his own": Horace, *Satires,* II.2. 129–30.

For nature could not distinguish lords. In this signification, therefore, we affirm all things common at that time, signifying the same thing which the poets do when they say the first men sought the middle and justice held the middle of things by a chaste and inviolable covenant; which, that they might more plainly express, **they deny that the fields were divided by bounds at that time or that there was any traffic:**

promiscua rura per agros
*praestiterant cunctis communia cuncta videri.*5

5. "The farms scattered throughout the fields showed that all things seemed common to everyone": Avienus, *On Aratus' Phaenomena,* 302–3.

This word *videri* is rightly added by reason of the translation of the word as we have said. But this communion was referred unto use:

> *pervium cunctis iter,*
> *communis usus omnium rerum fuit.*6
>
> 6. “Open to all the way, in common was the use of every thing”: Seneca, *Octavia,* 402–3.
>
> https://en.wikipedia.org/wiki/Octavia_(play)
>
> *Octavia* is a Roman tragedy that focuses on three days in the year 62 AD during which Nero divorced and exiled his wife Claudia Octavia and married another (Poppaea Sabina). The play also deals with the irascibility of Nero and his inability to take heed of the philosopher Seneca's advice to rein in his passions.
>
> The play was attributed to Seneca, but modern scholarship generally discredits this, since it contains accurate prophecies of both his and Nero’s deaths.[1] **While the play closely resembles Seneca's plays in style, it was probably written some time after Seneca's death in the Flavian period by someone influenced by Seneca and aware of the events of his lifetime.**[2]
>
> https://archive.org/details/cu31924104730209/page/670/mode/2up?view=theater
>
> Then it was the Virgin Justitia (Astraea) that goddess of such distinguished reputation amongst the deities commissioned from Heaven, with that sacred trust, ruled the earth with mildness—The human race had never known what wars were, nor had they ever heard the battle-inspiring blasts of the shrill war-trumpet! and the people of those days were unacquainted with the weapons used in battle—**they did not surround their cities with walls—the land was one grand highway, open to all; and the enjoyment of all things was within the reach of and common to everyone—and the smiling earth freely disclosed its fruitful bosom,** and this Parent was happy in having the protection of such contented children.

By reason whereof there was a certain kind of dominion, but universal and indefinite. For God gave all things not to this man or that but to mankind and after that manner many may be wholly lords of the same thing; **but if we take dominion in that signification which it hath at this day it is against all reason, for this includeth a propriety which then no man had.** But that is most aptly spoken:

> *omnia rerum*
> *usurpantis erant.*7
>
> 7. “All things belonged to anyone who could take them”: Avienus, *On Aratus’ Phaenomena,* 301-2.

https://oll.libertyfund.org/page/grotius-the-free-seas-a-bibliography

The manuscript of Grotius’s reply to Welwod, like that of *De Jure Praedae,* was discovered in 1864 among the de Groot family papers.13

https://oll.libertyfund.org/title/hakluyt-the-free-sea-hakluyt-trans#lf0450_head_034

Welwod first cites what was said by God to Adam and Eve: “You shall have dominion over the fish of the sea and the birds of the air, and all the beasts crawling upon the earth.”16 **But this passage has no connection with the question of property, for the ownership which God there confers is universal, not particular, as was properly explained in the *Mare Liberum.* God gave those things not to this person or that person, but to the human race.** For Adam and Eve bore the personality of the whole human race, both because they were the only human beings of that time, and because the line of the human race that was to come was contained in those two as the very cause and principle of being. **Therefore there is no question there of a right which is competent to men against other men, but of one to all men against the lower creatures.**
…

There is no reason, therefore, why Welwod boasts of the authority of Holy Writ, in which there is not the least bit of support for his position. **There is no reason also why in this attack he should escape the testimony of illustrious authorities in favor of the freedom of the sea. For when we have not the divine words, the next best thing to be considered in a question of the law of nations is, what have the different nations decided from ancient times;** and if it is clear that they have held the same opinion, this should be considered as a great argument for truth. For, as Heraclitus rightly said, “the common word is the best criterion, for what seems best to all is trustworthy.”23

Among these [common opinions] **I greatly wonder that that statement of Cicero should be ridiculed, namely, that “there is nothing private by nature,”**24 **since it is of most evident truth. For Cicero does not mean thereby that nature is opposed to ownership, and, as it were, forbids**

anything at all becoming property, but that nature of itself does not cause anything to be property. This can be gathered from the following. Nature produces the rest of things for men, but without distinction, not “this for this one and that for that one.” Therefore, in order that this thing become the property of that man, some deed of the man should intervene, and therefore nature itself does not do this by itself. Hence it is evident that community is prior to property. For property does not occur except through occupation, and before occupation, there must precede the right of occupation. Now this right is not competent to this man or that man, but to all men equally, and is rightly expressed under the term “natural community.” And hence it happens that what has not yet been occupied by any people or by a man is still common, that is, belongs to no one, and open equally to all. By this argument it is surely proved that nothing belongs to anyone by nature.

Another argument can be added, namely, **that necessity, which reduces everything to the natural law, because the mother of positive law is utility which should yield to necessity, makes common again things formerly owned. By this law, if food becomes scarce on board ship, what each one has is gathered together in a common store.**25 **By this law, for the sake of warding off fire, it is licit to cut down neighboring buildings.**26 **Many things of this tenor can be seen in Thomas Aquinas and his interpreters.**27

> Not only is lying acceptable but, according to Rev. Cox, Liguori taught 30 different ways to lie.[36] By way of contrast, the Benedictine monk John Barnes wrote in 1625 that, “You should not lie even to save your life.”[37] For his efforts Liguori was elevated to the sainthood, appointed a Doctor of the Church, promoted to the office of a heavenly patron of confessors and declared a teacher of moral theology. **Six times in his *Homo Apostolicus* and 16 times in *Theologia Moralis* Liguori laid down the principle that as soon as a man is reduced to extreme poverty all goods become common and that the thief has a right to what belongs to others.**[38]

> I would have tried to explain the connection between the doctrine of Adam Smith, that labour is the original source of all wealth, and the conclusion that the producers of wealth virtually compose the nation, by which Sieyès subverted historic France; **and to show that Rousseau’s definition of the social compact as a voluntary association of equal partners conducted Marat, by short and unavoidable stages, to declare that the poorer classes were absolved, by the law of self-preservation, from the conditions of a contract which awarded to them misery and death; that they were at war with society, and had a right to all they could get by exterminating the rich,** and that their inflexible theory of equality, the chief legacy of the Revolution, together with the avowed inadequacy of economic science to grapple with problems of the poor, revived the idea of renovating society on the principle of self-sacrifice, which had been the generous aspiration of the Essenes and the early Christians, of Fathers and Canonists and Friars; of Erasmus, the most celebrated precursor of the Reformation; of Sir Thomas More, its most illustrious victim; and of Fénelon, the most popular of bishops, but which, **during the forty years of its revival, [28th May 1877]** has been associated with envy and hatred and bloodshed, and is now the most dangerous enemy lurking in our path.

Add also the fact that eminent theologians are of the opinion that in the primeval state of Paradise there was no property, that is, as distinct from use, and that there would not have been, had not sin intervened. This can be all the more probably defended, because both the Essenes of old and some peoples in America have made use of community of property, which even now a few congregations make use of, and indeed without great inconvenience. By this example it is proved that the statement, which is usually made and is adduced by Welwod, that “what is common is neglected, that community carries with it difficulty of administration, and that discord even arises therefrom,”28 **is not “absolutely necessary,” but “a result of hypothesis,” since we have taken into consideration the cupidity of men who consult their own interest to the neglect of others. For otherwise, if the human race were of such character as the Christian disciples of the Apostles were in the earliest times, whose hearts and souls were one,**29 **why could there not be observed what was then observed, namely, that nothing belong to anyone, but all things be common?**

Why is it that today even, although amid such great corruption of morals, still we see many things remaining common, not among private individuals only, but likewise among peoples, and not only for many years, but for centuries? **Welwod himself wishes the sea to be common to the citizens of a single people.** Consequently, even from this it is apparent that it has not been always and universally true that the disadvantages of community of ownership are greater than the advantages.

Nor is it unworthy of mention that, shortly after the creation of the world, when the number of the human race was small and living was simpler, that ownership of individual things which is distinct from

use was much less necessary than it is now, than it became afterwards. For a certain necessity of ownership as it were arose from the fact that some things were sufficient for the uses only of a few individuals. Thus we see in arid regions there has been a departure from community of land after competition over wells had arisen. Thus with the increase in the number of cattle, the lands which were common to Abraham and Lot soon began to be divided. **Hence you may without rashness gather that, even after sin entered the world, many things remained common, which by degrees, as the human race grew and the desire for luxuries likewise increased, yielded to individual right.**

I do not regret having said these things incidentally, **in order that it might be evident that those statements, which very estimable authorities have set down with regard to the original community of property, had their origin in truth, whether an inference of reason led them to that conclusion or whether they themselves had transmitted to posterity the story received from their progenitors.** Since all these same authorities relate that by degrees the earth was afterwards divided among many owners, while the sea remained perpetually common to all men, rightly should those who contend to the contrary be suspected of novelty, seeing that out of all antiquity they can not adduce even a single supporter of such unheard of doctrine.
…

For since those things common to all (among which is the sea) are sometimes distinguished from those things which are public and sometimes are called public, **it follows necessarily that the meaning of the word "public" is twofold.** For sometimes the word is properly taken for that which belongs to the people and sometimes in a broader sense to include also those things which belong to the entire human race, by a metaphorical use of the word which is not obscure; **because the human race is like a great people, and hence some philosophers call this world a city and themselves "cosmopolitans."**

https://oll.libertyfund.org/title/scott-the-freedom-of-the-seas-latin-and-english-version-magoffin-trans#lf0049_head_001

Therefore the distinguished English lawyer, scholar, and publicist, John Selden by name, bestirred himself in behalf of his country and wrote his *Mare Clausum* in 1617 or 1618, although it was not published until 1635, to refute the little tractate, *Mare Liberum*.1 In the dedication to King Charles I, Selden said: "There are among foreign writers, who rashly attribute your Majesty's more southern and eastern sea to their princes. **Nor are there a few, who following chiefly some of the ancient Caesarian lawyers, endeavor to affirm, or beyond reason too easily admit, that all seas are common to the universality of mankind.**"

https://www.hetwebsite.net/het/profiles/coke.htm

Roger Coke was born after 1626, **the grandson of the great English common law jurist, Sir Edward Coke.** Roger Coke was educated at Queen's College, Cambridge, but did not take a degree. Although demonstrating an early aptitude for mathematics, Coke's earliest writings were in political philosophy, notably a treatise against Hobbes (1660).
…

Justice vindicated from the false fucus put upon it by Thomas White, Gent., Mr. Thomas Hobbs and Hugo Grotius, *as also elements of power and subjection, wherein is demonstrated the cause of all humane, Christian, and legal society, and as a previous introduction to these, is shewed, the method by which men must necessarily attain arts & sciences,* 1660

https://books.google.fi/books?id=3wllAAAAcAAJ&hl=fi&pg=PP31#v=onepage&q&f=false

If I edified but little by Mr. *Hobbs*, yet I received much less satisfaction from *Grotius*; for Mr. *Hobbs* defines his terms so clearly, as to me, he was easily understood; whereas all *Grotius* his Principles are so perplexed, and equivocal, that it is not possible for any Man to understand anything clearly from him. As the first thing in his *Preface*, he confounds, is, *Societas & Communitas*; whereas *Societas* is as different from *Communitas*, as black is from white; *Societas*, according to the definition of *Aristotle*, being *Unum quid ita constans ex diversis personis, ut sit unum quod imperet, alterum quod pareat*. **Society is one thing so made up of divers persons, that one may command, another obey; Whereas community is, where any company of Creatures are, without the offices of commanding and obeying.**
…

Well; *Grotius* says, ***In the beginning of Mankind, Community was another thing then what Dominion now is:*** *For now* Dominium *signifies something proper, which thing (to wit) is so one mans, as it is not anothers in the same manner. We call that thing Common, whose propriety is collated amongst many by a certain consort or consent, excluding other men.* Linguarum paupertas coegit voces easdem in re eadem usurpare: *The poverty of Tongues hath forced men to use the same words in a thing not the same.* ***The Community which then was, was nothing else but what was simply opposed to Property.***

But in his Preface to this Book *De Jure Belli & Pacis, & para*. 3. *lib*. 1. *cap*. 1. He shall not need to complain, that the poverty of Tongues compells him to use the same words, in a thing not the same. For he himself useth things not the same, (viz. *Communitas & Societas*) in the same word, viz. *Communitas*.

Now, that Community and Society is not the same thing: **There is not, nor ever was since the beginning of the world, any Family where men did not live in Society; but in no Family did men ever live in Community. Nor did ever men desire such a Community, as he here, and before in his *Mare Lib.* speaks of;** Nor can Mankind subsist in such a Community; and so he himself confesses. And Man may be therefore not improperly said to be a reasonable creature, because he does not love and affect another because he is of the same kind with himself, (as other creatures who live in companies do) but chooses his society, as his Reason or conversation leads him.

But this Community (he says) which Man desires, *is not of whatsoever Community, but of peaceable, and ordained for the manner of his understanding, with them who are of his own kind: which Community the Stoicks called οἰχείωσιν.*

Does any Creature that lives in flocks and herds, not desire the community of its own kind? and therefore Hogs, Deer, and Goats keep in herds, and Sheep in flocks. **Or does any man think that *Grotius* could ever imagine, that his Countrimen did desire Society or Community with other Nations for their Understanding, or Profit?**
…

When he is got loose from these Principles, he then saies, ***But this keeping of society, which in a rude manner we have expressed convenient to humane intellect, is the fountain of that right or law* (ejus juris) *which is properly so called,*** *by which abstinence from what is anothers, obligation to perform promises, reparation for wrong done &c. do appertain.*

But sure the Man does much forget himself; **for in this Community he here speaks of, there can be no *meum* or *tuum*, and therefore no *alienum*, and by consequence no *alieni abstinentia*;** nor can any Man perform any promise, who can have nothing wherewith to perform; nor make reparation for wrong, when he can neither do any, nor has any thing to repair it withall.
…

These things therefore granted, and being the easie, and known Principles upon which *Grotius* laies his foundation, and so plain and perspicuous, as no exception, nay not so much as equivocation can be taken against them, any of them, or any part of them; Sure he shall not need much to use the help of Geometry, to build a most exact and noble Structure, which shall not only be a Land-mark, but also a Sea-mark for all Kings and Commonwealths, now and hereafter to govern and steer their actions by *tam per mare, quam per terram*, as well by Land as Sea; **but also a secure Rule for Subjects to continue their obedience, until they pretend a necessity for rebellion; if otherwise they cannot find some relief out of such popular Orators as *Cicero, Demosthenes, Cleon, &c*. which *Grotius* shall esteem of like weight with any testimony of Scripture.**

It is a most pleasant thing to see the excellencie of Truth in her pure and simple nakedness, how plain, easie, and beautiful she appears: whereas Falshood, with all the art, learning and industry of man, is still rendred more perplext, confused and dark, by how much is added to it.

And therefore to what a volume here has *Grotius* increased his *Jus Naturale!*
…

Whereas if he had made use of that plain and short Sentence, which the greatest Glory of all the Heathen Roman Emperors professed he learned of the Christians, *Quod tibi fieri non vis, ne feceris alteri*; **it would have signified infinitely more, then is contained in all the confused obscurity which he imposes upon the world in this Book *De Jure Belli & Pacis*, found upon this false and feigned Principle of the *Original right and power of the People*, from whence he derives all power in Government.**
…

Well, but let us see why *Jus Naturale* is immutable by God himself. **(Note, *Grotius* everywhere almost confounds *Jus* with *Lex*; and here he takes *Jus Naturale*, for *Lex Naturae*.)** For, *Although* (says he) *the power of God is immense, yet some things may be said to be, to which it does not extend it self; because those things so said, are only said, and have no sense which may express the thing, but are repugnant to themselves: So that twice Two should not make Four, cannot be effected by God.*

It is true, that God cannot make contradictory things, and things repugnant to agree, and to be the same. But this is nothing to *Grotius* his purpose, for a Similitude proves nothing; nor is there any analogie between the things propounded by *Grotius*: For though things simply necessary be immutable by God, yet the Law of Nature is the Law of God; and therefore being a creature of God's, it cannot have any obligation upon God; but being the Law of God given to Mankind, it is immutable by them; **and God might, if it pleased him, have given something else for the Law of Nature to Mankind.** Both *Grotius* his Positions therefore in this Section are manifestly false, absurd, and blasphemous, viz. *That the Law of Nature is immutable by God himself*; And, *That* Usus communis *is* Jure naturali, *and yet mutable by the will of Man.*

And if I be demanded to shew an example, that God is not obliged to the Law of Nature, or that the Law of Nature is not immutable by God: I say, *Jus suum cuique tribuere*, is from the Law of Nature; yet did the Children of Israel borrow Jewels of gold, of silver, and raiment of the Egyptians, and all such things as they required of them, and spoiled them by not making restitution, without any violence upon the Law of Nature, because God commanded them; nay, they had sinned and disobeyed God, if they had not done it.
...

Yet can no man borrow, with a resolution of not-restitution; nor any Father put his Son without cause to death, where God does not command, though all the world should command it, without a violence upon the Law of Nature. Nay I say, the Laws of Nature being eternal, **there was never any time when men ought not to give every man his due; and so by consequence, no time when *Grotius* his *Usus communis* was, since Men were born; but ever since Men were in the world, Dominion and property have been.** *Cain* had his Fruit of the Tillage of the ground, and *Abel* had his Flock and the Firstlings of his Flock; neither of which could be, if *Grotius* his *Usus communis* had been.

But you may say, Property presupposes humane Laws, which must give it; and humane Laws must happen in succession of time: **And that therefore before these humane Laws were, there could be no Property, and by consequence, all things were common and undivided.**

For the satisfying of this doubt, we must consider that God, in the Creation, only created one Man, and out of him made Woman; and that ever since no Man was ever made, but the species of Mankind hath been continued by generation. **I grant that all things were common to *Adam* (except the forbidden fruit;)** but no Man that was ever born into the world (and not a Posthumous King) who was not born into subjection to humane laws. **Nor did ever *Adam* derive this Legislative right which he had over his Wife and Children, by any Pact, Contract, or Submission of his Wife and Children; but had it from God, because he was first made. It is therefore manifestly false, which these men beg, *That by Nature all Men are equal, and that the will of Man brought in Dominion.*** Nor do these men shew out of any sacred or prophane History, that ever Dominion was brought in by Man, or that Men had things common and undivided among them.
...

And so in the instance which *Grotius* gives, a Debtor is by the law of nature obliged to pay his Creditor: but this Debt being paid, the particular cause ceasing, the obligation of the law of nature ceases also. What need therefore was there of *Arrianus* his Greek out of *Epictetus*, to prove a prime and necessary truth, **which is of more authority then forty *Arrianuses*, and all the Greek in *Epictetus*, *Grotius*, and all his Authors and Poets to boot?**

Grotius goes on: *So if God commands any man to be killed, or to take away any thing that is anothers; It is not lawful that Murder or Theft be done, which terms involve vice; but it is not Murder or Theft which is done by God, the Author of life and all things.*

They say, *Nulla similitudo quatuor pedibus currit*. I am sure this similitude runs not upon one foot, for in this last the particular cause remains, whereas in the former it is taken away; **and if the law of nature be immutable by God, and *Thou shalt not kill or steal*, be from the law of nature, then it is Murder and Theft, although commanded by God. Thus hath *Grotius* instead of clearly propounding his principles and orderly reasoning from them, thatched a company of equivocal and contradictory principles, with Poets and Authors brought in by head and heels;** so as not any one proposition is clearly stated and disputed, but the whole Treatise most perplexed and unsignificant thing.

God conferred upon Mankind generally, Jus (*Right) immediately after the Creation; and again when the world was repaired after the flood, over all the things of this inferior nature.* ***There were, as* Justin *saies, all things common and undivided to all men, even as one Patrimony should be to all Men.*** *God was pleased peculiarly to give rights* (dare jura) *to one only people, viz. the* Hebrews.

Which is absurd and impossible by the ninth Notion of the first Book of *Euclid*, *viz*. a part equal to the whole; the *Hebrews* not being all mankind, but a part.

Grotius goes on, *Hence it came to pass that every man gathered whatsoever he could snatch to their own uses, and consume what could be consumed; and whatsoever any man had so snatched, that could no man take from him, but by injury: but this State could not long continue.*

How's this? This is more monstrous and absurd then the other: what, God gave a Right to Mankind, and that so immutable that it is unalterable by God himself, and yet not possible long to continue!

To prove this first Common Right of all things common and undivided to Mankind, he refers to *Gen*. 1.29.30. *And God said, I have given ὑμῖν* (the Septuagint has it *to you* in the plural number, when *Adam* only was created*) every herb bearing seed, which is upon the face of the earth, and every tree in the which is the fruit of a tree yeelding seed, to you it shall be for meat, &c*. Now how could God speak to *Adam* in the plural number, when *Adam* only was created? It is said *verse* 27. *So God created* Adam *in his own image, in the Image of God made he Man, Male and Female created he them*: And therefore God speaks here to *Adam* and *Eve*. **Now whether God gave this Right to *Adam* and *Eve* in Community to both alike, as *Grotius* would have it, or to *Eve* in subordination to Adam, I refer it to any Christian Man to judge.** *Let the Woman learn in silence*

with all subjection, &c. and the reason the Apostle giveth is, *Man was first made, then Eve*. But suppose that God gave this Right not only to *Adam* and *Eve*, but to all Mankind in *Adam* and *Eve*; yet by the authority of the Holy Ghost had *Adam* dominion over all Mankind, because *Adam* was first made, and therefore God at the Creation of Man made Government with Mankind.

Let us see whether *Grotius* has any better luck with his common and undivided Right of all things, &c. immediately from the time of the world repaired after the flood; which to prove, he refers to *Gen*. 9.2.3. *And the feare (ὑμῶν) of you, and the dread of you shall be upon every beast, &c. every moving thing that liveth shall be meat for you, even as the green herb have I given you all things.*

Now then; **if this were not given to *Noah* his Wife, and *Noahs* Children in subordination to *Noah*, but as *Grotius* would have it, in community, to all alike;** then had *Sem* as much Right to all things as *Noah*, *Ham* as *Sem*, *Japheth* as *Ham*, *Sems* wife was an intercommoner with *Noah*, *Ham* with *Japheths* wife, and *Noahs* wife with them all, **(if this be true, Mr. *Hobbs* makes *Noahs* Sons in an ill case, where he saies, *filium in statu naturali intelligi non posse*, no Son can be understood in the state of nature, and *Sem*, *Ham*, and *Japheth* are Bastards, and not *Noahs* Sons.)** Well, if *Noah* and his Wife, his Son and their Wives had all things in common, that is, every one of them get what they could snatch to their own uses, and consume what might be consumed; from whence did *Noah* snatch his Vineyard, and drank the wine thereof untill he was drunken? If you beleeve *Grotius*, it was *Sems* Vineyard as much as *Noahs*; *Japheths* Wives as much as *Sems*, and *Hams* Wife had as much right to it as any body else. Poor *Noah*, thou hast taken great pains here to little purpose if *Hugo* be thy judge.

Well, Mr. *Hobbs*, rather then he will run upon *Scylla*, shall split himself against *Charybdis*? **and he makes *jus* to be the same thing with *libertas, and the foundation of* juris naturalis *to be, that every Man as much as he can, may defend his life and members.* And, *Natura dedit unicuique jus in omnia*. *Grotius* saies, *Erant omnia communia & indivisa omnibus, veluti unum cunctis patrimonium.* Which is all one and the same thing, differently expressed.**

Thus far these Wits jump; we shall see them far enough asunder by and by. **But Mr. *Hobbs* no where tells us, when this *Jus Naturale* was in the world; (sure it was when Apes could speak, and Owls sing.)** They both agree too, that this was a time when there was no Government, or subordination of Men (nor Women, for ought I can find) under one another; before Men had made Government, by giving up their will to any Man, or Court. Mr. *Hobbs* calls this time, *Status mere naturalis*: *Grotius*, *Status qui durare non potuit*. A little before he says, *Quod quisque arripuerat, id ei eripere alter nisi per injuriam non poterat*. Mr. *Hobbs* says, *It was not at all profitable to Men, that they had such a common Right in all things; for the effect of that Right is almost the same, as if there had been no Right at all: For although a Man might say of every thing, This is mine; yet he could not enjoy it because of his Neighbour, who with equal right, and force* (here the Wits begin to disagree) *might pretend the same thing to be his*. Nay, Mr. *Hobbs* goes further, and is so far from supposing it an injury to take any thing from any Man, in the state of pure Nature, that he makes this state *hostile, and that Men may kill one another, and yet do them no injury*. And the reason he gives for it, is, *That injury is done only to him, with whom we have made a Contract; otherwise it is only damage any Man can do to another*.

Here we see these Wits plainly to differ; next bout we shall see them removed as far as *Gades* is from *Ganges*.
...

He almost every where makes a great stir with *populus, & populus vult, & populus mutare potest voluntatem expresse, & tacite*; but never (that I can any where find) defines, what the People is. If he had said the People of *Rome*, or the People of *Athens*, or the People of *Syracuse*, he had said something, though nothing to his purpose. **For when a Man speaks of the People of *Rome*, or *Athens*, &c. he speaks not formally of Men, as born in the *Roman* or *Athenian* territories; but as men who were *civitate donati*, which it may be were not the tenth part of the *Romans*, or *Athenians*; nor were ever the *Roman*, *Athenian*, or *Syracusan* People, free People *jure naturali* (as he saies) but by Civil sanction,** having made themselves so, unjustly usurping dominion over the rest in their Tyranny and Dominions. It cannot be then that *Grotius* means by People, such People as were the *Romans* or *Athenians*: If by People he means any thing in the world, for above this 1700 years, there have not been any such upon the face of the earth (if the Inhabitants of *Switzerland* be not such, who taking advantage from the remiss Government of *Wenceslaus*, having beaten the Archduke *Leopoldus* about the year 1400, made themselves a Democracy, and have almost ever since continued Mercenary Man-killers to the interests of the Pope, the kings of *France* and *Spain*.) ***Grotius* then not meaning such people, as were the *Romans*, &c. I cannot imagine what he should mean by People, unless he means Men, Women, and Children of all ages and conditions, all of them in a parity or equal condition, abstracted from all Laws of God, or Man;** and what a Harmony of Confessions would arise from such a rout, any sober wise Man may judge? Thus much for his *populus*.

Well, but be the People what it will, a beast, or no beast, a thing, or nothing; it is from its will, all right of reigning proceeds, a *cujus voluntate jus regnandi proficiscitur*.
...

Besides, for ought he knows, or can find by *Cicero*, *Tacitus*, *Demosthenes*, *Cleon*, or any tale told by any Poet, the time when *Jacob* lived and died, was then when all things were common and undivided; and how then could *Jacob* disinherit *Ruben*?
...

1. Herein do all my three Adversaries and I differ: They all say, that by Nature all men are in a like equal condition, and out of society, until by voluntary pacts and acts of their will they shall have formed themselves into society. **I say, that Men are by Nature born into society and subordination.** To warrant this, I have not only the consent of the present Age, but the constant practice of all Ages in the world, **from the testimonies of all Prophane and Sacred History;** and that not only since the Flood, but before, if God made Adam an universal Monarch, as well over his wife and children, as over all other creatures; and that that there was a constant succession of the Patriarchs in the First-born, from Seth to Noah.

https://books.google.fi/books?id=3wllAAAAcAAJ&hl=fi&pg=RA2-PA29#v=onepage&q&f=false

It is the silliest thing in the world for men to dream of a Golden age, in which all things were alike and common to all men, and that men lived promiscuously in a parity or equal condition; *and never tell when that time was, or who lived therein: And to say that the Dominion and Subjection now in use, Mans will brought in; and yet never tell who, any where in the world, did ever introduce it.* ***And sure if this commanding and obeying were brought in by wills of men, against that natural right and law wherein God hath made man, it could not possibly continue at all times and in all places of the world, but that somewhere men would return to their own natural liberty.***
...

12. **If, as *Grotius* affirmeth, the state of Man had been *Jure naturali* in a parity or promiscuous condition immediately after the Flood, and that this *Jus naturale* be immutable by God himself;** and that this Dominion which is now in use, the will of Man brought in, and that not the will of the party commanding, but in subjection: **It had been a very vain curse in *Noah* (or rather of God by *Noah*) to have cursed *Chanaan*, and made him *a servant of servants to his brethren*;** or that God should bless both *Sem* and *Japheth*, and make *Chanaan* a servant to them both.

https://www.academia.edu/299389/Rousseaus_Political_Philosophy_Stoic_and_Augustinian_Origins

Grotius was more than a generation younger than Lipsius, writing at a time when the restatement of arguments drawn from ancient Scepticism was becoming extremely popular, and these arguments were being formulated with great skill and devastating results.21 In particular, the exploration of much of the non-European world was nurturing the varieties of moral relativism that often accompany the serious contemplation of cultural difference. **Grotius's distinctive contribution to modern moral philosophy – hailed by the eighteenth-century scholar Jean Barbeyrac as his "breaking the ice" of medieval moral philosophy**22 – was to claim that the natural *instinct* towards self-preservation served to ground a natural *right* of self-preservation, and that this natural right could be used as the foundation of a universally valid, nonrelativistic moral code. **It might not be surprising that he used a Stoic idea to ground a post-Sceptical philosophy, for the Stoics had been the most sustained opponents of the ancient Sceptics and had fashioned their conceptual tools in opposition to Scepticism. (René Descartes would follow suit, using the "clear and distinct idea" – a variant of the Stoics' *phantasia kataleptike* – as his chief epistemological weapon against Sceptical doubt.)** Although Grotius drew carefully on Stoic arguments in fashioning this ethical theory, he stressed that none of the ancient schools would have objected to his emphasis on the right of self-preservation: **"For on this point, the Stoics, the Epicureans and the Peripatetics are in complete agreement, and apparently even the Academics have entertained no doubt."**23
...

In restating the Augustinian doctrine of two antithetical loves in uncompromising terms and deliberately locating Stoic philosophy on the prideful, self-loving, anti-God side of the stark binaries, the Augustinians assembled all the elements that were needed for a powerful attack on the Grotian enterprise, even if they did not make it themselves. **Of all the Augustinian writers, it was Blaise Pascal who drew the connection between Augustinian self-love and Stoic *oikeiosis* most explicitly in a fragment that simply runs, "Thus we are born unjust, for each inclines towards himself."**46 If Grotius became notorious for his claim that his theory would be valid even if we were to grant (*etiam daremus*) that there is no God, it would seem to be the case in light of this objection **that his theory most obviously loses all of its force if there is in fact a God and if He should turn out to be a French Augustinian.**

https://oll.libertyfund.org/page/liberty-matters-knud-haakonssen-pufendorf-on-power-and-liberty#response2

Grotius endorses and remains loyal to a very truncated but nonetheless real part of Aristotelianism; Hobbes identifies the Aristotelian philosophy as part of the "kingdom of darkness".[6] That difference is reflected in turn in several divergences in their political philosophies overall and in their natural-law doctrines in particular. The largest difference probably is the most trite but is nonetheless of great importance: Grotius maintains a version of the Aristotelian claim that "man is by nature a political animal." For Grotius that claim persists in the modified form of "man is the social animal" or the "rationally sociable animal." **On the Aristotelian maxim Grotius accepts in modified form Hobbes comments: "this axiom, though very widely accepted, is nonetheless false; the error proceeds from a superficial view of human nature (*De Cive*, 1.2).**

In place of rational sociality Hobbes places his extraordinarily individualistic doctrine, to which both Grotius and Pufendorf object. Natural law is accordingly quite differently derived in the two thinkers. For Grotius human beings are by nature sociable beings and the natural law is what conduces to social life. As the law of human nature, it contains all the necessary marks of law, including especially obligatoriness. **Compared to the understanding of natural law in the Thomistic tradition, this is a narrow view, limited as it is to society and its requirements. But compared to Hobbes it is very robust.** Among other important

implications of Grotius's doctrine is the relation between right and law so far as these come to be distinguished in his theory. **Law and therefore duty is the primary concept, and derivative from that is right (as the claim an individual may raise under law).**
…

According to Hobbes right is genuinely natural and exists in "a state of mere nature"; it serves as the basis from which laws, even the laws of nature, are derived. But contrary to Grotius, **Hobbes describes the laws of nature as "but conclusions, or theorems concerning what conduceth to the conservation and defence of themselves,"** i.e., conduces to that to which, under the right of nature, human beings have a right. The laws of nature make men more sociable, but they are in the service of the individualistic "conservation and defence of themselves" (*Leviathan*, ch. 15 end). He has also said that these "dictates of reason" which he has called laws of nature are improperly so called. They are but "conclusions or theorems." His point is that they are neither natural nor law. **They are no more natural than, e.g., genetically modified food, which serves a human natural need but for all that is not thereby natural.**

http://leostrausstranscripts.uchicago.edu/navigate/10/15/

Grotius of course did not know modern natural right because it came in after his time. That is not quite correct—someone reminded me of the fact that Grotius had read Hobbes's *De cive*. Can you find the passage and read it?

Student: This is in a letter to his brother dated April 11, 1643.

LS: *De cive* appeared in 1642.

Student: He writes:

> "My brother, our interpretations of prophetic passages in the reading of the Bible we will affirm for the time being. Meanwhile, I ask friends to suspend their judgment. **I have seen the book, *On the Citizen*, and those things are pleasing which the author speaks in behalf of kings.** The fundamentals, however, on which he constructs his thoughts I cannot accept. **He argues that war exists by nature among all men and holds other such views not harmonious with our own, for he believes in the duty of the private citizen to follow the religion accepted in the country, if not by assent, at least by compliance.** These and other such things I cannot accept. I do not consider the book to be venal, but prying. I will be glad if the cause of the king is thus defended, as it ought to be, on which subject I have written some appropriate remarks."

…

Grotius was how old at that time? In the fifties at least, **and a very big shot, what they call now a pundit.** And he reads this book by a completely unknown man. Was *De Cive* anonymously published? I do not know at the moment. And he reads it and then he looks at this young man who was already also fifty and sees [a teaching that is] in some respects surely quite sound, but he goes a bit too far in his giving power to the secular authorities regarding the church. **It is a bit too far right in this respect, if we apply this simple schema. And then of course the starting point: fear and not benevolence is the foundation of all lasting societies.** That's quite terrible and unacceptable, but since it leads up to such a pleasant view as favorable to kings, he won't take it too seriously. **It is like the *National Review* not minding atheists in the case of Ayn Rand so much because she comes up on the side of capitalism.**

https://books.google.fi/books?id=6wweBQAAQBAJ&lpg=PP1&hl=fi&pg=PT100#v=onepage&q&f=false

If the publication of *De Cive* had begun to drive a wedge between Hobbes and his Anglican Royalist friends on the basis of his religious beliefs, the reception of his work between 1648 and the appearance of *Leviathan* in the spring of 1651, eventually served to confirm the worst fears of those, like Bramhall and Clarendon, who had seen in Hobbes's contract theory the potential for a dangerously conditional account of allegiance. It is, however, important to stress that it was far from evident to other early readers of the second edition of *De Cive* that Hobbes's theory was subversive. Indeed, the earliest political discussion on his work tended to revolve around what was perceived to be his excessive Royalism. Ironically, it would be this identification that would ultimately encourage republicans to trumpet the ambivalence of his political theory as they gleefully deployed the theory of a notorious Royalist to undermine Royalism itself. As historians have now come to recognise, one certainly didn't need to have read Hobbes to talk about issues of allegiance in terms of natural jurisprudence. **In July 1648, Anthony Ascham produced the first edition of his celebrated *Discourse*,**179 **the first major treatment of what has become known as 'de factoism,' or the doctrine that obedience is owed to those with *de facto* authority, even if their rule is not *de jure*. Ascham's suggestion that obedience is owed to those that can protect us, and correspondingly is not owed in situations where such protection is at an end, sounds superficially Hobbesian, but as several commentators have noted, the analytical framework within which Ascham makes these claims seems to be derived from Grotius,** with un-Hobbesian concessions to accounts of right reason and

God's providence. There is no evidence that at this stage Ascham had either read *De Cive* or the *Elements,*180 or that he needed to have read him in order to come up with this sort of conclusion. Indeed, when *De Cive* did enter discussion, it was to be the object of criticism for its absolutism.

The occasion for this debate was a pamphlet published by Hammond in mid-January 1649, which rehearsed the Royalist argument that once individuals had parted with their natural liberty they were indissolubly bound to obedience to a sovereign empowered by God with a right of life and death. **In the wake of the regicide, Hammond's claims were attacked by supporters of the new regime.** In May a writer with the pseudonym Eutactus Philodemius181 published a pamphlet called *The original and end of civil power*, in which he rejected Hammond's one-way account of rights transfer and defended the idea of popular sovereignty. Part of the discussion focused on property rights, considered by Eutactus to be natural rights that should not be violated by arbitrary authorities. **Hobbes was accused of committing 'an intellectual rape upon nature' for his suggestion that property rights are grounded in contracts rather than nature itself, a position that Eutactus seems to identify with the absolutists he opposed.**182

…

In citing both Grotius and Hobbes on the conditional character of obedience, Ascham may well have been deliberately mischievous because he goes on to attack both authors for their willingness to 'argue severall ways for obliging people to one perpetuall and standing Allegiance.'186 **Ascham's earlier references to *De Cive* fit into a broader strategy to convict both Hobbes and Grotius of fundamental inconsistencies in their absolutist theories. As they had both admitted, *de facto* obligations *are* at an end when conquest has occurred or sovereignty has been abdicated.**

…

Hammond had used Grotius to support the idea of irrevocable transfer; Hobbes's *De Cive* appeared to fall into the same category. **Ascham had shown that they could be refuted on their own premises** and even used to support a *de facto* theory like his own.

https://books.google.fi/books?id=vx75FeIRcRYC&lpg=PP1&hl=fi&pg=PR18#v=onepage&q&f=false

Moreover, **if the imposition premise is a defining feature of a school of natural law, then Grotius is not a member, yet Pufendorf, Barbeyrac and their modern commentators take him to be the founder.** Grotius wrote *On the laws of war and peace* (1625) prior to the publications of the Mersenne circle. In addition, **he advances a dispositional account of human agency and a form of natural law realism.**

https://books.google.fi/books?id=1PnZ_FuYLnsC&lpg=PP1&hl=fi&pg=PA52#v=onepage&q&f=false

Then [Pufendorf] addresses at length the merits and failings of the two methodologies most likely to produce a science of natural law, the mathematical method of Weigel, and the sociological approach of Grotius.

> In my view there are two routes presented here, and it may be understood after following one of these who has constituted philosophical schools correctly: **the followers of the first route are above all mathematicians, who love to derive a huge body of conclusions from a few first principles;** the second way is trodden by those eager to investigate natural phenomena so that through observation and comparison of many individual instances they may finally arrive at some general statement.43

He launches a vigorous attack against the Grotian technique of observing the customs and laws of selected countries in order to extract eternal principles of natural law. **This approach was open to all sorts of sceptical objections.** First, the technique of amassing instances could easily be ridiculed by the citation of counter-examples outside the experience of the observer: 'You will find few who can boast of knowing the number and names of all the peoples in the world: it would be beyond the powers of one man to assemble or comprehend all their laws and institutions.'44 **The method could also be impugned on grounds of cultural imperialism, for the positive laws of European countries are inevitable accorded importance at the expense of the legislative product of oriental countries: 'From this one may rightly infer that many laws which we consider to be handed down to us through nature, are not in fact strictly essential to human society.'**45 Grotius' method is not without value as a useful contribution to the study of *Jus Gentium*; but as a method for extracting the essence of natural law it must be firmly rejected:

> It is not, as some may say, that we should not be concerned about barbarian peoples. It is sufficient for our purpose to consider those conventions observed by the more moral peoples: from comparison of these some complete system of the law of nations can be compiled. But apart from the fact that this is a huge undertaking, **who can clearly judge which race should be categorised among the barbarian and which among the civilised peoples?**46

…

Böcler's contention was simply that Pufendorf's claim to be the successor to Grotius was vitiated by his reluctance to examine the process of historical reference that had been a crucial means to the creation of Grotius' book. If he had done this he would not have made the mistake of claiming priority for a concept of the fundament of natural law which was in fact Cicero's – an antecedent recognised and integrated by Grotius:

> **He writes that in his undertaking there is no help to be had from good writers, a view one might marvel at, if one does not recognise how massively and variously his talent is dependent on the best reasonings of Grotian argument … If the *socialitas* of human nature is Pufendorf's first principle, then he ought to know first of all that it is not the fruit of his own talent, but that Cicero in his *de officiis* and others, even before Theognis was known, sought to extract all the precepts of law and duty from this source.**59

Böcler was in a position to dogmatise on this issue because he had spent so much of his career using his vast erudition in ancient philosophy to track down unacknowledged references in Grotius: his 1663 edition of book one of *De Jure Belli* was essentially a compilation of these ascriptions, and in his preface he insists on Cicero's importance in the sequence of disguised indebtedness he had unearthed:

> The whole glory of the Latin philosophers is represented in Cicero, whose two works (the *de legibus* and especially the *de officiis*) can speak volumes on this subject … Grotius is indebted at many points to these books, even when he does not show it.60

In his commentary on section ix of Grotius' 'Prolegomena' to *De Jure Belli* (the section that identifies the basis of natural law in the Stoic concept of *oikeiosis*), he is quite explicit in attributing the derivation of Grotius' doctrine to sources in antiquity. It is this perception which provides the context for his exasperation at Pufendorf's alleged innovations:

> **But Grotius' view on the origin of natural law, which he sets out in his Prolegomena, should not be broken up or mutilated.** For he says that natural law arises from a noble desire for society, and through the judgement of right reason indicating conformity or disharmony with human nature, and even from divine will, which is not only part of nature, but also (as Christians know very well) renewed in the Decalogue and revealed clearly by writings. Many of these points stem from Cicero, **and Cicero took them from the Stoics above all, although Aristotle and Plato were of a like mind.**61

https://books.google.fi/books?id=1PnZ_FuYLnsC&lpg=PP1&hl=fi&pg=PA84#v=onepage&q&f=false

In this respect Pufendorf was entirely correct to identify Grotius and Hobbes as his crucial predecessors, **since both had forced their opponents to fight them on new ground of their own choosing: Grotius, by insisting that the source of natural law must be located in a principle to which all nations could assent to irrespective of religious affiliation; and Hobbes, by his contention that the individual is capable of creating his own moral world from his personal psychological calculations.**
…

It is indicative of how far orthodox natural law was forced back on to the defensive that Leibniz never systematised his thoughts on natural law, restricting himself to brief, if acute, observations on the defects of Hobbes and Grotius. Likewise, it is revealing that for all his scriptural ingenuity, Alberti's concept of *status integritatis* essentially conceded his enemy's case: for, by trying to prove the survival into the modern world of a pre-lapsarian morality, he effectively admitted that the argument was to be resolved not in the studies of theology and metaphysics, but in the empirical field of the actual historical behaviour of human societies as recorded in the Bible. **While it is very easy to talk of 'paradigm shifts' in the history of ideas, in this instance there seems no other appropriate label to describe the innovative formulations of the science of natural law that Pufendorf inherited and brought to final form.**
…

Pufendorf thus combines the central insights of Grotius and Hobbes within the same theory of natural law, a fact which Überweg has remarked upon with precision:

> His interpretation of natural law is essentially defined in relation to Grotius and Hobbes, **in that he takes over from the former the principle of sociability, from the latter the interest of the individual, and unites them in the principle that sociability lies in the interest of every individual.**70

https://books.google.fi/books?id=Mau9wgEACAAJ&lpg=PP1&hl=fi&pg=PA108#v=onepage&q&f=false

This Grotian doctrine of an underlying general legal truth that pre-dates sovereignty and the state was to become a powerful element in the Brothers De La Court's, and Spinoza's, breaking of Hobbesian doctrine of sovereignty and their replacing it with the irreversible "carry-over" of basic democratic rights and freedoms into the state.32

> https://books.google.fi/books?id=Mau9wgEACAAJ&lpg=PP1&hl=fi&pg=PA51#v=onepage&q&f=false

> **In places, Tindal cited Grotius; but this struck critics as just another ploy rather than an authentic derivation (though Grotius *was* actually a significant source for republican "carry over" of the basic freedoms from the state of nature into civil society).**61

https://www.academia.edu/19876318/Stoicism_on_the_Threshold_of_the_Scottish_Enlightenment

Against those like Richard Tuck who would read Grotius as offering a "minimal" ethic—possibly even an "Epicurean" ethic rooted in self-interest or minimal sociability17—**it seems to me we need to take very seriously not only those bits of the text where Grotius says that he's engaging with Cicero and the Stoics, but also the idea**

that the distinctive elements of his theory—thin sociability and the fetishisation of actually-existing property rights—are precisely what you get when you work closely with Cicero on this score.

And it is in the face of Hobbes's provocative publications—*De Cive* and *Leviathan*—that his critics remind themselves of this Stoic foundation; **Tim Hochstrasser has explored the correspondence in Pufendorf's circle, for example, as they excavated the Stoic foundations of the Grotian project while considering the best way to reply to Hobbes;**18 and Jon Parkin's new book on the reception of Hobbes outlines the way in which Hobbes became labeled as an Epicurean—and I'll quote at length here from the end of chapter two, because he does such a good job of covering the relevant ground in a thoroughly efficient manner. Here's Parkin:

> **From the late 1650s onwards Hobbes would be cast as a disreputable imitator of classical and more modern Continental Epicureanism.** Given the difficulty of establishing exactly what Hobbes was in philosophical terms this characterisation supplied a simple answer, 'deciding' his paradoxical arguments in favour of traditions with which contemporaries were more familiar. **Hobbes's complex argument would be regularly reduced to the caricatured anti-providential hedonism with which Epicureanism was commonly associated.** This identification was also useful to Hobbes's critics because of the battery of anti-Epicurean arguments available in Cicero's works, particularly *De natura deorum* and *De finibus*. If Hobbes was really an Epicurean, then all one needed to do was to quote Cicero's anti-Epicurean characters against *Leviathan*. **This classical mode of argument also carried with it additional benefits for those who might be worried about Hobbes's proximity to their own discourse;** by redefining Hobbes as an Epicurean it was possible to put some clear classical water between *Leviathan* and one's own argument. For these reasons, the presentation of Hobbes as a disreputable Epicurean became a recurrent feature of anti-Hobbes works. Robert Sharrock's suggestively titled *De officiis* (1660) would attack Hobbes using a large dose of Cicero. Charles Wolseley in 1669 would redefine Hobbes almost exclusively as an Epicurean atheist, Richard Cumberland's 1672 refutation of Hobbes would rely heavily upon a Ciceronian stoic critique of Hobbes's Epicureanism, and right at the end of the century Richard Bentley's celebrated Boyle Lectures of 1692 would deploy exclusively anti-Epicurean arguments against Hobbes. **In all of these cases, the authors had good reason to ensure that Hobbes's complexity and relationship to their own position was flattened out in a blanketing use of the anti-Epicurean critique.**19

Thats all from Parkin; but we can immediately see how the renewed anti-Epicurean polemic makes a fairly bland, generic or Ciceronian Stoicism look quite good, as theistic (rather than atheistic), political (rather than apolitical), sociable (rather than unsociable), providential (rather than atoms-in-a-void), and so on; **an ideology supported by the continuing presence of Cicero's Stoic-inflected works like *De Officiis* on all the educational curricula, and the rise to influence of anti-Calvinist Latitudinarian theology and theologians in the C. of E., who do seem to have been rather attracted to what I think of as this soft Roman Stoicism.**20

https://en.wikisource.org/wiki/Some_Thoughts_Concerning_Education/When_Grammar_should_be_taught%3F#Part_I

Section 186. **When he has pretty well digested Tully's Offices, and added to it, Puffendorf de Officio Hominis & Civis, it may be seasonable to set him upon Grotius de Jure Belli & Pacis, or, which perhaps is the better of the two, Puffendorf de Jure naturali & Gentium;** wherein he will be instructed in the natural rights of men, and the original and foundations of society, and the duties resulting from thence. This general part of civil-law and history, are studies which a gentleman should not barely touch at, but constantly dwell upon, and never have done with.

https://en.wikipedia.org/wiki/James_Wilson_(founding_father)

One of the most prominent lawyers of his time, Wilson was the most learned of the Framers of the Constitution.[19] He was one of the most prolific speakers at the Constitutional Convention, with James Madison's notes indicating that Wilson spoke 168 times, second only in number to Gouverneur Morris.[20][21]
...

Wilson became the first professor of law at the College of Philadelphia in 1790 – only the second at any academic institution in the United States.[67] Wilson mostly ignored the practical matters of legal training; like many of his educated contemporaries, he viewed the academic study of law as a branch of a general cultured education, rather than solely as a prelude to a profession.

https://oll.libertyfund.org/title/hall-collected-works-of-james-wilson-vol-1#lf4140_head_095

While men were few, and the supplies of every thing were abundant, it is probable that many things were possessed and used in common. With regard to the possession and use of some things, however, this could never be strictly the case. In the fruit plucked or gathered by one for his subsistence; in the spot which he occupied for his shelter or repose; in the bow which he has made for ensuring his safety, or procuring his subsistence; in the skin which he has obtained by his skill and swiftness in the chace, and which covers his body from the inclemency of the weather, **he gains a high degree of exclusive right; and of this right he cannot be dispossessed without a proportioned degree of injustice.** "A publick theatre," says Cicero,e with his usual luminous propriety, "is common to all the citizens; but the seat which each occupies may, during the entertainment, be denominated his own." **But, in the early period of society, concerning which we now speak, things, in general, would be viewed as belonging equally to all;** in other words, to those who should first have occasion to use or possess them.

In this situation, we have reason to believe, society continued after the deluge, while "the whole earth was of one language and of one speech."f On the confusion of languages, and the dispersion of families, when mankind dwelt no longer in "the same plain,"g this general society was dissolved, and no one subject of property could, in this new situation, be reasonably deemed as belonging equally to all. The different families and associations, however, who diverged from the common centre of emigration, would still consider many things, and particularly the country in which they commenced their new settlements, as common to each family or association.

> f. Gen. xi. 1. Erant omnia communia et indivisa omnibus, veluti unum cunctis patrimonium esset. 1 Just. l. 43. c. 1.

…

Even after agriculture became known and was practised in some imperfect degree, still the land continued to be the common property of the association. **Cecrops, who emigrated from civilized Egypt, was the first to teach the wandering hunters or shepherds of Attica to unite in villages of husbandmen. After their union, their agricultural labours were carried on in common; and the soil, together with its immediate productions, corn, and wine, and oil, were regarded as a common property.i**

…

But agriculture, and the industry attendant on agriculture, introduced gradually a new scene of things, and a new train of sentiments. This first of arts was not unknown to the restorer of mankind. Noah, after the deluge, began to be a husbandman, and he planted a vineyard.s **Before the confusion of languages, the whole human race dwelt in the plain of Shinar.** In that plain and its neighbourhood, the knowledge of agriculture was never entirely lost. Among the Babylonians, it is traced to the most early periods of their history.

…

When agriculture was once introduced, and its utility was known and experienced; it became natural to search and adopt the measures necessary for distinguishing possessions permanently; that every one who laboured and who excelled in this fundamental profession, might be secured in enjoying the fruits of his labours and his improvements.

https://www.marxists.org/reference/subject/philosophy/works/en/decive4.htm

IV. **What appertains to the first law of abolishing the community of all things, or concerning the introduction of *meum* & *tuum*,** We perceive in the first place how great an adversary this same Community is to Peace, by those words of Abraham to Lot, Gen. xiii. 8, 9. *Let there be no strife I Pray thee, between thee and me, and between thy heard-men, and my heard-men, for we be brethren. Is not the whole land before thee? Separate thy selfe I Pray thee from me.* **And all those places of Scripture by which we are forbidden to trespasse upon our neighbours, as, *Thou shalt not kill, thou shalt not commit adultery, thou shalt not steal*, &c. doe confirm the law of distinction between *Mine*, and *Thine*. for they suppose *the right of all men to all things* to be taken away.**

https://archive.org/details/10booksthatscrew0000wike/page/34/mode/2up?view=theater

Hobbes thought so, and his great innovation (or one of them) **was to assume that human beings at their worst gives us a horrid but accurate glimpse of what they really are once the veneer of civilization is ripped away.** Having witnessed the savagery of men during war – he wrote *Leviathan* just after the Thirty

Years' War (1618-1648) and during the English civil wars that occurred in the mid-seventeenth century – **Hobbes concluded that war was natural and peace unnatural, that butchery and barbarism are innate while charity and civility are entirely artificial,** that the real garden of nature is a killing field and the bucolic Garden of Eden a pitiful pipe dream.

We must dwell upon this last point. **It is characteristic of the authors we're examining that, as they are nearly all atheists, they passionately desired to replace the biblical account of human origins with one of their own contriving.** In fact, in many respects all of modernity is an attempt to replace the biblical account of Eden with an entirely new story (just as it is an attempt to replace a heavenly kingdom with an earthly utopia). For our purposes, it doesn't matter whether you think the Edenic account is a fable, because the really important thing is to see that one story about human nature and human origins is being replaced by another. **Hobbes's state of nature is a new revelation, a counter-Genesis account meant to reveal what we really were at the dawn of humanity and hence what, deep down, we truly are now.** But it is entirely a fiction.

Please drink in these words, swirl them around in your soul, meditate upon them: **Hobbes's state of nature is entirely a fiction. A myth. A fable. A tall tale. An utterly imaginary state.** Neither Hobbes nor anyone else living in the seventeenth century could have had a clue what human origins were really like. Archaeology wasn't even in its infancy. But even more obvious, if human beings had been like Hobbesian men and women at the dawn of humanity, the nightfall of humanity would quickly have descended through self-destruction. How could families ever gave begun and grown into tribes if men were little more than bloodthirsty killers and wandering rapists, and women became cannibals soon after they became mothers or simply bashed in the heads of their offspring because they found them inconvenient?

Sane critics of Hobbes pointed out almost immediately upon *Leviathan*'s printing that his state of nature was a complete fiction. So if it was seen as a complete fiction then, and we can see it as one now, why go on about it? **Because it is an enduring fiction. It is becoming, more and more, the myth by which we live.** *Leviathan* has become our Bible, and Hobbes's state of nature our Edenic myth.

https://books.google.fi/books?id=ZXxbAAAAcAAJ&hl=fi&pg=PA97#v=onepage&q&f=false

Tacitus says we ought to submit to what is present, and should wish for good Princes, but whatsoever they are endure them, and *Machiavel* terms this a Golden Sentence, adding, that whosoever do's otherwise, Ruins both himself and Country: Certain it is, the condition of no Nation was ever bettered by a Civil War, **for when the People and the Government draw the Sword against each other, all former Compacts and Agreements for securing of Liberty and Property are dissolved, and become void; for flying to Arms is a state of War, which is the meer state of Nature of Men out of Community, where all have an equal right to all things, and I shall enjoy my Life, my Substance, or what is dear to me, no longer then he that has more Cunning, or is Stronger than I, will give me leave;** for Natural Conscience is not a sufficient Curb to the violent Passions of Men out of the Laws of Society. And the few that shall survive the Calamities and Devastations that Ambition or Revenge shall make in Civil Dissension, must ever after submit to the Arbitrary Power of the Conquering Party.

https://discovery.ucl.ac.uk/id/eprint/1317765/1/283910.pdf

From the earliest accounts of explorers to North America, Locke would have found descriptions of a 'state of nature'. **Sir Walter Raleigh, the first Englishman to attempt colonizing New England, wrote extensively about the peoples of America and his travels there.** In 'A Discourse of the Original and Fundamental Cause of Natural, Arbitrary, Necessary and Unnatural War', he introduces the 'state of nature':

> The mere state of nature, of men out of community, where all have an equal right to all things; and I shall enjoy my life, my substance, or what is dear to me, no longer than he that has more cunning or is stronger than I, will give me leave: for natural conscience is not a sufficient curb to the violent passions of men out of the laws of society.

It should be noted that Raleigh bases his state of nature on his observations of American Indians. He claims a fundamental freedom and equality in this natural state. **Moreover, even though natural law exists, man will still, eventually, succumb to the greater forces of passion within himself. This is similar to Locke's conception of natural man.** Raleigh goes on to say:

> A people leaving the state of nature have entered into a community, and made laws, as they justly may to preserve that community, which laws are to be obeyed under the penalty of displeasing God himself; yet the administrators of those laws, being visibly and incurably defective in preserving the whole may be removed; for ... where the people have no such right, they have lost all liberty.12

Here we see that Raleigh's natural men, like Locke's, enter into a community and thereby form laws to insure its preservation. **Moreover, Raleigh allows for a dissolution of government where the**

'administrators' can no longer preserve the whole. The people's right to dissolve such governments is clearly based on their more fundamental right of natural 'liberty' and is reflected, in part, in Locke's important chapter in the Second Treatise on the dissolution of government.

https://oll.libertyfund.org/title/smith-leviathan-1909-ed#lf0161_label_094

It may peradventure be thought, there was never such a time, nor condition of warre as this; and I believe it was never generally so, over all the world: <u>but there are many places, where they live so now.</u> For the savage people in many places of *America*, except the government of small Families, the concord whereof dependeth on naturall lust, have no government at all; and live at this day in that brutish manner, as I said before.

> https://archive.org/details/winningofwestvol01roos/page/n137/mode/2up?view=theater
>
> Again, the loose governmental system of the Indians made it as difficult to secure a permanent peace with them as it was to negotiate the purchase of the lands. **The sachem, or hereditary peace chief, and the elective war chief, who wielded only the influence that he could secure by his personal prowess and his tact, were equally unable to control all of their tribesmen, and were powerless with their confederated nations.** If peace was made with the Shawnees, the war was continued by the Miamis; if peace was made with the latter, nevertheless perhaps one small band was dissatisfied, and continued the contest on its own account; and even if all the recognized bands were dealt with, the parties of renegades or outlaws had to be considered; **and in the last resort <u>the full recognition accorded by the Indians to the right of private warfare,</u> made it possible for any individual warrior who possessed any influence to go on raiding and murdering unchecked.** Every tribe, every sub-tribe, every band of a dozen souls ruled over by a petty chief, almost every individual warrior of the least importance, had to be met and pacified.

...

But though there had never been any time, wherein particular men were in a condition of warre one against another; yet in all times, Kings, and Persons of Soveraigne authority, because of their Independency, are in continuall jealousies, and in the state and posture of Gladiators; having their weapons pointing, and their eyes fixed on one another; that is, their Forts, Garrisons, and Guns upon the Frontiers of their Kingdomes; and continuall Spyes upon their neighbours; which is a posture of War.

https://brill.com/display/book/9789004464728/BP000028.xml

The Legalist view of the world, of human nature, power and how to obtain it, was *radically* different from the Confucian and Taoist perspectives which focused on order and *harmony* in terms of a historic state which had been violated and needed to be restored. Despite the significant differences between Taoism and Confucianism, they shared evident points of convergence. For Confucius it was a matter of restoring the ancient principles of government to ensure unity between the emperor, the princes and the people, like those which had characterised three glorious dynasties of the past: Xia, Shang and Chou. According to the Taoists, harmony had been compromised because the rulers had forsaken the Tao, the Way, which they should have pursued in order to govern the empire. Culture, to put it in modern terms, had sought to impose itself upon nature, and the result was social, cultural and political degeneration. *Harmony* was to be found only in a return to the principle of non-action, which meant allowing the Tao to act according to its own laws. **On the contrary, <u>the Legalist School, believed that order and harmony were an exclusively human *creation*.</u> The greatest exponents of the School – Shen Tao, the Lord of Shang and Han Fei Tzu – entertained no illusions about ancient times. <u>They believed that a golden age had never existed and, that if there had been a “decent” society, this had been due to *ecological* conditions when there were few people and many resources.</u>** Furthermore, they held that the nature of human beings was intrinsically evil and that only control of the bad could lead to order and prosperity (*The Lord of Shang*, 1,4: 200).

>
> Pangu was said to be the creation god in Chinese mythology. He was a giant sleeping within an egg of chaos. As he awoke, he stood up and divided the sky and the earth. Pangu then died after standing up, and his body turned into rivers, mountains, plants, animals, and everything else in the world, among which is a powerful being known as Huaxu. Huaxu gave birth to a twin brother and sister, Fuxi and Nüwa. **Fuxi and Nüwa are said to be creatures that have faces of human and bodies of snakes.**[3]
>
> Fuxi was known as the "original human", and he was said to have been born in the lower-middle reaches of the Yellow River in a place called Chengji (possibly modern Lantian, Shaanxi province, or Tianshui, Gansu province).[4]
>
> **A possible historical interpretation of the myth is that Huaxu (Fuxi's mother) was a leader during the matriarchal society (c. 2,600 BC) as early Chinese developed language skill while Fuxi and Nüwa were leaders in the early patriarchal society (c. 2,600 BC) while Chinese began the marriage rituals.**[5] However, the "matriarchal society" is an invention of Communist history, as

Marxist theory requires that societies begin as matriarchal, and there is no actual evidence that any such time period ever actually existed in China.
…

On one of the columns of the Fuxi Temple in Gansu Province, the following couplet describes Fuxi's importance: **"Among the three primogenitors of Huaxia civilization, Fu Xi in Huaiyang Country ranks first."**[4] During the time of his predecessor Nüwa, society was matriarchal.

> **In the beginning there was as yet no moral or social order. Men knew their mothers only, not their fathers. When hungry, they searched for food; when satisfied, they threw away the remnants. They devoured their food hide and hair, drank the blood, and clad themselves in skins and rushes.** Then came Fu Xi and looked upward and contemplated the images in the heavens, and looked downward and contemplated the occurrences on earth. **He united man and wife, regulated the five stages of change, and laid down the laws of humanity. He devised the eight trigrams, in order to gain mastery over the world.**—*Ban Gu, Bai Hu Tongyi*[6]

Fuxi taught his subjects to cook, to fish with nets, and to hunt with weapons made of bone, wood, or bamboo. **He instituted marriage and offered the first open-air sacrifices to heaven.**

https://en.wikipedia.org/wiki/Three_Sovereigns_and_Five_Emperors

The Emperors were asserted as ancestors of the Xia, Shang, and Zhou dynasties.[7] The following appear in different groupings of the Three Sovereigns: Fuxi, Nüwa, Shennong, Suiren, Zhurong, Gong Gong, Heavenly Sovereign, Earthly Sovereign, Tai Sovereign, Human Sovereign, and even the Yellow Emperor.

The following appear in different groupings of the Five Emperors: Fuxi (Taihao), Yan Emperor, Yellow Emperor, Shaohao, Zhuanxu, Emperor Ku, Emperor Yao, Emperor Shun.

The archimage, who took this for an order, turned aside
Toward the village and informed the folk: –
"This verdant spot – all fruitage, men, and cattle –
Hath greatly pleased Bahrám, the king of kings,
Who hath a new design respecting it.
He raiseth all of you to noble rank
To turn this pleasant village to a city.
Here, lord and hireling, ye shall be all equal.
Men, women, children, ye shall be all chiefs,
Each of you be the master of the village."

Glad shouts rose from that prosperous settlement
Because the people were all lords alike.
Thenceforth, man's rede or woman's, 'twas all one,
And slave and hireling were their master's peers.
The village-youths, no longer checked by awe,
Cut off their elders' heads, then fell upon
Each other and, where roads were not, shed blood.
At that to-do folk fled incontinent.
The helpless aged remained, but there remained not
The implements of culture, goods, and crops.
The settlement had ruin in its face,
The trees were withered and the streams ran dry,
The land and houses were all desolate,
And shunned of man and beast.

https://www.researchgate.net/publication/274867081_The_Origins_of_Hobbes%27s_State_of_Nature

Hobbes uses the expression state of nature to mean a state of natural liberty, without religious connotations. His "science" would rely on natural reason alone. **His contemporaries confused his concept with the post-lapsarian state,**7 **but the origin of its account of primitive history is pagan.**
…

The theory of decline first appeared in ancient Greece as the myth of the four Ages of Man (Gold, Silver, Bronze and Iron), later simplified to the two Ages of Saturn and Jupiter (the primitive age and today).10 **The theory of progress first rose to prominence with the Sophists in the fifth century B.C.**11

The best known ancient theorists of historical cycles were Plato and Polybius; both applied them to explain the rotation of forms of government.
…

Hobbes employs all three theories. ***De Cive*** **eulogizes the dutiful obedience of the world's first subjects as the Golden Age,** while *Behemoth* uses the cyclical theory to describe the shifts in English sovereignty between the Long Parliament and the Restoration.13 **But it was the theory of progress, with the benefits of the advance of civilization, that provided the historical framework of the state of nature.**

>
> **I suppose those antients foresaw this, who rather chose to have the Science of justice wrapt up in fables, than openly exposed to disputations:** for before such questions began to be moved, princes did not sue for, but already exercised the supreme power. They kept their Empire entire, not by arguments, but by punishing the wicked, and protecting the good; likewise Subjects did not measure what was just by the sayings and judgements of private men, but by the Lawes of the Realme; nor were they kept in peace by disputations, but by power and authority: **yea they reverenced the supreme power, whether residing in one man or in a councell, as a certain visible divinity;** therefore they little used as in our dayes, to joyn themselves with ambitious, and hellish spirits, to the utter ruine of their State; **for they could not entertain so strange a phansie as not to desire the preservation of that by which they were preserved; in truth, the simplicity of those times was not yet capable of so learned a piece of folly. Wherefore it was peace, and a golden age, which ended not before that Saturn being expelled, it was taught lawfull to take up arms against Kings.**

…

It has been suggested that Thucydides' account of early Greece was the inspiration for the state of nature. But that account begins with towns without walls, not with scattered individuals.16 Hobbes would have encountered the narrative of scattered individuals in three writers he knew well: Diodorus Siculus, Cicero and Horace. **Diodorus Siculus, whom Hobbes calls "the greatest antiquary perhaps that euer was,"**17 says that the "first men" led "an undisciplined and brutish life, each going off to feed by himself . ..." They were "miserable" because nothing "useful" had been "discovered."18 They had no language, no clothing, no shelter and no cultivation, and often died from cold, starvation and wild predators. **According to Cicero, one of Hobbes's favorite authors whose extant works were available to him in the Hardwick library, men lived "scattered and dispersed" and "had no other possessions" but what "they had been able either to seize by strength and violence, or keep at the cost of slaughter and wounds."**19

> http://www.tertullian.org/fathers/nikiu2_chronicle.htm
>
> 1. And after the deluge in Attica, the sovereignty passed into the hands of the Athenians. 2. And there ruled there a man named Elwates[56] and he established the (common) meal as a legal institution. 3. **And he was also the first to ordain that all men should take as their wives young virgins and name them spouses:** and that they should dig a fountain in a hidden place in order to cause milk to spring (from the earth) in abundance as a visible stream. 4. **Now before his reign the women of Attica and the Athenians lived in unclean intercourse and male was joined to male. And they were like beasts: each lusted (after the other) and none had a woman to himself; but they ravished with wicked violence as we have already recounted.** 5. **And they knew not their own offspring, either their male or female. And who could have known, seeing that none of them had fathers and all whom they bare[57] were begotten by all. Owing to their promiscuous intercourse they could not know whether they had male or female offspring. And they were all pleased with this unclean mode of living.**

…

An early example of the idea can be found in Plutarch, who attributes it to the Epicurean Colotes of Lampsacus: **"The men who appointed laws and usages and established the government of cities by kings and magistrates brought human life into a state of great security and peace and delivered it from turmoil. But if anyone takes all this away, we shall live a life of brutes, and anyone who chances upon another will all but devour him."**27 **Plutarch objected that people educated in philosophy can be virtuous even without laws but Hobbes agreed with Colotes.**
…

Hobbes's account of total anarchy seems to depend in part on Thucydides' account of the ***stasis*** **or civil war in Corcyra.** Moral values were subverted, agreements reconciling groups lasted only as long as they could not take revenge, all social bonds were loosened, and "it was far the best course [for people] to stand diffidently against each other with their thoughts in battle array. ..."30 "All forms of death were seen," Thucydides reports, even filicide.31
…

Good and evil are subjective and relative to person, place and time. "Nor is there any such thing as absolute goodness," he wrote in an early draft of ***The Elements of Law*****, "considered**

without relation."37 **He seems to have owed this position to Pyrrhonism, an ancient philosophy which held that no truth can be known. The Parisian intellectual circles which revolved around Marin Mersenne, which Hobbes became part of in the 1630s, were a hotbed of Pyrrhonist sceptical debate. Though Hobbes used Pyrrhonist arguments, however, he was not a sceptic in the Pyrrhonist sense of suspending philosophical judgment. Relativity is not scepticism because the agent can know what is right or wrong for himself.**38

Sextus attacked traditional theories of absolute good and evil by arguing that they are merely psychological phenomena which have nothing to do with external objects. Good is just what we are attracted to and bad what repels us. Montaigne, following Sextus, used differences in laws and customs in different places and times to show that there are no absolute good and evil by nature. "Each soul is Queen in her own state," he wrote. "So let us no longer seek excuses from the external qualities of anything: the responsibility lies within ourselves. Our good or our bad depends on us alone."39 **For Montaigne, Brazilian cannibals validated the theory of moral relativity by proving that good and evil represent just the diverse customs and beliefs of local peoples.**40 In pointing out the moral diversity of ancient pirates and Germans Hobbes was implicitly tapping into the Pyrrhonist argument.

Hobbes employed both types of argument – good and evil as psychological phenomena, and differences of laws and customs – to help explain why the subjective values of the state of nature must result in a state of war. **A classic sceptical argument for the impossibility of knowledge based on sense perception was that different people sensed the same thing as pleasant and unpleasant.**

> ***Good*, and *Evill*, are names that signifie our Appetites, and Aversions; which in different tempers, customes, and doctrines of men, are different:** And divers men, differ not onely in their Judgement, on the senses of what is pleasant, and unpleasant to the tast, smell, hearing, touch, and sight; but also of what is conformable, or disagreeable to Reason, in the actions of Common life. ... From whence arise Disputes, Controversies, and at last War. And therefore so long a man is in the condition of meer Nature, (which is a condition of War,) as private Appetite is the measure of Good, and Evill. ...41

A similar idea can be found in Thucydides' account of the Corcyraean *stasis*, where the virtues lost their commonly accepted meanings and became relative to the person using them. People used the virtues and vices to praise or blame actions as it suited their interests.42
…

Annabel Brett has suggested plausibly that the source of Hobbes's concept of right was the influential sixteenth-century **Spanish humanist jurist Fernando Vázquez de Menchaca, who conceived of *dominium* (lordship or ownership) simply as liberty. He calls it "the natural faculty of doing what it pleases anyone to do, unless it is prohibited in any way by force or by law."**53 **This is Florentinus' definition of liberty (*Institutes*, I.iii.1). The connection between Vázquez and Hobbes is clearer in Hobbes's definition of right in *De Cive* as "a *natural liberty* not created by laws but left by them."**54

Hobbes's inalienable natural right of self-preservation had a much longer history. **The Stoic idea that people and all other living creatures have an instinct for self-preservation was enormously influential during the sixteenth and early seventeenth centuries.** The medieval theme of a fundamental right of self-preservation derived from this instinct was also common. In the fourteenth century William of Ockham had made it inalienable.55
…

Thucydides' account of the Corcyraean *stasis* may well have been central to Hobbes's assessment of the equality of agents in situations of extreme violence. It was mostly those with "the least wit" who took the initiative against the wise because the former did not wish to become the victims of the latter's persuasive arguments. "Whereas the other [the wise], not caring though they were perceived and thinking they needed not to take by force what they might do by plot, were thereby unprovided, and so the more easily slain."72 The less intelligent proved equal to the wise in ability to kill. "Nor when the wise in their own conceit, contend by force, with them who distrust their owne wisdome," Hobbes wrote later, "do they alwaies, or often, or almost at any time, get the Victory."73

https://books.google.fi/books?id=me6ig1nqlKIC&lpg=PT518&hl=fi&pg=PT518#v=onepage&q&f=false

Hobbes claimed that *Leviathan* was the first work to make politics a science and that it could be placed alongside the achievements of Galileo in dynamics and William Harvey in physiology. In major respects his claim was justified. The model for his method of presentation was Euclidean geometry, the power of which, it is said, was brought home to him only by chance when he was over forty years old.

Hobbes's fame does not rest on his political theory alone, for *Leviathan* and his other major works together constitute a comprehensive philosophy. **Within a tightly deductive system, he argues for a materialist metaphysics that is one of the founding statements of modern thought.** That he has not received the credit undoubtedly due to him in this regard is in part explained by the hostility his philosophical views have so often generated.

https://archive.org/details/moraldarwinismho0000wike/page/156/mode/2up?view=theater

Hobbes was enamored with atomism, not only the ancient atomism of Democritus, Epicurus and Lucretius, **but the modern atomism of Galileo and the "Newcastle circle,"** a group of royalist émigrés from England under the patronage of William Cavendish, Marquis of Newcastle.21 Hobbes also made his allegiance to atomism clear in his autobiographical poem written in Latin.22

But Hobbes was also enamored with the deductive precision of Euclidean geometry, and it was his dream to introduce a new science of politics based on Epicurean materialism, as reformed by Galileo, and constructed on the same deductive model as Euclidean geometry.
...

But in contrast to Lucretius, **Hobbes's main concern was not individual tranquillity, but *social* tranquillity.** "If this superstitious fear of spirits were taken away ... by which crafty ambitious persons abuse the simple people, men would be much more fitted than they are for civil obedience."23
...

Needless to say, Hobbes had not examined the entire universe, either the macrocosm or the microcosm. **His confidence that materialism was universally applicable came from his appreciation of Galileo.** That is why Hobbes began with a restatement of the Galilean law of inertia as applied to human action.

> **That when a thing lies still, unless somewhat else stir it, it will lie still for ever, is a truth that no man doubts of. But that when a thing is in motion, it will eternally be in motion, unless somewhat else stay it, though the reason be the same, namely that nothing can change itself, is not so easily assented to.**25

Whether or not Galileo meant to apply the principle of inertia universally, Hobbes extended it to human nature, for human nature was just one more collection of atoms.
...

We recall that for Epicurus, the moral boundaries were rooted in natural limitations, and the natural limitations were taken to be permanent and general. **Even though nature was amoral, the limitations present in the human species guaranteed a kind of universality and solidity to his asceticism. But Hobbes wiped those boundaries away completely by applying perpetual atomic motion to the human constitution itself.** "And because the constitution of a man's body is in continual mutation, it is impossible that all the same things should always cause in him the same appetites, and aversions: much less can all men consent, in the desire of almost any one and the same object."28
...

Indeed, it was the affirmation that our natural state was naturally chaotic that allowed Hobbes to create one of the great political fictions of all time, the "state of nature," a fiction that was a strangely transformed version of Lucretius's Epicurean Edenic state. And out of this Epicurean state Hobbes fashioned an even greater fiction, modern natural right, the very fiction which was to become the foundation of modern jurisprudence and moral discourse.

In examining what Hobbes had to say about the state of nature, we must constantly hold in mind that (like the atom itself) the state of nature (being so far in the past) was something for which he could not possible have had any direct evidence, but which was necessary for the overall project of eliminating disturbance from the divine and bringing Epicurean tranquillity to earth. For Lucretius, we recall, the account of the primitive state was actually a projection of the Epicurean ascetic back into the origins of humanity. **For Hobbes the only difference was that, rather than projecting an Epicurean ascetic, he projected a modern Epicurean hedonist instead.** Further, since Hobbes (unlike Lucretius) was confronting a rival account of human origins, that found in Genesis, his state of nature was also fashioned, in part, as a foundational myth specifically meant to displace the Genesis account.

In both Lucretius's and Hobbes's versions, primitive state is amoral, apolitical and areligious. In this condition, like a homogeneous collection of atoms, all human beings are equal. But in contrast to Lucretius's ascetic account, Hobbes's hedonistic account presented human beings as originally filled to overflowing with a multitude of desires. In parallel to the original atomic state, human motion is purposeless, that is, absolutely nonteleological, or endless. **Human action has no goal, for "there is no such *finis ultimus*, utmost aim, nor *summum bonum*, greatest good, as is spoken of in the books of the old moral philosophers."** Because we have no natural end for our purposeless, desire-driven motion, each individual has for his greatest desire only to "assure for ever, the way of his future desire." Consequently, Hobbes "put for a general inclination of all mankind, a perpetual and restless desire of power after power, that ceaseth only in death."31 **The perpetual motion of atomic individuals perfectly matched the perpetual and restless motion of atoms moving through the void.**

…

Therefore Hobbes invented "modern natural rights," **which are, as philosopher Alasdair MacIntyre has argued, complete and utter fictions.**33 It is only by viewing the genesis of these natural rights in Hobbes that we will see how indebted we are to him, and how completely we have been defined by his moral fiction.
…

But for Hobbes's modern natural rights theory, since nature is ultimately ordered not by intelligence but chance, rights precede laws, and all laws are merely conventional, having as their *only* purpose balancing claims of rights.
…

Isn't the family natural? Hobbes anticipated the question, and his answer was a modified form of that of Lucretius: one of the violent passions, which is of itself no sin, is the sexual passion. His proof was vaguely anthropological. **He pointed to the existence of "the savage people in many places in America" where "the concord whereof dependeth on natural lust" and who therefore "live at this day in the brutish manner."**38 **This mode of proof – used ever after by Epicureans from Rousseau to Margaret Mead – became standard procedure for modern Epicurean materialism. The atomistic individualism that Hobbes's account promoted must continually view the natural family as a side effect of sexual desire.** As a consequence of this myth, modern Epicurean hedonism will continually strive to liberate sexual desire from its unintended side effect, procreation. Another important hallmark of Epicurean hedonism will follow upon this: as opposed to the natural law argument that the family is the foundation of society, modern Epicureanism will make the individual – the presocial unit, as it were – the foundation of society.

Fourth, it should be clear how indebted much of contemporary jurisprudence and nearly all contemporary moral debate are to the Hobbesian myth that society begins when the individual "*lay*[s] *down this right to all things; and* [remains] *contented with so much liberty against other men, as he would allow other men against himself.*"39 **The foundation of this myth, as we have seen, was the belief that our natural, original condition was one of the complete freedom to express our desires as asocial, atomic individuals.** This mythical state was designed to be an exact reflection of the freely moving atoms prior to their accidental assembly into larger units. **The word "right" was merely the name Hobbes applied to the desire to continue one's motion in the moral void,** and liberty comes to mean simply the absence of impediments to one's amoral, original desires.

https://www.tandfonline.com/doi/abs/10.1080/13698230.2015.1122354

When he gave his first political work the title *The Elements of Law Natural and Politic*, Hobbes signalled an agenda to revise and incorporate continental Roman and Natural Law traditions for use in Great Britain, and from first to last he remained faithful to this agenda, which it took his entire corpus to complete. The success of his project is registered in the impact Hobbes had upon the continental legal system in turn, specific aspects of his theory, as for instance the right to punish, entering the European civil code through Pufendorf, and remaining to this day.

https://archive.org/details/deciveorcitizen00inhobb/page/4/mode/2up?view=theater

And upon this it was, that when I applyed my Thoughts to the Investigation of Naturall Justice, I was presently advertised from the very word *Justice*, (which signifies a steady Will of giving every one his *Owne*) that my first enquiry was to be, from whence it proceeded, that any man should call any thing rather his *Owne*, than *another man's*. And when I found that this proceeded not from Nature, but Consent, (for what Nature at first laid forth in common, men did afterwards distribute into severall *Impropriations*, I was conducted from thence to another Inquiry, namely to what end, and upon what Impulsives, when all was equally every mans in common, men did rather think it fitting, that every man should have his Inclosure; **And I found the reason was, that from a Community of Goods, there must needs arise Contention whose enjoyment should be greatest, and from that Contention all kind of Calamities must unavoydably ensue, which by the instinct of Nature, every man is taught to shun.**

> **Hobbes was a thinker and writer of marvellous power, and, take him altogether, is probably the greatest of English philosophers; but it was given to him, as little as to Locke, to escape from entanglement in the *a priori* speculations which had come down mainly from the Roman jurists.**[1]

---

https://archive.org/details/deciveorcitizen00inhobb/page/128/mode/2up?view=theater

But one and the first which disposeth them to sedition, is this, that the knowledge of good and evil belongs to each single man. **In the state of nature indeed, where every man lives by equal right, and has not by any mutual pacts submitted to the command of others, we have granted this to be true,** in chap. i. art. 9.
...

Before there was any government, just and unjust had no being, their nature only being relative to some command, and every action in its own nature is indifferent; that it becomes just or unjust, proceeds from the right of the magistrate. Legitimate kings therefore make the things they command just, by commanding them, and those which they forbid, unjust, by forbidding them. **But private men, while they assume to themselves the knowledge of good and evil, desire to be even as kings,** which cannot be with the safety of the commonweal. The most ancient of all God's commands is, (Gen. ii. 17): *Thou shall not eat of the tree of knowledge of good and evil;* and the most ancient of all diabolical temptations, (Gen. iii. 5): *Ye shall be as gods, knowing good and evil;* and God's first expostulation with man, (verse 11): *Who told thee that thou wert naked? Hast thou eaten of the tree, whereof I commanded thee that thou shouldst not eat?* As if he had said, how comest thou to judge that nakedness, wherein it seemed good to me to create thee, to be shameful, except thou have arrogated to thyself the knowledge of good and evil?

https://books.google.fi/books?id=mTdUtsbybqkC&lpg=PP1&hl=fi&pg=PR15#v=onepage&q&f=false

On the other hand, **while pride was obviously a concern for religious thinkers, it also became a critically important issue for more secular political thinkers, too. It was central to Hobbes's political philosophy, for example, where it was transposed from being an offence against God to being one against the equality of our fellow human beings,** so that when Hobbes explained why his book was called *Leviathan*, he quoted from the 'two last verses of the one and fortieth' chapter of the book of Job, where God calls the great sea-monster 'King of all the children of pride.'6

The proud – those who consider themselves superior to others, those who glory over others, and demand to be honoured – are a perennial threat to stable government, which requires their expulsion from the arena of politics altogether so that they can do no harm to the body politic. It might be God who humbles the proud, according to the text of the *Magnificat*, but Hobbes assigns this task to the secular sovereign.
...

If this examination of Hobbes began by considering his continuities with Stoic and Neostoic thinking, it ends at the heart of what we might call the Augustinian Hobbes – **or at any rate, a Hobbes who set about systematically secularising themes that were familiar from Augustinian theology and displacing theological voluntarism into the world of politics.** Pride was central to his analysis, though no longer understood as an offence against God but as an offence against one's fellow human beings; **and the Leviathan was characterised as nothing less than 'Mortall God' whose decree was law, whose law was necessarily just.**102

https://books.google.fi/books?id=M93i2SyX-a0C&lpg=PP1&hl=fi&pg=PA94#v=onepage&q&f=false

4. In those things which neither can be divided, nor used in common, the rule of nature must needs be one of these: lot, or alternate use; for besides these two ways, there can no other equality be imagined.

And for alternate use, he that beginneth hath the advantage; and to reduce that advantage to equality, there is not other way but lot: **in things, therefore, indivisible and incommunicable, it is the law of nature, *That the use be alternate, or the advantage given away by lot*; because there is no other way of equality; and equality is the law of nature.**

https://books.google.fi/books?id=M93i2SyX-a0C&lpg=PP1&hl=fi&pg=PA78#v=onepage&q&f=false

2. In this chapter it will be expedient to consider in what estate of security this our nature hath placed us, and what probability it hath left us of continuing and preserving ourselves against the violence of one another. And first, if we consider how little odds there is of strength or knowledge between men of mature age, and with how great facility he that is the weaker in strength or in wit, or in both, may utterly destroy the power of the stronger, since there needeth but little force to the taking away of a man's life; **we may conclude that men considered in mere nature,* ought to admit amongst themselves equality; and that he that claimeth no more, may be esteemed moderate.**

https://en.wikisource.org/wiki/Of_Anger/Book_I#III.

> **"The weakest of men," argues he, "are often angry with the most powerful: so you may be sure that anger is not a desire to punish their antagonist—for men do not desire to punish him when they cannot hope to do so."** In the first place, I spoke of a desire to inflict punishment, not a power to do so: now men desire even what they cannot obtain. **In the next place, no one is so low in station as not to be able to hope to inflict punishment even upon the greatest of men: we all are powerful for mischief. [Deinde nemo tam humilis est, qui poenam vel summi hominis sperare non possit; ad nocendum potentes sumus]**

https://archive.org/details/deciveorcitizen00inhobb/page/24/mode/2up?view=theater

III. The cause of mutuall fear consists partly in the naturall equality of men, partly in their mutuall will of hurting: whence it comes to passe that we can neither expect from others, nor promise to our selves the least security: For if we look on men fullgrown, **and consider how brittle the frame of our humane body is, (which perishing, all its strength, vigour, and wisdome it selfe perisheth with it)** and how easie a matter it is, even for the weakest man to kill the strongest, there is no reason why any man trusting to his own strength should conceive himself made by nature above others: they are equalls who can doe equall things one against the other; but they who can do the greatest things, (namely kill) can doe equall things. **All men therefore among themselves are by nature equall; the inequality we now discern, hath its spring from the Civill Law.**

https://archive.org/details/deciveorcitizen00inhobb/page/50/mode/2up?view=theater

XIII. The question whether of two men be the more worthy, belongs not to the naturall, but civill state; for it hath been shewed before, Chap. I. Art. 3. that all men by nature are equall, **and therefore the inequality which now is, suppose from riches, power, nobility of kindred, is come from the civill Law. I know that Aristotle in his first book of Politiques affirmes as a foundation of the whole politicall science, that some men by nature are made worthy to command, others onely to serve; as if Lord and Master were distinguished not by consent of men, but by an aptnesse, that is, a certain kind of naturall knowledge, or ignorance;** which foundation is not onely against reason (as but now hath been shewed) but also against experience: for neither almost is any man so dull of understanding as not to judge it better to be ruled by himselfe, than to yeeld himselfe to the government of another; neither if the wiser and stronger doe contest, have these ever, or often the upper hand of those.

https://oll.libertyfund.org/title/smith-leviathan-1909-ed#lf0161_label_094

Nature hath made men so equall, in the faculties of body, and mind; as that though there bee found one man sometimes manifestly stronger in body, or of quicker mind then another; yet when all is reckoned together, the difference between man, and man, is not so considerable, as that one man can thereupon claim to himselfe any benefit, to which another may not pretend, as well as he. For as to the strength of body, the weakest has strength enough to kill the strongest, either by secret machination, or by confederacy with others, that are in the same danger with himselfe.

And as to the faculties of the mind, (setting aside the arts grounded upon words, and especially that skill of proceeding upon generall, and infallible rules, called Science; which very few have, and but in few things; as being not a native faculty, born with us; nor attained, (as Prudence,) while we look after somewhat els,) **I find yet a greater equality amongst men, than that of strength. For Prudence, is but Experience; which equall time, equally bestowes on all men, in those things they equally apply themselves unto.** That which may perhaps make such equality incredible, is but a vain conceipt of ones owne wisdome, which almost all men think they have in a greater degree, than the Vulgar; that is, than all men but themselves, and a few others, whom by Fame, or for concurring with themselves, they approve. For such is the nature of men, that howsoever they may acknowledge many others to be more witty, or more eloquent, or more learned; Yet they will hardly believe there be many so wise as themselves: For they see their own wit at hand, and other mens at a distance. But this proveth rather that men are in that point equall, than unequall. For there is not ordinarily a greater signe of the equall distribution of any thing, than that every man is contented with his share.

From this equality of ability, ariseth equality of hope in the attaining of our Ends. And therefore if any two men desire the same thing, which neverthelesse they cannot both enjoy, they become enemies; and in the way to their End, (which is principally their owne conservation, and sometimes their delectation only,) endeavour to destroy, or subdue one an other.

https://archive.org/details/enlightenmentcon0000isra/page/552/mode/2up?view=theater

Descartes, however, nowhere integrates his conception of the human mind into a theoretical structure requiring and justifying the fundamental moral and political equality of men in society. **Here Hobbes came closer with his path-breaking concept of a general equality in the 'state of nature,' an invaluably flexible analytical tool, afterwards taken up by Spinoza and to a degree also by Locke.** 'When all is reckoned together,' Hobbes affirms in the *Leviathan*, the differences between men in their faculties of body and mind are 'not so considerable as that one man can thereupon claim to himself any benefit to which another may not pretend as well as he.'27 Roughly speaking, men are equal in terms of their power and even more equal in their minds than their bodies. If one is stronger, another may be more cunning, and 'such is the nature of men,' observes Hobbes, 'that howsoever they may acknowledge many others to be more witty, or more eloquent, or more learned, yet they well hardly believe there be many so wise as themselves.' This is because we know the details of our own thoughts, he suggests, but mostly oversimplify the reasoning of others: 'but this proveth rather that men are in that point equal, than unequal.'28 **'From this equality of ability,' contends Hobbes, 'ariseth equality of hope in the attaining of our ends.'**

Precisely this 'equality of hope' in fulfilling our aspirations was to dominate the democratic republicans' gradual construction of a general political theory of equality. For as Hobbes again observed, 'if a man be trusted to judge between man and man, it is a precept of the law of nature that he deal equally between them.'29 Even in Hobbes, this budding principle of fundamental equality is in a few respects carried over to life under the commonwealth, notably regarding administration of justice, **'so as the great may have no greater hope of impunity when they do violence, dishonour or any injury to the meaner sort, than when one of these does the like to one of them.'**30 Significantly, **Hobbes, for whom all subjects are and should be alike in status under the absolute monarch, even tries to argue for an 'equality of imposition' in matters of taxation, asserting the illegitimacy of all forms of exemption or privilege on the basis of noble, ecclesiastical, or other special social status,** regardless of the fact that in the great majority of continental Europe at the time no such fiscal equivalence of subjects actually existed.31

https://books.google.fi/books?id=6wweBQAAQBAJ&lpg=PP1&hl=fi&pg=PT165#v=onepage&q&f=false

A Kentish gentleman with a legal training, Sir Robert Filmer was an almost exact contemporary of Hobbes. He had come to pamphleteering late in life but in the later 1640s had gone into print to defend the Royalist cause, assaulting Philip Hunton's *Treatise on monarchy* in his *Anarchy of a limited or mixed monarchy* (1648).
…

Filmer's deep and abiding prejudice against contract theory motivated his anonymous *Observations* of 1652, which targeted in turn Hobbes, Milton and Grotius as theorists afflicted by theoretical misunderstandings of the source of political authority. Filmer had evidently read *De Cive* but had delayed his assault upon the same political theory in *Leviathan* until after Hobbes had returned home, strongly suggesting that, in grouping Hobbes in the company that he did, he was making a statement about Hobbes's new position on the political map. Indeed, Filmer's short preface seems to single out those aspects of Hobbes's theory which had already been pressed into service by republican propagandists, with the intention of showing that he was less of a friend than they might think.

Filmer's preface begins with praise of Hobbes's absolutism immediately and crushingly qualified:

> With no small content I read Mr Hobbes' book *De Cive*, and his *Leviathan*, about the rights of sovereignty, which no man, that I know, hath so amply and judiciously handled. **I consent with him about the rights of exercising government, but I cannot agree to his means of acquiring it. It may seem strange that I should praise his building and yet mislike his foundation, but so it is. His *jus naturae* and his *regnum institutivum* will not down with me, they appear full of contradiction and impossibilities.**62

Filmer exploits Hobbes's occasional comments upon the absolute authority of fathers before the establishment of states to offer the philosopher a better foundation for his sovereignty in the principles of *regnum patrimoniale*. That Hobbes's theory might work better if its patriarchal dimension were taken seriously had been an implicit thought in Ascham's adaptation of Hobbes, and

would continue to fascinate writers for whom the state of nature was an abstraction too far, but here Filmer's suggestion is mischievous: 'If, according to the order of nature, he had handled paternal government before that by institution, there would have been little liberty left in the subjects of the family to consent to institution of government.'63

https://books.google.fi/books?id=ErkQDnw7Ob4C&lpg=PP1&pg=PA209#v=onepage&q&f=false

Civilians,* canonists, politicians and divines are not a little perplexed in distinguishing between the law of nature and the law of nations. About *jus naturae* and *jus gentium* there is much dispute by such as handle the original of government, and of property and community.

https://archive.org/details/newscienceofgiam030174mbp/page/n105/mode/2up?view=theater

313 **This same axiom establishes the difference between the natural law of the Hebrews, the natural law of nations, and the natural law of the philosophers.** For whereas the gentile nations had only the ordinary help of providence, the Hebrews had extraordinary help from the true God; on this account the latter divided the whole world of nations into Hebrews and gentiles. **The philosophers reason it out more completely than the gentiles are wont to, for they did not appear until some two thousand years after the gentile nations were founded.** On account of their failure to observe these differences between the three [natural laws], the three systems of Grotius, Selden and Pufendorf must fall.

…

As the civilians sometimes confound, and sometimes separate the law of nature and the law of nations, so other-whiles they make them also contrary one to the other. 'By the law of nature all men are born free': '*jure naturali omnes liberi nascentur*'; but servitude is by the law of nations: *'jure gentium servitus invasit*' [by the law of nations servitude came in], saith Ulpian [*Digest* 1, i, 4; p. 29].

…

Again, the civil law teacheth that 'from the law of nature proceeds the conjunction of man and woman, the procreation and education of children' [*Digest* 1, i, 1, 3;]. **But as for 'religion to God, and obedience to parents' [*Digest* 1, i, 2; p. 29] it makes it to be by the law of nations.**

…

A principal ground of these diversities and contrarieties of divisions was an error which the heathens taught, that 'all things at first were common,' and that 'all men were equal.' This mistake was not so heinous in those ethnic* authors of the civil laws, who wanting the guide of the history of Moses were fain to follow poets and fables for their leaders. But for Christians, who have read the Scriptures, to dream either of a community of all things, or an equality of all persons, is a fault scarce pardonable.

https://archive.org/details/pursuitofmillenn0000norm_i9m3/page/186/mode/2up?view=theater

It was from the Greeks and Romans that medieval Europe inherited the notion of the 'State of Nature' as a state of affairs in which all men were equal in status and wealth and in which nobody was oppressed or exploited by anyone else; a state of affairs characterized by universal good faith and brotherly love and also, sometimes, by total community of property and even of spouses.

In both Greek and Latin literature the State of Nature is represented as having existed on earth in some long-lost Golden Age or 'Reign of Saturn.' **The version of the myth in Ovid's *Metamorphoses* was to be repeatedly echoed in later literature and to exercise considerable influence upon communistic speculation during the Middle Ages.**

https://books.google.fi/books?id=ErkQDnw7Ob4C&lpg=PP1&hl=fi&pg=PA217#v=onepage&q&f=false

This determination of Mr Selden's being consonant to the history of the Bible, and to natural reason, doth contradict the doctrine of Grotius. **I cannot conceive why Mr Selden should afterwards affirm that 'neither the law of nature nor the divine law do command or forbid either communion of all things or private dominion, but permitteth both'** [Selden 2, p. 20].

As for the general community between Noah and his sons which Mr Selden will have to be granted to them [Selden 2, p. 18], Genesis ix, 2, the text doth not warrant it.

…

But whether with Grotius, community came in at the creation, or with Mr Selden at the Flood, they both agree that it did not long continue. *'Sed veri non est simile hujusmodi communionem diu obtinuisse'* [but it is not true that this kind of common ownership lasted for long] is the confession of Mr Selden [Selden 2, p. 18]. It seems strange that Grotius should maintain that community of all things should be by the law of nature, of which God is the author, and yet such community should not be able to continue. Doth it not derogate from the providence of God Almighty to ordain a community which should not continue? Or doth it not make the act of our forefathers, in abrogating the natural law of community by introducing that of property, to be a sin of high presumption?

The prime duties of the second table are conversant about the right of property. But if property be brought in by a human law, as Grotius teacheth, then the moral law depends upon the will of man. **There could be no law against adultery or theft if women and all things were common.**

Mr Selden saith that the law of nature or of God '*nec vetuit nec jubebat, sed permisit utrumque, tam nempe rerum communionem quam privatum dominium*' [neither forbade nor commanded, but equally permitted both, that is to say common ownership as well as the private dominion of things] [Selden 2, p. 20]. And yet for property (which he terms '*primaeva rerum dominia*' [the form of ownership in the earliest times]) he teacheth that 'Adam received it from God' (*a numine acceperat*) [Selden 2, p. 19]. And for community he saith: '**We meet with evident footsteps of the community of things in that donation of God by which Noah and his three sons are made *domini pro indiviso rerum omnium* [lords in common of all things]'** [Selden 2, pp. 17-18]. Thus he makes the private dominion of Adam as well as the common dominion of Noah and his sons to be both by the will of God.
…

I find no cause why Mr Selden should call community a pristine right, since he makes it but to begin in Noah and to end in Noah's children or grandchildren at the most. **For he confesseth the earth '*a Noachidis seculis aliquot post diluvium esse divisam*' [was divided by Noah's descendants some centuries after the Flood]** [Selden 2, p. 18].
…

Many conclusions in Grotius his book *De Jure Belli ac Pacis* are built upon the foundation of these two principles:

1. **The first is that *'communis rerum usus naturalis fuit'* [the use of things in common was natural]** [Grotius 1, i, x, 7].

2. **The second is that *'dominium quale nunc is usu est, voluntas humana introduxit'* [property as it now exists was introduced by human will]** [Grotius 1, i, x, 4].

Upon these two propositions of natural community and voluntary property depend divers dangerous and seditious conclusions, which are dispersed in several places.

https://books.google.fi/books?id=ErkQDnw7Ob4C&lpg=PP1&hl=fi&pg=PA234#v=onepage&q&f=false

If our first parents, or some other of our forefathers did voluntarily bring in property of goods and subjection to governors, and it were in their power either to bring them in or not, **or having brought them in to alter their minds and restore them to their first condition of community and liberty, what reason can there be alleged that men that now live should not have the same power? So that if any one man in the world, be he never so mean or base, will but alter his will and say he will resume his natural right to community, and be restored unto his natural liberty, and consequently take what he please and do what he list, who can say that such a man doth more than by right he may?** And then it will be lawful for every man, when he please, to dissolve all government, and destroy all property.

Whereas Grotius saith that by the law of nature all things were at first common [Grotius 1, i, x, 7] and yet teacheth that after property was brought in it was against the law of nature to use community [Grotius 1, i, x, 4], **he doth thereby not only make the law of nature changeable, which he saith God cannot do,** but he also makes the law of nature contrary to itself.
…

It is not probable that any sure direction of the beginning of government can be found either in Plato, Aristotle, Cicero, Polybius, or in any other of the heathen authors, who were ignorant of the manner of the creation of the world. We must not neglect the Scriptures

and search in philosophers for the grounds of dominion and property, which are the main principles of government and justice. The first government in the world was monarchical, in the father of all flesh.
…

There never was any such thing as an independent multitude, who at first had a natural right to a community. This is but a fiction or fancy of too many in these days, who please themselves in running after the opinions of philosophers and poets to find out such an original of government as might promise them some title of liberty, to the great scandal of Christianity and bringing in of atheism – since a natural freedom of mankind cannot be supposed without the denial of the creation of Adam. And yet this conceit of original freedom is the only ground upon which not only the heathen philosophers but also the authors of the principles of the civil law, and Grotius, Selden, Hobbes, Ascham and others, raise and build their doctrines of government and of the several sorts or kinds, as they call them, of commonwealths.

Even Bentham could be moved to recognise the predominant idiom taken by social relations in his own day, with a rare (though unpublished) endorsement of Filmer:

> **Filmer's origin of government is exemplified everywhere: Locke's scheme of government has not ever, to the knowledge of any body, been exemplified any where.** In every family there is government, in every family there is subjection, and subjection of the most absolute kind: the father, sovereign, the mother and the young, subjects. **According to Locke's scheme, men knew nothing at all of governments till they met together to make one. Locke has speculated so deeply, and reasoned so ingeniously, as to have forgot that he was not of age when he came into the world** … Under the authority of the father, and his assistant and prime-minister the mother, every human creature is enured to subjection, is trained up into a habit of subjection. **But, the habit once formed, nothing is easier than to transfer it from one object to another. Without the previous establishment of domestic government, blood only, and probably a long course of it, could have formed political government.**

Filmer had failed to prove divine right, insisted the secularized Bentham; **but he *had* proved 'the physical impossibility of the system of absolute equality and independence, by showing that subjection and not independence is the natural state of man.'**188

> 188. **Bentham's mss 'Locke, Rousseau and Filmer's Systems,'** printed in Elie Halévy, *La Formation du Radicalisme Philosophique* (3 vols., Paris, 1901-4), I, Appendix III: **this key document was omitted from the English translation of Halévy's seminal work, and long overlooked. Bentham's critique of Locke might be compared with that of Joseph de Maistre in *Soirées de Saint-Pétersbourg*,** noted in E.D. Watt, '"Locked In": De Maistre's Critique of French Lockeianism,' *JHI* 32 (1971), 129-32.

This showed a degree of ignorance of Locke: in some places he accepted a large degree of the patriarchalist case. Nevertheless, for much of the eighteenth century, many people, and especially churchmen, saw instead in Locke an ecclesiology potentially so extreme as to make them wish to attack Locke's contractarian weaknesses, not stress areas of agreement with him. **Hard-nosed realists, like the churchmen discussed in chapter 3 below, or Karl Marx, agreed with Bentham, not Locke: the family was a 'double relationship' wrote Marx, both natural and political.**189

>
> [41] 12. **Now it seems to me, at least, that not only**[1] **among the Medes, as Herodotus tells us, but also among our own ancestors, men of high moral character were made kings in order that the people might enjoy justice.** For, as the masses in their helplessness were oppressed by the strong, they appealed for protection to some one man who was conspicuous for his virtue; and, as he shielded the weaker classes from wrong, he managed by establishing equitable conditions to hold the higher and the lower classes in an equality of right.
>
> **The reason for making constitutional laws was the same as that for making kings.** [42] **For what people have always sought is equality of rights before the law. For rights that were not open to all alike would be no rights. [Eademque constituendarum legum fuit causa quae regum. Ius enim semper est quaesitum aequabile; neque enim aliter esset ius.]** If the people secured their end at the hands of one just and good man, they were satisfied with that; but when such was not their good fortune, laws were invented, to speak to all men at all times in one and the same voice.
>
> https://oll.libertyfund.org/title/cicero-on-moral-duties-de-officiis#lf0041-01_label_143
>
> > 2. **According to Herodotus, Deioces, ambitious of sovereignty, commenced as arbitrator in his own village, and on account of the reputation thus obtained for**

> **justice was chosen king.** His administration is represented as having been, though impartial, annoyingly inquisitorial and relentlessly severe. But as his reign began more than seven centuries before the Christian era, he may be regarded as a semi-mythical personage, and a like doubt may be thrown on the origin of the Median sovereignty. **The theory of the origin of kingly power here given seems to have been a favorite notion with Cicero, and is found in other works of his. It perhaps defines what ought to have been; but in fact the kingly office was probably at the outset but an extension of patriarchal sovereignty.**

https://books.google.fi/books?id=6wweBQAAQBAJ&lpg=PP1&hl=fi&pg=PT286#v=onepage&q&f=false

Bramhall drew attention to the passage in chapter 21, which Filmer had also noticed, where Hobbes had argued that a group of rebels who expected execution if caught had the liberty to join together and defend each other. **Although their initial rebellion was unjust, their attempts to defend their lives were not.**

> https://oll.libertyfund.org/title/smith-leviathan-1909-ed#lf0161_label_114
>
> To resist the Sword of the Common-wealth, in defence of another man, guilty, or innocent, no man hath Liberty; **because such Liberty, takes away from the Soveraign, the means of Protecting us;** and is therefore destructive of the very essence of Government. But in case a great many men together, have already resisted the Soveraign Power unjustly, or committed some Capitall crime, for which every one of them expecteth death, whether have they not the Liberty then to joyn together, and assist, and defend one another? **Certainly they have: For they but defend their lives, which the Guilty man may as well do, as the Innocent.** There was indeed injustice in the first breach of their duty; Their bearing of Arms subsequent to it, though it be to maintain what they have done, is no new unjust act. And if it be onely to defend their persons, it is not unjust at all. But the offer of pardon taketh from them, to whom it is offered, the plea of self-defence, and maketh their perseverance in assisting, or defending the rest, unlawfull.

'Why should we not change the name of *Leviathan* into the Rebels' Catechism?' asks Bramhall, 'T.H. alloweth rebels and conspirators to make good their unlawful attempts by arms. Was there ever such a trumpeter of rebellion heard of before?'23

In a similar fashion, Bramhall attacks Hobbes's *de factoism,* foreshadowed by the discussion in chapter 7 of *De Cive,* and fully spelled out in chapter 21 and the 'Review and Conclusion' to *Leviathan*. **In *De Cive,* much to the horror of Royalists, Hobbes had suggested that sovereignty was lost after conquest.**

> https://archive.org/details/deciveorcitizen00inhobb/page/98/mode/2up?view=theater
>
> **In the second place, if the kingdom fall into the power of the enemy, so as there can no more opposition be made against them, we must understand that he, who before had the supreme authority, hath now lost it:** for when the subjects have done their full endeavour to prevent their falling into the enemy's hands, they have fulfilled those contracts of obedience which they made each with other, and what, being conquered, they promise afterwards, to avoid death, they must, with no less endeavour, labour to perform.

This brief suggestion was for Bramhall fleshed out in *Leviathan* where Hobbes argued that obligation lasted as long as the sovereign was able to provide protection. Bramhall fastened on the passages of the 'Review' which suggested that living under the protection of a conqueror constituted submission and consent:

> **Where these principles prevail, adieu honour, and honesty, and fidelity, and loyalty; all must give place to self-interest. What? For a man to desert his sovereign upon the first prevalence of an enemy, or the first payment of a petty contribution, or the first appearance of a sword that is more able to protect us for the present?**232

…

Bramhall completes his analysis of by demonstrating from chapter 9 of *De Cive* that Hobbes's theory not only subverted political relationships but also non-political forms of dominion; **Hobbes undermined paternal dominion by suggesting that women might have power over their children and that there was nothing inevitable about women's subordination to men.** He even appeared to suggest that slaves might justly kill their masters. Hobbes's novel theory eroded all forms of traditional restraint and authority: **'T.H. taketh a pride in removing all the ancient land-marks, between prince and subject, father and child, husband and wife, master and servant, man and man.'**234

> https://archive.org/details/deciveorcitizen00inhobb/page/104/mode/2up?view=theater

Those that have hitherto endeavoured to prove the dominion of a parent over his children, have brought no other argument than that of generation, as if it were of itself evident, that what is begotten by me is mine; just as if a man should think, that because there is a triangle, it appears presently without any further discourse, that its angles are equal to two right. Besides, **since dominion, that is, supreme power is indivisible, insomuch as no man can serve two masters, but two persons, male and female, must concur in the act of generation; it is impossible that dominion should at all be acquired by generation only.** Wherefore we will, with the more diligence, in this place inquire into the original of paternal government.

2**. We must therefore return to the state of nature, in which, by reason of the equality of nature, all men of riper years are to be accounted equal.** There by right of nature the conqueror is lord of the conquered. By the right therefore of nature, the dominion over the infant first belongs to him who first hath him in his power. But it is manifest that he who is newly born, is in the mother's power before any others, insomuch as she may rightly, and at her own will, either breed him up, or adventure him to fortune.

3. If therefore she breed him (because the state of nature is the state of war) **she is supposed to bring him up on this condition, that being grown to full age he become not her enemy; which is, that he obey her.** For since by natural necessity we all desire that which appears good unto us, it cannot be understood that any man hath on such terms afforded life to another, that he might both get strength by his years, and at once become an enemy. But each man is an enemy to that other whom he neither obeys nor commands. **And thus in the state of nature, every woman that bears children, becomes both a mother and a lord. But what some say, that in this case the father, by reason of the pre-eminence of sex, and not the mother, becomes lord, signifies nothing. For both reason shows the contrary, because the inequality of their natural forces is not so great, that the man could get the dominion over the woman without war, and custom also contradicts not. For women, namely Amazons, have in former times waged war against their adversaries, and disposed of their children at their own wills. And at this day in divers places, women are invested with the principal authority.** Neither do their husbands dispose of their children, but themselves; which in truth they do by the right of nature; forasmuch as they who have the supreme power, are not tied at all (as hath been shewed) to the civil laws. **Add also that in the state of nature it cannot be known who is the father, but by the testimony of the mother;** the child therefore is his whose the mother will have it, and therefore hers. Wherefore original dominion over children belongs to the mother: and among men no less than other creatures, the birth follows the belly.
...

6. **But in the state of nature, if a man and woman contract so, as neither is subject to the command of the other**, **the children are the mother's, for the reasons above given in the third article, unless by pacts it be otherwise provided. For the mother may by pact dispose of her right as she lists, as heretofore hath been done by the Amazons, who of those children which have been begotten by their neighbours, have by pact allowed them the males, and retained the females to themselves.** But in a civil government, if there be a contract of marriage between a man and woman, the children are the father's, because in all cities, to wit, constituted of fathers, not mothers governing their families, the domestical command belongs to the man; and such a contract, if it be made according to the civil laws, is called matrimony.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Diodorus_Siculus/17D*.html#note76

> **Arrian mentions Amazons only in other contexts (4.15.4; 7.13.2-6) and expresses the doubt that any still existed**—especially since they were not mentioned by Aristobulus or Ptolemy. Plutarch, *Alexander*, 46.1, gives a full list of authorities in favour of or opposed to the visit, but doubts the story (46.2), because it is poorly attested, not because Amazons did not exist. **Disbelief in Amazons as such is a modern phenomenon.**

https://archive.org/details/worksofmostrever04bram/page/552/mode/2up?view=theater

He did prudently, to deny that virtue did consist in a mean;o for he himself doth never observe a mean. All his bolts fly over or under, but at the right mark it is in vain to expect him. **Sometimes he fancieth an omnipotence in kings, sometimes he strippeth them of their just rights.** Perhaps he thinketh, that it may fall out in politics as it doth sometimes in physic; "*Bina venena juvant*"—"two contrary poisons" may become a cordial to the commonwealth. I will begin with his defects, where he attributeth too little to regal power.

First, he teacheth, that no man is bound to go to warfare in person, except he do voluntarily undertake it.—**"A man that is commanded as a soldier to fight against the enemy, . . may nevertheless in many cases refuse without injustice."p Of these "many cases," he setteth down only two: first, "when he substituteth a sufficient soldier in his place, for in this case he deserteth not the service of the commonwealth;" secondly, "there is allowance to be made for natural timorousness, . . or men of feminine courage."q** This might pass as a municipal law, to exempt some persons at some time in some places; but to extend it to all persons, places, and times, is absurd, and repugnant to his own grounds; who teacheth, that "justice and injustice do depend upon the command of

the sovereign," that "whatsoever he commandeth, he maketh lawful and just by commanding it."r **His two cases are two great impertinencies; and belong to the sovereign to do or not to do, as graces,—"Who is timorous or fearful, let him depart;"—not to the subjects as right.**

> When therefore our refusall to obey, frustrates the End for which the Soveraignty was ordained; then there is no Liberty to refuse: otherwise there is.
>
> Upon this ground, a man that is commanded as a Souldier to fight against the enemy, though his Soveraign have Right enough to punish his refusall with death, may neverthelesse in many cases refuse, without Injustice; as when he substituteth a sufficient Souldier in his place: for in this case he deserteth not the service of the Common-wealth. And there is allowance to be made for naturall timorousnesse, not onely to women, (of whom no such dangerous duty is expected,) but also to men of feminine courage. **When Armies fight, there is on one side, or both, a running away; yet when they do it not out of trechery, but fear, they are not esteemed to do it unjustly, but dishonourably. For the same reason, to avoyd battell, is not Injustice, but Cowardise.** But he that inrowleth himselfe a Souldier, or taketh imprest mony, taketh away the excuse of a timorous nature; and is obliged, not onely to go to the battell, but also not to run from it, without his Captaines leave. And when the Defence of the Common-wealth, requireth at once the help of all that are able to bear Arms, every one is obliged; because otherwise the Institution of the Common-wealth, which they have not the purpose, or courage to preserve, was in vain.

He forgetteth, how often he hath denied "all knowledge of good and evil" to subjects, and subjected their will absolutely to the will of the sovereign;—The sovereign "may use every man's strength and wealth at his pleasure."s His acknowledgment,—that the "sovereign hath right enough to punish his refusal with death,"t—is to no purpose. The question is not, whether his refusal be punishable or not, but whether it be just or not. Upon his principles, a sovereign may "justly enough" put the most innocent subject in the world to death; as we shall see presently.u **And his exception—"when the defence of the commonwealth requireth at once the help of all that are able to bear arms,"x—is no answer to the other case, and itself a case never like to happen. He must be "a mortal God"y indeed, that can bring all the hands in a kingdom to fight at one battle.**

Another of his principles is this:—**"Security is the end for which men make themselves subjects to others; which, if not be enjoyed, no man is understood to have subjected himself to others, or to have lost his right to defend himself at his own discretion: neither is any man understood to have bound himself to any thing, or to have relinquished his right over all things, before his own security be provided for."z** What ugly consequences do flow from this paradox, and what a large window it openeth to sedition and rebellion, I leave to the reader's judgment.
…

And howsoever in words he deny all resistance to the sovereign, yet in deed he admitteth it.—"No man is bound by his pacts, whatsoever they be, not to resist him, who bringeth upon him death or wounds or other bodily damage."b—**(By this learning the scholar, if he be able, may take the rod out of his master's hand, and whip him.)**
…

But his next conclusion will uncase him fully, and shew us what manner of man he is.—"If the commonwealth come into the power of its enemies, so that they cannot be resisted, he who had the sovereignty before, is understood to have lost it."l What "enemies" he meaneth, such as have the just power of the sword or such as have not; what he meaneth by "the commonwealth," the whole kingdom or any part of it; what he intendeth by "cannot be resisted," whether a prevalence for want of forces to resist them or a victory in a set battle or a final conquest; and what he meaneth by "losing the sovereignty," losing it *de facto* or *de jure*, losing the possession only or losing the right also;—he is silent. **It may be, because he knoweth not the difference.**
…

These are part of T.H. his faults, on the one hand, against monarchs; opposite enough to peace and tranquillity; which none can approve, who either have a settlement, or wish one. But his faults are ten times greater and grosser for monarchs, on the other hand; **insomuch as I have thought sometimes, that he observed the method of some old cunning Parliament-men, who, when they had a mind to cross a bill, were always the highest for it in the House, and would insert so many and so great inconveniences into the Act, that they were sure it could never pass.**

> "Tuta frequensque via est per amici fallere nomen."y
>
> y [Ovid., Art. Amat, i, 585.]

So he maketh the power of kings to be so exorbitant, that no subject, who hath either conscience or discretion, ever did or can endure; so to render monarchy odious to mankind.

I pass by his accommodating of the four first Commandments of the Decalogue to sovereign princes,z which concern our duty to Almighty God. Let his first paradox of this kind be this:—"A monarch doth not bind himself to any man by any pacts for the empire which he receiveth:"a and, "It is vain to grant sovereignty by way of precedent covenants; the opinion, that any monarch receiveth his power by covenant, that is to say, on condition" (learnedly expounded!) **"proceedeth from want of understanding this easy truth, that covenants being but words and breath" (mark that) "have no force to oblige," &c., "but from the public sword."b What is now become of all our coronation oaths, and all our liberties and great Charters?**

Another paradox is this:—"Every monarch may make his successor by his last will; and that which one may transfer to another by testament, that he may by the same right give or sell whilst he is living: therefore, to whomsoever he disposeth it, either for love or money, it is lawfully disposed:"c and," There is no perfect form of government, where the disposing of the succession is not in the present sovereign."d **The whole body of the kingdom of England were of another mind in King John's case; and if he had disposed the sovereignty to a Turk, as some of our historiographers relate that he made an overture,e it is not likely that they would have turned Turkish slaves.**
…

His oeconomics are no better than his politics. He teacheth parents, that "they cannot be injurious to their children, so long as they are in their power."f Yes, too many ways, both by omission and commission. He teacheth mothers, that "they may cast away their infants or expose them at their own discretion lawfully."g He teacheth parents indifferently, that "where they are free from all subjection," they "may take away the lives of their children" or kill them, and this justly.h What horrid doctrines are these!
…

Hitherto he hath been too high for the parents. Now they must expect a cooling card. **"The question who is the better man, hath no place in the condition of mere nature, where all men are equal."q Are the parent and child equal? Yes: "they are equal, who can do equal things one against another; but they who can do the greatest things, that is to kill, can do equal things; therefore all men by nature are equal among themselves."r** If the son have as strong an arm and as good a cudgel as his father, he is as good a man as his father.
…

How repugnant is this which he saith of the mother's dominion over her children to the law of nations! By the Law of the twelve tables a father might sell his child twice;—"*bis venum duat.*"b The mother had no hand in it. Neither doth the judicial law of the Jews dissent from this;—"If *a man* sell his daughter to be a maid-servant."
…

In the next place, his principles destroy the subordination of a wife to her husband. "The inequality of natural strength is less than that a man can acquire dominion over a woman without war."d And he giveth this reason, why the contrary custom prevaileth;—because "commonwealths" were "constituted by fathers of families, not by mothers of families," and from hence it is that "the domestical dominion belongs to the man."e The Scriptures assign another reason of the subjection of the woman, and the rule of the man; namely, the ordinance of Almighty God. And St. Paul secondeth it:—"Women are commanded to be under obedience, as also saith the law;"—**I trow that law was not made "by fathers of families:"**
…

I might cite St. Peter to the same purpose; **but I am afraid, lest he should accuse both St. Peter and St. Paul of partiality, as well as the first founders of commonwealths.**
…

So as, according to his principle, if a servant (that is more than a captive), having not only had his life spared by a just conqueror, but also contracted and engaged himself to be a loyal servant, as firmly as may be, **shall nevertheless be cast into any bonds by his master, or be restrained of his corporal liberty, upon delinquency, or just suspicion, he is acquitted of all his "pacts" and obligations, and as free to run away, or cut is master's throat, as if he had never "pacted" or engaged at all.**

https://archive.org/details/worksofmostrever04bram/page/576/mode/2up?view=theater

Sometimes he saith the laws of nature are God's laws:—"Whose laws (such of them as oblige all mankind), in respect of God, as He is the God of nature, are natural; and in respect of the same God, as He is King of Kings, are laws;"p and, "Right reason is a law;"q and he defines the law of nature to be "the dictate of right reason."r **Where by the way observe, what he makes to be the end of the laws of nature;—"the long conservation of our lives and members, so much as is in our power."s By this the reader may see what he believes of honesty or the life to come.**

…

He teacheth, that "the laws of nature are eternal and immutable; that which they forbid can never be lawful, that which they command never unlawful."a At other times he teacheth, that "in war, and especially in a war of all men against all men, the laws of nature are silent:"b and that they do not oblige as laws, before there be a commonwealth constituted;—"When a commonwealth is once settled, then are they actually laws, and not before."c
…

In one place he maintaineth, that "all men by nature are equal among themselves;"x in another place, that "the father of every man was originally his sovereign lord, with power over him of life and death."y

> x De Cive, c. i. § 3. [p. 5.—"**Sunt igitur omnes homines naturâ inter se aequales.**"]

https://archive.org/details/worksofmostrever04bram/page/592/mode/2up?view=theater

A principal cause of his errors is a fancying to himself a general state of nature; which is so far from being general, that there is not an instance to be found of it in the nature of things, where mankind was altogether without laws and without governors, guided only by self-interest, without any sense of conscience, justice, honesty, or honour. He may search all the corners of America with a candle and lanthorn at noon day, and after his fruitless pains, return a *'non est inventus.'*

Yet all plants and living creatures are subject to degenerate and grow wild by degrees. Suppose it should so happen, that some remnant of men, either chased by war or persecution, or forced out of the habitable world for some crimes by themselves committed, or being cast by shipwreck upon some deserts, by long conversing with savage beasts, lions, bears, wolves, and tigers, should in time become more "brutish" (it is his own epithet) than the brutes themselves, **would any man in his right wits make that to be the universal condition of mankind, which was only the condition of an odd handful of men? or that to be "the state of nature," which was not the state of nature, but an accidental degeneration?**

He that will behold the state of nature rightly, must look upon the family of Adam, and his posterity in their successive generations from the creation to the deluge, and from the deluge until Abraham's time, when the first "kingdom of God by pact" is supposed by T.H. to begin.t **All this while (which was a great part of that time the world hath stood) from the creation, lasted "the kingdom of God by nature," as he phraseth it;u and yet in those days there were laws and governments, and more kings in the world than there are at this present;** we find nine kings engaged in one war, and yet all their dominions but a narrow circuit of land. And so it continued for divers hundreds of years after; as we see by all those kings which Joshua discomfited in the land of Canaan. Every city had its own king. **The reason is evident;—the original right of fathers of families was not then extinguished.**

Indeed T.H. supposeth, that men did spring out of the earth like mushrooms or mandrakes:—"That we may return again to the state of nature, and consider men as if they were even now suddenly sprouted and grown out of the earth, after the manner of mushrooms, without any obligation of one to another."v **But this supposition is both false and atheistical, howsoever it dropt from his pen.**
…

All other writers of politics do derive commonwealths from the sociability of nature, which is in mankind; most truly. But he will have the beginning of all human society to be "from mutual fear"l as much contrary to reason as to authority. We see some kind of creatures delight altogether in solitude, rarely or never in company. We see others (among which is mankind) delight altogether in company, rarely or never in solitude. Let him tell me, what mutual fear of danger did draw the silly bees into swarms? or the sheep and doves into flocks? and what protection they can hope for, one from another? and I shall conceive it possible, that the beginning of human society might be from fear also.

And thus having invented a fit foundation for his intended building, ycleped "the state of mere nature,"m which he himself first devised for that purpose, he hath been long moduling and framing to himself a new form of policy, to be builded upon it: but the best is, it hath only been in paper; all this while he hath never had a finger in mortar. **This is the new frame of "absolute sovereignty;"n which T.H. knew right well would never stand, nor he should be ever permitted to rear it up in our European climates, or in any other part of the habitable world, which had ever seen any other form of civil government. Therefore he hath sought out for a fit place in America,o among the savages;** to try if perhaps they might be persuaded, that the laws of God and nature, the names of good and evil, just and unjust, did signify nothing, but at the pleasure of the sovereign prince.

And because there hath been much clashing in these quarters about religion, through the distempered zeal of some, the seditious orations of others, and some pernicious principles, well meant at first, but ill understood, and worse pursued; to prevent all such garboils in his commonwealth, he hath taken an order to make his sovereign to be "Christ's lieutenant upon earth, in obedience to whose commands true religion doth consist;"p **thus making policy to be the building, and religion the hangings,** which must be fashioned just according to the proportion of the policy; and not (as Mr. Cartwright would have had it)q making religion to be the building, and policy the hangings, which must be conformed to religion.

Well, the law is costly, and I am for an accommodation;—**that T.H. should have the sole privilege of setting up his form of government in America, as being calculated and fitted for that meridian; and if it prosper there, then to have the liberty to transplant it hither.** Who knoweth (if there could but be some means devised to make them understand his language), whether the Americans might not choose him to be their sovereign? **But all the fear is, that if he should put his principles in practice as magistrally as he doth dictate them, his supposed subjects might chance to tear their "mortal God"r in pieces with their teeth, and entomb his sovereignty in their bowels.**

https://books.google.fi/books?id=6wweBQAAQBAJ&lpg=PP1&hl=fi&pg=PT324#v=onepage&q&f=false

In November 1660 Stillingfleet published the first edition of *Irenicum*, a treatise that sought to use natural law theory to cut through the intractable scriptural debates between Presbyterians and Episcopalians as to which form of church government was *jure divino*.
…

Stillingfleet postulated a state of absolute liberty where the silence of the law of nature constituted a natural right of permission for individuals to do whatever they wanted.23 Knowing well enough that this might raise the suspicion of unacceptable Hobbism, **Stillingfleet was careful to point out that even Hobbes in *De Cive* acknowledged that this was a *hypothetical* state and that in reality children are born into patriarchal authority.**24 This much established, Stillingfleet went ahead with a contractarian story in which individuals part with their natural right establish a civil state.25
…

Stillingfleet clearly knew that he was playing with dangerous ideas when he deployed these concepts in *Irenicum*. In order to avoid misunderstanding he made it clear that the duties of natural law were not subject to positive human law, **this being the notorious Hobbesian inversion of the traditional relationship between the two forms of obligation.**26

https://books.google.fi/books?id=6wweBQAAQBAJ&lpg=PP1&hl=fi&pg=PT628#v=onepage&q&f=false

> 13. In fact in the same section, **Stillingfleet covertly follows Hobbes by agreeing with 'the Best Writers on this Subject' that a bound slave possesses a right of war against his master.** This section of chapter 8 of *De Cive* had been assaulted by Clarendon and Bramhall as a legitimation of rebellion.

https://archive.org/details/deciveorcitizen00inhobb/page/100/mode/2up?view=theater

But we must know in the first place by what means the right of dominion may be gotten over the persons of men. **Where such a right is gotten, there is a kind of a little kingdom; for to be a king, is nothing else but to have dominion over many persons; and thus a great family is a kingdom, and a little kingdom a family. Let us return again to the state of nature, and consider men as if but even now sprung out of the earth, and suddenly (like mushrooms) come to full maturity, without all kind of engagement to each other.** There are but three ways only, whereby one can have a dominion over the person of another; whereof the first is, if by mutual contract made between themselves (for peace and self-defence's sake) they have willingly given up themselves to the power and authority of some man, or council of men; and of this we have already spoken. The second is, if a man taken prisoner in the wars, or overcome, or else distrusting his own forces, (to avoid death) promises the conqueror or the stronger party his service, that is, to do all whatsoever he shall command him. In which contract, the good which the vanquished or inferior in strength doth receive, is the grant of his life, which by the right of war in the natural state of men he might have been deprived of; but the good which he promises, is his service and obedience. By virtue therefore of this promise, there is as absolute service and obedience due from the vanquished to the vanquisher, as possibly can be, excepting what repugns the divine laws; for he who is obliged to obey the commands of any man before he knows what he will command him, is simply and without any restriction tied to the performance of all commands whatsoever. Now he that is thus tied, is called a servant; he to whom he is tied, a lord. Thirdly, there is a right acquired over the person of a man by generation; of which kind of acquisition somewhat shall be spoken in the following chapter.

2. Every one that is taken in the war, and hath his life spared him, is not supposed to have contracted with his lord; for every one is not trusted with so much of his natural liberty, as to be able, if he desired it,

either to fly away, or quit his service, or contrive any mischief to his lord. And these serve indeed, but within prisons, or bound within irons; and therefore they were called not by the common name of servant only, but by the peculiar name of slave, **even as now at this day, *un serviteur*, and *un serf*, or *un esclave* have diverse significations.**

3. **The obligation therefore of a servant to his lord ariseth not from a simple grant of his life, but from hence rather, that he keeps him not bound or imprisoned. For all obligation derives from contract; but where is no trust, there can be no contract, as appears by chap. ii. art. 9, where a compact is defined to be the promise of him who is trusted.** There is therefore a confidence and trust which accompanies the benefit of pardoned life, whereby the lord affords him his corporal liberty; so that if no obligation nor bonds of contract had happened, he might not only have made his escape, but also have killed his lord, who was the preserver of his life.

4. Wherefore such kind of servants as are restrained by imprisonment or bonds, are not comprehended in that definition of servants given above, because those serve not for the contract's sake, but to the end they may not suffer. **And therefore if they fly, or kill their lord, they offend not against the laws of nature. For to bind any man is a plain sign, that the binder supposes him that is bound, not to be sufficiently tied by any other obligation.**

5. The lord therefore hath no less dominion over a servant that is not, than over one that is bound; for he hath a supreme power over both, and may say of his servant no less than of another thing, whether animate or inanimate, this is mine. Whence it follows, that whatsoever the servant had before his servitude, that afterwards becomes the lord's; and whatsoever he hath gotten, it was gotten for his lord. For he that can by right dispose of the person of a man, may surely dispose of all those things which that person could dispose of. There is therefore nothing which the servant may retain as his own against the will of his lord; yet hath he, by his lord's distribution, a propriety and dominion over his own goods, insomuch as one servant may keep and defend them against the invasion of his fellow-servant, in the same manner as hath been shewed before, **that a subject hath nothing properly his own against the will of the supreme authority, but every subject hath a propriety against his fellow-subject.**

6. Since therefore both the servant himself, and all that belongs to him are his lord's, and by the right of nature every man may dispose of his own in what manner he pleases; the lord may either sell, lay to pledge, or by testament convey the dominion he hath over his servant, according to his own will and pleasure.

7. Furthermore, **what hath before been demonstrated concerning subjects in an institutive government, namely, that he who hath the supreme power can do his subject no injury; is true also concerning servants,** because they have subjected their will to the will of the Lord. Wherefore, whatsoever he doth, it is done with their wills, but no injury can be done to him that willeth it.

8. **But if it happen that the lord, either by captivity or voluntary subjection, doth become a servant or subject to another, that other shall not only be lord of him, but also of his servants;** supreme lord over these, immediate lord over him. Now because not the servant only, but also all he hath, are his lord's; therefore his servants now belong to this man, neither can the mediate lord dispose otherwise of them than shall seem good to the supreme. And therefore, if sometime in civil governments the lord have an absolute power over his servants, that is supposed to be derived from the right of nature, and not constituted, but slightly passed over by the civil law.

9. A servant is by the same manner freed from his servitude, that a subject in an institutive government is freed from his subjection. First, if his lord enfranchise him; for the right which the servant transferred to his lord over himself, the same may the lord restore to the servant again. And this manner of bestowing of liberty is called manumission; which is just as if a city should permit a citizen to convey himself under the jurisdiction of some other city. Secondly, if the lord cast off his servant from him, which in a city is banishment; neither differs it from manumission in effect, but in manner only. For there, liberty is granted as a favour, here, as a punishment: in both, the dominion is renounced. Thirdly, if the servant be taken prisoner, the old servitude is abolished by the new; for as all other things, so servants also are acquired by war, whom in equity the lord must protect, if he will have them to be his. Fourthly, the servant is freed for want of knowledge of a successor, the lord dying (suppose) without any testament or heir. For no man is understood to be obliged, unless he know to whom he is to perform the obligation. **Lastly, the servant that is put in bonds, or by any other means deprived of his corporal liberty, is freed from that other obligation of contract. For there can be no contract where there is no trust, nor can that faith be broken which is not given.** But the lord who himself serves another, cannot so free his servants, but that they must still continue under the power of the supreme; for, as hath been shewed before, **such servants are not his, but the supreme lord's.**

https://archive.org/details/deciveorcitizen00inhobb/page/110/mode/2up?view=theater

Neither do I know that any writer hath fully declared what liberty, and what slavery is. Commonly to do all things according to our own fancies, and that without punishment, is esteemed to be liberty; not to be able to do this, is judged bondage; which in a civil government, and with the peace of mankind, cannot possibly be done, because there is no city without a command and a restraining right.

> **Liberty, that we may define it, is nothing else but an absence of the lets and hindrances of motion; as water shut up in a vessel is therefore not at liberty, because the vessel hinders it from running out; which, the vessel being broken, is made free.**
> …
>
> **In which sense all servants and subjects are free, who are not fettered and imprisoned.**
> …
>
> **And herein consists civil liberty; for no man, whether subject, son, or servant, is so hindered by the punishments appointed by the city, the father, or the lord, how cruel soever, <u>but that he may do all things, and make use of all means necessary to the preservation of his life and health.</u>**

https://books.google.fi/books?id=3wllAAAAcAAJ&hl=fi&pg=PP29#v=onepage&q&f=false

But because I would not seem to see only with mine own eyes, I desired yet to be better informed of these things, and from whom better then Mr. *Hobbs*, and *Hugo Grotius*, (Men no doubt of as eminent learning and parts, as any this last Age hath produced) **these Men both derive their *civitas* from such Principles, as is before spoken of, *viz. From the Pacts and contracts of Men in a parity and equal condition*;** but so far was I from being convinced, that (if I understand them aright) I was amazed to see such inconsistible and impossible things to come from Men, otherwise so learned.

For though Mr. *Hobbs* does lay down his Principles, and persue his method much more clearly then *Grotius* does; yet his Principles are so monstrous, That to me it is impossible any ingenuous Man should assent to them. Indeed if Mr. *Hobbs* would have supposed, that the state of Man had been either in Society, or out of Society; and that out of Society, Men had been in such a state as he makes them, in his state of pure Nature, I should never have stumbled at it: **But, he forsooth, requires it for a Principle, *That all Men* jure naturali, *are in a parity and equal condition, and may kill one another without any offence or sin; and that Men continue in this estate, until by their civil Pact, they oblige themselves to one another, that the will of the* civitas *shall be the will of them all.***

https://books.google.fi/books?id=6wweBQAAQBAJ&lpg=PP1&hl=fi&pg=PT369#v=onepage&q&f=false

Coke bases his case for natural inequality upon an assumption about the character of divine obligations. If God had granted Adam any authority at all, then no two men could have been equal since.
…

The juridical problem stemmed from Hobbes's attempt to separate *lex* and *jus*, where the latter now took precedence; for Coke, rights transfer alone could not create obligations, because obligations could only arise from laws. **If *jus naturae* was superior to *lex naturae* then, as Coke puts it, every man's natural right is superior to any law.** For Coke Hobbes confirmed this in his statements about the end of obligation in 2.18.

> https://archive.org/details/deciveorcitizen00inhobb/page/38/mode/2up?view=theater
>
> 18. **No man is obliged by any contracts whatsoever not to resist him who shall offer to kill, wound, or any other way hurt his body.** For there is in every man a certain high degree of fear, through which he apprehends that evil which is done to him to be the greatest; and therefore by natural necessity he shuns it all he can, and it is supposed he can do no otherwise. When a man is arrived to this degree of fear, we cannot expect but he will provide for himself either by flight or fight. **Since therefore no man is tied to impossibilities, they who are threatened either with death, (which is the greatest evil to nature) or wounds, or some other bodily hurts, and are not stout enough to bear them, are not obliged to endure them. Furthermore, he that is tied by contract is trusted, (<u>for faith only is the bond of contracts</u>) but they who are brought to punishment, either capital, or more gentle, are fettered, or strongly guarded, <u>which is a most certain sign that they seemed not sufficiently bound from non-resistance by their contracts.</u>** It is one thing, if I promise thus: if I do it not at the day appointed, kill me. Another thing, if thus: if I do it not, though you should offer to kill me, I will not resist. All men, if need be, contract the first way, but there is need sometimes. This second way, none; neither is it ever needful; **for in the mere state of nature, if you have a mind to kill, that state itself affords you a right;** insomuch as you need not first trust him, if for breach of trust you will afterwards kill him. But in a civil state, where the right of life, and death, and of all corporal punishment is with the supreme; that same right of killing cannot be granted to any private person. **<u>Neither need the supreme himself contract with any man patiently to yield to his punishment, but only this, that no man offer to defend others from him.</u>**

https://books.google.fi/books?id=3wllAAAAcAAJ&hl=fi&pg=RA1-PA25#v=onepage&q&f=false

Nor does he only make Fear to be the prime cause of all Humane Government and Civil Society, but also (*chap.* 16. *art.* 1.) he makes it the cause of all Religion, and Worship of God.

As if that men were not obliged to submit to higher Powers, *not only for wrath*, (take it in what sense you will, either fear of the wrath of the higher Powers, or mutual fear of the wrath of other men) *but also for conscience sake*: And that God were not in gratitude to be worshipped and served by ingenuous men, because he is good, and created them intellectual and reasonable creatures; but only by a servile fear of his Judgments, from whence only vile and vitious men seem to, but never truly serve or honor him. **A pretty institution of Religion and Government for the Men of *Bedlam*, and Wives of *Billingsgate*.**
...

If Mr. *Hobbs* had by a state of Nature understood such a state as S. *Paul* does, ***viz*. of men who have only the Law of Nature, and not Gods Divine Law supernaturally revealed in the Scriptures, to be their rule and guide;** and that men in such a state not having the Law, may by Nature do the things contained in the Law, (for this Law is ingraven in the hearts of all men) he should have disputed without an Adversary for me. **But when he makes all men *Jure naturali* (which is superior, and the cause of all Laws of Nature) to be equal, and in a parity of condition,** and every man by his own natural right to have a power over every man, and to kill and destroy them, whensoever it seems good unto him, and yet without any sin; and that this State is only to be cured by the Laws of Nature of his own making, (although he would have them to be Divine Law, and contrary to Natural rights) is such a monstrous Paradox and absurdity, as I wonder any Ingenuous man should assent to it.
...

It is not worth the examining, what he would have under the title of *Religion*; for men say, the man is of none himself, and complains (they say) he cannot walk the streets, buy the Boys point at him, saying, *There goes HOBBS the Atheist!* It may be therefore the reason, **why in all his Laws of Nature, he allows no place for the Worship and Service of *GOD*.**
...

1. His marginal Note up *Art*. 3. *Cap*. 1. is, ***Homines naturâ aequales esse inter se*.**

There is no one Proposition in the world more false then this, nor more destructive to all faith, and truth of Sacred History. For whereas he says, that by nature Men are equal to one another; if the Scriptures be true, that God made *Adam* an Universal Monarch (as he says) as well over his Wife and Children, as other Creatures; and that since *Adam*, God did never create any Man, but the species of Mankind was continued by generation, and that (as he says) Primogeniture is preferred by the Law of Nature, (which *Cap*. 3. *Art*. 29. is immutable;) **then it is impossible that since *Adam* any two men in the world can be equal, where God does not make them so.**
...

2. His argument to prove the Natural equality of all Men, is, *Aequales sunt, qui aequalia contra se invicem possunt: At qui maxima possunt, nimirum occidere, aequalia possunt: Ergo, Homines natura aequales inter se*.

His minor Proposition is no where proved; and I am sure, contrary to what God says, *Whoso sheddeth mans blood, by man shall his blood be shed, for in the image of God made he man*.
...

4. *Filium in statu naturali intelligi non posse*.

And therefore from *Adam* to our Saviour, could there be no such natural state; For S. *Luke*, *cap*. 3. gives a Genealogie of *Adams* sons, and sons sons, to our Saviour: And since, I do not think Mr. *Hobbs* can shew, that ever there was such a state in the world.
...

11. *No man can be obliged by his Pact, not to resist him, who brings or intends damage to his body.*

And therefore no penal Laws can be executed; but Subjects are freed from their obedience, whensoever they have so far transgressed Laws, that they become liable to any corporal punishment; for where men may resist, there can be no subjection.

https://en.wikipedia.org/wiki/Samuel_Parker_(bishop_of_Oxford)

His *Discourse of Ecclesiastical Politie* (1670) advocated state regulation of religious affairs, and is his major work.[8] It has been called "the most ferocious of the Restoration assaults upon the dissenters".[9]

http://www.gutenberg.org/files/17388/17388-h/17388-h.htm#CHAPTER_V

He was a coarse-fibred, essentially irreligious fellow, **the accredited author of the reply to the question "What is the best body of Divinity?" "That which would help a man to keep a Coach and six horses,"** but he is a lucid and vigorous writer, knowing very well that he had to steer his ship through a narrow and dangerous channel, avoiding Hobbism on the one side and tender consciences on the other. **Each generation of State Churchmen has the same task.** The channel remains to-day just as it ever did, with Scylla and Charybdis presiding over their rocks as of old. Hobbes's *Leviathan* appeared in 1651, and in 1670 both his philosophy and his statecraft were fashionable doctrine. **All**

really pious people called Hobbes an Atheist. Technically he was nothing of the sort, but it matters little what he was technically, since no plain man who can read can doubt that Hobbes's enthronement of the State was the dethronement of God:—
…

The Church of England, though anxious both to support the king and suppress the Dissenters, could not stomach Hobbes; but if it could not, how was it to deal with Hobbes's question, "if it is *ever* right to disobey your lawful prince, who is to determine *when* it is right?"

Parker seeks to grapple with this difficulty. He disowns Hobbes.

> "When men have once swallowed this principle, **that Mankind is free from all obligations antecedent to the laws of the Commonwealth, and that the Will of the Sovereign Power is the only measure of Good and Evil,** they proceed suitably to its consequences to believe that no Religion can obtain the force of law till it is established as such by supreme authority, that the Holy Scriptures were not laws to any man till they were enjoyn'd by the Christian Magistrate, **and that if the Sovereign Power would declare the Alcoran to be Canonical Scripture, it would be as much the Word of God as the Four Gospels.** (See *Hobbes*, vol. iii. p. 366.) **So that all Religions are in reality nothing but Cheats and impostures to awe the common people to obedience. And therefore although Princes may wisely make use of the foibles of Religion to serve their own turns upon the silly multitude, yet 'tis below their wisdom to be seriously concerned themselves for such fooleries.**" (Parker's *Ecc. Politie*, p. 137.)

https://en.wikisource.org/wiki/Preface_to_Cato%27s_Letters

> But whatever offence the high claimers of spiritual dominion gave Mr. Trenchard, he was sincerely for preserving the Established Church, and would have heartily opposed any attempt to alter it. He was against all levelling in church and state, and fearful of trying experiments upon the constitution. He thought that it was already upon a very good balance; and no man was more falsely accused of an intention to pull it down. The establishment was his standard; and he was only for pulling down those who would soar above it, and trample upon it. **If he offended churchmen, while he defended the legal church, the blame was not his. He knew of no authority that they had, but what the laws gave them; nor can they shew any other. The sanctions of a thousand synods, the names and volumes of ten thousand fathers, weigh not one grain in this argument. They are no more rules to us, than the oracles of Delphos, no more than a college of augurs. Acts of Parliament alone constitute and limit our church government, and create our clergy; and upon this article Mr. Trenchard only asserted what they themselves had sworn.**

As against this fashionable Hobbism, Parker pleads Conscience.

> "When anything that is apparently and intrinsically evil is the Matter of a Human Law, whether it be of a Civil or Ecclesiastical concern, here God is to be obeyed rather than Man."

He forcibly adds:—

> "Those who would take off from the Consciences of Men all obligations antecedent to those of Human Laws, instead of making the power of Princes Supreme, Absolute and Uncontrollable, they utterly enervate all their authority, and set their subjects at perfect liberty from all their commands. **For if we once remove all the antecedent obligations of Conscience and Religion, Men will no further be bound to submit to their laws than only as themselves shall see convenient, and if they are under no other restraint it will be their wisdom to rebel as oft as it is their interest.**" (*Ecc. Politie*, pp. 112-113.)

But though when dealing with Hobbes, Parker thinks fit to assert the claims of conscience so strongly, when he has to grapple with those who, like the immortal author of *The Pilgrim's Progress*, "devilishly and perniciously abstained from coming to Church," and upheld "unlawful Meetings and Conventicles," his tone alters, and it is hard to distinguish his position from that of the philosopher of Malmesbury.

https://books.google.fi/books?id=mTdUtsbybqkC&lpg=PP1&hl=fi&pg=PA108#v=onepage&q&f=false

In *A Demonstration of the Divine Authority of the Law of Nature and of the Christian Religion* (1681), Bishop Samuel Parker of Oxford, **in contrast to Cumberland, argued that God backed up the natural laws not with natural sanctions in this world but with supernatural sanctions after death.** It was the threat of punishment and the promise of reward in an afterlife, he thought, that provided us with the right kind of motivation to obey the natural law. Parker's critique of the Epicureans was familiar: they 'would take away all natural Obligations to Religion, Justice and Honesty' and they 'first endeavour to free the minds of men from all apprehensions of a Divine Providence.'38 **'Without a Lawgiver there can be no Laws,' he remarked in a classically voluntarist manner, using this observation to slide from the Epicureans, who were at least 'consistent with themselves and their Principles,' over to a consideration of 'Master *Hobs*,' who, 'that he may be constant to his own way of contradicting himself,' has 'given us a Body of Natural Laws that were never enacted by the Authority of**

a Legislator.'39 **This kind of criticism of the Epicureans was not, however, balanced with any praise for the Stoics.** Rather, 'having thus far and fairly casheird the Epicurean Principles' over thirty pages, Parker continued with a section on 'the vanity of the stoical Philosophy represented.' Here he could be 'so much the more brief, he judged, in part owing to the way in which 'they relie upon the same Principles' as the Epicureans, so that 'when reduced to practice [they] will resolve themselves into the same Actions.'40

The basic mistake of the Stoics, according to Parker, was their belief that 'every Man's Happiness' could be 'spun out of his own Bowels.'41 'This indeed were a great and glorious Account of things, were it supported by any wise and sober Principles,' he wrote, 'but alas it is so far from having any real Foundation, that it is inconsistent with the first and fundamental Principle of humane Nature,' which Parker described as 'the natural passion of Self-love' that led mankind 'to pursue what it supposes will advance its Content and Happiness, and shun whatever may impair or destroy it.'42 The Stoics' vanity induced them to neglect the fact that 'their Bodies are one half of their Natures,' with 'sensual Appetites too gross to be satiated by bare Thoughts and Reflections'; **and their pedantry made them far too concerned with the 'power of Phrases' at the expense of 'the nature and reality of things.'**43

https://en.wikisource.org/wiki/Dictionary_of_National_Biography,_1885-1900/Tenison,_Thomas

TENISON, THOMAS (1636-1715), archbishop of Canterbury, was born, according to the parish register, on 29 Sept. 1636 at Cottenham, Cambridgeshire.
...

His first book, 'The Creed of Mr. Hobbes examined,' was published in 1670.

https://quod.lib.umich.edu/e/eebo/a64353.0001.001?rgn=main;view=fulltext

Mr. *Hobbes.*

The natural condition of Mankind may be thus explained.

Nature hath made Men so equal[a] in the faculties of Body and Mind; as that, when all is reckoned together, the difference between Man and Man, is not so considerable, as that one man can thereupon claim to himself any benefit to which another may not pretend as well as he.

From this equality of ability, ariseth equality of hope in the attaining of our ends. And therefore if any two Men, desire the same thing, which nevertheless they cannot both enjoy, they become Enemies; and in the way to their end (which is principally their own conservation, and sometimes their Delectation only) endeavour to destroy or subdue one another. Whereupon some are invited to invade others, and from others may fear the like invasion.

From equality of ability, competition ariseth fomented by equality of hope; and from thence diffidence of one another: And from this diffidence attended with desire of glory in conquering, there ariseth a war of every Man against every Man.

And therefore, whatsoever is consequent to a time of War, where every Man is enemy to every Man; the same is consequent to the time wherein men live without other security, than what their own strength, and their own invention shall furnish them withal. In such condition, there is no place for industry; because the fruit thereof is uncertain; and consequently no culture of the earth, no Navigation, nor use of the Commodities that may be imported by Sea; no commodious building; no instruments of moving and removing such things as require much force; no knowledg of the face of the earth; no account of time, no Arts; no Letters; no Society; **and, which is worst of all, continual fear, and danger of violent death; and the life of man, solitary, poor, nasty, brutish, and short.**

To this War of every Man against every Man, this also is consequent. That nothing can be unjust. The notions of Right and wrong, justice and injustice have there no place. Where there is no common power, there is no Law; where no Law, no Injustice. **Force and Fraud, are in war the two Cardinal Virtues. Justice and Injustice are none of the Faculties, neither of the Body, nor Mind.** If they were, they might be in a Man that were alone in the World, as well as his Senses, and Passions. They are Qualities, that relate to Men in Society, not in Solitude. **It is consequent also to the same condition, that there be no propriety, no dominion, no Mine and Thine distinct; but only, that to be every Man's that he can get; and for so long as he can keep it.**

And this is the ill condition, which Man by meer nature is actually placed in; though with a possibility to come out of it: consisting partly in the Passions, partly in his Reason.

The Passions that encline men to peace, are, fear of death; desire of such things as are necessary to commodious living; & a hope by their industry to obtain them. **And Reason suggesteth convenient Articles of Peace, upon which Men may be drawn to agreement. These Articles, are they, which otherwise are called the Laws of Nature.**

Stud.

It is a very absurd and unsecure course to lay the ground-work of all civil Polity and formed Religion, upon such a supposed state of Nature, as hath no firmer support than the contrivance of your own fancy. Let *Ptolemy* endeavour a Solution of those appearances which arise from the heavenly Bodies, by one sort of Scheme; and *Tycho* by another, and *Copernicus* by a third; and let *Des-Cartes* attempt a fourth; for the declaring, not only in what manner, but by what Efficient Cause, the Starrs may move; for thus far the interests of Men remain secure, not being minded by such remote Models and Hypotheses. But when the Temporal and Eternal safety of Mankind is concerned (as in the Doctrines of Civil and Moral, and Christian Philosophy) then are Hypotheses, framed by imagination, and not by reason assisted with Memory touching the passed state of the World, as exceedingly dangerous as they are absurd. **Wherefore, such persons who trouble the World with fancied Schemes and Models of Polity, in Oceana's and Leviathan's, ought to have in their Minds an usual saying of the most excellent Lord *Bacon* concerning a Philosophy advanced upon the History of Nature.** That[a] such a work is the World as God made it, and not as Men have made it: for that it hath nothing of Imagination.

The faithful Records of time give us another account of the Origin of Nations; and common Sense, whereby one apprehends in another's birth, the manner of his own, doth sufficiently instruct us in this truth, that we are born, and grow up under Government; **Our Parents being[a] before the Institution of Commonwealth, absolute Soveraigns in their own Families: And as *Hierocles* speaketh,[b] Gods upon Earth.** Wherefore *Cicero,* discoursing of the many Degrees of the Society of Men, calleth[c] Wedlock the beginning of a City; and, as it were, the Seminary of a Kingdom.

c. *Cicero de Offic. l.* 1. *S.* 17. *op p.* 1217. *Principium urbis & quasi Seminarium Reipublicae.*

So that, to talk of such a state of nature as supposeth an Independency of one person upon another, is to lay aside not only the History of *Moses*, but also of Experience, which teacheth that we are born Infants, (of Parents, for that reason, to be obey'd), and to put some such cheat upon the World, **as Nurses are wont, in sport, to put upon unwary Children, when they tell them, they started up out of the Parsley-bed.** And verily some such odd conceit is to be suspected in that Man who says, that all is Matter, and by consequence, that Mankind arose, at first, out of the fortuitous Concretions of it. ***Epicurus* therefore in sequel of that doctrine of his, that all things were produced by atoms, explained the birth of Man, by supposing certain swelling bags or wombs upon the earth, which brake at last, and let forth Infants[d] nourished by her Juice, clothed by her Vapours, provided of a bed in the soft grass: and he also taught that in the beginning (though he knew not when) Men wander'd about like Beasts, and every one was for himself, and that meerly to secure themselves, they combin'd into Societies; and that those Societies were formed by Pacts and Covenants, and that from those Covenants sprang good and evil, just and unjust.** For, such a Romance is to be read, at large, in his Compurgator, *Gassendus,*[a] who subjoyneth no Essay of confutation.

d. *Lucret. Crescebant uteri terram radicibus apti, &c.* a. *Gassend. Phil. Epi. Synt. c.* 26. *de Orig. Juris, p* 238, 239.

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0131%3Abook%3D5%3Acard%3D772

Then it was
This earth of thine first gave unto the day
The mortal generations; [mortalia saecla] for prevailed
Among the fields abounding hot and wet.
And hence, where any fitting spot was given,
There 'gan to grow womb-cavities, by roots
Affixed to earth. And when in ripened time
The age of the young within (that sought the air
And fled earth's damps) had burst these wombs, O then
Would Nature thither turn the pores of earth
And make her spurt from open veins a juice
Like unto milk; even as a woman now
Is filled, at child-bearing, with the sweet milk,
Because all that swift stream of aliment
Is thither turned unto the mother-breasts.
There earth would furnish to the children food;
Warmth was their swaddling cloth, the grass their bed
Abounding in soft down. Earth's newness then
Would rouse no dour spells of the bitter cold,
Nor extreme heats nor winds of mighty powers –
For all things grow and gather strength through time
In like proportions; and then earth was young.
...

In suchwise, then, the lapsing aeons change
The nature of the whole wide world, and earth
Taketh one status after other. **And what**
She bore of old, she now can bear no longer,
And what she never bore, she can to-day.

https://archive.org/details/enlightenmentcon0000isra/page/740/mode/2up?view=theater

> Mirabaud, **from 1742 the Abbé Houtteville's successor as permanent secretary of the Académie Française,** formerly friendly with Boulainvilliers and now a central figure of the budding *parti philosophique*, stoutly maintained in his *Le Monde, son origine et son antiquité*, composed probably before 1722 and later published clandestinely in 1751,40 **that the ancient Greek philosophers made no recourse to any 'Être intelligent' in order to explain 'la production des animaux.'**
> …
>
> But as articulated by Mirabaud the idea still seemed implausibly simplistic. **For he got no further than surmising, like his favourite philosophical ancients, that men, animals, and plants just sprang or grew up out of the earth in some way, no doubt 'comme des champignons' – as a Jesuit critic commented sarcastically.**42

Mr. *Hobbes.*

It may[b] peradventure be thought, there was never such a time, nor condition of War, as this now described; and I believe it was never generally so, over all the World: But there are many places where they live so now. For, the Savage People in many places of *America,* except the Government of small Families, the concord whereof dependeth on Natural Lust, have no Government at all, and live at this day in a brutish manner.

Stud.

I am sorry that so much barbarousness being charged upon Mankind, so little of the imputation can be fairly taken off Yet that the condition of human nature is not so very rude as you seem to represent it, appeareth from many passages in undoubted Story. *Iustin,*[c] in his Epitom of *Trogus Pompeius,* describeth the ancient *Scythians* in such a manner, that their Behaviour seemeth to upbraid those People, who call themselves, The Civilized parts of the World. By him we are informed,

> That they had neither Houses, nor Enclosures of ground, but wander'd with their Cattel in solitary and untilled Desarts; That Justice had honour derived, to it, not from positive Law, but from the good natures of the People. That no man was more odious, amongst them than the Invader of such things as were occupied by another.

In consideration of which inbred civility, the Historian wisheth that the other Nations of the World were followers of the *Scythick* Moderation; after which, he thus concludeth.

> It may seem a matter fit to be admired, that Nature should bestow that upon the *Scythians,* which the *Graecians* themselves, though long instructed by the Doctrines and Precepts of Law-givers and Philosophers, have not attain'd to: and that formed manners should be excelled by uneducated Barbarity.

But, let it be supposed that many brutish Families in *America* **(in whose stead you might have rather mentioned the wild *Arabes*[a]),** are so many dens of Robbers, and live by such prey as their power and wildness can provide for them. Yet by this Instance, because it is made in Families, where Government has place, you rather overthrow than prove your supposed state of Nature. Wherefore, in a note added, upon second thoughts, to your Book *de Cive*[b] in order to a Solution of this Argument [that the Son killing his Parent, in the state of Nature, acteth unjustly] you subjoin an Answer to this effect: A man cannot be understood to be a son in the meer state of Nature, seeing as soon as he is born he is under the lawful[c] Power and Government of them, to whom he oweth his conservation; to wit, of his Mother or Father, or to him who affords him Provisions of common life.

It is further to be marked, that one Family, as it stands separated from another, is as one Kingdom divided from the Territories of a Neighbouring Monarch. **If therefore the state of Nature remaineth in a Family not depending upon another Family, in places where there is no common Government; then all Kingdoms which have not made Leagues with one another, are, at this day, in the same state.** Whereas they rather are in a state of defence dictated by prudence; and, as you say, in the posture[a] of Gladiators, having their swords pointing, and their Eyes fixed on one another, than in a state of War, prompted by pride and insatiable ambition. And therefore no affront being offered to a foreign Prince before his Invasion, he is esteem'd both injurious and unjust, whilst for no other reason than his greedy Will, he thrusts inoffensive people out of ancient possession. I know you esteem all distinct Kingdoms in a state of War in relation to each other,[b] and that therefore they have a right, if they have a Power of invading: **but he that consults *Grotius,* in his Book *de jure belli & Pacis* (designed chiefly[c] to set forth the Rights, not of Domestick, but Forensick War) will not be much of your opinion; neither will he, easily, be reconcil'd to the Practice of the *Romans,* in *Petronius Arbiter,*[d] (a Practice to which that of the *Spaniards* is akin), who made foreign Nations to be Enemies, as Princes sometimes make their Subjects, Traytors; for the sake of their Riches.**

> d. *Si qua foret tellus quae fulvum mitteret aurum, hostis erat.*

…

And thus, the Prince is always in a state of danger, because he cannot be, a day secure, of remaining uppermost; **seeing the people are taught by you, to believe that the right of Authority is a deceit, and that every one would have as good a title, if he had as long a sword:** For the many-headed Beast will throw the Rider when he burthens and galls them, having no check of inward Law. For the Prince has but the strength of a single man, and the people can't confer irresistible Power, unless when they lift up their hands on high, they can give up their nerves, and muscles, and spirits, as well as testifie their present approbation. **Wo to all the Princes upon earth, if this doctrine be true, and becometh popular:** if the multitude believe this, the Prince, not armed with the scales of the *Leviathan,* that is, with irresistible power, can never be safe from the Spears and Barbed irons, which their ambition and presumed interest will provide, and their malice will sharpen, and their passionate violence throw against him. **If the Beast, we speak of, come but to know its own strength, it will never be managed:** Wherefore such as own these pernicious doctrines, destructive to all Societies of men, may be said to have Wolves heads, as the Laws of old were wont to speak concerning excommunicated Persons; and are like those ravenous beasts, so far from deserving our love and care, that they ought to be destroyed at the common charge. **What you have written three times over, in your *de cive, de corpore politico,* and *Leviathan,* ought rather to be esteemed seeds of sedition, then Elements of government and societie: the Principles of the Zelots amongst the Papists (who obey a Forrein Power against the King) are not consistent with the government of *England*; yet, like the Elements in *Aristotle,* they are not burthensome in their proper place of *Italy*: but of such large infection is the doctrine, that it will endanger the life of the Common-wealth, wheresoever it is entertained in the consequences of it.**

Mr. *Hobbes.*

At *Paris*[a] I wrote my Book *de cive in Latine*—and I know no book more magnified then that beyond the Seas. Natural Philosophie[b] is but young; but civil Philosophie yet much younger, as being no older (I say it provoked, and that my detractors may know how little they have wrought upon me) then my own book *de Cive:* a short[c] sum of that book of mine, now publiquely in French, done by a Gentleman I never saw, carrieth the title of *Aethics demonstrated:* accuse not then such Politics, as are, though new, yet of sure foundation.

Stud.

Your Doctrine is old enough, and I wish it had one propertie of Age, to be attended with decay. *Carneades* and divers others bottom'd Policy and self-Interest, and you have only wire-drawn that which is delivered by them in a lump: and for this, as is the manner of divers who have an itch of writing, you claw your self. I could repeat to you, divers sayings of the ancient deceivers in Moralitie; such as are, *Armatus leges ut cogitem? nec natura potest justo secernere iniquum, —utilitas justi prope mater & aequi,* and the like: but you would then turn all off, by deriding me for having made a motly Oration. **I have somtimes, by my self, made this conjecture, that you being so conversant with *Thucydides*; the Oration of *Euphemus*[d] delivered there, might first hint to you your sandy Politicks:** for that *Athenian* Embassadour to the *Camarinai,* amongst other things tending much that way, at last plainly told them, that to a Governour nothing which was profitable was dishonest, or unreasonable: which Doctrine, because it invites ambitious men to step into Authority when the door is open, and mercenary soldiers to decide a dispute, not in favour of the right, but the most profitable side; because it moveth them that are supream to become Tyrants in the exercise of that power, which Religion ought to limit, though the people may not, and to make their passions their chief rules, and to govern with Armies rather then Laws, or, if with both, to dy their Flags, and to write their Edicts, in the blood of whom they please: because, I say, it taketh off all sence of what we call humanity from the supream powers, and so, not unlike to a *Porta Sabina,* calls in innumerable evils upon such people as are quiet and modest; it therefore ought, no more to be sucked in, by Prince or People, then pernicious air in time of common Pestilence.
…

In some things you are just to the Praerogative of Kings; but in others, you ought to have remembred the words of our Lord, who adviseth us to give to *Caesar* the things that are *Caesars,* and unto God the things that are Gods. For your cavil at the name Tyrant, it is in the sense I us'd it (for exercise of unlimited power) unbecoming a Prince: but I know how very frequently it is misapply'd by those, who will call the very bridling of their licentiousness, hateful Tyranny; and find fault with the law, for no other reason but because it is a restraint upon their supposed freedome: whereas the hedges which the law sets down, are to keep them only in the truest and safest way. **The absolute Princes of *Syracuse* were called Tyrants, though some of them deserved the title of Benefactors: and amongst our selves, the best of Kings was branded with that ignominious character.** For that which you have justly said in favour of a Monarch, had it bin Printed before Forty eight, it might have bin of good effect, at least it might have shewed a disposition to promote Loyalty. **But being published, after the Kings Martyrdom, and his Sons exile, it served the purposes of those people who had then the *Militia* in their hands.** For you say[a] that the Rights of a Common-wealth by acquisition, are the same with those, by Institution or Succession: That the power of the Representative (whether in one or many) cannot without consent be transferr'd, forfeited, accus'd, punish'd: and that such a person is Supreme Judge. The Parliament therefore ought to have return'd you thanks, for ascribing to them the strength of the Leviathan, and for keeping their *nostrils* free from the *books* of the right Heir and his adherents. They ought, especially, to have given you the thanks of the House for saying,[b] *I maintain nothing in any Paradox of Religion; but attend the end of that dispute of the Sword, concerning the Authority, (not yet amongst my Country-men decided) by which all sorts of Doctrine are to be*

approved, or rejected; and whose commands, both in speech and writing; (whatsoever be the opinions of private men) must by all men, that mean to be protected by their Laws, be obeyed.

But notwithstanding all this, **what you seem to build up on the side of the Soveraign, you pull down on the side of the People.** For whilst you found all upon single Self-interest, (to the advancement of which all safe means are, by you, esteemed[c] lawful) these specious rights are no longer his, then by main force he can keep possession of them. That will not be long, if great Delinquents call'd in question, and miserable people (who, like such as stake their Cloak in an over-hot day, are willing to hazard the life they would be rid of; and are easily misled, not looking upon the stumbling-blocks in the way, but[d] on the light that others carry before them), if these, can promote their private good, by Sword, or Poyson, or Mutiny. **The people, if they believ'd that a company of Delinquents,[e] joyning together to defend themselves by Arms, do not at all unjustly; but may, lawfully, *repel* lawful *Force, by Force*; they would soon be stirred up, and suffer none, for whom they have respect, to be brought to justice.**

https://books.google.nl/books?id=X_1MAQAAMAAJ&hl=nl&pg=PA38#v=onepage&q&f=false

It is therefore already demonstrated, that each of them [*Hobbes and Tindal*] does give the Magistrate as great a Power in those Matters, as the other complements him with: **And indeed it is but a Bare, Mere, Impious, Dangerous, Deceitful, Antichristian, Blasphemous, *Atheistical* Flattery, to complement him with all the Power relating to Religion that Man is capable of, *only* and *solely* because he is Elected Governor of the Common-wealth by a *Mobb*, still in a *State of Nature*. And really I think one must be very short-sighted, if he does not see whence this Doctrine comes, whether it tends, and what the *Hypothesis* is, upon which 'tis solely bottom'd.**

https://archive.org/details/newscienceofgiam030174mbp/page/n85/mode/2up?view=theater

177 **Wherever a people has grown savage in arms so that human laws have no longer any place among it, the only powerful means of reducing it is religion.**

178 This axiom establishes the fact that divine providence initiated the process by which the fierce and violent were brought from their outlaw state to humanity and entered upon national life. It did so by awaking in them a confused idea of divinity, which they in their ignorance attributed to that to which it did not belong. **Thus through the terror of this imagined divinity, they began to put themselves in some order.**

179 Such an [initiating] principle of things Thomas Hobbes failed to see among his own "fierce and violent men," because he went afield in search of principles **and fell into error with the "chance" of his Epicurus.** He thought to enrich Greek philosophy by adding a great part which it certainly had lacked (as George Pasch observes in his *De eruditis huius saeculi inventis*): the study of man in the whole society of the human race. **But the result was as unhappy as the effort was noble. Nor would Hobbes have conceived this project if the Christian religion had not given him the inspiration for it. For it demands of all mankind not merely justice but charity. From this point begins the refutation of the false dictum of Polybius that if the world had philosophers there would be no need of religions. For if there were in the world no commonwealths, which cannot arise without religions, it would have no philosophers.**

https://archive.org/details/newscienceofgiam030174mbp/page/n197/mode/2up?view=theater

553 **Among the impious giants who had continued the infamous sharing of property and women, the quarrels produced by the sharing finally brought it about, at the end of a long period of time, that (to borrow the language of the jurists) Grotius's simpletons and Pufendorf's abandoned men had recourse to the altars of the strong to save themselves from Hobbes's violent men,** even as beasts driven by intense cold will sometimes seek salvation in inhabited places. Thereupon the strong, with a fierceness born of their union in the society of families, slew the violent who had violated their lands, and took under their protection the miserable creatures who had fled from them. **And above the heroism of nature which was theirs as having been born of Jove or engendered under his auspices, there now shone forth preëminently in them the heroism of virtue. In this heroism the Romans excelled all other peoples of the earth, practicing precisely these two aspects ot it, sparing the submissive and vanquishing the proud: *Parcere subiectis et debellare superbos*.**

Political sophistication, the arts, civilization itself being inseparable from hierarchy in Voltaire's schema, he tended to be bitingly sarcastic about the concept of equality. **In a 'state of nature,' such as primitive man had once shared with the quadrupeds, birds, and reptiles, he was willing to grant, Man had doubtless lived in a state of perfect equality.** There 'domination' would indeed have been unthinkable, an absurdity. But, as far as he could see, in any more developed society, the

concept was not in any way constructive or in the least appealing: 'l'égalité,' as he summed the matter up, 'est donc à la fois la chose la plus naturelle, et en même temps la plus chimérique.'9

German Natural Law theory and Barbeyrac, while, like Hobbes, certainly proclaiming a fully secularized 'natural equality' in the pre-political status of Man and one applying universally, were scarcely less disdainful of equality under society and the state than Voltaire. Anxious to underpin the patriarchal family, aristocracy, and kingship, **these theorists immediately cancelled their starting point of 'natural equality,'** asserting the 'natural' inequality ordained by God in his highly unequal distribution of authority, family sway, status, and property.10
…

Locke, of course, in his *Second Treatise of Government*, likewise asserts that 'all men by nature are equal.'32 But for both Hobbes in large part, and also Locke, this 'equality of men by nature' effectively ceases with the advent of the state and has no reformist social implications and few other than strictly constitutional consequences in society constituted under a ruler;33 and where it does, it persists in Locke primarily as an equality of conscience and the duty of salvation. **Hobbes was undoubtedly the first general theorist of equality in the state of nature;** but, by insisting, as he does, on the huge qualitative change that occurs with the transition, through the social contract, to life under the state, **it is equally correct to say that he constructs a naturalist theory of structured, justified inequality: 'the inequality of subjects,' he affirms in the *Leviathan*, 'proceedeth from the acts of sovereign power,'** something which, for him, overrides most of the natural rights preceding the state of society and politics. **Locke too immediately claws back from his statement 'that all men by nature are equal,' listing 'birth' rather obscurely as one important qualification, meaning certainly subjection of children to parents, and women to men, but implying at least also subordination of those of lower social status to royalty and nobility.**34

https://en.wikipedia.org/wiki/A_Disquisition_on_Government

A Disquisition on Government is a political treatise written by U.S. Senator John C. Calhoun of South Carolina and published posthumously in 1851.

Liberty, indeed, though among the greatest of blessings, is not so great as that of protection; inasmuch, as the end of the former is the progress and improvement of the race,—while that of the latter is its preservation and perpetuation. And hence, when the two come into conflict, **liberty must, and ever ought, to yield to protection; as the existence of the race is of greater moment than its improvement.**

> https://ifstudies.org/blog/what-home-ownership-has-to-do-with-healthy-families
>
> **In 1911, G.K. Chesterton described family ownership of income-generating property as not only one policy goal among many, but the only proper criterion by which to judge a government:**
>
> > An honest man falls in love with an honest woman; he wishes, therefore, to marry her, to be the father of her children, to secure her and himself. All systems of government should be tested by whether he can do this. **If any system, feudal, servile, or barbaric, does, in fact, give him so large a cabbage-field that he can do it, there is the essence of liberty and justice. If any system, Republican, mercantile, or Eugenist, does, in fact, give him so small a salary that he can't do it, there is the essence of eternal tyranny and shame.**[1]

It follows, from what has been stated, **that it is a great and dangerous error to suppose that all people are equally entitled to liberty. It is a reward to be earned, not a blessing to be gratuitously lavished on all alike;**—a reward reserved for the intelligent, the patriotic, the virtuous and deserving;—and not a boon to be bestowed on a people too ignorant, degraded and vicious, to be capable either of appreciating or of enjoying it.
…

There is another error, not less great and dangerous, usually associated with the one which has just been considered. **I refer to the opinion, that liberty and equality are so intimately united, that liberty cannot be perfect without perfect equality.**

That they are united to a certain extent,—**and that equality of citizens, in the eyes of the law, is essential to liberty in a popular government, is conceded.** But to go further, and make equality of *condition* essential to liberty, would be to destroy both liberty and progress. The reason is, that inequality of condition, while it is a necessary consequence of liberty, is, at the same time, indispensable to progress.
…

These great and dangerous errors have their origin in the prevalent opinion that all men are born free and equal;—than which nothing can be more unfounded and false. It rests upon the assumption of a fact, which is contrary to universal observation, in whatever light it may be regarded. **It is, indeed, difficult to explain how an opinion so destitute of all sound reason, ever could have been so extensively entertained, unless we regard it as being confounded with another, which has some semblance of truth;—but which, when properly understood, is not less false and dangerous. I refer to the assertion, that all men are equal in the state of nature; meaning, by a state of nature, a state of individuality, supposed to have existed prior to the social and political state; and in which men lived apart and independent of each other.** If such a state ever did exist, all men would have been, indeed, free and equal in it; that is, free to do as they pleased, and exempt from the authority or control of others—as, by supposition, it existed anterior to society and government. But such a state is purely hypothetical. **It never did, nor can exist; as it is inconsistent with the preservation and perpetuation of the race. It is, therefore, a great misnomer to call it *the state of nature.* Instead of being the natural state of man, it is, of all conceivable states, the most opposed to his nature—most repugnant to his feelings, and most incompatible with his wants. His natural state is, the social and political—the one for which his Creator made him, and the only one in which he can preserve and protect his race.** As, then, there never was such a state as the, so called, state of nature, and never can be, it follows, that men, instead of being born in it, are born in the social and political state; and of course, **instead of being born free and equal, are born subject, not only to parental authority, but to the laws and institutions of the country where born and under whose protection they draw their first breath.**

http://www.amnation.com/vfr/archives/002826.html

In 1860 in New Orleans, Sherman reacted to the secession of South Carolina by saying to neighbors that if the Union allowed a Southern republic to secede, it itself would soon divide: **“If Louisiana joins this unhallowed movement to dismember our government how long will it be till her parishes and people insult and deride her?”**

He felt that a North shorn of the south could still survive and thrive as long as it possessed the Mississippi. But not if Louisiana, Mississippi, and Arkansas should secede: “Then there must be war, fighting that will continue till one or the other party is subdued.”

> You cannot qualify war in harsher terms than I will. War is cruelty and you cannot refine it … I know I had no hand in making this war, and I know I will make more sacrifices today than any of you to secure peace. But you cannot have peace and division of our country. **If the United States submits to a division it will not stop but will go on until we reap the fate of Mexico, which is eternal war** …

To meet the argument of these aspiring Amazons fairly, one must teach, with Moses, the Apostle Paul, John Hampden, Washington, George Mason, John C. Calhoun, and all that contemptible rabble of “old fogies,” that political society is composed of “superiors, inferiors, and equals”; that while all these bear an equitable moral relation to each other, they have very different natural rights and duties; that just government is not founded on the consent of the individuals governed, but on the ordinance of God, and hence a share in the ruling franchise is not a natural right at all, but a privilege to be bestowed according to a wise discretion on a limited class having qualification to use it for the good of the whole; **that the integers out of which the State is constituted are not individuals, but families represented in their parental heads; that every human being is born under authority (parental and civic) instead of being born “free” in the licentious sense that liberty is each one’s privilege of doing what he chooses; that subordination, and not that license, is the natural state of all men;** and that without such equitable distribution of different duties and rights among the classes naturally differing in condition, and subordination of some to others, and of all to the law, society is as impossible as is the existence of a house without distinction between the foundationstone and the cap-stones.

Our fathers valued liberty, but the liberty for which they contended was each person's privilege to do those things and those only to which God's law and Providence gave him a moral right. **The liberty of nature which your modern asserts is absolute license; the privilege of doing whatever a corrupt will craves, except as this license is curbed by a voluntary "social contract."**

https://archive.org/details/DiscussionsOfRobertLewisDabneyVol.3Philosophical/page/n365/mode/2up?view=theater

(1.) A hundred years ago French atheism gave the world the Jacobin theory of political rights. **The Bible had been teaching mankind for three thousand years the great doctrine of men's moral equality before the universal Father, the great basis of all free, just, and truly republican forms of civil society.** Atheism now travestied this true doctrine by her mortal heresy of the absolute equality of men, asserting that every human being is naturally and inalienably

entitled to every right, power, and prerogative in civil society which is allowed to any man or any class. **The Bible taught a liberty which consists in each man's unhindered privilege of having and doing just those things, and no others, to which he is rationally and morally entitled.** Jacobinism taught the liberty of license—every man's natural right to indulge his own absolute will; and it set up this fiendish caricature as the object of sacred worship for mankind.

The popular theory of man's natural rights, of the origin of governments, and of the moral obligation of allegiance, is that which traces them to a *social contract*. The true origin of this theory may be found with Hobbes of Malmesbury. **It owes its respectability among Englishmen, chiefly to the pious John Locke, a sort of baptized image of that atheistic philosopher;**[90] and it was ardently held by the infidel democrats of the first French revolution. **According to this scheme, each person is by nature an independent**

***integer*, wholly *sui juris*, absolutely equal to every other man, and naturally entitled, as a "Lord of Creation," to exercise his whole will. Man's natural liberty was accordingly defined as *privilege to do whatever he wished*.** True, Locke attempts to limit this monstrous postulate by defining man's native liberty as privilege to do whatever he wished within the limits of the law of nature.
...

Once more, this theory draws a broad distinction between man's civil liberty as a subject of government, and his natural liberty. The latter it defines as *privilege to do whatever the man pleases*, within the limits of natural law as interpreted by himself. **All government, therefore, is not only of the nature of restraint; it is essentially *restraint upon one's rights*. The advocates of the theory distinctly represent government as of the nature of a natural evil and wrong, but adopted as an expedient against the worse evil, anarchy; and therefore the obligation to obey it has no higher source than expediency.** But worse yet; if there is any such thing as intrinsic morality, government is an immoral restraint, for it is a *restraint upon rights*. Whatever good government may bring us, it is of that species which St. Paul reprobates, as "doing evil that good may come." **The great Hobbes was therefore perfectly consistent, in teaching that there is no original morality in acts, and that there was at first no such thing as right, distinct from might.** Morals are factitious distinctions invented under civil society for expediency. Let the thoughtful reader consider how this monstrous conclusion uproots all obligation, and order, and allegiance. No man can hold the theory of the origin of government in the social contract, unless he either holds, with Hobbes, this damnable error, **or with some abolitionists, (who are thoroughly consistent here,) that *all government is immoral*.**

https://archive.org/details/cannibalsallorsl00fitz/page/368/mode/2up?view=theater

> **We warn the North, that every one of the leading Abolitionists is agitating the negro slavery question merely as a means to attain ulterior ends, and those ends nearer home.** They would not spend so much time and money for the mere sake of the negro or his master, about whom they care little. But they know that men once fairly committed to negro slavery agitation—once committed to the sweeping principle, "that man being a moral agent, accountable to God for his actions, should not have those actions controlled and directed by the will of another," **are, in effect, committed to Socialism and Communism, to the most ultra doctrines of Garrison, Goodell, Smith and Andrews—to no private property, no church, no law, no government,—to free love, free lands, free women and free churches.**
>
> There is no middle ground—not an inch of ground of any sort, between the doctrines which we hold and those which Mr. Garrison holds. **If slavery, either white or black, be wrong in principle or practice, then is Mr. Garrison right—then is all human government wrong.**

> To understand the full macabre nature of the Bolshevik state, we need to grasp that Lenin, following Marx and Engels, **viewed the state as a purely negative thing – an idea that came ultimately from Hobbes.**
> ...
>
> Hence Hobbes portrayed the state as entirely negative: born out of chaos, it exists only to suppress chaos.
>
> Marx, Engels, and Lenin adopted this idea, but rather than focusing on individuals in the state of nature, they focused on classes. **Thus the "state is the product and the manifestation of the *irreconcilability* of class antagonisms."**10 That is why the state does not and cannot act as "an organ for the *conciliation* of classes."11 **If there could be reconciliation, Lenin thunders, there wouldn't be a need for the state to begin with.** The state is by definition irredeemably oppressive.

https://en.wikisource.org/wiki/David_Strauss:_the_Confessor_and_the_Writer#VII.

With a certain rude self-satisfaction, he swathes himself in the hirsute garment of our Simian genealogists, and extols Darwin as one of mankind's greatest benefactors; but our perplexity is great when we find him constructing his ethics quite independently of the question, "What is our conception of the universe?" In this department he had an opportunity of exhibiting native pluck; **for he ought to have turned his back on his "We," and have established a moral code for life out of *bellum omnium contra omnes*[4] and the privileges of the strong. But it is to be feared that such a code could only have emanated from a bold spirit like that of Hobbes', and must have taken its root in a love of truth quite different from that which was only able to vent itself in explosive outbursts against parsons, miracles, and the "world-wide humbug" of the Resurrection.** For, whereas the Philistine remained on Strauss's side in regard to these explosive

outbursts, he would have been against him had he been confronted with a genuine and seriously constructed ethical system, based upon Darwin's teaching.

https://archive.org/details/humanalltohuman033380mbp/page/n105/mode/2up?view=theater

92. The Origin of Justice.—**Justice (equity) has, its origin amongst powers which are fairly equal,** as Thucydides (in the terrible dialogue between the Athenian and Melian ambassadors) rightly comprehended: that is to say, **where there is no clearly recognisable supremacy,** and where a conflict would be useless and would injure both sides, there arises the thought of coming to an understanding and settling the opposing claims; the character of *exchange* is the primary character of justice. Each party satisfies the other, as each obtains what he values more than the other. Each one receives that which he desires, as his own henceforth, and whatever is desired is received in return. Justice, therefore, is recompense and exchange based on the hypothesis of a fairly equal degree of power,—thus, originally, revenge belongs to the province of justice, it is an exchange. Also gratitude.—**Justice naturally is based on the point of view of a judicious self-preservation, on the egoism, therefore, of that reflection, "Why should I injure myself uselessly and perhaps not attain my aim after all?"** So much about the *origin* of justice. Because man, according to his intellectual custom, has *forgotten* the original purpose of so-called just and reasonable actions, and particularly because for hundreds of years children have been taught to admire and imitate such actions, the idea has gradually arisen that such an action is un-egoistic; upon this idea, however, is based the high estimation in which it is held: which, moreover, like all valuations, is constantly growing, for something that is valued highly is striven after, imitated, multiplied, and increases, because the value of the output of toil and enthusiasm of each individual is added to the value of the thing itself. **How little moral would the world look without this forgetfulness! A poet might say that God had placed forgetfulness as door-keeper in the temple of human dignity.**

https://archive.org/details/cu31924021569284/page/n221/mode/2up?view=theater

26. Legal Conditions as Means.—**Law, where it rests upon contracts between equals, holds good so long as the power of the parties to the contract remains equal or similar.** Wisdom created law to end all feuds and useless expenditure among men on an equal footing. Quite as definite an end is put to this waste, however, when one party has become decidedly weaker than the other.
...

31. Vanity as an Anti-Social Aftergrowth.—**As men, for the sake of security, have made themselves equal in order to found communities, but as also this conception is imposed by a sort of constraint and is entirely opposed to the instincts of the individual,** so, the more universal security is guaranteed, the more do new offshoots of the old instinct for predominance appear. Such offshoots appear in the setting-up of class distinctions, in the demand for professional dignities and privileges, and, generally speaking, in vanity (manners, dress, speech, and so forth). **So soon as danger to the community is apparent, the majority, who were unable to assert their preponderance in a time of universal peace, once more bring about the condition of equality, and for the time being the absurd privileges and vanities disappear. If the community, however, collapses utterly and anarchy reigns supreme, there arises the state of nature: an absolutely ruthless inequality as recounted by Thucydides in the case of Corcyra. Neither a natural justice nor a natural injustice exists.**

https://cpsa-acsp.ca/papers-2012/Howell.pdf

It is strange that scholars of political philosophy who have written on *Thus Spoke Zarathustra* haven't paid much attention to the section entitled 'Of the New Idol' where Zarathustra explicitly criticizes a favorite topic of political scientists, the state. **It is even stranger given the comparison of the state to a 'cold monster,' and Nietzsche's identification of English philosophy as the origin of modern ideas, that scholars haven't drawn more explicit comparisons to Thomas Hobbes' great work of political philosophy *Leviathan*** (Beyond Good and Evil, pp. 191-192 aph. 253).
...

Modernist despotism remains a means to accomplish the goal of modernism, to transform man into the 'perfect herd animal', or last man, in the name of freedom (Human, All too Human, pp. 173-174 aph. 473; Beyond Good and Evil, p. 118 aph. 203). **In Zarathustra's language state is the means by which the last man will triumph.**
...

Hobbes argues all are equal and that any inequality is authorised by the sovereign. All those who seek to distinguish themselves, who seek something higher are compelled to serve the interests of the state or the run the risk of a confrontation with the state (Hobbes, p. 117 or 2.18.19).
...

For Nietzsche the struggle for the future, for the meaning of earth, is between **the 'wretched contentment' which Leviathan and Baconian science make possible** and the higher men and new tables of values heralded by the superman.
...

For Nietzsche state support of culture and universities is a great danger because that support is conditional on their usefulness to the state. For Hobbes this is precisely the point. The *Leviathan* should determine what should be taught and not taught according to its interests, including in the universities. Hobbes is clear that modern science and his political science are consistent with the state's

interests and so there is no conflict. **For Nietzsche the state supports culture and education to attract talented men of knowledge so it can "steal the works of the inventors and the treasures of the wise" to further enhance the power of the state. 'New Idol', from the view of philosophical politics, is the error of mistaking state supported or popular intellectual pursuits as the highest.** Stated more strongly, the highest danger is that the new idol, the Leviathan, will be mistaken for a new god, winning the best disciples. Nietzsche's critique of Leviathan is not so much political as it is religious.

In a certain sense Nietzsche's politics can be reduced to this point – Leviathan competes with Zarathustra for the attention and dedication of the most gifted and Zarathustra must find a way to win that competition. Nietzsche's politics in its most moderate form appears libertarian, with the dictum – *as little state as possible* (Day Break, pp. 107-108 aph 179; Human, All too Human, p. 174 aph 473).

> **Not to put too fine a point on it, but all of us are stolen from our parents by globohomo's indoctrination machine masquerading as an education system.** We are all janissaries who'll be stolen, brainwashed, and put in service of the evil empire, and the way out is the way into the tribal life. **But the tribal life means we abjure glory and greatness within the empire,** meaning our greatest potential will never be fulfilled.
>
> Having a rooted identity comes at a price. **As Mishima was told by a Leftist student, to have a national identity is to be limited—and as Mishima replied, that's okay.** All of us who are here made Arminius' choice—rather than soaring into the great imperial heavens, chasing glory and prestige, we elected to inhabit a smaller, more intimate, dare I say, cozier space. **The price, of course, of imperial height are our roots, our flesh, and blood, our children, born and unborn**—our lives, which are ground away into nothingness by the relentless Mammon-machine of Empire. **But how is one to reach ever-higher if one is weighed down by smelly, flabby flesh?**

https://books.google.fi/books?id=iDE56HLy4XMC&lpg=PR4&hl=fi&pg=PA54#v=onepage&q&f=false

Hobbes' position on the especially sensitive question of the belief in miracles was entirely agnostical. He maintained that nobody can know for certain whether an occurrence is or is not a miracle. In articulating such a basic attitude, he became one of the first and most daring critics of every form of belief in miracles, irrespective of whether it was biblico-Christian or expressive of any other religion. **His critique was thoroughly enlightened, and in propounding it, he appears as the true inaugurator of the eighteenth century.** In a style almost reminiscent of Voltaire's, he explored the possibilities of error, delusion, and open or hidden deceit; the tricks of forgers, actors, ventriloquists, and other swindlers. **He did this in a manner so vivid that in this domain every claim to credence seems to be senseless and no longer a subject appropriate for discussion.** Critical readers of Chapter 37 of his *Leviathan* must conclude that a belief in miracles is invariably a superstition, at best a remnant of radical agnosticism which, in this respect, holds certain things as possible but none as true. Yet Hobbes, the great decisionist, here too accomplished his typically decisive turn: *Auctoritas, non Veritas*. Nothing here is true: everything here is command. **A miracle is what the sovereign state authority commands its subjects to believe to be a miracle; but also – and here the irony is especially acute**2 **– the reverse: Miracles cease when the state forbids them.**
…

If, by means of certain spoken words an individual asserted that bread had been transformed into something entirely different, namely, the human body, **then, says Hobbes, nobody would have a sensible reason to believe it; but if the power of a state decrees this to be so, then it is a miracle,** and everyone has to obey this command to profess the belief because it was proclaimed by the sovereign state.
…

But at this place, at the zenith of the sovereign power that brings about the unity of religion and politics, occurs the rupture of the otherwise so complete, so overpowering unity, the decisive point, concerning miracle and belief, that Hobbes evades. **Concerning the question of the belief in miracles, he made his non-eradicable, individualistic proviso in a way that renders any discussion of whether he was an "individualist" superfluous for our consideration. At this point enters the differentiation between inner faith and outer confession into the political system of the *Leviathan*.** Hobbes declares the question of wonder and miracle to be a matter of "public" in contrast to "private" reason; but on the basis of universal freedom of thought – *quia cogitation omnis libera est* – **he leaves to the individual's private reason whether to believe or not to believe and to preserve his own *judicium* in his heart, *intra pectus suum*.** But as soon as it comes to public confession of faith, private judgment ceases and the sovereign decides about the true and the false.

The distinction between private and public, faith and confession, *fides* and *confessio*, is introduced in a way **from which everything else was logically derived in the century that ensued until the rise of the liberal constitutional state. The modern "neutral" state, derived from agnosticism and not from the religiosity of Protestant sectarians, originated at this point.** If looked at from the perspective of constitutional history, a dual beginning was made here: first, **the juristically (not theologically) constructed beginning of modern, individualistic right of freedom of thought and conscience** and thereby the characteristic individual freedoms embodied in the structure of the liberal constitutional system; and, second, the evolution of state from one inherently void of substantive truth into a justifiable external power, the *stato neutrale e agnostico* of the nineteenth and twentieth centuries.

>
> In order to free the prince, the temporal ruler, to do the things that really need to be done for the glory of his own earthly estate, Machiavelli has to convince him to shed the belief that he has a soul. That will free him from the hold Christianity and morality have on his actions. **But this means, of course, that the prince ceases to be concerned about heaven and hell. He is thereby *liberated* from the next world. (Here we get a hint of the real foundation of modern *liberalism*'s essential connection to modern secularism.)**
> ...
>
> **So with Machiavelli the wall of separation between church and state is entirely interior and invisible.** It's a wall inside the prince's mind, separating what the prince actually believes from what he wants to appear to his subjects to believe. **He alone is liberated from belief in the next world, and he uses his subjects' belief to control them.**

...

Only a few years after the appearance of the *Leviathan*, a liberal Jew [des ersten liberalen Juden] noticed the barely visible crack in the theoretical justification of the sovereign state. In it he immediately recognized the telling inroad of modern liberalism, which would allow Hobbes' postulation of the relation between external and internal, public and private, to be inverted into its converse. Spinoza accomplished the inversion in the famous Chapter 19 of his *Tractatus Theologico-Politicus*, which appeared in 1670. Already in the subtitle of his book he speaks of the *libertas philosophandi*. He begins his exposition by maintaining that in the interest of external peace and external order, **the sovereign state power can regulate the public religious cult and that every citizen must accommodate himself to this regulation. Everything that refers to religion receives its legal validity, *vim juris*, only through the command of the state's power.** The state's power, however, determines only the external cult. Hobbes laid the groundwork for separating the internal from the external in the sections of the *Leviathan* that deal with a belief in miracles and confession. **The Jewish philosopher pushed this incipient form to the limit of its development until the opposite was reached and the leviathan's vitality was sapped from within and life began to drain out of him.** "I am speaking explicitly," says Spinoza, "only of the external cult, not of piety itself or of the internal worship of God." Inner conviction and "piety itself" belong to the private sphere of individuals. **"Internus enim cultus et ipsa pietas uniuscujusque juris."**

Spinoza expanded this thought in Chapter 20 of the *Tractatus Theologico-Politicus* into a universal principle of freedom of thought, perception, and expression, with the proviso that public peace and the rights of sovereign power would be respected. Spinoza's treatise is strongly dependent on Hobbes.4 **But the Englishman did not endeavor with such a proviso to appear out of context of the beliefs of his people but, on the contrary, to remain within it, whereas the Jewish philosopher, on the other hand, who approached the religion of the state as an outsider, naturally provided a proviso that emanated from the outside.** Hobbes focused on public peace and the right of sovereign power; individual freedom of thought was an implicit right open only as long as it remained private. Now it is the inverse: **Individual freedom of thought is the form-giving principle, the necessities of public peace as well as the right of the sovereign power having been transformed into mere provisos. A small intellectual switch emanating from the nature of Jewish life accomplished, with the most simple logic and in the span of a few years, the decisive turn in the fate of the leviathan.**

...

In this connection the "Thoughts of Thomasius" published in 1724 in German, are the most apt, because they convey Hobbes' and Spinoza's thoughts and, at the same time, as Bluntschli correctly stated, they constitute "the learned preparatory course [die wissenschaftliche Vorschule] for the state of Frederick the Great."5 According to those "Thoughts," presented in the form of theses, the prince has no rights of coercion either in religious matters or in all those that are concerned with the "doing and imagination of the human intellect"; to be sure he is not required to tolerate atheists and those who deny the existence of the creator and providence but only because it is anticipated that they will "disturb the peace of the common order."

“Nobody should express a judgment that is different from what he thinks.” Henceforth the state becomes essentially police which is restricted to maintaining “public” calm, security, and order.

Since Thomasius, the separation of right and morality has become a standard theory and a *communis opinio* of jurists and politicians. By contrasting juristic heteronomy and moral autonomy Kant, in his theory of right and the state, undertook to present a sanctioned summary of such views of the eighteenth century, which was meant perhaps to rebalance but not annul the fundamental separation between inner and outer, the state remaining, for the time being, rather intolerant. For example, Christian Wolff proposed the banning of pietists and opted for a strict censorship; Kant decisively rejected the right to resist. In retrospect, however, such variations are not decisive for the comprehensive development of constitutional law. **What is of significance is the seed planted by Hobbes regarding his reservation about private belief and his distinction between inner belief and outer confession. As it unfolded, it became an irresistible and all-governing conviction.**

The separation of inner from outer and public private governed not only juristic thinking but also conformed to the general thinking of all educated people. The relegation of the state to an outward cult, as proposed by Spinoza, became the basic thesis of Goethe’s Strasbourg dissertation dealing with the relation of church and state.
…

The advocates of such inner reservations advanced various arguments, some of which were opposed to one another, for example, secret societies and secret orders, Rosicrucians, freemasons, illuminates, mystics and pietists, all kinds of sectarians, the many “silent ones in the land,” **and, above all, the restless spirit of the Jew who knew how to exploit the situation best until the relation of public and private, deportment and disposition was turned upside down.** In the eighteenth century it was Moses Mendelssohn who in his work *Jerusalem, A Treaty on Religious power and Judaism* (1783) validated the distinction between inner and outer, morality and right, inner disposition and outer performance and demanded from the state freedom of thought; **he was of not great mind, intellectually not comparable to Spinoza, but endowed with the unerring instinct for the undermining of state power that served to paralyze the alien and to emancipate his own Jewish folk.**

Moses Mendelssohn’s work was also the inducement for the publication of the first great and truly profound discussion of German wisdom and the Jewish tactic of drawing distinctions, namely, Johann Georg Hamann’s *Golgatha und Scheblimini* (1784).
…

Public power and force may be ever so completely and emphatically recognized and ever so loyally respected, but only as a public and only an external power, it is hollow and already dead from within. **Such an earthly god has only the appearance and the *simulacra* of divinity on his side. Nothing divine lets itself be externally enforced.** *Non externa cogunt Deos*, said in the presence of a Nero the stoic philosopher in the political situation of a Seneca.

https://books.google.fi/books?id=iDE56HLy4XMC&lpg=PR4&hl=fi&pg=PA69#v=onepage&q&f=false

Stahl-Jolson, who brought this about, boasts therefore what is understandable from his standpoint, the distinction between morality and right as advanced by Christian Thomasius, which he characterizes as “substantial progress,” made by a theorist **who “secured forever the separation of both” so that “inner and outer peace, the enforceability of right and nonenforceability of ethics could be demarcated in all respects.” This strange champion of the divine right of Christian kings established that Hobbes, in contrast to Grotius, differentiated the state not only from the prince but also from the people.**4 What a formulation of “conservatism”! Imagine what Hamann, who called Spinoza’s manner of philosophizing “incompetent and unauthorized,” would have said about such an apologist of Christian monarchy! Using many beautiful words to justify the “Christian state” and antirevolutionary “legitimacy,” the Jewish philosopher, with a sure goal and instinct, extended the line drawn by Spinoza and advanced by Moses Mendelssohn.

Schmitt was instrumental in getting Strauss the grant money that allowed him to leave Germany in 1932. Strauss privately wrote to Schmitt the most penetrating and detailed criticism of his major work, *The Concept of the Political,* that Schmitt received from any quarter. **Schmitt later enthused that Strauss “saw through me and X-rayed me as nobody else has.”**

https://counter-currents.com/2013/01/leo-strauss-the-conservative-revolution-and-national-socialism/

Schmitt, however, appealed to Hobbes as a foil for liberal democracy. Thus, Strauss argued, Schmitt’s critique of liberal democracy was insufficiently radical, for Hobbes is actually the true founder of liberalism. **Although the**

Leviathan seems anything but liberal, the premises from which Hobbes seeks to deduce it are the basic principles of liberalism.

>
> But what *is* Strauss's account of the contingent situation that led German nihilists to embrace National Socialism? Strauss's analysis turns out to be quite thin.
>
> **First, he suggests that some embraced nihilism because <u>they accepted the false premise that communism is the culmination of civilization</u> and thus decided to dispense with civilization rather than embrace communism** (p. 360).

https://archive.org/details/derleviathaninde0000carl/page/194/mode/2up?view=theater

Hobbes' starke Tendenz, das Volk von der Politik fernzuhalten,20 **stand im Gegensatz zum Bemühen der Nationalsozialisten, es unaufhörlich zu mobilisieren und es gerade so zu seinem wahren Sein zu bringen.** Die Differenz ist, schematisch, die zwischen autoritärem Staat und totalitärer Bewegung. So konnte der Nationalsozialist Koellreutter, schon früh ein scharfer Gegner Schmitts, in einer Rezension des Schmitt'schen „Leviathan" ausführen: „Die … Staatsauffassung von Hobbes hat … unserer Zeit nichts mehr zu sagen, eine ‚Hobbes-Renaissance' entspricht nicht dem politischen Denken unserer Tage. ***Auctoritas, non veritas facit legem*.** Die Staatsmacht allein ist Gesetzgeber, Recht ist nur das vom Staate gesetzte positive Recht, Bekenntnis ist nur das, was der Staat anordnet. **<u>Damit werden aber alle tiefsten Quellen des Volkslebens verschüttet und gegenstandslos gemacht.</u> – Für Hobbes gab es das entscheidende Problem unserer Zeit nicht,** die Tatsache, daß die Völker sich ihrer als politische Größen bewußt werden, dieses Geheimnis der Nationwerdung, die elementare Erkenntnis, daß Volk zu Volk will, daß gleiches Ahnenerbe auch politisches gleiches Schicksal haben will. **Das Problem existierte für ihn nicht, obwohl gerade in seinem Volke sich dieser Prozeß zum ersten Male vollzog.**"21
…

Verständlich, daß Hobbes bei den Nationalsozialisten eine noch schlechtere Presse bekommt, wenn man ihn zum Ahnen des Liberalismus ernennt. Dann leiten sich aus seiner Theorie der „moderne Individualismus" **und, da für Hobbes der Tod das größte Übel ist, auch der „radikale Pazifismus" ab. Hobbes ist dann an allem schuld: Er „entwickelt die Grundpositionen der kapitalistischen Grundauffassung, da bei ihm der Enfolg des Lebens sich bemißt nach Maß des Überschusses der Lust über die Unlust"; beim ihm liegt „der Ursprung der marxistischen Wirtschaftslehre und des Klassenkampfgedankens," wird doch bei ihm „jede überindividuelle Wertung … abgelehnt."** Die „reine Gegenposition zu Lebensauffassung und Menschenideal der beiden europäischen Revolutionen" – denjenigen Hitlers und Mussolinis – ist Hobbes' Theorie. Diese ist das „mephistophelische Prinzip" schlechthin, nämlich, **„die Negation aller Höchstwerte des arischen Menschentums und damit die Negation der Grundlagen der abendländischen Kultur."** Ein Volk stellt „in seinen rassisch bedingten Höchstwerten die Gegenposition zur Hobbes'schen Wertskala" dar – **<u>Hobbes' Konzept mündet in „rassischer Zersetzung" und in die „Heraufführung des politisch Minderwertigen durch die Aufstellung unheroischer Wertbilder."</u>**24

https://archive.org/details/politicalideasof0000drur/page/94/mode/2up?view=theater

Thirdly, classic natural right, like conventionalism, is elitist or inegalitarian.17 **It rejects pre-Socratic or egalitarian natural right.** According to the latter, all men are by nature free and equal.18 But political rule is akin to the rule of master over slave, and it is against any man's gain to be treated as a slave. **<u>Strauss maintains that egalitarian natural right is closely allied to the doctrine of a golden age or an ideal state of nature where men lived in a state of equality and freedom prior to the emergence of political rule.</u>** But for the egalitarians, innocence is not irretrievably lost, society can and must be made harmonious with nature or natural right by being based on the consent of free and equal individuals. **Socratic or classical natural right considers this view of nature to be altogether fictitious.** Far from being characterized by equality, nature is distinguished by hierarchy, by higher and lower, superior and inferior.
…

Strauss endorses the complaints of Marsilius against the politically radical nature of natural law. He criticizes it, just as Hobbes did, for dividing sovereignty between the secular and sacred domains, or between kings and priests. He argues that this does not advance the cause of peace, and so undermines the essential purpose of the state. In short, natural law encourages anarchy and chaos because it forgets that 'any regime is better than anarchy.'77
…

<u>Strauss's classic natural right shares with modernity more than he would care to admit.</u> In practice, it follows Machiavelli and Hobbes in making peace, stability and preservation the supreme ends of politics, and sanctioning whatever means are necessary to attain them.

> https://web.bookstruck.in/book/chapter/20191

> **The traditional and Vedic view is that worldly action is subordinate to contemplation, so that ritually, the king is the bride and the priest is the groom.** Evola turned this upside down, affirming the primacy of the royal function: partly, this was an exaggerated exaltation of the martial function typical of the interbellum period (when marching in uniform was an almost universal style for all kinds of movements, due to the militarization of a whole generation in World War 1); **partly, it was a projection of a medieval conflict in the Holy Roman Empire between the Emperor and the Pope,** a conflict in which Evola's retrospective sympathies lay with the Emperor.
>
> At any rate, it took a top-ranking scholar genuinely rooted in a genuine tradition, the Brahmin art historian and philosopher Ananda Kentish Coomaraswamy, to correct the deviations of the Western enthusiasts of "Tradition." He commented: **"As it is, Evola's argument for the superiority of the *Regnum*, the active principle, to the *Sacerdotium*, the contemplative principle, is a concession to that very "mondo moderno" [= modern world] against which his polemic is directed."**

https://books.google.fi/books?id=INcgAwAAQBAJ&lpg=PP1&hl=fi&pg=PA452#v=onepage&q&f=false

Aside from this psychological lacuna of the hidden tyrant, **the Hobbesian social contract is a bloodless, rootless mechanism, with no connection to history, tradition, or patriotism** – a despotic algorithm for internal peace that can be imposed anywhere, or indeed, everywhere, a precursor of Kojeve's universal homogeneous state. In the European aesthetic consciousness, it becomes the nightmare of the faceless, omnipresent bureaucratic state of Kafka's *The Castle*, or to use Weber's bleak phrase for modern life, "technicians without vision" ruling over "voluptuaries without heart." This pedigree proceeds straight down to Anthony Burgess's *A Clockwork Orange*, **in which Alcibiadean ambition can find no outlet in a dreary welfare state dystopia except base criminality, and whose psyche must be rejigged in the correct Hobbesian direction through torture, behavior modification, and regular visits from a social worker.**

https://books.google.fi/books?id=INcgAwAAQBAJ&lpg=PP1&hl=fi&pg=PA473#v=onepage&q&f=false

In this sense, **Stalin was one of history's most consistent Hobbesians.** He used terror in a relentless campaign to re-create human nature as empty integers interchangeable with one another, stripped of ambition, living in enforced harmony.
…

Moreover, we must recall again that Hobbes's own preferred solution to the problem of ambition was not this constant, institutionalized use of terror, which would be a kind of concession that the nature of the vainglorious was irrepressible and ineradicable. Instead, Hobbes hoped and believed that his new psychology of pedestrian appetitiveness, to be taught "in the universities" ([1971] p. 728) in the place of "Aristotelity," **would over time genuinely convince people that they should understand all their passions, including honor seeking, as deriving from a desire for comfortable self-preservation and fear of violent death,** thereby realizing the irrationality of honor seeking and especially tyrannical ambition.
…

Hobbes will not admit of an exception to this reduction of honor seeking to self-preservation in anyone guided by a true understanding of nature (as opposed to the spontaneous and misguided impulse for mastery characteristic of some in the state of nature), making his view of the state of nature different from that of the Sophists, who had maintained that there was a just and noble life by nature as opposed to convention; that while the just and noble life by convention was indeed the morality of equality and contract, based on pedestrian appetites and the fear of being tyrannized over, there would always be certain naturally noble "masters" who would never submit. **Gorgias, Callicles, and the other Sophists would have never agreed with Hobbes that the distinction between master and servant existed solely by "consent" and not in nature. Unlike Hobbes, the Sophists would not have disagreed with Aristotle that the distinction between the superior and inferior man existed by nature.** Their disagreement would have been over what the nature of that superiority, including the most satisfying way of life, really is. Hobbes believes that this kind of man, the alleged master by nature idolized by Callicles, can eventually be brought to understand that he is not truly independent or set apart from the many who are concerned with mere survival and comfort.

https://books.google.fi/books?id=INcgAwAAQBAJ&lpg=PP1&hl=fi&pg=PA76#v=onepage&q&f=false

Just as for Machiavelli, for Hobbes man's rationality is not given from an objectively reasonable world, but instead dawns on him as he struggles not to be destroyed by nature's purposeless chaos and the grip of that chaos on him through the passions. Hence, **the criterion for rationality is what the passions require for their own safe and efficient pursuit.** This symmetry between passion and rationality requires that the passions move even further in the direction of abstract homogeneity than was the case in Machiavelli. Starting as he did with the full range of political phenomena, the same broad canvas of war, peace, honor, and domestic faction surveyed by Aristotle, **Machiavelli recognized that glory**

could plausibly be more worth pursuing than self-preservation, and in rare spirits constitutes an independent source of human motivation. He in effect preserves the distinction made by Xenophon's Simonides – whose advice to the tyranny Hiero is one of the models, as we will see in Chapter 4, for Machiavelli's art of princely rule – **between the "real men" (*andres*) who aim for mastery and the common run of "humans" (*anthropoi*) who are content with self-preservation** (*Hiero* 2.1; 7.3). Since, for Machiavelli, domestic policies are inevitably connected to foreign policy – indeed, a republic that does not wish to atrophy and die must have an expansionist dynamic – the pursuit of glory through conquest is an irreducible necessity for healthy political bodies. **Because Hobbes, by contrast, confines himself to the internal ordering of the polity, and begins with an a priori method – the "similitude of the passions" – even these Machiavellian approximations of eros (as the glory attendant upon successful imperialism) fade away, replaced by the abstract and contentless *summum malum* of non-existence, the fear of violent death.** This reduction of the passions to the desire for self-preservation makes it possible to make the state synonymous with what Aristotle had called the art of household management. But for Hobbes, unlike Aristotle, there is no distinction between good and bad, noble and ignoble usages, for household management and property. Whereas **Aristotle had argued for an economics of sufficiency to enable citizens to devote themselves to politics and philosophy,** and for wives and children to cultivate the virtues appropriate for their potentials, in contrast with open-ended economic maximization and despotic authority, Hobbes opted for the latter alone, draining the teleological substance of Aristotle's distinctions and turning household management into a pure method of management and productivity.

Since, as he argues in the *Leviathan*, **the "objects" of the passions** – what we want from, and how we relate to, the political community and the world – **are too diverse and changeable (as are we ourselves) for us ever to be able to agree on what they are and whether they are good or bad (and even if we agreed for a time, we would change and no longer agree with our own selves), we should turn away from the world and look inward to the "similitude" of the passions themselves** (Hobbes [1971] pp. 82-83). Severed from their objects in the world (and opinions about them), the passions of every individual are universally reducible to such simple modes of self-preservation as fear and desire. **Aristotle had argued that humans fulfill their natures by living in a polis and offering reasoned opinions about the just and the unjust, the noble and the base, and the advantageous and the disadvantageous.** These reasoned opinions correspond to what Hobbes terms the "objects" of the passions. By denying that these opinions possess any rank order or even stability, Hobbes in effect demolishes the Aristotelian understanding of the common good. Every man becomes a pedestrian tyrant motivated by the desire to stay alive and avoid violent death. By orienting ourselves by the similitude of the passions rather than their objects, we also deny from the outset the existence of intrinsic natural differences among human beings of virtue, "wit," and prudence, as well as the classical assumption that there is an independent capacity in the souls of some men to seek honor for its own sake, as opposed to mere self-preservation. **Every one who introspects and understands his true motive will realize that he seeks power to remain alive. In Xenophontic language, there are no "real men," only "humans."**

> …

> **When Nero and Caracalla stood at the helm, it was then that the paradox arose: "The lowest man is of more value than that one on the throne!"** And thus the path was prepared for an *image of God* which was as remote as possible from the image of the mightiest,—God on the Cross!

https://bronzeagepervert.substack.com/p/race-in-america-and-the-dork-right

Hobbes was the prophet of the bourgeois man dominated by the fear of death. Hobbes' two villains, the men who wouldn't fit into this new order, were the religious fanatic driven by powerful beliefs that made the next world first in one's mind and this life not valuable enough to fear losing, and on the other hand the noble and warrior driven by vainglory and combative spirits and not fearing death for that reason. The men who don't fear death and who aren't driven by what Nietzsche calls the English ideal of comfort are unpleasant reminders that not all human natures fit in this scheme, but will always form a powerful minority faction against it.

I think we can cut through a lot of tedious debate by noting that modern liberalism simply transfers to the individual the kind of absolute autocratic power Hobbes ascribes to the king.
...

Modern liberalism's dispute with Hobbes is like a disagreement between a son and a father – it's still the same family.
...

Moreover, **contrary to their own self-image, contemporary liberals are not quite as democratic as they think they are. They show a marked tendency to use state power to effect political and cultural change from the top down, especially through the courts.** If they can't get their proposals through the duly elected legislature, they resort to executive order or regulation by unelected bureaucrats. **They also have a tendency to try to rule society through "experts" who deny the legitimacy of common opinion,** especially religiously informed opinion, and substitute "scientific" knowledge, which somehow always seems to end up being secular and secularizing. Finally, very much in tune with Machiavelli, liberals tend to want to remold society by co-opting public education, another mode of top-down imposition of the secular worldview, forming individuals in accordance with state-sponsored secular goals. **This kind of autocracy is not all that far removed from Hobbes's.**

> **The notion that the great majority must be compelled to be free, that "whoever refuses to obey the general will shall be constrained to do so by the entire body; which means nothing other than that he shall be forced to be free," is sometimes scorned by modern commentators as a ridiculous paradox in political thought more associated with Rousseau than the true originator of this idea, Spinoza.**48 But it is basic to Spinoza's freedom that it is constituted less by limits placed on state power than by use of state power to impose limits on human selfishness and unconcern for others.49 The sources, moreover, firmly indicate that Rousseau derives his *volonté générale*, like much else, via Diderot, from Spinoza. **The principle of "General Will" actually makes less sense in the context of Rousseau's society where ordinary men and women, the world's "simple souls," are naturally good and men have far less need to learn anything from books or be guided by reason to acquire "virtue" than in Spinoza where the ignorant, far from naturally finding the right path themselves to a free, virtuous, and stable life, must be shepherded by the state**

inculcating a dogma-free rational civil religion.50 And while state coercive power alone cannot "free the mind from theological prejudices [mentem a praejudiciis theologicis liberare]," it can in Spinoza's judgement effectively curb the immense harm would-be charismatic "leaders," prophets, Pharisees, mullahs, preachers, inquisitors, and theologians universally inflict on mankind.

https://books.google.fi/books?id=Mau9wgEACAAJ&lpg=PP1&hl=fi&pg=PA184#v=onepage&q&f=false

"De toutes les tyrannies, la tyrannie démocratique est la plus cruelle et la moins raisonée" [of all the tyrannies, democratic tyranny is the cruelest and least rational].51 But in dismissing "pure" or direct democracy, the baron was merely decrying what all radical enlighteners rejected, not least Paine, Cérutti, Condorcet, Destutt, and Volney. **This does not alter the fact that, like these others, he warmly endorses representative democracy, a point that needs to be heavily underlined.**52
…

No eighteenth-century thinker did more than d'Holbach to profile the basic distinction, decisive for democratic revolutionaries like Condorcet and Destutt, between representative democracy and "démocratie pure, ou anarchie," as Destutt calls it. **Where direct democracy, "la démocratie originelle," as he also terms it, is contemptible, something mankind, they thought, must at all costs avoid, a quagmire inevitable at the lowest level of Destutt's three stages of "civilization," totally different is "démocratie de la raison éclairée" [Enlightenment rational democracy] typifying Destutt's third and highest level of civilization.** Representative democracy, the sole legitimate form of "gouvernement réprésentatif" for d'Holbach, therefore has nothing in common with monarchy, aristocracy, or "démocratie pure."56 What compounds much of the confusion characterizing the "negative critique," including the mistaken view that d'Holbach was a "moderate" enlightener opposed to "democracy," is simply failure to grasp **that for d'Holbach and his legacy, pure democracy and representative democracy were not just different but virtual opposites:** where the former is destructive, "insupportable," representative democracy is the only form capable of affording liberty, stability, and men's rights and conserving the "general will."

Like Spinoza and Toland earlier, and the *Idéologues* later, d'Holbach loathed royal courts and despised aristocrats, but dreaded even more the irrationality of the masses.57 **What has been said of Destutt de Tracy, writing in the later 1790s and under Napoleon, that his political theory sought "a balance between principles of democracy and enlightened leadership,"**58 **fully applies to the entire Radical Enlightenment, remaining a defining feature down to the 1840s.** Where, for d'Holbach, ancient Athens abundantly demonstrated the instability, follies, and vulnerability to faction and popular passions of "pure democracy," no direct government by the people can ever amount to more than an unstable, priest-ridden, fleeting phenomenon given its inherent tendency to defer to the dictatorship of demagogues capturing the citizenry's unquestioning allegiance by exploiting their prejudices and "superstition."59 In direct democracy, the "people, sovereign in appearance, is generally the slave of perverse demagogues who flatter them and incite their passions, and thereby become tyrants."60
…

Radical enlighteners never had much good to say about ordinary people's beliefs and opinions, as distinct from their needs, moral capacity, and rights. **Arguably, one detects here a deep-seated contradiction and one that perhaps contributed more than anything else to the ultimate failure of the Radical Enlightenment.** But while d'Holbach, like all radical enlighteners, scorns regimes characterized by what to him were the ignorance and prejudices of the multitude, he (and they more generally) also believed "the duties of morality and precepts of reason" are intrinsically within the common people's reach, or can be made accessible to the masses, where government and education act to propagate sound values among the people.
…

In representative democracies, the chief danger is that **the principle of "equality" is pushed beyond its legitimate limits, the sphere of equal rights, toward equality of influence in administration and decision-making,** thereby rendering ordinary opinion and prejudices predominant, in d'Holbach's eyes an inevitable recipe for disaster.65

https://archive.org/details/moraldarwinismho0000wike/page/164/mode/2up?view=theater

The "choice" in "pro-choice" could only come from Hobbes's definition of *liberty* as "the absence of external impediments" within a moral void, for what other view of the universe would claim a right for each individual to decide whether a particular act was murder or not? Moreover, **the presocial relationship of the mother to the unborn child duplicates Hobbes's presocial state of nature, for in such "a condition of war of every one against every one," that is, the mother against the invading fetus, "every man [and here**

we must add “every woman”] has a right to every thing; even to one another’s body [here, the life of the fetus].”

> http://ironink.org/2013/02/wherein-the-pro-death-crowd-takes-the-mask-off/

> *Here’s the complicated reality in which we live: All life is not equal. That’s a difficult thing for liberals like me to talk about, lest we wind up looking like death-panel-loving, kill-your-grandma-and-your-precious-baby storm troopers. Yet a fetus can be a human life without having the same rights as the woman in whose body it resides. She’s the boss. Her life and what is right for her circumstances and her health should automatically trump the rights of the non-autonomous entity inside of her. Always.*
>
> 1.) Don’t you just love Cultural Marxists? You bang and bang on them to try to get them to see that all life is not equal, in the sense that all life is the same, (boys are different than girls, ballerinas are different then Weight-lifters, Japanese are different then Nigerians) **and then when they bring themselves to admit that all life is not equal they say “all life is not equal” in the sense that all life isn’t worthy of life, and then they apply the idea of life that is not worthy of life to those who are judicially innocent.**

https://archive.org/details/worshippingstate0000wike/page/184/mode/2up?view=theater

The great liberal thinker Isaiah Berlin rightly noted,

> Most modern liberals, at their most consistent, want a situation in which as many individuals as possible can realise as many of their ends as possible, **without assessment of the value of these ends as such, save in so far as they may frustrate the purposes of others.** They wish the frontiers between individuals or groups of men to be drawn solely with a view to preventing collisions between human purposes, **all of which must be considered to be equally ultimate, uncriticisable ends in themselves.**1

…

But what exactly does a non-teleological universe look like? It looks like Hobbesian materialism – **the cosmology that, as we’ve seen, Hobbes adopted from the materialist pagan thinkers that Christianity had rejected.**

…

And so materialist science is the kind of science that liberalism preaches, and it does so with real evangelical fervor. Think of men such as Thomas Huxley, Ernst Haeckel, and Karl Vogt, who enthusiastically spread the Darwinian evolutionary dogma of a world without ends.

…

But materialism also frees the human will from the restrictions of nature itself. If no God stands behind the order of nature, including human nature, then human beings are free to manipulate nature, and especially their own nature, without fear of transgressing any moral limit or inviting divine retribution. And, in a kind of vicious circle, the successful manipulation of our nature in turn becomes an argument for the materialist cosmology that justified it in the first place. **Continually overcoming the restrictions of nature “proves” that the limits being transgressed were not laid down by an omnipotent God.**

…

In the liberal account, we live in a purposeless universe, **so that each person has just as much right as anyone else to pursue his or her arbitrarily defined goals or ends.** Notice how desires are given moral weight by being categorized as exercises of “rights.” **And there is ultimately no other justification given for the existence of such rights than the one originally offered by Thomas Hobbes** – the assertion that there are no intrinsic ends, natural goals, or moral standards written into nature. As a result, in our liberal world today, **there is no real difference between “having a desire” to do something (anything!) and “having a right” to do it.**

The full implications of liberal “natural rights” philosophy became clear only in the closing decades of the twentieth century. Think of the Supreme Court ruling in *Planned Parenthood v. Casey* quoted above, which justified the right to abortion with the liberal axiom, **“At the heart of liberty is the right to define one’s own concept of existence, of meaning, of the universe, and of the mystery of human life.”** As we have seen, the groundwork for the liberal justices’ understanding of natural rights was laid by Thomas Hobbes.

Hobbes designed his “natural rights” philosophy to displace the Christian understanding of the *natural law*. **It’s a typical case of a liberal thinker using the pagan thought that Christianity had rejected against the pagan thought Christianity had accepted.** The Christian understanding of the natural law was largely based on the pagan philosophy of Cicero and the Stoics, who in their turn had learned from Plato and Aristotle. The materialism espoused by Hobbes and embraced by liberalism is indebted to the pagan Greek philosopher Epicurus and his Roman disciple Lucretius instead.

…

Second, and perhaps even more destructive, **Christians themselves have largely adopted the "natural rights" language of Hobbes.** They continually attempt to reframe Christian moral arguments in terms of rights, and thereby continually undermine their own efforts.

Thus Christians defending "the right to life" are surprised to find themselves confronted with equally fervent claims that a woman has a "right to choose" or a "right to control her own body." The rights of Christian churches to recognize only traditional marriage is trumped by the right of others to marry whomever they wish. Christians assert the right to practice their religion free from the state's interference, but then find that the same right is claimed by atheists, pantheists, neo-druids, worshipers of a revivified pagan Roman pantheon, and even Satanists.

Christians never get anywhere with this rights language adopted from Hobbes because Hobbes's natural rights were built upon a foundation of complete moral relativism, which was designed precisely to replace Christianity's exclusive moral claims. Once the liberal understanding of rights is adopted, all views are equalized, and the secular state assumes the power to ensure that all views can be equally expressed and represented.

> https://canadafreepress.com/article/santorum-and-st.-thomas-versus-the-catholic-bishops
>
> To state the conservative case for the millionth time, **a right, if it is anything at all, is a claim against others.** For example, your right to life is your claim against anyone else's desire to end or curtail your life without reasonable cause. That is why modern secularist attempts to detach rights from a theory of human nature can only lead to practical nihilism and moral relativism: **If my right—my claim—has no grounding deeper than my own desires, then there is no reason, other than an arbitrary quasi-contractual agreement, why anyone is obliged to acknowledge that right, or respect it.**
> …
>
> If you truly had a right to healthcare, a service provided by humans, then this rights claim would create a specific positive obligation for other human beings, namely the obligation to provide this service for you. However ingeniously the concept of positive rights is decorated by its thousands of dedicated theorists, the basic premise is simple and brutal: a positive right is a claim to the servitude of other human beings—that is, a legal claim against their time, labor, and/or property.
> …
>
> **Though writing long before the birth of Lockean natural rights theory, St. Thomas is describing law as an application of force for the express purpose of defending men against the violations of other men.** And, alongside this view, he is acknowledging that virtue and vice—apart from those instances of vice that bring harm to others—are, to use Santorum's words, properly left to "people of faith, families, communities."
> …
>
> On this question, St. Thomas is unequivocal. Addressing the specific issue of whether it is the purpose of laws to "repress all vice," i.e. to institutionalize virtue, he says this:
>
> > "**Now human law is framed for a number of human beings, the majority of whom are not perfect in virtue. Wherefore human laws do not forbid all vices, from which the virtuous [alone] abstain, but only the more grievous vices, from which it is possible for the majority to abstain;** and chiefly those that are to the hurt of others, without the prohibition of which human society could not be maintained: thus human law prohibits murder, theft and such like."
>
> **Laws do not prohibit all vice, because that would be to restrict unduly the free will of the majority of men, who are imperfect. In other words, virtue in general is a private, which is to say non-legal, matter.** The purpose of human law is to restrict the kind of vicious behavior ("murder, theft and such like") which directly harms other people, thereby, if left unchecked, causing the breakdown of human society. That is, **the law ought to restrict only those behaviors which the majority of men, though imperfect, can and will abstain from of their own free will.** Stated differently, the law ought not to touch the actions of the majority of men. Laws ought to be of a limited and "negative" character.
>
> **Therefore, there is no place in modern Catholic political theory for so-called "positive rights," such as the right to healthcare, a job, a guaranteed income, a home, and so on. Positive rights extend the law's coercive power far beyond the small minority of "depraved" individuals for whom force and fear are the only possible restraints and correctives;** such man-made "rights" impose coercive power, in principle, on every man, woman and child within a society. As such, they violate St. Thomas' sound principle of leaving the imparting of virtue, for the vast majority of humans, as a matter of familial authority. Hence, socialism, even taken on very naive terms (i.e. assuming its goals are the noble ones the Catholic

> bishops have falsely assumed), is completely opposed to the most profound Catholic teaching on the role and limits of human law.

...

Liberals don't just believe in equal political representation or even equal incomes. **They believe that no principle or belief is any better or worse than any other – all are equally unfounded, equally arbitrary.** So, to quote Isaiah Berlin once again, all ends "must be considered to be equally ultimate, uncriticisable ... in themselves." They are "uncriticisable" because there is no standard built into nature by a creator God by which to judge them; **there is nothing above the human will.**

This kind of extreme democracy entails the belief that any notion of higher and lower, better or worse, noble or base, is entirely unfounded. All instances of hierarchy, restriction, or limit are suspect – as being based merely upon someone else's arbitrary will.

...

Materialist, extreme democratic liberalism is therefore *reductionist*. **It assumes that any higher motives or capacities expressed by human beings must be reducible to something lower and even ignoble.**

...

All these reductionist views, including even the seemingly anti-democratic ones, such as Nietzsche's, have a leveling effect. They destroy any natural hierarchy, undermine any notion that there is anything better or worse than anything else in our purposeless cosmos. All these views are therefore helpful to liberalism as tending to level any standard or limit that might infringe on our "right" to pursue any end we desire. **Liberalism thus embraces a version of democracy, a notion of equality, that ultimately rests on nihilism. All notions of intrinsic order or nobility that would define and limit the human will are considered to be tyrannical, dismissed as hypocritical masks for self-interest. At bottom, there is nothing but the self-interested will.**

http://www.thephora.net/forum/forum/the-academy/philosophy/90152-the-liberty-of-the-slaves

The visible social badge of Liberty no longer lies in rising above the debased and the despicable, as it did for the old-school bourgeoisie, but in deliberately and conspicuously sinking beneath bourgeois respectability and the republican civic virtue and dignity of the freeborn citizen.

...

The ostentatious Gong-Show antics of personal "empowerment" betrays the profound impotence of citizens at once allowed and in fact, exhorted to insolently swagger and strut about like they own the world even as they seem to vanish in the shadow of a grotesquely bloated State Leviathan on steroids that polices their every step from cradle to grave, and wields more power than the subjects of any of the so-called "absolute" monarchies of old (whose own power was strictly limited by Divine, Natural, and customary right, and/or by the powers and privileges of the Church and the family) would have tolerated in their Prince.

I once was a solidly Blue-pilled, Locke-quoting, Constitution-adoring, fervent true believer of the cult of Liberty when I first began to notice this – although for years I continued to systematically fail to notice it in the very course of noticing it. Such is the power of the blue pill over the mind. **Then one day the red pill presented itself in the form of a passing remark in Seneca:**

> [C]hildren will strike their parents in the face, and the infant tumbles and tears his mother's hair and slobbers upon her, or exposes to the gaze of the family parts that were better covered over, and a child does not shrink from foul language. Yet we do not count any of these things an insult, and why? Because he who does them is incapable of being contemptuous. For the same reason the waggery of slaves, insulting to their masters, amuses us, and their boldness at the expense of guests has license only because they begin with their master himself; **and the more contemptible and even ridiculous any slave is, the more freedom of tongue he has.** For this purpose some people buy young slaves because they are pert, and they whet their impudence and keep them under an instructor in order that they may be practised in pouring forth streams of abuse; and yet we call this smartness, not insult. (emphasis mine).

...

Indeed, **one of the few social norms governing public speech and writing nowadays is a taboo on even attempting to speak authoritatively,** on assertively declaring something state of affairs or course of action to be right or wrong, some person or set of people superior or inferior to another, some precept true and another one false. To do so is to be "judgmental", which is terribly poor form, as scandalously impolite as breaking out into a string of oaths and expletives in mixed company once would have been.

...

As Seneca says, it is acceptable, indeed fitting, for a slave to talk a lot of vile trash and generally act like a total jackass in public – for by doing so, he proves to himself and everybody else that he is good for nothing but servitude. **What isn't acceptable, though, is for this same creature to pass discriminating judgements and make authoritative pronouncements on this or that,** precisely because he is a slave.
...

It follows that it is indecorous for a slave to be "judgmental"; the slave who undertakes to judge has lost mind of his place, and immodestly puts on airs.

Under the red light, then, the true meaning of present-day admonitions against being "judgmental" becomes abundantly clear, as does the meaning of such suggestively self-abnegating conventions of speech as "it's not my place to judge." Additionally, **under red light the formal theoretical expression of the social taboo against discriminating judgment** – namely, the so-called "relativism" that holds that all truth-claims are at once equally true and equally false, that no culture is better than another, and which forbids any attempt to rank-order the differences that obtain between individuals – **may, as a salute to Nietzsche, be designated a slave epistemology.**

---

https://books.google.fi/books?id=7j8PdlgFRDAC&lpg=PP1&hl=fi&pg=PA205#v=onepage&q&f=false

In organized society, Hobbes saw that basic disagreements and conflicts arose over defining what is secular and what is religious, and over what is good and right. Individual right reason is not adequate to settle the problems, since there is no indubitable or satisfactory criterion for determining whose right reason to accept. **But, to prevent social disintegration that would ensue, political authority has to determine what is true in religion and morals. The bizarre and authoritarian theory of truth spills over into scientific, mathematical, and logical questions as long as there are disagreements and social consequences of views in these areas.**82

Karl Marx turned the issue around by contending that the intellectual activities going on at any time are a reflection of the economic-political determinating forces. There have been feudal idea-systems, there are capitalistic ones, and for Marx, there will be socialistic ones. **Hence the political authorities will propound intellectual truths in all areas.**83

> http://www.garynorth.com/freebooks/docs/pdf/unholy_spirits.pdf
>
> The humanists have been tied to top-down rationalism politically since at least Thomas Hobbes' *Leviathan* (1651). **The French Enlightenment simply transferred Hobbes' vision of the king's sovereign central power to the democratic State's sovereign central power.** The French Revolution was the result of this vision. So was the Russian Revolution.

https://books.google.fi/books?id=6wweBQAAQBAJ&lpg=PP1&hl=fi&pg=PT621#v=onepage&q&f=false

In addition, there is no reason to suppose that, like Harrington, radicals would not pick and choose which elements of the Hobbesian project they bought into. **As Margaret Jacob notes, 'the radicals simply stripped Hobbes of his royalism,' taking what they wanted from his politics and capitalising upon the religious implications of his materialism.**72

> https://archive.org/details/deciveorcitizen00inhobb/page/16/mode/2up?view=theater
>
> Last of all, I have propounded to my self this rule through this whole discourse; First, not to define ought which concerns the justice of single actions, but leave them to be determined by the laws. Next not to dispute the laws of any government in special, that is, not to point which are the laws of any country, but to declare what the laws of all countries are. **Thirdly not to seem of opinion, that there is a lesse proportion of for obedience due to an *Aristocraty* or *Democraty*, than a *Monarchy*; though I have endeavoured by arguments in my tenth Chapter to gain a belief in men, that Monarchy is the most commodious government (which one thing alone I confesse in this whole book not to be demonstrated, but only probably stated) yet every where I expresly say, that in all kind of Government whatsoever, there ought to be a supreme and equall power.** Fourthly, not in any wise to dispute the positions of Divines, except those which strip Subjects of their obedience, and shake the foundations of civill government.
>
> https://archive.org/details/deciveorcitizen00inhobb/page/134/mode/2up?view=theater
>
> VIII. In the last place, it's a great hindrance to Civill Government, especially Monarchicall, that men distinguish not enough between a *People* and a *Multitude*. **The *People* is somewhat that is *one*, having *one will*, and to whom *one action* may be attributed; none of these can properly be said of a Multitude. The *People* rules in all Governments, for even in *Monarchies* the *People***

> **Commands; for the *People* wills by the will of *one man*; but the Multitude are Citizens, that is to say, Subjects.** In a *Democraty*, and *Aristocraty*, the Citizens are the *Multitude*, but the *Court* is the *People*. And in a *Monarchy*, the Subjects are the *Multitude*, and (however it seeme a Paradox) the King is the *People*.

https://archive.org/details/enlightenmentcon0000isra/page/226/mode/2up?view=theater

Nevertheless, it is undeniable that major components had been, and continued to be, detached by radical thinkers from Hobbes's system, and perhaps especially his notion that 'democracy' is the first kind of instituted commonwealth 'in order of time' **and his doctrine that sovereignty, after the making of the state, is what has been called the 'aggregate of private wills,' an idea afterwards centrally adopted by Spinoza. This extracted, more equitable, 'democratic Hobbesianism' to no small degree helped define and refine the theoretical apparatus of the early modern democratic republicans, and hence of the Radical Enlightenment as a whole.**3 James Harrington was certainly not alone among early modern republicans in nothing that 'Mr Hobbes holdeth democracy to be of all governments the first in modern order of time.'4 **Furthermore, this has been part of the justification of what in recent decades has developed into an important theme in history of political thought studies – the thesis that, for Hobbes, as it has been put, 'democracy was prior both chronologically and logically to other forms of government,'**5 and that Hobbes's sovereign has what has been called 'an elective, republican character,' **so that, in short, 'Hobbes is the true ancestor of constitutional liberal democracy.'**6

>
> They were silly values, of course, these liberal values. Crackers, really, if you thought about them. We lower-middle classes might be far and away the densest of the English social class, **but we are under no illusions about the true nature of political power.** All political power, even in democracies, is underpinned by violence, or the threat of it; not by love, and certainly not by tolerance or daydreams about equality, still less by this bloody 'cohesion' you keep talking about these days.
>
> And how do we know this? How did the lower-middle class acquire this one important, cold-blooded insight, among all the other hocus-pocus that we've fallen for over the years?
>
> **Because we were once employed by you middle-class ladies and gentlemen as a sort of safety bulwark between you and the mob. Why, doing your dirty work has always been our job, sir! It's why you let us sleep in your porch.** What a shame you've repudiated our little secret and have gone away with the fairies!

…

Radical authors, then, while mostly viewing Hobbes as an apologist for tyranny, calumniator of republican assemblies, champion of censorship, and a thinker who had drawn an excessively pessimistic picture of natural humanity, and especially its proneness to aggression and conflict, **consistently did so in a curiously equivocal, even paradoxical, way, hardly ever altogether disowning him and his system, and often betraying an unmistakably strong sympathy for elements of his thought and writing.** As Anthony Collins remarked, however much free thinkers disapproved of what he terms Hobbes's 'High-Church Politicks,' meaning his compliant views on ecclesiastical authority and book censorship, as well as monarchical sovereignty, and other 'false opinions,' there was no denying Hobbes was what he approvingly styles a 'great influence of learning, virtue and free-thinking.'8

…

The comprehensive toleration central to Spinoza, van den Enden, and the brothers de La Court is neither explicitly recommended by, nor integral to, Hobbes **who indeed is more inclined to recommend censorship, imposing uniformity and suppression rather than toleration wherever political stability and the security of the state are threatened.**29

https://archive.org/details/in.ernet.dli.2015.231118/page/n703/mode/2up?view=theater

> But the conditions that Rome faced would not permit liberal policies; Marcus Aurelius and Alexander Severus had tried these and failed. Confronted by enemies on every side, **the Roman state did what all nations must do in crucial wars; it accepted the dictatorship of a strong leader, taxed itself beyond tolerance, and put individual liberty aside until collective liberty was secured.** Diocletian had, with more cost but under harder circumstances, repeated the achievement of Augustus.

Unrestricted individual freedom under an (equitable) law, including full freedom of speech and expression, is always fundamental in the radical tradition **but is found in Hobbes only in a very restricted sphere concerned with the pursuit of private interests.** For he sharply segregates the internal world of freedom, confined to the mind of the individual, and the latter's private dealings, from an external world of public obedience and outward conformity to the law in matters of faith.30
…

Thus far, the Spinozists were merely following Hobbes. **But precisely because natural equality, in his view, is dangerous, destabilizing, and to be avoided in favour of order and social hierarchy, this potential route to a purely secular and autonomous morality under the state, the path chosen by Spinoza, Bayle, and Diderot, is peremptorily blocked off by Hobbes.** For he reduces the content of natural morality, underpinning the social contract and the rule of positive law, to an absolute minimum with little applicability to political life under the state, **coupling a doctrine of the indivisibility of sovereignty closely aligned with that of Bodin to the idea that 'in the act of our submission consisteth both our obligation and our liberty.'** In this way, he interposes an absolute divide between ruler and ruled and insuperable polarity between natural right and law.42

https://books.google.fi/books?id=wrx9BgAAQBAJ&lpg=PP1&hl=fi&pg=PA277#v=onepage&q&f=false

When asked what difference existed between his views and Hobbes', he replied: **"Elle consiste en ce que je conserve toujours fidèlement le droit naturel et n'attribue pas dans chaque cite au magistrat suprême plus de droit sur ses sujets que n'en comporte le degré de puissance qui fait sa supériorité, ce qui a toujours lieu dans l'état naturel."** Thus Spinoza moved from the concept of the state as absolute to the more reasonable concept of the state as liberal. Thus, also, he insisted that the state not only must confirm free-thinking, but must also protect the right of every man to free thought. Thus, finally, he tended to a more democratic form of government. **And while Hobbes founded right on force and both Grotius and Leibniz founded it on natural law, Spinoza, striking a middle ground between the two positions, established it upon force and reason, at the same time attempting to preserve the integrity of natural law in the social state.**

https://books.google.fi/books?id=Mau9wgEACAAJ&lpg=PP1&hl=fi&pg=PA193#v=onepage&q&f=false

> "Government" d'Holbach defines as the combined force society as a whole employs to oblige its members to adhere to the terms of the "pacte social" that rescues men from the "state of nature."99 **His "state of nature" was a halfway-house between the "monstruous constraint" of Hobbes's *Leviathan*, on one side, and Rousseau's "imaginary" natural equality on the other.**100 This principle, so proximate to Spinoza's, tied d'Holbach's utilitarian ethics to his political theory.

https://books.google.fi/books?id=6wweBQAAQBAJ&lpg=PP1&hl=fi&pg=PT452#v=onepage&q&f=false

Although Dryden seems closest to Hobbes in these areas, already explored in print and on stage in the 1660s, **the poet only attracted critical attention for his Hobbism as a result of the publication of his blockbuster heroic tragedy of 1670, *The conquest of Granada*** (1672). Here Dryden had strayed into riskier terrain, giving off Hobbesian signals in his dramatic theory and his characters at a moment when the critical environment was peculiarly sensitised to such allusion.
…

In 1673 Richard Leigh accused Dryden of violating the accepted rules of heroic tragedy by creating a hero who knew no restraint. In doing so he had secured 'the Reason and Politicall Ornaments from Mr Hobs.' Dryden's Almanzor was undoubtedly an almost superhuman and shocking character, whose speeches and actions portrayed a naturalistic individual initially unbound by any form of conventional restraint. Having intervened in a factional struggle, Almanzor is condemned to death by the king, Boabdelin. Almanzor's now famous defence of himself reminded some of Hobbes's natural man:

…

https://archive.org/details/in.ernet.dli.2015.93351/page/n69/mode/2up?view=theater

> *Almanz.* No man has more contempt than I of breath,
> But whence hast thou the right to give me death?
> Obeyed as sovereign by thy subjects be,
> But know, that I alone am king of me.
> **I am as free as nature first made man,**
> **Ere the base laws of servitude began,**
> **When wild in woods the noble savage ran.**

The character's apparently wayward conduct during the play led Leigh to comment that he was the subject of **'a Poeticall Free-State … where all were Monarchs … and all swore Allegiance to themselves … where every man might invade anothers Right, without trespassing in his owne, and make, and execute what Lawes himself would consent to each man having the power of Life and Death so absolutely, that if he kill'd himself, he was accountable to no body for the murder.'** Almanzor was exempt from both poet's rules and prince's laws, 'and in short, if his revolting from the *Abencerrages* to the *Zegrys*, and from the *Zegrys* to the *Abencarrages* again, had not equally satisfi'd both parties, it might admit of the same defence, Mr *Drydens* Out-cries, and his Tumults did, that the Poet represented Men in a *Hobbian* State of War.'209

https://en.wikisource.org/wiki/Dictionary_of_National_Biography,_1885-1900/Blount,_Charles_(1654-1693)

In 1673 he published, anonymously, 'Mr. Dreyden vindicated, in Reply to the friendly vindication of Mr. Dreyden, and reflections on the Rota.' **This was a warm defence of Dryden against the criticisms of Richard Leigh in a pamphlet called 'The Censure of the Rota on Mr. Dryden's Conquest of Granada.' Blount afterwards took some part in a translation of Lucian,** and Dryden makes a complimentary reference to him in the life of Lucian prefixed to the translation (which was not published till 1711).
…

Blount sent a copy of it to Hobbes, with a letter dated 1678 (*Oracles of Reason*, p. 97), in which he praises Hobbes's 'incomparable' treatise on heresy,' then in manuscript, and takes occasion to impugn the authority of councils. Soon after Hobbes's death (4 Dec. 1679) he published a broadsheet called 'Last Sayings and Dying Legacy' of Mr. Thos. Hobbes of Malmesbury. **It consists chiefly of extracts from the 'Leviathan,' and is clearly not intended, as Wood says, 'to expose' Hobbes. It is the work of a disciple.**

https://archive.org/details/radicalenlighten0000isra/page/604/mode/2up?view=theater

> **English philosophical incredulity effectively began with Blount, who, though often disparaged as unoriginal and a plagiarist, was nevertheless a crucial figure in the rise of English radicalism.**38 His first clearly deistic work, the *Anima Mundi*, appeared in 1678. Already here, and in his works of the early 1680s, Blount, **deploying Herbert's conception of a true natural religion which requires no priests or formal theology,** discards the theological systems of the revealed religions as fraud and trickery contrived by cunning impostors for their own advantage, linking this analysis to radical republicanism by showing that, generally in history, despots encourage such priestly manipulation to strengthen their own sway while, equally, priests sanctify tyranny the better to nurture their own status and authority. Similarly, he dismisses all religious prophecy, precisely like Spinoza, as the result of exceptional 'imagination': 'to set up for a Prophet, the chief thing necessary is a lively strong fancy and imagination.'39 **But this self-proclaimed disciple of Herbert, who clearly borrowed much from Hobbes, also drew extensively not just on Spinoza but other Dutch sources, including the elder Vossius**40 **and his son Isaac Vossius (1618-89), the *savant* and former acquaintance of Spinoza of whom Charles II quipped that 'he believed everything except what was in the Bible'** – a confirmed libertine who, after a short period in Sweden, settled in England.41 It was seemingly Isaac Vossius who inspired Blount's claims that the Biblical Flood occurred only in Palestine and that Chinese history is older than that of the Jews.42

https://archive.org/details/enlightenmentcon0000isra/page/228/mode/2up?view=theater

Yet, once again, Bayle's account of Hobbes is no more predominantly a negative one than is Diderot's. As with most late seventeenth- and early eighteenth-century French authors, **Hobbes was not in fact a particularly important source of reference or inspiration for Bayle despite the obvious similarities of their politics.** Where Bayle's article on Spinoza is the longest in his *Dictionnaire*, and reveals something of his lifelong obsession with Spinoza, that devoted to Hobbes, even if still substantial compared to those devoted to the other philosophers for whom Bayle provides entries, is nevertheless

very brief by comparison. **Hobbes did not have a comparable importance for Bayle to that of Spinoza; nevertheless, he treats him in some respects in an almost parallel fashion, especially when praising his character, viewing him, as the English translation of Bayle's *Dictionnaire* puts it, as a 'great observer of equity' while simultaneously stressing, like Diderot as early as his reworking of Shaftesbury in 1745, that he did not believe in God.** Parts of Hobbes's system were clearly regarded by Bayle with considerable sympathy.17

Bayle's prime criticism of Hobbes – that he simply went too far in his preference for monarchy – is remarkable for someone who shared many of his strictures about democracy and republicanism. 'Hobbes was enrag'd against the principles of the Parlementarians,' he observed, citing this as the reason he 'went to the other extreme, and taught that the authority of the kings ought to have no limitation, and that in particular the externals of religion, as being the most fruitful cause of civil wars, ought to depend upon their will.'18

https://www.gutenberg.org/cache/epub/46333/pg46333-images.html#CHAPTER_VIIId

Of all Christian writers, the philosopher Hobbes alone has seen the evil and how to remedy it, and has dared to propose the reunion of the two heads of the eagle, and the restoration throughout of political unity, without which no State or government will ever be rightly constituted. But he should have seen that the masterful spirit of Christianity is incompatible with his system, and that the priestly interest would always be stronger than that of the State. **It is not so much what is false and terrible in his political theory, as what is just and true, that has drawn down hatred on it.**[4]

> [4] **See, for instance, in a letter from Grotius to his brother (April 11, 1643), what that learned man found to praise and to blame in the *De Cive.*** It is true that, with a bent for indulgence, he seems to pardon the writer the good for the sake of the bad; but all men are not so forgiving.

https://archive.org/details/worshippingstate0000wike/page/180/mode/2up?view=theater

As for the flourish of Rousseau's rhetorical sword – **"whoever dares to say *there is no salvation outside of the church* should be chased out of the State, *unless the State is the church*, and the prince is the pontiff" [emphasis added].**29 Unless, indeed. Note that Rousseau is not opposed to theocracy – as long as it's a theocracy of the religion of the liberal state.

> https://archive.org/details/worshippingstate0000wike/page/176/mode/2up?view=theater
>
> **As Rousseau remarked of Machiavelli in his *Social Contract*, "While pretending to give lessons to kings, he gave great ones to the people. Machiavelli's *The Prince* is the book of republicans."**18 Rousseau pretended that Machiavelli was just fooling, so to speak, when he gave his ruthless advice to the prince – he really meant it for the people. Actually, **Rousseau was taking over Machiavelli's advice for his own purposes, with the result that the radical secular "republicans" of the French Revolution would act with the ruthlessness of Machiavellian princes,** openly rejecting Christianity, pitilessly slaughtering priests and nuns, desecrating churches, and setting up a "religion of reason" in place of Christianity.

https://archive.org/details/enlightenmentcon0000isra/page/224/mode/2up?view=theater

Though firmly hostile to Hobbes's anti-democratic stance, **in his article on 'Hobbes' for the *Encyclopédie*, Diderot was far from wholly unsympathetic to his general aims, motives, and philosophy.** He excuses Hobbes's to his mind overly negative depiction of the state of nature as due to the unusually grim situation facing England during the years he wrote his *De cive* (1642) and *Leviathan* (1651). He praises Hobbes's honesty and insight, and his devising a system which, despite its averred loyalty to revealed religion, seemed to him to be a form of atheistic materialism, that is, something of which (from 1747) he entirely approved. Yet despite these positive and mitigating features, Diderot in the end felt Hobbes erred badly owing to an excessively pessimistic view of humanity: **taking a particularly menacing set of circumstances 'pour les règles invariables de la nature,' he sums up, he became 'l'agresseur de l'humanité et l'apologiste de la tyrannie.'**1
…

Diderot, for all his criticism of Hobbes's views about society, hence warmly praises his metaphysics and epistemology, recognizing important elements here which he shared with Hobbes. **For the latter, as for himself, Bayle, and Spinoza but not Descartes, Locke, or Hume, philosophy and science are ultimately the same thing, and simultaneously wholly separate from theology.**
…

Applauding Hobbes's rejection of Cartesian dualism, Diderot remarks that the English thinker, flatly contradicting Descartes, was far from agreeing 'que la matière étoit incapable de penser'; where Descartes had famously said 'I think, therefore I am,' Hobbes, observes Diderot, says 'je pense, donc la matière peut penser.'14 But the feature of Hobbes's system that most of all appealed to radical minds,

though rooted in his metaphysics, was at the same time an aspect of his political and social theory, **namely that morality and law are not based on divinely given criteria but are purely social constructs, such that, as Diderot puts it, 'les loix de la société sont donc la seule mesure commune du bien et du mal.'**15

https://en.wikipedia.org/wiki/Baron_d%27Holbach

According to Faguet: **"d'Holbach, more than Voltaire, more than Diderot, is the father of all the philosophy and all the anti-religious polemics at the end of the eighteenth and the first half of the nineteenth century."**[49]

https://plato.stanford.edu/entries/holbach/#EthiVirtForSakeHapp

Like his major influence in this area, Spinoza, he undertakes to explain human beings with the same clarity and rigor that others explain geometry (*Eléments de la morale universelle*, Preface). The laws that Holbach depends upon in accounting for human nature are primarily psychological laws and may be peculiar to human beings. For Holbach, like Spinoza and Hobbes, holds that each person seeks his own preservation (*System of Nature*, 40; cf, Spinoza's *Ethics* IIIp9 and Hobbes's *De Homine*, Chap. 11—**Holbach's is still the most widely available French translation of the latter**).
…

Holbach's foundational view is that the most valuable thing a person seeking self-preservation can do is to unite with another person: "Man is of all beings the most necessary to man" (*Système social*, 76; cf. Spinoza's *Ethics* IVP35C1, C2, and S).
…

Holbach is a thoroughgoing utilitarian: where the government fails to secure the general welfare, which consists principally in securing property and basic freedoms such as the freedoms of speech and religion, society has a right to revolution (*La politique naturelle*, 4.5).

Perhaps because of the less cautious advocacy of right to revolution among other members of his coterie, particularly Naigeon, **or perhaps because he criticized the kings of his time so fiercely,** Holbach is sometimes regarded as an advocate of revolution. Holbach's discussion is tentative, however. He describes the right in *La politique naturelle* (4.5 ff.) as a product of the natural instinct for self-preservation. **Like Hobbes (*Leviathan*, XXIX, 23), Holbach expects that obedience to a sovereign will break down where individuals feel the need to secure their own lives.** This is also why sovereigns need to take care to look after citizens' welfare and education. Where they fail to do these things, citizens come to be ruled not by reason but by passion, and revolution results. Holbach's right to revolution, then, is less an advocacy of revolution than a warning to avoid the conditions that lead to it.

https://books.google.fi/books?id=Mau9wgEACAAJ&lpg=PP1&hl=fi&pg=PA181#v=onepage&q&f=false

Being, strangely, often mistakenly denied by modern scholars, the passion behind d'Holbach's anti-monarchism needs stressing. "A good king is such a rare outcome, there is no room for peoples to flatter themselves they will see one often."25
…

Unlike Voltaire, Diderot and d'Holbach excluded Frederick from among monarchs sufficiently "enlightened" to serve the Enlightenment cause; rather, the "opposition between d'Holbach and Frederick was total."117 "Despotism," states d'Holbach's *Essai sur les préjugés*, is a dreadful, destructive factor in human life; Frederick quickly grasped that d'Holbach was alluding to him. Not only did royal government impede "l'esprit humain" by permitting churchmen to control education, it hinders it too by failing to advance the sciences, merit, useful knowledge, and basic morality. **Frederick patronized La Mettrie the atheist; Lucretius' *De rerum natura* counted among his favorite books; but d'Holbach's strictures in the *Essai sur les préjugés* and *Système de la nature* were another matter;** his "overt challenge to political and religious authority" incurred the king's intense wrath.118

Among the worst factors causing humanity's universally wretched predicament, held d'Holbach, was the "indifference sovereigns show for the education of their subjects" – and to their talents and virtues.119
…

No believer in Christianity, Frederick nevertheless agreed with Voltaire that the masses need religion and in his realms scrupulously maintained the church's grip, whether Catholic hegemony in Silesia (conquered in 1740), Calvinism in Cleves-Mark and at court, or Lutheranism in the rest. Frederick was indeed widely criticized by Mirabeau and other radicals for his education policy. If churchmen are pernicious teachers, in d'Holbach's eyes, it was due to the "negligence of sovereigns" (including

Frederick) that there was “no country where the education system was appropriate for producing statesmen, magistrates and *citoyens utiles*.”122
…

D'Holbach who, of all the major eighteenth-century thinkers, has been the one most routinely sidelined, ignored, and marginalized by the general historiography, was actually among the most revolutionary of eighteenth-century political thinkers, **a thinker intent, Frederick recognized, on overturning the whole established order [*tout l’ordre établi*].**202
…

Yet d’Holbach, the figure the “negative critique” maintains was no radical political thinker, followed up the *Système de la nature* with no less than four full-scale works of political theory.

https://archive.org/details/BarruelMemoirsIllustratingTheHistoryOfJacobinism/page/n301/mode/2up?view=theater

The reader may be surprized at hearing that the System of Nature was not the most virulent production which the Club of Holbach had published to incite the people to rebellion and to persuade them to consider their Kings and Princes in no other light than as monsters to be crushed. **The adept or adepts who had composed the *Social System* availed themselves of the impression Diderot's work had made. They are more reserved on Atheism, only to be more virulent against kings.** The object of this work is to persuade the people that they are the victims of a long state of warfare, which ended by throwing them under the yoke of Kings. But they were not to abandon all hope of breaking their chains, and even of loading their Kings with them, though they had been hitherto unsuccessful. There the imagination is worked upon, and the meanest subject is taught to say to his Sovereign, “**We have proved the weakest, we have submitted to force; *but should we ever become the strongest, we would wrest that usurped power from you* whenever you exercised it for our unhappiness. It is only by your attention to our prosperity that you can make us forget the infamous titles by which you reign over us.** *If we are not strong enough to shake off the yoke we will only bear it with horror.* You shall find an enemy in each of your slaves, and every instant you shall tremble on the thrones which you have unlawfully usurped.”24
…

With the same excess of phrensy, commenting on the axiom.

> **Some lucky soldier was the first of Kings,**

full of his Voltaire, like the Pythoness inspired by the devil, from the summit of his fiery tripod the same adept, addressing himself to all nations, tells them, “**Thousands of executioners crowned with laurel and wreaths of flowers,** returning from their expeditions, carry about in triumph an *idol* which they call *King*, Emperor, Sovereign. They crown this idol and prostrate themselves before it, and then, at the sound of instruments, and of repeated, senseless and barbarous acclamations, they declare it in future to be the *Sovereign Director* of all the bloody scenes which are to take place in the realm, and to be ***the first executioner of the nation*.**”

Then, swelling his chest, foaming at the mouth, and with haggard eyes he makes the air resound with the following frightful declamation:

“***To the pretended masters of the earth*, scourges of mankind, illustrious tyrants of your equals,** *Kings*, *Princes*, *Monarchs*, *Chiefs*, *Sovereigns*, all you, in fine, who, raising yourselves on the throne, *and above your equals*, have lost all *ideas of equality*, equity, *sociability* and truth; in whom *sociability* and goodness, the beginnings of the most common virtues, have not even shown themselves, I cite you all at the tribunal of reason. If this miserable globe, silently moving through the etherial space, drags away with it millions of unhappy beings fixed to its surface, and fettered with the bonds of opinion; if this globe, I say, has been a prey to you, and if you still continue to devour this sad inheritance, **it is not to the wisdom of your predecessors, nor to the virtues of the first inhabitants, that you are indebted for it; but *to stupidity, to fear, to barbarity, to perfidy, to superstition. Such are your titles.***

http://www.ftarchives.net/holbach/good/gs3.htm#139

Rulers infallibly decide the religion of the people. The true religion is always the religion of the prince; the true God is the God, whom the prince desires his people to adore; the will of the priests, who govern the prince, always becomes the will of God. A wit justly observed, that *the true religion is always that, on whose side are the prince and the hangman*. Emperors and hangmen long supported the gods of Rome against the God of Christians; the latter, having gained to his interest the emperors, their soldiers, and their hangmen, succeeded in destroying the worship of the Roman gods.

https://penelope.uchicago.edu/Thayer/E/Gazetteer/Places/Europe/Italy/_Texts/HODIHI/2d_edition/6/11*.html#ref61

> All round the coast of Istria, at Grado itself, and probably among the lagunes of Venetia—in fact, **wherever the galleys of Constantinople could penetrate—churchmen were desirous to return into unity with the Emperor and the Pope,** and were willing to admit that Theodoret, Theodore and Ibas were suffering the vengeance of eternal fire. On the mainland, at Aquileia itself, in the great old desolate Venetian cities, Padua, Vicenza, and the like, in the little towns under the shadow of the Dolomites, **wherever the swords of the Lombards flashed, men took a more hopeful view of the spiritual prospects of the three Syrians.** At the death of Severus, in 606, the divergence became manifest.

...

We cannot reasonably propose to divest the people of their follies; **but we may perhaps cure the follies of those who govern the people, and who will then prevent the follies of the people from becoming dangerous.** Superstition is to be feared only when princes and soldiers rally round her standard; then she becomes cruel and sanguinary.

https://archive.org/details/BarruelMemoirsIllustratingTheHistoryOfJacobinism/page/n117/mode/2up?view=theater

> Frederic seemed to be nearer to simple toleration when he thus answered Voltaire: **"It is not the lot of arms to destroy *the wretch*.—It will perish by those of truth."**10 At length he begins to think that force must strike the last blow at Religion. He is not averse to this force, and we see him willing to employ it had the occasion offered when he writes to Voltaire, **"To Bayle, your forerunner, and to yourself, no doubt, is due the honor of that Revolution working in the minds of men. But, truly to speak, it is not yet complete; bigots have their party, and *it will never be perfected but by a superior force: from government must the sentence issue that shall crush the wretch.* Enlightened Ministers may forward it, *but the will of the sovereign must accede*. Without doubt this will be effectuated in time; but neither of us can be spectators of that long-wished for moment."**11
>

https://www.marxists.org/archive/marx/works/1845/holy-family/ch06_3_d.htm

In *Bacon*, its first creator, materialism still holds back within itself in a naive way the germs of a many-sided development. On the one hand, matter, surrounded by a sensuous, poetic glamour, seems to attract man's whole entity by winning smiles. On the other, the aphoristically formulated doctrine pullulates with inconsistencies imported from theology.

In its further evolution, materialism becomes *one-sided. Hobbes* is the man who *systematises Baconian* materialism. Knowledge based upon the senses loses its poetic blossom, it passes into the abstract experience of the *geometrician*.
Physical motion is sacrificed to *mechanical* or *mathematical* motion; *geometry* is proclaimed as the queen of sciences. **Materialism takes to *misanthropy*. If it is to overcome its opponent, *misanthropic, fleshless* spiritualism, and that on the latter's own ground, materialism has to chastise its own flesh and turn *ascetic*.** Thus it passes into an *intellectual entity*; but thus, too, it evolves all the consistency, regardless of consequences, characteristic of the intellect.

https://opensiuc.lib.siu.edu/cgi/viewcontent.cgi?referer=&httpsredir=1&article=3269&context=ocj **[May 23, 1857]**

What happened lately in France is an example. In 1848 a pure democracy was established there. During a short time there was reason to expect a general spoliation, a national bankruptcy, a new partition of the soil, a maximum of prices, a ruinous load of taxation laid on the rich for the purpose of supporting the poor in idleness. **Such a system would, in twenty years, have made France as poor and barbarous as the France of the Carlovingians.** Happily, the danger was averted; and now there is a despotism, a silent tribune, an enslaved press. Liberty is gone, but civilization has been saved. I have not the smallest doubt that if we had a purely democratic government here the effect would be the same. Either the poor would plunder the rich, and civilization would perish; or order and prosperity would be saved by a strong military government, and liberty would perish. **You may think that your country enjoys an exemption from these evils. I will frankly own to you that I am of a very different opinion. Your fate I believe to be certain, though it is deferred by a physical cause. As long as you have a boundless extent of fertile and unoccupied land, your laboring population will be far more at ease than the laboring population of the Old World, and, while that is the case, the Jefferson politics may continue to exist without causing any fatal calamity.** But the time will

come when New England will be as thickly peopled as old England. Wages will be as low, and will fluctuate as much with you as with us. You will have your Manchesters and Birminghams, and in those Manchesters and Birminghams hundreds of thousands of artisans will assuredly be sometimes out of work. Then your institutions will be fairly brought to the test.
…

There will be, I fear, spoliation. The distress will produce fresh spoliation. There is nothing to stop you. Your Constitution is all sail and no anchor. **As I said before, when a society has entered on this downward progress, either civilization or liberty must perish. Either some Caesar or Napoleon will seize the reins of government with a strong hand, or your republic will be as fearfully plundered and laid waste by barbarians in the twentieth century as the Roman Empire was in the fifth;** with this difference, that the Huns and Vandals who ravaged the Roman Empire came from without, and that your Huns and Vandals will have been engendered within your own country by your own institutions.

https://books.google.fi/books?id=LPbBdyxGNhQC&lpg=PP1&hl=fi&pg=PA66#v=onepage&q&f=false

How could it simultaneously be the case that “there had never been” any such literal state-of-nature war, when in the previous paragraph he had just said that some *were* living like that now? As a result of this ambiguity, Hobbes has been characterized as a literal contractarian by some commentators and as a hypothetical contractarian by others. But I think this minor mystery can be cleared up once we recognize that there is a tacit racial logic in the text: **the *literal* state of nature is reserved for nonwhites; for whites the state of nature is *hypothetical*. The conflict between whites is the conflict between those with *sovereigns*, that is, those who are already (and have always been) in society.** From this conflict, one can extrapolate (gesturing at the racial abyss, so to speak) to what might happen in the absence of a ruling sovereign. But really we know that whites are too rational to allow this to happen to *them*. **So the most notorious state of nature in the contractarian literature – the bestial war of all against all – is really a *nonwhite* figure, a racial object lesson for the more rational whites, whose superior grasp of natural law (here in its prudential rather than altruistic version) will enable them to take the necessary steps to avoid it and not to behave as “savages.”**

Hobbes has standardly been seen as an awkwardly transitional figure, caught between feudal absolutism and the rise of parliamentarianism, who uses the contract now classically associated with the emergence of liberalism to defend absolutism. But it might be argued that he is transitional in another way, in that in mid-seventeenth century Britain the imperial project was not yet so fully developed that the intellectual apparatus of racial subordination had been completely elaborated. **Hobbes remains enough of a racial egalitarian that, while singling out Native Americans for his real-life example, he suggests that without a sovereign *even Europeans* could descend to their state, and that the absolutist government appropriate for nonwhites could also be appropriate for whites.**57 The uproar that greeted his work can be seen as attributable at least in part to this moral/political suggestion. **The spread of colonialism would consolidate an intellectual world in which this bestial state of nature would be reserved for nonwhite savages, to be despotically governed, while civil Europeans would enjoy the benefits of liberal parliamentarianism.** *The Racial Contract began to rewrite the social contract*.

One can see this transition more clearly by the time of Locke, whose state of nature is normatively regulated by traditional (altruistic, nonprudential) natural law. **It is a moralized state of nature in which private property and money exist, indeed a state of nature that is virtually civil.** Whites can thus be literally in this state of nature (for a brief period, anyway) without its calling into question their innate qualities.

Nature’s God: The Heretical Origins of the American Republic (2014)

https://archive.org/details/naturesgodhereti0000stew_o9j9/page/314/mode/2up?view=theater

Probably most people today, if pressed, will say that the principles of liberalism are the elaboration of a certain moral intuition about treating other people with respect. Some might add that those principles are the arbitrary artifact of a particular culture, or of a certain social or economic system. Still others will point to a source from on high. In the abstract reaches of academic political theory, these common ideas about liberalism often take the form of a theory of justice,

according to which the principles of liberalism are said to arise from a universal concept of justice as fairness or something like that.
…

In fact, these common ideas about liberalism describe a political order that probably could not exist and in any case would not last very long.

Liberalism in its original form is not the elaboration of some common moral intuition, the articulation of an arbitrary creed or cultural formation, or a theory of justice. It is a theory of power. Its principal claim is that the source of human power and freedom is the understanding. It rests in an essential way on the same radical philosophy that begins with Nature's God and passes through nature's virtue. **And that radical philosophy remains the ultimate source of liberalism's revolutionary power to the present.**

https://books.google.fi/books?id=Zymp_kM33ZcC&lpg=PP1&hl=fi&pg=PA70#v=onepage&q&f=false

In the fourth century, the Spartan king Archidamus was among the first of those residing in the Peloponnesus to witness the newfangled catapult launch a projectile. Though impressed by the event, he did not welcome what it portended. **Archidamus's only reaction was to swear by his putative ancestor Heracles that "manly virtue (*andrós aretá*) has perished from the earth." As the Macedonian conquest of Hellas would soon reveal, progress in the art of war could only too easily signal the obsolescence of the hoplite militia – and, with it, the demise of the *pólis* and the entire Greek way of life.**26

"***God created men. Sam Colt made them equal.***"

https://en.wikipedia.org/wiki/Jan_Gotlib_Bloch#Influence

To the British readers of *The Contemporary Review*, Bloch wrote in 1901:

> Having busied myself for over fourteen years with the study of war in all its phases and aspects, **I am astonished to find that the remarkable evolution which is rapidly turning the sword into a ploughshare has passed almost unnoticed even by the professional watchmen who are paid to keep a sharp look-out.** In my work on the war of the future I endeavoured to draw a picture of this interesting process. But writing for specialists, I was compelled to enter largely into details, the analysis of which ran into 3,084 pages. **The facts which are there garnered together, and the consequences which flow from them, run too strongly counter to the vested interests of the most powerful class of the community to admit of their being immediately embodied in measures of reform.** And this I foresaw from the first. What I could not foresee was the stubbornness which [it] not only recoiled from taking action but set itself to twist and distort the facts. **Patriotism is highly respectable, but it is dangerous to identify it with the interests of a class.** The steadfastness with which the military caste clings to the memory of a state of things which has already died is pathetic and honourable. Unfortunately it is also costly and dangerous. Therefore I venture now to appeal to the British masses, whose vital interests are at stake and whose verdict must be final.

https://content.time.com/time/subscriber/article/0,33009,886699-2,00.html

In the light of the past, the significant fact about 1945 was that it was the last year of World War II. **But in the light of the future, it was the first year in which civilization possessed, in the sober words of the Smyth Report, "the means to commit suicide at will."**

What the world would best remember of 1945 was the deadly mushroom clouds over Hiroshima and Nagasaki. Here were the force, the threat, the promise of the future. In their giant shadows, 45,000 feet tall, all men were pygmies.
…

The feeling was abroad that the complexity of modern life had made all men, even Presidents, even Men of the Year, mere foam flecks on the tide.

https://voegelinview.com/nietzsche-the-diabolical-saint-of-acceptance/

The strong murder the weak; and the mob are always stronger than the individual, as Socrates points out in *The Gorgias*, much to the disgust of Callicles. Nietzsche sides with Callicles in praising the strong, but his position suffers from the same defect. **The many, the rabble, can beat the few. Nietzsche then finds himself in the ludicrous situation of**

defending the strong against the weak, a logically and rhetorically contradictory position.

https://www.gutenberg.org/cache/epub/18267/pg18267-images.html#Page_185

183. **If, then, the Romans had spurned the Greek culture, they would perhaps have gone to pieces completely.** When could this culture have once again arisen? **Christianity and Romans and barbarians: this would have been an onslaught: it would have entirely wiped out culture.** We see the danger amid which genius lives. **Cicero was one of the greatest benefactors of humanity, even in his own time.**

There is no "Providence" for genius; it is only for the ordinary run of people and their wants that
such a thing exists: they find their satisfaction, and later on their justification.

https://archive.org/details/in.ernet.dli.2015.175029/page/n175/mode/2up?view=theater

In the human race, also, the *superior specimens*, the happy cases of evolution, are the first to perish amid the fluctuations of chances for and against them. They are exposed to every form of decadence: they are extreme, and, on that account alone, already decadents. ... **The short duration of beauty, of genius, of the Caesar, is *sui generis*: such things are not hereditary.** The *type* is inherited, there is nothing extreme or particularly "happy" about a type. ... It is not a case of a particular fate, or of the "evil will" of Nature, but merely of the concept "superior type": the higher type is an example of an incomparably greater degree of complexity—a greater sum of co-ordinated elements: but on this account disintegration becomes a thousand times more threatening. "Genius" is the sublimest machine in existence—hence it is the most fragile.
...

Anti-Darwin.—What surprises me most on making a general survey of the great destinies of man, is that I invariably see the reverse of what to-day Darwin and his school sees or *will* persist in seeing: selection in favour of the stronger, the better-constituted, and the progress of the species. **Precisely the reverse of this stares one in the face: the suppression of the lucky cases, the uselessness of the more highly constituted types, the inevitable mastery of the mediocre, and even of those who are *below mediocrity*.**
...

That will to power, in which I perceive the ultimate reason and character of all change, explains why it is that selection is never in favour of the exceptions and of the lucky cases: **the strongest and happiest natures are weak when they are confronted with a majority ruled by organised gregarious instincts and the fear which possesses the weak.** My general view of the world of values shows that in the highest values which now sway the destiny of man, the happy cases among men, the select specimens do not prevail: but rather the decadent specimens, —perhaps there is nothing more interesting in the world than this *unpleasant* spectacle. ...

Strange as it may seem, the strong always have to be upheld against the weak; and the well-constituted against the ill-constituted, the healthy against the sick and physiologically botched.
...

I do indeed find the "cruelty of Nature" which is so often referred to; but in a different place: Nature is cruel, but against her lucky and well-constituted children; she protects and shelters and loves the lowly.

https://archive.org/details/naturesgodhereti0000stew_o9j9/page/368/mode/2up?view=theater

Many historians today interpret "the sovereignty of the people" as a collective act of make-believe.172 It is a fiction that cleverly masks the fact that the people are anything but sovereign, or so they say. Probably most people today read "the sovereignty of the people" as an imperative. The people *ought* to be sovereign, they should be given a voice in government, even if they usually are not. Yet within the radical political theory that ultimately decided the course of the modern world, the sovereignty of the people is neither a fiction nor an imperative. It is a statement of fact. **The sovereign simply *is* the people.**

This fact of popular sovereignty follows in a primordial way from the axiom that human beings are natural equals. Insofar as human beings are naturally equal, according to the radical line of thought, the power through which rulers impose their will on others can come only from the people themselves. All the money, titles, rights, and influence that individuals wield as instruments of power within society are

in reality nothing more than the power of other people in society appropriated according to certain ideas. **If human beings were as naturally unequal as lions and lambs, to put it in the converse, the sovereign might be identified with a particular (leonine) subset of a human collective; but they aren't, so it isn't.**

> https://oll.libertyfund.org/title/sidney-discourses-concerning-government#lf0019_label_904
>
> There was therefore a power in nations before there were kings, or there could never have been any; and Nimrod could never have been king, if the people of Babylon had not made him king, which they could not have done if they had not had a power of making him so. **'Tis ridiculous to say he made himself king, for tho he might be strong and valiant, he could not be stronger than a multitude of men. That which forces must be stronger than that which is forced; and if it be true, according to the ancient saying, that Hercules himself is not sufficient to encounter two, 'tis sure more impossible for one man to force a multitude, for that must be stronger than he.** If he came in by persuasion, they who were persuaded, were persuaded to consent that he should be king. That consent therefore made him king. But, *Qui dat esse, dat modum esse:*2 They who made him king, made him such a king as best pleased themselves. **He had therefore nothing but what was given: his greatness and power must be from the multitude who gave it:** and their laws and liberties could not be from him; but their liberties were naturally inherent in themselves, and their laws were the product of them.

https://archive.org/details/naturesgodhereti0000stew_o9j9/page/338/mode/2up?view=theater

In the pursuit of the foundations of justice and power, however, **the heirs of Epicurus arrived at the insight that "right" is indeed nothing but "might" perspicuously understood. They wrapped this insight in a respectable language of "natural rights" and "laws of nature" purportedly ordained by God above.** But in fact they found a way of explaining rights that reduces God to nothing more than the very principle that all rights may be explained in terms of power.
…

"Engraved" hearts also happen to be a staple of deist literature, and are enthusiastically cited in the works of Spinoza and Locke, as well as Vanini, Tindal, Jefferson, and Allen, among others. But the laws of Nature's God are dramatically different from – indeed they are in a crucial way the opposite of – the "Natural Law" of the theologians.75
…

Modern Natural Law theorists tend to discover, for example, that gay sex, contraception, and other practices that disagree with their convictions or otherwise make the feel uncomfortable constitute violations of natural law. **The "Laws of Nature" of the deist tradition, on the other hand, impose no obligations, cannot be violated, and reduce the idea of a "crime against nature" to a contradiction in terms.**

Arguably the first and in any case the most influential expression of the deist conception of the laws of nature is to be found in the work of Hobbes.76 **A law of nature, according to Hobbes, is "a dictate of right reason about what should be done or not done for the longest possible preservation of life and limb."**77 So, for example, since drinking heavily is not conducive to long life, one should not drink heavily if one wishes to live long. Hobbes adumbrates a list of nineteen or twenty such laws, depending on the moment of writing. So far, so medieval, one could say. But then, **in what marks a critical break from the Natural Law idea, Hobbes makes a startling yet eminently reasonable observation:** "These dictates of Reason, men use to call by the name of Lawes; but improperly: for they are but Conclusions, or Theoremes concerning what conduceth to the conservation and defence of themselves; **whereas Law, properly is the word of him, that by right hath command over others.**"78
…

Hobbes is among the first theorists to offer a version of unalienable rights, though his position on the matter is deeply conflicted.130 In places he allows that individuals cannot surrender to the sovereign his life and "all things else without which a man cannot live well." In other places, however, his absolutist instincts dominate, and he reduces this vestige of Natural Right in civil society nothing more than the right to make a run for it as one is hustled blindfolded to the gallows.

> 130. Hobbes, *Leviathan*, 1.14. In *Leviathan*, 2.21, for example, Hobbes says, **"It is manifest, that every Subject had Liberty in all those things, the right whereof cannot by Covenant be transferred."** Hobbes allows that individuals are under no obligation to obey laws that require them to act against the laws of nature, such as to kill themselves, but, having transferred absolute authority over all things to the sovereign, Hobbes by no means disallows the state from attempting to demand such actions. (*De Cive*, 2.18-19, 6.13)

https://oll.libertyfund.org/title/smith-leviathan-1909-ed#lf0161_label_095

> And lastly the motive, and end for which this renouncing, and transferring of Right is introduced, is nothing else but the security of a mans person, in his life, and in the means of so preserving life, as not to be weary of it. **And therefore if a man by words, or other signes, seem to despoyle himselfe of the End, for which those signes were intended; he is not to be understood as if he meant it, or that it was his will; but that he was ignorant of how such words and actions were to be interpreted.**

https://archive.org/details/deciveorcitizen00inhobb/page/78/mode/2up?view=theater

> **If therefore I be commanded to kill myself, I am not bound to do it; for though I deny to do it, yet the right of dominion is not frustrated, since others may be found, who being commanded, will not refuse to do it; neither do I refuse to do that which I have contracted to do.** In like manner, if the chief ruler command any man to kill him, he is not tied to do it, because it cannot be conceived that he made any such covenant. Nor if he command to execute a parent, whether he be innocent, or guilty, and condemned by the law, **since there are others who, being commanded, will do that, and a son will rather die, than live infamous, and hated of all the world.** There are many other cases, in which, since the commands are shameful to be done by some, and not by others, obedience may, by right, be performed by these, and refused by those; and this, without breach of that absolute right which was given to the chief ruler. **For in no case is the right taken away from him, of slaying those who shall refuse to obey him. But they who thus kill men, although by right, given them from him that hath it, yet if they use that right otherwise than right reason requires, they sin against the laws of nature, that is, against God.**

…

Unalienable rights can in fact be divided in any number of ways (just as laws of nature can be so divided, as Hobbes inadvertently reveals when he changes his list of "immutable" laws from one book to the next), **because all are ultimately perspectives on a singular Natural Right, the right to self-preservation, or the self-realization of the conatus,** and the process of their division and enumeration involves the introduction of the specific conditions of experience. Among the radical philosophers of the early modern world, **there is one distinction between different kinds of experience that is most fundamental, as we know, and it is the one associated with the distinction between mind and body.** And it is on this account that unalienable rights divide most easily into the dyad favored by Young and Allen: "Liberty and Property… the household gods of Englishmen."

https://archive.org/details/naturesgodhereti0000stew_o9j9/page/322/mode/2up?view=theater

The lion is the king of the beasts; kings are like lions among men; and God is the lion king of them all – or so the common sense of the matter goes. In modern societies, the same intuition takes a different form, yet it is not so different in substance as is often imagined. **Not many people today are inclined to say that the order of society is grounded in the order of nature; but quite a few assume that the order of society is follows from the nature of individual human beings.** The lions among us rise to become CEOs; the mice become something less than full-time workers.

Given this common intuition that people are naturally or inherently unequal, the common consciousness universally interprets the claim that "all men are created equal" as a moral imperative. Justice, the common conception supposes, involves treating people as equals *despite* the fact that they are not. It means granting them the power to rule themselves *despite* the fact that in the natural order of things they would have to submit to the rule of others. **Since this imperative so obviously runs counter to the motives and the powers that are perceived to arise from the nature of things, the common conception further infers that it can have force only insofar as it arises from some transcendental authority.** Only a commandment from God (or some uncontrollable feeling of empathy among human beings) can compel people to treat unequal people as equals.

The radical philosophy that guided the American Revolution, on the other hand, begins not with this common assertion of the *moral* equality of human beings but with an explicit denial of the premise concerning the *natural* inequality of human beings. Human equality begins in nature, it says, not in moral imperatives. **Although the history of the idea should properly be traced to Lucretius's natural history of justice, in the early modern world it was Thomas Hobbes – whose debt to Epicurus on the point was so obvious to his contemporaries that it hardly needed to be stated**15 **– who made the first and sharpest claim for natural equality:**

> Nature hath made men so equall, in the faculties of body, and mind; as that though there bee found one man sometimes manifestly stronger in body, or of quicker mind than another; yet when all is reckoned together, the difference between man, and man, is not so considerable, as that one man can thereupon claim to himselfe any benefit, to which another may not pretend, as well as he.16

This natural equality, it should be clear, is neither exact nor universal with respect to all human attributes. It is a rough equality between human beings considered in the abstract and has to do principally with one particular attribute: power. **Take away our ability to command the resources of society, says Hobbes, and we are roughly equal in power. More graphically, he asserts, we are equal because, left to our own devices, we all have the power to kill one another. (Or perhaps more accurately: any two human beings, considered abstractly in terms of their basic faculties in maturity, can overcome any one individual.)**17

>
> Wargrave said sharply: "Mr. Lombard, you are a very strongly built and powerful young man, but ex-Inspector Blore is also a man of powerful physique. I do not know what the outcome of a struggle between you would be but I can tell you this. On Blore's side, assisting him to the best of our ability will be myself, Dr. Armstrong and Miss Claythorne. **You will appreciate, therefore, that the odds against you if you choose to resist will be somewhat heavy.**"

To find genuine natural inequalities, according to this line of thought, one would have to look across categories or species. Human beings and chickens, for example, are naturally unequal, since people can almost always defeat poultry in battle. **(And indeed, a Hobbesian would point out, there is not much justice between people and chickens: we raise them in captivity, and then we eat them.)**

>
> Had it been the intention of Providence, that some men should govern the rest, without their consent, we should have seen as indisputable marks distinguishing these superiours from those placed under them, as those which distinguish men from the brutes. The remark of Rumbald,12 in the nonresistance time of Charles the second, evinced propriety as well as wit. He could not conceive that the Almighty intended, that the greatest part of mankind should come into the world with saddles on their backs and bridles in their mouths, and that a few should come ready booted and spurred to ride the rest to death.q **Still more apposite to our purpose is the saying of him, who declared that he would never subscribe the doctrine of the divine right of princes, till he beheld subjects born with bunches on their backs, like camels, and kings with combs on their heads, like cocks;** from which striking marks it might indeed be collected, that the former were designed to labour and to suffer, and the latter, to strut and to crow.r

The natural equality of human beings does not imply that we have a moral obligation to treat all people as equals in every context. Indeed, as a royalist, Hobbes comes to almost exactly the opposite conclusion. **Its core meaning is just that the inequalities observable among individuals in any actual society are not attributable to the nature of people or things. That is, there is no natural order of subordination among human beings. Lucretius made the point first when he observed that "slavery and freedom, poverty and wealth, war and peace" are not properties of the atoms themselves, but only of human arrangements.**18

https://en.wikipedia.org/wiki/The_Reign_of_Quantity_and_the_Signs_of_the_Times

The poet Charles Upton writes that:

> in the *Reign of Quantity*, Guénon sees history in terms of the Hindu concept of the manvantara, the cycle of manifestation composed of Golden, Silver, Bronze and Iron ages; [...] **This cycle is an inevitable descent from the pole of Essence (or forma) toward the pole of Substance (or materia).** [...] **Essence is qualitative while substance is quantitative; As the cycle progresses or descends, the very nature of time and space changes.** [...] In earlier stages, time is relatively eternal, as the cycle moves on, however, time begins to take over and accelerate, **but this constant acceleration of time can't go on forever. Time, the "devourer" ends by devouring itself. At the end of time, Time will be changed into space again.** [...] This ultimate timeless point is simultaneously the end of the cycle of manifestation and the beginning of the next. [...] Before this ultimate transformation, in the latter days of the present cycle certain final developments must take place. Since quantity has particularly to do with matter, the *Reign of quantity* must also be the reign of materialism. **The age of miracles ceases, the world becomes less permeable to the influences of the higher planes of reality.**[8]

John Griffin also writes that:

> **Guénon claims that essence is qualitative while the substance of our specific world (*materia secunda*) is quantitative (*materia signata quantitate*).**[9]

"Our actual inequality," Hobbes emphatically concludes, "has been introduced by civil law."19 **An indication of just how seriously Hobbes takes this claim concerning natural equality is his stance on paternal authority, which he maintains is also a product of civil and social arrangements – quite a radical position in the unthinkingly patriarchal world of the time.**

The idea of natural equality figures centrally in the thought of Spinoza – who agrees with Hobbes and Gassendi that human beings "share in one and the same nature"20 – but the most influential (and misunderstood) theorist on the subject is Locke. Locke's equality, too, is an "*equality* of Men by Nature."21 Men are equal on account of their "being furnished with like Faculties, sharing all in one Community of Nature."22 **Locke goes on to offer an implicit version of Hobbes's argument, that the natural equality of men is evident in the fact that in the state of nature men are equally able to kill one another.**23 **In a phrase that remains popular all the way down to Jefferson, he abbreviates the claim that there is no natural subordination among human beings into the slogan that all men are "equal and independent."**24

https://archive.org/details/crisisofeuropean0000haza/page/282/mode/2up?view=theater

> **Incomparably less vigorous, less profound than either Grotius or Pufendorf,** and often illogical, **Locke, nevertheless, succeeded in bringing about the popularization of this law. Liberty, Equality! He might well have taken those words for his motto.** "The state of Nature has a law of Nature to govern it, which obliges every one, and reason, which is that law, teaches all mankind who will but consult it, **that being all equal and independent, no one ought to harm another in his life, health, liberty or possessions.**"2

In his writings about equality, Locke makes liberal use of Nature's God, and among some audiences then and now, his invocations of the deity have been taken to prove that his point is that we have the moral obligation to treat people equally in virtue of a commandment from God. **Nothing could be farther from the meaning of Locke's actual arguments:**

> Man has a *Natural Freedom* ... **since all that share in the same common Nature, Faculties, and Powers, are in Nature equal, and ought to partake in the same common Rights and Privileges,** till the manifest appointment of God, who is *Lord over all, Blessed for ever*, can be produced to show any particular Persons Supremacy.25

The appearance of the "Lord over all" sounds vaguely pious, **yet the fact is that God's presence here is made known only by his absence. Human equality arises from the deity's failure to countermand the equality of humankind that we observe in nature.** Thus, equality depends not on the word of God but on the silence of God. We can of course say – as Locke and countless successors do – that the equality we observe in nature has a divine source, inasmuch as all of nature is the work of God. But we can do so only by supposing that our equality is not distinct from anything else in nature on this point, which is in turn to imply that whatever obligation arises specifically from this equality does not depend on the claim that it is of divine origin. We would also have to acknowledge that divine revelation is entirely dispensable, since the observation of nature alone suffices to demonstrate our

natural equality. **In short, as happens repeatedly in Locke, we can keep God in the picture by rendering "God" functionally interchangeable with "Nature."**
…

Today we tend to lose sight of the impiously anti-transcendental origins of the political theory that guided the American Revolution. But the defenders of orthodoxy in the early modern world certainly did not. **The divine rights theorist Sir Robert Filmer (1588-1653) vehemently attacked Hobbes for saying – as in fact he did – that men "emerged from the earth like mushrooms … without any obligation to one another."**41 **Pointing the finger at Hobbes, Grotius, and (*avant la lettre*) Locke,**42 **he inveighed that the power of the King is a "donation of God," not "of the people,"**43 **and that the "conceit of original freedom" is a "great scandal of Christianity" and the gateway to "atheism."**44 A century and a half later, Timothy Dwight pummeled his students at Yale with the same, furious insistence on the transcendental origins of the political order. "*The foundation of all government is, undoubtedly, the Will of God,*" he declaimed. "Government, since the days of Mr. Locke, has been extensively supposed *to be founded in the Social Compact.* No opinion is more groundless than this."45
…

In Jefferson's strident *Summary View of the Rights of British Colonists* of 1774, to name one of countless examples, the argument against parliamentary power rests on a theory of purely natural equality: "Can any one reason be assigned why 160,000 electors in the island of Great Britain should give law to four millions in the states of America, every individual of whom is equal to every individual of them in virtue, in understanding, and in bodily strength?"47 **Jefferson, too, begins by suggesting that our natural equality is the gift of God. <u>But by the end of the *View*, God proves dispensable, and the colonists can claim their equal rights directly "from nature."</u>**

---

https://en.wikisource.org/wiki/1911_Encyclop%C3%A6dia_Britannica/Maine,_Sir_Henry_James_Sumner

Meanwhile Maine had published in 1885 his one work of speculative politics, a volume of essays on *Popular Government*, designed to show that democracy is not in itself more stable than any other form of government, and that there is no necessary connexion between democracy and progress.

https://archive.org/details/popgovernme01maingoog/page/n14/mode/2up?view=theater

A portion of the notions which prevail in Europe concerning Popular Government are derived (and these are worthy of all respect) from observation of its practical working; a larger portion merely reproduce technical rules of the British or American Constitutions in an altered or disguised form; **but a multitude of ideas on this subject, ideas which are steadily absorbing or displacing all others, appear to me, like the theories of jurisprudence of which I have spoken, to have been conceived *à priori*. <u>They are, in fact, another set of deductions from the assumption of a State of Nature.</u> Their true source has never been forgotten on the Continent of Europe,** where they are well known to have sprung from the teaching of Jean-Jacques Rousseau, who believed that men emerged from the primitive natural condition by a process which made every form of government, except Democracy, illegitimate. **In this country they are not often explicitly, or even consciously, referred to their real origin,** which is, nevertheless, constantly betrayed by the language in which they are expressed. Democracy is commonly described as having an inherent superiority over every other form of government. It is supposed to advance with an irresistible and pre-ordained movement. It is thought to be full of the promise of blessings to mankind; yet if it fails to bring with it these blessings, or even proves to be prolific of the heaviest calamities, it is not held to deserve condemnation. **These are the familiar marks of a theory which claims to be independent of experience and observation <u>on the plea that it bears the credentials of a golden age</u>, non-historical and unverifiable.**
…

Meantime, **the ancient British Constitution has been modifying itself with a rapidity which could not be foreseen in Bentham's day.** I suspect that there were few observant Englishmen who, in presence of the agitation which filled the summer and autumn of 1884, were not astonished to discover the extent to which the Constitution of their country had altered, under cover of old language and old forms.

https://archive.org/details/popgovernme01maingoog/page/n82/mode/2up?view=theater

Villari4 **has shown that the modern State of the Continental type, with distinctly defined administrative departments as its organs, was first constituted in Italy. It grew, not out of the medieval Republican municipalities, which had nothing in common with modern government, but out of that most ill-famed of all political systems, the Italian tyranny or Princedom. <u>The</u>**

celebrated Italian state-craft, spread all over Europe by Italian statesmen, who were generally ecclesiastics, was applied to France by Louis XIV. and Colbert, the pupils of Cardinal Mazarin; and out of the contact of this new science with an administrative system in complete disorder, there sprang Monarchical France. The successive French Republics have been nothing but the later French Monarchy, upside down.

Similarly, the Constitutions and the legal systems of the several North American States, and of the United States, would be wholly unintelligible to anybody who did not know that the ancestors of the Anglo-Americans had once lived under a King, himself the representative of older Kings infinitely more autocratic, and who had not observed that throughout these bodies of law and plans of government the People had simply been put into the King's seat, occasionally filling it with some awkwardness.
…

If the whole of the known history of the human race be examined, we shall see that the great authors of legislative change have been powerful Monarchies. The long wail at the iniquities of Nineveh and Babylon, which runs through the latter part of the Old Testament, is the expression of Jewish resentment at the "big legislation" with which the nations that most study the Old Testament are supposed to have fallen in love.

The trituration of old usage was carried infinitely further by the Roman Emperors, ever increasing in thoroughness as the despotism grew more stringent. The Emperor was in fact the symbolic beast which the Prophet saw devouring, breaking to pieces and stamping the residue with its feet. We ourselves live in the dust of Roman Imperialism, and by far the largest part of modern law is nothing more than a sedimentary formation left by the Roman legal reforms.

The rule holds good through all subsequent history. The one wholesale legal reformer of the Middle Ages was Charles the Great. **It was the French Empire of the Bonapartes that gave real practical currency to the new French jurisprudence which has overrun the civilised world,** for the governments immediately arising out of the Revolution left little behind them beyond projects of law or laws which were practically inapplicable from the contradictions which they contained.

The truth seems to be that the extreme forms of government, Monarchy and Democracy, have a peculiarity which is absent from the more tempered political systems founded on compromise, Constitutional Kingship and Aristocracy. **When they are first established in absolute completeness, they are highly destructive.**
…

What the old monarchies, established in the valleys of the great Eastern rivers, had to contend against was religious tenacity and tribal obstinacy; and they transported whole populations in order that these might be destroyed. What a modern Democracy fights with is privilege; and it knows no rest till this is trampled out.
…

As is well known to scholars, **the ancient republics hardly legislated at all;** their democratic energy was expended upon war, diplomacy, and justice; **but they put nearly insuperable obstacles in the way of a change of law.**

> https://www.gutenberg.org/cache/epub/10827/pg10827-images.html
>
> **And if princes surpass peoples in the work of legislation,** in shaping civil institutions, in moulding statutes, and framing new ordinances, so far do the latter surpass the former in maintaining what has once been established, as to merit no less praise than they.

…

Mr. Grote did his best to explain away the poor opinion of the Athenian Democracy entertained by the philosophers who filled the schools of Athens; but the fact remains that the founders of political philosophy found themselves in presence of Democracy, in its pristine vigour, and thought it a bad form of government. The panegyrics of which it is now the object are, again, of French origin. They come to us from the oratory and literature of the first French Revolution, which, however, soon exchanged glorification of the new birth of the human race for a strain of gloomy suspicion and homicidal denunciation. The language of admiration which prevailed for a while had still remoter sources; and it may be observed, as an odd circumstance, **that, while the Jacobins generally borrowed their phraseology from the legendary history of the early Roman Republic, the Girondins preferred resorting for metaphors to the literature which sprang from Rousseau. On the whole, I think that the historical ignorance which made heroes of Brutus and Scaevola was less abjectly nonsensical than the philosophical silliness which dwelt on the virtues of mankind in a state of natural democracy.**

https://archive.org/details/in.ernet.dli.2015.512045/page/n491/mode/2up?view=theater

> It is true he hated, beyond even monarchical power, aristocratic despotism, which unites rigour to hypocrisy and tyranny more austere to morals more perverse; nor was he ever the dupe of the parliaments of France, or the nobles of Sweden and Poland, who give the name of freedom to the chains with which they would load their vassals. **In this opinion, Voltaire has been joined by all philosophers who have sought the definition of a free state in the nature and mind of man, and not, like the pedant Mably, in examples, drawn from the tyrannical anarchies of Italy and Greece.**

If anybody wishes to know what was the influence of Rousseau in diffusing the belief in a golden age, when men lived, like brothers, in freedom and equality, **he should read, not so much the writings of the sage, as the countless essays printed in France by his disciples just before 1789. They furnish very disagreeable proof that the intellectual flower of a cultivated nation may be brought, by fanatical admiration of a social and political theory, into a condition of downright mental imbecility.**1

> 1. **Brissot, the Girondin leader, while still a young man and an enthusiastic Royalist, had argued, long before Proudhon, that Property is Theft. There is, he said, a natural right to correct the injustice of the institution, by stealing. But he held the still more remarkable opinion, that cannibalism is natural and justifiable.** Since, he argued, under the reign of Nature the sheep does not spare the insects on the grass, and the wolf and the man eat the sheep, why have not all these creatures a natural right to eat creatures of their own kind? (*Recherches philosophiques sur le droit de propriété et sur le vol considéré dans sa nature.* Par Brissot de Warville.)

https://archive.org/details/populargovernme01maingoog/page/n176/mode/2up?view=theater

Theoretically, at any rate, Thackeray hated the artificialities of civilisation, and it must be owned that some of his favourite personages have about them something of Rousseau's natural man as he would have shown himself if he had mixed in real life—something, that is, of the violent blackguard.
…

The language of Rousseau sometimes suggests that he meant his picture of early social transformations to be regarded as imaginary;6 **but nevertheless the account given of them is so precise, detailed, and logically built up, that it is quite inconceivable its author should not have intended it to express realities.**

> 6. "Comment ce changement s'est-il fait? Je l'ignore."—*Contrat Social,* chap. i. **I have myself no doubt that very much of the influence of Rousseau over the men of his own generation, and of the next, arose from the belief widely spread among them that his account of natural and of early political society was literally true. There is a remarkable passage in the *Penseés* of Pascal (III. 8) which describes the powerful revolutionary effects which may be produced by contrasting an existing institution with some supposed "fundamental and primitive law" of the State.** The reflection was obviously suggested by the sedition of the Fronde. The Parliament of Paris firmly believed in the "fundamental and primitive laws" of France; and, a century later, the disciples of Rousseau had exactly the same faith in the State of Nature and the Social Compact.

https://www.gutenberg.org/cache/epub/18269/pg18269-images.html#SECTION_V

> The art of opposition and of revolution is to unsettle established customs, sounding them even to their source, to point out their want of authority and justice. **We must, it is said, get back to the natural and fundamental laws of the State, which an unjust custom has abolished.**

…

But the theory, as he put it together, owes to him its extraordinary influence; and it is the undoubted parent of a host of phrases and associated notions **which, after having long had currency in France and on the Continent, are beginning to have serious effect in this country, as the democratic element in its Constitution increases. From this origin sprang the People (with a capital P), the Sovereign People, the People the sole source of all legitimate power.** From this came the subordination of Governments, not merely to electorates but to a vaguely defined multitude outside them, or to the still vaguer mastership of floating opinion. Hence began the limitation of legitimacy in governments to governments which approximate to democracy.

A vastly more formidable conception bequeathed to us by Rousseau is that of the omnipotent democratic State rooted in natural right; the State which has at its absolute disposal everything

which individual men value, their property, their persons, and their independence; the State which is bound to respect neither precedent nor prescription; the State which may make laws for its subjects ordaining what they shall drink or eat, and in what way they shall spend their earnings; **the State which can confiscate all the land of the community, and which, if the effect on human motives is what it may be expected to be, may force us to labour on it when the older incentives to toil have disappeared.**

Nevertheless this political speculation, of which the remote and indirect consequences press us on all sides, is of all speculations the most baseless. The natural condition from which it starts is a simple figment of the imagination. So far as any research into the nature of primitive human society has any bearing on so mere a dream, all inquiry has dissipated it. The process by which Rousseau supposes communities of men to have been formed, or by which at all events he wishes us to assume that they were formed, is again a chimera. No general assertion as to the way in which human societies grew up is safe, but perhaps the safest of all is that none of them were formed in the way imagined by Rousseau.

The true relation of some parts of the theory to fact is very instructive. Some particles of Rousseau's thought may be discovered in the mental atmosphere of his time. **"Natural law" and "natural rights" are phrases properly belonging to a theory not of politics, but of jurisprudence, which, originating with the Roman jurisconsults, had a great attraction for the lawyers of France.** The despotic sovereign of the ''Contrat Social," the all-powerful community, is an inverted copy of the King of France invested with an authority claimed for him by his courtiers and by the more courtly of his lawyers, but denied to him by all the highest minds in the country, and specially by the great luminaries of the French Parliaments. **The omnipotent democracy is the King-Proprietor, the lord of all men's fortunes and persons; but it is the French King turned upside down.** The mass of natural rights absorbed by the sovereign community through the Social Compact is, again, nothing more than the old divine right of kings in a new dress.
…

The conceptions of Nature, of Natural Law, and of Natural Right, which prompted and shaped his political speculations, are first found in the language of the Roman lawyers. It is more than doubtful whether these illustrious men ever believed in the State of Nature as a reality, but they seem to have thought that, under all the perverse technicalities of ancient law, there lay a simple and symmetrical system of rules which were in some sense those of Nature. Their natural law was, for all practical purposes, simple or simplified law. **This view, with all its philosophical defects, led to a great simplification of law both in the Roman State and in modern Europe, and indeed was the chief source of law-reform until the system of Bentham, which also aimed at the simplification of law, made its appearance.**

---

http://aleph0.clarku.edu/huxley/CE1/NatIneq.html **[January 1890]**

> https://mathcs.clarku.edu/huxley/CE1/NatIneq.html#note1
>
> I shall often have to quote *Ancient Law.* **The first edition of this admirable book was published in 1861, but now, after twenty-nine years of growing influence on thoughtful men, it seems to be forgotten, or wilfully ignored, by the rack of political speculators.** It is enough to make one despair of the future that Demos and the Bourbons seem to be much alike in their want of capacity for either learning or forgetting.
>
> [4] If I had not reason to think that Mr. Morley's *Rousseau* and Sir Henry Maine's *Ancient Law,* especially the admirable chapters III. and IV., must be unknown to many political writers and speakers, and *a fortiori* to the general public, there would be no excuse for the present essay, which simply restates the case which they have so exhaustively treated.

What is the meaning of the famous phrase that "all men are born free and equal," which **gallicised Americans,** who were as much "philosophes" as their inherited common sense and their practical acquaintance with men and with affairs would let them be, put forth as the foundation of the "Declaration of Independence"?
…

Rousseau, like the sentimental rhetorician that he was, and half, or more than half, sham, as all sentimental rhetoricians are, sagaciously fought shy, as we have seen, of the question of the influence of natural upon political equality. But those of us who do not care for sentiment and do care for truth may not evade the consideration of that which is really the key of the position. If Rousseau, instead of letting his children go to the *enfants trouvés,* had taken the trouble to discharge a father's duties towards them, he would hardly have talked so fast about men being born equal, even in a political sense. For, if that merely means that all new-born children are political zeros – it is, as we have seen, though true enough, nothing to the purpose; while, if it means that, in their potentiality of becoming factors in any social organization – citizens in Rousseau's sense –

all men are born equal, **it is probably the most astounding falsity that ever was put forth by a political speculator; and that, as all students of political speculation will agree, is saying a good deal for it.** ...

It may be pointed out that, after all, whatever estimate we may form of him, the author of works which have made such a noise in the world could not have been a mere fool; and that, if, in their plain and obvious sense, the doctrines which he advanced are so easily upset, it is probable that he had in his mind something which is different from that sense.

I am a good deal disposed to think that this is the case. **There is much to be said in favour of the view that Rousseau, having got hold of a plausible hypothesis, more or less unconsciously made up a clothing of imaginary facts to hide its real nakedness.** He was not the first nor the last philosopher to perform this feat.

https://www.garynorth.com/public/2280.cfm

Natural law theory was born in a time of breakdown: the breakdown of faith in the Greek city-state. Alexander and then Rome had conquered them all. Stoic philosophers sought a substitute theory of the local religious rites-based theory of the city-state.

The substitute was a theory of universal mankind, an idea foreign to classical Greek politics. This universal humanity possesses a common reason, they argued. Common reason allows men to come to agreement about ethics and law. **Natural law theory was an attempt by philosophers to provide legitimacy for a world empire.**

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0054%3Abook%3D1%3Acard%3D272

To these I give no bounded times or power, but empire without end. [imperium sine fine] Yea, even my Queen, Juno, who now chastiseth land and sea with her dread frown, will find a wiser way, and at my sovereign side protect and bless the Romans, masters of the whole round world, who, clad in peaceful toga, judge mankind. Such my decree!

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0137%3Abook%3D3&force=y

I am by no means unaware that I might be justly accused of ingratitude and indolence, were I to describe thus briefly and in so cursory a manner the land **which is at once the foster-child[356] and the parent of all lands; chosen by the providence of the Gods [numine deum electa] to render even heaven itself more glorious[357], to unite the scattered empires of the earth, to bestow a polish upon men's manners, [ritusque molliret] to unite the discordant and uncouth [ferasque] dialects of so many different nations by the powerful ties of one common language, to confer the enjoyments of discourse and of civilization upon mankind, [conloquia et humanitatem homini daret] to become, in short, the mother-country of all nations of the Earth.**

https://archive.org/details/in.ernet.dli.2015.231118/page/n451/mode/2up?view=theater

The jurists of Rome, by a patriotic fiction, described the *ius gentium* as law common to all nations. But they were too modest about Rome's part in it. Actually it was local law adapted to Roman sovereignty, and designed to govern the peoples of Italy and the provinces without giving them Roman citizenship and the other rights of the *ius civile.*

By a corresponding fiction the philosophers attempted to identify the Law of the Nations with the "Law of Nature." The Stoics defined the latter as a moral code implanted in man by "natural reason." Nature, they held, was a system of reason, a logic and order in all things; this order, spontaneously developing in society, and coming to consciousness in man, was natural law. Cicero phrased the fancy in a famous passage:

> True law is right reason in agreement with nature, world-wide in scope, unchanging, everlasting. ... We may not oppose or alter that law, we cannot abolish it, we cannot be freed from its obligations by any legislature, and we need not look outside ourselves for an expounder of it. **This law does not differ for Rome and for Athens, for the present and for the future; ... it is and will be valid for all nations and all times.** ... He who disobeys it denies himself and his own nature.[47]

It was a perfect statement of an ideal that grew in force as Stoicism reached the throne in the Antonines. **Ulpian developed it into the far-reaching principle that class distinctions and privileges are accidental and artificial; and from this it was but a step to the Christian conception of all men as fundamentally equal. But when Gaius defined the *ius gentium* as**

> **simply "the law which natural reason has established among all mankind,"[48] he was mistaking Roman arms for Divine Providence.** Roman law was the logic and economy of force; **the great codes of *ius civile* and *ius gentium* were the rules by which a wise conqueror gave order, regularity, and time's sanctity to a sovereignty based upon the legions' strength. They were natural, but only in the sense that it is natural for the strong to use and abuse the weak.**

As soon as men began to think about political problems, it must have struck them that, if the main object of society was the welfare of its members (and until this became clear, political action could not have risen above the level of instinct[13]), there were all sorts of distinctions among men, and burdens laid upon them, which nowise contributed to that end. **Even before the great leveller, Rome, had actually thrown down innumerable social and national party-walls, had absorbed all other forms of citizenship into her own, and brought the inhabitants of what was then known as the world under one system of obligations, thoughtful men were discovering that it was desirable, in the interests of society, that all men should be as free as possible, consistently with those interests; and that they should all be equally bound by the ethical and legal obligations which are essential to social existence.** It will be observed that this conclusion is one which might be arrived at by observation and induction from the phenomena of past and present experience. My belief is that it is the conclusion which must be reached by those means, when they are rightly employed – and that, in point of fact, **the doctrines of freedom and equality, so far as they were preached by the Stoics and others, would have had not the least success, if they had not been so far approved by experience and so far in harmony with human instincts, that the Roman jurists found they could work them up with effect into practical legislation. For the *a priori* arguments of the philosophers in the last century of the Republic, and the first of the Empire, stand examination no better than those of the philosophers in the centuries before and after the French Revolution.** As is the fashion of speculators, they scorned to remain on the safe, if humble, ground of experience, and preferred to prophesy from the sublime cloudland of the *a priori;* so that, busied with deduction from their ideal "ought to be" they overlooked the "what has been," the "what is," and the "what can be."

It is to them that we owe the idea of living "according to nature"; which begot the idea of the "state of nature"; which begot the notion that the "state of nature" was a reality, and that, once upon a time, "all men were free and equal" – which again begot the theory, that society ought to be reformed in such a manner as to bring back these halcyon days of freedom and equality; which begot *laissez faire* and universal suffrage; which begot the theory so dear to young men of more ambition than industry, that, while every other trade, business, or profession requires theoretical training and practical skill, and would go to the dogs if those who carry them on were appointed by the majority of votes of people who know nothing about it and very little about them – the management of the affairs of society will be perfectly successful, if only the people who may be trusted to know nothing, will vote into office the people who may be trusted to do nothing.
…

The conclusion of the whole matter, then, would seem to be that the doctrine that all men are, in any sense, or have been, at any time, free and equal, is an utterly baseless fiction.
…

And if, instead of appealing to philosophy we turn to revealed religion, I am not aware that either Judaism or Christianity affirms the political freedom or the political equality of men in Rousseau's sense. They affirm the equality of men before God – but that is an equality either of insignificance or of imperfection.

https://www.marxists.org/archive/marx/works/1877/anti-duhring/ch08.htm

Christianity knew only *one* point in which all men were equal: that all were equally born in original sin — which corresponded perfectly to its character as the religion of the slaves and the oppressed. Apart from this it recognised, at most, the equality of the elect, which however was only stressed at the very beginning. The traces of community of goods which are also found in the early stages of the new religion can be ascribed to solidarity among the proscribed rather than to real equalitarian ideas. Within a very short time the establishment of the distinction between priests and laymen put an end even to this incipient Christian equality. — **The overrunning of Western Europe by the Germans abolished for centuries all ideas of equality, through the gradual building up of such a complicated social and political hierarchy as had never existed before. But at the same time the invasion drew Western and Central Europe into the course of historical development, created for the first time a compact cultural area,** and within this area also for the first time a system of predominantly national states exerting mutual influence on each other **and mutually holding each other in check.** Thereby it prepared the ground on which alone the question of the equal status of men, of the rights of man, could at a later period be raised.

> http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0247%3Abook%3D5%3Achapter%3D89
>
> 89. *Ath.* 'As we therefore will not, for our parts, with fair pretences, as, that having defeated the Medes, our reign is therefore lawful, or that we come against you for injury done, make a long discourse without

> being believed; so would we have you also not expect to prevail by saying either that you therefore took not our parts because you were a colony of the Lacedaemonians or that you have done us no injury. **But out of those things which we both of us do really think, let us go through with that which is feasible, both you and we knowing that in human disputation justice is then only agreed on when the necessity is equal; whereas they that have odds of power exact as much as they can, and the weak yield to such conditions as they can get.**'

…

The demand for liberation from feudal fetters and the establishment of equality of rights by the abolition of feudal inequalities was bound soon to assume wider dimensions, once the economic advance of society had placed it on the order of the day.

…

And as people were no longer living in a world empire such as the Roman Empire had been, **but in a system of independent states dealing with each other on an equal footing and at approximately the same level of bourgeois development, it was a matter of course** that the demand for equality should assume a general character reaching out beyond the individual state, **that freedom and equality should be proclaimed *human rights.***

> https://news.stanford.edu/2019/10/23/fall-rome-europes-lucky-break/
>
> The disintegration of the Roman empire freed Europe from rule by a single power. Imperial monopolies provided peace and stability, but by seeking to preserve the status quo also tended to stifle experimentation and dissent. When the end of empire removed centralized control, rival political, military, economic and religious constituencies began to fight, bargain and compromise and – in the process – rebuilt society along different lines**.**
>
> **Those 1,500 years (all the way up to World War II) were full of conflicts as Europe splintered into a violently competitive state system.** But for all the suffering it caused, this fragmentation and competition fostered innovation that eventually gave rise to unprecedented change in knowledge production, economic performance, human welfare and political affairs. This path to modernity was long and tortuous, but also unique in the world.

http://www.online-literature.com/chesterton/2592/

This blind intention to absorb, to change the shape of everything and digest it in the darkness of a dragon's stomach; this is what is really meant by the Pantheism and Cosmic Unity of the East. The Cosmos as such is cannibal; as old Time ate his children. The Eastern saints were saints because they wanted to be swallowed up. The Western saint, like St. George, was sainted by the Western Church precisely because he refused to be swallowed. The same process of thought that has prevented nationalities disappearing in Christendom has prevented the complete appearance of Pantheism. **All Christian men instinctively resist the idea of being absorbed into an Empire; an Austrian, a Spanish, a British, or a Turkish Empire.** But there is one empire, much larger and much more tyrannical, which free men will resist with even stronger passion. **The free man violently resists being absorbed into the empire which is called the Universe.**

https://www.gutenberg.org/files/19322/19322-h/19322-h.htm#INTRODUCTION

"In me," he once said, "the Christianity of my forbears reaches its logical conclusion. **In me the stern intellectual conscience that Christianity fosters and makes paramount turns *against* Christianity. In me Christianity … devours itself.**"

…

It was as if his apostasy from the faith of his fathers, filling him with the fiery zeal of the convert, and particularly of the convert to heresy, had blinded him to every other element in the gigantic self-delusion of civilized man.

http://4umi.com/nietzsche/zarathustra/11

11. The New Idol

SOMEWHERE there are still peoples and herds, but not with us, my brethren: here there are states.

A state? What is that? Well! open now your ears unto me, for now will I say unto you my word concerning the death of peoples.

A state, is called the coldest of all cold monsters. Coldly lieth it also; and this lie creepeth from its mouth: "I, the state, am the people."
...

Where there is still a people, there the state is not understood, but hated as the evil eye, and as sin against laws and customs.
...

"On earth there is nothing greater than I: it is I who am the regulating finger of God." – thus roareth the monster. And not only the long-eared and short-sighted fall upon their knees!
...

Yea, it findeth you out too, ye conquerors of the old God! Weary ye became of the conflict, and now your weariness serveth the new idol!

https://archive.org/details/humanalltohuman033380mbp/page/n297/mode/2up?view=theater **[1878]**

473. Socialism, With Regard to Its Means.—**Socialism is the fantastic younger brother of almost decrepit despotism, which it wants to succeed;** its efforts are, therefore, in the deepest sense reactionary. For it desires such an amount of State power as only despotism has possessed,—indeed, it outdoes all the past, in that it aims at the complete annihilation of the individual, whom it deems an unauthorised luxury of nature, which is to be improved by it into an appropriate *organ of the general community.* Owing to its relationship, **it always appears in proximity to excessive developments of power, like the old typical socialist, Plato, at the court of the Sicilian tyrant; it desires (and under certain circumstances furthers) the Cæsarian despotism of this century, because, as has been said, it would like to become its heir.**

> https://archive.org/details/threelecturesde01kinggoog/page/n71/mode/2up?view=theater **[January 1867]**
>
> He shows, moreover, that the acquiescence in a centralised administration; the expectation that the government should do everything for the people, and nothing for themselves; the consequent loss of local liberties, local peculiarities; the helplessness of the towns and the parishes: and all which issued in making Paris France, and subjecting the whole of a vast country to the arbitrary dictates of a knot of despots in the capital, was not the fruit of the Revolution, but of the Ancien Regime which preceded it; **and that Robespierre and his 'Comité de Salut Public,' and commissioners sent forth to the four winds of heaven in bonnet rouge and carmagnole complete, to build up and pull down, according to their wicked will, were only handling, somewhat more roughly, the same wires which had been handled for several generations by the Comptroller-General and Council of State, with their provincial intendants.**
>
> https://www.marxists.org/archive/lenin/works/1917/jan/31.htm
>
> **The extent to which present-day society has matured for the transition to socialism has been demonstrated by this war, in which the exertion of national effort called for the direction of the economic life of over fifty million people from a *single* centre.** If this is possible under the leadership of a handful of Junker aristocrats in the interests of a handful of financial magnates, it is certainly no less possible under the leadership of class-conscious workers in the interests of nine-tenths of the population, exhausted by starvation and war.

https://en.wikisource.org/wiki/Page:The_Genealogy_of_Morals.djvu/48

Granted the truth of the theory now believed to be true, that **the very *essence of all civilisation* is to *train* out of man, the beast of prey, a tame and civilised animal, a domesticated animal,** it follows indubitably that we must regard as the real *tools of civilisation* all those instincts of reaction and resentment, by the help of which the aristocratic races, together with their ideals, were finally degraded and overpowered; though that has not yet come to be synonymous with saying that the bearers of those tools also *representea* the civilisation.
...

These "tools of civilisation" are a disgrace to humanity, **and constitute in reality more of an argument against civilisation, more of a reason why civilisation should be suspected.**

> https://en.wikisource.org/wiki/On_Benefits/Book_VII#19
>
> Men do not change from the best to the worst; even in becoming bad, he would necessarily retain some traces of goodness; virtue is never so utterly quenched as not to imprint on the mind marks which no degradation can efface. **If wild animals bred in captivity escape into the woods, they still retain something of their original tameness, and are as remote from the gentlest in the one extreme as they are in the other from those which have always been wild, and have never endured to be touched by man's hand. No one who has ever applied**

himself to philosophy ever becomes completely wicked; his mind becomes so deeply coloured with it, that its tints can never be entirely spoiled and blackened.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Plutarch/Moralia/Fortuna_Alexandri*/1.html#ref35

For, when Themistocles in exile had obtained great gifts from Artaxerxes, and had received three cities to pay him tribute, one to supply his bread, another his wine, and a third his meat, he exclaimed, **"My children, we should be ruined now, had we not been ruined before."** Thus Alexander's new subjects would not have been civilized, had they not been vanquished; Egypt would not have its Alexandria, nor Mesopotamia its Seleuceia, nor Sogdiana its Prophthasia, nor India its Bucephalia, nor the Caucasus a Greek city[36] hard by; for by the founding of cities in these places savagery was extinguished and the worse element, gaining familiarity with the better, changed under its influence. **If, then, philosophers take the greatest pride in civilizing and rendering adaptable the intractable and untutored elements in human character,** and if Alexander has been shown to have changed the savage natures of countless tribes, it is with good reason that he should be regarded as a very great philosopher.

https://archive.org/details/completeworksrie033168mbp/page/n251/mode/2up?view=theater

281. If, in compliance with our communal instincts, we make certain regulations for ourselves and forbid certain acts, we do not of course, in common reason, forbid a certain kind of "existence," nor a certain attitude of mind, but only a particular application and development of this "existence" and "attitude of mind." But then the idealist of virtue, the *moralist*, comes along and says: "God sees into the human heart! What matters it that ye abstain from certain acts: ye are not any better on that account!" Answer: **Mr. Longears and Virtue-Monger, we do not want to be better at all, we are quite satisfied with ourselves, all we desire is that we should not *harm* one another—and that is why we forbid certain actions when they take a particular direction—that is to say, when they are against our own interests: but that does not alter the fact that when these same actions are directed against the enemies of our community—against you, for instance—we are at a loss to know how to pay them sufficient honour.** We educate our children up to them; we develop them to the fullest extent.

> https://www.gutenberg.org/files/2085/2085-h/2085-h.htm#2H_4_0004
>
> (31) Then the father said, "My son, we are told that in the days of our forefathers there was such a teacher once. This man did actually teach his boys righteousness in the way you suggest, to lie and not to lie, to cheat and not to cheat, to calumniate and not to calumniate, to be grasping and not grasping. He drew the distinction between our duty to friends and our duty to enemies; and he went further still; he taught men that it was just and right to deceive even a friend for his own good, or steal his property. (32) And with this he must needs teach his pupils to practise on one another what he taught them, just as the people of Hellas, we are told, teach lads in the wrestling-school to fence and to feint, and train them by their practice with one another. Now some of his scholars showed such excellent aptitudes for deception and overreaching, and perhaps no lack of taste for common money-making, that they did not even spare their friends, but used their arts on them. (33) **And so an unwritten law was framed by which we still abide, bidding us teach our children as we teach our servants, simply and solely not to lie, and not to cheat, and not to covet, and if they did otherwise to punish them, hoping to make them humane and law-abiding citizens.** (34) **But when they came to manhood, as you have come, then, it seemed, the risk was over, and it would be time to teach them what is lawful against our enemies. For at your age we do not believe you will break out into savagery against your fellows with whom you have been knit together since childhood in ties of friendship and respect. In the same way we do not talk to the young about the mysteries of love, for if lightness were added to desire, their passion might sweep them beyond all bounds."**

Did we share that "god-fearing" radicalism which your holy craziness recommends, **if we were greenhorns enough to condemn the source of those forbidden "acts" by condemning the "heart" and the "attitude of mind" which recommends them, that would mean condemning our very existence,** and with it its greatest prerequisite—an attitude of mind, a heart, a passion which we revere with all our soul. By our decrees we prevent this attitude of mind from breaking out and venting itself in a useless way—we are prudent when we prescribe such laws for ourselves; we are also *moral* in so doing. ... Have you no idea—however vague—what sacrifices it has cost us, how much self-control, self-subjection, and hardness it has compelled us to exercise? We are vehement in our desires; there are times when we even feel as if we could devour each other. ... But the "communal spirit" is master of us: have you observed that this is almost a definition of morality?

https://books.google.fi/books?id=tSE6DwAAQBAJ&lpg=PT60&hl=fi&pg=PT54#v=onepage&q&f=false

> Put in other terms, the natural condition of Machiavellian man is Thomas Hobbes's state of nature: he is not by nature a political animal; **he is Aristotle's beast of prey, a hunted animal (*thērion*) alone and at war with the world. On this premise, it would seem entirely appropriate that the author of a mirror for princes should advise rulers to use against their subjects and allies in ordinary circumstances the very weapons which, Cicero thinks, a political community should employ only against enemies – and, at that, only in time of war.**71

https://en.wikisource.org/wiki/Page:The_Genealogy_of_Morals.djvu/89

It is necessary to make an even more serious confession:—viewed from the most advanced biological standpoint, **conditions of legality can be only *exceptional conditions*,** in that they are partial restrictions of the real life-will, which makes for power, and in that they are subordinated to the life-will's general end as particular means, **that is, as means to create *larger* units of strength. A legal organisation, conceived of as sovereign and universal, not as a weapon in a fight of complexes of power, but as a weapon *against* fighting, generally something after the style of Dühring's communistic model of treating every will as equal with every other will, would be a principle *hostile to life*, a destroyer and dissolver of man, an outrage on the future of man, a symptom of fatigue, a secret cut to Nothingness.—**

https://en.wikisource.org/wiki/Page:The_Genealogy_of_Morals.djvu/109

Progress towards universal empires invariably means progress towards universal deities; despotism, with its subjugation of the independent nobility, always paves the way for some system or other of monotheism.

https://archive.org/details/dli.ernet.506079/page/507/mode/2up?view=theater

Therein lay the tragedy—**the Empire gave no scope for the display of civic virtue at home and abroad, for it sought to abolish war and politics. There could be no great men any more:** the aristocracy was degraded and persecuted.

https://books.google.fi/books?id=2Q19hMwsNgYC&lpg=PP1&hl=fi&pg=PA145#v=onepage&q&f=false

All government, in its essence, is a conspiracy against the superior man: its one permanent object is to oppress him and cripple him. If it be aristocratic in organization, then it seeks to protect the man who is superior only in law against the man who is superior in fact; if it be democratic, then it seeks to protect the man who is inferior in every way against both.

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0058%3Abook%3D5%3Asection%3D1313b

Also the things that occur in connection with the final form of democracy[7] are all favorable to tyranny—dominance of women in the homes, in order that they may carry abroad reports against the men, and lack of discipline among the slaves, for the same reason; for slaves and women do not plot against tyrants, and also, if they prosper under tyrannies, must feel well-disposed to them, and to democracies as well (for the common people also wishes to be sole ruler). Hence also the flatterer is in honor with both—with democracies the demagogue (for the demagogue is a flatterer of the people), and with the tyrants those who associate with them humbly, which is the task of flattery. [1314a] [1] **In fact owing to this tyranny is a friend of the base;** for tyrants enjoy being flattered, but nobody would ever flatter them if he possessed a free spirit—men of character love their ruler, or at all events do not flatter him. And the base are useful for base business, for nail is driven out by nail, as the proverb goes.[1] **And it is a mark of a tyrant to dislike anyone that is proud or free-spirited; for the tyrant claims for himself alone the right to bear that character, and the man who meets his pride with pride and shows a free spirit robs tyranny of its superiority and position of mastery; tyrants therefore hate the proud as undermining their authority.** And it is a mark of a tyrant to have men of foreign extraction rather than citizens as guests at table and companions, feeling that citizens are hostile but strangers make no claim against him.[2]

https://en.wikipedia.org/wiki/Jos%C3%A9_Gaspar_Rodr%C3%ADguez_de_Francia

> José Gaspar Rodríguez de Francia y Velasco (6 January 1766-20 September 1840), also known as Doctor Francia or to Paraguayans of his time as Karai Guasu (in Guaraní, means "Great Lord"), was a lawyer, politician, statesman **and the first dictator (1814-1840) of Paraguay[1] following its 1811 independence from the Spanish Viceroyalty of the Río de la Plata.**
> ...

> During his studies, he was influenced by the ideas from the Age of Enlightenment and the French Revolution, and he was an avid reader of Voltaire, Rousseau, and the Encyclopédistes.
>
> Despite rumors that his father was a mulatto, Francia was awarded a position in the department of theology at the Royal Seminary of San Carlos in Asunción in 1790. **His radical views made his position as a teacher there untenable, and he soon gave up theology to study law.**
> ...
>
> **In March 1814, Francia imposed a law that no Spaniard may intermarry with another Spaniard, and that they may only marry *mestizo*s, Amerindians, or Africans.** This was done to eliminate any socioeconomic disparities along racial lines, and also to end the predominantly *criollo* and *peninsulare* influence in Paraguay. **De Francia himself was not a *mestizo*, but feared that racial disparities would create tensions that could threaten his absolute rule.** [8]
>
> ...
>
> One Latin American scholar, Antonio de la Cova, summarised Francia's rule as follows:
>
> > "... we find a strange mixture of capacity and caprice, of far-sighted wisdom and reckless infatuation, strenuous endeavours after a high ideal and flagrant violations of the simplest principles of justice. **He cut off Paraguay from the rest of the world by stopping foreign commerce, but carefully fostered its internal industries and agriculture under his personal supervision.** Dr. Francia disposed to be hospitable to strangers from other lands, and kept them prisoners for years; lived a life of republican simplicity, and severely punished the slightest want of respect. As time went on he appears to have grown more arbitrary and despotic. **Deeply imbued with the principles of the French Revolution, he was a stern antagonist of the church. He abolished the Inquisition, suppressed the college of theology, did away with the tithes, and inflicted endless indignities on the priests. He kept the aristocracy in subjection and discouraged marriage both by precept and example, leaving behind him several illegitimate children.** For the extravagances of his later years the plea of insanity has been put forward."[9]

https://books.google.fi/books?id=3jiGsoP_ExgC&lpg=PP1&hl=fi&pg=PA89#v=onepage&q&f=false

But, in the end, the public peace obliges kings to keep everyone in a state of fear – the great still more than ordinary individuals, because it is from the side of the great that the greatest troubles can come.

https://archive.org/details/cu31924014201044/page/n31/mode/2up?view=theater

Less than a year after the Revolution had begun, Mirabeau wrote secretly to the king, "Compare the present state of things with the old regime, and console yourself and take hope. **A part—the greater part of the acts of the national assembly are decidedly favorable to a monarchical government. Is it nothing to have got rid of Parliament, separate states, the clerical body, the privileged classes, and the nobility? Richelieu would have liked the idea of forming but one class of citizens; so level a surface assists the exercise of power.** A series of absolute reigns would have done less for royal authority than this one year of Revolution."

http://www.thephora.net/forum/forum/the-academy/political-arena/47500-democratic-tyranny-is-not-an-oxymoron?p=1334654#post1334654

Petr, I synthesized a theory of the relationship between absolutism and equality from de Jouvenel and other thinkers in the tradition of aristocratic liberalism over at nic's forum. It's clunky and spergish, but I think it captures some of the topics you've been discussing here.

Two terse and contentious definitions:

A notable/noble/aristocrat is a self-sufficient individual with resources adequate for self-sustenance and the physical enforcement of his liberty against others. He is a man of good stock with excellent physical and mental capacities, good character, future-oriented goals, and a relatively loyal and equally robust extended family. Often he is an independent power that exercises authority over a set of consenting individuals, as in autocephalous societies like medieval kingships where a federation of aristocrats is presided over by a "king", or unwilling individuals, as in heterocephalous societies where kingship is imposed exogenously through conquest. Such a man is "free" in the ancient sense of the term.

The masses, in contrast, are individuals who are only self-sufficient to a limited extent and who, if at all, occupy positions of authority with a very limited scope, such as the

head of a family. Often they are subject to the authority of the notables. Here we find the early bourgeoisie, the peasants, the proletariat, the serfs and slaves.

With these definitions in place we can assert an equally contentious axiom of human behavior:

Man has a will-to-power such that in every association he will inevitably attempt to maximize his power and aggrandize his person at the expense of others in that association.

Absolutism and equality

Wherever there is a set of nobles and each has relatively equal military and economic resources, there will be a true balance of powers and the tendency toward absolutism will be muted. **However, where there is a chance for one noble to compel obedience from the others, there will be conflict, from which the positive relationship between absolutism and equality emerges. The reason for the conflict is clear: the independent authority of the less-powerful nobles represents an obstacle to the imposition of the aspiring absolutist's will.**

Historically, the two principle ways for the absolutist to conquer the federation of conquerors are 1) by appealing to the interests of those subjugated by the rival nobles (Caesar), or 2) by conquering foreign peoples and employing them in offices traditionally performed by the other nobles (Alexander). **In each case the authority of the exalted is marginalized at the expense of uplifting the unexalted.**

The conquest of the conquerors does not signal the end of absolutism's egalitarian march; instead, the absolutist must continue down the hierarchy of independent authorities until there is no longer any impediment to his will. In each case those who are subject to, or enemies of, the authority in question ultimately benefit from absolutism's attack on the authority. Below the rule of the nobility are the religious, ethnic, municipal and familial authorities, all of which present potential obstacles to the absolutist's power, and all of which subjugate a potential class of new allies for the aspiring monarch.

But this trajectory is not followed uniformly to its conclusion in all possible associations. In non-democratic manifestations of absolutism, such as those that obtained in early-modern Europe, the process of equalization is arrested by external and internal restrictions.

External restrictions include the existing effective authorities that remain independent by virtue of their physical distinction from the personality of the absolutist, such as the Church, the nobility and the common people. The physical distinction between the monarch and other authorities magnifies class-consciousness within each authority so that the authority is strengthened vis-a-vis the monarch. Thus we see in the history of absolutism that the triumph over traditional authorities was rarely complete.

Internal restrictions originate from the absolutist himself and include those cosmological and religious principles that govern the scope of an individual's will-to-power as natural law did in the middle ages and Christian common law did in the age of absolutism. **In addition to the moral and religious principles that may temper his appetite, economic calculation itself provides an internal restriction on the absolutist, as Hoppe has demonstrated.** These restrictions explain the relatively "conservative" and pious dispositions of many monarchs.

Most of the external and internal distinctions are only eliminated with the success of the revolutions against absolutism. Empowered by the egalitarian creations of the absolutist, **the masses finally wrest control of the monarch's apparatus for the enforcement of his will – the State – from the monarch himself.** Borrowing the legitimacy accumulated by the State over the centuries of its growth, the masses then set about eliminating every opposition to its authority. In the place of the concrete personality of the monarch they set a whole multitude of egos, but the goal of the state remains the same, and its power increases.

No longer the manifestation of a single concrete person but rather the embodiment of the will of everyone under its power, the State is able to eliminate nearly every external restriction on its power. What the absolute monarch failed to do over the course of several centuries is accomplished in a few years by the new "republics."

No longer requiring the legitimacy of divinity to justify the state (for the State is now a creation of the people), the State abandons its commitment to a supernatural origin of

law. Divine law is supplanted by positive law, which permits every arbitrary rule to be classified as law and enforced.

Both of these innovations accelerate the process of equalization so that every time a new aristocracy or elite threatens to emerge, the State quickly allies with those subjugated by the new elite, becoming the ally of workers, minorities, women, etc. Since there are authorities in all spheres of life, the State extends its legislative power to all spheres of society and effectively becomes total.

> Rumours reached Panzani that Parliament was to be summoned. The Secretary assured him that they were quite untrue. "O the great judgments of God," said Windebank. "He ever punishes men with those means by which they have offended. **That pig of a Henry VIII. committed such sacrilege by profaning so many ecclesiastical benefices in order to give their goods to those who being so rewarded might stand firmly for the King in the Lower House; and now [April 1635] the King's greatest enemies are those who are enriched by these benefices.**"

https://counter-currents.com/2018/07/how-power-invented-individualism/

In Alt-Right circles and beyond them, one comes across many explanations for the unique individualism of the West. **There is the theory of John Hajnal, which states that the marriage patterns of Western Europe diverged from the regions beyond it as a result of developments in the Middle Ages, giving rise to several 'modern' behaviour patterns including high individualism.** Alan MacFarlane's study of the English argues that this people, at least, displayed individualist and proto-capitalist social patterns as far back into the Middle Ages as one cares to look, with the roots of this behaviour presumably lying in the obscurity of the Saxon and Viking freebooter cultures. Kevin MacDonald traces the origins of our individualist tendencies all the way back to the Ice Age.

All of these theories suggest that Western Europeans may be predisposed – or, should we say, *susceptible* – to individualism. But they cannot explain the origins of individualism, because they approach the question from the wrong end of society, and fail to recognise the crucial role of Power in social change. **Explaining *individualism* in terms of a racial-cultural stress on *individuality* is like explaining *feminism* in terms of *female nature* – such a theory might tell us why feminism is able to mobilise half of the human race against the other, but it cannot explain why that human race did not succumb to feminism throughout thousands of years of history, until Power gained the resources to supplant the social role of husbands.**

In the same way, explanations from culture and biology cannot tell us how Europeans contrived to spend the vast majority of their history in 'collectivist' societies. (And not only does this arrow miss the target, it also shoots the Alt-Right in the foot, by enshrining individualism in our biological heritage and thus turning the collectivist defence of this heritage into a contradiction in terms).

> The word *persona* was used to describe the new portraits which were painted of men in their actual, human state rather than in the spiritualized saintly manner of the icons. By the late seventeenth century, this word had begun to acquire the more general meaning of an important or strong individual. **Even he who was not important enough to become a *persona* in his own right was now considered an individual "soul" by the all-powerful state, which began to exact taxes and services directly from the individual rather than from the region or household.**
>
> Prokopovich introduced the word "personal" (*personal'ny*) in its modern sense early in the eighteenth century; and the first precise terms for "private" and "particular" also entered the Russian language at this time. Words that are now used for "law" and "crime" had long existed in Slavic, but "they did not penetrate into the language of Russian jurisprudence with their modern meaning until the eighteenth century."62

https://www.garynorth.com/conspiracyinphiladelphia.pdf

In the 1787 "Vices" essay, **[Madison] inserted this conclusion immediately following the paragraph on state religious oaths:** "The great desideratum in Government is such a modification of the sovereignty as will render it sufficiently neutral between the different interests and factions, to controul one part of the society from invading the rights of another, and at the same time sufficiently controuled itself, from setting up an interest adverse to that of the whole Society."7 **This was his argument against Montesquieu, who had argued that republics can only function in small nations. On the contrary,** argued Madison in *Federalist 10,* **republics can insulate themselves best from the effects of faction by becoming so large that the factions offset themselves.** To control the power of any given faction, we must create lots of factions.

Long before we were born, the world that we live in today was fundamentally shaped and set in motion in those crucial decades between the 1920s and 1950s. The American ruling class, which was already liberal and capitalist in the Victorian sense, became antiracist, modernist and cosmopolitan. **The American elite developed a globalist outlook.** Jews climbed into the American elite in these decades. “Racism” became taboo between 1937 and 1945. “Anti-Semitism” became taboo at this same point. The ghost of Nazi Germany and the polarization it created has continued to haunt us ever since.

In the aftermath of World War II, Jim Crow came under assault. **The American Empire had defined itself against the “racism” of Hitler’s Germany.** We had created the U.N. and invited the entire world to stand in judgment of the United States. We competed with the Soviet Union which we rescued from Hitler’s Germany for the “hearts and minds” of the Third World during the Cold War. As a result, **foreign policy dominated America for the next several decades and crucial decisions about domestic policy such as ending segregation and changing American immigration laws in order to transform America into a miniature version of the U.N. were motivated by the needs of the American Empire.**

There isn’t much that is wrong in this country today which ultimately doesn’t trace back to imperialism and which doesn’t flow out of the needs of our decadent elites to maintain the American Empire. The deindustrialized Heartland was sacrificed to the foreign policy need to bind our new “allies” to the American Empire through favorable trade deals which rebuilt their industries. The Chinese Exclusion Act, for example, was repealed because China was an American ally against the Japanese. The opening wedge against America’s race-based immigration laws was bringing back war brides from the Philippines. **We created the Deep State to crush internal and foreign dissent against American foreign policy.**

Probably Athens had needed, after Solon, just such a man as Peisistratus: one with sufficient iron in his blood to beat the disorder of Athenian life into a strong and steady form, and to establish by initial compulsion those habits of order and law which are to a society what the bony structure is to an animal—its shape and strength, though not its creative life. When, after a generation, the dictatorship was removed, these habits of order and the framework of Solon’s constitution remained as a heritage for democracy. **Peisistratus, perhaps not knowing it, had come not to destroy the law but to fulfill it.**
…

Hence the road to power in Greek commercial cities was simple: to attack the aristocracy, defend the poor, and come to an understanding with the middle classes.[89]
…

Forced to depend upon popularity instead of hereditary power, the dictatorships for the most part kept out of war, supported religion, maintained order, promoted morality, favored the higher status of women, encouraged the arts, and lavished revenues upon the beautification of their cities. **And they did all these things, in many cases, while preserving the forms and procedures of popular government, so that even under despotism the people learned the ways of liberty. When the dictatorship had served to destroy the aristocracy the people destroyed the dictatorship;** and only a few changes were needed to make the democracy of freemen a reality as well as a form.

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0058%3Abook%3D5%3Asection%3D1310b

And these two different sorts of monarchy have their origins from directly opposite sources; royalty has come into existence for the assistance of the distinguished against the people, and a king is appointed from those distinguished by superiority in virtue or the actions that spring from virtue, or by superiority in coming from a family of that character, while a tyrant is set up from among the people and the multitude to oppose the notables, in order that the people may suffer no injustice from them. And this is manifest from the facts of history. For almost the greatest number of tyrants have risen, it may be said, from being demagogues, having won the people's confidence by slandering the notables.

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0158%3Achapter%3D1

[14] In regard to the allies: the Athenians sail out and lay information, as they are said to do; they hate the aristocrats inasmuch as they realize that the ruler is necessarily hated by the ruled and that if the rich and aristocratic men in the cities are strong, the rule of the people at Athens will last for a very short time. **This is why they disfranchise the aristocrats, take away their money, expel and kill them, whereas they promote the interests of the lower class. The Athenian aristocrats protect their**

opposite numbers in the allied cities, since they realize that it will be to their advantage always to protect the finer people in the cities. [15] **Someone might say that the Athenians' strength consists in the allies' ability to pay tribute-money; but the rabble thinks it more advantageous for each one of the Athenians to possess the resources of the allies and for the allies themselves to possess only enough for survival and to work without being able to plot defection.**

https://www.gutenberg.org/cache/epub/58242/pg58242-images.html#Chapter_26

Oligarchy is a love of power that clings tightly to personal advantage. The oligarch rises in the people's councils, when assistants to the archon are elected for the management of a fête, and says: "These men must have absolute control." And although others have suggested ten, he insists that *one* is enough, but he must be a *man*. **The only line of Homer that stays in his memory is: "A crowd's rule is bad; let there be one ruler." He knows no other verse.**
...

"When," he asks, "is a stop to be put to this ruin of our property by taxation for fêtes and navy? How odious is this crew of demagogues! Theseus," he says, "was the forefront of all this offending, for out of twelve cities, he brought the masses into one, to overthrow the monarchies. He met his just reward,—he was the first to fall a victim at their hands." This is the way he talks to foreigners and to citizens of his own temper and party.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Polybius/6*.html

4 Then as long as some of those survive who experienced the evils of oligarchical dominion, they are well pleased with the present form of government, and set a high value on equality and freedom of speech. But when a new generation arises and the democracy falls into the hands of the grandchildren of its founders, **they have become so accustomed to freedom and equality that they no longer value them, and begin to aim at pre-eminence; and it is chiefly those of ample fortune who fall into this error.** 6 So when they begin to lust for power and cannot attain it through themselves or their own good qualities, they ruin their estates, tempting and corrupting the people in every possible way. 7 **And hence when by their foolish thirst for reputation they have created among the masses an appetite for gifts and the habit of receiving them, democracy in its turn is abolished and changes into a rule of force and violence.** 8 **For the people, having grown accustomed to feed at the expense of others and to depend for their livelihood on the property of others, as soon as they find a leader who is enterprising but is excluded from the houses of office by his penury, institute the rule of violence;** 9 **and now uniting their forces massacre, banish, and plunder, until they degenerate again into perfect savages and find once more a master and monarch.**

https://archive.org/details/cu31924026480370/page/n393/mode/2up?view=theater

When, says Plato, the insatiate jaws of the populace are fired with the thirst of liberty, and when the people, urged on by evil ministers, drains in its thirst the cup, not of tempered liberty, but unmitigated license, then the magistrates and chiefs, if they are not utterly subservient and remiss, and shameless promoters of the popular licentiousness, are pursued, incriminated, accused, and cried down under the title of despots and tyrants. I dare say you recollect the passage.
...

Scipio. Plato thus proceeds: Then those who feel in duty bound to obey the chiefs of the State are persecuted by the insensate populace, who call them voluntary slaves. **But those who, though invested with magistracies, wish to be considered on an equality with private individuals, and those private individuals who labor to abolish all distinctions between their own class and the magistrates, are extolled with acclamations and overwhelmed with honors, so that it inevitably happens in a commonwealth thus revolutionized that liberalism abounds in all directions, [plena libertatis esse omnia]** due authority is found wanting even in private families, and misrule seems to extend even to the animals that witness it. Then the father fears the son, and the son neglects the father. All modesty is banished; **they become far too liberal for that. [ut plane liberi sint]** No difference is made between the citizen and the alien; the master dreads and cajoles his scholars, and the scholars despise their masters. The young men assume the gravity of sages, and sages must stoop to the follies of children, lest they should be hated and oppressed by them. **The very slaves even are under but little restraint; wives boast the same rights as their husbands;** dogs, horses, and asses are emancipated in this outrageous excess of freedom, and run about so violently that they frighten the passengers from the road. **At length the termination of all this infinite licentiousness is, that the minds of the citizens become so fastidious and effeminate, that when they observe even the slightest exertion of authority they grow angry and seditious, and thus the laws begin to be neglected, so that the people are absolutely without any master at all.**

https://oll.libertyfund.org/title/adams-the-works-of-john-adams-vol-4#lf1431-04_head_040

The modern aristocracies of Holland, Venice, Bern, &c., have tempered themselves with innumerable checks, by which they have given a great degree of stability to that form of government; and though liberty and life can never be there enjoyed so well as in a free republic, none is perhaps more capable of profound sagacity. **We shall learn to prize the checks and balances of a free government, and even those of the modern aristocracies, if we recollect the miseries of Greece, which arose from its ignorance of them. The only balance attempted against the ancient kings was a body of nobles; and the consequences were perpetual alternations of rebellion and tyranny, and the butchery of thousands upon every revolution from one to the other.** When kings were abolished, aristocracies tyrannized; and then no balance was attempted but between aristocracy and democracy. This, in the nature of things, could be no balance at all, and therefore the pendulum was forever on the swing.

It is impossible to read in Thucydides,* his account of the factions and confusions throughout all Greece, which were introduced by this want of an equilibrium, without horror. “During the few days that Eurymedon, with his troops, continued at Corcyra, the people of that city extended the massacre to all whom they judged their enemies. The crime alleged was, their attempt to overturn the democracy. Some perished merely through private enmity; some, by the hands of the borrower, on account of the money they had lent. Every kind of death, every dreadful act, was perpetrated. Fathers slew their children; some were dragged from altars, some were butchered at them; numbers, immured in temples, were starved. **The contagion spread through the whole extent of Greece; factions raged in every city; the licentious many contending for the Athenians, and the aspiring few for the Lacedæmonians.** The consequence was, seditions in cities, with all their numerous and tragical incidents.”

“Such things ever will be,” says Thucydides, “so long as human nature continues the same.” But if this nervous historian had known a balance of three powers, he would not have pronounced the distemper so incurable, but would have added—*so long as parties in cities remain unbalanced.*
…

Mr. Hume has collected, from Diodorus Siculus alone, a few massacres which happened in only sixty of the most polished years of Greece:—“From Sybaris, 500 nobles banished; of Chians, 600 citizens; at Ephesus, 340 killed, 1000 banished; of Cyrenians, 500 nobles killed, all the rest banished; the Corinthians killed 120, banished 500; Phæbidas banished 300 Bœotians. Upon the fall of the Lacedæmonians, democracies were restored in many cities, and severe vengeance taken of the nobles; the banished nobles returning, butchered their adversaries at Phialæ, in Corinth, in Megara, in Phliasia, where they killed 300 of the people; but these again revolting, killed above 600 of the nobles, and banished the rest. In Arcadia, 1400 banished, besides many killed; the banished retired to Sparta and Pallantium; the latter were delivered up to their countrymen, and all killed. Of the banished from Argos and Thebes, there were 500 in the Spartan army. The people, before the usurpation of Agathocles, had banished 600 nobles; afterwards that tyrant, in concurrence with the people, killed 4000 nobles, and banished 6000; and killed 4000 people at Gela; his brother banished 8000 from Syracuse. The inhabitants of Ægesta, to the number of 40,000, were killed, man, woman, and child, for the sake of their money; all the relations of the Libyan army, fathers, brothers, children, killed; 7000 exiles killed after capitulation. These numbers, compared with the population of those cities, are prodigious; yet Agathocles was a man of character, and not to be suspected of wanton cruelty, contrary to the maxims of his age.”1

Such were the fashionable outrages of unbalanced parties. In the name of human and divine benevolence, is such a system as this to be recommended to Americans, in this age of the world? Human nature is as incapable now of going through revolutions with temper and sobriety, with patience and prudence, or without fury and madness, as it was among the Greeks so long ago.
…

Monarchies and aristocacies are in possession of the voice and influence of every university and academy in Europe. Democracy, simple democracy, never had a patron among men of letters.

https://archive.org/details/cu31924100532054/page/448/mode/2up?view=theater

As men departed from the ancient system, a poor class began to grow up. **Before, when every man belonged to a gens, and had his master, extreme poverty was almost unknown. A man was supported by his chief; the one to whom he owed obedience was bound in turn to provide for his wants. But the revolutions which had dissolved the *γένος* had also changed the conditions of human life.** The day when man was freed from the bonds of clientship, he saw the necessities and the difficulties of existence stand out before him. Life had become more independent, but it was also more laborious and subject to more accidents. Thenceforth each one had the care of his own well-being, his enjoyments, and his task. One became rich by his activity or his good fortune, while another remained poor. **Inequality of wealth is inevitable in every society which does not wish to remain in the patriarchal state or in that of the tribe.**
…

In earlier times they had respected the right of property, because it was founded in a religious belief. So long as each patrimony was attached to a worship, and was reputed inseparable from the domestic gods of a family, no one had thought of claiming the right to despoil a man of his field; **but at the time to which the revolutions have conducted us, these old beliefs are abandoned, and the religion of property has disappeared.** Wealth is no longer a sacred and inviolable domain. It no longer appears as a gift of the gods, but as a gift of chance. A desire springs up to lay hold of it by despoiling the possessor, and this desire, which formerly would have seemed an impiety, begins to appear right. **Men no longer saw the superior principle that consecrates the right of property.** Each felt only his own wants, and measured his rights by them.

We have already seen that the city, especially among the Greeks, had unlimited power, that liberty was unknown, and that individual rights were nothing when opposed to the will of the state. **It followed that a majority of votes might decree the confiscation of the property of the rich, and that the Greeks saw neither illegality nor injustice in this.** What the state had declared was right. This absence of individual liberty was for Greece a cause of misfortunes and disorders. **Rome, which had a little more respect for the rights of man, suffered less.**

>
> 9. While these things were going on in Rome, **[443 B.C.]** there came envoys from Ardea begging the Romans in the name of their ancient alliance, renewed by the recent treaty, to send help to their city, which was on the brink of ruin. [2] **For the enjoyment of peace, which they had most wisely preserved with the Roman People, had been denied them, owing to civil war.** [3] **This is said to have had its cause and origin in the rivalry of factions, which have been and will be fraught with destruction to more nations than foreign wars, or famine and pestilence, or whatsoever other scourges men attribute, as the most desperate national calamities, to the wrath of Heaven.**
> …
>
> **The plebs were routed, but, unlike the Roman plebs, [nihil Romanae plebi similis] having armed and withdrawn from their city and encamped upon a certain hill, they sallied forth, sword and torch in hand, to sack the farms of the nobles.** [9] **They even prepared to besiege the city itself, for the entire body of artizans, [opificum] even those who had hitherto had no part in the quarrel, had been called out by the hope of plunder;** [10] nor was there wanting any form of the horrors of war, as though the nation had been infected with the madness of the two young men who sought a fatal marriage in the ruin of their country. [11] Neither side saw that there had been enough of war and arms at home; **the optimates called upon the Romans to relieve their beleaguered city; the plebeians sent for the Volsci to help them capture Ardea.**

…

"There was at Miletus a war between the rich and the poor. At first the latter were successful, and drove the rich from the city; but afterwards, regretting that they had not been able to slaughter them, they took their children, collected them into some threshing-floors, and had them trodden to death under the feet of oxen. The rich afterwards returned to the city, and became masters of it. They took, in their turn, the children of the poor, covered them with pitch, and burnt them alive."1

> 1. Heracleides of Pontus, in Athenæus, XII. 26. **It is quite the fashion to accuse the Athenian democracy of having set Greece the example in these excesses and disorders. Athens was, on the contrary, the only Greek city, known to us, that did not see this atrocious war between rich and poor within its walls.** This intelligent and wise people saw, from the day when this series of revolutions commenced, that they were moving towards a goal where labor alone could save society. They therefore encouraged it and rendered it honorable. **Solon directed that all men who had not an occupation should be deprived of political rights.** Pericles desired that no slave should labor in the construction of the great monuments which he raised, and reserved all this labor for free men. **Moreover, property was so divided up, that a census, taken at the end of the fifth century, shows little Attica to have contained more than ten thousand proprietors.** Besides, Athens, living under a somewhat better economical *régime* than the other cities enjoyed,

was less violently agitated than the rest of Greece; the quarrels between rich and poor were better, and did not end in the same disorders.

https://www.gutenberg.org/files/2167/2167-h/2167-h.htm#link2H_4_0015

It is true that among the dependencies of Athens seditions assumed a character more ferocious than even in France, during the reign of terror—the accursed Saturnalia of an accursed bondage.
...

From such calamities Athens and Lacedaemon alone were almost completely free. At Athens the purses of the rich were laid under regular contribution for the support of the poor; and this, rightly considered, was as much a favour to the givers as to the receivers, since no other measure could possibly have saved their houses from pillage and their persons from violence. **It is singular that Mr Mitford should perpetually reprobate a policy which was the best that could be pursued in such a state of things, and which alone saved Athens from the frightful outrages which were perpetrated at Corcyra.**

...

With two or three honorable exceptions, **the tyrants who were set up in all the Greek cities in the fourth and third centuries reigned only by flattering all that was worst in the multitude, and by destroying all that was superior in birth, wealth, or merit.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Dionysius_of_Halicarnassus/7A*.html#ref6

3 1 In the sixty-fourth Olympiad, when Miltiades was archon at Athens,[7] **[524/3 B.C.]** the Tyrrhenians who had inhabited the country lying near the Ionian Gulf,[8] but had been driven from thence in the course of time by the Gauls, joined themselves to the Umbrians, Daunians, and many other barbarians, and undertook to overthrow Cumae, the Greek city in the country of the Opicans founded by Eretrians and Chalcidians, though they could allege no other just ground for their animosity than the prosperity of the city. 2 **For Cumae was at that time celebrated throughout all Italy for its riches, power, and all the other advantages, as it possessed the most fertile part of the Campanian plain and was mistress of the most convenient havens round about Misenum.**
...

3 Aristodemus allowed a few days to pass, during which he performed his vows to the gods and waited for the merchantmen that were late in arriving, and then, when the proper time came, he said he desired to give the senate an account of the circumstances of the battle and to show them the spoils taken in the war. **Then, the authorities having assembled in great numbers, he came forward and made a speech, in which he related everything that had happened in the battle; and while he was speaking, the accomplices in the plot with whom he had arranged matters rushed into the senate-house in a body with swords under their garments and killed all the members of the aristocracy.** 4 Thereupon there ensued a flight of those who were in the forum and a rush of some to their houses and of others away from the city, except of such as were privy to the conspiracy; the latter in the mean time captured the citadel, the dockyards, and the strong places of the city. The following night he released from the prisons all who were under sentence of death, of whom there were many, arming them together with his friends, among whom were the Tyrrhenian prisoners, he formed out of these a bodyguard for himself. 5 When it was day, he assembled the people and after inveighing at length against the citizens who had been put to death by his orders, he said that those men, having often sought his life, had been justly punished by him, **but that, as for the rest of the citizens, he had come to give them liberty, equal rights of speech, and many other advantages.**

8 1 **When he had said this and thereby filled all the common people with wonderful hopes, he established two institutions which are the worst of all human institutions and the prologues to every tyranny—a redistribution of the land and an abolition of debts.** He promised that he would take upon himself the care of both these matters if he were appointed general with absolute power till the public tranquillity should be secured and they had established a democratic constitution. 2 **When the common people and the unprincipled rabble gladly accepted the proposal to pillage the goods of other men,** Aristodemus conferred upon himself the supreme command, and proposed another measure by which he deceived them and deprived them all of their liberty. For pretending to suspect that the rich would raise disturbances and insurrections against the common people on account of the redistribution of the land and the abolition of debts, he said the only means he could think of to prevent a civil war and the slaughter of citizens and to guard against these miseries before they happened, was for all of them to bring the arms out of their houses and to consecrate them to the gods, in order that they might make use of them against foreign enemies who should attack them, whenever the necessity should arise, and not against one another, and that in the mean time they would be suitably placed in the keeping of the gods. 3 When they agreed to this also, he disarmed all the Cumaeans that very day, and during the following days he searched their houses, where he put to death many worthy citizens, alleging that they had not produced all their arms for the gods. **After this he strengthened his tyranny by three sorts of guards. The first consisted of the filthiest and the most unprincipled of the citizens, by whose aid he had overthrown the aristocracy; the second, of the most impious knaves, whom he himself had freed for having killed their masters; and the third, a**

mercenary force, consisting of the most savage barbarians, who amounted to no fewer than two thousand and were far better soldiers than any of the rest. 4 He destroyed the statues of those he had put to death in all places both sacred and profane and set up his own in their stead; and seizing their houses and lands and the rest of their fortunes, he reserved for himself the gold and silver and everything else that was worthy of a tyrant, and divided the remainder among those who had aided him in gaining his power. **But the most numerous and the largest gifts he made to the slaves who had killed their masters. Thereupon these insisted also on marrying the wives and daughters of their late masters.**

9 1 At first he paid no attention to the male children of those who had been put to death, but afterwards, either at the direction of some oracle or influenced also by the reflection he might naturally make, that in them no small danger was being secretly reared up against him, he resolved to destroy them all in one day. 2 **But at the earnest entreaties of all the men with whom the children's mothers were living and the children themselves were being brought up, since he wished to grant them this favour also, he saved them from death, contrary to his intention.** Taking precautions, however, against them, lest they should combine together and conspire against his tyranny, he ordered them all to depart from the city and to live in the country dispersed here and there, receiving instruction in no profession or branch of learning becoming to the children of freemen, but tending flocks and performing the other labours of the husbandmen; and he threatened with death anyone of them who should be found in the city. 3 **These children, accordingly, forsaking the houses of their fathers, were brought up in the country like slaves, serving the murderers of their fathers. And to the end that no noble or manly spirit might spring up in any of the rest of the citizens, he resolved to make effeminate by means of their upbringing all the youths who were being reared in the city, and with that view he suppressed the gymnasiums and the practice of arms and changed the manner of life previously followed by the children.** 4 For he ordered the boys to wear their hair long like the girls, to adorn it with flowers, to keep it curled and to bind up the tresses with hair-nets, to wear embroidered robes that reached down to their feet, and, over these, thin and soft mantles, and to pass their lives in the shade. And when they went to the schools kept by dancing-masters, flute-players and others who, like these, pay court to the Muses, their governesses attended them, taking along parasols and fans; and these women bathed them, carrying into the baths combs, alabaster pots filled with perfumes, and looking-glasses. 5 **By such training he continued to enervate the youth till they had completed their twentieth year, and from that time permitted them to be considered as men.** Having by these and many other methods abused and insulted the Cumaeans without refraining from any kind of lust or cruelty, when he thought himself secure in the possession of the tyranny, being now grown old, he was punished to the satisfaction of both gods and men and extirpated with all his family.

10 1 Those who rose against him and freed their country from his tyranny were the sons of the citizens he had murdered, all of whom he had at first resolved to put to death in one day, but being prevailed upon by the entreaties of his bodyguards, to whom he had given their mothers, had refrained, as I said, 2 and ordered them to live in the country. **A few years later, as he was making a progress through the villages, he saw a large number of these youths, who made a brave appearance; and fearing they might conspire together and rise against him, he purposed to forestall them by putting them all to death before any one should be aware of his intention.** Assembling his friends, accordingly, he considered with them how the youths might most easily and speedily be put to death in secret. 3 The youths, being apprised of this, either by the information of some person who was acquainted with his purpose, or suspecting it themselves by reasoning from probabilities, fled to the mountains, taking with them the iron implements they used in husbandry. They were speedily joined by the Cumaean exiles who resided in Capua, most distinguished of whom and possessing the largest number of friends among the Campanians were the sons of Hippomedon, who had been commander of the horse in the war against the Tyrrhenians. These were not only well armed themselves, but also brought with them arms for the youths as well as a goodly band of Campanian mercenaries and of their own friends which they had raised. 4 **When they had all united, they made descents after the manner of brigands and plundered the lands of their enemies, lured the slaves away from their masters, released the men confined in prisons and armed them,** and whatever they could not carry or drive off they either burnt or killed.
...

4 Having wiped out the whole family of the tyrant, so as to leave neither children, wives, nor anyone related to them, and having spent the whole night in hunting down all the abetters of the tyranny, as soon as it was day, they proceeded to the forum. Then, calling the people together, they laid down their arms and restored the traditional government.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Diodorus_Siculus/15D*.html#ref2

3 While these things were going on, **in the city of Argos civil strife broke out accompanied by slaughter of a greater number than is recorded ever to have occurred anywhere else in Greece. Among the Greeks this revolutionary movement was called "Club-law," receiving this appellation on account of the manner of the execution.** 58 1 Now the strife arose from the following causes: the city of Argos[3] had a democratic form of government, and certain demagogues instigated the populace against the outstanding citizens of property and reputation. **The victims of the hostile charges then got together and decided to overthrow the democracy.** 2
When some of those who were thought to be implicated were subjected to torture, all but one, fearing the agony of torture, committed suicide, but this one came to terms under torture, received a pledge of immunity, and as informer denounced thirty of the most distinguished citizens, and the democracy without a thorough investigation put to death all those who were accused and confiscated their property. 3 But many others were

under suspicion, **and as the demagogues supported false accusations, the mob was wrought up to such a pitch of savagery that they condemned to death all the accused, who were many and wealthy. When, however, more than twelve hundred influential men had been removed, the populace did not spare the demagogues themselves.** 4 For because of the magnitude of the calamity the demagogues were afraid that some unforeseen turn of fortune might overtake them and therefore desisted from their accusation, whereas the mob, now thinking that they had been left in the lurch by them, were angry at this and put to death all the demagogues. **So these men received the punishment which fitted their crimes as if some divinity were visiting its just resentment upon them, and the people, eased of their mad rage, were restored to their senses.**

It is a truly curious account, free from inconsistency and the marvellous, remaining from Diodorus, of the consequences of that peace by which independency, under the patronage of Thebes supported by Persia, was assured to all Grecian cities. **The most important particulars, unmentioned by Xenophon, sufficiently accord with the tenor of Xenophon's narrative; and the whole deserves notice the more, because, contrary to Xenophon, all Diodorus's partiality was for the cause of Thebes and democracy.**

The establishment of the sovereignty of the people in every city,49 says the historian, produced great disturbances and numerous seditions; especially in Peloponnesus. **For, the people there having been mostly accustomed to oligarchal government, their new democratical authority was exercised with eager but unskilful zeal.**50 Many of the most respectable men, in various cities, were driven into banishment: many, through calumnious and interested accusations, were executed; confiscated property, divided among the people, was as a reward held out to incite hasty and unjust condemnation. To obviate these evils sedition soon grew busy; and, to avoid them, emigration abounded.51

> 51. This translation of a passage written eighteen hundred years ago, and applying to times four hundred years before, **so exactly describes what has just been occurring in France, that it may almost be necessary to desire the reader to look at the original, for proof that it is not a forgery. What follows wants only the change of a name or two to make it apply equally to the French as to the Grecian revolution.**

https://archive.org/details/cu31924100532054/page/462/mode/2up?view=theater

What saved Sparta was the extreme division which existed in the lower orders. The Helots did not agree with the Laconians; and the Mothaces despised the Neodamodes. No coalition was possible; and the aristocracy—thanks to its military education and the close union of its members!—was always strong enough to make head against any one class of its enemies.

The kings attempted what no class could realize. All those among them who aspired to escape from the state of inferiority in which the aristocracy held them sought support among the lower classes. During the Persian war Pausanias formed the project of elevating royalty and the lower orders at the same time by overthrowing the oligarchy. The Spartans put him to death, accusing him of having conspired with the king of Persia; his real crime was, rather, entertaining the thought of freeing the Helots.1 **We can see in history how numerous were the kings who were exiled by the ephors. The cause of these condemnations is easily guessed; and Aristotle says, "The kings of Sparta, in order to make head against the ephors and the senate, became demagogues."**2 ...

The small number of Spartans by birth (there were, including all the different classes, no more than seven hundred) and the debasement of character, a result of long oppression, explain why the signal for changes did not come from the lower classes. It came from a king. Agis undertook to accomplish this inevitable revolution by legal means, which increased for him the difficulties of the enterprise. He presented to the senate—that is to say, to the rich men themselves—two bills for the abolition of debts and the partition of the lands. We cannot be too much surprised that the senate did not reject these propositions. Agis had perhaps taken his measures to have them accepted. But the laws, once voted, remained to be put in execution; and these reforms are always so difficult to carry through that the boldest fail. Agis, stopped short by the opposition of the ephors, was constrained to go outside the law; **he deposed those magistrates, and named others by his sole authority. He then armed his partisans, and established, for a year, a reign of terror. During that time he was enabled to apply the law concerning debts, and to burn in the public square all evidences of debt; but he had not time to divide up the land**. We do not know whether Agis hesitated at this point, frightened at his own work, or whether the oligarchy circulated well-devised accusations against him. At any rate the people left him, and allowed him to fall. The ephors put him to death, and the aristocratic government was re-established.

Cleomenes took up the projects of Agis, but with more skill and fewer scruples. He began by massacring the ephors; he boldly suppressed this magistracy, which was odious to the kings

and to the popular party, and proscribed the rich. After these measures he carried through the revolution; he distributed the lands, and gave the rights of citizens to four thousand Laconians. **It is worthy of remark that neither Agis nor Cleomenes avowed that he was carrying through a revolution, and that both, claiming to act in the name of the old legislator, Lycurgus, pretended that they were bringing Sparta back to her ancient usages.** Assuredly the constitution of Cleomenes was very far from them. The king was really an absolute master; there was no other authority as a counterpoise. **He reigned after the manner of the tyrants who then held sway in most of the Greek cities, and the Spartan people, satisfied to have obtained lands, appeared to care very little for political liberty.** This situation did not continue long. Cleomenes wished to extend the democratic rule to all Peloponnesus, where Aratus, at the very same time, was laboring to establish liberty and a well-regulated aristocracy. In all the cities, the popular party agitated in the name of Cleomenes, hoping, like Sparta, to obtain an abolition of debts and a distribution of lands. It was this unexpected insurrection of the lower classes that obliged Aratus to change all his plans. He thought he could count upon Macedonia, whose king, Antigonus Doson, was then acting on the plan of attacking the tyrants and the popular party everywhere, and therefore introduced him into Peloponnesus. Antigonus and the Achaeans conquered Cleomenes at Sellasia. The Spartan democracy were again overthrown, and the Macedonians re-established the ancient government (B.C. 222).

But the oligarchy could no longer support itself. Disturbances continued a long time; **one year, three ephors, who were favorable to the popular party, massacred their two colleagues; the following year the five ephors belonged to the oligarchs. The people took arms and killed them all. The oligarchy wanted no kings; the people were in favor of kings; one was nominated and elected outside the royal family—a thing that had never been known before at Sparta.** This king, named Lycurgus, was twice dethroned, once by the people, because he refused to divide the lands, and a second time by the aristocracy, because they suspected him of wishing to make the partition. It is not known how he closed his reign; **but after him there was a tyrant, Machanidas, at Sparta—a certain proof that the popular party had gained the ascendency.**

https://en.wikipedia.org/wiki/Laconicus

In 192, Nabis was murdered by a contingent of 1000 Aetolian allies led by Alexamenus, who were present in the city to help Nabis in his war against the Achaean League.[5] The Spartans then massacred the Aetolians and appointed Laconicus as king. **However, the strategos of the Achaean League Philopoemen took advantage of the crisis to enter Sparta and forced the city to join his League, ending the independence of Sparta.[6] The kingship was abolished, and Sparta came under the rule of an oligarchy loyal to Philopoemen.[6][7]**

http://classics.mit.edu/Hippocrates/airwatpl.12.12.html

I say, then, that Asia differs very much from Europe as to the nature of all things, both with regard to the productions of the earth and the inhabitants, **for everything is produced much more beautiful and large in Asia; the country is milder, and the dispositions of the inhabitants also are more gentle and affectionate.** The cause of this is the temperature of the seasons, because it lies in the middle of the risings of the sun towards the east, and removed from the cold (and heat), **for nothing tends to growth and mildness so much as when the climate has no predominant quality, but a general equality of temperature prevails.**

http://classics.mit.edu/Hippocrates/airwatpl.16.16.html

And with regard to the pusillanimity and cowardice of the inhabitants, the principal reason the Asiatics are more unwarlike and of gentler disposition than the Europeans is, the nature of the seasons, which do not undergo any great changes either to heat or cold, or the like; for there is neither excitement of the understanding nor any strong change of the body whereby the temper might be ruffled and they be roused to inconsiderate emotion and passion, rather than living as they do always in the state. It is changes of all kinds which arouse understanding of mankind, and do not allow them to get into a torpid condition. **For these reasons, it appears to me, the Asiatic race is feeble, and further, owing to their laws; for monarchy prevails in the greater part of Asia, and where men are not their own masters nor independent, but are the slaves of others, it is not a matter of consideration with them how they may acquire military discipline, but how they may seem not to be warlike,** for the dangers are not equally shared, since they must serve as soldiers, perhaps endure fatigue, and die for their masters, far from their children, their wives, and other friends; and whatever noble and manly actions they may perform lead only to the aggrandizement of their masters, whilst the fruits which they reap are dangers and death; and, in addition to all this, the lands of such persons must be laid waste by the enemy and want of culture. **Thus, then, if any one be naturally warlike and courageous, his disposition will be changed by the institutions. As a strong proof of all this, such Greeks or barbarians in Asia as are not under a despotic form of government, but are independent, and**

enjoy the fruits of their own labors, are of all others the most warlike; for these encounter dangers on their own account, bear the prizes of their own valor, and in like manner endure the punishment of their own cowardice.

> But to the extent that there was in antiquity a deliberate and systematic application of scientific reasoning (*lógos*) to the development of the mechanical and industrial arts (*téchnai*), **it took place under the patronage of tyrants and kings, not republics** – and even then the promotion of applied science by men like Dionysius of Syracuse and the Ptolemies in Egypt was an extraordinary phenomenon virtually restricted to the stratagems of war.32 **The ancient monarchs had no stake whatsoever in maintaining the fragile military infrastructure that had made republicanism viable,** and the most ambitious among them were fully prepared, even eager, to take advantage of every new weapon that their technicians and engineers could devise.

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0166%3Abook%3D3%3Apage%3D692

Many are the discreditable charges one would have to bring against Greece in relating the events of that war; indeed, it would be wrong to say that Greece defended herself, for had not the bondage that threatened her been warded off by the concerted policy of the Athenians [693a] and Lacedaemonians, **practically all the Greek races would have been confused together by now, and barbarians confused with Greeks and Greeks with barbarians,—just as the races under the Persian empire today are either scattered abroad or jumbled together and live in a miserable plight.**

https://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.01.0144%3Aspeech%3D5%3Asection%3D39

[39] Now perhaps someone will venture to object to what I have proposed, saying that I am trying to persuade you to set yourself to an impossible task, **since the Argives could never be friendly to the Lacedaemonians, nor the Lacedaemonians to the Thebans,** and since, in general, those who have been accustomed throughout their whole existence to press their own selfish interests can never share and share alike with each other. [40] **Well, I myself do not believe that at the time when our city was the first power in Hellas, or again when Lacedaemon occupied that position, any such result could have been accomplished,**[23] since the one or the other of these two cities could easily have blocked the attempt; but as things are now, I am not of the same mind regarding them. **For I know that they have all been brought down to the same level by their misfortunes, and so I think that they would much prefer the mutual advantages which would come from a unity of purpose to the selfish gains which accrued from their policy in those days.**[24]
…

[42] But I marvel that those who think that none of these proposals could possibly be carried out are not aware, either by their own knowledge or by tradition, that there have been many terrible wars after which the participants have come to an understanding and rendered great services to one another. **For what could exceed the enmity which the Hellenes felt toward Xerxes? Yet everyone knows that we and the Lacedaemonians came to prize his friendship**[1] **more than that of those who helped us to establish our respective empires.**

https://books.google.fi/books?id=as_OTst8jvoC&lpg=PP1&hl=fi&pg=PA15#v=onepage&q&f=false

Perhaps the most interesting and promising approach to the question of the sources of Alexander's seemingly ecumenical approach to the various ethnic groups of his empire is that of Pierre Briant. **As Briant reminds us, it is astonishing that scholars of Alexander so easily forget that the Achaemenid empire (550-330) which Alexander conquered was *itself already* a multiethnic, multicultural, multilingual entity.**53 Contrary to what centuries of Western scholarship has claimed, the Achaemenid empire was not the decadent "eastern despotism" whose inevitable decline after the sack of Babylon by Cyrus in 539 rendered it a moribund entity awaiting the arrival of Europeans.54 Indeed, the locution of "pre-Hellenistic" that scholars have used to describe the Near East prior to Alexander effectively erases the entire Achaemenid empire from history. The origins of Alexander's multicultural empire, in other words, might be found in the multicultural empire he found when he arrived. **For this reason, in an important article of 1979, Briant styled Alexander "the last of the Achaemenids"**55 **– a notion which, perhaps unsurprisingly, has met with some resistance amongst classicists.**56 At the considerable risk of minimizing Alexander's revolutionary genius, Briant has drawn our attention to the fact that for over two centuries prior to the arrival of Alexander, the Achaemenids had been developing strategies for the control of an ethnically, culturally, religiously, and linguistically diverse empire by a dominant "ethno-class."57 This was an empire that stretched from the Aegean to the Indus, composed of myriad ethnic groups speaking at least fifteen languages – there were six forms of writing in Egypt alone. **What does seem clear is that the dominant Persian ethno-class guarded their privileges jealously throughout this empire and strictly controlled the access to power of non-Persian elites.** As Briant put it, the Achaemenids had no interest in the creation of a "melting-pot."58

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Plutarch/Lives/Aratus*.html#ref45

47 1 But upon the death of Antigonus[46] the Aetolians, **despising the Achaeans on account of their slothful ways (for now that they were accustomed to save themselves by other men's prowess and had taken shelter behind the Macedonian arms, they were living in great inactivity and lack of discipline),** proceeded to interfere in the affairs of Peloponnesus;[47] and after plundering the territories of Patrae and Dyme on their way, they invaded Messenia and ravaged it.

http://www.latinvulgate.com/verse.aspx?t=0&b=45

43 **And king Antiochus wrote to all his kingdom, that all the people should be one: [ut esset omnis populus unus] and every one should leave his own law.** 44 **And all nations consented, according to the word of king Antiochus.** 45 **And many of Israel consented to his service, and they sacrificed to idols, and profaned the sabbath.** 46 **And the king sent letters by the hands of messengers to Jerusalem, and to all the cities of Juda; that they should follow the law of the nations of the earth.**

https://archive.org/details/Josephus02War13/Josephus%2007%20Antiquities%2012-14/page/132/mode/2up?view=theater

(5) *a* But when the Samaritans saw the Jews suffering these misfortunes, they would no longer admit that they were their kin or that the temple on Garizein was that of the Most Great God, thereby acting in accordance with their nature, as we have shown;*b* **they also said they were colonists from the Medes and Persians,** and they are, in fact, colonists from these peoples. Accordingly, they sent envoys to Antiochus with a letter in which they made the following statements.

> "To King Antiochus Theos Epiphanes,*c* a memorial from the Sidonians in Shechem.*d* Our forefathers because of certain droughts*e* in their country, and following a certain ancient superstition,*f* made it a custom to observe the day which is called the Sabbath by the Jews, and they erected a temple without a name on the mountain called Garizein, and there offered the appropriate sacrifices. Now you have dealt with the Jews as their wickedness deserves, but the king's officers, in the belief that we follow the same practices as they through kinship with them, are involving us in similar charges, **whereas we are Sidonians by origin, as is evident from our state documents.** We therefore petition you as our benefactor and saviour to command Apollonius, the governor of the district,*a* and Nicanor, the royal agent,*b* not to molest us in any way by attaching to us the charges of which the Jews are guilty, **since we are distinct from them both in race and in customs, and we ask that the temple without a name be known as that of Zeus Hellenios.*c* For if this be done, we shall cease to be molested, and by applying ourselves to our work in security, we shall make your revenues greater.**"

To this petition of the Samarians the king wrote the following reply.

> "King Antiochus to Nicanor. The Sidonians in Shechem have submitted a memorial which has been filed.*d* Now since the men sent by them have represented to us sitting in council with our friends that they are in no way concerned in the complaints brought against the Jews, **but choose to live in accordance with Greek customs, [Ἑλληνικοῖς ἔθεσιν]** we acquit them of these charges, and permit their temple to be known as that of Zeus Hellenios, as they have petitioned."

Numa Pompilius, again, could devise no better way of putting an end to the racial hatred between Sabines and Romans than by separating the body of the people into different castes and classes. The result of his policy was just what he had desired. **Both Sabines and Romans, once amalgamated in this manner, forgot their national differences and thought only of those of their class or caste.**

https://archive.org/details/cu31924028288722/page/22/mode/2up?view=theater

Modern history furnishes us an example of the same thing which then took place in Rome: and this is very noteworthy; for, since men have had the same passions in all ages, the occasions which produce great changes are different, but the causes are always the same. **As Henry VII of England increased the power of the commons for the purpose of humbling the aristocracy, Servius Tullius before him had extended the privileges of the people in order to humble the senate.**8 **But the people—become at once more bold—overthrew the one and the other monarchy.**

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0124%3Achapter%3D7

At this period every citizen began to seek distinction, and to display his talents with greater freedom; **for, with princes, the meritorious are greater objects of suspicion than the undeserving, and to them the worth of others is a source of alarm. [nam regibus boni quam mali suspectiores sunt, semperque iis aliena virtus formidulosa est.] But when liberty was secured, it is almost incredible[1] how much the state strengthened itself in a short space of time, so strong a passion for distinction had pervaded it. Now, for the first time, the youth, as soon as they were able to bear the toil of war,[2] acquired military skill by actual service in the camp,** and took pleasure rather in splendid arms and military steeds than in the society of mistresses and convivial indulgence.

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0168%3Abook%3D45%3Achapter%3D18

18. **First of all it was voted that the Macedonians and Illyrians should be given their independence, so that it should be clear to all nations that the forces of the Roman People brought not slavery to free peoples, but on the contrary, freedom to the enslaved. [ut omnibus gentibus appareret arma populi Romani non liberis servitutem, sed contra servientibus libertatem adferre]** [2] The senate wished nations which were free to consider that their freedom was assured and lasting under the protection of the Roman People, and that those who lived under kings should feel **for the time being** that their rulers were milder and more just under the eye of the Roman People, and, if at any time their kings should make war on the Roman People, that the outcome of the war would bring victory to the Romans, but freedom to themselves.

>
> The Committee for Foreign Affairs were such slovens, and stunk so abominably, that no muscadin ambassador of the smallest degree of delicacy of nerves could come within ten yards of them; but now they are so powdered, and perfumed, and ribanded, and sashed, and plumed, that, though they are grown infinitely more insolent in their fine clothes even than they were in their rags, (and that was enough,) as they now appear, **there is something in it more grand and noble, something more suitable to an awful Roman Senate receiving the homage of dependent tetrarchs. Like that Senate, (their perpetual model for conduct towards other nations,) they permit their vassals (during their good pleasure) to assume the name of kings, in order to bestow more dignity on the suite and retinue of the sovereign Republic by the nominal rank of their slaves:** *Ut habeant instrumenta servitutis et reges.*"
> ...
>
> **But in this the French Republic has followed, as they always affect to do, and have hitherto done with success, the example of the ancient Romans, who shook all governments by listening to the complaints of their subjects, and soon after brought the kings themselves to answer at their bar.**
>
> https://archive.org/details/cu31924028288722/page/132/mode/2up?view=theater
>
> Whenever any people or prince withdrew their obedience from their sovereign, they immediately accorded to them the title of allies of the Roman people,3 and thus rendered them sacred and inviolable; **so that there was no king, however great he might be, who could for a moment be sure of his subjects, or even of his family.**

https://archive.org/details/greeklifeandtho03mahagoog/page/596/mode/2up?view=theater

Far worse was the case of Macedonia, where every man of mark, every noble, every official, was deported, so that the whole country was deprived of its upper classes and therefore of all its culture. For here it was only the dominant caste that had attained culture; the soldier-peasants were no better than they now are—shepherds and clephts.
...

The Romanised Polybius, or at least Polybius in the history he composed for Roman readers, wonders at the heaven-sent madness of the Macedonians, who, after they had received 'their liberty,' and their taxes were reduced to half the amount they had paid their kings, yet rose in constant insurrections,1 and joined the standard of any pretender to the royal blood who promised to rescue them from their new and precious privileges! There is no judgment in the historian more monstrous. **A people of old feudal and monarchical habits had their royal family abolished, their nobility destroyed, all the tokens of their ancient splendour carried away as spoil, and were given a brand-new democratical code by the victors as an ample substitute!**2 **And this was called *liberty*, when the country was divided into four sections, and all intercourse strictly forbidden between them!** What family ties must have been broken, even among those who had not been deported, what trade relations ruined among all those whose business was more than parochial! How intolerable to old friends and connexions through Macedonia to find all intercourse interdicted, and their noble fatherland cut into sections by new and artificial boundaries! **And presently they found Roman merchants going freely to and fro and**

monopolising by this privilege even the real home trade of their country, which the new laws had rendered impossible to native enterprise.
...

The first thing that strikes us when we hear of the whole nobility of Macedonia, and then of Achaea, being scattered through Italy, is that this large though compulsory immigration ought to have had an important influence on Italian life.3 **And yet, except in the solitary instance of Polybius, not one word transpires to tell us that such was the case. We do not hear of a single remarkable man descended from this foreign blood, and tracing his origin to Macedonian or Greek nobility. We do not hear of any country town which was humanised by these noble exiles, or which benefited by their culture.** What on earth became of them all? The son of King Perseus was a petty clerk in a country town, and so earned a miserable livelihood.

https://archive.org/details/in.ernet.dli.2015.231118/page/n215/mode/2up?view=theater

He subordinated the Senate almost to the role of an advisory council. **He enlarged it from 600 to 900 members and permanently transformed it with 400 new appointees.** Many of these were Roman businessmen; many were leading citizens of Italian or provincial cities; some had been centurions, soldiers, or sons of slaves. The patricians were alarmed to see the chieftains of conquered Gaul enter the Senate and join the rulers of the Empire; even the wags of the capital resented this and circulated a satiric couplet:

> ***Gallos Caesar in triumphum ducit, idem in curiam;***
> ***Galli braccas deposuerunt, latum clavum sumpserunt—***

...

Cicero sought to unite the middle classes with the aristocracy; Caesar sought to unite them with the plebs. Many of the great capitalists, from Crassus to Balbus, helped to finance him, as similar men helped the American and French Revolutions. Nevertheless, Caesar ended one of the richest sources of financial profiteering—the collection of provincial taxes through corporations of publicans.
...

In 49 he had enfranchised Cisalpine Gaul; now (44) he drew up a municipal charter, apparently for all the cities of Italy, equalizing their rights with Rome's; probably he was planning some representative government by which they would have had a democratic share in his constitutional monarchy.[55] He took the appointment of provincial governors out of the hands of the corrupt Senate and himself named to these posts men of proved ability, who remained at every moment subject to recall at his will. He reduced provincial taxes by a third, and entrusted their collection to special officials responsible to himself. He overrode ancient curses to restore Capua, Carthage, and Corinth—completing again the work of the Gracchi. To the colonists whom he sent to found or people a score of cities from Gibraltar to the Black Sea, he gave Roman or Latin rights, **and evidently hoped to extend Roman citizenship to all free adult males in the Empire; the Senate was then to represent not a class in Rome, but the mind and will of every province. This conception of government, and Caesar's reorganization of Rome and Italy, completed the miracle whereby the youthful spendthrift and roisterer had become one of the ablest, bravest, fairest, and most enlightened men in all the sorry annals of politics.**

http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3Atext%3A1999.02.0022%3Atext%3DA%3Abook%3D14%3Aletter%3D12

You know how fond I am of the Sicilians, and what an honour I consider it to be their patron. Caesar granted them many privileges with my full approval, though their having the *ius Latinum* was intolerable; [scis quam diligam Siculos et quam illam clientelam honestam iudicem. multa illis Caesar neque me invito, etsi Latinitas erat non ferenda.] yet, after all—But look at Antony! For an enormous bribe he has put up a law—alleged to have been carried at the comitia by the dictator, granting the Sicilians full Roman citizenship; though while he was alive there was never a word said about it. Again: take the case of my client Deiotarus, isn't it exactly parallel? He, of course, deserved any kingdom you please, but not through Fulvia.[1] There are hundreds of similar cases.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Plutarch/Lives/Caesar*.html#ref96

55 1 But to resume, when Caesar came back to Rome from Africa, to begin with, he made a boastful speech to the people concerning his victory, asserting that he had subdued a country large enough to furnish annually for the public treasury two hundred thousand Attic bushels of grain, and three million pounds of olive oil. 2 Next, he celebrated triumphs, an Egyptian, a Pontic, and an African, the last not for his victory over Scipio, but ostensibly over Juba the king. 3 **On this occasion, too, Juba, a son of the king, a mere infant, was carried along in the triumphal procession, the most fortunate captive ever taken, since from being a Barbarian and a Numidian, he came to be enrolled among the most learned historians of Hellas.**

https://archive.org/details/dli.ernet.506079/page/299/mode/2up?view=theater

> The children of Cleopatra presented a more delicate problem. ‘A multitude of Caesars is no good thing.’3 That just observation sealed the fate of Ptolemy Caesar, whom many believed to be son of the dictator. Alexander Helios and Cleopatra Selene were reserved to walk in a Roman triumph. The boy is not heard of again—he was probably suppressed. **The girl was enlisted as an instrument of Roman imperial policy, being given in marriage to Juba, the prince of the Numidian royal stock who became King of Mauretania.**

https://ccel.org/g/gibbon/decline/volume1/chap3.htm#CHA

Augustus was sensible that mankind is governed by names; nor was he deceived in his expectation, that the senate and people would submit to slavery, provided they were respectfully assured that they still enjoyed their ancient freedom.

9. Even at that time Emporiae consisted of two towns separated by a wall. One was inhabited by Greeks from Phocaea, whence came the Massilienses also, the other by the Spaniards; [2] but the Greek town, being entirely open to the sea, had only a small extent of wall, of less than four hundred paces in length, while the Spaniards, who were farther back from the sea, had a wall three miles around. [3] A third class of inhabitants, Roman colonists, was added by the deified Caesar[51] after the final defeat of the sons of Pompey, **and at present all are fused into one mass, [nunc in corpus unum confusi omnes] the Spaniards first, and later the Greeks, having been received into Roman citizenship.**

https://archive.org/details/L203JosephusIITheJewishWar13/page/468/mode/2up?view=theater

“**But if there is one people above all others which should be tempted by its grand opportunities to raise the standard of revolt, it is surely the Gauls with their magnificent natural ramparts,** on the east the Alps, on the north the river Rhine, on the south the chain of the Pyrenees, on the west the ocean. But, though encompassed by such formidable barriers, though swarming with a population of three hundred and five nations,*b* possessing, so to say, in their native soil the springs of prosperity and irrigating well-nigh the whole world with the overflow of their products, **the Gauls are yet content to be treated as a source of revenue to the Romans and to have their own prosperous fortune meted out to them at their hands.** And this they tolerate, not from any lack of spirit or because they are an ignoble race, they who for full eighty years*c* fought for their independence, but because they are overawed at once by the power of Rome and by her fortune, which brings her more triumphs even than her arms. **That is why they submit to the orders of twelve hundred soldiers,*d* they who have cities enough almost to outmatch that number.*e***

> https://oll.libertyfund.org/title/champion-an-account-of-denmark-with-francogallia-and-some-considerations-for-the-promoting-of-agriculture-and-employing-the-poor#lf1577_label_372

It was the Misfortune of this most valiant and warlike People, to submit at length to the Great Beast, as it is called in Scripture, with which however they so strove for Empire for eight hundred Years, (as Josephus informs us) that no Wars with any other Nation, so much terrified Rome.
…

Now Tacitus in his Life of Agricola, attributes the Loss of this their so remarkable Valour, to the Loss of their Liberty; “Gallos in bellis floruisse accepimus, mox segnities [segnitia] cum otio intravit, amissa Virtute pariter ac Libertate.”54

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Cassius_Dio/56*.html

The Romans were holding portions of [Germany]—not entire regions, but merely such districts as happened to have been subdued, so that no record has been made of the fact—2 and soldiers of theirs were wintering there and cities were being founded. The barbarians were adapting themselves to Roman ways, **were becoming accustomed to hold markets,** and were meeting in peaceful assemblages. They had not, however, forgotten their ancestral habits, their native manners, their old life of independence, or the power derived from arms. 3 **Hence, so long as they were unlearning these customs gradually and by the way, as one may say, under careful watching, they were not disturbed by the change in their manner of life, and were becoming different without knowing it.** But when Quintilius Varus became governor of the province of Germany, and in the discharge of his official duties was administering the affairs of these peoples also, he strove to change them more rapidly. **Besides issuing orders to them as if they were actually slaves of the Romans, he exacted money as he would from subject nations.** 4 To this they were in no mood to submit, **for the leaders longed for their former ascendancy and the masses preferred their accustomed condition to foreign domination.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Tacitus/Histories/1A*.html#ref10

Although Nero's death had at first been welcomed with outbursts of joy, it roused varying emotions, not only in the city among the senators and people and the city soldiery, but also among all the legions and generals; **for the secret of empire was now revealed, that an emperor could be made elsewhere than at Rome.**[11] **[evulgato imperii arcano posse principem alibi quam Romae fieri]** The senators rejoiced and immediately made full use of their liberty, as was natural, for they had to do with a new emperor who was still absent. The leading members of the equestrian class were nearly as elated as the senators. **The respectable part of the common people [pars populi integra]** and those attached to the great houses, the clients and freedmen of those who had been condemned and driven into exile, were all roused to hope. **The lowest classes, [plebs sordida] addicted to the circus and theatre, and with them the basest slaves, as well as those men who had wasted their property and, to their shame, were wont to depend on Nero's bounty, were cast down and grasped at every rumour.**
…

The provinces without an army, and especially Italy itself, were exposed to slavery under any master and destined to become the rewards of war. [in pretium belli cessurae erant] This was the condition of the Roman state when Servius Galba, chosen consul for the second time, and his colleague Titus Vinius entered upon the year that was to be for Galba his last and for the state almost the end.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Cassius_Dio/75*.html

4 **But some found fault with [Severus] particularly because he abolished the practice of selecting the body-guard exclusively from Italy, Spain, Macedonia and Noricum,—a plan that furnished men of more respectable appearance and of simpler habits,—and ordered that any vacancies should be filled from all the legions alike.** 5 Now he did this with the idea that he should thus have guards with a better knowledge of the soldier's duties, and should also be offering a kind of prize for those who proved brave in war; but, as a matter of fact, **it became only too apparent that he had incidentally ruined the youth of Italy, who turned to brigandage and gladiatorial fighting in place of their former service in the army,** 6 and in filling the city with a throng of motley soldiers most savage in appearance, most terrifying in speech, and most boorish in conversation.

https://www.ccel.org/g/gibbon/decline/volume1/chap14.htm#andc

The final abolition of the Praetorian guards was a measure of prudence as well as of revenge. Those haughty troops, whose numbers and privileges had been restored, and even augmented, by Maxentius, were forever suppressed by Constantine.
…

By suppressing the troops which were usually stationed in Rome, Constantine gave the fatal blow to the dignity of the senate and people, **and the disarmed capital was exposed, without protection, to the insults or neglect of its distant master.**

https://archive.org/details/dli.ernet.506079/page/503/mode/2up?view=theater

Vespasian's nobility was his own creation. The Flavians had cause to be suspicious. Though the murderous tyranny of the Julio-Claudians has all but exhausted the Republican and the Augustan nobility, there are still on the *Fasti* three Republican *nobiles* and some seven or eight men sprung from Triumviral or Augustan consuls: only one man of this class commands an army, and a small one at that. He was Ti. Plautius Silvanus Aelianus, an old man and a personal friend of Vespasian.1 **Thenceforward a newer nobility, sons or grandsons of Roman knights for the most part, govern the great military provinces of the Empire.**

http://www.tertullian.org/fathers/martial_on_the_games_of_domitian_01_text.htm

What race is so distant from us, what race so barbarous, Caesar, as that from it no spectator is present in thy city? The cultivator of Rhodope is here from Orpheus' Haemus:[1] the Sarmatian nourished by the blood drawn from his steed, is here. He too who drinks the waters of the Nile where it first becomes known to us, and he whose shores the surge of the remotest ocean laves. The Arabian has hastened hither, the Sabaeans have hastened, and Cilicians have here dripped with showers of their own perfume. **With locks twisted into a knot, are come the Sicambrians; and with hair twisted in other forms, the Ethiopians. Though different the speech of the various races, there is but one utterance, when thou art hailed as the true father of thy country.**

https://archive.org/details/cu31924028288722/page/294/mode/2up?view=theater

In reading the history of the Roman emperors, we are wearied with the vast number of people whom they caused to be put to death in order that they might confiscate their estates. **We find nothing similar in our modern histories.** This difference, as we have just intimated, ought to be attributed to manners which are more gentle, and to a religion which is more restraining; **and it may be added that we have not the families of senators to despoil who had ravaged the earth.**
...

Nero, Caligula, Commodus, Caracalla, were regretted by the people because of the very follies in which they indulged; for these emperors loved with fervor that which the people loved; they contributed to their pleasures with all their power, and even with their persons; they lavished upon them the wealth of the empire; and, when this was exhausted, **the people looked on without pain whilst all the great families were despoiled.** They enjoyed the fruits of the tyranny without any alloy of fear, for they found safety in their baseness. It was natural that such emperors should hate good men. They knew that they were not approved by them.6 Indignant at the contradiction or the silence of an austere citizen, and drunk with the applause of the populace, they came to imagine that their government constituted the public happiness, and that none but evil-minded men could censure it.7

> 7. **In seeking an explanation for that good understanding which existed between the populace and the worst of the emperors, I think we shall find it, not only in the causes mentioned in the text, but in the fundamental fact that *the empire itself was but the permanent triumph of the popular over the patrician faction.*** This fact was one of the traditions of the people, and hence they regarded the successors of Caesar rather in the light of popular chiefs.—TRANSLATOR.

...

Here we may fitly indulge a reflection upon the course of human affairs. When in the past history of Rome we see so many wars undertaken, so much bloodshed, so many peoples destroyed, so many great actions, so many triumphs, so much policy, wisdom, prudence, constancy, and courage; **when we contemplate that scheme for the conquest of all nations,** which was so well conceived, so ably sustained and so successfully executed —in what has it all ended at last, except to satiate the passions of five or six monsters? **That senate has only struck down so many kings in order to fall itself into the most degrading slavery at the hands of some of the worst citizens of the state, and—to exterminate itself by its own decrees!** Men only build up their power to the end of seeing it completely overthrown! they only labor to increase it in order to see it turned against themselves in more fortunate hands!

https://archive.org/details/dailylifeinancie035465mbp/page/n93/mode/2up?view=theater

Up to the time of Claudius, the imperial "cabinet" was composed almost exclusively of slaves.44 They received the petitions of the empire, issued instructions both to provincial governors and to the magistrates of Rome, and elaborated jurisprudence of all the tribunals including the highest senatorial court. The emperors from Claudius to Trajan inclusive recruited their cabinet from their freedmen. **Just as the French nobility of the seventeenth century chafed under the domination of "*la vile bourgeoisie*" of ministers and their clerks, so the senators of the empire with rage in their hearts silently bowed before the power of an ex-slave.**
...

Hadrian took the initiative, which his successors respected, of reserving all places in his cabinet for members of the Equestrian Order.46 **If he had wished to carry this reform through with thoroughness, he should, however, have gone a step further and regulated also the tenure of secondary posts.** For in order to command obedience and not to fear malpractices which they were

powerless to stamp out, the emperors and their great men preferred to continue, as before, to select foreign slaves to be the *procuratores* and *institores* of their administration. **They imagined these men to be in their power, while in fact, with the extension of the frontiers and the elaboration of the fiscal system, they themselves fell more and more into the power of their slave subordinates.** It would be unjust to deny that there were among these *servi*, anxious to earn their manumission by their zeal, and among these *liberti* who felt a gratitude for their manumission exceeding their obligations, many conscientious servants, honest stewards, faithful and devoted agents; **and the fact that the machinery of empire ran as smoothly as it did during the second century was due perhaps less to the vigilance of its supervising engineers than to the professional care and skill of its mechanics.** The flock, however, was too large not to contain a proportion of black sheep: agents too harsh in their demands and exactions and too greedy of commissions and gratuities, administrators who were insolent, cruel, and untruthful. It was surely a fatal paradox for a government honestly concerned to improve its efficiency to delegate its functions to men born in chains and destined for slavery.

Instead of witnessing a logical and gradual evolution which would have demonstrated the value of imperial institutions, the Romans had continually to endure the civic degradation entailed by this arbitrary and drastic inversion of classes and of roles. Both in town and country it demoralised the citizens. **Juvenal was infuriated to see the sons of free men in the Rome of Trajan constrained by self-interest to pay court to the slaves of the rich:**

> "*Divitis hic servo claudit lotus ingenuorum*
> *Filius ...*"47

Under Commodus free citizens, as colonist volunteers, cultivated the African estate of Suq al Khmis (Thursday Market), and **were mercilessly and unjustly flogged in the emperor's name by the slave steward of his *Saltus Burunitanus*.**48

https://www.ccel.org/g/gibbon/decline/volume1/chap13.htm#elev

The parents of Diocletian had been slaves in the house of Anulinus, a Roman senator; nor was he himself distinguished by any other name than that which he derived from a small town in Dalmatia, from whence his mother deduced her origin. (1)

> 1. Eutrop. ix. 19 [13]. Victor in Epitome [c. 39]. The town seems to have been properly called Doclia, from a small tribe of Illyrians (see Cellarius, Geograph. Antiqua, tom. i. p. 393); **and the original name of the fortunate slave was probably Docles; he first lengthened it to the Grecian harmony of Diocles, and at length to the Roman majesty of Diocletianus. He likewise assumed the Patrician name of Valerius,** and it is usually given him by Aurelius Victor.

It is, however, probable that his father obtained the freedom of the family, and that he soon acquired an office of scribe, which was commonly exercised by persons of his condition. (2) Favourable oracles, or rather the consciousness of superior merit, prompted his aspiring son to pursue the profession of arms and the hopes of fortune; and it would be extremely curious to observe the graduation of arts and accidents which enabled him in the end to fulfil those oracles, and to display that merit to the world. Diocletian was successively promoted to the government of Moesia, the honours of the consulship, and the important command of the guards of the palace. He distinguished his abilities in the Persian war; **and after the death of Numerian, the slave, by the confession and judgment of his rivals, was declared the most worthy of the Imperial throne.**

https://www.ccel.org/g/gibbon/decline/volume1/chap13.htm#newb

But the most fatal though secret wound which the senate received from the hands of Diocletian and Maximian was inflicted by the inevitable operation of their absence. **As long as the emperors resided at Rome, that assembly might be oppressed, but it could scarcely be neglected.** The successors of Augustus exercised the power of dictating whatever laws their wisdom or caprice might suggest; but those laws were ratified by the sanction of the senate. The model of ancient freedom was preserved in its deliberations and decrees; and wise princes, who respected the prejudices of the Roman people, were in some measure obliged to assume the language and behaviour suitable to the general and first magistrate of the republic. **In the armies and in the provinces they displayed the dignity of monarchs; and when they fixed their residence at a distance from the capital, they forever laid aside the dissimulation which Augustus had recommended to his successors.** In the exercise of the legislative as well as the executive power, the sovereign advised with his ministers, instead of consulting the great council of the nation. **The name of the senate was mentioned with honour till the last period of the empire;** the vanity of its members was still flattered with honorary distinctions; (96) but the assembly which had so long been the source, and so long the instrument of power, was respectfully suffered to sink into oblivion. **The senate of Rome, losing all connection with the**

Imperial court and the actual constitution, was left a venerable but useless monument of antiquity on the Capitoline hill.
…

Notwithstanding these precautions, **the political union of the Roman world was gradually dissolved, and a principle of division was introduced, which, in the course of a few years, occasioned the perpetual separation of the eastern and western empires.**

https://archive.org/details/cu31924026480370/page/n375/mode/2up?view=theater

Why should the child of Paulus Æmilius, the nephew of Æmilius, the descendant of such a noble family and so glorious a republic, inquire how there can be two suns in heaven, **and not ask how there can be two senates in one Commonwealth, and, as it were, two distinct peoples? For, as you see, the death of Tiberius Gracchus, and the whole system [ratio] of his tribuneship, has divided one people into two parties.**

https://archive.org/details/dli.ernet.506079/page/289/mode/2up?view=theater

The Empire might split into two parts—very easily. **It is one of the miracles of Roman history that in subsequent ages the division between West and East was masked so well and delayed so long.** The loss of dominions beyond the sea would be ruinous to an Italy that had prospered and grown rich from the revenues of the East, the return she gained from her export of soldiers, financiers and governors.
…

When the Triumvir Antonius abode for long years in the East men might fear lest the city be dethroned from its pride of place, lest the capital of empire be transferred to other lands. The propaganda of Octavianus had skillfully worked upon such apprehensions. Once aroused they would be difficult to allay: their echo could still be heard. **Horace produces a divine decree, forbidding Troy ever to be rebuilt;**5 **Virgil is quite explicit;**6 and Livy duly demonstrates how the patriot Camillus not only saved Rome from the invader but prevented the citizens from abandoning the destined seat of empire for a new capital.7

> **Or blind with duteous zeal, presume**
> **To build again ancestral Troy.**

https://www.ccel.org/g/gibbon/decline/volume1/chap14.htm#disc

The privileges which had exalted Italy above the rank of the provinces were no longer regarded: and the officers of the revenue already began to number the Roman people, and to settle the

proportion of the new taxes. Even when the spirit of freedom had been utterly extinguished, the tamest subjects have sometimes ventured to resist an unprecedented invasion of their property; **but on this occasion the injury was aggravated by the insult, and the sense of private interest was quickened by that of national honour. The conquest of Macedonia, as we have already observed, had delivered the Roman people from the weight of personal taxes. Though they had experienced every form of despotism, they had now enjoyed that exemption near five hundred years; nor could they patiently brook the insolence of an Illyrian peasant, who, from his distant residence in Asia, presumed to number Rome among the tributary cities of his empire.** The rising fury of the people was encouraged by the authority, or at least the connivance, of the senate; and the feeble remains of the Praetorian guards, who had reason to apprehend their own dissolution, embraced so honourable a pretence, and declared their readiness to draw their swords in the service of their oppressed country. It was the wish, and it soon became the hope, of every citizen that, after expelling from Italy their foreign tyrants, they should elect a prince who, by the place of his residence, and by his maxims of government, might once more deserve the title of Roman emperor.

https://penelope.uchicago.edu/Thayer/E/Gazetteer/Places/Europe/Italy/_Texts/HODIHI/2d_edition/3/9*.html

But if the question be asked, 'What was the effect of the building of Constantinople on Italy and Old Rome?', if it be considered that the true object of a statesman of the Lower Empire should have been, not to protract the existence of a semi-Greek, semi-Asiatic dominion, a kind of bastard Rome, but to keep the true Rome, the City of the seven hills, in her high place at the forefront of humanity or, if she must needs fall, to make her fall as honourable and her transformed spirit as mighty as possible,—then our answer will be widely different, and we shall have to rank the founder of Constantinople **foremost among the destroyers of the Empire.**

We have seen in the course of this history the infinite mischief wrought by the rivalry between the Ministers of the Eastern and Western Empires. At the critical moment of Alaric's preparations for his invasion Stilicho alone might probably have crushed him; but the subtle Goth

> 'Sold his alternate oaths to either throne.'

Each Empire trusted that the blow was about to fall on the other—a blow which the sister-realm would have witnessed with Christian resignation—and thus the time for anticipating it and for destroying the destroyer passed away.

https://books.google.fi/books?id=2AyaCgAAQBAJ&lpg=PA81&hl=fi&pg=PA23#v=onepage&q&f=false

It had always been extremely rare for Greeks to take the trouble to learn what most of them had never ceased to regard as a barbarian language, and in the Later Empire there were few indeed who took the trouble to learn it for any but strictly practical reasons, with a view to one of the careers where at least a smattering of Latin was still essential, the law, the army, or the civil service. **Gibbon was not exaggerating much when he remarked that there is not one allusion to Vergil or Horace in the whole of Greek literature from Dionysius of Halicarnassus to Libanius.** Libanius affected complete and ostentatious ignorance of Latin, and even required an interpreter to make out a letter written in the language.134 **The emperor Julian was able to make himself understood in Latin ("Latine... disserendi sufficiens sermo," as Ammianus patronisingly observed), but "seems guiltless of the most rudimentary acquaintance with Latin literature."**135

https://books.google.fi/books?id=NHgvpINWV_QC&lpg=PP1&hl=fi&pg=PA529#v=onepage&q&f=false

But as the fourth century progressed, there was a sharp decline in knowledge of Greek in the West. **Given the enormous consequences of this decline for East-West relations in the centuries that followed (political and ecclesiastical no less than cultural), it has attracted surprisingly little scholarly attention.**12
…

The decisive factor in the decline of Greek in Rome was the de facto division of the empire by Diocletian and the creation by the tetrarchs of a series of new administrative capitals, especially those in the East. By the fourth century, Trier and Milan, Nicomedia, Antioch, and (most important of all) Constantinople were taking over many of the roles previously monopolized by Rome. **From the age of the Scipios to the reign of Gallienus, Rome had been the central and inevitable source of patronage for ambitious Greeks.** But from Diocletian on, court followed emperor from one to another of these secondary capitals, paying no more than the occasional brief visit to Rome. At the same time, the central government was tightening its grip at every level. **The vast expansion of Roman administrative control in the East transformed both cultural and political life for the old Greek elites, who increasingly withdrew from their traditional role in the cities to seek positions in the imperial service.** Rome rapidly became a cultural as well as a political

backwater. The aristocracy of Rome might continue to regard itself as *pars melior humani generis*, but by Symmachus's day prominent Greek intellectuals had long been looking elsewhere for patronage. **We do not know the name of a single Greek grammaticus in late antique Rome, as against nine Latin grammatici in Constantinople;**15 **and no certainly identifiable Greek rhetor either.** A rescript of Gratian fixing the salaries of professors for Trier, then an imperial capital, envisaged difficulty in finding a competent Greek grammaticus.16

16. *Graeco etiam, si qui dignus repperiri potuerit …*, *Cod. Theod.* xiii. 3. 11 (376).

In the late Republic and early empire it was altogether exceptional for Greeks to learn Latin – **a situation transformed in the fourth century by the rapid growth of a Latin-speaking civil service in the East** (p. 641). The gains made by Latin in the East may have played a part in the decline of Greek in the West. According to Matthews, **Ammianus and Claudian "were the tip of an iceberg, for the west was full of such Latin-speaking Greeks."**17

https://archive.org/details/a589105200kinguoft/page/n87/mode/2up?view=theater

I must add yet one more feature to this fearful, but accurate picture, and say how, a few generations forward, an even uglier thing would be seen. **The English aristocracy would have been absorbed by foreign adventurers.** The grandchildren of these slaves and mercenaries would be holding the highest offices in the state and the army, naming themselves after the masters who had freed them, or disguising their barbarian names by English endings. The De Fung-Chowvilles would be Dukes, the Little-grizzly-bear-Joe-Smiths Earls, and the Fitz-Stanleysons, descended from a king of the gipsies who enlisted to avoid transportation, and in due time became Commander-in-Chief, would rule at Knowsley in place of the Earl of Derby, having inherited the same by the summary process of assassination. Beggars on horseback, only too literally; married, most of them, to Englishwomen of the highest rank; but looking on England merely as a prey; without patriotism, without principle; they would destroy the old aristocracy by legal murders, grind the people, fight against their yet barbarian cousins outside, as long as they were in luck: but the moment the luck turned against them, would call in those barbarian cousins to help them, and invade England every ten years with heathen hordes, armed no more with tulwar and matchlock, but with Enfield rifle and Whitworth cannon. And that, it must be agreed, would be about the last phase of the British empire. **If you will look through the names which figure in the high places of the Roman empire, during the fourth and fifth centuries, you will see how few of them are really Roman.** If you will try to investigate, not their genealogies—for they have none—not a grandfather among them—but the few facts of their lives which have come down to us; you will see how that Nemesis had fallen on her which must at last fall on every nation which attempts to establish itself on slavery as a legal basis. **Rome had become the slave of her own slaves.**

https://penelope.uchicago.edu/Thayer/E/Gazetteer/Places/Europe/Italy/_Texts/HODIHI/2d_edition/1/5*.html

54. A strong confirmation of the theory (probably on *à priori* grounds) that the Goths enjoyed special immunities from taxation and from the rule of the civil magistrates of the Empire, is afforded by a passage in the XVIth Oration of Themistius. He brings forward the example of the Gaulish invaders of Asia Minor, who had been settled in Galatia and had given their names to that province. **'Now,' he says, 'no one could call them barbarians but altogether Romans. Their manner of life is the same as ours: they pay the same tributes, undergo the same military service, receive the same magistrates, obey the same laws. So too before long it will be with the Goths.** Now the wounds which they have inflicted are recent: but soon we shall have them bound by the same treaties, eating at the same tables, **serving with us in the same army, undertaking the same public duties.**' Evidently this was not the state of things established by the foedus.

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Ammian/14*.html#ref26

3 **At the time when Rome first began to rise into a position of world-wide splendour, in order that she might grow to a towering stature, Virtue and Fortune, ordinarily at variance, formed a pact of eternal peace; for if either one of them had failed her, Rome had not come to complete supremacy.** 4 **Her people, from the very cradle to the end of their childhood,[27] a period of about three hundred years, carried on wars about her walls.** Then, entering adult life, after many toilsome wars, they crossed the Alps and the sea. Grown to youth and manhood, from every region which the vast globe includes, they brought back laurels and triumphs. **And now, declining into old age, and often owing victory to its name alone, it has come to a quieter period of life.** 5 **Thus the venerable city, after humbling the proud necks of savage nations, and making laws, the everlasting foundations and moorings of liberty, like a thrifty parent, wise and wealthy, has entrusted the management of her inheritance to the Caesars, as to her children.** 6 And although for some time the tribes[28] have been inactive and the centuries [29] at peace, and there are no contests for votes but the tranquillity of Numa's time has returned, **yet throughout all regions and parts of the earth she is accepted as mistress and queen;** everywhere the white hair of the senators and their authority are revered and the name of the Roman people is respected and honoured.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Claudian/De_Bello_Gildonico*.html#ref2

Time was when my men bore arms and my greybeards met in council; mistress of the world was I and lawgiver to mankind. From rising to setting sun I sped in triumph. **When proud Caesar had transferred my people's power to himself, when manners became corrupt and forgetful of war's old discipline I declined into the servile lap of peace, [postquam iura ferox in se communia Caesar transtulit et lapsi mores desuetaque priscis artibus in gremium pacis servile recessi] the emperors rewarded me with Africa and Egypt that they might nourish the sovereign people and the Senate,** arbiter of peace and war, by means of summer-sped fleets, and that the winds, blowing alternately from either shore, should fill our granaries with corn.
...

Destruction threatens me hourly; **a few days will set a limit to my uncertain food-supply. Out upon thee, prosperity! Why hast thou given me seven hills and such a population as a small supply cannot nourish?** Happier I, had my power been less. Better to have put up with the Sabines and Veii; in narrower bonds I passed securer days. **My very magnitude undoes me;** would that I could return to my former boundaries and the walls of poor Ancus. Enough for me then would be the ploughlands of Etruria and Campania, the farms of Cincinnatus and Curius, and at his country's prayer the rustic dictator[5] would bring his home-grown wheat.

https://archive.org/details/historyoflaterro00arno/page/n537/mode/2up?view=theater

The worst effect, however, of the imperial dominion as of that the commonwealth, **was the helplessness of mind which a cowardly policy taught it to encourage amongst the people of the provinces. It was maintained by Aristotle,**50 **that a state could not consist of so great a number as a hundred thousand citizens;** and although we may smile at the exaggeration of this doctrine, **yet it was founded on the justest notions of the duties of a political society,** where all should have a common interest, and should be keenly alive to the welfare of each other, and of the whole body. The Greeks, therefore, distinguished between a state and a dominion; and it was by the latter name that they characterized that vast mass of countries yoked together at the time of which we are treating under the sovereignty of Rome. The inhabitants then of the greatest part of the empire were subjects, and not citizens; **and that activity and attention to public affairs which is the great virtue of a citizen, is most unwelcome to a sovereign when he sees it in his subjects. An enlightened despot, like Trajanus, is frequently desirous of promoting the good of his people, but he dreads to see them able and zealous to promote their own;** not considering that wealth and security lose half their value when they are passively received from another; and that men will dwindle into children in understanding and energy, when they are obliged to depend in childlike helplessness on the protection of their rulers. **It is remarkable, with what exceeding suspicion Trajanus regarded every thing like a principle of internal organization and self-dependence in the people of his empire.**

>
> 2. In the Criminal Code of 1926 there was a most stupid Article 139 – “on the limits of necessary self-defense” – according to which you had the right to unsheath your knife only after the criminal’s knife was hovering over you. **And you could stab him only after he had stabbed you. And otherwise *you* would be the one put on trial.** (And there was no article in our legislation saying that the greater criminal was the one who attacked someone weaker than himself.) **This fear of exceeding the measure of necessary self-defense led to total spinelessness as a national characteristic.** A hoodlum once began to beat up the Red Army man Aleksandr Zakharov outside a club. Zakharov took out a folding penknife and killed the hoodlum. And for this he got ... ten years for plain murder! **“And what was I supposed to do?” he asked, astonished. Prosecutor Artsishevsky replied: “You should have fled!”**
> ...
>
> Any genuine initiative like that shown in the French film *The Waterfront at Dawn*, in which the workers went about catching thieves and punishing them themselves without the knowledge of the authorities, would in our country have been suppressed as illicit! **Could one even *imagine* that way of thinking and that sort of film in our country?**

...

In the reign of Trajanus certainly, the government was sufficiently ready to promote any scheme of improvement that promised to be beneficial; **but when other emperors succeeded, who had neither the ability nor the disposition to forward such plans, the evil of encouraging helplessness in the people became apparent, and when the provinces were neglected by their rulers, they had lost the energy to act for themselves.**

https://books.google.fi/books?id=INcgAwAAQBAJ&lpg=PP1&hl=fi&pg=PA391#v=onepage&q&f=false

This brings us to what is possibly the central and most difficult paradox of Machiavelli's new political science: the republic's achieved goal of power, wealth, and security through its rise to empire is precisely what at length causes it to unravel into effeminacy and laziness. Its *virtu* is its own gravedigger.

https://en.wikipedia.org/wiki/Asabiyyah#Overview

He explains that ruling houses tend to emerge on the peripheries of existing empires and use the much stronger
asabiyya present in their areas to their advantage, in order to bring about a change in leadership. This implies that the new rulers are at first considered 'barbarians' in comparison to the previous ones. **As they establish themselves at the center of their empire, they become increasingly lax, less coordinated, disciplined and watchful, and more concerned with maintaining their new power and lifestyle. Their *asabiyya* dissolves into factionalism and individualism, diminishing their capacity as a political unit.**

https://archive.org/details/DiscussionsOfRobertLewisDabneyVol.4Secular/page/n187/mode/2up?view=theater

It is only pride which hides the danger from our eyes. A friend from Virginia was conversing, in London, with an old English navy surgeon, who was intimately acquainted with the British West-India Islands. He assured the Virginian that the "reconstruction acts" tended directly to amalgamation, and would surely result in it if persevered in. **"Never," exclaimed my Virginia friend, "In our case, our people's pride of race will effectually protect them from that last infamy." "Had ever any people," replied the ex-surgeon, "more pride of race than the English? Yet they are amalgamating in Jamaica. We have the teachings of forty years' experience in this matter; when your emancipation has become, like ours, forty years old, you will see." The Virginian was silenced.** Even now, after ten years of the misery and shame of subjugation, one has only to open his eyes to see the crumbling away of the social barriers between the two races. **[Feb. 21, 1876]**

https://en.wikipedia.org/wiki/Houston_Stewart_Chamberlain#Kaiser_Wilhelm_II

In 1903, Chamberlain wrote to Wilhelm to claim that as in the last decadent days of Rome, "the *civis britannicus* is now become a purely political concept" with no racial content being involved.[133] Chamberlain wrote with disgust how for two shillings and a sixpence, "every Basuto nigger" could now carry a British passport.[133] **Chamberlain went on to predict that within the next fifty years "the English aristocracy will be nothing but a money oligarchy, without a shred of racial solidarity or relation to the throne."**[133]

Baron of the Taiga on X: Yes, in some ways that is also true. **You could see it in comparing the maternal protectiveness of the British over Ulster, then a long period of quiet, and the next time they even entered the British conscience, they were "backward DUP homophobic abortion-deniers."**

https://www.gutenberg.org/cache/epub/7684/pg7684-images.html#link2HCH0006

The Norman position in France, indeed, in much resembled that of the Spartan in Greece. He had forced a settlement with scanty numbers in the midst of a subjugated and sullen population, surrounded by jealous and formidable foes. **Hence sobriety was a condition of his being, and the policy of the chief lent a willing ear to the lessons of the preacher. Like the Spartan, every Norman of pure race was free and noble; and this consciousness inspired not only that remarkable dignity of mien which Spartan and Norman alike possessed, but also that fastidious self-respect which would have revolted from exhibiting a spectacle of debasement to inferiors.** And, lastly, as the paucity of their original numbers, the perils that beset, and the good fortune that attended them, served to render the Spartans the most religious of all the Greeks in their dependence on the Divine aid; so, perhaps, to the same causes may be traced the proverbial piety of the ceremonial Normans; they carried into their new creed something of feudal loyalty to their

spiritual protectors; did homage to the Virgin for the lands that she vouchsafed to bestow, and recognised in St. Michael the chief who conducted their armies.

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Tacitus/Annals/14A*.html#ref59

27 1 **In the same year, [60 AD] Laodicea, one of the famous Asiatic cities, was laid in ruins by an earthquake, but recovered by its own resources, without assistance from ourselves.** In Italy, the old town of Puteoli acquired the rights and title of a colony from Nero. Veterans were drafted into Tarentum and Antium, but failed to arrest the depopulation of the districts, the majority slipping away into the provinces where they had completed their years of service; while, as they lacked the habit of marrying wives and rearing families, the homes they left behind them were childless and without heirs. **For the days had passed when entire legions—with tribunes, centurions, privates in their proper centuries—were so transplanted as to create, by their unanimity and their comrade-ship, a little commonwealth. [ut consensu et caritate rem publicam efficerent] The settlers now were strangers among strangers; men from totally distinct maniples; leaderless; mutually indifferent; suddenly, as if they were anything in the world except soldiers, massed in one place to compose an aggregate rather than a colony. [quasi ex alio genere mortalium repente in unum collecti, numerus magis quam colonia]**

...

Rome, however, by Machiavelli's own admission, did undermine the vigor of its original virtue by the enjoyment of its material results. **The empire's achievement of unprecedented wealth, security, and peace sapped the capacity for honor seeking and ambition, destroyed all local traditions of national independence, and at length generated a spiritual longing for a permanent kingdom of peace on earth, the seed bed of Christianity.**11 Much as he praises the ruthless dexterity of Rome's leaders, that praise is conspicuously absent when it comes to Julius Caesar and Octavian, who began the transition to a permanent peace and therefore the effemination of virtue.12

https://archive.org/details/in.ernet.dli.2015.231118/page/n259/mode/2up?view=theater

The very peace that Augustus had organized, and the security that he had won for Rome, had loosened the fibre of the people. No one wanted to enlist in the army, or recognize the inexorable periodicity of war. Luxury had taken the place of simplicity, sexual license was replacing parentage; **by its own exhausted will the great race was beginning to die.**

https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Florus/Epitome/1A*.html#I

7 The next period is the hundred and fifty years down to the time of Augustus Caesar, during which it spread peace throughout the world. This was the manhood and, as it were, the robust maturity of the empire. 8 **From the time of Caesar Augustus down to our own age there has been a period of not much less than two hundred years,[3] during which, owing to the inactivity of the emperors, the Roman people, as it were, grew old and lost its potency, save that under the rule of Trajan it again stirred its arms and, contrary to general expectation, again renewed its vigour with youth as it were restored.**

https://www.livius.org/sources/content/herodian-s-roman-history/herodian-2.11/

The men of Italy, long unused to arms and war, were devoted to farming and peaceful pursuits. [2.11.4] **As long as Roman affairs were governed by republican principles and the senate selected the generals who took charge of military affairs, all the Italians were under arms,** and controlled the lands and the seas, waging wars with Greeks and barbarians. There was no place on earth, no place under heaven, to which the Romans did not extend the borders of their empire. [2.11.5] **From the time when Augustus assumed control of the government, however, the *princeps* freed the Italians from the necessity of working and of bearing arms;** establishing forts and camps for the defense of the empire, he stationed mercenaries in these to serve as a defensive bulwark on the frontiers.

https://books.google.fi/books?id=INcgAwAAQBAJ&lpg=PP1&hl=fi&pg=PA454#v=onepage&q&f=false

The paradox of modernity, already foreseen by Machiavelli, is that although it liberates desire, thereby understanding itself to be more realistic and hard-headed than the ancient philosophers' "imagined republics," **that success in the liberation of desire leads in the long run to "effemination" and the unrealistic longing (far more unrealistic than anything envisioned by the ancient thinkers) for permanent peace. Much as Machiavelli admires the dynamic evolution of Rome from republic to empire, he deplores the full-blown imperial outcome,** which destroyed the spirit of

liberty as it crushed every remaining local republic, and, by making the subjects of its world-state soft, prosperous and insulated from the dangers that had prompted the republic's original rise, opened up a craving for universal peace and its religion, Christianity.

https://en.wikipedia.org/wiki/The_Art_of_War_(Machiavelli)

Written between 1519 and 1520 and published the following year, it was Machiavelli's only historical or political work printed during his lifetime, though he was appointed official historian of Florence in 1520 and entrusted with minor civil duties.

https://oll.libertyfund.org/title/machiavelli-the-art-of-war-neville-trans#lf0523_head_004

FABRIZIO: I will tell you willingly what I think. You know of the men excellent in war there have been many famed in Europe, few in Africa, and less in Asia. This results from (the fact that) these last two parts of the world have had a Principality or two, and few Republics; but Europe alone has had some Kingdoms and an infinite number of Republics. **And men become excellent, and show their virtu, according as they are employed and recognized by their Prince, Republic, or King, whichever it may be.**
…

Few men, therefore, spring up in Asia, because, as that province was entirely subject to one Kingdom, in which because of its greatness there was indolence for the most part, it could not give rise to excellent men in business (activity). The same happened in Africa: yet several, with respect to the Carthaginian Republic, did arise. More excellent men come out of Republics than from Kingdoms, because in the former virtu is honored much of the time, in the Kingdom it is feared; whence it results that in the former, men of virtu are raised, in the latter they are extinguished. Whoever, therefore, considers the part of Europe, will find it to have been full of Republics and Principalities, which from the fear one had of the other, were constrained to keep alive their military organizations, and honor those who greatly prevailed in them.
…

It is true, therefore, that where there are many Empires, more valiant men spring up, and it follows, of necessity, that those being extinguished, little by little, virtu is extinguished, as there is less reason which causes men to become virtuous. And as the Roman Empire afterwards kept growing, and having extinguished all the Republics and Principalities of Europe and Africa, and in greater part those of Asia, no other path to virtu was left, except Rome. **Whence it resulted that men of virtu began to be few in Europe as in Asia, which virtu ultimately came to decline; for all the virtu being brought to Rome, and as it was corrupted, so almost the whole world came to be corrupted, and the Scythian people were able to come to plunder that Empire, which had extinguished the virtu of others, but did not know how to maintain its own.**

> https://ccel.org/g/gibbon/decline/volume2/chap47.htm#Vth
>
> But the Latin churches were more jealous of the honor of Leo and the synod of Chalcedon: and if they had fought as they usually did under the standard of Rome, they might have prevailed in the cause of reason and humanity. **But their chief was a prisoner in the hands of the enemy; the throne of St. Peter, which had been disgraced by the simony, was betrayed by the cowardice, of Vigilius, who yielded, after a long and inconsistent struggle, to the despotism of Justinian and the sophistry of the Greeks.** His apostasy provoked the indignation of the Latins, and no more than two bishops could be found who would impose their hands on his deacon and successor Pelagius. **Yet the perseverance of the popes insensibly transferred to their adversaries the appellation of schismatics;** the Illyrian, African, and Italian churches were oppressed by the civil and ecclesiastical powers, not without some effort of military force; (97) the distant Barbarians transcribed the creed of the Vatican, and, in the period of a century, the schism of the three chapters expired in an obscure angle of the Venetian province. (98)

> Who is this that, against the evangelical ordinances, against the decrees of canons, presumes to usurp to himself a new name? Would indeed that one by himself he were, if he could be without any lessening of others,—**he that covets to be universal.**
> …
>
> **If then any one in that Church takes to himself that name, whereby he makes himself the head of all the good, it follows that the Universal Church falls from its standing (which God forbid), when he who is called Universal falls.** But far from Christian hearts be

that name of blasphemy, in which the honour of all priests is taken away, while it is madly arrogated to himself by one.

http://www.amnation.com/vfr/archives/003338.html

However, alongside its good and sensible parts about Judaism, *Nostra Aetate* also had some very foolish and dangerous things to say about Islam:

> Since in the course of centuries not a few quarrels and hostilities have arisen between Christians and Moslems,
> ***this sacred synod urges all to forget the past*** and to work sincerely for mutual understanding and to preserve as well as to promote together for the benefit of all mankind social justice and moral welfare, as well as peace and freedom. [Italics added.]

…

No wonder Europe forgot. The historic core of Europe, the Catholic Church, *told* it to forget.

And although afterwards that Empire, because of the inundation of those barbarians, became divided into several parts, this virtu was not renewed: first, because a price is paid to recover institutions when they are spoiled; another, <u>because the mode of living today, with regard to the Christian religion, does not impose that necessity to defend it that anciently existed</u>, in which at the time men, defeated in war, were either put to death or remained slaves in perpetuity, where they led lives of misery: the conquered lands were either desolated or the inhabitants driven out, their goods taken away, and they were sent dispersed throughout the world, so that those overcome in war suffered every last misery. Men were terrified from the fear of this, and they kept their military exercises alive, and honored those who were excellent in them. **But today, this fear in large part is lost, and few of the defeated are put to death, and no one is kept prisoner long, for they are easily liberated.** The Citizens, although they should rebel a thousand times, are not destroyed, goods are left to their people, so that the greatest evil that is feared is a ransom; so that men do not want to subject themselves to dangers which they little fear. **Afterwards, <u>these provinces of Europe exist under very few Heads as compared to the past</u>, for all of France obeys a King, all of Spain another, and Italy exists in a few parts;** so that weak Cities defend themselves by allying themselves with the victors, and strong States, for the reasons mentioned, do not fear an ultimate ruin.
…

And that that which I have discussed is true, **consider Germany, in which, because there are many Principalities and Republics, there is much virtu, and all that is good in our present army, depends on the example of those people, who, being completely jealous of their State [as they fear servitude, which elsewhere is not feared] maintain and honor themselves all as Lords.**

https://www.ccel.org/g/gibbon/decline/volume2/chap53.htm#Franks

> In the beginning of the tenth century, the family of Charlemagne had almost disappeared; his monarchy was broken into many hostile and independent states; the regal title was assumed by the most ambitious chiefs; their revolt was imitated in a long subordination of anarchy and discord, and the nobles of every province disobeyed their sovereign, oppressed their vassals, and exercised perpetual hostilities against their equals and neighbours. **Their private wars, which overturned the fabric of government, fomented the martial spirit of the nation. <u>In the system of modern Europe, the power of the sword is possessed, at least in fact, by five or six mighty potentates;</u> their operations are conducted on a distant frontier, by an order of men who devote their lives to the study and practice of the military art: the rest of the country and community enjoys in the midst of war the tranquillity of peace, and is only made sensible of the change by the aggravation or decrease of the public taxes. In the disorders of the tenth and eleventh centuries, every peasant was a soldier,** and every village a fortification; each wood or valley was a scene of murder and rapine; and the lords of each castle were compelled to assume the character of princes and warriors. To their own courage and policy they boldly trusted for the safety of their family, the protection of their lands, and the revenge of their injuries; and, like the conquerors of a larger size, they were too apt to transgress the privilege of defensive war. The powers of the mind and body were hardened by the presence of danger and necessity of resolution: the same spirit refused to desert a friend and to forgive an enemy; **and, instead of sleeping under the guardian care of a magistrate, they proudly disdained the authority of the laws.** In the days of feudal anarchy, the instruments of agriculture and art were converted into the weapons of bloodshed: the peaceful occupations of civil and ecclesiastical society were abolished or corrupted; and the bishop who exchanged his mitre for a helmet, was more forcibly urged by the manners of the times than by the obligation of his tenure. (89)

https://www.gutenberg.org/cache/epub/2333/pg2333-images.html#link2H_4_0001

> **Amongst the rude nations which lay beyond the Alps, valor was absolutely indispensable. Without it none could be eminent, few could be secure. Cowardice was, therefore, naturally considered as the foulest reproach.** Among the polished Italians, enriched by commerce, governed by law, and passionately attached to literature, everything was done by superiority of intelligence. Their very wars, more pacific than the peace of their neighbors, required rather civil than military qualifications. Hence, while courage was the point of honor in other countries, ingenuity became the point of honor in Italy.

https://www.gutenberg.org/cache/epub/1232/pg1232-images.html#chap04

I answer that the principalities of which one has record are found to be governed in two different ways; either by a prince, with a body of servants, who assist him to govern the kingdom as ministers by his favour and permission; **or by a prince and barons, who hold that dignity by antiquity of blood and not by the grace of the prince.** Such barons have states and their own subjects, who recognize them as lords and hold them in natural affection. Those states that are governed by a prince and his servants hold their prince in more consideration, because in all the country there is no one who is recognized as superior to him, **and if they yield obedience to another they do it as to a minister and official, and they do not bear him any particular affection.**

The examples of these two governments in our time are the Turk and the King of France. The entire monarchy of the Turk is governed by one lord, the others are his servants; and, dividing his kingdom into sanjaks, he sends there different administrators, and shifts and changes them as he chooses. **But the King of France is placed in the midst of an ancient body of lords, acknowledged by their own subjects, and beloved by them; they have their own prerogatives, nor can the king take these away except at his peril.**

>
> His victory at Marignano (1515) over the Swiss who were defending Maximilian Sforza established the young king's reputation in Italy. He took advantage of this at "the interview of Bologna" to bring to a successful termination the efforts of his predecessors, Charles VII and Louis XI, to impose on Leo X the concordat which governed the organization of the French Church from that time till the end of the old regime (see FRANCE). **This marked the beginning of a series of measures destined to establish in France the preponderance of the royal power.** Francis I sought by every means, even by exceptional tribunals, to destroy among the nobles, both bishops and *seigneurs* (lords), the spirit of independence. **The formula of royal edicts "car tel est notre bon plaisir" (because it is our good pleasure) dates from his reign.**

…

The causes of the difficulties in seizing the kingdom of the Turk are that the usurper cannot be called in by the princes of the kingdom, nor can he hope to be assisted in his designs by the revolt of those whom the lord has around him. This arises from the reasons given above; for his ministers, being all slaves and bondmen, can only be corrupted with great difficulty, and one can expect little advantage from them when they have been corrupted, as they cannot carry the people with them, for the reasons assigned. Hence, he who attacks the Turk must bear in mind that he will find him united, and he will have to rely more on his own strength than on the revolt of others; but, if once the Turk has been conquered, and routed in the field in such a way that he cannot replace his armies, **there is nothing to fear but the family of this prince, and, this being exterminated, there remains no one to fear, the others having no credit with the people;** and as the conqueror did not rely on them before his victory, so he ought not to fear them after it.

Let a prince therefore look to that period which extends from Nerva to Marcus, and contrast it with that which went before and that which came after, and then let him say in which of them he would wish to have been born or to have reigned. For during these times in which good men governed, he will see the prince secure in the midst of happy subjects, and the whole world filled with peace and justice. **He will find the senate maintaining its authority, the magistrates enjoying their honours, rich citizens their wealth, rank and merit held in respect, ease and content everywhere prevailing, rancour, licence, corruption and ambition everywhere quenched, and that golden age restored in which every one might hold and support what opinions he pleased.**

Machiavelli makes no mention of men being fulfilled or made fully human by political participation. And in any event, such participation was not widespread under the emperors.24 **Indeed, his description of the golden times included freedom of opinion or conscience – a concern notably absent from the ancient *polis*, but characteristic of modern liberal societies.**

Epicurus respected the state as a necessary evil, under whose protection he might live unmolested in his garden, but he appears to have cared little about national independence; **indeed, his school seems to have preferred monarchy to democracy, as less inclined to persecute heresy[32]—an arresting inversion of modern beliefs.**

The eight carried on the war, and the others admonished during three years, when the death of the pontiff put an end to the hostilities, which had been carried on which so much ability, and with such entire satisfaction to the people, that at the end of each year the eight were continued in office, **and were called *Santi*, or holy, although they had set ecclesiastical censures at defiance, plundered the churches of their property, and compelled the priests to perform divine service. So much did citizens at that time prefer the good of their country to their ghostly consolations, and thus showed the church, that if as her friends they had defended, they could as enemies depress her;** for the whole of Romagna, the Marches, and Perugia were excited to rebellion.

https://en.wikipedia.org/wiki/War_of_the_Eight_Saints

Florence incited a revolt in the Papal States in 1375. Florentine agents were sent to more than forty cities in the papal states – including Bologna, Perugia, Orvieto and Viterbo – to foment rebellion, many of which had only been re-submitted to papal authority by the efforts of Cardinal Gil Álvarez Carrillo de Albornoz.[3] **Humanist Chancellor of Florence Coluccio Salutati disseminated public letters urging the cities to rebel against the "tyrannical" and "corrupt" papal rule, instead urging a return to *all'antica* Republicanism.**[3]
…

Pope Gregory XI excommunicated all members of the government of Florence and placed the city under interdict on March 31, 1376,[6] banning religious services in Florence and legalizing the arrest and enslavement[7] of Florentines and the confiscation of their property throughout Europe.[3] Initially, rather than attempting to disobey the interdict, Florentines organized extra-ecclesiastical processions (including flagellants) and confraternities, including the re-emergence of groups such as the Fraticelli, who had previously been deemed heretical.[3] **The edifice of the Florentine inquisition was destroyed, and the Signoria rolled back legal restrictions on usury and other practices frowned on by the (now defunct) ecclesiastical courts.**[8]

However, in October 1377, the government of Florence forced the clergy to resume religious services causing Angelo Ricasoli, Bishop of Florence, and Neri Corsini, Bishop of Fiesole, to flee Florentine territory.[3] **The heavy fines and confiscations issued by the Signoria on prelates who left their posts,**[3] **the "most extensive liquidation of an ecclesiastical patrimony attempted anywhere in Europe before the Reformation," may have been motivated to pay for the increasingly expensive conflict.**[1] The total cost of the war for Florence would reach approximately 2.5 million florins.[9]

https://en.wikipedia.org/wiki/Bernardo_di_Niccol%C3%B2_Machiavelli

Bernardo di Niccolò Machiavelli (between 1426 and 1429-1500) was a citizen of Florence and father to Niccolò Machiavelli. Although **he was a Doctor of Law (hence, his title of *Messer*),** debts inherited from his father and uncles limiting his career prevented him from joining the legal guild. In the year 1480, Bernardo reported being unemployed on his tax return.[1]

They who lay the foundations of a State and furnish it with laws must, as is shown by all who have treated of civil government, and by examples of which history is full, assume that all men are bad, and will always, when they have free field, give loose to their evil inclinations; and that if these for a while remain hidden, it is owing to some secret cause, which, from our having no contrary experience, we do not recognize at once, but which is afterwards revealed by Time, of whom we speak as the father of all truth.

In Rome, after the expulsion of the Tarquins, it seemed as though the closest union prevailed between the senate and the commons, and that the nobles, laying aside their natural arrogance, had learned so to sympathize with the people as to have become supportable by all, even of the humblest rank. **This dissimulation remained undetected, and its causes concealed, while the Tarquins lived; for the nobles dreading the Tarquins, and fearing that the people, if they used them ill, might take part against them, treated them with kindness.** But no sooner were the Tarquins got rid of, and the nobles thus relieved of their fears, when they began to spit forth against the commons all the venom which before they had kept in their breasts, offending and insulting them in every way they could; **confirming what I have observed already, that men never behave well unless compelled, and that whenever they are free to act as they please, and are under no restraint everything falls at once into confusion and disorder. Wherefore it has been said that as poverty and hunger are needed to make men industrious, so laws are needed to make them good.**

> Aber Spurius schüttelte den Kopf: »'s ist nicht nur das! Sie wissen recht gut, kommt es zum Krieg, Merowech wird auch von ihren Gauleuten zum Herzog gekoren, Merowech müssen auch sie dann folgen.«—»Jawohl«, rief Mälo schmerzlich, »das ist's!«—»Ja«, schloß Merowech: »Lieber dem Fremden, dem Römer dienen als dem Stammgenossen sich fügen auch nur ein weniges. Siehst du, Spurius, hörst du, Adgandester: **Das ist die eine Gefahr, die furchtbare, die unser Volk bedroht; der uralte Neid, die Eifersucht, die trotzige Selbstgenügsamkeit, die Unbotmäßigkeit.** Nicht in bald vier Jahrhunderten haben sie's gemerkt, daß diese Sinnesart sie alle miteinander zugrunde gerichtet. **Nur die Not, die Not gemeinsamen Krieges, kann sie heilen von dem Erblaster der zwieträchtigen Eifersucht.**«

We also cannot accept the assertion that he was the first to realize what some people call the narrowness of the traditional condemnation of tyranny. This assertion is indeed confirmed rather than refuted by the fact that Machiavelli sometimes takes up what Aristotle said about the means for preserving tyranny; for, as soon as we consider the context, **we see that Aristotle treats tyranny as a monstrosity whereas Machiavelli rather deals with tyranny as essential to the foundation of society itself.**
...

Machiavelli's most emphatic attack on "all writers" is directed, not against the traditional condemnation of tyranny but against the traditional contempt for the multitude.218 **This may incline us to believe that he was the philosopher who originated the democratic tradition; the undeniably non-democratic character of classical political philosophy might thus seem to some extent to justify Machiavelli's revolt which, through Spinoza and Rousseau, led to democratic theory proper.** But just as in the case of tyranny, we must note here that the change in judgment is only a part of a comprehensive argument meant to lay bare the essential dependence of morality on society: the unmasking of the alleged aristocracy of the classics as oligarchy leads necessarily to a somewhat more favorable judgment on the common people, and the unmasking of the rule of men of moral worth is part of the destructive analysis of moral virtue. The result of that analysis can be stated as follows. **Moral virtue, wished for by society and required by it, is dependent on society and therefore subject to the primary needs of society. It does not consist in the proper order of the soul. It has no other source than the needs of society; it has no second and higher source in the needs of the mind.**

https://www.gutenberg.org/cache/epub/10827/pg10827-images.html

It may be that in attempting to defend a cause, **which, as I have said, all writers are agreed to condemn,** I take upon me a task so hard and difficult that I shall either have to relinquish it with shame or pursue it with opprobrium. Be that as it may, I neither do, nor ever shall judge it a fault, to support opinion by arguments, where it is not sought to impose them by violence or authority. **I maintain, then, that this infirmity with which historians tax the multitude, may with equal reason be charged against every individual man, but most of all against princes, since all who are not controlled by the laws, will commit the very same faults as are committed by an uncontrolled multitude.** Proof whereof were easy, since of all the many princes existing, or who have existed, few indeed are or have been either wise or good.

I speak of such princes as have had it in their power to break the reins by which they are controlled, among whom I do not reckon those kings who reigned in Egypt in the most remote antiquity when that country was governed in conformity with its laws; nor do I include those kings who reigned in Sparta, nor those who in our own times reign in France, which kingdom, more than any other whereof we have knowledge at the present day, is under the government of its laws.
...

Wherefore the nature of a multitude is no more to be blamed than the nature of princes, since both equally err when they can do so without regard to consequences. Of which many instances, besides those already given, might be cited from the history of the Roman emperors, and of other princes and tyrants, in whose lives we find such inconstancy and fickleness, as we might look in vain for in a people.

I maintain, therefore, contrary to the common opinion which avers that a people when they have the management of affairs are changeable, fickle, and ungrateful, that these faults exist not in them otherwise than as they exist in individual princes; **so that were any to accuse both princes and peoples, the charge might be true, but that to make exception in favour of princes is a mistake;** for a people in command, if it be duly restrained, will have the same prudence and the same gratitude as a prince has, or even more, however wise he may be reckoned; and a prince on the other hand, if freed from the control of the laws, will be more ungrateful, fickle, and short-sighted than a people.

https://en.wikisource.org/wiki/Cato%27s_Letters/Letter_119

If we now consider absolute monarchy, we shall find it grafted upon ingratitude, which is blended with the root of it. **Arbitrary princes cannot, dare not, be grateful to elevated merit, which by the tenour of their power they are obliged to dread.** They only consider their single selves, and their separate interest; and must cut off, for their own security, every man whose true glory may eclipse their false, and who draws away, in any degree, the thoughts and eyes of the people. If they have no magnanimity of their own, they hate or fear such as have; or if they are brave themselves, they will be jealous of those who are more so, or as much. The same may be said of every other virtue. **They may heap wealth upon buffoons, and confer dignities upon parasites; but celebrated virtue, conspicuous abilities, and signal services, are their eye-sores and certain aversion.**

https://www.pagebypagebooks.com/Gilbert_K_Chesterton/Heretics/Paganism_and_Mr_Lowes_Dickinson_p6.html

The weak point in the whole of Carlyle's case for aristocracy lies, indeed, in his most celebrated phrase. **Carlyle said that men were mostly fools. Christianity, with a surer and more reverent realism, says that they are all fools. This doctrine is sometimes called the doctrine of original sin. It may also be described as the doctrine of the equality of men.** But the essential point of it is merely this, that whatever primary and far-reaching moral dangers affect any man, affect all men. All men can be criminals, if tempted; all men can be heroes, if inspired. And this doctrine does away altogether with Carlyle's pathetic belief (or any one else's pathetic belief) in "the wise few." There are no wise few. **Every aristocracy that has ever existed has behaved, in all essential points, exactly like a small mob.**

https://web.archive.org/web/20120207131045/http://www.wku.edu/~jan.garrett/lipsius2.htm

The Romans in time past imposed a grievous yoke upon the neck of the whole world, but yet a yoke that proved wholesome in the end, whereby barbarism was expelled from our minds, as the sun drives away darkness from our eyes. What had the Frenchmen, we ourselves, and the Germans been at this day if the light of that mighty empire had not shined upon us? Fierce, uncivil, delighting in slaughters betwixt ourselves and others, contemners of God and men. **Even so, I guess, it will come to pass with the new world which the Spaniards have wasted with a profitable severity, and themselves will shortly replenish again with people and inhabit it.**

https://quod.lib.umich.edu/e/eebo/A52748.0001.001?rgn=main;view=fulltext

And as to our present case **Machiavel** ***speaks very aptly;**** ***that*** **a Nation which hath cast off the yoke of Tyranny or Kingship, (*for in his language they are both the same thing*)** and newly obtained their Liberty, must look to have all those for Enemies, that were Familiars and Retainers to the King or Tyrant, who having lost their Preferments, will never rest, but seek all occasions to re-establish themselves upon the ruines of Liberty, and to aspire again unto a Tyranny; that exercising an arbitrary Power, they may take the more sharp Revenge, against all those that dare but pretend unto Liberty. ...

In our Country here, before the time that *Caesar*'s Tyranny tooke place, there was no such thing as *Monarchy:** For, the same *Caesar* tells us, how the *Britains* were divided into so many severall States; relates how *Cassevellanus* was, by the Common Councell of the Nation, elect in this their publique danger, to have the principall administration of the State, with the businesse of Warre: and afterward how the severall Cities sent their Hostages unto him. Whereby we perceive it was of old no *Monarchy,* but like to the *Gaules,* with whom it was then one also in Religion, divided into provincall Regiments;* without any entire rule or Combination; onely in case of common perill, by Invasion, &c. they were wont to chuse a Commander in Chief, much like the *Dictator* chosen by the *Romans* upon the

like occasion. **And now we see all the *Western* world (lately discovered) to be, and generally all other Countries are, *in puris naturalibus,* in their first and most innocent condition, setled in the same Form, before they come to be inslaved, either by some predominant power from abroad, or some one among Themselves more potent and ambitious than his Neighbors. And such was the State heretofore, not onely of our Nation, but of *Gaule, Spaine, Germany,* and all the West parts of *Europe,* before the *Romans* did by strength and cunning unlock their Liberties.** And such as were then termed *Kings,* were but as their *Generalls* in War, without any other great Jurisdiction.

Machiavelli already foresees that his "new path" will require "unknown lands" comparable to the one discovered by Columbus, and the founding of a New Rome required by the international and multinational scope of Machiavelli's republican prescription. Hobbes's philosophy, by contrast, envisions politics as nothing but a mechanism for internal control, one in principle capable of limitless extension but bereft of the full-blooded patriotism, love of the earthly fatherland, and the exhilarating scope of imperial conquest and Elizabethan swashbuckling to which Machiavelli gives rise. This is why, as we consider in more detail in the Conclusion, a visionary of Atlanticist, Protestant republicanism like James Harrington – a project for commercial imperialism already underway in Tudor and Stuart mercantilism and exploding in the New World – could extol Machiavelli's republicanism while decrying Hobbes as an apologist for absolute monarchy without any sense of contradiction. **Hobbes is a successor of Machiavelli, but only of a narrow version of his thought.**
